Glossary: Jane's Fighting Ships

Type abbreviations are listed at head of Pennant List

AAW	Anti-Air Warfare	EEZ	Exclusive Economic Zone
ACDS	Advanced Combat Direction System	EHF	Extreme High Frequency
ADCAP	ADvanced CAPabilities	ELF	Extreme Low Frequency radio
AEW	Airborne Early Warning	ELINT	Electronic intelligence, for example, recording radar, W/T and so on
AIP	Air Independent Propulsion	EMALS	Electromagnetic Aircraft Launching System
ALSC	Afloat Logistics and Sealift Capability	ERGM	Extended-Range Guided Munitions
ARCI	Acoustic Rapid COTS Insertion	ESM	Electronic Support Measures for example, intercept
ARM	Anti-Radiation Missile	ESSM	Evolved Sea Sparrow Missile
ASDS	Advanced Swimmer Delivery System	EW	Electronic Warfare
A/S, ASW	Anti-Submarine (Warfare)	FLIR	Forward-Looking Infra-Red
ASM	Air-to-Surface Missile	FRAM	Fleet Rehabilitation And Modernisation programme
ASROC	Rocket assisted torpedo, part of whose trajectory is in the air	GCCS	Global Command and Control System
ASV	Air-to-Surface Vessel	GFCG	Gun Fire-Control System
AUV	Autonomous Underwater Vehicle	GPS	Global Positioning System
BPDMS	Base Point Defence Missile System	grt	gross registered tonnage (see tonnage)
Cal	Calibre - the diameter of a gun barrel; also used for measuring length of the barrel for example a 6 in gun 50 calibres long (6 in/50) would be 25 ft long	HDTI	High Definition Thermal Imager
CEC	Co-operative Engagement Capability	HIFR	Helicopter In-Flight Refuelling
CIWS	Close-In Weapon System	HF	High Frequency
CODAG,	Descriptions of mixed propulsion systems:	Horsepower (hp)	Power developed or applied:
CODOG,	combined diesel and gas turbine electric,	or (hp(m))	
CODAGE	diesel or gas turbine, gas turbine and gas turbine, gas	(a)	bhp: brake horsepower = power available at the crankshaft
CODLAG,	diesel and gas turbine, diesel-electric and gas turbine,	(b)	shp: shaft horsepower = power delivered to the propeller shaft
CODLAG,	turbine or gas turbine, steam and gas turbine, gas	(c)	ihp: indicated horsepower = power produced by expansion of gases in the cylinders of reciprocating steam engines
COGOG,	turbine and electricity	(d)	1 kW = 1.341 hp = 1.360 metric hp 1 hp = 0.746 kW = 1.014 metric hp 1 metric hp = 0.735 kW = 0.968 hp
COSAG,		(e)	Sustained horsepower may be different for similar engines in different conditions
COGAL			
COTS	Commercial Off-The-Shelf	IFF	Identification Friend/Foe
cp	controllable pitch (propellers)	IRST	Infra-Red Search and Track
DDS	Dry Dock Shelter	JMCIS	Joint Maritime Command Information System
DP	Dual Purpose (gun) for surface or AA use	JTIDS	Joint Tactical Information Distribution System
Displacement	Basically the weight of water displaced by a ship's hull when floating:	kT	kiloton
	(a) Light: without fuel, water or ammunition	kW	kilowatt
	(b) Normal: used for Japanese MSA ships. Similar to 'standard'	LAMPS	Light Airborne Multipurpose System
	(c) Standard: as defined by Washington Naval Conference 1922 - fully manned and stored but without fuel or reserve feed-water	LAMS	Local Area Missile System
	(d) Full load: fully laden with all stores, ammunition, fuel and water	Length	Expressed in various ways:
dwt	deadweight tonnage (see tonnage)	(a)	oa: overall = length between extremities
EARS	Electromagnetic Aircraft Recovery System	(b)	pp: between perpendiculars = between fore side of the stem and after side of the rudderpost
ECM	Electronic countermeasures, for example, jamming	(c)	wl: waterline = between extremities on the water-line
ECCM	Electronic counter-countermeasures		

SOHN WON-IL

10/2008*, P Fraud / 1353685

GLOSSARY: JANE'S FIGHTING SHIPS

LF	Low Frequency	SSDE/SSE	Submerged Signal and Decoy Ejector
MAD	Magnetic Anomaly Detector	SSDS	Ship Self-Defence System
MDF	Maritime Defence Force	SSM	Surface-to-Surface Missile
Measurement	See Tonnage	SSTDs	Surface Ship Torpedo Defence System
MF	Medium Frequency	STIR	Surveillance Target Indicator Radar
MFCS	Missile Fire-Control System	STOBAR	Short Take Off and Barrier Arrested Recovery
MG	Machine Gun	STOVL	Short Take Off and Vertical Landing
MIDAS	Mine and Ice Detection Avoidance System	SUM	Surface-to-Underwater Missile
MIRV	Multiple, Independently targetable Re-entry Vehicle	SURTASS	Surface Towed Array Surveillance System
MPA	Maritime Patrol Aircraft	SWATH	Small Waterplane Area Twin Hull
MSA	Japan Maritime Safety Agency	TACAN	Tactical Air Navigation beacon
MSC	US Military Sealift Command	TACTASS	Tactical Towed Acoustic Sensor System
MW	Megawatt	TAINS	Tercom Aided Inertial Navigation System
NBC	Nuclear, Biological and Chemical (warfare)	TAS	Target Acquisition System
net	net registered tonnage (see tonnage)	TASM	Tomahawk Anti-Ship Missile
n mile	nautical mile (mean value 1.8532 km)	TASS	Towed Array Surveillance System
NMRS	Near-term Mine Reconnaissance System	TBMD	Theatre Ballistic Missile Defence
NTDS	Naval Tactical Direction System	Tercom	Terrain Contour Matching
oa	overall length	TLAM	Tomahawk Land Attack Missile
OTC	Officer in Tactical Command	Tonnage	Measurement tons, computed on capacity of a ship's hull rather than its 'displacement' (see above):
OTH	Over The Horizon Targeting		(a) Gross: the internal volume of all spaces within the hull and all permanently enclosed spaces above decks that are available for cargo, stores and accommodation. The result in cubic feet divided by 100 = gross tonnage
PAAMS	Principal Anti-Air Missile System		(b) Net: gross minus all those spaces used for machinery, accommodation and so on ('non-earning' spaces)
PAP	Poisson Auto Propulse		(c) Deadweight (dwt): the amount of cargo, bunkers, stores and so on, that a ship can carry at her load draught
PDMS	Point Defence Missile System	Tonne	1,000 kilos = 2,204.6 lb
PWR	Pressurised Water Reactor		Imperial (long) ton = 1.016 tonne or 2,240 lb
QRCC	Quick Reaction Combat Capability		US (short) ton = 0.9072 tonne or 2,000 lb
RAIDS	Rapid Anti-ship missile Integrated Defence System	UAV	Unmanned Aerial Vehicle
RAM	Radar Absorbent Material	UCAV	Unmanned Combat Aerial Vehicle
RAM	Rolling Airframe Missile	UHF	Ultra-High Frequency
RAS	Replenishment At Sea	USM	Underwater-to-surface missile
RAST	Recovery, Assist, Secure and Traverse system	USV	Unmanned Surface Vehicle
RBU	Anti-submarine rocket launcher	UUV	Unmanned Undersea Vehicle
RCS	Radar Cross Section	VDS	Variable Depth Sonar, can be lowered to best listening depth. In helicopters called 'dunking sonar'.
RIB	Rigid Inflatable Boat		Vertical replenishment
Ro-Ro	Roll-on/Roll-off	Vertrep	Vertical replenishment
ROV	Remote Operated Vehicle	VLF	Very Low Frequency radio
rpm	revolutions per minute	VLS	Vertical Launch System
SAM	Surface-to-Air Missile	VSTOL	Vertical or Short Take-Off/Landing
SAR	Search And Rescue	VSV	Very Slender Vessel
SATCOM	SATellite COMmunications	VTOL	Vertical Take-Off/Landing
SAWCS	Submarine Acoustic Warfare Countermeasures System	wt	waterline length
SES	Surface Effect Ship		
SHF	Super High Frequency		
SINS	Ship's Inertial Navigation System		
SLBM	Submarine-Launched Ballistic Missile		
SLCM	Ship-Launched Cruise Missile		
SLEP	Service Life Extension Programme		
SMCS	Submarine Command System		
SRBOC	Super Rapid Blooming Offboard Chaff		

FRIDTJOF NANSEN

1/2008*, Michael Nitz / 1353686

How to use: Jane's Fighting Ships

(see also Glossary and Type abbreviations)

- (1) Details of major warships are grouped under six separate non-printable headings. These are:-
 - (a) **Number and Class name.** Totals of vessels per class are listed as 'in service + building (proposed)' or 'in service + transfer (proposed)'.
 - (b) **Building programme.** This includes builders' names and key dates. In general the 'laid down' column reflects keel laying but modern shipbuilding techniques make it difficult to be specific about the start date of actual construction. Launching and christening can be similarly confusing, now that many ships are lowered into the water and formally christened some time later. Some nations commission their ships on completion of building, others after the ships have completed trials. In this hardcopy edition any date after April 2009 is projected or estimated and therefore liable to change.
 - (c) **Hull.** This section tends to have only specification and performance parameters and contains little free text. Hull related details such as **Military lift** and **Cargo capacity** may be included when appropriate. **Displacement** and **Measurement** tonnages, **Dimensions**, **Horsepower** and so on, are defined in the Glossary. Throughout the life of a ship its displacement tends to creep upwards as additional equipment is added and redundant fixtures and fittings are left in place. For the same reasons, ships of the same class, active in different navies, frequently have different displacements and other dissimilar characteristics. Unless otherwise stated the lengths and widths given are overall and the draught is at full load. Sustained maximum horsepower is given where the information is available and may not be the same for similar engines operating in different hulls under different conditions. **Speed** is the maximum obtainable under trials conditions.
 - (d) **Weapon systems.** This section contains operational details and some free text on weapons and sensors which are laid out in a consistent order using the same subheadings throughout the book. The titles are:- **Missiles** (subdivided into SLBM, SSM, SAM, A/S); **Guns** (numbers of barrels are given and the rate of fire is 'per barrel' unless stated otherwise); **Torpedoes**; **A/S mortars**; **Depth charges**; **Mines**; **Countermeasures**; **Combat data systems**; **Weapons control**; **Electro-optic systems**; **Radars**; **Sonars**. The Weapons control heading is used for weapons' direction equipment. In most cases the performance specifications are those of the manufacturer and may therefore be considered to be at the top end of the spectrum of effective performance. So-called 'operational effectiveness' is difficult to define, depends upon many variables and in the context of range may be considerably less than the theoretical maximum. Numbers inserted in the text refer to similar numbers included on line drawings.
 - (e) **Aircraft.** Only the types and numbers are included here. Where appropriate each country has a separate section listing overall numbers and operational parameters of front-line shipborne and land-based maritime aircraft, normally included after the Frigate section if there is one.
 - (f) **General comments.** A maximum of six sub-headings are used to sweep up the variety of additional information which is available but has no logical place in the other sections. These headings are: **Programmes**; **Modernisation**; **Structure**; **Operational**; **Sales** and **Opinion**. The last of these allows space for informed comment. Some ships remain theoretically in the order of battle in some navies even though they never go to sea and could be more accurately described as in reserve. Where this is known comment is made under **Operational**.
- (2) Minor or less important ship entries follow the same format except that there is often much less detail in the first four headings and all additional remarks are put together under the single heading of **Comment**. The distinction between major and minor depends upon editorial judgement and is primarily a function of firepower. The age of the ship or class and its relative importance within the Navy concerned is also taken into account.
- (3) The space devoted to front-line maritime aircraft reflects the importance of air power as an addition to the naval weapon systems armoury, but the format used is necessarily brief and covers only numbers, roles and operational characteristics. Greater detail can be found in *Jane's All the World's Aircraft* and the appropriate volume of the *Jane's Weapon Systems* series.
- (4) Other than for coastal navies, tables are included at the front of each country section with such things as strength of the fleet, senior appointments, personnel numbers, bases and so on. There is also a list of pennant numbers and a deletions column covering the previous three years. If you cannot find your favourite ship, always look in the **Deletions** list first.
- (5) No addenda is included because modern typesetting technology allows changes to the main text to be made up to a few weeks before publication.
- (6) Shipbuilding companies and weapons manufacturers frequently change their names by merger or takeover. As far as possible the published name shows the title when the ship was built or weapon system installed. It is therefore historically accurate.
- (7) Like many descriptive terms in international naval nomenclature, differences between Coast Guards, Maritime Police, Customs and other paramilitary maritime forces are often indistinct and particular to an individual nation. Such vessels are usually included if they have a paramilitary function and are armed.
- (8) When selecting photographs for inclusion, priority is given to those that have been taken most recently. A glossy picture five years old may look nice but often does not show the ship as it is now.
- (9) The Navies by country section is geared to the professional user who needs to be able to make an assessment of the fighting characteristics of a Navy or class of ship without having to cross refer to other Navies and sections of the book. Much effort has also been made to prevent entries spilling across from one page to another.
- (10) Regular updates can be found online at jfs.janes.com.
- (11) Photographs are dated and where * appears a new or re-scanned photograph has been substituted or added. Many are followed by a seven digit number to ease identification.

Jane's

Quality Policy

IHS Jane's is the world's leading unclassified information integrator for military, government and commercial organisations worldwide. To maintain this position, the Company will strive to meet and exceed customers' expectations in the design, production and fulfilment of goods and services.

Information published by IHS Jane's is renowned for its accuracy, authority and impartiality, and the Company is committed to seeking ongoing improvement in both products and processes.

IHS Jane's will at all times endeavour to respond directly to market demands and will also ensure that customer satisfaction is measured and employees are encouraged to question and suggest improvements to working practices.

IHS Jane's will continue to invest in its people through training and development to meet the Investor in People standards and changing customer requirements.

IHS Jane's Users' Charter

This publication is brought to you by IHS Jane's, a global company drawing on more than 100 years of history and an unrivalled reputation for impartiality, accuracy and authority.

Our collection and output of information and images is not dictated by any political or commercial affiliation. Our reportage is undertaken without fear of, or favour from, any government, alliance, state or corporation.

We publish information that is collected overtly from unclassified sources, although much could be regarded as extremely sensitive or not publicly accessible.

Our validation and analysis aims to eradicate misinformation or disinformation as well as factual errors; our objective is always to produce the most accurate and authoritative data.

In the event of any significant inaccuracies, we undertake to draw these to the readers' attention to preserve the highly valued relationship of trust and credibility with our customers worldwide.

If you believe that these policies have been breached by this title, you are invited to contact the editor.

A copy of IHS Jane's Code of Conduct for its editorial teams is available from the publisher.

DARING

8/2007*, BAE Systems Marine / 1353577

Executive overview: Fighting Ships

Introduction

The hijacking of *Sirius Star* on 15 November 2008 was one of the most noteworthy of many incidents of piracy over the last year. Fully laden with oil, the ship was captured approximately 450 n miles southeast of the Kenyan coast while en route to the United States via the Cape of Good Hope. While the ship was later released after the payment of a ransom, the incident symbolises the sophistication, boldness and ruthlessness of the Somali pirates, the difficulties in combating them faced by maritime forces and the lack of a suitable international system within which pirates can be brought to justice.

The world's navies have not been inactive; indeed there has been a welcome commonality of purpose demonstrated by nations, not all of whom are natural military partners. Multilateral efforts have included NATO and EU task groups as well as ships from Australia, China, India, Japan, South Korea, Russia and Singapore. Nor has there been any lack of robustness when forced to take self-defensive measures. Two assumed pirates were killed when a team from the British frigate, *Cumberland*, returned fire on a dhow that it was attempting to board, while the Indian frigate, *Tabar*, sank a Thai fishing vessel when fired upon by hijackers who had boarded the ship. Despite these efforts, the frequency of hijacking incidents has continued to rise.

According to the International Maritime Bureau, 51 vessels were attacked in the first three months of 2009 compared with 111 in the whole of 2008. This figure was a 200 per cent increase on the previous year. The capture of two ships up to 500 n miles offshore during late March and the *Maersk Alabama* incident in April 2009 demonstrated that their audacity and willingness to operate at long distances from land remain undiminished.

Three steps are required to mitigate the problem. First, the legal framework that covers military operations against pirates and the prosecution of suspects is in need of revision. Second, there is a need to improve maritime domain awareness. The 'horizon' of a single ship is limited by the performance of its sensors, and those of its embarked aircraft. While these could be augmented by land-based maritime patrol aircraft, the use of long dwell-time UAVs offer greater potential to build a reliable picture in which irregular or suspicious activity can be spotted. Third, tougher military measures are required both ashore and afloat. Surprise,

which has been the most effective weapon in the pirates' armoury, needs to be turned against them by using pre-emptive measures. Deterrence across a huge area of ocean is unlikely to succeed if ships are constrained to wait for the initiation of a hijacking which can take as little as 15 minutes. Ultimately, the solution to the problem lies in Somalia itself but, as restoration of the rule of law in that country remains a distant prospect, the problems of piracy in the region are destined to continue.

United States and Canada

US Africa Command (AFRICOM) became operational as a unified command on 1st October 2008 although its initial reception from African nations has been somewhat chilly due, it has been suggested, to American failure to gain prior support from key nations or from the African Union. For this reason, AFRICOM headquarters is likely to remain at Stuttgart, Germany, for the time being while Camp Lemonier in Djibouti, established in 2002 as a base for counterterrorism and humanitarian missions in the Horn of Africa, is to continue as the only US base on the continent. Despite lack of progress on land, a less politically sensitive sea-based approach is beginning to take effect.

The aim of the Africa Partnership Station (APS), modelled on the Global Fleet Stations concept, is both to provide a military presence in selected areas and to improve maritime security. This is achieved by the deployment of international training teams to build the skills, expertise and professionalism of African maritime forces. Typically, these are faced with problems of piracy, trafficking in drugs, humans and weapons, oil theft and illegal fishing. The first APS deployment to the Gulf of Guinea region was conducted by *Fort McHenry* and *Swift* from November 2007 to April 2008 and a further visit to the same area during February–May 2009 was made by *Nashville*. Time between major deployments is covered by shorter exercises and visits by ships, maritime patrol aircraft and mobile training teams. In the future, APS deployments are likely to expand into other regions of Africa. Overall the programme's relatively low profile is well suited to confidence-building and winning 'hearts and minds' and, in time, it could prove to be one of the US Navy's more enduring and productive initiatives.

The revival on 1 July 2008 of the US Fourth Fleet, originally established in 1943 and later disbanded in 1950, has also been controversial. Changing

GREEN BAY

6/2008*, US Navy, 1353678

attitudes to the US in South and Central America have evolved into outright hostility from some nations (Venezuela and Bolivia) to at best equivocation elsewhere in the continent. This has been a surprising trend in an area which, since the declaration of the Monroe Doctrine in 1823, has been regarded as part of the United States' backyard. A good example of deteriorating relationships has been the decision by the Ecuadorian government not to renew the lease of Manta airfield with a consequent loss of a conveniently located forward operating base for US maritime patrol and AWACS aircraft. Therefore, an underlying aim of the re-established fleet is to build relationships as well as to rationalise the various maritime missions conducted by US Southern Command. These include counter-terrorism and drug operations, security co-operation and training as well as humanitarian assistance and disaster relief.

The revival of the fleet is also recognition of the increasing strategic importance of the region, based on rising economic and military power: Latin America has been the United States' fastest growing regional trade partner in recent years. As with AFRICOM, the current aims and ethos of the new fleet are more about the exercise of 'soft' power than power projection. Ships and submarines are assigned on a temporary rather than permanent basis and recent activities have included exercises such as UNITAS and PANAMAX, both part of the Partnership of the Americas initiative. A notable achievement was the treatment of almost one hundred thousand patients during the 2008 deployment of the hospital ship *Comfort* to 12 nations in the region.

Notwithstanding these organisational and, to some extent, cultural changes, the US Navy is faced with hard decisions at a time when the future size and shape of the fleet is being scrutinised and debated by the new Obama administration and by Congress. Perhaps the only certainty about the new shipbuilding plan is that it is to be very different from its predecessor. In particular, aspirations to achieve a 313-ship navy are destined to be abandoned in favour of a more modest total, reflecting a possible cut of approximately 50 ships. Not only is there likely to be a reduction in numbers, but there could also be a shift of emphasis as a high-tech, high-cost approach is modified by a lower risk and more affordable plan. The carrier force is already planned to reduce from 11 to 10 during the two-year plus gap between the decommissioning of *Enterprise* in 2013 and the commissioning of *Gerald R Ford* in 2015. Adjustment to a five-year carrier build cycle means that this will become the permanent size of the force by 2040. The DDG 1000 programme has been reduced to three ships, although this is still subject to the successful negotiation of contracts. All of them are now likely to be built at Bath Iron Works rather than being shared between two shipyards. The future cruiser CGX programme has been delayed to allow time for a fundamental review of the requirement which could include consideration of nuclear propulsion. If so, overall numbers may be reduced from 19 ships to a possible eight and the design may not now be a derivative of DDG 1000.

It is unclear whether the resultant shortfall is to be compensated by the construction of other ships. In the short term, the DDG-51 building programme is to be re-started and this may be followed by an as yet undefined Future Surface Combatant. Plans for amphibious shipping and sea-basing programmes are also to be re-evaluated. Despite a somewhat checkered history, the Littoral Combat Ship programme looks to be one of the few to survive in its present form. Trials of *Freedom* were reported to have been successful and *Independence* is to sail for the first time in 2009. Meanwhile, the names of the next two ships were announced in March 2009 and construction of two competing designs looks set to continue. Ultimately, a class of 55 ships is planned. The Virginia-class submarine programme also remains unaffected; a building rate of two per year is expected to start in 2011.

The Canadian Navy's efforts to re-shape the fleet to undertake expeditionary operations continue to be frustrated by funding difficulties. In 2007, plans to establish a Standing Contingency Force were put 'on hold' but encouragement was taken at the time from the government's continuing commitment to the Joint Support Ship project. These three ships were to be capable of sealift and afloat support while also being equipped with a hospital and facilities for a Joint Task Force headquarters. Unfortunately, the bidders for the project were unable to meet the requirement within the allotted budget and so a review of the project was initiated in 2008. The extent to which the requirement is to be 'de-scoped' remains to be seen. However, it is possible that the whole concept will be abandoned in favour of solving the most pressing issue: replacement of the afloat support capability currently provided by the 40-year-old *Protecteur* and *Preserver*.

Not all Canadian news has been bad. The Halifax class modernisation programme is to get underway in 2010 with a view of extending ships' lives into the 2020s. These ships and the ageing Iroquois-class destroyers are to be replaced by the Canadian Surface Combatant programme which is to use a common hull and a modular approach. The Arctic Patrol Ship programme remains intact and there are plans to procure a new maritime patrol aircraft to enter service in about 2020. In the immediate future, the submarine

fleet is to be boosted by the return of *Victoria* and *Windsor* to operational duties in 2010, the same year in which the new Sikorsky Cyclone helicopter is to start entering service.

China

Future historians may come to regard 2009 as the year that the Chinese Navy finally came of age. The deployment to the Gulf of Aden of the modern destroyers, *Wuhan* and *Haikou*, supported by a supply ship, was the first overseas naval operational mission to be conducted since 1949. The opportunity to contribute to international efforts to suppress piracy in the region must have seemed heaven-sent to the Chinese Navy leadership which, with a well-developed eye for image, has increased the tempo of naval diplomacy and of participation in minor exercises with foreign navies in recent years. The mission to protect shipping against Somali pirates certainly has all the key ingredients: it is a relatively straightforward and uncontroversial operation; it involves international co-operation in a good cause and generates a lot of positive publicity both at home and abroad. It quickly became clear that this was not just a photo-opportunity. The ships got down to business and, soon after arrival in theatre, began merchant-ship escort duties on 12 January. All of this is in marked contrast to a series of incidents in early March 2009 in which the two US Navy surveillance vessels were apparently harassed by a frigate and a fisheries patrol vessel. Both *Impeccable* and *Victorious* were reportedly located about 100 miles from the Chinese coast in the South China Sea and, if so, were entitled to conduct their operations in international waters. Aggressive manoeuvring and/or the use of threatening language are both dangerous and unproductive; such incidents in the Cold War achieved little except to raise tensions.

The pace of underwater operations has increased as the submarine service begins to emerge from a period of major change that has included the decommissioning of older coastal submarines and the introduction into service of a new generation of nuclear-powered and conventional boats. These have not been without their teething problems and, as has been observed on these pages before, it would have been surprising if the build-up of the necessary levels of training and experience had not proved to be difficult. According to the Federation of American Scientists (FAS), the number of out-of-area submarine deployments, which had dipped to two in 2006, recovered to seven in 2007 and reached a total of 12 in 2008. This rising trend probably reflects the introduction into service of the Type 093 Shang-class nuclear-powered attack boats to supplement the ageing Han class and while, in overall terms, the scale of operations remains comparatively low, a pattern of increasing activity is likely to continue. More extensive use of the 25 modern conventional submarines is expected and, in particular, the Yuan class, probably equipped with Air Independent Propulsion (AIP), offers the potential for the conduct of covert operations. Meanwhile, the Jin-class ballistic missile submarines have yet to undertake a deterrent patrol. A test-firing of the JL-2 missile reportedly took place in June 2008 but there have been no indications that it has yet proved capable of operational deployment.

The sixth (since 1998) in the series of biannual Defence White Papers, 'China's National Defence in 2008' was published on 20 January 2009. The overall tone of the paper is measured and reasonable as it seeks to soothe international concerns about the rationale behind China's military build-up. 'China pursues a national defense policy which is purely defensive in nature' and 'China will never seek hegemony or engage in military expansion now or in the future, no matter how developed it becomes' are typical statements. Even the vexed question of Taiwan is treated in emollient terms. Following a change of government on the island, 'The attempts of the separatist forces for "Taiwan independence" to seek "de jure Taiwan independence" have been thwarted, and the situation across the Taiwan Straits has taken a significantly positive turn'. Nevertheless, the data provided in the White Paper does give cause for concern. According to the figures, the Chinese defence budget rose by a massive 19.3 per cent in 2007 and has more than doubled in five years to 355.4 billion Renminbi Yuan (USD52 billion). While the paper goes to some lengths to demonstrate that this is merely a reflection of increased Gross Domestic Product (GDP), which also more than doubled during the same period, and that defence expenditure remains low (about 1.4 per cent of GDP) in comparison with other countries, the rate of change has been very marked.

One of the interesting facts published in the paper was that the number of naval overseas visits decreased from 13 to five in 2008. This perhaps reflects a shift from a diplomatic offensive in 2007 to a more operational posture. Otherwise, the treatment of maritime matters was disappointing; the chapter on naval forces was particularly bland and did little more than to record the evolution of the PLA(N) from a coastal defence force into one capable of 'offshore defensive operations'. Future programmes were summarised as follows: 'efforts are being made to build new types of submarines, destroyers, frigates and aircraft'. The Chinese government should not be surprised that such opaque statements only increase suspicion that published expenditure data does not tell the whole story. The

HOUBEI CLASS

1/2008*, A Sheldon-Duplax / 1353579

programme that frequently gives rise to intense speculation, the building of an aircraft carrier, was not even mentioned and remains something of an enigma. However, the refurbishment of the ex-Russian ship, *Varyug*, continues and, following the move of the ship to a drydock on 27 April 2009, it is possible that the ship will emerge from Dalian in 2010 to perform, initially, a training role. It has been difficult to gauge progress in this project, given the lack of information about the original material state of the ship, but there seems little doubt that refit work has proved to be more technically demanding and time-consuming than originally intended, a situation which many other navies will find familiar. Therefore, it is reasonable to assume that any indigenous programme will have been similarly delayed. As yet there are no firm indications of building at any of the major dockyards and it is quite possible that the initiation of such a prestigious project would be publicised at the time.

In other areas of the fleet, the pace of shipbuilding has been quieter than in previous years; construction of the Yuan class of diesel submarines has resumed, suggesting that problems with the first of class have been overcome, while building of the Jiangkai II-class frigates also continues at two shipyards. No doubt a great deal is going on behind the scenes; the Chinese Navy still contains a number of increasingly obsolescent ships, incapable of conducting the networked operations to which it aspires. The transformation process is set to continue.

United Kingdom

For the Royal Navy, it has been another mixed year in which positive steps in some areas have been marred by setbacks in others.

To begin with the good news, the first Type 45 destroyer, *Daring*, arrived in her home port Portsmouth for the first time on 28 January 2009. She is to be followed by a further five ships, the seventh and eighth ships of the programme having been cancelled in 2008 as had been previously feared. Unquestionably, the new class of ships is to be highly capable and, in the words of *Daring*'s Commanding Officer, marks the start of a new era for the service. Designed to provide a high level of protection to a force operating within a 3.5 n mile radius against up to eight supersonic sea-skimming missiles, the newly named Sea Viper system is certainly one of the best of its type in the world. It also has the potential to be adapted in the future for an anti-ballistic missile defence role, although this would probably require an improved missile. For the time being, much remains to be done to get the first of class into service. An extensive programme of Stage 2 trials, including system integration and weapon acceptance, must be completed before the ship is commissioned in late 2009 or early 2010. Following test firings of the missile in the Mediterranean from the trials platform, *Longbow*, the first firing from a ship is to be conducted by second-of-class, *Dauntless*, in October 2010.

The future aircraft carrier project survived measures in late 2008 to solve the 'funding gap' in the defence budget, although the building programme is now to be lengthened by 1-2 years as a result. Perversely, this approach could well add to the eventual overall cost rather than reduce it. Nevertheless, the programme has developed considerable momentum. In a revised manufacturing strategy announced in March 2009, much of the building work has been allocated; the ships are still to be assembled at Rosyth, where work to extend and modernise No 1 Dock is underway, and construction of Block 3 is now to be undertaken on the Clyde rather than at Barrow. A number of major contracts have also been let. While commissioning dates have not been declared, it is probable that *Queen Elizabeth* will enter service in 2015 and *Prince of Wales* in 2018, 20 years after the intention to procure the ships was announced in the 1998 Defence Review. One of the reasons cited for the delay in the ship programme was to align the production of the ship with the procurement of the Joint Combat Aircraft (F-35B Joint Strike Fighter). Plans to move ahead with this programme were confirmed in March 2009 when the UK MOD committed to the procurement of three initial production aircraft which are to be used in the initial operational test and evaluation phase; the F-35B made its maiden flight on 28 June 2008.

The future of the destroyer/frigate force remains uncertain. The ageing Type 42 destroyers, of which only five now remain operational, are to be decommissioned over the next four years as the Type 45s enter service. However, the overall number of destroyers and frigates will only be 23 once the transition to the new class has been accomplished in 2013. The Future Surface Combatant (FSC) programme was supposed to have been brought forward as a result of the cut in Type 45 numbers but there is little confidence that this will happen. This is despite the fact that BVT Surface Fleet was awarded a contract in February 2009 to assist with preparation for the next phase of development. Although it is known that there are likely to be three variants (high-capability multimission; low-capability general purpose and ocean capable patrol ship), there is no commitment to overall numbers or timescale. Neither does it augur well that the lives of the Type 23 frigates, the workhorses of the fleet, have been extended to up to twice their original design intent. It was also discouraging to read the comment in the *RUSI Journal* by the Shadow Defence Minister, Dr Julian Lewis, that "if the Royal Navy is to have any chance of restoring the escort fleet, it must make the FSC as 'cheap as chips' ". There is always a balance to be struck between quantity and quality but experience in recent and ongoing conflicts suggests that the answer lies in spending more money on Defence, not cutting corners.

Another area of concern is the future of the afloat support replacement programme MARS. It had been expected that a contract for the construction of up to six fleet tankers, to enter service 2013-18, would be let in 2009.

KENT

8/2008*, Kazumasa Watanabe /1353687

This segment of the programme had been given priority because the current Leaf- and Rover-class single-hull tankers are both reaching the end of their lives and no longer comply with regulations that require such ships to have double-hulls. It now seems likely that these ships, and subsequent plans for two fleet support and three logistics vessels, have been deferred by up to three years.

The situation for the submarine flotilla is also depressing. The number of hulls has been dwindling steadily over the years and current plans point to a force of just seven boats. The last of the Swiftsure class and first of the Trafalgar class are due to decommission in 2009 and, taking into account submarine refit periods, operational availability is likely to be about four boats. Meanwhile, the Astute class programme continues to struggle. Sea-trials of the first-of-class are not to begin until at least mid-2009 and the follow-on boat, *Ambush*, is not to be 'rolled out' until the end of 2009 or early 2010. While the keel of the fourth boat, *Audacious*, was formally laid in March 2009, and long-lead items have been ordered for hulls five and six, there is no commitment to an eighth boat. Construction of the later Astute class at Barrow is to run concurrently with that of the 'Trident II' boats whose building programme is to start in 2014 if the first boat is to be delivered in 2022 and to become operational in 2024 as planned. While the size of these boats has not been confirmed, it was announced in March 2009 that the successor SSBN is to have 12 missile tubes, rather than the 16 of the Vanguard class. This probably points to a smaller boat although one of the principal determinants of the design is to be a common US/UK missile compartment, sealed to accommodate a successor missile to Trident. Overall, given the record of the Astute class, it is not surprising that the Public Accounts Committee described the timetable for replacement as "extremely tight".

The UK's 40-year record of undetected deterrent patrols came to an abrupt end on about 3 February 2009 when *Vanguard* collided with the French ballistic missile submarine *Le Triomphant*. Both boats are thought to have been on patrol or in transit at the time. It is stating the obvious to say that submarines of allied nations should not have been in the same area at the same time, not least because there are established procedures precisely to avoid such a situation. While the locations of submarine patrol areas in general and deterrent areas in particular are highly classified and France may not have been a full participant in NATO waterspace management arrangements, it should have been possible at least to have agreed to operate in different general areas of the Atlantic Ocean. If this sort of discussion had not taken place, it reflects poorly on those concerned. Neither is it good enough to say that it was a 'one in a million' chance. The integrity of the nuclear deterrent and the safety of the crews of both countries were

unnecessarily put at risk. Perhaps the only good thing to emerge from this unhappy incident is that the boats are almost impossible to detect.

Europe and the Mediterranean

NATO's 60th anniversary summit was held on 4 April 2009 at the French border city of Strasbourg and its neighbouring German town, Kehl. Co-hosted by the German Chancellor Angela Merkel and French President Nicolas Sarkozy, the highlights included the admission of Albania and Croatia into the Alliance and France's return to the integrated military structure. Contrary to popular belief, France did not leave the Alliance itself in 1966 and, during its absence from inner decision-making circles, continued to work quietly alongside NATO countries at a military level. This has particularly been the case at sea where ships and aircraft have been able to co-operate without causing political embarrassment.

It is to be hoped that France's renewed membership will lead to a resolution of at least some of the issues that have bedevilled EU/NATO relations over the last few years. While the two organisations ought to have a lot in common, competition has tended to hinder co-operation. However, the deployment of anti-piracy forces to the Gulf of Aden has provided the opportunity to work together, particularly over such crucial issues as Rules of Engagement. NATO carried out its first such mission in the region between October and December 2008. In Operation Allied Provider, four Standing NATO Maritime Group 2 (SNMG2) warships deployed in response to a UN request to conduct deterrence patrols and to provide escort to vessels delivering humanitarian aid to Somalia. An EU force, Operation Atalanta, took up station as the NATO ships completed their task. This operation is to be sustained throughout 2009 and command of the force is to be exercised in rotation by the Greek, Spanish and Dutch navies respectively. This force was boosted by a second NATO deployment in March–July 2009.

While one of the main outcomes of France's 2008 Defence White Paper was the renovation of transatlantic relations, some re-shaping of the naval force structure is to be implemented to reflect a re-appraisal of defence priorities. One major finding was that "protection of our population and territory calls for a major overhaul" and, as a result, a greater distinction is now to be made between forces required for this task and those required for intervention operations. The naval component of France's intervention capability is to continue to be spearheaded by the air group and naval combat aircraft are to be merged with those of the air force to form a pool of 300 aircraft from both services. However, the decision on whether to proceed with the construction of a second aircraft carrier has been deferred until 2011–12. Nevertheless, force projection capabilities are to be boosted

O. DENBURG

7/2008*, Michael Nitz 1353680

by the procurement of two further Mistral-class amphibious vessels; the first of which began construction at Saint-Nazaire in April 2009. Both are to be in service by 2020. The main effect of the redrawn balance between intervention and national protection forces is a reduction in Anti Air Warfare (AAW) capability (from six to four specialised ships) while assets required for national protection are to be boosted by the conversion of the five Brest-based 'Avisos' to a patrol ship role. Submarine forces remain unchanged as a result of continued commitment to an independent nuclear deterrent and to a force of six cruise-missile carrying nuclear-powered attack boats.

The EU's Operation Atalanta is to be boosted in 2009 by the deployment of two Swedish Stockholm-class corvettes, supported by the logistic support ship, *Trossö*. While it is not the first time that Swedish naval forces have been deployed for out-of-area operations, the despatch of such ships originally built for coastal defence duties, highlights their unsuitability for long-distance transits and for operations in ocean waters. Recognition that the Swedish Navy is not best equipped to contribute to this sort of operation is reflected in the Combat Support Ship (L 10) programme for two multipurpose ships. These are to be capable of conducting replenishment at sea, amphibious support, repair and maintenance, medical support and transport of about 170 troops. The requirement could be met by a modified Ro-Ro ferry design but the preference is likely to be for a purpose-built design, tailored to support the Visby class and built to commercial standards. Meanwhile, the Visby class programme will at last reach fruition in 2009 when, after a difficult and frustrating proving period, the first ships become available for operational service.

Looking ahead, thoughts are now turning to the procurement of less complex patrol ships better suited to tasks around the world. Sweden has been one of the pioneers of Air-Independent Propulsion (AIP) which is now fitted to all five of its submarines. The Södermanland class, which were retrofitted with this capability 2000-05, are due to be replaced by two next generation A 26 class from about 2017. Few details have been released about the new boats but the design is likely to be required to meet a much broader requirement than their predecessors. Much will have been learned from the two-years spent by *Gotland* in San Diego as an anti-submarine training target for the US Navy. Meanwhile, despite current emphasis on overseas operations, home defence has not been neglected. The refit and modernisation of the first two Koster (modified Landsort)-class minehunters was completed in early 2009 and the remaining three are expected to be completed in 2010.

Procurement of submarines by the Hellenic Navy has been in a state of flux for the last two years due to delays in the Type 214 submarine programme. Despite the launch in Germany of the first-of-class *Papanikolis*, in 2004, her commissioning is still awaited, pending resolution of alleged technical difficulties. Meanwhile construction of the other three boats at Hellenic Shipyards is at various stages of completion although it is not clear if and when they will enter operational service. In contrast, the Neptune II upgrade programme for the last three *Glavkos* (Type 209/1200) submarines has taken a dramatic turn. Following completion in early 2009 of *Okeanos*' refit, which included the installation of AIP, the upgrade programme for the other two boats was abandoned in favour of the construction of two new AIP-equipped Type 209/1400s. These are also to be built at Hellenic Shipyards. A decision on the way ahead for the acquisition of six new frigates is expected in 2009. The leading contender appears to be the French FREMM class, following the announcement by the Greek Minister of Defence, Mr Evangelos Meimarakis, on 22 January 2009 that negotiations had started. The ships are likely to be the air-defence (FREDA) variant featuring an A70 vertical launcher capable of firing both air-defence and land attack missiles. Meanwhile, the mid life upgrade of the first six *Elli* (Kortenaer)-class frigates is due to be completed in 2010 at which time a major upgrade of the *Hydra* (Meko 200) class is due to begin.

Developments on one side of the Aegean tend to be inextricably linked with those on the other, despite a welcome reduction in tensions in recent years. In spite of problems in the Greek Type 214 programme, the Turkish Navy opted to start contract negotiations in 2008 for the acquisition of six similar submarines, also to be equipped with AIP. The boats are to be built at Gölcük Shipyard with the first of class to enter service in 2015. The principal naval surface ship programme is the *Ada* (MİLGEM) class project for up to 12 anti-submarine warfare and offshore patrol vessels. The first-of-class, *Hevbeliada*, was launched on 27 September 2008 on the same day that the second of class, *Büyükkada*, was laid down. There are also 16 smaller *Dearsan* anti-submarine and littoral patrol craft to be built in batches of four. The principal Coast Guard programme is for the construction of four offshore vessels required for SAR and EEZ patrol duties. The design of the ships is based on the Italian *Sirio* (Comandante) class. Other Coast Guard programmes include continuing construction of the *Kaan 33* class. These are being built by the *Yonca-Onuk* Shipyard which has achieved export success over the last few years with sales to Georgia, Malaysia and Pakistan.

The Israeli Navy is poised for expansion over the next few years with both submarine and surface ship programmes in progress or planned.

The first of a second batch of two Dolphin-class submarines is expected to be launched in Germany in 2009-10. Although few details of this project have been released, the boats are reported to be equipped with AIP and are planned to enter service in 2012. The other major programme is for a class of three surface combatants. These are likely to be based on the Lockheed Martin variant of the Littoral Combat Ship although the ships are to be more powerfully armed than the US versions. Weapons will almost certainly include an area air-defence system such as Standard or Barak 8. The geographical focus of Israeli naval operations is likely to remain the Mediterranean Sea. Although deployments to the Red Sea and beyond are possible, operations are constrained by the availability of only one small base (Eilat) and the need to rely on other nations for shore based and/or afloat support facilities.

Russia

It has been a busy year for the Russian Navy, which has committed a number of its major units to operations and deployments. During the conflict with Georgia in August 2008, the Navy played a supporting role in what was overwhelmingly a land/air operation. While the primary Russian aim was to secure the regions of South Ossetia and Abkhazia, a key element of the plan was to destroy all Georgian military capabilities. This included the naval base at Poti in which most of the Georgian Navy was destroyed alongside. The only reported action at sea was the sinking of an unknown vessel by an SS-N-9 missile fired by the corvette, *Mirach*. Apart from this, the principal role of the Russian Navy was to blockade Georgia's ports in order to deter/prevent arms shipments or reinforcements from entering the country. The Black Sea Fleet certainly did not take any chances. Led by the guided-missile cruiser *Moskva*, the task group included the destroyer *Smetlivy*, three Grisha-class frigates, one Nanuchka- and two Tarantul class corvettes and three amphibious vessels. Although there was speculation that amphibious landings had been conducted in the vicinity of Ochamchire, it is more likely that the landing ships were employed in a ferry role and that troops were offloaded at the port without vehicles and equipment. Conclusions from the conflict are difficult to draw and are perhaps more political than military. The Russians seemed well-prepared, suggesting good intelligence, and responded quickly with overwhelming force. However, what the military leadership will wish to hear from the analysts is just how effective these joint operations might have been against a more powerful and well-organised enemy.

In well-publicised attempts to raise operational tempo and to 'show the flag', deployments of other warships, notably by the capital ships *Admiral Kuznetsov* and *Pyotr Velikiy*, also caught the headlines. As in 2007, the carrier departed in December from Severomorsk to visit the Mediterranean where exercises were conducted with the Black Sea Fleet and visits made to

Turkey and Syria. The trip was relatively uneventful except for a fire, which led to the unfortunate death of a sailor, and a large oil spill which allegedly occurred while the ship was operating south of Ireland.

The deployment of the battle-cruiser *Pyotr Velikiy*, leading another group of ships, was the highest-profile diplomatic mission by the Russian Navy for many years. The flotilla visited the Caribbean to participate in exercises with the Venezuelan Navy and subsequently, for the first time since the end of the Cold War, to make a port-call to Cuba. The destroyer, *Admiral Chabanenko*, made a symbolic transit of the Panama Canal, the first by a Russian warship since the Second World War, to visit Balboa. Making its way back across the South Atlantic, *Pyotr Velikiy* visited Cape Town in January 2009 before proceeding to Mormugao in the Indian state of Goa. During this period, the ship was joined by the destroyers *Admiral Vinogradov* (Pacific Fleet) and *Admiral Levchenko* (Northern Fleet) for INDRA-2009, a biannual Russian Indian exercise. The Indian Navy was represented on this occasion by the destroyer *Delhi* and the frigate *Tabar*. A feature of the exercise was that its second phase was dedicated to anti-piracy operations and conducted off the Somali coast.

All this activity has been superficially impressive and there has almost been a whiff of nostalgia as Russian ships once more ply the world's oceans. However, it is premature to talk about a Russian resurgence and/or the establishment of sustained presence in various regions of the world. It would take years to achieve such a posture and it is worth remembering that even at the height of the Soviet Navy's strength, ships were forced to spend much of the time at anchor due to lack of supporting infrastructure. It is also obvious today that while a few reliable ships are very busy, many others do not seem to venture very far. Nevertheless, the Russian Navy will have earned enormous benefit from the more frequent and ambitious operations of the last few years. A new generation of officers and sailors, both ashore and afloat, are learning about the difficulties of maintaining morale, operational effectiveness and a sound material state during long deployments. The experience gained will pay dividends in the future.

It is against this background that aspirations to build a force of five or six aircraft carrier groups must be viewed. To be fair to the Commander-in-Chief, Admiral Vysototsky, his announcement in July 2008 seemed to be a long-term vision, to be achieved in perhaps 50 years, and did not appear to be a commitment to a short-term programme. Despite the fact that there are a number of existing carrier designs, including those of the Ulyanovsk, Kuznetsov and smaller Kiev classes, a considerable amount of development work would be needed to bring these up to date. Even if this could be done relatively quickly, the requirement to design and build a next-generation VSTOL or CTOL carrier-borne aircraft needs to be taken into account. There are also industrial considerations. The last generation of carriers was built at Nikolayev in Ukraine so the facilities at Severodvinsk will need to

be upgraded to handle ships of this size: construction of a new 420 m dry dock is under consideration. Therefore, even if a firm decision has already been taken, it could be many years before the first ship is commissioned. Furthermore, procurement of a carrier force needs to be balanced against other competing priorities. The destroyer force now averages about 21 years old and a replacement programme has not been announced. The frigate force is even older and, despite the long-awaited emergence in early 2009 of the second Neustrashimiy-class frigate, *Yaroslav Mudryy*, from Yantar shipyard at Kaliningrad, construction of both the Steregushchiy- and Gorshkov-class frigates seems to be taking longer than expected.

Replacement of the submarine force is also proving troublesome. Sea trials of the first of a new class of ballistic-missile submarines, *Yan Dolgorukiy*, did not start until 2009 while its Bulava missile is yet to be proven. There are also delays in the construction of the next generation attack submarine, *Severodvinsk*, and of the conventional Lada-class boats. Taken overall, most if not all naval programmes are experiencing serious problems and, after 20 years of neglect, it will take a long time and a great deal of money to put things right.

Indian Ocean, Gulf and Caspian

The golden anniversary of the commissioning of the carrier *Viraat* (ex-*Hermes*) on 18 November 2009 is likely to be celebrated by former ship's companies of two navies who have served in her: she is one of those ships that inspires particular affection. While her longevity is a testament to the robustness of the original design, the requirement for expenditure on a third major refit since transfer from the Royal Navy in 1987, necessitated by delays in future carrier programmes, will be exasperating for the Indian naval high command. The aim of the latest work is to extend the life of the ship until 2012 when *Vikramaditya*, which has been undergoing refurbishment at Severodvinsk since 2004, is planned to enter service. Fortunately, there are now grounds for optimism that this project, which had generated a somewhat acrimonious dispute, is at last making some progress.

The ship was re-launched in December 2008 at about the same time as agreement was reached between the Russian and Indian governments on the funding of cost overruns. As a result, the way-ahead now looks clear for the final purchase agreement to be signed in 2009 with a view to starting sea trials in 2011. Meanwhile, progress was also made in the other major surface ship contract. The keel of the Indigenous Aircraft Carrier was formally laid by the Defence Minister at Kochi Shipyard on 28 February 2009. The ship, which is going to be nearly 40,000 tons, is to be the largest warship ever built in the country and is likely to be followed by at least one further unit in order to realise the ambition of a three-carrier force. It remains to be seen whether the matng of some 872 blocks, some 400 of

which have already been fabricated, can be achieved within the planned construction timescale. The ship is planned to be commissioned by 2015.

There could be a number of other highlights for the Indian Navy during 2009. Lease of the nuclear submarine *Chakra* (ex-*Nerpa*) is expected to start in September following certification by the Russian Navy, although the programme may have been delayed by the unfortunate accident in which 20 people were killed by the release of fire-suppressant gas during sea trials in November 2008. Meanwhile, launch of the indigenous nuclear submarine, the so-called Advanced Technology Vessel, is planned to take place at Vishakapatnam during the year. The project has been clothed in secrecy and even the formal confirmation of its existence in December 2007 did little more than fuel speculation about its design and capability. The submarine is likely to have a ballistic missile capability but, limited to one boat and (probably) less than 10 launch tubes, it is expected that its operating pattern will be different to the continuous at sea policy adopted by most other SSBN operators.

There was also good news from some of the surface ship programmes. Sea trials of *Shivalik*, the first of a new class of frigate, are due to begin in 2009 at about the same time as the first of the Batch 2 Talwar class, under construction at Yantar Shipyard, Kalningrad, is due to be launched. Reportedly, negotiations for the procurement of a third batch of these ships began in early 2009. The spirited performance of *Tubar* during an anti-piracy patrol off Somalia will have done much to enhance the reputation of this class. The reach of the navy is also to be augmented by the procurement of eight Boeing Poseidon maritime patrol aircraft, for which a contract was signed in December 2008. Unfortunately, the transformation of the Indian Navy continues to be frustrated by setbacks. Construction of the Scorpene class conventional submarines had not begun by early 2009 and the first indigenous refit of a Kilo class, *Sindhukirti*, which began at Hindustan Shipyard, Vishakapatnam in 2006, could take as long as nine years to complete.

Following a review of coastal security in the wake of terrorist attacks on Mumbai in November 2008, there is to be a major overhaul of India's maritime defence organisation and infrastructure. The principal actions that have arisen are to designate the navy as the responsible authority for overall maritime security; to establish a command and intelligence network linking naval and Coast Guard operations centres; the improvement of port and inshore defence; the establishment of a new 'Coastal Command' and the establishment of a coastal radar and AIS chain to improve situational awareness.

In neighbouring Pakistan the third Khalid-class submarine, *Hamza*, the first to be entirely completed in Karachi, was commissioned on 26 September 2008. She is also the first to be equipped with AIP and the

ZULF QUAR

10/2008*, Chris Sattler 1353687

first two boats of the class, commissioned in 1999 and 2003 respectively, are now to be similarly upgraded. Meanwhile, a further submarine programme is likely to be initiated in 2009. The principal contenders are widely considered to be the French Scorpene class and the German Type 214 class but procurement of a Chinese submarine, for example the Yuan class, should not be ruled out. China and Pakistan have been strategic allies for many years and naval ties have grown stronger recently. The Karachi Shipyard and Engineering Works are being modernised to facilitate construction of the fourth and final F22P frigate and licences to construct further similar, or possibly larger, vessels may also be obtained. There are also plans to expand ship construction and refit facilities at other ports such as Gwadar and Omara.

In the Gulf, the United Arab Emirates has been making much of the news. The first Baynunah-class corvette is to be launched at Cherbourg during 2009 while Abu Dhabi Shipbuilding (ADSB) is making progress on the construction of the five follow-on vessels. The shipyard is due to deliver its first ship eight months after the first-of-class with the others to follow at six-month intervals. ADSB is also to build 12 further 26-m Ghamatha class in a missile-armed interception craft configuration while the 12 existing craft are to be modified as troop carriers and mortar platforms. Meanwhile, a Comandante class anti-submarine corvette has been ordered from Italian shipbuilder Fincantieri. Six such ships entered Italian Navy service in 2001-03 and four of the Coast Guard configuration are currently under construction in Turkey. This 1,500-ton ship, and any follow-on vessels, is effectively a substitute for the rarely used Kortenaer frigates, transferred from the Netherlands in 1996-97.

The rejuvenation of the South African Navy over the last 10 years has gone remarkably smoothly in view of the challenges posed by the transition from an underfunded coastal force to a blue-water navy capable of exerting regional influence. Four new frigates and three new submarines have entered service and the navy is now poised to take a further major step, the acquisition of two Strategic Support Ships. These multirole ships are to enter service from about 2014 while a third unit, configured as a replenishment ship (to replace *Draakensberg*), is to be commissioned in about 2017.

The primary function of the new vessels is to transport, land and support a battalion group of some 1,500 troops with up to 350 vehicles. This is in addition to the capability to act as a mobile base and offshore headquarters, to conduct disaster and emergency relief missions and to provide logistic and medical support. An LHD design, which includes both a well-deck for operating small landing craft and a flight deck with six spots for medium helicopters, is a strong possibility.

Other contracts in the offing are for an initial batch of six offshore patrol vessels, to be built in a South African Shipyard, and for a new hydrographic survey ship to replace *Protea*. It is not surprising that the expansion of the navy poses a considerable recruitment, training and retention problem and this is linked to the need for a change of culture as the navy comes to terms with a period of profound change. As the Commander of the Navy, Admiral Johannes Mudimu, stated, "we must now move from force preparation to force employment".

East Asia and Australasia

A new Australian Defence White Paper, due to be published in 2009, is almost certain to be affected by the global financial crisis. However, all the indications are that the government will try to stick to its election pledge to increase defence spending by three per cent per year and, in view of the Prime Minister's comments in September 2008 that Australia would need to become a more serious maritime power, the Royal Australian Navy could be a beneficiary. The challenge now will be to translate political aspirations into firm contracts. While approval for a fourth Hobart-class air warfare destroyer is not now expected, endorsement of a new submarine programme is likely to go ahead. These boats are not only to replace the Collins class from about 2020, but also to double the size of the flotilla to about 12 boats. This is despite the fact that current manning problems restrict operational availability to three out of six boats.

Work on a successor class began in December 2007 and, while initially all options are likely to be examined, it is probable that the solution will be to adopt a recent European design equipped with predominantly American weapons and sensors. The geography of Australia suggests that nuclear power might at least bear some consideration. However, the submarines are more likely to be equipped with AIP in view of public and political opposition to nuclear energy. Other projects to be considered are the acquisition of a strategic sealift ship, to complement the Canberra-class LHDs, and the replacement of the current amphibious watercraft capability. Procurement of the L-35B variant of the Joint Strike Fighter, to operate from the LHDs, is also a possibility. Thoughts will also no doubt be turning to the size and shape of the future frigate force. The ANZAC class, about to begin the ASMD upgrade programme, is not due for replacement until about 2025 but, as other nations are discovering, a like-for-like replacement approach may not deliver the number of hulls required.

Following the announcement by the Japanese government that it intended to send units of the Japanese Navy to join international anti-piracy operations off the coast of Somalia, the destroyers *Sazanami* and *Samidare* sailed from Kure on 14 March 2009. Japanese Coast Guard officers were

embarked to handle any law-enforcement matters. The deployment of any MSDF forces outside Japan's borders tends to be controversial in view of the constraints placed on their use by the Self-Defence Forces Law. Therefore, despite the fact that this mission is not as politically sensitive as Japan's Indian Ocean refuelling operation, which has supported coalition forces in Afghanistan since 2001, further legislation is likely to be required. Initially, the deployment is to be conducted under the maritime police-action provision of the law. This already covers a fairly wide spectrum which includes the protection of Japanese ships, ships managed by Japanese companies or vessels carrying Japanese crew members or cargo for Japan. However, a new law on anti-piracy is expected to enable Japanese forces to assist in combating pirate attacks on foreign ships. This would mark another important step in extending the limits within which the Japanese Navy is mandated to operate. In a world in which defence can start a long way from home, it should be possible for it to participate in international, global operations without compromising the basic tenets of Japanese Defence policy.

If any ship is likely to 'push the boundaries' in the future, a prime candidate is the new helicopter-carrier, *Hyuga*, commissioned on 18 March 2009. She is to be followed by a second unit which is to enter service in 2011. The new ships, much larger than the *Haruna* class which they replace, call for a new concept of operations to exploit not just their primary ASW role but also their flexibility and utility to undertake a wide range of tasks. It is likely that they will be centrepiece of many future overseas operations, whether military or in response to a civilian emergency.

Meanwhile work progresses on the next generation of destroyers and submarines. The 5,000 ton 19DD-class destroyers, the first of which is to be laid down in July 2009, are to be a follow-on to the *Takanami* class to which they bear a resemblance. Their principal armament is expected to be Evolved Sea Sparrow and Type 90 surface-to-surface missiles. The *Souryu*-class submarines are now beginning to enter service; the first-of-class was commissioned in March 2009 and the second-of-class *Unryu* was launched in October 2008. These boats, fitted with AIP, are also likely to prompt new operating patterns to exploit their enhanced capability. A similarly equipped submarine, the German *U32*, successfully conducted a submerged transit of some 1,500 n miles in 2006.

There has also been less welcome news. A test-firing of a Standard SM 3 anti-ballistic missile on 20 November from the destroyer *Choukai*, the second ship of the class to be converted to the BMD role, was a failure. Given the 80 per cent success rate of these missiles, it is more likely that this was due to an individual missile fault rather than systemic failure. Finally, the official investigation into the pre-dawn collision on 19 February 2008 between the destroyer *Atago* and a fishing boat, which resulted in two fatalities, concluded that the ship was mainly at fault. This unfortunate incident is a reminder that keeping a good watch is as important today as it ever was.

Elsewhere in the region, the Malaysian Navy made an historic step forward when it took delivery of its first submarine on 29 January 2009. *Tunku Abdul Rahman* is a *Scorpene*-class boat which is to be stationed at a new submarine base at Sepanggar, near Kota Kinabalu in Sabah. The location of the base will enable the submarines to operate both in the South China and Sulu seas. The second-of-class, *Tun Razak*, is to be delivered in late 2009. Before the boats become operational, it will be necessary to establish a submarine rescue capability. The likely host ships are *Mahsuri* and *Setia Sekel* but there were no indications, as of early 2009, that Malaysia is planning to join the International Submarine Escape and Rescue Liaison Office, which co-ordinates submarine rescue activities worldwide.

Progress in other Malaysian programmes has been mixed. The decision to procure two new improved *Lekiu*-class frigates was made in 2006 but an order is not now expected until 2010. The *Kedah*-class corvettes have had something of a troubled history but the programme now appears to be proceeding satisfactorily. *Pahang* has taken part in anti piracy operations in the Gulf of Aden, the first Malaysian-built ship, *Perak*, was commissioned in late 2008 and the remaining three ships are to enter service by 2010. The next major procurement initiative is likely to be the acquisition of up to three multirole ships capable of both military and civilian emergency roles.

In common with Malaysia and a number of other nations worldwide, the Royal Thai Navy (RTN) has also decided that there is a requirement for a multirole ship; approval for the project was given by the Thai cabinet on 9 September 2008. The amphibious ship (LPD) is to be designed and built by ST Marine of Singapore and is almost certainly based on the *Endurance* class that entered Singapore service from 2000. Delivery is expected in 2012 and the contract also includes the construction of two LCMs and two LCVs. Unfortunately, progress in this project has probably resulted in cut-backs in others. The main casualty of the LPD order appears to have been the new frigate programme. Instead of buying two such ships, which were going to be based on the Malaysian *Lekiu* class, the programme has now been scaled down to the procurement of offshore patrol ships. A number of designs, including proposals from BVT Surface Fleet and

Fassmer, are believed to be in the running but, as of early 2009, no decision had been taken. The order, when it comes, will follow a number of steady, if not spectacular, improvements to the surface fleet in recent years. Two new Chinese-built corvettes entered service in 2006 and the patrol force inventory has been augmented by the introduction into service of the first three of nine modified T 91 (T 991) class. In addition a new survey ship, based on the Dutch *Snellius* class, was commissioned in August 2008.

The Singapore Navy has also reached some important milestones. Following the decommissioning of the six 1970s vintage *Sea Wolf*-class fast attack craft in May 2008, the final two of the six *Formidable*-class frigates were commissioned on 16 January 2009. This class ushers in a new era of surface ship operations not only as very capable individual units but also as key nodes in the Singapore Armed Forces command-and-control network which integrates the information and responses of all the uniformed services. This is particularly important in a region where warning time is likely to be short. *Intrepid* successfully completed a first Aster 15 firing test off Toulon in April 2008 but it has also emerged that the frigates could, in the future, be equipped with the 100 km Aster 30. It had been reported that the ships were equipped with four eight-cell Sylver A43 vertical launch modules but it is now believed that two of the four modules are of the deeper A50 variant, capable of accommodating the longer area defence missile. While acquisition of these weapons is not thought to be imminent, Singapore could become the first country in the region to have such a capability.

Next on the navy's agenda is the introduction into service from about 2010 of two submarines of the *Vastergotland* class. Their pre-transfer refits are likely to be similar to those undertaken by two sister-ships that remain in Swedish service. Both of these were modernised with AIP, involving the insertion of a 12 m 'plug', improved optronics and a divers' lock-out to facilitate Special Forces operations. The two refitted boats are to replace at least two of the *Challenger* class that entered Singapore service in 2000 but which are now 40 years old.

Latin America

After many years of stagnation, 2008 proved to be a landmark year for the Brazilian Navy. Following endorsement of the nuclear-submarine (SSN) programme by President Lula in 2007, the project developed momentum in September 2008 when it was formally re-launched by the Commander of the Brazilian Navy. The aim is to complete South America's first SSN by 2020. The announcement followed a Franco-Brazilian arms package which confirmed France as Brazil's strategic partner in the development of its future submarine force. In the SSN project, there is to be French design support (provided by DCNS) on the hull and propulsion while nuclear aspects are to be taken forward by the Brazilian Navy. A prototype reactor, under development at the Aramar Experimental Centre, is to serve as a basis for the power-plant which is expected to be of the order of 48 MW. In addition, Brazil is to acquire four *Scorpene* or *Martin* class conventional boats which are to be built at a new shipyard at Sepetiba Bay.

Meanwhile, in a separate contract, the five *Tupi/Tikuna*-class boats are to be upgraded by Lockheed Martin in parallel with the acquisition of the Mk 48 heavyweight torpedo from the United States. There have also been developments in the surface fleet. The corvette *Barruso*, which was laid down in 1994, was finally commissioned on 19 August 2008 and it is possible that a further three vessels will be built. In the meantime, a modernisation programme for the *Inhauma*-class corvettes has been initiated. The last of the 1960s vintage *Garcia*-class frigates, *Pará*, was decommissioned in 2008, but the intention to procure six French FREMM-class frigates was announced later in the year; Brazil's current frigate inventory of *Broadsword* and *Niterói* classes is already over 30 years old. Plans to procure up to five new 1,800-ton Offshore Patrol Vessels have not yet been finalised but a *Fassmer* design, already used by both Chile and Argentina, is likely to be a strong contender. Meanwhile, a further four *Vigilante* class 500 ton patrol vessels were ordered in October 2008 and a class of 12 is expected. Elsewhere in the fleet, a second ex-UK LSL *Almirante Saboia* (ex-*Sir Bedivere*) is to enter service in 2009, following the transfer of *Garcia d'Avila* (ex-*Sir Galahad*) in 2007, an Antarctic support ship *Almirante Maximiano* is to enter service in 2009, following conversion in a German shipyard, and a disaster response ship may be acquired in co-operation with Argentina.

Procurement of such a ship was one direct result of the closer defence co-operation that is to be developed between Brazil and Argentina, following a summit between Brazilian President Lula and Argentinian President Kirchner in September 2008. Naval collaboration is also likely to include the construction of (unspecified) ocean patrol vessels for the Brazilian Navy, the joint procurement of civilian polar research ships and an Antarctic support ship (possibly *Almirante Maximiano*). Repairs to the icebreaker and support ship, *Almirante Irizar*, which was badly damaged by a fire in 2007, did not begin until late 2008 and the ship is not expected to become operational again until 2012.

DEFENSORA

3 2008 / M Declercq / 1353684

The principal Argentine surface fleet programme is for up to five off-shore patrol vessels which are likely to be similar to the Chilean Fassmer-designed vessels; construction of the first-of-class is expected to start in 2009. Elsewhere in the surface fleet, the *Almirante Brown*-class frigates have completed a refit programme and major modification of the fast attack craft, *Indomita*, started in January 2008. Her sister ship, *Intrepida*, is expected to follow. The outlook for the submarine flotilla is uncertain. There are no known plans to replace the current inventory and, if a new programme is not initiated in the next few years, it is possible that the capability will be lost altogether.

A major refit programme for the two most modern boats, the TR 1700 class, will be completed in 2010 when *San Juan* is expected to emerge from Donceq Garcia dockyard. However, the future of the Type 209 class *Salta* is more in doubt. Although she completed a refit in 2005, she is now 27 years old and her sister ship, *San Luis*, hitherto used as spares, is likely to be converted to a museum ship. There was better news for the Fleet Air Arm. Replacement Agave radars were reportedly acquired in 2008 with the result that operational availability of the Super Etendard aircraft may be raised from five to nine out of 11.

In Venezuela, the modernisation of the navy will begin to take effect in 2009 when the first of four 1,500-ton patrol vessels, *Guacamucuto*, enters service in 2009. Launched in October 2008 at Navantia, San Fernando, she is the first of four such ships to be commissioned. The other major surface ship programme is for four larger 2,500 ton offshore patrol vessels, also under construction in Spain, the first of which is to be commissioned in 2010. It had been expected that an order for three Project 636 Kilo-class submarines would be made when the Russian cruiser, *Pvoir Velikiy*, visited Venezuela in November 2008. However, the lack of a formal announcement suggests that the project remains 'on hold', possibly as a result of the global economic downturn. A key feature of the contract would have been a substantial loan to finance the deal and, with a fall in oil prices affecting both countries, it may have been considered too risky an undertaking at the moment. Meanwhile, both of Venezuela's Type 209 boats are believed to be non-operational.

In contrast, the Type 209 submarines operated by the Ecuador Navy are planned to be refitted in Chile 2009-2012. Both boats, *Shyri* and *Huancavilca*, were commissioned in the mid-1970s and have already received two major refits, in the 1980s and 1990s. The latest modernisation work, to include a new combat system and sonar suite, is expected to extend life until at least 2020. Chile has also been involved in the renewal of the surface fleet. Having decommissioned two ex-British Leander-class

frigates, originally built in the 1960s, two ex-Chilean Leanders were transferred in 2008, following an overhaul. These ships also are expected to remain in service until about 2020.

In Conclusion

The pirates of Somalia have performed at least one useful service over the last year: they have provided a much needed reminder of the importance of the sea and of potential maritime threats to global security. The vast majority of world trade, including critical supplies of energy and raw materials, travels by sea. Some 95 per cent of this travels through nine principal chokepoints including the Strait of Hormuz, the Malacca Strait and Bab El Mandab. It is a dangerous assumption that a relatively benign era, during which unprotected ships could proceed safely throughout much of the world, will necessarily prevail in the future. If anything, success in the Indian Ocean will not only have emboldened the pirates of Somalia but may also have encouraged other groups to adopt similar tactics elsewhere.

Neither are maritime threats confined to piracy. The terrorist attacks on Mumbai in November 2008, probably launched from mother-ships, could be replicated in other areas of the world, there is no reason why a ship-load of militants should not be able to strike at high profile targets many hundreds of miles away. So far, there has been no apparent link between piracy and maritime terrorism but the readiness of pirates to take enormous risks for money should be a warning against complacency. The use of large ships for some kind of terrorist action cannot be discounted.

Another valuable lesson reinforced by experience in the waters off Somalia is that quantity is an important component of capability. That an international group of warships has found it difficult to police such a huge area of ocean gives substance to the claim that 'ships cannot be in two places at once'. This is an argument too easily forgotten, or ignored, despite the fact that the equivalent 'boots on the ground' has been such a critical factor in the Iraq and Afghanistan land campaigns. There are also dangers that the wrong conclusions could be drawn from anti-piracy operations. The constabulary nature of this task should not be allowed to dilute the need to concentrate on the capability and readiness to conduct high-intensity warfare. The lessons of history are that such contingencies can materialise with very little warning, and it would be dangerous to ignore these in a complex, uncertain world in which the balance of power appears to be shifting.

Stephen Saunders

Acknowledgements

The business of collecting information and recording change has always been a continuous process, but up to a few years ago its presentation had been cyclical. *Jane's Fighting Ships* hard-copy book remains annual, but for those users more impatient for change as it happens, the Online product, which is updated regularly, is ideal. The *Jane's Fighting Ships* microsite (<http://jfs.janes.com>) offers a dedicated portal into the electronic environment. Amongst the many offerings on the microsite is the NewsEdge service providing a regular feed of naval related news from hundreds of sources around the world. Feedback on the microsite is always useful and amongst refinements made over the last three years, ship silhouettes are in the process of being re-introduced for Online customers.

To the many anonymous people in government and industry who make data collection such a pleasure, my warmest thanks. We are not interested in secrets, but only in ensuring that open discussion on defence is based on reliable facts.

Thanks are due also to the many people who send colour photographs, whether every year or as the opportunity offers. While not every one can be published, any image, including those that are seemingly insignificant or of doubtful value, has the potential to be useful by corroborating other information about the ship(s) in question. Ideally, images should be at 300 dpi resolution although, exceptionally, lower quality images of rarely photographed ships will be considered for printing. Images should be sent by email or on a CD-ROM, preferably as soon as possible after they have been taken. For those who have not changed to the digital medium, colour prints are of course still gratefully received.

Ian Sturton's excellent scale line drawings have long been a major feature of the publication while changes to Ranks and Insignia have been given a major update this year by Dr Nigel Thomas, an international expert. Similarly, updates to Ensigns and Flags are required each year and these have been provided by Graham Bartram, General Secretary of the Flag Institute, one of the world's main research and documentation centres for flags and vexicology. The importance of the US Navy in maritime affairs merits a special contributor in Tom Philpott who is the editor of *Military Update* in Washington DC.

Other individual contributors who are at the heart of the updating process, and who wish to be acknowledged include:

Captain M Annati, Mr G de Bakker, Mr D Boey, Mr J Brodie, Señor C Busquets i Vilanova, Señor A Campanera i Rovira, Mr M Carneiro, Herr H Carstens, Mr R Cheung, Mr J Cislak, Mr W Clements, Mr G Davies, Mr M Declerck, Herr H Ehlers, Mr R Fildes, Herr F Findler, Mr P Ford, Mr D Fox, Dr Z Freivogel, Señor A E Galarce, Signor M Ghiglino, Signor G Ghiglione, Colonel W Globke, Rear Admiral J Goldrick, Mr E Hooton, Captain Shaun Jones, Mr M Kadota, Mr Tohru Kizu, Mr P Körnefeldt, Mr A A de Kruijff, Colonel J Kürsener, Mr E Laursen, Mr M Laursen, Mr B Lemachko, Mr C D Maginley, Mr D Mahadzir, Mr M Mazumdar, Mr A Mevlutoglu, Mr M Mokus, Mr R Montchai, Mr J Montes, Mr S Morison, Mr J Mortimer, Mr H Nakai, Mr L-G Nilsson, Herr M Nitz, Mr J Noot, Mr T Okano, Señor A Ortuogera Gil, Mr R Pabst, Mr F Philips, Mr I J Plokker, Mr M Prendergast, Captain B Prézelin, Señor D Quevedo Carmona, Mr A J R Risseeuw, Monsieur J Y Robert, Mr F Sadek, Mr S San, Mr C Sattler, Captain R Sharpe, Monsieur A Sheldon-Duplaix, Mr B Sullivan, Captain T Tamura, Mr D Thomas, Mr G Toremans, Prof A Wessels, Herr M Winter, Mr J Wise, Mr C D Yaylalı, Mr T Yüksel.

It is with great sadness that I record the deaths of two longstanding contributors. Paolo Marsan died after a long illness on 22 May 2008 and Harry Steele, for many years a *Jane's* photographer, died suddenly on 16 March 2009.

Jane's staff at Coulsdon ease the production process, and no praise can be high enough for Emma Donald (content editor); Jack Brenchley (senior compositor) and the composition team at Annet in Chennai, India; Kevan Box, Wayne Sudbury and Harriet Harding (scanning team); Jo Agius, Kate Whitehead, Mike Johnson and Leah Butson (image archiving); Martyn Buchanan (production controller) and Sara Morgan (publisher). Closer to home, my wife Ann is an indispensable member of the year-round editorial and administrative effort.

Cross referencing to other *Jane's* publications is made easy by *Jane's* Online service which includes, inter alia: *Jane's All the World's Aircraft*, *Jane's Amphibious and Special Forces*, *Jane's Air-Launched Weapons*, *Jane's C4I Systems*, *Jane's Electro-Optic Systems*, *Jane's International Defence Directory*, *Jane's Marine Propulsion*, *Jane's Naval Weapon Systems*, *Jane's Naval Construction and Retrofit Markets*, *Jane's Radar and Electronic Warfare Systems*, *Jane's Strategic Weapon Systems*, *Jane's Underwater Warfare Systems*, *Jane's Unmanned Maritime Vehicles and Systems*, *Jane's Unmanned Aerial Vehicles and Targets* and *Jane's World Air Forces*. *Jane's Sentinel Security Assessments* are an excellent source of politico-military information while *Jane's Defence Forecasts - Military Vessel Programmes*, is an online business tool for tracking and projecting military vessel upgrade and procurement programmes around the world. *Jane's* magazines provide up to the minute reports on defence issues. These include *Jane's Defence Weekly*, *Jane's International Defence Review*, *Jane's Foreign Report*, *Jane's Intelligence Review*, *Jane's Defence Industry*, *Jane's Missiles and Rockets* and *Jane's Navy International*. Amongst many other publications the Japanese magazine *Ships of the World* is also a source of useful data.

The focus of *Jane's Fighting Ships* remains seagoing personnel, whether on the bridge or in the operations room. The aim is to provide the operational capabilities of a ship or navy in a consistent and concise format. Individual entries are composed so that there is no need to turn a page or cross-refer to other sections. It is always a pleasure to get feedback from those at sea.

All updating material should be sent to:

Stephen Saunders

During a 32-year career in the Royal Navy, Stephen Saunders travelled extensively and worked with many different navies. A surface ship officer and anti-submarine warfare specialist, he served in most classes of warship from Mine Countermeasures vessels to Aircraft Carriers. He commanded the frigate HMS *Sirius* and, as Captain 1st Frigate Squadron, HMS *Coventry*, in the latter role he also commanded the Royal Navy's Armilla patrol when deployed to the Gulf. His broad staff experience included attachment to the NATO staff of Commander US 6th Fleet and several tours in the Ministry of Defence, London. Appointments in Naval Operational Requirements and Defence Concepts led to his final job as Director Force Development within the Defence Policy Division. He graduated from the National Defence College, Latimer, in 1982 and the Royal College of Defence Studies in 1994. Since leaving the Royal Navy in 1998, he has worked in the shipbuilding industry and as a defence consultant.

Ranks and insignia of the world's navies

This section portrays the rank insignia worn by commissioned officers of the world's navies and coast guards on formal occasions. The rank titles are described in the language of the relevant country followed by the Royal Navy equivalent.

The traditional uniform pattern has been the very dark blue double-breasted service tunic introduced by the Royal Navy in the 19th Century, with rank insignia worn as thin, medium and wide gold braid rings, with a loop or 'curl' on the uppermost ring, around both cuffs. Other navies and coast guards have changed the tunic colour to black or a lighter shade of dark blue, varied the widths and order of the rings, or replaced the 'curl' with a star or other symbol. Some Middle East, African, Caribbean or Pacific states wear Army insignia or Navy cuff rings on cloth shoulder-straps only, whilst others, especially from the former Warsaw Pact, wear rank insignia simultaneously on the shoulder-straps and cuffs of the tunic.

Similarly most states imitate the Royal Navy by wearing cuff rings on the shoulder-straps of greatcoats or white tropical dress tunics, with 'Flag-Officers' (admirals and sometimes commodores) having gold braid shoulder-straps with a national device above 5 - 1 silver wire Army-style stars. On shirts, pullovers or camouflage field uniforms officers wear their cuff rings on cloth shoulder-loops slipped into cloth shoulder-straps or breast-loops, as metal badges on collars or rectangular breast-patches.

Albania (Forcat e Mbrojtjes Detare Shqiptare)

Gold wire stars and gold braid rings on very dark blue cuffs. Rank titles are in Albanian. The Albanian Border Guard includes a Coast Guard (Rojë Bregdetare).

a: *Admiral, Admiral (rank not currently held)* **b:** *Nenadmiral, Vice Admiral (rank not currently held)*
c: *Kundëradmiral, Rear Admiral (rank not currently held)* **d:** *Kapiten i rangut 1 (të parë), Captain (Commandant, Navy)*
e: *Kapiten i rangut 2 (të dytë), Commander* **f:** *Kapiten i rangut 3 (të tretë), Lieutenant Commander* **g:** *Kapiten Lejtnant, Lieutenant*
h: *Lejtnant, Sub Lieutenant* **i:** *Nënlejtant, Acting Sub Lieutenant*

Algeria (Al-Quwwat Al-Bahria Al-Djaza'eria)

Gold braid stars and rings on dark blue cloth cuffs; a Commander (e) has silver braid second and fourth rings; a Midshipman (j) has a silver braid star. Rank insignia is worn simultaneously on shoulder-straps. Brass buttons. Algerian Army rank titles are used and written here in romanised Arabic. Algeria maintains a small Coast Guard.

a: *Fariq, Vice Admiral (rank not currently held)* **b:** *Liwa', Rear Admiral (Commander, Navy)* **c:** *'Amid, Commodore* **d:** *'Aqid, Captain*
e: *Muqaddam, Commander* **f:** *Ra'id, Lieutenant Commander* **g:** *Naqib, Lieutenant* **h:** *Mulazim Awwal, Sub Lieutenant*
i: *Mulazim Thani, Acting Sub Lieutenant* **j:** *Murashshah, Midshipman*

Angola (Marinha de Guerra Angolana)

Gold stars, wreaths, rings and stripes on dark blue cloth shoulder-loops on white cloth shoulder-straps; white bone buttons. Rank titles are in Portuguese.

a: *Almirante, Admiral (Chief of Naval Staff)* **b:** *Vice-Almirante, Vice Admiral* **c:** *Contra-Almirante, Rear Admiral* **d:** *Capitão-de-Mar-e-Guerra, Captain*
e: *Capitão de Fragata, Commander* **f:** *Capitão de Corveta, Lieutenant Commander* **g:** *Tenente de Navio, Lieutenant*
h: *Tenente-de-Fragata, Sub Lieutenant* **i:** *Tenente de Corveta, Acting Sub Lieutenant* **j:** *Aspirante, Midshipman*

Argentina (Armada Argentina)

Gold braid rings with 'curl' on navy blue cloth cuffs. Rank titles are in Spanish
a: *Almirante*, Admiral (*Chief of Naval Staff*) **b:** *Vicealmirante*, Vice Admiral **c:** *Contraalmirante*, Rear Admiral **d:** *Comodoro de Marina*, Commodore
e: *Capitán de Navío*, Captain **f:** *Capitán de Fragata*, Commander **g:** *Capitán de Corbeta*, Lieutenant Commander **h:** *Teniente de Navío*, Lieutenant
i: *Teniente de Fragata*, (Senior) Sub Lieutenant **j:** *Teniente de Corbeta*, Sub Lieutenant **k:** *Guardiamarina*, Acting Sub Lieutenant

Argentina Coast Guard (Prefectura Naval Argentina)

Silver suns, anchors and wreaths on gold braid shoulder-straps edged in very dark blue cloth (a-c); gold braid anchors and rings on very dark blue cloth shoulder-straps; brass buttons. Rank titles are in Spanish
a: *Prefecto Nacional*, Admiral (*Prefect-General, PNA*) **b:** *Subprefecto Nacional*, Vice Admiral **c:** *Prefecto General*, Rear Admiral
d: *Prefecto Mayor*, Captain **e:** *Prefecto Principal*, Commander **f:** *Prefecto*, Lieutenant Commander **g:** *Subprefecto*, Lieutenant
h: *Oficial Principal*, (Senior) Sub Lieutenant **i:** *Oficial Auxiliar*, Sub Lieutenant **j:** *Oficial Ayudante*, Acting Sub Lieutenant

Australia (Royal Australian Navy)

Gold braid rings with 'curl' on very dark blue cloth cuffs; brass button and white cord on white cloth collar patch (j). Royal Navy rank titles are used. The Australian Volunteer Coast Guard is a civilian organisation
a: Admiral (*rank not currently held*) **b:** Vice Admiral (*Chief of Navy*) **c:** Rear Admiral **d:** Commodore **e:** Captain **f:** Commander
g: Lieutenant Commander **h:** Lieutenant **i:** Sub Lieutenant **j:** Midshipman

Azerbaijan (Azerbycan herbi deniz qüvveleri)

Gold wire stars and wreaths and gold braid rings on black cloth cuffs, brass buttons. Rank titles are in Azeri. The Azerbaijan Border Guard includes a small Coast Guard.
a: *Admiral*, Admiral (*rank not currently held*) **b:** *Vitse-admiral*, Vice Admiral (*Commander in-Chief, Navy*) **c:** *Kontr-admiral*, Rear Admiral
d: *1 (Birinci) dərəcəli kapitan*, Captain **e:** *2 (ikinci) dərəcəli kapitan*, Commander **f:** *3 (Üçüncü) dərəcəli kapitan*, Lieutenant Commander
g: *Kapitan-leytenant*, Lieutenant **h:** *Baş leytenant*, (Senior) Sub Lieutenant **i:** *Leytenant*, Sub Lieutenant **j:** *Kıçık leytenant*, Acting Sub Lieutenant

Bahamas (Royal Bahamas Defence Force)

Gold braid rings with 'curl' on very dark blue cloth cuffs. Rank titles are in English
a: *Commodore*, Commodore (*Commander, RBDF*) **b:** *Captain*, Captain (*rank not currently held*) **c:** *Senior Commander*, (Senior) Commander
d: *Commander*, Commander **e:** *Lieutenant Commander*, Lieutenant Commander **f:** *Senior Lieutenant*, Lieutenant **g:** *Lieutenant*, Sub Lieutenant
h: *Sub Lieutenant*, Acting Sub Lieutenant

Bahrain (Royal Bahrain Navy)

Gold braid rings with 'curl' on very dark blue cloth cuffs. Arabic Bahrain Army rank titles are used and written here in romanised script
a: *Mushir*, Admiral of the Fleet (*King of Bahrain*) **b:** *Fariq Awwal*, Admiral (*rank not currently held*) **c:** *Fariq*, Vice Admiral (*rank not currently held*)
d: *'Arwa'*, Rear Admiral (*rank not currently held*) **e:** *'Amid*, Commodore (*Commander, RBNF*) **f:** *'Aqid*, Captain **g:** *Muqaddam*, Commander
h: *Ra'id*, Lieutenant Commander **i:** *Naqib*, Lieutenant **j:** *Mulazim Awwal*, Sub Lieutenant **k:** *Mulazim Thani*, Acting Sub Lieutenant

Bangladesh (Nou Bahini)

Gold braid rings with 'curl' on very dark blue cloth cuffs, brass button and white cord on white cloth collar-patch (k) Royal Navy rank titles are used. The Bangladesh Coast Guard forms part of the Ministry of Home Affairs. Personnel wear naval uniforms and insignia with a Commodore as the Director General
a: Admiral of the Fleet (*rank not currently held*) **b:** Admiral (*rank not currently held*) **c:** Vice Admiral (*Chief of Naval Staff*) **d:** Rear Admiral
e: Commodore **f:** Captain **g:** Commander **h:** Lieutenant Commander **i:** Lieutenant **j:** Sub Lieutenant & Acting Sub Lieutenant **k:** Midshipman

Barbados Coast Guard

Gold braid rings with 'curl' on very dark blue cloth shoulder straps; brass buttons. Rank titles are in English
a: Captain, Captain (*rank not currently held*) **b:** Commander, Commander (*rank not currently held*)
c: Lieutenant Commander, Lieutenant Commander (*Commanding Officer BCG*) **d:** Lieutenant, Lieutenant **e:** Junior Lieutenant, Sub Lieutenant
f: Sub Lieutenant, Acting Sub Lieutenant

Belgium (Naval Component) (Zee-macht/Force Navale)

Gold braid rings on very dark blue cloth cuffs. Rank titles are in Flemish/French.
a: *Admiraal/Amiral*, Admiral (*King Albert II*) **b:** *Vice-admiraal/Vice amiral*, Vice Admiral (*Chief of Court Protocol*)
c: *Divisie-admiraal/Amiral de division*, Rear Admiral (*Commandant, Naval Component*) **d:** *Flottieljeadmiraal/Amiral de flottille*, Commodore
e: *Kapitein-ter-zee/Capitaine de vaisseau*, Captain **f:** *Korvetkapitein/Capitaine de corvette*, Lieutenant Commander
g: *Luitenant-ter-zee 1ste klasse/Lieutenant de vaisseau 1ère classe*, (Senior) Lieutenant
h: *Luitenant-ter-zee 2de klasse/Lieutenant de vaisseau 2e classe*, Lieutenant **i:** *Vaandrig-ter-zee/Enseigne de vaisseau*, Sub Lieutenant
j: *Vaandrig-ter-zee 1ste klasse/Enseigne de vaisseau 1ère classe*, Acting Sub Lieutenant
k: *Vaandrig-ter-zee 2de klasse/Enseigne de vaisseau 2e classe*, Acting Sub Lieutenant

Benin (Forces Navales Béninoises)

Gold braid anchor and rings on very dark blue cloth shoulder-straps; a Commander (b) has silver second and fourth rings; brass buttons. Rank titles are in French
a: *Capitaine de vaisseau*, Captain (*rank not currently held*) **b:** *Capitaine de frégate*, Commander (*Commander, Navy*)
c: *Capitaine de corvette*, Lieutenant Commander **d:** *Lieutenant de vaisseau*, Lieutenant **e:** *Enseigne de vaisseau 1ère classe*, Sub Lieutenant
f: *Enseigne de Vaisseau 2e (deuxième) classe*, Acting Sub Lieutenant

RANKS AND INSIGNIA OF THE WORLD'S NAVIES

Bolivia (Armada Boliviana)

Gold wire stars and gold braid rings on very dark blue cloth cuffs. Rank titles are in Spanish.

a: Almirante, Admiral (Commander-in-Chief, Armed Forces) **b:** Vicealmirante, Vice Admiral (Commandant General, Navy) **c:** Contralmirante, Rear Admiral
d: Capitán de Navío, Captain **e:** Capitán de Fragata, Commander **f:** Capitán de Corbeta, Lieutenant Commander **g:** Teniente de Navío, Lieutenant
h: Teniente de Fragata, (Senior) Sub Lieutenant **i:** Teniente de Corbeta, Sub Lieutenant **j:** Alférez, Acting Sub Lieutenant

Brazil (Marinha do Brasil)

Gold braid stars and gold braid rings on very dark blue cloth cuffs. Rank titles are in Portuguese.

a: Almirante, Admiral of the fleet (rank not currently held) **b:** Almirante de Esquadra, Admiral (Commander of the Navy) **c:** Vice-Almirante, Vice Admiral
d: Contra Almirante, Rear Admiral **e:** Capitão-de-Mar-e-Guerra, Captain **f:** Capitão-de-Fragata, Commander
g: Capitão-de-Corveta, Lieutenant Commander **h:** Capitão Tenente, Lieutenant **i:** 1o (Primeiro) Tenente, Sub Lieutenant
j: 2o (Segundo) Tenente, Acting Sub Lieutenant **k:** Guarda Marinha, Midshipman

Brunei (Royal Brunei Navy) (Angkatan Tentera Laut Diraja Brunei)

Gold braid rings with 'curl' and national title on very dark blue cloth shoulder-strap; brass buttons. Rank titles are in Malay.

a: Fil Marsyal (L), Admiral of the Fleet (Sultan Haji Hassanah Bolkiyah Mu'izzaddin Waddaulah) **b:** Jeneral (L), Admiral (rank not currently held)
c: Leftenan Jeneral (L), Vice Admiral (rank not currently held) **d:** Mejar Jeneral (L), Rear Admiral (rank not currently held)
e: Brigedler Jeneral (L), Commodore (rank not currently held) **f:** Kolonel (L), Captain (Commander, Navy) **g:** Leftenan Kolonel (L), Commander
h: Mejar (L), Lieutenant Commander **i:** Kapten (L), Lieutenant **j:** Leftenan (L), Sub Lieutenant **k:** Leftenan Muda (L), Acting Sub Lieutenant
l: Kadet Kanan (L), Midshipman

Bulgaria (Voennomorski sili)

Gold wire stars and gold braid bars on black cuffs, brass buttons. Rank insignia is also worn simultaneously on gold braid shoulder-strap. Rank titles are in romanised Bulgarian. The Bulgarian Border Police (Granichna Politsiya) includes a small Coast Guard wearing dark blue police uniforms and insignia

a: Admiral, Admiral (rank not currently held) **b:** Vitseadmiral, Vice Admiral (Commander-in-Chief, Navy) **c:** Kontraadmiral, Rear Admiral
d: Brigaden admiral, Commodore **e:** Kapitan I (parvi) rang, Captain **f:** Kapitan II (vtori) rang, Commander
g: Kapitan III (treti) rang, Lieutenant Commander **h:** Kapitan-leytenant, Lieutenant **i:** Starshi leytenant, (Senior) Sub Lieutenant
j: Leytenant, Sub Lieutenant **k:** Mladshi Leytenant, Acting Sub Lieutenant **l:** Ofitserski kandidat, Midshipman

Cambodia (Royal Cambodian Navy)

Gold wire anchors, stars, branches and gold braid rings on navy blue cloth shoulder straps; a Commander (e) has silver second and fourth rings; brass buttons
 Cambodian Army rank titles are used

a: Udon-Nearvey Ek, Vice Admiral (Commander, Navy) **b:** Udon-Nearvey-Tor, Rear Admiral **c:** Udon-Nearvey-Trey, Commodore
d: Vorak-Nearvey-Ek, Captain **e:** Vorak-Nearvey-Tor, Commander **f:** Vorak-Nearvey-Trey, Lieutenant Commander **g:** Aknouk-Nearvey-Ek, Lieutenant
h: Aknouk-Nearvey-Tor, Sub Lieutenant **i:** Aknouk-Nearvey-Trey, Acting Sub Lieutenant

Cameroon (Marine Nationale du Cameroun)

Silver lions, anchors and stars on very dark blue cloth shoulder-straps edged gold (a-d), gold anchors, stars and rings on very dark blue cloth shoulder straps (e-k), brass buttons; a Commander (f) has silver braid first and second rings, a Midshipman (k) a gold braid ring with two mid-blue 'breaks'. Rank titles are in French.

a: *Amiral d'escadre*, Admiral (rank not currently held) **b:** *Vice-amiral d'escadre*, Vice Admiral (rank not currently held)
c: *Vice-amiral*, Rear Admiral (Chief of Naval Staff) **d:** *Contre-amiral*, Commodore **e:** *Capitaine de vaisseau*, Captain **f:** *Capitaine de frégate*, Commander
g: *Capitaine de corvette*, Lieutenant Commander **h:** *Lieutenant de vaisseau*, Lieutenant **i:** *Enseigne de vaisseau de 1ère (première) classe*, Sub Lieutenant
j: *Enseigne de vaisseau de 2e (deuxième) classe*, Acting Sub Lieutenant **k:** *Aspirant*, Midshipman

Canada

Gold embroidered crowns, crossed batons and scimitars and maple-leaves on very dark blue cloth shoulder-straps, brass buttons (a-d); gold braid rings on very dark blue cloth cuffs (e-l). Rank titles are in English/French.

a: *Admiral/Amiral*, Admiral (rank not currently held) **b:** *Vice Admiral/Vice amiral*, Vice Admiral (Chief of Maritime Staff)
c: *Rear Admiral/Contre-amiral*, Rear Admiral **d:** *Commodore/Commodore*, Commodore **e:** *Flag Officers* **f:** *Captain/Capitaine de vaisseau*, Captain
g: *Commander/Capitaine de frégate*, Commander **h:** *Lieutenant Commander/Capitaine de corvette*, Lieutenant Commander
i: *Lieutenant/Lieutenant de vaisseau*, Lieutenant **j:** *Sub Lieutenant/Enseigne de vaisseau de 1ère (première) classe*, Sub Lieutenant
k: *Acting Sub Lieutenant/Enseigne de vaisseau de 2e (deuxième) classe*, Acting Sub Lieutenant **l:** *Officer Cadet/Aspirant de marine*, Midshipman

Canada (Canadian Coast Guard/Garde côtière canadienne)

i: *Hǎijūn Zhōngwēi, Sub Lieutenant* **j:** *Hǎijūn Shǎowēi, Acting Sub Lieutenant*

Tanzania

Gold wire national coats of arms and stars on light tan cotton shoulder-straps; brown buttons. Tanzanian Army rank titles are used and written in Swahili
a: *Brigedia Jenerali, Commodore (Chief of the Navy)* **b:** *Kanali, Captain* **c:** *Luteni Kanali, Commander* **d:** *Meja, Lieutenant Commander*
e: *Kapteni, Lieutenant* **f:** *Luteni wa Kwanza, Sub Lieutenant* **g:** *Luteni wa Pili, Acting Sub Lieutenant*

Thailand (Royal Thai Navy)

Gold braid rings with 'curl' on very dark blue cloth cuffs. Rank titles are in romanised Thai.

a: *Chom Phon Rua*, Admiral of the Fleet (*King Bhumibho Adulyadej*) **b:** *Phon Rua Eg*, Admiral (Commander in Chief, Navy) **c:** *Phon Rua Tho*, Vice Admiral
d: *Phon Rua Tri*, Rear Admiral **e:** *Nawa Eg*, Captain **f:** *Nawa Tho*, Commander **g:** *Nawa Tri*, Lieutenant Commander **h:** *Rua Eg*, Lieutenant
i: *Rua Tho*, Sub Lieutenant **j:** *Rua Tri*, Acting Sub Lieutenant

Togo (Marine Togolaise)

Gold wire anchors and monograms and gold braid rings on very dark blue cloth shoulder straps, a Commander (b, has silver second and fourth rings); brass buttons. Rank titles are in French.

a: *Capitaine de vaisseau*, Captain (Commander, Navy) **b:** *Capitaine de frégate*, Commander **c:** *Capitaine de corvette*, Lieutenant Commander
d: *Lieutenant de vaisseau*, Lieutenant **e:** *Enseigne de vaisseau de 1ère (première) classe*, Sub Lieutenant
f: *Enseigne de vaisseau de 2e (deuxième) classe*, Acting Sub Lieutenant

Tonga

Gold braid rings with 'curl' on very dark blue cloth cuffs; brass button and white cord on white cloth collar-patch (g). Rank titles are in English.

a: *Captain*, Captain (rank not currently held) **b:** *Commander*, Commander (Commander, Navy) **c:** *Lieutenant Commander*, Lieutenant Commander
d: *Lieutenant*, Lieutenant **e:** *Sub Lieutenant*, Sub Lieutenant **f:** *Ensign*, Acting Sub Lieutenant **g:** *Midshipman*, Midshipman

Trinidad and Tobago Coast Guard

Gold braid rings with 'curl' on very dark blue cloth cuffs; brass button and white cord on white cloth collar-patch (f). Royal Naval rank titles are used.
a: *Captain (Commanding Officer, Coast Guard)* **b:** *Commander* **c:** *Lieutenant Commander* **d:** *Lieutenant* **e:** *Sub Lieutenant* **f:** *Midshipman*

Tunisia

Gold braid rings with 'curl' on very dark blue cloth cuffs. Arabic Tunisian Army rank titles are used and written here in French. There is a Tunisian Coast Guard.

a: *Vice-amiral d'escadre*, Vice Admiral **b:** *Vice-amiral*, Rear Admiral (Chief of Naval Staff) **c:** *Contre-amiral*, Commodore
d: *Capitaine de vaisseau major*, (Senior) Captain **e:** *Capitaine de vaisseau*, Captain **f:** *Capitaine de frégate*, Commander
g: *Capitaine de corvette*, Lieutenant Commander **h:** *Lieutenant de vaisseau*, Lieutenant **i:** *Enseigne de vaisseau de 1ère (première) classe*, Sub Lieutenant
j: *Enseigne de vaisseau de 2e (deuxième) classe*, Acting Sub Lieutenant

Turkey (Türk Deniz Kuvvetleri)

Gold braid rings with 'curl' on very dark blue cloth shoulder-strap; brass buttons. Rank titles are in Turkish. The Turkish Coast Guard (*Sahil Güvenlik Kılığı*) is manned by seconded naval personnel and is commanded by a Rear Admiral (*Tümamiral*). Personnel wear naval uniforms and insignia with the distinguishing shoulder title 'Sahil Güvenlik'

- a: *Buyük amiral*, Admiral of the Fleet (rank not currently held) b: *Oramiral*, Admiral (C-in-C Navy) c: *Koramiral*, Vice Admiral
- d: *Tümamiral*, Rear Admiral e: *Tuğamiral*, Commodore f: *Albay*, Captain g: *Yarbay*, Commander h: *Binbaşı*, Lieutenant Commander
- i: *Yüzbaşı*, Lieutenant j: *Usteğmen*, Sub Lieutenant k: *Teğmen*, Acting Sub Lieutenant l: *Asteğmen*, (Junior) Acting Sub Lieutenant

Ukraine (Viys'kogo-Morskoy Sil)

Gold wire tridents and wreaths and gold braid rings with square 'curl' on black cloth cuffs. Rank insignia is worn simultaneously on gold or black braid shoulder-strap. Rank titles are in romanised Ukrainian

- a: *Admiral*, Admiral (C-in-C, Navy) b: *Vitse-admiral*, Vice Admiral c: *Kontr-admiral*, Rear Admiral d: *Kapitan 1 rangy*, Captain
- e: *Kapitan 2 rangy*, Commander f: *Kapitan 3 rangy*, Lieutenant Commander g: *Kapitan-leytenant*, Lieutenant
- h: *Starshiy-leytenant*, (Senior) Sub Lieutenant i: *Leytenant*, Sub Lieutenant j: *Molodshiy leytenant*, Acting Sub Lieutenant

United Arab Emirates

Gold wire cap badge (gold eagle on red cloth, silver anchor, gold wreath) above gold braid rings with 'curl' on very dark blue cloth cuffs. Arabic UAE Army rank titles are used and written here in romanised script. The United Arab Emirates maintains a Coast Guard commanded by a Director-General

- a: *Liwa'*, Rear Admiral (Commander, UAENF) b: *'Amid*, Commodore c: *'Aqid*, Captain d: *Muqaddam*, Commander e: *Ra'id*, Lieutenant Commander
- f: *Naqib*, Lieutenant g: *Mulazim Awwal*, Sub Lieutenant h: *Mulazim*, Acting Sub Lieutenant

United Kingdom (Royal Navy)

Gold braid rings with 'curl' on very dark blue cloth cuffs; brass button and white cord on white cloth collar-patch (k). Her Majesty's Coast Guard is a government agency. Personnel wear naval-style uniforms and insignia

- a: Admiral of the Fleet (promotions to this rank discontinued March 1995) b: Admiral (First Sea Lord & Chief of the Naval Staff) c: Vice Admiral
- d: Rear Admiral e: Commodore f: Captain g: Commander h: Lieutenant Commander i: Lieutenant j: Sub Lieutenant & Acting Sub Lieutenant
- k: Midshipman

United Kingdom (Royal Fleet Auxiliary Service)

Gold braid rings and diamonds on very dark blue cloth cuffs, brass button and white cord on collar (g). British Merchant Navy rank titles are used.
a: *Commodore, Commodore, Commanding Officer (RFA)* **b:** *Captain, Captain* **c:** *Chief Officer, Commander* **d:** *1st (First) Officer, Lieutenant Commander*
e: *2nd (Second) Officer, Lieutenant* **f:** *3rd (Third) Officer, Sub Lieutenant* **g:** *Deck Cadet, Midshipman*

United States

Gold wire stars and gold braid rings on very dark blue cloth cuffs. Rank titles are in English.
a: *Fleet Admiral, Admiral of the Fleet (rank not currently held)* **b:** *Admiral, Admiral (Chief of Naval Operations)* **c:** *Vice Admiral, Vice Admiral*
d: *Rear Admiral (Upper Half), Rear Admiral* **e:** *Rear Admiral (Lower Half), Commodore* **f:** *Captain, Captain* **g:** *Commander, Commander*
h: *Lieutenant Commander, Lieutenant Commander* **i:** *Lieutenant, Lieutenant* **j:** *Lieutenant Junior Grade, Sub Lieutenant*
k: *Ensign, Acting Sub Lieutenant*

United States Coast Guard

Gold wire shields and gold braid rings on very dark blue cloth cuffs. Rank titles are in English.
a: *Admiral, Admiral (Commandant, USCG)* **b:** *Vice Admiral, Vice Admiral* **c:** *Rear Admiral (Upper Half), Rear Admiral*
d: *Rear Admiral (Lower Half), Commodore* **e:** *Captain, Captain* **f:** *Commander, Commander* **g:** *Lieutenant Commander, Lieutenant Commander*
h: *Lieutenant, Lieutenant* **i:** *Lieutenant Junior Grade, Sub Lieutenant* **j:** *Ensign, Acting Sub Lieutenant*

Uruguay (Armada Nacional)

Gold braid rings with curl on very dark blue cloth cuffs. Rank titles are in Spanish. The Uruguayan Coast Guard (*Prefectura Nacional Naval*) forms part of the Navy. Personnel wear naval uniforms and insignia with a Rear Admiral (*Contra Almirante*) as the commanding officer (*Proteja Nacional Naval*).
a: *Almirante, Admiral (Commander in Chief, Navy)* **b:** *Vice Almirante, Vice Admiral* **c:** *Contra Almirante, Rear Admiral* **d:** *Capitán de Navío, Captain*
e: *Capitán de Fragata, Commander* **f:** *Capitán de Corbeta, Lieutenant Commander* **g:** *Teniente de Navío, Lieutenant* **h:** *Alférez de Navío, Sub Lieutenant*
i: *Alférez de Fragata, Acting Sub Lieutenant* **j:** *Guardiamarina, Midshipman*

RANKS AND INSIGNIA OF THE WORLD'S NAVIES

Venezuela (Armada Bolivariana de Venezuela)

Gold braid rings with 'curl' on very dark blue cloth cuffs. Rank titles are in Spanish. The Coast Guard (Comando de Guardacostas) forms part of the Navy. Personnel wear naval uniforms and insignia with a Rear Admiral as the commanding officer.

a: Almirante, Admiral (rank not currently held) **b:** Vicealmirante, Vice Admiral (Commander, Navy) **c:** Contralmirante, Rear Admiral
d: Capitan de Navio, Captain **e:** Capitan de Fragata, Commander **f:** Capitan de Corbeta, Lieutenant Commander **g:** Teniente de Navio, Lieutenant
h: Teniente de Fragata, Sub Lieutenant **i:** Alférez de Navio, Acting Sub Lieutenant

Vietnam (Hai quan Nhan dan Viet Nam)

Gold metal stars and buttons (a-d) silver metal stars, bars and buttons (e-l) on gold braid shoulder straps piped black. Rank titles are in Vietnamese. There is also the Vietnam People's Coast Guard (Canh sat bien) wearing the same rank insignia.

a: Do Doc, Admiral (rank not currently held) **b:** Pho Do Doc, vice Admiral (Commander, VPA) **c:** Chuan Do Doc, Rear Admiral **d:** Da Ta, Commodore
e: Thuong Ta, Captain **f:** Trung Ta, Commander **g:** Thieu Ta, Lieutenant Commander **h:** Da Uy, (Senior) Lieutenant **i:** Thuong Uy, Lieutenant
j: Trung Uy, Sub Lieutenant **k:** Thieu Uy, Acting Sub Lieutenant **l:** Chuan Uy, Midshipman

Yemen

Gold braid rings with 'curl' on very dark blue cloth cuffs. Arabic Yemen Army rank titles are used and written here in romanised script.

a: 'Amid, Commodore (Commander, Navy) **b:** 'Aqid, Captain **c:** Muqaddam, Commander **d:** Ra'id, Lieutenant Commander **e:** Naqib, Lieutenant
f: Mulazim Awwal, Sub Lieutenant **g:** Mulazim Thani, Acting Sub Lieutenant

Pennant list of major surface ships

Type abbreviations

Notes: Designations specific to one nationality are followed by Country abbreviations.
 The prefix *W* denotes a vessel of the Coastguard Service. Suffixes to type indicators are as follows:
F denotes a vessel capable of speeds in excess of 35 kt.
G denotes a vessel with a force guided missile system, including SAM, USM and SUM, usually with a range exceeding 20 miles.
H denotes a vessel equipped with a helicopter, or with a platform for operating one.
J denotes an air cushion or surface effect design.
K denotes a vessel equipped with hydrofoils.
M denotes a Combatant vessel with a close range guided missile system.
N denotes a ship or submarine using nuclear propulsion.

<i>Submarines</i>		PTGK	Attack boat guided missile fitted with hydrofoils	AGB	Icebreaker
AGSS	Submarine, auxiliary, nuclear-powered (US)	SOC	Special operations craft (US)	AGDS	Deep submergence support ship
DSRV	Deep submergence rescue vehicle	<i>Landing Ships</i>		AGE (H)	Research ship (helicopter)
DSV	Deep submergence vehicle	AAAV	Advanced Amphibious Assault Vehicle	AGF (H)	Auxiliary Flag or command ship (helicopter)
SDV	Swimmer delivery vehicle	ACV	Landing craft air cushion (Rus)	AGI (H)	Intelligence collection ship (helicopter)
SNA	Submarine, attack, nuclear-powered (Fra)	AGC	Amphibious command ship (RoC)	AGM (H)	Missile range instrumentation ship (helicopter)
SNLE	Ballistic missile nuclear-powered submarine (Fra)	ASDS	Advanced Swimmer-Seal Delivery System	AGOB	Polar research ship
SS	Submarine, general	EDCG	Landing craft, utility (Brz)	AGOR (H)	Oceanographic research ship (helicopter)
SSA(N)	Submarine, auxiliary, nuclear-powered	LCA	Landing craft, assault	AGOS (H)	Ocean surveillance ship (helicopter)
SSA	Submarine with ASW capability (Jpn)	LCAC	Landing craft air cushion	AGP	Patrol craft tender
SSB	Ballistic missile submarine (CPR)	LCC	Amphibious command ship	AGS (C) (H)	Surveying ship (coastal) (helicopter)
SSBN	Ballistic missile nuclear-powered submarine	LCH	Landing craft, heavy (Aust)	AH	Hospital ship
SSC	Submarine, coastal	LCM	Landing craft, mechanised	AK (L) (R) (H)	Cargo ship (light) (Ro-Ro) (helicopter)
SSGN	Submarine, surface-to-surface missile, nuclear-powered	LCP (L)	Landing craft, personnel (large)	AKE	Armament stores carrier
SSK	Patrol submarine with ASW capability	LCT	Landing craft, tank	AKR	Roll on/roll off sealift ship
SSW	Submarine, midget	LCU	Landing craft, utility	AKS (L) (H)	Stores ship (light) (helicopter)
SSN	Submarine, attack, nuclear powered	LCVP	Landing craft, vehicle/personnel with bow ramp	ANL	Boom defence/cable/netlayer
<i>Aircraft Carriers</i>		LHA	Amphibious assault ship general purpose with flooded well	AO	Replenishment oiler (US)
CV (M)	Aircraft carrier (guided missile system)	LDW	Swimmer delivery vehicle	AOE	Fast combat support ship, primarily for POL replenishment
CVH (G)	Helicopter carrier (guided missile system)	LHD (M)	Amphibious assault ship (multipurpose), can operate VSTOL aircraft and helicopters	AOR (L) (H)	Replenishment oiler (small) (helicopter)
CVN (M)	Aircraft carrier, nuclear powered (guided missile system)	LKA	Amphibious cargo ship with own landing craft	AOT (L)	Transport oiler (small)
PAN	Aircraft carrier, nuclear-powered (Fra)	LLP	Assault ship, personnel	AP (H)	Personnel transport (helicopter)
<i>Cruisers</i>		LPD	Amphibious transport, dock with own LCMs and helicopter deck	APB	Barracks ship
CG	Guided missile cruiser	LPH	Amphibious assault ship, helicopter	APCR	Primary casualty receiving ship
CGH	Guided missile cruiser with helicopter	LSD (H)	Landing ship dock with own landing craft, helicopter	AR (L)	Repair ship (small)
CGN	Guided missile cruiser, nuclear-powered	LSL (H)	Landing ship logistic (Aust, UK, Sin), helicopter	ARC	Submarine cable repair ship
CLM	Guided missile cruiser (Per)	LSM (H)	Landing ship medium with bow doors and/or landing ramp, helicopter	ARS (D) (H)	Salvage ship (heavy lift) (helicopter)
<i>Destroyers</i>		LST (H)	Landing ship tank with bow doors and/or landing ramp, helicopter	AS (L)	Submarine tender (small)
DD	Destroyer	LSV	Landing ship vehicle with bow doors and/or landing ramp	ASE	Research ship (Jpn)
DDG (M)	Guided missile destroyer	RCL	Ramped craft, logistic (UK)	ASR	Submarine rescue ship
DDGH (M)	Guided missile destroyer with helicopter, or helicopter platform	TCD	Landing ship, dock (Fra)	ATA	Auxiliary ocean tug
DDK	Destroyer (Jpn)	UCAC	Utility craft air cushion	ATF	Fleet ocean tug and supply ship
<i>Frigates</i>		<i>Mine Warfare Ships</i>		ATR	Fleet ocean tug (firefighting and rescue)
DE	Destroyer escort (Jpn)	MCAC	Mine clearance air cushion	ATS	Salvage and rescue ship
FF (L) (H)	Frigate (Light) (Helicopter)	MCD	Mine countermeasures vessel, diving support	AVB	Aviation support ship
FFG (M)	Guided missile frigate	MCDV	Maritime coast defence vessel (Can)	AVM	Aviation and missile support
FFGH (M)	Guided missile frigate with helicopter, or helicopter platform	MCMV	Mine countermeasures vessel	AWT (L)	Water tanker (small)
FS (G) (H) (M)	Corvette (guided missile) (helicopter) (missile)	MCS	Mine countermeasures support ship	AX (L) (H)	Training ship (small) (helicopter)
<i>Patrol Forces</i>		MH (I) (C) (O)	Minehunter (inshore) (coastal) (ocean)	AXS	Sail training ship
CF	River gunboat (Per)	MHCD	Minehunter coastal with drone	AXT	Training tender
CM	Corvette (guided missile) (Per)	MHSC	Minehunter/sweeper coastal	HSS	Helicopter support ship
HSIC	High Speed Interception Craft with speeds in excess of 55 kt	ML (I) (C) (A)	Minehunter/sweeper coastal (auxiliary)	HSV	High speed logistic support vessel (catamaran)
PB	Coastal patrol vessel under 45 m without heavy armament	MS (I) (C) (R)	Minesweeper (inshore) (coastal) (river)	TV	Training ship (Jpn)
PB (F) (I) (R)	Patrol boat (fast) (inshore) (river)	MSA (T)	Minesweeper, auxiliary (tug)	<i>Service Craft</i>	
PBO (H)	Offshore patrol vessel between 45 and 60 m (helicopter)	MSB	Minesweeper, boat	ASY	Auxiliary yacht (Jpn)
PC	Vessel 35–55 m primarily for ASW role	MSCD	Coastal minesweeper capable of controlling drones	SAR	Search and rescue vessel
PCK	As for PC but fitted with hydrofoils	MSD	Minesweeper, drone	WFL	Water/fuel lighter (Aust)
PG	Vessel 45–85 m equipped with at least 76 mm (3-in) gun	MSO	Minesweeper, ocean	YAC	Royal yacht
PGG	As for PG but with force guided missile system	SRMH	Single role minehunter (UK)	YAG	Service craft, miscellaneous
PGGJ	As for PGG but air cushion or ground effect design	<i>Auxiliaries</i>		YAGK	Surface effect craft, experimental
PGGK	As for PGG but fitted with hydrofoils	ABU (H)	Buoy tender (helicopter)	YDG	Degaussing vessel
PSO (H)	Offshore patrol vessel over 60 m (helicopter)	AD	Destroyer tender	YDT	Diving tender
PTK	Attack boat torpedo fitted with hydrofoils	ADG	Degaussing/depotting ship	YE	Ammunition lighter
		AE (L)	Ammunition ship capable of underway replenishment (small)	YF	Covered personnel transport under 40 m
		AEM	Missile support ship	YFB (H)	Ferry (helicopter)
		AET (L)	Ammunition transport (small)	YFL	Launch
		AF (L)	Stores ship (small)	YFRT	Range safety vessel
		AFS	Combat stores ship, capable of underway replenishment	YFU	Former LCU used for cargo
		AG (H)	Auxiliary miscellaneous (helicopter)	YGS	Survey launch
				YH	Ambulance boat
				YM	Dredging craft
				YO (G)	Fuel barge (gasolene)
				YD	Harbour patrol craft
				YPB	Floating barracks
				YPC	Oil pollution control vessel
				YPT	Torpedo recovery vessel
				YT (B) (M) (L)	Harbour tug (large) (medium) (small)
				YTR	Harbour fire/rescue craft with several monitors
				YTT	Torpedo trials craft
				YW	Water barge

Albania

FORCE DETAR

Country Overview

After being governed by a communist regime since 1946, democratic elections in the Republic of Albania took place in 1991 although since then there have been periods of instability. Situated in western part of the Balkan Peninsula, the country has an area of 11,100 square miles and is bordered to the north by Montenegro and Serbia, to the east by FYRO Macedonia and to the south by Greece. There is a coastline of 195 n miles with the Adriatic Sea on which Durrës and Vlorë are the principal ports. The capital

and largest city is Tirana. Territorial waters (12 n miles) are claimed but an EEZ has not been claimed. Italy provides strong operational, training and administrative support. Joint Coast Guard and Customs patrols are mounted within territorial waters while other personnel training is conducted in Italy.

Headquarters Appointments

Commander of the Navy:
Captain Gerveni Kristaq

Personnel

2009: 1,156 approximately

Bases

HC: Durrës
Districts: Durrës (1st), Vlorë (2nd)
Bases: Shengyin, Himarë, Saranda, Sazan Island, Porto Palermo, Vlorë.

PATROL FORCES

Notes: (1) Pennant numbers beginning with '1' indicate units from the Durrës district. Those beginning with '2' are from the Vlorë district.
(2) There are six inshore patrol craft of 12-15 m length

1 SHANGHAI II CLASS (FAST ATTACK CRAFT—GUN) (PC)

P 115

Displacement, tons: 113 standard; 134 full load
Dimensions, feet (metres): 127.3 × 17.7 × 5.6 (38.8 × 5.4 × 1.7)
Main machinery: 2 Type L-12V-180 diesels; 2,400 hp(m) (1.76 MW) (forward)
2 Type 12-D-6 diesels; 1,820 hp(m) (1.34 MW) (aft); 4 shafts
Speed, knots: 30
Range, n miles: 700 at 16.5 kt
Complement: 34
Guns: 4 China 37 mm/63 (2 twin); 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg
4 USSR 25 mm/60 (2 twin); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg
Torpedoes: 2—21 in (533 mm) tubes; Yu-1; 9.2 km (5 n miles) at 39 kt; warhead 400 kg
Depth charges: 2 projectors; 8 depth charges in lieu of torpedo tubes.
Mines: Rails can be fitted; probably only 10 mines
Radars: Surface search/fire control: Pot Head; I-band.
Sonars: Hull-mounted set probably fitted.

Comment: Four transferred from China in mid-1974 and two in 1975. One ship escaped to Italy in early 1997, returned in early 1998 and was reported repaired in 2000. Has torpedo tubes on the stern taken from deleted Huchuan class. Seldom seen at sea.

SHANGHAI II (China colours)

6/1992 / 0081445

2 PO 2 (PROJECT 501) CLASS (COASTAL PATROL CRAFT) (PB)

A 120

A 212

Displacement, tons: 66 full load
Dimensions, feet (metres): 70.5 × 11.5 × 3.3 (21.5 × 3.5 × 1)
Main machinery: 1 Type 3-D-12 diesel, 300 hp(m) (220 kW) sustained; 1 shaft
Speed, knots: 12
Complement: 8
Guns: 2—12.7 mm MGs. At least one of the class has a twin 25 mm/60
Radars: Surface search: I-band

Comment: Two survive from a total of 11 transferred from USSR 1957-80. Previous minesweeping gear has been removed and the craft are used for utility roles. All escaped to Italy in early 1997 and returned, two in early 1998 and one in late 1998. Two others were towed back as being beyond repair. One other A 451 was sunk in a collision with an Italian corvette in March 1997. Seldom seen at sea.

PO 2 (old number)

7/1992, Terje Nilsen / 0056447

MINE WARFARE FORCES

1 T 43 (PROJECT 254) CLASS (MINESWEEPER—OCEAN) (MSO)

M 111

Displacement, tons: 500 standard, 580 full load
Dimensions, feet (metres): 190.2 × 27.6 × 6.9
(58 × 8.4 × 2.1)
Main machinery: 2 Kolomna Type 9-D-8 diesels, 2,000 hp(m)
(1.47 MW) sustained, 2 shafts
Speed, knots: 15
Range, n miles: 3,000 at 10 kt, 2,000 at 14 kt
Complement: 65
Guns: 4—37 mm/63 (2 twin); 160 rds/min to 9 km (5 n miles);
weight of shell 0.7 kg.
8—12.7 mm MGs.
Depth charges: 2 projectors.
Mines: 16
Radars: Air/surface search: Ball End; E/F-band.
Navigation: Furuno; I-band.
Sonars: Stag Ear; hull-mounted set probably fitted.

Comment: Transferred from USSR in 1960. All escaped to Italy in early 1997 and were returned in 1998. M 111 refitted in Italy in 2002 and M 112 has been decommissioned

T 43
5/1996, Piet Cornelis
1153014

AUXILIARIES

Notes: In addition there are a Project 368 Poluchat survey and torpedo recovery craft of 20 tons (A 110), an old ex-USSR Sholanda class tender *Marinza* (A 210), a water-barge, two tugs and a floating dock (*Vlorë*).

1 LCT 3 CLASS (REPAIR SHIP) (ARL)

A 223 (ex-MOC 1203)

Displacement, tons: 640 full load
 Dimensions, feet (metres): 192 × 31 × 7 (58.6 × 9.5 × 2.1)
 Main machinery: 2 diesels; 1,000 hp (746 kW); 2 shafts
 Speed, knots: 8
 Complement: 24

Comment: 1943-built LCT converted in Italian use as a repair craft. Refitted in Italy, transferred in 1999 and used for moored technical support. To be decommissioned once improvements to naval base facilities have been made.

LCT 3 (Italian colours) 10/1998, *Diego Quevedo* / 0017507

COAST GUARD (ROJA BREGDETARE)

Notes: (1) A Project 522 'Nyryat 1' diving tender (R 218) was transferred from the Navy in 2003.
 (2) An Italian Coast Guard craft CP 224 transferred in 2008.

2 COASTAL PATROL CRAFT (PB)

R 117 R 217

Displacement, tons: 18 full load
 Dimensions, feet (metres): 45.6 × 13 × 3 (13.9 × 4 × 0.9)
 Main machinery: 2 diesels; 1,300 hp (942 kW); 2 waterjets
 Speed, knots: 34. Range, n miles: 200 at 30 kt
 Complement: 4
 Guns: 2 12.7 mm MGs.
 Radars: Surface search: Raytheon, I-band.

Comment: Transferred from the US on 27 February 1999. Reported operational.

R 217 6/2007, *Massimo Annati* / 1166505

1 + 3 DAMEN STAN PATROL 4207 (PB)

ILIRIA P 131 ORIK LISSUS BUTRINTI

Displacement, tons: 205
 Dimensions, feet (metres): 140.4 × 23.3 × 8.3 (42.8 × 7.1 × 2.52)
 Main machinery: 2 Caterpillar 3516B DI-TA; 5,600 hp (4.17 MW); 2 cp props
 Speed, knots: 26
 Complement: To be announced
 Guns: To be announced.

Comment: Contract signed with Damen Shipyards, Gorinchem on 13 November 2007 for the acquisition of four Stan Patrol 4207 offshore patrol vessels. The first vessel was built in Holland whilst the remaining three are to be built at Pashallman Shipyard near Vlorë. The contract also includes refurbishment of the shipyard, training and maintenance services. Details are based on those in UK Customs service and in Jamaica.

ILIRIA 7/2007, *A A de Krulff* / 1335320

8 V 4000 (FAST PATROL CRAFT) (PBF)

Displacement, tons: 27.3 full load
 Dimensions, feet (metres): 54.1 × 14.8 × 2.6 (16.5 × 4.5 × 0.8)
 Main machinery: 2 Isotta Fraschini ID 36 SS 16V diesels, 2,450 hp (1.8 MW); sustained
 Speed, knots: 48. Range, n miles: 420 at 35 kt
 Complement: 5
 Radars: Surface search: GEM DX 132; I-band

Comment: Eight Drago craft transferred from the Italian Guardia di Finanza in 2006.

V 4000 CRAFT 8/2006, *Guardia di Finanza* / 1184418

3 SEA SPECTRE MK III (PB)

R 118 R 215 R 216

Displacement, tons: 41 full load
 Dimensions, feet (metres): 65 × 18 × 5.9 (19.8 × 5.5 × 1.8)
 Main machinery: 3 Detroit 8V-71 diesels; 690 hp (515 kW) sustained; 3 shafts
 Speed, knots: 28. Range, n miles: 450 at 25 kt
 Complement: 9
 Guns: 2—25 mm. 2—12.7 mm MGs.
 Radars: Surface search: Raytheon, I-band.

Comment: Transferred from the US on 27 February 1999

R 215 6/2006*, *1335319*

4 TYPE 227 INSHORE PATROL CRAFT (PBR)

R 123 (ex-CP 229) R 124 (ex-CP 235) R 225 (ex-CP 234) R 226 (ex-CP 236)

Displacement, tons: 16 full load
 Dimensions, feet (metres): 44.0 × 15.7 × 4.3 (13.4 × 4.8 × 1.3)
 Main machinery: 2 AIFO 8281-SRM diesels; 1,770 hp (1.32 MW); 2 shafts
 Speed, knots: 24. Range, n miles: 400 at 24 kt
 Complement: 5
 Radars: Surface search: I band

Comment: Wooden construction. Built in Italy 1966-69. Transferred from Italian Coast Guard to Albanian Coast Guard in 2002

7 TYPE 2010 INSHORE PATROL CRAFT (PBR)

R 125 (ex-CP 2008) R 127 (ex-CP 2021) R 224 (ex-CP 2010) R 228 (ex-CP 2023)
 R 126 (ex-CP 2020) R 128 (ex-CP 2034) R 227 (ex-CP 2007)

Displacement, tons: 15 full load
 Dimensions, feet (metres): 41.0 × 11.8 × 3.6 (12.5 × 3.6 × 1.1)
 Main machinery: 2 AIFO diesels; 1,072 hp (800 kW); 2 shafts
 Speed, knots: 24. Range, n miles: 533 at 20 kt
 Complement: 5
 Radars: Surface search: I-band

Comment: Former harbour launches built in Italy in the 1970s. GRP construction. One transferred from Italian Coast Guard to Albanian Coast Guard in 2002 and a further six in 2004

1 TYPE 303 COASTAL PATROL CRAFT (PB)

R 122 (ex-CP 303)

Displacement, tons: 20 full load
 Dimensions, feet (metres): 44.0 × 12.5 × 3.6 (13.4 × 3.8 × 1.1)
 Main machinery: 2 GM6V53 diesels; 730 hp (544 kW); 2 shafts
 Speed, knots: 19. Range, n miles: 350 at 13 kt
 Complement: 5
 Radars: Surface search: I-band

Comment: Built in US in 1965. Transferred from Italian Coast Guard to Albanian Coast Guard in 2002.

1 TYPE 246 CLASS (INSHORE PATROL CRAFT) (PBR)

— (ex CP 249)

Displacement, tons: 22 full load
 Dimensions, feet (metres): 49.2 × 15.9 × 5.4 (15.0 × 4.85 × 1.65)
 Main machinery: 2 Isotta Fraschini ID 35 SS6V diesels; 1,350 hp (1.0 MW); 2 shafts
 Speed, knots: 27
 Complement: 7
 Radars: Surface search: I-band

Comment: Built in Italy in 1980 Transferred from the Italian Coast Guard in 2008.

Algeria

MARINE DE LA REPUBLIQUE ALGERIENNE

Country Overview

Formerly a French colony, the People's Democratic Republic of Algeria gained independence in 1962. Situated in north Africa, it has an area of 919,595 square miles and is bordered to the east by Tunisia and Libya, to the south by Niger, Mali, and Mauritania and to the west by Morocco. It has a 540 n mile coastline with the Mediterranean. The capital, largest city and principal port is Algiers. Territorial seas (12 n miles) and Fishery zones (32/52 n miles) have been claimed but an EEZ has not been claimed.

Headquarters Appointments

Commander of the Navy:
Lieutenant General Melek Necib
Inspector General of the Navy:
Major General Abdelmadjid Taright

Personnel

(a) 2009: 7,500 (500 officers) (Navy) (Includes at least 600 naval infantry); 500 (Coast Guard)
(b) Voluntary service

Bases

Algiers (1st Region), Mers-el-Kebir (2nd Region), Jijel (3rd Region), Annaba (CG HQ)

Coast Defence

Four batteries of truck-mounted SS-C-3 Styx twin launchers. Permanent sites at Algiers, Mers-el-Kebir and Jijel linked by radar

SUBMARINES

Notes: One decommissioned Romeo class is used for training.

2 + 2 KILO CLASS (PROJECT 877EKM/636) (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
RAIS HADJ MUBAREK	012	Admiralty Yard, Leningrad	1985	1986	Oct 1987
EL HADJ SLIMANE	013	Admiralty Yard, Leningrad	1985	1987	Jan 1988
-	-	Admiralty Yard, Leningrad	2007	2009	2010
-	-	Admiralty Yard, Leningrad	2009	2011	2012

Displacement, tons: 2,325 surfaced; 3,076 dived
Dimensions, feet (metres): 238.2 × 32.5 × 21.7
(72.6 × 9.9 × 6.6)

Main machinery: Diesel-electric; 2 diesels; 3,650 hp(m) (2.68 MW); 2 generators; 1 motor; 5,900 hp(m) (4.34 MW); 1 shaft; 2 auxiliary MT-168 motors, 204 hp(m) (150 kW); 1 economic speed motor; 130 hp(m) (95 kW)

Speed, knots: 17 dived; 10 surfaced; 9 snorting
Range, n miles: 6,000 at 7 kt snorting; 400 at 3 kt dived
Complement: 52 (13 officers)

Torpedoes: 6–21 in (533 mm) tubes. Combination of Russian TEST-71ME; anti-submarine active/passive homing to 15 km (8.2 n miles) at 40 kt; warhead 205 kg

and 53–55; anti-surface ship passive wake homing to 19 km (10.3 n miles) at 45 kt; warhead 300 kg. Total of 18 weapons.

Mines: 24 in lieu of torpedoes.

Countermasures: ESM. Brick Pulp; radar warning.

Weapons control: MVU 110TFCS

Radars: Surface search: SnoopTray; I-band.

Sonars: MGK 400 Shark Teeth/Shark Fin; hull-mounted; passive/active search and attack; medium frequency. MG 519 Mouse Roar; active attack; high frequency.

Programmes: The Project 877EKM were new construction hulls which replaced the Romeo class. A contract for the construction of two Project 636 boats was signed with Admiralty Shipyards in mid-2006 and construction of the first is reported to have begun in 2007.

Modernisation: Following refits in 1993–96, both submarines undergoing further two-year refits at Admiralty Yard, St Petersburg. Work on the first boat, which is reported to have included upgrade of the sonar system, began in November 2005 and completed in 2008. Refit of the second boat is expected.

Structure: Diving depth, 790 ft (240 m). 9,700 kWh batteries. Pressure hull 169.9 ft (51.8 m). May be fitted with SA-N-5/B portable SAM launcher.

Operational: During the refit period until 2009, only one boat will be operational. Both based at Mers El Kebir

RAIS HADJ MUBAREK

3/1996, 0056450

FRIGATES

Notes: Acquisition of four new frigates is under consideration. A decision is expected in 2009.

3 MOURAD RAIS (KONI) CLASS (PROJECT 1159.2) (FFLM)

Name	No	Builders	Commissioned
MOURAD RAIS	901	Zelenodolsk Shipyard	20 Dec 1980
RAIS KELLICH	902	Zelenodolsk Shipyard	24 Mar 1982
RAIS KORFOU	903	Zelenodolsk Shipyard	3 Jan 1985

Displacement, tons: 1,440 standard; 1,900 full load
Dimensions, feet (metres): 316.3 × 41.3 × 11.5
(96.4 × 12.8 × 3.5)

Main machinery: CODAG; 1 SGW, Nikolayev, M88 gas turbine (centre shaft); 18,000 hp(m) (13.25 MW), sustained; 2 Russki B-88 diesels; 15,820 hp(m) (11.63 MW) sustained; 3 shafts

Speed, knots: 27 gas; 22 diesel

Range, n miles: 1,800 at 14 kt

Complement: 130

Missiles: SAM: SA-N-4 Gecko twin launcher (1); semi-active radar homing to 15 km (8 n miles) at 2.5 Mach; height envelope 9–3,048 m (29.5–10,000 ft); warhead 50 kg, 20 missiles. Some anti-surface capability.

Guns: 4–3 in (76 mm)/59 AK 726 (2 twin) (1); 90 rds/min to 15 km (8.5 n miles); weight of shell 5.9 kg.

4–30 mm/65 (2 twin) (2); 500 rds/min to 5 km (2.7 n miles), weight of shell 0.54 kg.

A/S mortars: 2–12-barrelled RBU 6000 (1); range 6,000 m; warhead 31 kg.

Torpedoes: 4–533 mm (2 twin) (in 903 only) (1).

Depth charges: 2 racks.

Mines: Rails; capacity 22.

Countermasures: Decoys: 2 PK 16 chaff launchers (901, 902); 2 PJ 46 decoy launchers (903).

ESM. Watch Dog. Cross Loop D/E NRJ-6A (903).

Weapons control: 3P-60 UE

Radars: Air/surface search: Pozitiv-ME1.2 (903) (1); I-band. Strut Curve; E/F-band (901 and 902).

Navigation: Don 2; I band.

Fire Control: Drum tilt (1); H-I-band (for search/acquisition/FC).

Pop Group (1); F/H-I-band (for missile control).

Hawk screech (901 and 902) (1); I-band.

IFF: High Pole B. 2 Square Head.

MOURAD RAIS

(Scale 1 : 900), Ian Sturton / 0567433

RAIS KORFOU

(Scale 1 : 900), Ian Sturton / 0104159

Sonars: Hercules (MG 322) hull-mounted; active search and attack; medium frequency.

Programmes: New construction ships built in USSR with hull numbers 5, 7 and 10 in sequence. Others of the class built for Cuba, Yugoslavia, East Germany and Libya. Interest was shown in ex-GDR ships in 1991 but sale was rejected by the German government.

Modernisation: New generators fitted 1992–94. *Rais Korfoou* in refit at Kronstadt from 1997 to November 2000.

The refit included replacement of Strut Curve radar, removal of Hawk screech fire-control radar, fitting of torpedo tubes and a new electronic suite. Refit of *Mourad Rais* began in late 2007 and of *Rais Kellich* in late 2008.

Structure: The deckhouse aft in Type II Konis houses air conditioning machinery.

Operational: All have been used for Training cruises. All based at Mers El Kebir.

CORVETTES

3 + (1) DJEBEL CHENOUA (C 58) CLASS (PROJECT 802) (FSG)

Name	No	Builders	Launched	Commissioned
DJEBEL CHENOUA	351	ECRN, Mers-el-Kebir	3 Feb 1985	Nov 1988
EL CHIHAB	352	ECRN, Mers-el-Kebir	Feb 1990	June 1995
AL KIRCH	353	ECRN, Mers-el-Kebir	July 2000	2002

Displacement, tons: 496 standard, 540 full load
Dimensions, feet (metres): 191.6 x 27.9 x 8.5 (58.4 x 8.5 x 2.6)
Main machinery: 3 MTU 20V 538TB92 diesels; 12,800 hp(m) (9.4 MW); 3 shafts
Speed, knots: 31
Complement: 52 (8 officers)

Missiles: SSM: 4 China C 802 (CSS-N-8 Saccade) (2 twin), active radar homing to 120 km (66 n miles) at 0.9 Mach; warhead 165 kg

Guns: 1 Russian 3 in (76 mm)/59 AK 176; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg.
 1—30 mm/65 AK 630; 6 barrels per mounting; 3,000 rds/min combined to 2 km.

Countermeasures: Decoys: 2 chaff launchers.
Electro-optic devices: Optronic director.

Radars: Surface search: E/F-band.
Navigation: Racal Decca 1226; I-band.
Fire control: I band

Programmes: Ordered July 1983. Project 802 built with Bulgarian assistance. First one completed trials in 1988. Work on the second of class was suspended in 1992 due to shipyard debt problems but the ship completed in 1995. Main guns were fitted at a later date. Construction of a fourth ship is reported to be under consideration.

Structure: Hull size suggests association with Bazán Cormoran class.

6 Algeria/Land-based maritime aircraft — Amphibious forces

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 2 Beechcraft Super King Air 200T.

Operational speed: 282 kt (523 km/h).

Service ceiling: 35,000 ft (10,670 m).

Range: 2,030 n miles (3,756 km).

Role/Weapon systems: Operated by air force for crew training and for close-range EEZ operations. Sensors: Weather radar only. Weapons: Unarmed.

Numbers/Type: 3 Fokker F27-400/600

Operational speed: 250 kt (463 km/h).

Service ceiling: 25,000 ft (7,620 m).

Range: 2,700 n miles (5,000 km).

Role/Weapon systems: Visual reconnaissance duties in support of EEZ, particularly offshore platforms. Sensors: Weather radar and visual means only. Weapons: Limited armament.

Numbers/Type: 28/6 MiG-29SMT/MiG 29UBT Fulcrum

Operational speed: 750 kt (1,400 km/h).

Service ceiling: 57,000 ft (17,400 m).

Range: 1,186 n miles (2,200 km).

Role/Weapon systems: Contract signed in early 2008 for the supply of 28 MiG-29 SMT single-seat all-weather fighters with attack capability and six two-seat MiG-29 UBT. There is an option for a further 20 aircraft. However, following reported refusal to accept the Fianker aircraft, up to 16 Su-30 Mk I fighters may be acquired in lieu. The MiG-29 SMT is an upgraded version of the original airframe with reduced radar signature and improved avionics. Sensors: Saphir-29 radar. Weapons: AAM: R77. ASM: two Kh-31 A/P (AS-17 Krypton). Conventional bombs; four KAB-500KRTV-guided bombs. 30 mm cannon.

Numbers/Type: 6 AugustaWestland AW 101.

Operational speed: 160 kt (296 km/h).

Service ceiling: 15,000 ft (4,572 m).

Range: 550 n miles (1,019 km).

Role/Weapon systems: Contract reported in late 2007 for a total of six utility variants of the EH 101. All are to be configured for SAR duties although the aircraft design facilitates rapid role-change to a troop-carrying configuration. Delivery is expected to start in 2009 and to be completed in 2010. Military lift is 28 troops and up to 4 tonnes underslung. Sensors: Telephonics RDR-1600 SAR Weather Avoidance Radar.

Numbers/Type: 6 AugustaWestland Super Lynx 300.

Operational speed: 120 kt (222 km/h).

Service ceiling: 10,000 ft (3,048 m).

Range: 320 n miles (593 km).

Role/Weapon systems: Contract reported in late 2007 for a total of six unarmed variants of the Super Lynx. Roles include maritime surveillance and SAR. Delivery is expected to start in 2009 and to be completed in 2010.

Main machinery: 2 MTU 12V 538TB92 diesels; 5,110 hp(m) (3.8 MW); 2 shafts (see Structure)

Speed, knots: 27

Range, n miles: 3,300 at 12 kt; 2,600 at 15 kt

Complement: 27 (3 officers)

Guns: 1 OTO Melara 3 in (76 mm)/62 compact (341–342); 85 rds/min to 18 km (9 n miles)

anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.

4 USSR 25 mm/60 (2 twin) (remainder); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg.

2 USSR 14.5 mm (twin) (in first five).

Electro-optic devices: Lawrence Scott optronic director (in 341 and 342).

Radars: Surface search, Racal Decca 1226; I-band

Programmes: Design and first pair ordered from Brooke Marine in June 1981. First left for Algeria without armament in September 1982, second arrived Algiers 12 June 1983. A further seven were then assembled or built at ECRN, Mers-el-Kebir. Of these, 346 commissioned 10 November 1985 and 347–349 delivered by 1993. After a delay two further craft were completed; 350 in late 1997 followed by 354 in 1998. 356–358 have since been added and original plans for a class of 15 look to have been achieved.

Structure: Same hull as Barbados Trident. There are some variations in armament.

Operational: Six of the class have been transferred to the Coast Guard.

Oct 1984

Displacement, tons: 2,450 full load

Dimensions, feet (metres): 306 × 50.9 × 8.1 (93 × 15.6 × 2.5)

Main machinery: 2 MTU 16V 1163TB82 diesels; 8,880 hp(m) (6.5 MW) sustained; 2 shafts

Speed, knots: 16

Range, n miles: 3,000 at 12 kt

Complement: 81

Military lift: 240 troops; 7 MBTs and 380 tons other cargo; 2 ton crane with athwartships travel

Guns: 2 Breda 40 mm/70 (twin); 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.

4 USSR 25 mm/60 (2 twin); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg.

Countermeasures: Decoys: Wallop Barricade double layer chaff launchers.

ESM: Racal Cutlass; intercept.

ECM: Racal Cygnus; jammer

Electro-optic devices: CSEE Naja optronic.

Radars: Navigation: Racal Decca TM 1226; I-band.

Fire control: Marconi S 800, J-band.

Helicopters: Platform only for one Sea King.

Programmes: First ordered in June 1981, and launched 18 May 1983; second ordered 18 October 1982 and launched 15 May 1984. Similar hulls to Omani *Nasr Al Bahr*.

Structure: These ships have a through tank deck closed by bow and stern ramps. The forward ramp is of two sections measuring length 18 m (when extended) × 5 m breadth, and the single section stern ramp measures 4.3 × 5 m with the addition of 1.1 m finger flaps. Both hatches can support a 60 ton tank and are winch operated. In addition, side access doors are provided on each side forward. The tank deck side bulkheads extend 2.25 m above the upper deck between the forecabin and the forward end of the superstructure, and provide two hatch openings to the tank deck below. Additional 25 mm guns have been fitted either side of the bridge.

Operational: Both are reported active. Based at Jijel.

Displacement, tons: 388 full load
Dimensions, feet (metres): 192.8 × 23.6 × 7.2 (58.8 × 7.2 × 2.2)
Main machinery: 3 PCR/Kotomna diesels, 6,600 hp(m) (4.92 MW); 3 shafts
Speed, knots: 24
Range, n miles: 1,400 at 15 kt
Complement: 42 including 25 trainees
Guns: 4 China 14.5 mm (2 twin).
Radars: Surface search: Type 756; I-band

Comment: Two delivered by transporter ship from China in April 1990 and described as training vessels. Two more acquired in January 1991, the last three in July 1991. Hainan class hull with modified propulsion and superstructure similar to some Chinese paramilitary vessels. Used for training when boats are carried aft in place of the second 14.5 mm gun. GC 255 and 257 are reported non operational.

EL MOUDERRIB IV 3/2006, M Declerck / 11644/5

4 BAGLIETTO TYPE 20 (PBF)

EL HAMIL GC 325 EL ASSAD GC 326 MARKHAD GC 327 ETAIR GC 328

Displacement, tons: 44 full load
Dimensions, feet (metres): 66.9 × 17.1 × 5.5 (20.4 × 5.2 × 1.7)
Main machinery: 2 CRM 18DS diesels; 2,660 hp(m) (2 MW); 2 shafts
Speed, knots: 36
Range, n miles: 445 at 20 kt
Complement: 11 (3 officers)
Guns: 1 Oerlikon 20 mm.

Comment: The first pair delivered by Baglietto, Verazza in August 1976 and six further in pairs at two monthly intervals. Fitted with radar and optical fire control. Four others of the class cannibalised for spares.

BAGLIETTO 20 3/2006, M Declerck / 11644/7

6 BAGLIETTO MANGUSTA CLASS (PB)

-323 -324 REQUIN 331 -332 MARSOUIN 333 MURENE 334

Displacement, tons: 91 full load
Dimensions, feet (metres): 98.4 × 19.0 × 7.2 (30.0 × 5.8 × 2.2)
Main machinery: 3 MTU diesels; 4,000 hp (3.0 MW); 3 shafts
Speed, knots: 32.5
Range, n miles: 800 at 24 kt
Complement: 14 (3 officers)
Guns: 2—25 mm (1 twin), 1—12.7 mm MG
Radars: Navigation: I-band.

Comment: One of six patrol craft first delivered to Algeria in early 1977 and thought to have been decommissioned between 1998 and 2001. One patrol craft brought back to service in 2006.

REQUIN 3/2006, M Declerck / 11644/6

Displacement, tons: To be announced
Dimensions, feet (metres): 55.8 × 7 × 7 (17.0 × 7 × 7)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 15
Complement: To be announced
Guns: To be announced
Radars: Navigation: I-band.

Comment: Patrol craft reported constructed at Mers-el-Kebir 1982-83

0 + 21 OCEA FPB 98 CLASS (PATROL CRAFT) (PB)

Displacement, tons: 116 full load
Dimensions, feet (metres): 115.5 × 22.3 × 4.0 (35.2 × 6.8 × 1.2)
Main machinery: 2 MTU 12V M70 diesels; 4,600 hp (3.43 MW); 2 Kamowa waterjets
Speed, knots: 32
Range, n miles: 300 at 28 kt
Complement: 11 (3 officers)
Guns: 3—12.7 mm MGs.
Radars: Navigation: Sperry Bridgmaster; I-band.

Comment: The contract with OCEA, reported to have been signed in 2007, for the construction of 21 patrol craft was announced in October 2008. Delivery of the first vessel is expected in late 2008 and the programme is to be completed in 2012. The vessels are to be built at St Nazaire. Details are based on those of similar craft in Kuwait: service and may be different.

FPB 98 CLASS (Kuwaiti colours) 8/2004, B Prézelin / 1133080

CUSTOMS

Notes: The Customs service is a paramilitary organisation employing a number of patrol craft armed with small MGs. These include *Bouzagza*, *Djurdjura*, *Hodna*, *Aures* and *Hoggar*. The first three are P 1200 class 39 ton craft capable of 33 kt. The next pair are P 802 class. They were built by Watercraft, Shoreham and delivered in November 1985.

Angola

MARINHA DE GUERRA

Country Overview

Formerly known as Portuguese West Africa, the Republic of Angola became independent in 1975 but has been ravaged by civil war ever since. With an area of 481,354 square miles it has borders to the south with Namibia, to the east with Zambia and to the north and east with the Democratic Republic of the Congo which separates a small exclave, Cabinda, from the rest of the country. Angola has a coastline with the south Atlantic Ocean of some 864 n miles. The capital, largest city and principal port is Luanda. Territorial seas (12 n miles) and a fisheries zone

(200 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits have not been published.

Headquarters Appointments

Commander of the Navy: Admiral Augusto da Silva Cunha

Personnel

- (a) 2009: 890
(b) Voluntary service

Bases

Luanda, Lobito, Namibe. (There are other good harbours available on the 1,000 mile coastline.) Naval HQ at Luanda on Ilha de Luanda is in an old fort, as is Namibe.

Naval Aviation

Seven EADS-CASA C 212-300MP and one Fokker F27 maritime patrol aircraft are operated by the Air Force.

PATROL FORCES

2 NAMACURRA CLASS (INSHORE PATROL CRAFT) (PB)

Displacement, tons: 5 full load
Dimensions, feet (metres): 29.5 × 9 × 2.8 (9 × 2.7 × 0.8)
Main machinery: 2 Yamaha outboards; 380 hp (m) (2 / 9 kW)
Speed, knots: 32. **Range, n miles:** 180 at 20 kt
Complement: 4
Guns: 1—12.7 mm MG. 2—7.62 mm MGs
Depth charges: 1 rack.
Radars: Surface search. Furuno; I-band

Comment: Built in South Africa in 1980–81. Can be transported by road. Donated by South Africa in 2006.

NAMACURRA (South Africa colours)

Anguilla

Country Overview

British dependency since 1971 following secession from associated state of St Kitts Nevis-Anguilla. With an area of 35 square miles, the island is situated

at the northern end of the Leeward Islands in the Lesser Antilles and bordered by the Caribbean to the west and Atlantic to the east. Territorial seas (3 n miles) and a fishery zone (200 n miles) are claimed.

Headquarters Appointments

Inspector of Marine:
Inspector Elliott Forbes

Personnel

2009: 79

POLICE

1 HALMATIC M160 CLASS (INSHORE PATROL CRAFT) (PB)

DOLPHIN

Displacement, tons: 18 light
Dimensions, feet (metres): 52.5 × 15.4 × 4.6 (16 × 4.7 × 1.4)
Main machinery: 2 MAN V10 diesels; 820 hp (610 kW) sustained; 2 shafts
Speed, knots: 34. **Range, n miles:** 575 at 23 kt
Complement: 8
Guns: 1—12.7 mm MG.
Radars: Surface search: JRC 2254; I-band

Comment: Built by Halmatic and delivered 27 December 1989. Identical craft to Qatar. GRP hull. Rigid inflatable boat launched by gravity davit. Returned to service on 30 August 2004 after refit.

DOLPHIN

Main machinery: 2 Johnson outboards, 300 hp (225 kW)
Speed, knots: 38
Complement: 4

Comment: Delivered in 1990 and re-engined in 2005.

LAPWING

6/2006, Anguilla Police / 1164310

Antigua and Barbuda

Country Overview

Independent since 1981, the British monarch, represented by a governor-general, is head of state. Situated at the southern end of the Leeward Islands in the Lesser Antilles chain, the country comprises Antigua (108 square miles), Barbuda to the north and uninhabited Redonda to the southwest. The capital, largest town, and main port is St John's. An archipelagic state, territorial seas (12 n miles)

and a fishery zone (200 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has also been claimed but the limits are not defined. The Antigua Barbuda Defence Force (ABDF) took over the Coast Guard on 1 May 1995.

Headquarters Appointments

Commanding Officer, Coast Guard:
Lieutenant Auden Nicholas

Personnel

2009: 50 (3 officers)

Bases

HQ: Deepwater Harbour, St Johns
Maintenance: Camp Blizzard

COAST GUARD

Notes: (1) In addition there is a Hurricane RIB, CG 081 with a speed of 35 kt and two Boston Whalers, CG 071-2, with speeds of 30 kt. All were acquired in 1988/90. (2) A 920 Zodiac RHIB, CG 091, was donated by the US government in 2003. It is capable of over 40 kt.

Guns: 1—7.62 mm MG
Radars: Surface search: Raytheon R40; I-band.

Comment: Funded by USA. Similar craft delivered to several Caribbean countries in 1994-98.

PALMETTO 9/2004, ABDFCG / 0587689

Argentina

ARMADA ARGENTINA

Country Overview

The Argentine Republic is in southern South America. With an area of 1,068,302 square miles it has borders to the north with Bolivia and Paraguay, to the east with Brazil and Uruguay and to the south and west with Chile. The country includes the Tierra del Fuego territory which comprises the eastern half of the Isla Grande de Tierra del Fuego and a number of adjacent islands to the east, including Isla de los Estados. It also claims sovereignty of the Falkland Islands. The capital, largest city and principal port is Buenos Aires. There are further ports at La Plata, Bahía Blanca, Comodoro Rivadavia and a river port at Rosario. There are some 5,940 n miles of navigable internal waterways. Territorial Seas (12 n miles) are claimed. An EEZ (200 n miles) is claimed but its limits are only partly defined by boundary agreements.

Headquarters Appointments

Chief of Naval General Staff:
 Admiral Jorge Omar Godoy
Deputy Chief of Naval Staff:
 Vice Admiral Benito Italo Rötolo
Director General Personnel:
 Vice Admiral Enrique Salvador Olmedo
Naval Operations Commander:
 Rear Admiral Luis Oscar Manino

Senior Appointments

Commander Fleet
 Rear Admiral Eduardo Raul Castro Rivas
Commander, Marine Infantry
 Rear Admiral Captain Osvaldo Emilio Colombo
Commander Naval Aviation:
 Rear Admiral Carlos Rodolfo Machotanz
Commander, Naval Area Austral
 Rear Admiral Daniel Alberto Enrique Martin
Commander, Submarines:
 Captain Gustavo Ricardo Grunschlager
Commander, Atlantic:
 Rear Admiral Delfor Raul Ferraris
Commander, Naval Area Fluvial:
 Captain Alejandro Arturo Fernandez Lóbbe

Personnel

2009: 18,249 (2,531 officers)

Organisation

Naval Area Austral covers coastal area from latitude 46° to 60 south.
 Naval Area Atlantic covers coastal area from latitude 36° 18' to 46° south.
 Naval Area Fluvial includes the rivers Paraná, Uruguay and Plata
 Naval Area Antarctica is activated when *Almirante Irizar* deploys.

Special Forces

Consists of tactical divers who operate from submarines and other naval units, and amphibious commandos who are trained in parachuting and behind the lines operations. Both groups consist of about 150.

Bases

Buenos Aires (Dársena Norte): Some naval training.
 Rio Santiago (La Plata): Schools.
 Mar del Plata: Submarine base plus Maritime Patrol Division and Hydrographic ships.
 Puerto Belgrano: Main naval base, schools. Fleet Marine Force.
 Ushuaia, Descado, Dársena Sur, Zárate, Caleta Paula; Small naval bases.

Prefix to Ships' Names

ARA (Armada Republica Argentina)

Naval Aviation

Personnel: 2,500
 The Naval Air Command is at Puerto Belgrano.
 1st Naval Air Wing (Punta Indio Naval Air Base): Naval Reconnaissance Group with Beech 200s. Naval Aviation School with Beech T-34 Turbo Mentor.
 2nd Naval Air Wing (Comandante Espora Naval Air Base): ASW Squadron with Grumman S-2T Trackers; 2nd Naval

Helicopter Squadron with Agusta/Sikorsky SH-3H and AS-61D Sea Kings; 2nd Naval Attack Squadron with Super Etendards; 1st Naval Helicopter Squadron with Alouette III and Fennecs.

3rd Naval Air Wing (Almirante Zar Naval Air Base, Trelew); 6th Naval Reconnaissance and Surveillance Squadron with Lockheed P-3C Orions, Beechcraft B 200 and Pilatus PC 6B.
 52 Logistic Support Flight (Almirante Izar Naval Air Base): Fokker F-28s.

Marine Corps

Personnel: 2,800
 2nd Marine Infantry Battalion (Puerto Belgrano)
 3rd Marine Infantry Battalion (Zarate)
 4th Marine Infantry Battalion (Ushuaia)
 5th Marine Infantry Battalion (Training) (Rio Grande)
 Marine Field Artillery Battalion (Puerto Belgrano)
 Command and Logistics Support Battalion (Puerto Belgrano)
 Amphibious Vehicles Battalion (Puerto Belgrano)
 Communications Battalion (Puerto Belgrano)
 Marine A/A Battalion (Puerto Belgrano)
 Amphibious Engineers Company (Puerto Belgrano)
 Amphibious Commandos Group (Puerto Belgrano)
 There are Marine Security Battalions at Naval Bases in Buenos Aires and Puerto Belgrano.
 There are Marine Security Companies at Naval Bases in Mar del Plata, Trelew, Ushuaia, Punta Indio and Zarate

SUBMARINES

Notes: (1) Cosmos and Havas underwater chariots in service. Cosmos types are capable of carrying limpet or ground mines.
(2) There are no known plans to replace the current submarine force.

2 SANTA CRUZ (TR 1700) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
SANTA CRUZ	S 41	Thyssen Nordseewerke	6 Dec 1980	28 Sep 1982	18 Oct 1984
SAN JUAN	S 42	Thyssen Nordseewerke	18 Mar 1982	20 June 1983	19 Nov 1985

Displacement, tons: 2,116 surfaced; 2,264 dived
Dimensions, feet (metres): 216.5 × 23.9 × 21.3
(66 × 7.3 × 6.5)

Main machinery: Diesel-electric; 4 MTU 16V 6,720 hp diesels; 6,720 hp(m) (4.94 MW) sustained; 4 alternators; 4.4 MW; 1 Siemens Type 1HR4525 + 1HR 4525 4-circuit DC motor; 6.6 MW; 1 shaft

Speed, knots: 15 surfaced; 12 snorking; 26 dived

Range, n miles: 12,000 at 8 kt surfaced; 20 at 25 kt dived; 460 at 6 kt dived

Complement: 29 (5 officers)

Torpedoes: 6—21 in (533 mm) bow tubes. 22 AEG SST 4; wire-guided; active/passive homing to 12/28 km (6.5/15 n miles) at 35/23 kt; warhead 260 kg; automatic reload in 50 seconds or US Mk 37; wire-guided; active/passive homing to 8 km (4.4 n miles) at 24 kt; warhead 150 kg. Swim-out discharge. Mk 48 to replace Mk 37 in due course

Mines: Capable of carrying 34 ground mines.

Countersmeasures: ESM. Kollmorgen Sea Sentry III; radar warning.

Weapons control: Signaal Simbads; can handle 5 targets and 3 torpedoes simultaneously

Radars: Navigation. Thomson-CSF Calypso IV; I-band.

Sonars: Atlas Elektronik CSU 3/4; active/passive search and attack; medium frequency

Thomson Sintra DUUX 5, passive ranging

Programmes: Contract signed 30 November 1977 with Thyssen Nordseewerke for two submarines to be built at Emden. Parts and technical oversight were also to be provided for the construction of four further boats in Argentina by Astilleros Domocoq Garcia, Buenos Aires. Work on units three and four was initiated and S 43 (*Santa Fe*) was reported as 70 per cent complete by 2004. However, although completion of the boat is being

kept under review, funding is likely to prove difficult in the current financial climate. Work on S 44 (*Santiago del Estero*) was reported as 30 per cent complete in 1996 but further work since then has not been reported. Equipment for numbers five and six has been used for spares.

Modernisation: Both completed refits between 1999–2002. Refit included new main motors and sonar upgrade. *Santa Cruz* underwent a two-year mid-life refit at Domocoq Garcia 2005–07. She was followed by *San Juan* on 17 August 2007 and is expected to be completed in 2010. The scope of the upgrade is reported to include new MTU engines, new batteries and replacement of masts

Structure: Diving depth, 270 m (890 ft).

Operational: Maximum endurance is 70 days. Both can be used for Commando insertion operations. They are based at Mar del Plata.

SANTA CRUZ

SAN JUAN

5/2004, A E Galarce / 1044065

1 SALTA (TYPE 209/1200) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
SALTA	S 31	Howaldtswerke, Kiel	30 Apr 1970	9 Nov 1972	7 Mar 1974
Displacement, tons: 1,140 surfaced, 1,248 dived		wire-guided; active/passive homing to 8 km (4.4 n miles) at 24 kt; warhead 160 kg Swim-out discharge.		design of Ingenieurkontor, Lübeck. Sections were shipped to Argentina for assembly at Tandano, Buenos Aires. Second of class (<i>San Luis</i>) has been used for spares since 1997 and, although re-activation remains a possibility, is likely to be converted into a museum ship.	
Dimensions, feet (metres): 193.4 x 20.5 x 17.9 (59.9 x 6.3 x 5.5)		Mines: Capable of carrying ground mines.		Modernisation. <i>Salta</i> completed a mid-life modernisation at the Domecq Garcia Shipyard in May 1995. New engines, weapons and electrical systems fitted. Installation of new batteries began at Domecq Garcia in 2004 and completed in August 2005.	
Main machinery: Diesel-electric; 4 MTU 12V 493 AZ80 diesels; 2,400 hp(m) (1.76 MW) sustained; 4 alternators; 1.7 MW; 1 motor; 4,600 hp(m) (3.36 MW), 1 shaft		Countermeasures: ESM: Thomson CSF DR 2000; radar warning.		Structure: Diving depth, 250 m (820 ft); Operational. Operational and based at Mar del Plata.	
Speed, knots: 10 surfaced; 22 dived; 11 snorting		Weapons control: Signaal M8 digital, computer-based; up to 3 targets engaged simultaneously.			
Range, n miles: 6,000 at 8 kt surfaced; 230 at 8 kt; 400 at 4 kt dived		Radars: Navigation: Thomson-CSF Calypso II.			
Complement: 31 (6 officers)		Sonars: Atlas Elektronik CSU 3 (AN 526/AN 5039/41), active/passive search and attack; medium frequency. Thomson Sintra DUUX 2C and DUUG 1D; passive ranging.			
Torpedoes: 8—21 in (533 mm) bow tubes. 14 AEG SST 4 Mod 1; wire-guided; active/passive homing to 12/28 km (6.5/15 n miles) at 35/23 kt; warhead 260 kg or US Mk 37;		Programmes: Ordered in 1968. Built in sections by Howaldtswerke Deutsche Werft AG, Kiel from the IK 68

Displacement, tons: 2,900 standard; 3,630 full load
Dimensions, feet (metres): 413.1 x 46 x 19 (screws) (125.9 x 14 x 5.8)
Main machinery: COGOG; 2 RR Olympus TM3B gas turbines; 50,000 hp (37.4 MW) sustained
 2 RR Tyne RM1C gas turbines; 9,900 hp (7.4 MW) sustained; 2 shafts; cp props
Speed, knots: 30; 20.5 cruising
Range, n miles: 4,500 at 18 kt
Complement: 200 (26 officers)

ALMIRANTE BROWN

(Scale 1 : 1,200), Ian Sturton / 0669252

Missiles: SSM: 8 Aerospatiale MM 40 Exocet (2 quad) launchers; inertial cruise; active radar homing to 70 km (40 n miles); warhead 165 kg; sea-skimmer
SAM: Selenia/Elsag Albatros octuple launcher; 24 Aspide; semi-active homing to 13 km (7 n miles) at 2.5 Mach; height envelope 15–5,000 m (49.2–16,405 ft), warhead 30 kg.
Guns: 1 OTO Melara 5 in (127 mm)/54 automatic; 45 rds/min to 23 km (12.42 n miles) anti-surface; 7 km (3.6 n miles) anti-aircraft; weight of shell 0.98 kg; 2 Oerlikon 20 mm.
Torpedoes: 6—324 mm ILAS 3 (2 triple) tubes; Whitehead A 244; anti-submarine; active/passive homing to 7 km (3.8 n miles) at 33 kt; warhead 34 kg (shaped charge); 18 reloads.
Countermeasures: Decoys: CSEE Dagaite double mounting; Graseby G1738 towed torpedo decoy system.

2 Breda 105 mm SCLAR chaff rocket launchers; 20 tubes per launcher; can be trained and elevated, chaff to 5 km (2.7 n miles); illuminants to 12 km (6.6 n miles).
ESM/ECM: Sphinx/Scimitar.
Combat data systems: Signaal SEWACO; Link 10/11. SATCOMs can be fitted
Electro-optic systems: 2 Signaal LIROD radar/optronic systems; each controlling 2 twin 40 mm mounts.
Radars: Air/surface search: Signaal DA08A; F-band; range 204 km (110 n miles) for 2 m² target.
Surface search: Signaal ZW06; I-band.
Navigation: Decca 1226, I-band
Fire control: Signaal STIR; I/J/K-band; range 140 km (76 n miles); Signaal WM25; I/J-band.
Sonars: Atlas Elektronik B0 (DSQS-21BZ), hull-mounted; active search and attack; medium frequency.

Helicopters: AS 555 Fennec or SH-3D Sea King (D 11, D 13)
Programmes: Six were originally ordered in 1978, but later restricted to four when Meko 140 frigates were ordered in 1979. Similar to Nigerian frigate *Aradu*
Modernisation: Block II Exocet MM 40 may be fitted when funds are available. *La Argentina* completed 2 year refit in 2006. Upgrades included extension of the flight deck to facilitate Sea King operations. *Sarandi* is undergoing a similar refit during 2008–10. *Heroina* completed refit in 2008 but did not receive the flight deck extension.
Operational: *Almirante Brown* took part in allied Gulf operations in late 1980. Fennec helicopters delivered in 1996 provide over the horizon targeting for SSMs and have the potential to improve ASW capability. All are active and form 2nd Destroyer Squadron based at Puerto Belgrano. All can be used as Flagships.

Combat data systems: MINIACO C 31

Weapons control: Thomson-CSF Vega system, CSEE Panda
 Mk 2 optical director; Naja optronic director (for 40 mm
 guns).

Radars: Air/surface search Thomson-CSF DRBV 51A with
 UPX12 IFF; G-band.

Navigation Decca 1226; I-band.

Fire control Thomson-CSF DRBC 32E; I/J-band (for
 100 mm gun).

Sonars: Thomson Sintra Diodon; hull-mounted; active
 search and attack

Programmes: The first pair was originally built for the
 French Navy and sold to the South African Navy in 1976

while under construction. As a result of a UN embargo
 on arms sales to South Africa this sale was cancelled.
 Purchased by Argentina in Autumn 1978. Both arrived
 in Argentina 2 November 1978 (third ship being ordered
 shortly afterwards) and all have proved very popular
 ships in the Argentine Navy. The transfer of a further
 three of the class from the French Navy is very unlikely.

Modernisation: Drummond has had her armament updated
 to the same standard as the other two, replacing the
 Bofors 40/60. All three ships fitted with MINIACO C 31
 combat data system by 2008.

Operational: Endurance, 15 days. Very economical in fuel
 consumption. Employed on EEZ patrol operations. All
 based at Mar del Plata.

GRANVILLE

12/2002, A E Galarce / 0529818

DRUMMOND

5/2004, A E Galarce / 1044066

6 ESPORA (MEKO 140 A16) CLASS (FFGH)

Name	No	Builders	Laid down	Launched	Commissioned
ESPORA	41	AFNE, Rio Santiago	3 Oct 1980	23 Jan 1982	5 July 1985
ROSALES	42	AFNE, Rio Santiago	1 July 1981	4 Mar 1983	14 Nov 1986
SPIRO	43	AFNE, Rio Santiago	4 Jan 1982	24 June 1983	24 Nov 1987
PARKER	44	AFNE, Rio Santiago	2 Aug 1982	31 Mar 1984	17 Apr 1989
ROBINSON	45	AFNE, Rio Santiago	8 June 1983	15 Feb 1985	28 Aug 2000
GOMEZ ROCA	46	AFNE, Rio Santiago	1 Dec 1983	14 Nov 1986	20 May 2004

Displacement, tons: 1,470 standard; 1,850 full load

Dimensions, feet (metres): 299.1 x 36.4 x 11.2
(97.2 x 11.1 x 3.4)

Main machinery: 2 SEMT-Pielstick 16 PC2 5 V 400 diesels;
20,400 hpm (15 MW) sustained, 2 shafts

Speed, knots: 28

Range, n miles: 4,000 at 18 kt

Complement: 93 (11 officers)

Missiles: SSM: 4 Aerospatiale MM 38 Exocet ● inertial cruise; active radar homing to 42 km (23 n miles); warhead 165 kg; sea-skimmer.

Guns: 1 OTO Melara 3 in (76 mm)/62 compact ●, 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg; also fires chaff and illuminants.

4 Breda 40 mm/70 (2 twin) ●, 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg; ready ammunition 736 (or 444) using AP tracer, impact or proximity fuzing. 2—12.7 mm MGs.

Torpedoes: 6 324 mm ILAS 3 (2 triple) tubes ● Whitehead A 244/S; anti submarine; active/passive homing to 7 km (3.8 n miles); at 33 kt, warhead 34 kg (shaped charge).

Countermeasures: Decoys: CSEE Dagare double mounting; 10 or 6 replaceable containers, trainable; chaff to 12 km (6.5 n miles); illuminants to 4 km (2.2 n miles); decoys in H- to J-bands

ESM: Elettronica RQN-3B; radar warning.

ECM: Elettronica TON-2X, jammer

Combat data systems: Signaal SEWACO

Electro-optic systems: 1 LIROD 8 optronic director ●

Radars: Air/surface search: Signaal DA05 ●, E/F-band;

range 137 km (75 n miles) for 2 m² target

Navigation: Decca TM 1226 (41–45); I-band

Concilium Celestar (46), I-band.

Fire control: Signaal WM28 ●, I/J-band; range 46 km

(26 n miles).

Signaal WM 22/41; I/J-band.

IFF Mk 10.

Sonars: Atlas Elektronik ASO 4; hull-mounted; active search and attack; medium frequency.

Helicopters: 1 SA 319B Alouette III or AS 555 Fennec ● (in 44–46).

Programmes: A contract was signed with Blohm + Voss on 1 August 1979 for this group of ships which are scaled down Meko 360s. All have been fabricated in AFNE, Rio Santiago. The last pair were to have been scrapped, but on 8 May 1997 a decision was taken to complete them some 14 years after each was first launched. A formal restart ceremony was held on 18 July 1997 and *Robinson* became operational in 2001. *Gomez Roca* became operational in late 2005.

Modernisation: Plans to fit MM 40 Exocet from Meko 360. Flight deck extensions for AS 555 helicopters. *Robinson* and *Gomez Roca* equipped with different EW suite.

Structure: The last three ships were fitted on build with a telescopic hangar. The first three ships may be retrofitted at a later date.

Operational: Mostly used for offshore patrol and fishery protection duties but *Spiro* and *Rosales* sent to the Gulf in 1990–91. Form 2nd Frigate Squadron based at Puerto Belgrano.

SHIPBORNE AIRCRAFT

Numbers/Type: 5 Aerospatiale SA 316B Alouette III
Operational speed: 113 kt (210 km/h)
Service ceiling: 10,500 ft (3,200 m)
Range: 290 n miles (540 km)

Role/Weapon systems: ASW Helicopter; used for liaison in peacetime; wartime role includes commando assault and ASW/ASVW. Sensors: Nose-mounted search radar
Weapons: ASW; 2 x Mk 44 torpedoes; ASV; 2 x AS12 missiles

ALOUETTE III 5/2008, Guy Toremans / 1335606

Numbers/Type: 4 Aerospatiale AS 555 SN Fenec
Operational speed: 121 kt (225 km/h)
Service ceiling: 13,125 ft (4,000 m)
Range: 389 n miles (722 km)

Role/Weapon systems: Principal role OTH with potential ASW capability. Delivered in 1996. More are wanted. Sensors: Bendix RDR 1500 radar; Mk 3 MAD. Weapons: ASW; 2 x A 244 torpedoes or 4 depth bombs may be fitted.

FENEC 7/2004, A E Galarca / 1094071

Numbers/Type: 2/1/4 Agusta-Sikorsky ASH-3H/ASH-3D/UH-3D Sea King
Operational speed: 120 kt (222 km/h)
Service ceiling: 12,205 ft (3,720 m)
Range: 630 n miles (1,165 km)

Role/Weapon systems: Seven aircraft: Two ASH-3H armed with Exocet AM-39; one ASH 3D ASW aircraft and four UH-3D utility/transport aircraft acquired from the US Navy in 2008. The latter for Antarctic operations and to replace UH-1H aircraft. Sensors (ASH variants): APS-705 search radar, Bendix AQS 18 sonar. Weapons: up to 4 x A 244 torpedoes or 4 x depth bombs. ASV: 1 AM 39 Exocet ASM (ASH-3H).

SEA KING 8/2002, A E Galarca / 0529876

Numbers/Type: 5 + (6) Dassault Breguet Super Etendard.
Operational speed: Mach 1.
Service ceiling: 44,950 ft (13,700 m)
Range: 920 n miles (1,700 km)

Role/Weapon systems: Strike Fighter with anti-shipping ability. In the past have flown from US or Brazilian aircraft carriers. Five aircraft are operational out of a total of 11. Five replacement Agave radars reportedly received in 2008. This may increase operational availability to eight or nine aircraft. Strike, air defence and ASV roles. Hi-lo-hi combat radius 460 n miles (850 km). Sensors: Thomson-CSF Agave multimode radar, ECM. Weapons: Strike; 2.1 tons of 'iron' bombs ASVW; 1 AM 39 Exocet or 1 x Martin Poscador missiles. Self-defence; 2 x Magic AAMs. Standard; 2 x 30 mm cannon.

SUPER ETENDARD 10/2007, Argentine Navy / 1335605

Numbers/Type: 5 Grumman S-2ET Tracker.
Operational speed: 130 kt (241 km/h)
Service ceiling: 25,000 ft (7,620 m)
Range: 1,350 n miles (2,500 km)

Role/Weapon systems: Used for MR and EEZ patrol. One shipped to Israel in 1989 for Garrett turboprop installation. Prototype for fleet conversion in Argentina when completed in 2000. Sensors: EL/M-2022 search radar up to 32 sonobuoys, AID-28 or AES 210/E ESM, echo-ranging depth charges Weapons: ASW; A 244 torpedoes, bombs and depth charges.

S-2 TRACKER (landing on São Paulo) 5/2002, Walter Lastra/Fuerzas Navales / 0528930

Numbers/Type: 7 Aermacchi MB-326GB.
Operational speed: 468 kt (867 km/h)
Service ceiling: 47,000 ft (14,325 m)
Range: 1,320 n miles (2,448 km)

Role/Weapon systems: Light Attack; supplements anti-shipping/strike; also has training role. Weapons: ASV; 1.8 tons of 'iron' bombs. Strike; 6 x rockets. Recce; undergoing camera pod.

AERMACCHI 326 4/2004 / 0051048

Numbers/Type: 4 Beechcraft B 200M Cormoran.
Operational speed: 260 kt (482 km/h)
Service ceiling: 31,000 ft (9,448 m)
Range: 2,000 n miles (3,705 km)

Role/Weapon systems: Multipurpose converted to Cormoran version for maritime patrol. There are three other unconverted aircraft. Sensors: Search radar. Weapons: Unarmed.

BEECH CORMORAN 5/2004 / 0570789

LAND-BASED MARITIME AIRCRAFT

Notes: (1) In addition there are three Fokker F28 for Logistic Support; one Pilatus PC-6B for reconnaissance and nine Beech T-34 Turbo Mentor training aircraft. The four Lockheed Electra L-188 are no longer in service
 (2) Thirty-six ex-US Navy A4M Skyhawk with radar APG-66 acquired by the Air Force by July 1998. First 18 delivered in crates in 1995-96 and remainder modernised before delivery in 1997-98
 (3) Acquisition of second-hand Mirage 2000 aircraft is reported to be under consideration.
 (4) There are plans to acquire at least six LMAASA AT-63 Pampa training/light attack aircraft to replace the MB-326 fleet

Numbers/Type: 6 Lockheed P-3B Orion.
Operational speed: 410 kt (760 km/h)
Service ceiling: 28,300 ft (8,625 m).
Range: 4,000 m (7,410 km).

Role/Weapon systems: Two acquired in 1997 from US; four more in 1998, and two for spares in 1999. Sensors: APS-115 radar; ESM. Weapons: Three aircraft modified by 2007 under Gran Explorador programme. Upgrades are likely to have included restoration of ASW capabilities, addition of AM-39 Exocet and radar modifications. FLIR may also be added. A fourth aircraft is to be modified in 2009.

ORION 6/2002, Argentine Navy / 0528429

PATROL FORCES

0 + 5 OFFSHORE PATROL VESSELS (PSO)

Displacement, tons: 1,850 full load
Dimensions, feet (metres): 262.5 x 42.6 x 12.5 (80.0 x 13.0 x 3.8)
Main machinery: 2 Wärtsilä 12V26 diesels; 10,950 hp (8.2 MW); 2 shafts; LIPS cp props; 2 bow thrusters
Speed, knots: 21
Range, n miles: 8,600 at 12 kt
Complement: 30 + 30 passengers
Guns: 1—40 mm
Radars: Surface search. To be announced
Navigation: To be announced.
Fire control: To be announced.
Helicopters: Platform for one medium.

Programmes: Project POM (Patrullero Oceánico Multipropósito) is for five offshore patrol vessels. The ships are expected to be to a Fassmer design and generally similar to ships procured under the Chilean Danubio IV programme. Approval for the project was given in mid-2007 and construction is expected to start at Astillero Rio Santiago Shipyard in February 2009. The first ship is to be delivered in 2010 and subsequent units are to follow at about six month intervals.

Structure: Steel construction. The design includes stealth features. Upper-deck layout features a helicopter launching platform, crane, two 7 m RIBs, container storage and a special rescue zone.

OPV 6/2005, Fassmer GmbH / 1118061

3 CHEROKEE CLASS (PATROL SHIPS) (PSO)

Name	No	Builders	Commissioned
COMANDANTE GENERAL IRIGOYEN (ex-Cahuilla)	A 1	Charleston SB and DD Co	10 Mar 1945
FRANCISCO DE GURRUCHAGA (ex-Luisena ATF 156)	A 3	Charleston SB and DD Co	16 June 1945
SUBOFICIAL CASTILLO (ex-Takolma ATF 113)	A 6	United Engineering Co, Alameda	3 Aug 1944

Displacement, tons: 1,235 standard; 1,731 full load
Dimensions, feet (metres): 205 x 38.5 x 17 (62.5 x 11.7 x 5.2)
Main machinery: Diesel-electric, 4 GM 12-278 diesels; 4,400 hp (3.28 MW); 4 generators; 1 motor; 3,000 hp (2.24 MW); 1 shaft
Speed, knots: 16
Range, n miles: 6,500 at 15 kt; 15,000 at 8 kt
Complement: 85
Guns: 4 Bofors 40 mm/60 (2 twin) (A 1); 2 Bofors 40 mm/60 (A 3); 1 Bofors 40 mm/60 (A 6); 2 Oerlikon 20 mm/70 (A 1); 4 Oerlikon 20 mm (A 3, A 6); 2—12.7 mm MGs (A 6).
Radars: Surface search: Racal Decca 626; I-band.
Navigation: Racal Decca 1230; I-band

Comment: Fitted with powerful pumps and other salvage equipment. *Comandante General Irigoyen* transferred by the US at San Diego, California, on 9 July 1961. Classified as a tug until 1966 when she was re-rated as patrol ship. *Francisco De Gurruchaga* transferred on 24 July 1975 by sale. *Suboficial Castillo* on 30 September 1993 by grant aid. *Gurruchaga* fitted with two new diesel engines in 2008. The ships appear to be fitted for but not with armament. All operational and based at Mar del Plata.

SUBOFICIAL CASTILLO 11/2007, A E Galarce / 1335601

1 OLIVIERI CLASS (PATROL SHIP) (PBO)

Name	No	Builders	Commissioned
TENIENTE OLIVIERI (ex-Marsoa 10)	A 2	Quality SB, Louisiana	1981

Displacement, tons: 1,640 full load
Dimensions, feet (metres): 184.8 x 40 x 14 (56.3 x 12.2 x 4.3)
Main machinery: 2 GM/EMD 16-645 E6; 3,230 hp (2.4 MW) sustained, 2 shafts, bow thruster
Speed, knots: 14
Range, n miles: 2,800 at 10 kt
Complement: 15 (4 officers)
Guns: 2—12.7 mm MGs.

Comment: Built by Quality Shipyards, New Orleans, as an oilfield support ship but rated as an Aviso. Acquired from US Maritime Administration 15 November 1987. Capable of carrying 600 tons of stores and 800 tons of liquids. Based at Puerto Belgrano.

TENIENTE OLIVIERI 3/2000 0104168

1 SOTOYOMO CLASS (PATROL SHIP) (PBO)

Name	No	Builders	Commissioned
ALFEREZ SOBRAL (ex-Salish ATA 187)	A 9	Levingstone, Orange	9 Sep 1944

Displacement, tons: 800 full load
Dimensions, feet (metres): 143 x 33.9 x 13 (43.6 x 10.3 x 4)
Main machinery: Diesel-electric; 2 GM 12-278A diesels; 2,200 hp (1.64 MW); 2 generators; 1 motor; 1,500 hp (1.12 MW); 1 shaft
Speed, knots: 12.5
Range, n miles: 16,500 at 8 kt
Complement: 49
Guns: 1 Bofors 40 mm/60. 2 Oerlikon 20 mm.
Radars: Surface search, Decca 1226, I-band

Comment: Former US ocean tug transferred on 10 February 1972. Paid off in 1987 but back in service by 1996. Armament has been reduced.

ALFEREZ SOBRAL 2/2001, Eric Grove / 1127024

18 Argentina/Patrol forces—Amphibious forces

2 INTREPIDA CLASS (TYPE TNC 45) (FAST ATTACK CRAFT—GUN/MISSILE) (PGGF)

Name	No	Builders	Launched	Commissioned
INTREPIDA	P 85	Lürssen, Bremen	2 Dec 1973	20 July 1974
INDOMITA	P 88	Lürssen, Bremen	8 Apr 1974	12 Dec 1974

Displacement, tons: 268 full load
Dimensions, feet (metres), 147.3 × 24.3 × 7.9 (44.9 × 7.4 × 2.4)
Main machinery: 4 MTU MD 16V 538 TR90 diesels; 12,000 hp (in) (8.82 MW); 4 shafts
Speed, knots: 25
Range, n miles: 1,450 at 20 kt
Complement: 39 (5 officers)
Missiles: SSM: 2 Aerospatiale Exocet MM 38 (*Intrepida*); active radar homing to 42 km (23 n miles); warhead 185 kg
Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (9 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg
 1 or 2 Bofors 40 mm/70; 330 rds/min to 12 km (6.5 n miles) anti-surface; 4 km (2.2 n miles) anti-aircraft; weight of shell 0.89 kg
 2—12.7 mm MGs
 2 Oerlikon 81 mm rocket launchers for illuminants
Torpedoes: 2—21 in (533 mm) launchers. AEG SST-4; wire-guided; active/passive homing to 28 km (15 n miles) at 23 kt; warhead 750 kg
Countermeasures: ESM: Racal RDL 1; radar warning.
Weapons control: Signal WM22 optronic for guns/missiles. Signal M11 for torpedo guidance and control.
Radars: Surface search: Decca 626; I-band

Comment: These two vessels were ordered in 1970. Both are painted with a brown/green camouflage. Camouflage netting can also be fitted. Exocet SSM fitted vice the forward of the two Bofors guns in *Intrepida* in 1998. *Indomita* started refit at Domeq Garcia shipyard in January 2008. Upgrades are expected to include new diesel engines, modification of WM22, to include FLIR and laser rangefinder, replacement of surface search radar and unspecified changes to armament. *Intrepida* is likely to start a similar refit in 2009.

INTREPIDA 6/2001, Argentine Navy / 11 40/35

INTREPIDA (with camouflage netting) 3/2001 / 0126381

BARADERO CLASS 12/2000, Eric Grove / 1044073

2 POINT CLASS (PB)

Name	No	Builders	Commissioned
PUNTA MOGOTES (ex-Point Hobart)	P 65 (ex-82377)	J Martinac, Tacoma	13 July 1970
RIO SANTIAGO (ex-Point Carrew)	P 66 (ex-82374)	USCG Yard, Curtis Bay	18 May 1970

Displacement, tons: 67 full load
Dimensions, feet (metres): 83 × 17.2 × 15.8 (25.3 × 5.2 × 1.8)
Main machinery: 2 Caterpillar diesels; 1,600 hp (1.19 MW); 2 shafts
Speed, knots: 22
Range, n miles: 1,200 at 8 kt
Complement: 10
Guns: 2—12.7 mm MGs.
Radars: Surface search: Raytheon SPS 64; I-band.

Comment: *Punta Mogotes* transferred from US Coast Guard on 8 July 1999 and is based at Mar del Plata. *Rio Santiago* transferred 22 August 2000.

RIO SANTIAGO 4/2007, A E Galarce / 1167920

AMPHIBIOUS FORCES

Notes: (1) Marine Corps acquired two Guardian craft in October 1999 and two more in February 2000. Powered by twin 150 hp Johnson outboards. Carry 1—12.7 mm MG and 4 7.62 mm MGs, Raytheon radar
 (2) The first two of a new class of eight indigenously built LCVPs entered service in 2007. Their names are reported to be *Corbeta Uruguay* and *Rompehielos General San Martin*.
 (3) The acquisition of a multirole ship, possibly in co-operation with Brazil is under consideration. The design (possibly LPD) would probably be tailored to both military and humanitarian roles.

GUARDIAN 35 5/2004, A E Galarce / 1044075

4 BARADERO (DABUR) CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
BARADERO	P 61	Israel Aircraft Industries	1978
BARRANQUERAS	P 62	Israel Aircraft Industries	1978
CLORINDA	P 63	Israel Aircraft Industries	1978
CONCEPCIÓN DEL URUGUAY	P 64	Israel Aircraft Industries	1978

Displacement, tons: 33.7 standard; 39 full load
Dimensions, feet (metres), 64.9 × 18 × 5.8 (19.8 × 5.5 × 1.8)
Main machinery: 2 GM 12V-71TA diesels, 840 hp (627 kW) sustained; 2 shafts
Speed, knots: 19
Range, n miles: 450 at 13 kt
Complement: 9
Guns: 2 Oerlikon 20 mm 4—12.7 mm MGs.
Depth charges: 2 portable rails.
Radars: Navigation, I-band.

Comment: Of all-aluminium construction. Employed in 1991 and 1992 as part of the UN Central American peacekeeping force. Based at Ushuaia.

1 HERCULES (TYPE 42) CLASS (LCC)

Name	No	Builders	Laid down	Launched	Commissioned
HERCULES	B 52 (ex-D 1, ex-28)	Vickers, Barrow	16 June 1971	24 Oct 1972	12 July 1976

Displacement, tons: 3,150 standard; 4,100 full load
Dimensions, feet (metres): 412 × 47 × 19 (screws)
 (125.6 × 14.3 × 5.8)
Flight deck, feet (metres): 85.3 × 42.66 (26 × 13)
Main machinery: COGOG; 2 RR Olympus TM3B gas turbines; 50,000 hp (37.3 MW) sustained
 2 RR Tyne RM1A gas-turbines; 9,900 hp (7.4 MW) sustained; 2 shafts; cp props
Speed, knots: 29, 18 (Tynes) **Range, n miles:** 4,000 at 18 kt
Complement: 180 plus (238 marines)

HERCULES

(Scale 1 : 1,200), Ian Sturton / Os/RAD

Missiles: SAM: British Aerospace Sea Dart Mk 30 twin launcher ●; semi-active radar homing to 40 km (21.5 n miles) at 2 Mach; height envelope 100–18,300 m (328–60,042 ft); 22 missiles; limited anti-ship capability
Guns: 1 Vickers 4.5 in (115 mm)/55 Mk 8 automatic ●; 25 rds/min to 22 km (12 n miles); weight of shell 21 kg; also fires chaff and illuminants
 2 Oerlikon 20 mm Mk 7 ●, 4–12.7 mm MGs
Countermeasures: Decoys: Graseby towed torpedo decoy. Knebworth Corvus 8-tubed trainable launchers for chaff
ESM: Racal RDL 257; radar intercept
ECM: Racal RCM 2; jammer
Combat data systems: Plessey-Ferranti ADAWS-4; Link 10
Radars: Air search: Marconi Type 965P with double AKE2 array and 1010/1011 IFF ●, A-band
 Surface search: Marconi Type 992Q ●, E/F-band
Navigation, HDWS and helicopter control: Kelvin Hughes Type 1008; I-band
Fire control: Marconi Type 909 ●; I/J-band (for Sea Dart missile control)
Sonars: Graseby Type 184M; hull-mounted; active search and attack; medium frequency 6–9 kHz
 Kelvin Hughes Type 162M classification set; sideways looking; active; high frequency

Helicopters: 2 Sea King ●.

Programmes: Contract signed 18 May 1970 between the Argentine government and Vickers Ltd

HERCULES

6/2001, Argentine Navy / 0130745

Modernisation: Combat Data System has been improved with local modifications. Refitted in Chile from November 1999 to July 2000 to make flight deck and hanger Sea King capable. Further modifications included removal of MM38 launchers to be replaced by assault boats and, in a refit which began in 2008, the Sea Dart launcher is likely to be removed and the missile magazine adapted to accommodate a company of marines. The

Type 965 radar is to be replaced by LW-08 (ex-25 de Mayo). The second of class, *Santísima Trinidad*, has been decommissioned and is to be converted into a museum

Operational: Based at Puerto Belgrano Seadart SAM and Type 909 fire-control radar are probably non-operational. Officially described as an Amphibious command and control ship

16 LCVPS

EDVP 30-37	+8
------------	----

Displacement, tons: 13 full load
Dimensions, feet (metres): 35.8 × 10.5 × 3.4 (10.9 × 3.2 × 1.1)
Main machinery: 1 Gray 64 HNS diesel; 165 hp (123 kW) sustained; 1 shaft
Speed, knots: 9. **Range, n miles:** 110 at 9 kt
Military lift: 3.5 tons
Guns: 2–12.7 mm MGs.

Comment: Details are for the eight LCVPS acquired from the US in 1970. There is a smaller variant built locally since 1971

LCVP 1 and 4

9/2007, A E Galarza / 1167921

SURVEY AND RESEARCH SHIPS

Notes: (1) There are also two Fisheries Research Ships employed by the government. These are *Oca Balda* and *Eduardo Heimberg*.
 (2) Two 10 m hydrographic launches, *Monte Blanco* and *Kuaichink* entered service in 2004.

1 RESEARCH SHIP (AGOR)

Name	No	Builders	Commissioned
COMODORO RIVADAVIA	Q 11	Mestrina, Tigre	6 Dec 1974

Displacement, tons: 820 full load
Dimensions, feet (metres): 171.2 × 28.9 × 9.5 (52.2 × 8.8 × 2.9)
Main machinery: 2 Stork Werkspoor RHO-218K diesels; 1,160 hp(m) (853 kW); 2 shafts, cp props
Speed, knots: 12. **Range, n miles:** 6,000 at 12 kt
Complement: 34 (8 officers)

Comment: Laid down on 17 July 1971 and launched on 2 December 1972. Used for research. To be re-engined in 2009

COMODORO RIVADAVIA

3/2001 / 0126380

1 SURVEY SHIP (AGOB)

Name	No	Builders	Commissioned
PUERTO DESEADO	Q 20 (ex-Q 8)	Astarsa, San Fernando	26 Feb 1979

Displacement, tons: 2,133 standard, 2,400 full load
Dimensions, feet (metres): 251.9 × 51.8 × 21.3 (76.8 × 15.8 × 6.5)
Main machinery: 2 MAN 9L20/27 diesels; 2,450 hp (1.8 MW); 2 shafts
Speed, knots: 14. **Range, n miles:** 12,000 at 12 kt
Complement: 61 (12 officers) plus 20 scientists
Radars: Navigation: Decca 1629; I-band.

Comment: Laid down on 17 March 1976 for Consejo Nacional de Investigaciones Técnicas y Científicas. Launched on 4 December 1976. For survey work fitted with four Hewlett-Packard 2108-A, gravimeter, magnetometer, seismic systems, high-frequency sonar, geological laboratory. Omega and NAVSAT equipped. Painted with an orange hull in late 1986 for Antarctic deployments.

PUERTO DESEADO

11/2004, A E Galarza / 1151098

1 SURVEY CRAFT (AGSC)

Name	No	Builders	Commissioned
CORMORAN	Q 15	AFNE, Rio Santiago	20 Feb 1964

Displacement, tons: 102 full load
Dimensions, feet (metres): 83 × 18.4 × 5.9 (25.3 × 5 × 1.8)
Main machinery: 2 GM 6-71 diesels, 440 hp(m) (323 kW); 2 shafts
Speed, knots: 11
Complement: 19 (3 officers)
Radars: Navigation: Decca TM1226; I-band.

Comment: Launched 10 August 1963. Classified as a coastal launch

CORMORAN

5/2003, A E Galarza / 0572406

TRAINING SHIPS

Notes: (1) There are also three small yachts: *Itati* (Q 73), *Fortuna I* (Q 74) and *Fortuna II* (Q 75) plus a 25 ton yawl *Tijuca* acquired in 1993. *Fortuna III* was commissioned in 2004. A further yacht, *Irene* was acquired in 2005.

(2) Construction of a new sail-training vessel *Santa María de los Buenos Aires* was started at Domccq García (renamed CINAR) on 15 October 2008. The ship is to be completed in 2010 although it is not clear whether the vessel is to be civilian or naval operated.

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Commissioned
LIBERTAD	Q 2	AFNE, Rio Santiago	28 May 1963

Displacement, tons: 3,025 standard, 3,765 full load
Dimensions, feet (metres): 262 wl; 301 oa x 45.3 x 21.8 (79.9; 91.7 x 13.8 x 6.6)
Main machinery: 2 Sulzer diesels; 2,400 hp(m) (1.76 MW); 2 shafts
Speed, knots: 13.5 under power
Range, n miles: 12,000 at 8 kt
Complement: 200 crew plus 150 cadets
Guns: 4 Hotchkiss 47 mm saluting guns.
Radars: Navigation: Decca; I-band.

Comment: Launched 30 May 1956. She set record for crossing the North Atlantic under sail in 1966. Sail area, 26,835 m². Based at Puerto Belgrano. Mid-life refit at Rio Santiago Shipyard completed in 2006. The refit is reported to have included new engines.

LIBERTAD 9/2008, Chris Sattler / 1335804

2 KING CLASS (AX)

Name	No	Builders	Launched	Commissioned
MURATURE	P 20	Base Nav Rio Santiago	5 July 1943	12 Apr 1945
KING	P 21	Base Nav Rio Santiago	2 Nov 1943	28 July 1946

Displacement, tons: 913 standard; 1,000 normal; 1,032 full load
Dimensions, feet (metres): 252.7 x 29.5 x 13.1 (77 x 9 x 4)
Main machinery: 2 Werkspoor diesels; 2,500 hp(m) (1.8 MW); 2 shafts
Speed, knots: 18
Range, n miles: 9,000 at 12 kt
Complement: 130
Guns: 3 Vickers 4 in (105 mm)/45; 16 rds/min to 19 km (10 n miles); weight of shell 16 kg
 3 Bofors 40 mm/60 (1 twin, 2 single); 120 rds/min/barrel to 10 km (5.5 n miles); weight of shell 0.89 kg.
 5—12.7 mm MGs.
Radars: Surface search Rascal Decca 1226; I-band

Comment: Named after Captain John King, an Irish follower of Admiral Brown, who distinguished himself in the war with Brazil, 1826–28; and Captain Jose Murature, who performed conspicuous service against the Paraguayans at the Battle of Cuevas in 1865. *King* laid down June 1938. *Murature* March 1940. Both used for cadet training.

MURATURE 9/2007, A E Galarce / 1167919

AUXILIARIES

Notes: (1) The acquisition of an Antarctic support vessel, possibly as part of a joint programme with Brazil, has been initiated.

(2) There is a fishery protection vessel *Luisito* Q 51. Painted yellow, it is based at Mer del Plata

1 CHARTERED SHIP (AKS/AOTL)

Name	No	Builders	Commissioned
INGENIERO JULIO KRAUSE	B 13	Astarsa, Tigre	1981

Displacement, tons: 8,346 full load
Dimensions, feet (metres): 366.8 x 56.4 x 22.0 (111.8 x 17.2 x 6.7)
Main machinery: 1 Sulzer diesel; 5,800 hp (4.3 MW); 1 shaft
Speed, knots: 14
Complement: 32
Cargo capacity: 7,500 tons fuel

Comment: Chartered by the navy on 5 March 1893. Capable of stern replenishment at sea. Has been employed as a fleet oiler 2007–08.

1 DURANCE CLASS (AORH)

Name	No	Builders	Launched	Commissioned
PATAGONIA (ex-Durance)	B 1	Brest Naval Dockyard	6 Sep 1975	1 Dec 1976

Displacement, tons: 17,800 full load
Dimensions, feet (metres): 616.9 x 69.5 x 38.5 (157.3 x 21.2 x 10.8)
Main machinery: 2 SEMT-Pielstick 16 PC2.5 V 400 diesels; 20,800 hp(m) (15.3 MW) sustained; 2 shafts, LIPS cp props
Speed, knots: 15. **Range, n miles:** 9,000 at 15 kt
Complement: 164 (10 officers) plus 29 spare
Cargo capacity: 9,000 tons fuel; 500 tons Avcat, 140 distilled water; 170 victuals; 150 munitions; 50 naval stores
Guns: 2 Bofors 40 mm/60. 4—12.7 mm MGs
Radars: Navigation: 2 Rascal Decca 1226; I-band.
Helicopters: 1 Alouette III.

Comment: Acquired from France on 12 July 1999 having been in reserve for two years. Entered Argentine Navy service in July 2000 after short refit

PATAGONIA 5/2000, A E Galarce / 0104175

3 COSTA SUR CLASS (TRANSPORT) (AKS)

Name	No	Builders	Commissioned
CANAL BEAGLE	B 3	Astillero Principe y Menghi SA	29 Apr 1978
BAHIA SAN BLAS	B 4	Astillero Principe y Menghi SA	27 Nov 1978
CABO DE HORNOS (ex Bahia Camarones)	B 5	Astillero Principe y Menghi SA	28 June 1979

Displacement, tons: 10,894 full load
Dimensions, feet (metres): 390.3 x 67.4 x 24.6 (119 x 12.5 x 7.5)
Main machinery: 2 AFNE-Sulzer diesels; 6,400 hp(m) (4.7 MW); 2 shafts
Speed, knots: 18.5
Complement: 40

Comment: Three ships ordered December 1975. Laid down 10 January 1977 (B 3), 11 April 1977 (B 4) and 29 April 1978 (B 5). Launched 19 October 1977 (B 3), 29 April 1978 (B 4) and 4 November 1978 (B 5). Used to supply offshore research installations in Naval Area South. *Bahia San Blas* painted grey in 1998 indicating an active naval role in amphibious support operations. Capable of carrying up to eight LCVPs on deck. 132 troops can be accommodated in containers. The ship has been fitted with a helicopter (light) landing deck near the bow. *Cabo de Hornos* entered refit at Astillero Rio Santiago in late 2007 but was not adapted for an amphibious role.

BAHIA SAN BLAS 7/2007, A E Galarce / 1167977

CANAL BEAGLE 8/1999, P Marsan / 0081446

1 FLOATING DOCK

Number	Dimensions, feet (metres)	Capacity, tons
3	215.8 x 46 x 45.5 (65.8 x 14 x 13.7)	750

Comment: Based at Puerto Belgrano. All other docks have been sold.

3 RED CLASS (BUOYTENDERS) (ABU)

Name	No	Builders	Commissioned
PUNTA ALTA (ex-Red Birch)	Q 63 (ex-WLM 687)	CG Yard, Maryland	19 Feb 1965
CIUDAD DE ZARATE (ex-Red Cedar)	Q 61 (ex-WLM 688)	CG Yard, Maryland	1 Aug 1970
CIUDAD DE ROSARIO (ex-Red Wood)	Q 62 (ex-WLM 685)	CG Yard, Maryland	4 Apr 1964

Displacement, tons: 525 full load
 Dimensions, feet (metres): 181.1 x 33 x 6 (49.7 x 10.7 x 1.8)
 Main machinery: 2 Caterpillar D398 diesels; 1,800 hp (1.34 MW); 2 shafts; cp props, bow thruster
 Speed, knots: 12. Range, n miles: 2,248 at 11 kt
 Complement: 31 (6 officers)
 Guns: 2—12.7 mm MGs

Comment: Ex-USCG buoy tenders. First one transferred on 10 June 1998 and recommissioned on 17 November 1998. Two more transferred 30 July 1999. Strengthened hull for light ice breaking. Equipped with a 10 ton boom *Punta Alta* used as supply ship in the southern archipelago. The other pair are used as river supply ships.

CIUDAD DE ROSARIO 7/2008, A E Galarce / 1335600

ICEBREAKERS

Notes: During the repair of *Almirante Irizar*, ships are being leased as required to support Antarctic operations. These include the Russian icebreaker *Vasily Golovnin* and the Chinese icebreaker, *Xue Long*.

1 SUPPORT SHIP (AGB/AGOB)

Name	No	Builders	Launched	Commissioned
ALMIRANTE IRIZAR	Q 5	Wärtsilä, Helsinki	3 Feb 1978	15 Dec 1978

Displacement, tons: 14,900 full load
 Dimensions, feet (metres): 398.1 x 82 x 31.2 (121.3 x 25 x 9.5)
 Main machinery: Diesel-electric; 4 Wärtsilä-SEMT-Pielstick 8 PC2.5 L diesels; 18,720 hp(m) (13.77 MW) sustained; 4 generators; 2 Stromberg motors; 16,200 hp(m) (11.9 MW); 2 shafts
 Speed, knots: 17
 Complement: 135 ship's company plus 45 passengers
 Radars: Air/surface search; Plessey AWS 2; E/F-band.
 Navigation: 2 Decca; I band.
 Helicopters: 2 ASH-3H Sea King.

Comment: Fitted for landing craft with two 16 ton cranes, fin stabilisers, Wärtsilä bubbling system and a 60 ton towing winch RAST helicopter securing system. Designed for Antarctic support operations and able to remain in polar regions throughout the Winter with 210 people aboard. Used as a transport to South Georgia in December 1981 and as a hospital ship during the Falklands war April to June 1982. Has been used as a Patagonian supply ship, and for other activities associated with the Navy in the region. The ship completed a refit including the installation of Satcom, by early 2005. 40 mm guns have been removed. Following a generator-room fire on 11 April 2007, the ship requires substantial repair work. This began on 1 October 2008 and is expected to be completed in 2012.

ALMIRANTE IRIZAR 3/2006, A E Galarce / 1040738

MATACO 5/2000, A E Galarce 0104177

PREFECTURA NAVAL ARGENTINA – COAST GUARD

Headquarters Appointments

Commander
 Prefecto General Oscar Adolfo Arce
 Vice Commander
 Prefecto General Enrique Julio Cingolani
 Director of Operations:
 Prefecto General Norberto Venerini

Personnel

2009: 11,900 (1,600 officers)

Tasks

Under the General Organisation Act the PNA is charged with:
 1. Enforcement of Federal Laws on the high seas and waters subject to the Argentine Republic.
 2. Enforcement of environmental protection laws in Federal waters.
 3. Safety of ships in EEZ. Search and Rescue.
 4. Security of waterfront facilities and vessels in port.
 5. Operation of certain Navais.

6. Operation of some Pilot Services
 7. Management and operation of Aviation Service; Coastguard Vessels; Salvage, Fire and Anti Pollution Service; Yachtmaster School; National Diving School, several Fire Brigades and Anti-Narcotics Department.
 8. Operation of some Customs activities.

Organisation

Formed in 10 districts; High Parana River, Upper Parana and Paraguay Rivers, Lower Parana River, Upper Uruguay River, Lower Uruguay River, Delta, River Plate, Northern Argentine Sea, Southern Argentine Sea, Lakes and Comahue.

History

The Spanish authorities in South America established similar organisations to those in Spain. In 1756 the Captainship of the Port came into being in Buenos Aires in 1810 the Ship Registry office was added to this title. On 29 October 1896 the title of Capitanía General de Puertos was established by Act of Congress, the beginning of the

PNA. Today, as a security and safety force, it has responsibilities throughout the rivers of Argentina, the ports and harbours as well as within territorial waters out to the 200 mile EEZ. An attempt was made in January 1992 to restrict operations to a 12 mile limit but the legislation was cancelled. The Coast Guard was placed under the Interior Ministry in 1996.

Identity markings

Two unequal blue stripes with, superimposed, crossed white anchors followed by the title Prefectura Naval.

Strength of Prefectura

Patrol Ships	6
Large Patrol Craft	3
Coastal Patrol Craft	20
Inshore Patrol Craft	77

PATROL FORCES

Notes: In addition to the ships and craft listed below the PNA operates 400 craft, including floating cranes, runabouts and inflatables of all types. Six Zodiac Hurricanes SR 9201–9206 entered service in 2004.

1 PATROL SHIP (WPSO)

Name	No	Builders	Commissioned
DELFIN	GC 13	Ijsselwerf, Netherlands	14 May 1957

Displacement, tons: 700 standard; 1,000 full load
Dimensions, feet (metres): 193.5 × 29.8 × 13.8 (59 × 9.1 × 4.2)
Main machinery: 2 MAN diesels; 2,300 hp(m) (1.69 MW), 2 shafts
Speed, knots: 15 **Range, n miles:** 6,720 at 10 kt
Complement: 27
Guns: 1 Oerlikon 20 mm (fitted for), 2—12.7 mm Browning MGs.
Radars: Navigation: Decca; I-band.

Comment: Whaler acquired for PNA in 1969. Commissioned 23 January 1970.

DELFIN 7/2003, A E Galarce / 0572409

2 LYNCH CLASS (LARGE PATROL CRAFT) (WPB)

Name	No	Builders	Commissioned
LYNCH	GC 21	AFNE, Rio Santiago	20 May 1964
TOLL	GC 22	AFNE, Rio Santiago	7 July 1966

Displacement, tons: 100 standard; 117 full load
Dimensions, feet (metres): 98.4 × 21 × 6.9 (30 × 6.4 × 2.1)
Main machinery: 2 MTU Maybach diesels; 2,700 hp(m) (1.98 MW); 2 shafts
Speed, knots: 22 **Range, n miles:** 2,000
Complement: 14 (3 officers)
Guns: 1 Oerlikon 20 mm (can be carried), 1—7.62 mm MG
Radars: Surface search: Decca, I-band.

LYNCH 1/1997, Prefectura Naval / 0012018

5 HALCON (TYPE B 119) CLASS (WPSO)

Name	No	Builders	Commissioned
MANTILLA	GC 24	Bazán, El Ferrol	20 Dec 1982
AZOPARDO	GC 25	Bazán, El Ferrol	28 Apr 1983
THOMPSON	GC 26	Bazán, El Ferrol	20 Jun 1983
PREFECTO FIQUE	GC 27	Bazán, El Ferrol	28 July 1983
PREFECTO DERBES	GC 28	Bazán, El Ferrol	20 Nov 1983

Displacement, tons: 910 standard, 1,084 full load
Dimensions, feet (metres): 219.9 × 34.4 × 13.8 (67 × 10.5 × 4.2)
Main machinery: 2 Bazán-MTU 16V 956TB91 diesels; 7,500 hp(m) (5.52 MW) sustained, 2 shafts
Speed, knots: 20 **Range, n miles:** 5,000 at 18 kt
Complement: 33 (10 officers)
Guns: 1 Breda 40 mm/70; 300 rds/min to 12.5 km (7 n miles); weight of shell 0.96 kg, 2—12.7 mm MGs
Radars: Navigation: Decca 1226 ARPA, I-band.
Helicopters: Platform for 1 Dauphin 2

Comment: Ordered in 1979 from Bazán, El Ferrol, Spain. All have Magnavox MX 1102 SATNAV. Hospital with four beds. Carry one rigid rescue craft (6 m) with a 90 hp MWM diesel powering a Hamilton waterjet and a capacity for 12 and two inflatable craft (4.1 m) with Evinrude outboard. Refits of these ships started in 2005.

MANTILLA 6/2005, A E Galarce / 1151095

1 LARGE PATROL CRAFT (WAX)

Name	No	Builders	Commissioned
MANDUBI	GC 43	Rosa Naval Rio Santiago	1940

Displacement, tons: 270 full load
Dimensions, feet (metres): 106.9 × 20.7 × 6.2 (32.2 × 6.3 × 1.9)
Main machinery: 2 MAN G6V-23 5/33 diesels, 500 hp(m) (367 kW); 1 shaft
Speed, knots: 14
Range, n miles: 800 at 14 kt; 3,400 at 10 kt
Complement: 12
Guns: 2—12.7 mm Browning MGs.
Radars: Surface search: Decca, I-band

Comment: Since 1966 has acted as training craft for PNA Cadets School carrying 20 cadets.

MANDUBI 8/1994, Mario Diaz / 0056488

1 RIVER PATROL SHIP (WARS)

Name	No	Builders	Commissioned
TONINA	GC 47	SANYM SA San Fernando, Argentina	30 June 1978

Displacement, tons: 103 standard; 153 full load
Dimensions, feet (metres): 83.8 × 21.3 × 10.1 (25.5 × 6.5 × 3.3)
Main machinery: 2 GM 16V-71TA diesels; 1,000 hp (746 kW) sustained; 2 shafts
Speed, knots: 10 **Range, n miles:** 2,800 at 10 kt
Complement: 11 (3 officers)
Guns: 1 Oerlikon 20 mm.
Radars: Navigation: Decca 1226; I-band

Comment: Served as training ship for PNA Cadets School until 1986. Now acts as salvage ship with salvage pumps and recompression chamber. Capable of operating divers and underwater swimmers. Also used as a patrol ship.

TONINA 1/1998, Hartmut Ehlers / 00175A1

Speed, knots: 20
Range, n miles: 400 at 18 kt
Complement: 3
Guns: 12.7 mm Browning MG.
Radars: Navigation: I-band

Comment: First delivered September 1978. First 14 built by Cadonazzi, Tigre 1977-79, most of the remainder by Ast Bolen de Escobar 1984-86. GC 102-114 are slightly smaller.

PERCA 11/2004, A E Galarce / 1151093

36 FAST INTERVENTION CRAFT (WPB)

Displacement, tons: To be announced
Dimensions, feet (metres): 28.5 x 6.9 x 1.97 (8.7 x 2.1 x 0.6)
Main machinery: 1 diesel; waterjet propulsion
Speed, knots: 33
Complement: 10
Guns: 1 - 7.62 mm MG

Comment: Built to a local design. Began entering service in 2007.

1 BAZAN TYPE (WPBF)

SUREL GC 142

Displacement, tons: 14.5 full load
Dimensions, feet (metres): 39 x 12.4 x 2.2 (11.9 x 3.8 x 0.7)
Main machinery: 2 MAN D2848 LXE diesels; 1,360 hp(m) (1 MW) sustained; 2 Hamilton 362 waterjets
Speed, knots: 38
Range, n miles: 300 at 25 kt
Complement: 4
Guns: 1 - 12.7 mm MG
Radars: Navigation: Furuno; I-band.

Comment: Acquired in 1997 from Bazán, San Fernando. Similar to Spanish Bazán 39 class for Spanish Maritime Police. Plans to acquire further craft were not fulfilled

SUREL 12/2001, A E Galarce / 0529889

4 TRAINING SHIPS (WAXL/WAXS)

ESPERANZA ADHARA II TALITA II DR BERNARDO HOUSSAY (ex-El Austrá)

Displacement, tons: 33.5 standard
Dimensions, feet (metres): 62.3 x 14.1 x 8.9 (19 x 4.3 x 2.7)
Main machinery: 1 VM diesel, 90 hp(m) (66 kW); 1 shaft
Speed, knots: 6; 15 sailing
Complement: 6 plus 6 cadets

Comment: Details given are for *Esperanza* built by Ast Central de la PNA. Launched and commissioned 20 December 1968 as a sail training ship. The 30 ton training craft *Adhara II* and *Talita II* are of similar dimensions. *Dr Bernardo Houssay* is a Danish-built ketch built in 1930. Displacement 460 tons and has a crew of 25 (five officers). Acquired by the PNA in 1996 and underwent refit at Tandano Shipyard in 2007.

TALITA II 6/1998, Prefectura Naval / 0017545

DR BERNARDO HOUSSAY 5/2000, Harald Carstens / 0104181

6 SERVICE CRAFT (YTL/YTR)

PUERTO BUENOS AIRES SI 4 -SB 5 CANAL EMILIO MITRE SB 8
-SB 3 CANAL COSTANERO SB 9 -SB 10

Comment: *Canal Emilio Mitre* is a small tug of 53 tons full load, it has a speed of 10 kt and was built by Damen Shipyard, Netherlands in 1982

PILOT VESSELS

1 PILOT STATION (WAGH/AHH)

Name	No	Builders	Commissioned
RECALADA (ex-Río Uruguay)	DF 15	Astillero Astarsa	30 May 1972

Displacement, tons: 10,070 full load
Dimensions, feet (metres): 482.3 x 65.6 x 28 (147 x 20 x 8.5)
Speed, knots: 13
Complement: 28 (3 officers)

Comment: Commissioned as a Coast Guard ship 24 December 1991. Painted red with a white superstructure. Has a helicopter deck forward and a 20 bed hospital. After an extensive conversion and refit the ship replaced *Lago Lacar* in 1995.

RECALADA 8/1994, Marcelo Campodonico / 0056494

LAND-BASED MARITIME AIRCRAFT

Notes: In addition to the aircraft listed, there are two Piper Warrior II/Archer II training aircraft and five Schweizer 300C training helicopters.

Numbers/Type: 2/3 Casa C-212 S 68/C-212 A 68 Aviocar.
Operational speed: 190 kt (353 km/h).
Service ceiling: 24,000 ft (7,315 m).
Range: 1,650 n miles (3,055 km).

Role/Weapon systems: Two S 68 acquired in 1989, three A 68 in 1990. Medium-range reconnaissance and coastal surveillance duties in EEZ. Sensors: Bendix RDS 32 surface search radar, Omega Global GNS-500. Weapons: ASW; can carry torpedoes, depth bombs or mines. ASW; 2 x rockets or machine gun pods not normally fitted

CASA C-212 6/2002, CASA/EADS / 0571295

Numbers/Type: 1 Aerospatiale SA 330 Super Puma.
Operational speed: 151 kt (279 km/h).
Service ceiling: 15,090 ft (4,600 m).
Range: 335 n miles (620 km).

Role/Weapon systems: Support and SAR helicopter for patrol work. Updated in France in 1996. Sensors: Omera search radar. Weapons: Can carry pintle-mounted machine guns but is usually unarmed

SUPER PUMA 11/1996, Luis O Zunino / 0056495

Numbers/Type: 3 Aerospatiale AS 365 Dauphin 2
Operational speed: 150 kt (278 km/h).
Service ceiling: 15,000 ft (4,575 m).
Range: 410 n miles (758 km).

Role/Weapon systems: Updated in 1995-96 to replace the Super Puma during the latter's update but have been retained. Sensors: Agrion search radar. Weapons: Unarmed

DAUPHIN 2 10/1996, Prefectura Naval / 0017077

Australia

Country Overview

The Commonwealth of Australia comprises the island continent and the island of Tasmania which are separated by the Bass Strait. The British monarch, represented by a governor-general, is head of state. With an overall area of 2,966,151 square miles, it has a 13,910 n mile coastline with the Pacific (Coral and Tasman Seas) and Indian Oceans, the Timor Sea, Arafura Sea and the Torres Strait. External dependencies are the Australian Antarctic Territory, Christmas Island, the Cocos Islands, the Territory of Heard Island and McDonald Islands, Norfolk Island, the Ashmore and Carter Islands and the Coral Sea Islands Territory. Canberra is the capital while Sydney is the largest city and a major port. There are further ports at Melbourne, Fremantle, Newcastle, Port Kembla, Geelong, Brisbane, Gladstone, Port Hedland and Port Walcott. Territorial Seas (12 n miles) are claimed. An EEZ (200 n miles) is also claimed.

Headquarters Appointments

Chief of Navy:
Vice Admiral R H Crane, AM, CSM
Deputy Chief of Navy:
Rear Admiral D R Thomas, AM, CSC
Fleet Commander, Australia:
Rear Admiral N S Coates, AM
Commander Australian Navy Systems Command:
Commodore S Gilmore, AM, CSC

Senior Appointments

Chief Capability Development Group:
Vice Admiral M J Trpovich, AM, CSC
Head of Maritime Systems Division:
Rear Admiral B C Robinson, AM
Commander Border Protection Command:
Rear Admiral A K Du Toit, AM
Head of Information and Capability Management Division:
Rear Admiral P D Jones, DSC, AM
Commander Australian Defence College:
Rear Admiral J V P Goldrick, AM, CSC

Diplomatic Representation

Head Australian Defence Staff, Washington:
Air Vice Marshall K Osley, AM, CSC
Head Australian Defence Staff, London:
Air Commodore S Martin, AM
Naval Attaché in Washington:
Commodore V di Pietro, CSC
Defence Attaché in Riyadh:
Captain B Gorringe
Naval Attaché in Jakarta:
Captain R Plath
Naval Adviser in London:
Captain W Martin
Defence Attaché in Wellington:
Captain M C Keilam
Defence Attaché, NATO/EU:
Commander C Dunchue
Defence Adviser in Dili:
Captain D Micheal
Defence Adviser in Islamabad:
Captain M Schmidt

Diplomatic Representation — continued

Defence Adviser in Manila:
Captain V Jones
Defence Adviser in New Delhi:
Captain J Mead

Personnel

- (a) 2009: Permanent 13,219 officers and sailors
(b) Reserve: 8,599 (4,274 active, 4,325 standby)

RAN Reserve

The Naval Reserve is integrated into the Permanent Force. Personnel are either Active Reservists with regular commitments or Inactive Reservists with periodic or contingent duty. The missions undertaken by the Reserve include Coordination and Guidance of Psychology, Public Relations, Intelligence, Diving and patrol boat/landing craft operations. In addition, members of the Ready Reserve (a component of the Active Reserve) are shadow posted to selected major fleet units.

Border Protection Command

Border Protection Command (BPC), established on 30 March 2005 as the Joint Offshore Protection Command and renamed on 23 October 2006, coordinates and manages offshore maritime security within Australia's Offshore Maritime Domain. BPC integrates the resources of the Department of Defence and the Australian Customs Service (ACS) and includes personnel from the Australian Fisheries Management Agency and the Australia Quarantine Inspection Service. BPC has responsibility for offshore counter-terrorism prevention, interdiction and response capabilities and activities, including the protection of offshore oil and gas facilities, and civil maritime surveillance and response. The Commander is jointly accountable to the Chief of the Defence Force and the Chief Executive Officer of Customs.

BPC also manages the developing Australian Maritime Identification System. This system will bring together all the information held across government agencies on vessels operating in Australia's maritime area of interest. The aim is to be capable of identifying and assessing all vessels, other than recreational boats, within the 200 n mile EEZ.

Principal day-to-day assets of the Command include: one major fleet unit (FFG/FFH/LPA/AOR/HS); Armidale-class patrol boats, ACS surface units including the Bay class, contracted vessels *Triton* and *Oceanic Viking*; contracted Coastwatch surveillance aircraft and RAAF AP-3C maritime patrol aircraft.

Shore Establishments

Canberra: Navy Headquarters, Navy Systems Command Headquarters, *Herman* (Communications, Administration).
Sydney: Fleet Headquarters, Fleet Base East (Garden Island), *Waterhen* (Mine Warfare and Clearance Diving), *Watson* (Warfare Training), *Penguin* (Diving, Hospital), *Kuttabul* (Administration).
Wollongong Hydrographic Headquarters
Jervis Bay Area: *Albatross* (Air Station), *Creswell* (Leadership and Management Training and Fleet Support), Jervis Bay Range Facility.

Cockburn Sound (WA): Fleet Base West, *Stirling* (Administration and Maintenance Support, Submarines, Communications).

Darwin: Minor warship base, *Cooswarra* (Administration).

Cairns: *Cairns* (Administration), Minor Warship Base
Adelaide: Regional Naval Headquarters, South Australia.
Brisbane: Regional Naval Headquarters, South Queensland.
Hobart: Regional Naval Headquarters, Tasmania.

Fleet Deployment

Fleet Base East (and other Sydney bases): 4 FFG, 3 FFH, 1 AOR, 2 LPA, 1 LSH, 1 ASR, 8 MHC, 2 MSA.
Fleet Base West: 6 SS, 1 DSRV, 5 FFH, 1 AORH
Darwin Naval Base: 10 PB, 2 LCH.
Cairns: 4 PB, 4 LCH, 2 AGS, 4 AGSC

Fleet Air Arm (see Shipborne Aircraft section).

SUBMARINES

Notes: Feasibility studies on the next generation of submarines were initiated in December 2007. Initial (First Pass) approval is likely to be sought in about 2011 with a view to (Second Pass) approval of construction and contracts following by 2015. Entry into service is expected in about 2022. The capability mix is likely to include greater emphasis on land attack. While nuclear propulsion is an option, it is unlikely to be selected.

6 COLLINS CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
COLLINS	73	Australian Submarine Corp, Adelaide	14 Feb 1990	28 Aug 1993	27 July 1996
FARNCOMB	74	Australian Submarine Corp, Adelaide	1 Mar 1991	15 Dec 1995	31 Jan 1998
WALLER	75	Australian Submarine Corp, Adelaide	19 Mar 1992	14 Mar 1997	10 July 1999
DECHAINÉUX	76	Australian Submarine Corp, Adelaide	4 Mar 1993	12 Mar 1998	23 Feb 2001
SHEEAN	77	Australian Submarine Corp, Adelaide	17 Feb 1994	1 May 1999	23 Feb 2001
RANKIN	78	Australian Submarine Corp, Adelaide	12 May 1995	1 Nov 2001	29 Mar 2003

Displacement, tons: 3,051 surfaced; 3,353 dived
Dimensions, feet (metres): 255.2 × 25.6 × 23
 (77.8 × 7.8 × 7)

Main machinery: Diesel-electric; 3 Hedemora/Garden Island Type V18B/14 diesels; 6,020 hp (4.42 MW); 3 Jeumont Schneider generators; 4.2 MW; 1 Jeumont Schneider motor; 7,344 hp (m) (5.4 MW); 1 shaft; 1 MacTaggart Scott DM 43006 hydraulic motor for emergency propulsion

Speed, knots: 10 surfaced; 10 snorting; 20 dived
Range, n miles: 9,000 at 10 kt (snort); 11,500 at 10 kt (surfaced) 400 at 4 kt (dived)

Complement: 45 (8 officers)

Missiles: SSM: McDonnell Douglas Sub Harpoon Block 1B (UGM 84C); active radar homing to 92 km (50 n miles) at 0.9 Mach; warhead 227 kg.

Torpedoes: 6–21 in (533 mm) fwd tubes. Gould Mk 48 Mod 4/6/7, dual purpose; wire guided, active/passive homing to 38 km (21 n miles) at 55 kt or 50 km (27 n miles) at 40 kt; warhead 295 kg. Air turbine pump discharge. Total of 22 weapons including Mk 48 and Sub Harpoon

Mines: 44 in lieu of torpedoes.

Countermeasures. Decoys: 2 SSE

ESM: Condor CS-5600; intercept and warning

Weapons control: AN-BYG 1. Link 11.

Radars: Navigation: Kelvin Hughes Type 1007; I-band

Sonars: Thomson Sintra Scylla active/passive bow array and passive flank, intercept and ranging arrays.

Thales SHORTASS retractable, passive

Programmes: Contract signed on 3 June 1987 for construction of six Swedish-designed Kockums Type 471. Fabrication work started in June 1989; bow and midships (escape tower) sections of the first submarines built in Sweden.

Structure: Stirling air independent propulsion (AIP) has been tested on a shore rig. Scylla is an updated Eledone sonar suite. Diving depth, 250 m (820 ft). Anchoic tiles are fitted during build to all but *Collins* which is retrofitted. Pilkington Optronics CK 43 search and CH 93 attack periscopes fitted. Plans for an external mine belt have been abandoned.

Modernisation: The Replacement Combat System AN-BYG 1 is based on Raytheon's CCS Mk 2. The shore facilities version was established in mid-2005 and the

first seagoing system in *Waller* in 2008. The other boats are to follow by 2010. Meanwhile, following trials in *Collins* to improve the performance of the current combat system, the systems in *Dechainéux*, *Sheean*, *Rankin* and *Farncomb* have been augmented. In parallel, significant improvements to noise signature have been achieved following modifications to propellers and casing sections and improvements to the hydraulics system and engine reliability. These have been made to all six boats. Collaborative development of the US Mk 48 Mod 7 ADCAP torpedo is being progressed and the first firing was conducted by *Waller* during RIMPAC 08 in July 2008. All boats have been fitted with the Condor CS 5600 ESM system. *Collins* has received a set of modifications to facilitate the deployment and recovery of special forces. Further upgrades under the Collins Continuous Improvement Programme are to include improvements to communications and EW capabilities, a periscope system upgrade and sonar upgrades

Operational. All submarines are based at Fleet Base West with one or two deploying regularly to the east coast

Displacement, tons: 6,250 full load
Dimensions, feet (metres): 481.3 oa; 437 pp × 61 × 16.1 (146.7; 133.2 × 18.6 × 4.9)
Flight deck, feet (metres): 86.6 × 56 (26.4 × 17)
Main machinery: CODOG; 2 GE LM 2500 gas turbines, 47,328 hp(m) (34.8 MW) sustained; 2 Bazar/Caterpillar diesels; 12,240 hp(m) (9 MW) sustained; 2 shafts; LIPS cp props
Speed, knots: 28
Range, n miles: 4,500 at 18 kt
Complement: 202 (accommodation for 734)

Missiles: SSM: 8 Boeing Harpoon Block 2; active radar homing to 124 km (67 n miles) at 0.9 Mach; warhead 227 kg
SAM: Mk 41 VLS (48 cells); 32 Raytheon SM2 MR (Block IIIA); command/inertial guidance, semi-active radar homing to 167 km (90 n miles) at 2.5 Mach. 64 Evolved Sea Sparrow RIM 162B (in quadpacks); semi-active radar homing to 18 km (9.7 n miles) at 3.6 Mach; warhead 38 kg

Guns: 1 FMC 5 in (127 mm)/54 Mk 45 Mod 4, 20 rds/min to 100 km (54 n miles) for extended range munitions; weight of shell 32 kg.
 1 Raytheon 20 mm Vulcan Phalanx Block 2B; 6 barrels per launcher; 4,500 rds/min combined to 1.5 km. 2 Rafael Typhoon 25 mm
Torpedoes: 4 323 mm (2 twin) Mk 32 Mod 9 fixed launchers. Eurotorp MU 90; anti-submarine; active/passive homing to 25 km (13.5 n miles) at 29/50 kt, warhead 32 kg.
Countermeasures: Decoys: G & D Aircraft SRBOC Mk 36 Mod 1 decoy launchers for SRBOC/NATO Sea Gnat. Nulka expendable decoy launchers.
ESM: To be announced.
ECM: To be announced.
Combat data systems: Lockheed Aegis Baseline 71; Link 11/16
Weapons control: GFCS to be announced
Radars: Air/surface search: Aegis SPY-1D. E/F-band
 Surface search: Sperry Marine AN/SPQ-9B; I-band.
Fire control: 2 Raytheon SPG-62 Mk 99 (for SAM). I/J-band.

Navigation: To be announced
Sonars: Ultra integrated sonar suite comprising Type 2150 hull mounted sonar, towed array and torpedo detection.

Helicopters: 1 Sikorsky S-70B Seahawk or MRH 90.

Programmes: The Navantia F-100 was selected by the Australian government as the platform for the Hobart class Air Warfare Destroyers on 20 June 2007. The contract to build the ships was signed on 4 October 2007. The Combat System is to be an Australian version of Aegis; subsystems yet to be selected include communications and electronic warfare. The project is to be executed under an alliance arrangement between the Australian government, ASC AWD Shipbuilder Pty Ltd and Raytheon Australia Pty Ltd. The headquarters of the Alliance is the AWD Systems Centre in Adelaide. Hull blocks are to be manufactured around Australia and consolidated at the ASC Shipyard in Osborne, South Australia. There is an option for a fourth ship.

Torpedoes: 8-324 mm (2 triple) Mk 32 Mod 5 tubes Eurotorp MU 90; active/passive homing to 25 km (13.5 n miles) at 29/50 kt.

Countermeasures: Decoys: G & D Aircraft SRBOC Mk 36 Mod 1 decoy launchers for SRBOC/NATO Sea Gnat. 4 BAe Nulka quad expendable decoy launchers. FEL SLO-25A towed torpedo decoy.

RESM: Thales Centaur; radar intercept. CESM Telefonken PST 1720 Telegon 10; comms intercept.

Combat data systems: Saab Systems 9LV 453 Mk 3 (Mk 3E in 157). Link 11. Link 16.

Weapons control: Saab Systems Ceres 200 optronic director with CEA SSCWI (for RIM 162)

ARUNTA

Radars: Air search: Raytheon SPS-49(V)8 ANZ; C-band Air/surface search: Ericsson Sea Giraffe G/H band

Navigation: Atlas Elektronik 9800 ARPA; I-band.

Fire control: CelsiusTech Ceres 200; J-band.

IFF: Cossor AIMS Mk XI.

Sonars: Thomson Sintra Spherion B Mod 5; hull-mounted, active search and attack, medium frequency. Thales UMS 5424 Petrel; active mine avoidance; very high frequency.

Helicopters: 1 S-70B-2 Seahawk.

Programmes: Contract signed with Australian Marine Engineering Consolidated (now Tenix Defence) on 10 November 1989 to build eight Blohm + Voss designed MEKO 200 ANZAC frigates for Australia and two for New Zealand. First ship started construction 27 March 1992. Modules were constructed at Whangarei and shipped to Williamstown for assembly. The second and fourth ships of the class were delivered to New Zealand.

Modernisation: Evolved Seasparrow missile (ESSM) was integrated in *Warumunga*, the world's first warship to be so fitted (first missile launched 21 January 2003). All remaining ships have since been similarly equipped. Petrel MOAS (Mine Obstacle Avoidance Sonar) was introduced

(Scale 1 : 1,200), Ian Sturton / 1153838

in 2005, the MU 90 torpedo in 2008 and Harpoon has now been progressively installed across the entire class. F157 is the first of class to be fitted with the 9LV Mk 3E Combat Management System, which forms the foundation of the ASMD Upgrade programme to be implemented 2010-16. Other key elements of the upgrade include replacement of Sea Giraffe radar with CEAFAAR active phased array radar; installation of the Sagem Vampir IRST (Infra-Red Search and Track) system, replacement of the navigation radar with a dual Kelvin Hughes Sharp Eye system and a significant modernisation and upgrade to the Operations Room. A major communications upgrade will also be completed.

Structure: Space and weight have been reserved for the installation of Mini Typhoon, an additional octuple VLS, additional channels of fire for VLS, towed array sonar, offboard active ECM, extended ESM frequency coverage, Helo datalink and SATCOM. The installation of CEAFAAR phased array radar involves removal of the lattice mast and replacement with an enclosed cupola mast structure.

Operational: Two RHBs are carried on all ships. 153, 154 and 155 are based at Sydney; the remainder at Perth.

4 ADELAIDE (OLIVER HAZARD PERRY) CLASS (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned
SYDNEY	03	Todd Pacific Shipyard Corporation, Seattle, US	16 Jan 1980	26 Sep 1980	29 Jan 1983
DARWIN	04	Todd Pacific Shipyard Corporation, Seattle, US	3 July 1981	26 Mar 1982	21 July 1984
MELBOURNE	05	Australian Marine Eng (Consolidated), Williamstown	12 July 1985	5 May 1989	15 Feb 1992
NEWCASTLE	06	Australian Marine Eng (Consolidated), Williamstown	21 July 1989	21 Feb 1992	11 Dec 1993

Displacement, tons: 4,200 full load

Dimensions, feet (metres): 453 × 45 × 24.5 (sonar); 14.8 (keel)
(138.1 × 13.7 × 7.5; 4.5)

Main machinery: 2 GE LM 2500 gas turbines; 41,000 hp (30.6 MW) sustained, 1 shaft; cp prop; 2 auxiliary electric retractable propulsors fwd; 650 hp (484 kW)

Speed, knots: 29 (4 on propulsors)

Range, n miles: 4,500 at 20 kt

Complement: 184 (15 officers) plus aircrew

Missiles: SSM: 8 McDonnell Douglas Harpoon Block 2; active radar homing to 124 km (67 n miles) at 0.9 Mach, warhead 227 kg

SAM: GDC Pomona Standard SM 1MR Block VI; Mk 13 Mod 4 launcher for both SAM and SSM systems; command guidance; semi-active radar homing to 38 km (20.5 n miles) at 2 Mach, 40 missiles (combined SSM and SAM) 32 Raytheon RIM-162 ESSM; Mk 41 8-cell VLS launcher; semi-active radar homing to 18.5 km (10 n miles) at 3.6 Mach, warhead 227 kg.

Guns: 1 OTO Melara 3 in (76 mm) 62 US Mk 75 compact; 85 rds/min to 16 km (9 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft, weight of shell 6 kg
1 General Electric/GDC 20 mm Mk 15 Vulcan Phalanx; anti-missile system with 6 barrels; 4,500 rds/min combined to 1.5 km
Up to 6 12.7 mm MGs.

Torpedoes: 6—324 mm Mk 32 (2 triple) tubes Eurotorp MJ 90, active/passive homing to 25 km (13.5 n miles) at 29/50 kt

Countermeasures: Decoys: 4 Loreal Hycor SRBOC Mk 36 chaff and IR decoy launchers; fixed 6-barrelled system; range 1–4 km. 4 BAe Nulka quad expendable decoy launchers.
2 Rafael long-range chaff rocket launchers (fixed 2-barrel system). LSCUT torpedo countermeasures

SYDNEY

(Scale 1 : 1,200), Ian Sturton / 1153837

ESM/ECM: Elbit EA-2118 jammer. Rafael C-Pearl; intercept.

Combat data systems: ADACS. OE-2 SATCOM; Link 11. Link 16.

Weapons control: Sperry Mk 92 Mod 12 gun and missile control (Signal derivative). Radamec 2500 optronic director with TV, laser and IR magor

Radars: Air search: Raytheon SPS-49 A(V)1; C-band. Surface search/navigation: ISC Cardion SPS-55; I-band. Fire control: Lockheed SPG-50; I/J-band; range 110 km (60 n miles); Doppler search and tracking Sperry Mk 92 Mod 12; I/J-band
IFF: AIMS Mk XII

Sonars: Thales Sphenon (TMS 4131); active search and attack, medium frequency; hull mounted Petrel (TMS 5424) high frequency mine-avoidance, Albatros (TMS 4350) towed-array torpedo-warning system.

Helicopters: 2 Sikorsky S-70B-2 Seahawks or 1 Seahawk and 1 Squirrel.

Programmes: US numbers: Sydney FFG 35; Darwin FFG 44.
Modernisation: The original ship design was modified to provide improved helicopter facilities. The improvements

resulted in angling the transom, increasing the ship's overall length by 8 ft and fitting the RAST helo recovery system. The modifications also included longitudinal strengthening and buoyancy upgrades. The FFG Upgrade Program (FFG-UP) was delivered by Project Sea 1390. The lead ship Sydney returned to service in April 2006. Work on Melbourne completed in 2007 and Darwin and Newcastle completed in 2008. All four ships are to return to full operational service in 2009. The modification included major upgrades to the combat system and sensors including installation of the Mk 41 VLS and integration of ESSM. The first firing of ESSM from an FFG was conducted by Sydney on 20 August 2007. SM 1 missiles are to be replaced by SM-2 Block IIIA from 2010.

Operational: Canberra decommissioned on 12 November 2005 and Adelaide on 19 January 2008. The four remaining upgraded ships of the class are based at Fleet Base East. For operational tasking the ships are fitted with enhanced communications, TopLite Electro-Optical sights and the Mini Typhoon weapon system. All ships are lighter and air control capable.

DARWIN

6/2008, Mick Prendergast / 1335609

SYDNEY

6/2008, Chris Settler / 1335620

SHIPBORNE AIRCRAFT

Numbers/Type: 6 Westland Sea King HAS 50/50A
Operational speed: 125 kt (230 km/h).
Service ceiling: 14,500 ft (4,400 m).
Range: 490 n miles (908 km).

Role/Weapon systems: Utility helicopter; embarked periodically for operations from *Success*, *Tobruk* and the LPAs. Life extension completed in November 1996 for six aircraft. To be replaced by MRH 90 from 2010. One more acquired from UK in 1996 and upgraded to 50LEP (Mk 50) standard. Sensors: AW 391(A) radar. Weapons: MAG 58 2.82 mm MG.

SEA KING 2/2005, Paul Jackson / 1153648

Numbers/Type: 16 Sikorsky S-708 2 Seahawk
Operational speed: 135 kt (250 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 600 n miles (1,110 km).

Role/Weapon systems: Seahawk SH 60F derivative aircraft designed by Sikorsky to meet RAN specifications for ASW and ASuW operations. Eight assembled by ASTA in Victoria. Helicopters embarked in FFG-7 and in ANZAC frigates. Fully NVG compatible cockpit. Upgrades from 2004 (expected to complete in 2009) include Raytheon AAQ 27 FLIR, Tracor ALE 47 countermeasures Northrop Grumman AN/AAR-54 MAWS and Elisra AES 210 ESM. A two-phase Seahawk Capability Assurance Programme is in progress; obsolescent parts are to be replaced in the first phase and systems capability to be upgraded in the second. Sensors: Thales Super Searcher Surface surveillance radar, CDC Sonobuoy Processor and Barra Side Processor, and CAE Magnetic Anomaly Detector Set controlled by a Rockwell Collins Tactical Data System. Weapons: ASW; two Mk 46 Mod 5 (replacement by MU 90 is under review) torpedoes; ASV; one Mag 58 MG.

SEAHAWK 9/2006, Royal Australian Navy / 1187434

Numbers/Type: 6 Eurocopter MRH-90.
Operational speed: 165 kt (305 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 648 n miles (1,200 km).

Role/Weapon systems: Contract let with Australian Aerospace to provide a total of 46 MRH-90 to the Australian Defence Force (ADF). The Army is to be allocated 40 while six MSH (Maritime Support Helicopters) are to enter RAN service in 2011 to replace the Sea King fleet. They are to be capable of operating from *Kanimbla*, *Menoora* and future amphibious ships. Primary missions are to be afloat logistics support, SAR and MEDIVAC and boarding party operations. Sensors: Honeywell PRIMUS 701A weather radar, piloting FLIR, EW Self Protection System (Thales RWR, EADS Laser Warner System, LFK AN/AAR-50 Missile Launch Detection System (MILDS), MBDA Saphir-M chaff/flare dispenser system), Thales 'Top Owl' Helmet Mounted Sight and Display (HMSD) with integrated night vision device. Weapons: 2—7.62 mm MGs.

MRH 90 12/2007, RAN / 1336111

LAND-BASED MARITIME AIRCRAFT

Notes: (1) Replacement of the AP-3C maritime patrol aircraft fleet from around 2015 is being taken forward under Project Air 7000. The Boeing P-8A Poseidon is a potential platform. The same project includes procurement of a Maritime Unmanned Aerial System (MUAS) to augment the AP-3C replacement platform. (2) Australia joined the System Design and Development phase of the Joint Strike Fighter in October 2002. Up to 100 aircraft are required to replace the F/A-18 Hornet and F/A-18F Super Hornet fleets by 2020.

Numbers/Type: 6 Boeing 737 AEW&C 'Wedgetail'
Operational speed: to be confirmed.
Service ceiling: 41,000 ft (12,500 m).
Range: to be confirmed.

Role/Weapon systems: Contract for four aircraft (adaptation of Boeing Business Jet) signed on 20 December 2000. Two additional aircraft, under option, were added in 2004. Delivery of first two aircraft was originally scheduled for November 2006 but these have been delayed. The aircraft are planned to be delivered from mid-2009. AAR capable. Sensors: Details unconfirmed but likely to include Northrop Grumman ESSD L-band multirole electronically scanned array (MESA) radar (fuselage mounted), electronic warfare self-protection (EWSP) system (including IR countermeasures, chaff and flares); Links 11 and 16; Satcom.

BOEING WEDGETAIL 7/2004, Boeing / 0566617

Numbers/Type: 17/4 General Dynamics F-111C/RF-111C
Operational speed: 793 kt (1,469 km/h).
Service ceiling: 60,000 ft (18,290 m).
Range: 2,540 n miles (4,700 km).

Role/Weapon systems: Air Force operates the F-111 for maritime and land strike. Four are designated RF-111 and are employed as photo reconnaissance aircraft. Upgraded F/A-18A/Bs and 24 F/A-18F Block 2 Super Hornets will replace the F-111 from late 2010. Sensors: AN/APQ 169 radar, Elta EL-8222 ECM pod, AN/AVQ-26 Pave Track targeting pod. Weapons: 4 Harpoon missiles, 2 AGM-142 stand-off missiles, combinations of Mk 82 and Mk 84 bombs or Paveway II laser guided bombs, AIM-9 Sidewinder AAM.

F-111C 2/2003, Paul Jackson / 0552764

Numbers/Type: 18 Lockheed P-3C/AP-3C Orion.
Operational speed: 410 kt (760 km/h).
Service ceiling: 28,300 ft (8,625 m).
Range: 4,000 n miles (7,410 km).

Role/Weapon systems: Operated by Air Force for long range maritime patrol, ASW, maritime strike and ISR. Three more aircraft (plus one for spare parts) without armament or sensors acquired for training. All aircraft upgraded to AP-3C standard by late 2004. Sensors: Elta EL/M-2022A(V)3 radar, GDC UYS-503 acoustic system, Star Safire III electro-optics, ELTA ALR-2001 ESM, up to 84 sonobuoys. Weapons: eight Mk 46(V)5 torpedoes (replacement by MU 90 is under review), up to six Harpoon missiles.

ORION AP-3C 2/2005, Paul Jackson / 1153668

Numbers/Type: 68 McDonnell Douglas F/A-18 Hornet.
Operational speed: 1,032 kt (1,910 km/h).
Service ceiling: 50,000 ft (15,240 m).
Range: 1,000 n miles (1,829 km).

Role/Weapon systems: Air defence and strike aircraft operated by Air Force but with fleet defence and anti-shipping secondary roles. An upgrade programme is being conducted in three phases. Phase 1 modifications, completed in 2002, included new radios, upgraded mission computers, EW upgrade and GPS. Phase 2-1, completed in 2003, included installation of the AN/APG-73 radar and upgraded aircraft software. In Phase 2-2, completed by late 2007, the aircraft are to be equipped with Link 16, improved avionics and helmet mounted sight. In Phase 2-3, the EW suite (RWR and jammer) is to be upgraded and in Phase 2-4, a new target designation system (HDTs) is to be installed. Phase 3, structural modifications, is to be completed by 2010. Upgraded F/A-18A/Bs are 24 F/A-18F Block 2 Super Hornets are to replace the F-111 from late 2010. Sensors: APG-73 attack radar, Litening Pod radar warning receiver. Weapons: ASW; 4 x Harpoon missiles. Strike: 1 x 20 mm cannon, up to 77 tons of 'iron' bombs. Fleet defence: 4 x AAMRAM and 4 x ASRAAM.

F/A-18 Hornet 6/1997, Jane's / 0581750

32 Australia/Land-based maritime aircraft – Amphibious forces

Numbers/Type: 13 Aerospatiale AS 350B Squirrel.

Operational speed: 125 kt (232 km/h).

Service ceiling: 10,000 ft (3,050 m).

Range: 275 n miles (510 km).

Role/Weapon systems: Support helicopter for utility tasks and training duties. No longer deployed as shipborne aircraft. **Sensors:** None **Weapons:** ASV, two Mag 58 MGs

SQUIRREL

9/2006, Royal Australian Navy / 1167433

Numbers/Type: 24 Boeing F/A-18F Super Hornet

Operational speed: 930 kt (1,721 km/h).

Service ceiling: 60,000 ft (18,240 m).

Range: 1,320 n miles (2,376 km).

Role/Weapon systems: Acquisition of 24 aircraft confirmed on 17 March 2008. To enter service in 2010, they are to act as an interim replacement for the F-111 from 2010. Details are for those in US Navy service. **Sensors:** APG-73 radar, APG-79 AESA radar, ALR-87(V)3 RWR ECM; ALQ-165 ASPJ, ALQ-214 RFCM, towed decoys **Weapons:** 11 wing stations for 8,680 kg of weapons (same armament as C/D) plus 20 mm guns.

F/A-18F

9/2005, US Navy / 1154040

AMPHIBIOUS FORCES

Notes: Replacements for the current amphibious capability are being procured under Joint Project (JP) 2048. *Tobruk* and one of the LPA amphibious transports (*Kanimbla* and *Manoora*) are to be replaced by the Canberra-class LHDs and the second LPA is to be replaced by a 'strategic sealift' capability by 2018. JP 2048 is also to delivery replacement of the watercraft capability represented by the Balikpapan class LCH, LCM 8 and LCVP and other ship-to-shore assets required to integrate with the new LHDs.

2 KANIMBLA (NEWPORT) CLASS (LCCH/LLP)

Name	No	Builders	Laid down	Launched	Commissioned	Recommissioned
KANIMBLA (ex-Saginaw)	L 51 (ex-1188)	National Steel & Shipbuilding	24 May 1969	7 Feb 1970	23 Jan 1971	29 Aug 1994
MANOORA (ex-Fairfax County)	L 52 (ex-1193)	National Steel & Shipbuilding	28 Mar 1970	19 Dec 1970	16 Oct 1971	25 Nov 1994

Displacement, tons: 4,975 light; 8,450 full load
Dimensions, feet (metres): 552 × 69.5 × 17.5 (aft)
(168.2 × 21.2 × 5.3)

Main machinery: 6 ALCO 16-251 diesels; 16,500 hp (12.3 MW) sustained, 2 shafts; cp props; bow thruster

Speed, knots: 20 **Range, n miles:** 23,500 at 15 kt

Complement: 213 (12 officers)

Military lift: 450 troops (25 officers); 229 lane metres of vehicles, 2 LCM 8; 250 tons aviation fuel

Guns: 1 General Electric/General Dynamics 20 mm Vulcan Phalanx Mk 15 can be fitted ● 4–12.7 mm MGs. Fitted for but not with army-operated RBS 70 launchers.

2 Mini Typhoon 12.7 mm guns. 2 Typhoon 25 mm guns.

Countermeasures: 2 SRBOC Mk 36 chaff and IR launchers.

Radars: Surface search: Kelvin Hughes 1007 ●; I-band Navigation. Kelvin Hughes ●; I-band

Helicopters: 4 Army Black Hawks ● or 3 Sea Kings or 1 Chinook.

Programmes: Acquired by sale from US on 25 August and 27 September 1994.

MANOORA

(Scale 1 : 1,500), Ian Sturton / 0569257

Modernisation: Conversion contract let to Forgas Shipbuilding, Newcastle in May 1995. Both ships modified by fitting a hangar to take four Black Hawk helicopters, to incorporate a third landing spot forward, to increase aviation fuel capacity and to dispense with the bow landing ramp. The after flight deck is Chinook capable. A stern gate to the tank deck is retained. The ships' carrying capacity includes the M1A1 tank as well as other wheeled and tracked vehicles and artillery.

Two LCM 8 are carried on the deck forward when the third landing spot is not used. Installation of communications and command support system to support a deployable JTFHQ was undertaken in both ships in 2001. The ships have a Joint Operations Room and an enhanced medical and surgical fit which can provide Level 3 clinical capacity when a Primary Care Reception Facility is embarked.

Operational: Both based at Sydney. To be replaced in 2013 and 2016

MANOORA

5/2008*, Chris Settler / 1335618

KANIMBLA

11/2008, Chris Sattler / 1335673

1 HEAVY LIFT SHIP (LSLH)

Name	No	Builders	Laid down	Launched	Commissioned
TOBRUK	L 50	Carrington Slipways Pty Ltd	7 Feb 1978	1 Mar 1980	23 Apr 1981

Displacement, tons: 3,300 standard; 5,700 full load
Dimensions, feet (metres): 417 × 60 × 16 (127 × 18.3 × 4.9)
Main machinery: 2 Mirrless Blackstone KDMRB diesels, 9,600 hp (72 MW); 2 shafts
Speed, knots: 18. **Range, n miles:** 8,000 at 15 kt
Complement: 143 (13 officers)
Military lift: 314 troops (prolonged embarkation); 1,300 tons cargo or 330 lane-metres of vehicles, 70 tons capacity derrick; 2—4.25 ton cranes; 2 LCVP; 2 LCM 8

Guns: 2—12.7 mm MGs. 2 Mini Typhoon 12.7 mm guns. 2 Mini Typhoon 25 mm guns.
Radars: Surface search: Kelvin Hughes Type 1006; I-band. Navigation: Kelvin Hughes 1007; I-band.
Helicopters: Platform for one Sea King. Second Chinook capable spot on forward flight deck (clear of cargo).
Structure: The design is an update of the British Sir Bedivere class and provides facilities for the operation of helicopters, landing craft, amphibians for ship-to-shore movement. A special feature is the ship's heavy lift derrick system for handling heavy loads. Able to embark a squadron of M1A1 tanks plus a number of wheeled vehicles and artillery in addition to its troop lift. Bow and stern ramps are fitted. Two LCM 8 carried on deck and two LCVPs at davits.
Operational: A basic communications fit enables participation in amphibious operations but not in command role. Based at Sydney. To be replaced in 2012

TOBRUK

6 LANDING CRAFT (HEAVY) (LCH/LSM)

Name	No	Builders	Commissioned
BALIKPAPAN	L 126	Walkers Ltd, Queensland	8 Dec 1971
BRUNEI	L 127	Walkers Ltd, Queensland	5 Jan 1973
LABUAN	L 128	Walkers Ltd, Queensland	9 Mar 1973
TARAKAN	L 129	Walkers Ltd, Queensland	15 June 1973
WEWAK	L 130	Walkers Ltd, Queensland	10 Aug 1973
BETANO	L 133	Walkers Ltd, Queensland	8 Feb 1974

Displacement, tons: 358 light; 509 full load
Dimensions, feet (metres): 146 × 33 × 6.5 (44.5 × 10.1 × 2)
Main machinery: 2 Caterpillar 3406E diesels; 442 hp (330 kW) sustained; 2 shafts
Speed, knots: 10. **Range, n miles:** 3,000 at 10 kt
Complement: 16 (2 officers)
Military lift: 2 M1A1
Guns: 2—12.7 mm MGs.
Radars: Navigation: Racal Decca Bridgmaster; I-band

Comment: Originally this class was ordered for the Army but only *Balikpapan* saw Army service until being commissioned into the Navy on 27 September 1974. The remainder were built for the Navy. *Balikpapan* and *Betano* based at Darwin. The remainder are based at Cairns. All have been given a life extension refit, which started with *Wewak* in 2000, and completed with *Brunel* in 2002. All were re-engined with Caterpillar diesels 2005–07. *Buna* and *Salamaua* transferred to Papua New Guinea Defence Force in November 1974.

TARAKAN

8/2008, Chris Sattler / 1335076

4 LANDING CRAFT (LIGHT) (LCVP)

T-47
Displacement, tons: 6.5 full load
Dimensions, feet (metres): 43.3 × 11.5 × 2.3 (13.2 × 3.5 × 0.7)
Main machinery: 2 Volvo Penta Sterndrives; 400 hp(m) (294 kW)
Speed, knots: 22; 15 (fully laden)
Complement: 3
Military lift: 4.5 tons cargo or 1 Land Rover or 36 troops

Comment: Prototype built by Geraldton, Western Australia. Trials conducted in late 1992. Three more delivered in July 1993. Two for *Tobruk*, one for *Success* and one spare attached to Defence Maritime Services at Garden Island, Sydney.

T5

8/1999, van Ginderen Collection / 0104188

0 + 2 CANBERRA CLASS (AMPHIBIOUS ASSAULT SHIPS) (LHD)

Name	Builders	Laid down	Launched	Commissioned
CANBERRA	Navantia, Ferrol/Tenix, Williamstown	2009	2011	2013
ADELAIDE	Navantia, Ferrol/Tenix, Williamstown	2010	2012	2014

Displacement, tons: 25,790 full load
Dimensions, feet (metres): 757.2 × 105.0 × 19.7 (230.8 × 32.0 × 6.0)
Flight deck, feet (metres): 663.9 × 105.0 (202.3 × 32.0)
Main machinery: Diesel-electric; 4 diesels, 35,000 hp (26 MW), 2 podded propulsors
Speed, knots: 19
Range, n miles: 9,000 at 15 kt
Complement: 243 (plus 978 embarked forces)
Guns: To be announced
Countermeasures: To be announced
Combat data systems: To be announced

Helicopters: Landing spots for 6 NH90 TTH or S-70 Blackhawk or Eurocopter Tiger ARH

Programmes: Tenix/Navantia announced on 20 June 2007 as the preferred tenderer for Project 2048, the procurement of two helicopter-capable assault ships. A contract for the design and build of the ships was signed on 9 October 2007. The design of the ships is based on the Navantia Strategic Projection Ship under construction for the Spanish Navy. It is planned that the ships' hulls from keel to flight deck are to be built at Ferrol, Spain. Once built, they are to be transported to Tenix's Williamstown shipyard in Melbourne where the locally built superstructure will be joined to the hull. *Canberra* is planned to arrive in Australia in 2011 and *Adelaide* in 2013. The majority of combat system design and integration work is to take place at Adelaide.

Structure: The hanger (1,000 m³) is to be capable of accommodating 11 NH90s. Below the hanger, there is to be a 2,000 m³ 'garage' to accommodate 150 vehicles (including main battle tanks), provisions or containers. The landing dock (69.3 × 16 m) is to be capable of operating four LCM-8 landing craft or at least one landing craft air cushion. Medical facilities will include operating rooms, intensive care unit and sick bay. The 'ski jump' dock is also suitable for launching fixed-wing UAVs and will also enable cross-decking of STOVL aircraft operated by allies.

Operational: The principal roles are amphibious, strategic projection of land forces and disaster relief. The ships are to replace the capabilities of *Tabruk* and *Kenimble* of *Manoora*.

Complement: 21
Guns: 1–25 mm Rafael M242 Bushmaster 2 12.7 mm MGs.
Countermeasures: RESM; BAE Systems Prism III; intercept.
Electro-optic systems: Rafael Toplite optronic director.
Radars: Surface search/navigation: Bridgmaster E; E/F/I-band

Comment: Austal Ships in conjunction with Defence Maritime Services (DMS) contracted on 17 December 2003 to supply patrol boats to replace the Fremantle class under Project Sea 1444. The craft are of monohull design and are capable of carrying two RHIBs. DMS is contracted to provide through-life logistics and maintenance support over 15 years. The craft are named after Australian cities and towns. Ten of the craft are based at Darwin, Northern Territory and four at Cairns, Queensland. The ships are operated by 21 crews under a multicrewing regime to maximise operational availability of the hulls.

WOLLONGONG 8/2008, Chris Sattler / 1335615

MINE WARFARE FORCES**6 HUON (GAETA) CLASS (MINEHUNTERS—COASTAL) (MHC)**

Name	No	Builders	Launched	Commissioned
HUON	82	Intermarine/ADI, Newcastle	25 July 1997	15 May 1999
HAWKESBURY	83	ADI, Newcastle	24 Apr 1998	12 Feb 2000
NORMAN	84	ADI, Newcastle	3 May 1999	26 Aug 2000
GASCOYNE	85	ADI, Newcastle	11 Mar 2000	2 June 2001
DIAMANTINA	86	ADI, Newcastle	2 Dec 2000	4 May 2002
YARRA	87	ADI, Newcastle	19 Jan 2002	1 Mar 2003

Displacement, tons: 720 full load
Dimensions, feet (metres): 172 × 32.5 × 9.8 (52.5 × 9.9 × 3.0)
Main machinery: 1 Fincantieri GMT diesel; 1,985 hp(m) (1.46 MW); 1 shaft; LIPS cp prop; 3 Isotta Fraschini 1300 diesels; 1,440 hp(m) (1,058 kW); 3 electrohydraulic motors; 506 hp(m) (372 kW); Riva Calzoni retractable/rotatable APUs
Speed, knots: 14 diesel, 6 APUs
Range, n miles: 1,600 at 12 kt
Complement: 40 (6 officers) plus 9 spare

Guns: 1 MSI DS 308 30 mm/75 650 rds/min to 10 km (5.4 n miles) ant-surface; 3 km (1.6 n miles) anti-aircraft; weight of shell 0.36 kg.

Countermeasures: MCM: 2 Bofors SUTEC Double-Eagle Mk 2 mine disposal vehicles with DAMDIC charges, AD: double Oropesa mechanical sweep and capable of towing the Australian developed Mini-Dyad influence sweep.

Decoys: 2 MEL Aviation Super Barracade, chaff launchers

ESM: AWADI Prism.

Combat data systems: GEC-Marconi Nautis 2M with Link 11 receive only

Weapons control: Radamac 1400N optronic surveillance system.

Radars: Navigation: Kelvin Hughes 1007, I-band

Sonars: GEC-Marconi Type 2093; VDS; VLF-VHF multifunction with five arrays; mine search and classification.

Programmes: The Force Structure Review of May 1991 recommended the acquisition of coastal minehunters of proven design. A contract was signed with Australian Defence Industries (ADI) on 12 August 1994 to build six Intermarine designed Gaeta class derivatives. The hull of the first ship was constructed at Intermarine's Sarzana Shipyard in Italy and arrived in Australia as deck cargo on 31 August 1995 for fitting out in Newcastle, where the remaining five ships were built at ADI's Throsby Basin. Local content for this project was about 69 per cent.

Structure: Monocoque GRP construction. A recompression chamber, one RIB and an inflatable diving boat are carried to support a six-man diving team.

Operational: This class which is named after Australian rivers, is based at HMAS *Waterhen* in Sydney. *Huon* and *Hawkesbury* are tasked on a rotational basis to meet border security requirements.

ALBANY 7/2008, John Mortimer / 1335614

2 MINESWEEPERS AUXILIARY (TUGS) (MSCD/YTB)

BANDICOOT (ex-Grenville VII) Y 298 **WALLAROO (ex-Grenville V) Y 299**

Displacement, tons: 412 full load
Dimensions, feet (metres): 95.8 × 28 × 11.3 (29.6 × 8.5 × 3.4)
Main machinery: 2 Stork Werkspoor diesels; 2,400 hp(m) (1.76 MW); 2 shafts
Speed, knots: 11
Range, n miles: 6,300 at 10 kt
Complement: 10
Radars: Navigation: Furuno 7040D, I-band

Comment: Built in Singapore 1982 and operated by Meritimo (PTE) Ltd. Purchased by the RAN and refurbished prior to delivery 11 August 1990. Used for minesweeping trials towing large AMASS influence and mechanical sweeps. No side scan sonar. Also used as berthing tugs. Bollard pull, 30 tons. Both are expected to decommission in 2010.

BANDICOOT 5/2007, Chris Sattler / 1167900

36 Australia/Mine warfare forces — Survey ships (hydrographic survey)

3 MINESWEEPING DRONES (MSD)

MSD 02-04

Dimensions, feet (metres): 24 × 9.2 × 2 (7.3 × 2.8 × 0.6)
Main machinery: 2 Yamaha outboards, 300 hp(m) (221 kW)
Speed, knots: 45; 8 (sweeping)

Comment: Built by Hamil Haven in 1991-92. Remote-controlled drones. GRP hulls made by Hydrofield. Used for sweeping ahead of the MSA craft. Differential GPS navigation system with Syledis Vega back-up.

MSD 02 10/2007, Royal Australian Navy / 116/888

SURVEY SHIPS (HYDROGRAPHIC SURVEY)

Notes: In addition to the ships listed below, there are three civilian survey capable vessels: *Southern Surveyor*, *Solander* and *Cape Fergusson*. The Australian Antarctic Division also lease-operates the Antarctic supply ship *Aurora Australis*. This ship commenced operations in the Antarctic in 1990, is capable of carrying 70 scientists and is fitted with a helicopter hanger.

AURORA AUSTRALIS 4/2007, Bob Fildes / 116/889

2 LEEUWIN CLASS (AGS)

Name	No	Builders	Launched	Commissioned
LEEUWIN	A 245	NQEA, Cairns	19 July 1997	27 May 2000
MELVILLE	A 246	NQEA, Cairns	23 June 1998	27 May 2000

Displacement, tons: 2,170 full load
Dimensions, feet (metres): 233.6 × 49.9 × 14.1 (71.2 × 15.2 × 4.3)
Main machinery: Diesel-electric; 4 GEC Alsthom 6RK 215 diesel generators, 4,290 hp (3.2 MW) sustained; 2 Alsthom motors, 1.94 MW; 2 shafts; 1 Schottel bow thruster
Speed, knots: 14
Range, n miles: 18,000 at 9 kt
Complement: 56 (10 officers) plus 5 trainees
Radars: Navigation: STN Atlas 9600 ARPA; I-band.
Sonars: C-Tech CMAS 36/39; hull mounted; high frequency active

Helicopters: 1 AS 350B (not permanently embarked)

Comment: Contract awarded 2 April 1996 to North Queensland Engineers & Agents (NQEA). Fitted with Atlas Fansweep-20 multibeam echo sounder and one Atlas Hydrographic Deso single beam echo sounder. Also fitted with Klein 2000 towed lightweight sidescan sonar. The ships are capable of various small boat configurations utilising the three SMB davits. The ships are also fitted with an additional RHIB and two light utility boats. Based at Cairns.

MELVILLE 11/2003, John Mortimer / 0568143

4 PALUMA CLASS (AGSC)

Name	No	Builders	Commissioned
PALUMA	A 01	Eglo, Adelaide	27 Feb 1989
MERMAID	A 02	Eglo, Adelaide	4 Dec 1989
SHEPPARTON	A 03	Eglo, Adelaide	24 Jan 1990
BENALLA	A 04	Eglo, Adelaide	20 Mar 1990

Displacement, tons: 320 full load
Dimensions, feet (metres): 118.9 × 42.0 × 8.6 (36.6 × 12.8 × 2.65)
Main machinery: 2 Detroit 12V-92TA diesels; 1,100 hp (820 kW) sustained; 2 shafts
Speed, knots: 11
Range, n miles: 3,600 at 11 kt
Complement: 14 (3 officers)
Radars: Navigation: Kelvin Hughes 1007; I band.
Sonars: Skipper S113, hull-mounted, active, high frequency.

Comment: Catamaran design based on Prince class ro-ro passenger ferries. Steel hulls and aluminium superstructure. Contract signed in November 1987. Fitted with two ELAC LAX 4700 dual-frequency echo sounders and Knudsen 320B high frequency hull-mounted side-scan sonar. The ships are to be upgraded to multibeam echo-sounder systems 2008-10. All ships based at Cairns and normally operate in pairs when undertaking survey operations.

MERMAID 7/2008, John Mortimer / 1335613

9 SURVEY MOTOR BOATS (YGS)

FANTOME 1005	TOM THUMB 1009	CASUARINA 1012
MEDA 1006	JOHN GOWLLAND 1010	CONDER 1021
DUYFKEN 1008	GEOGRAPHE 1011	WYATT EARP ASV 01

Dimensions, feet (metres): 35.1 × 9.5 × 5.6 (10.7 × 2.9 × 1.7)
Main machinery: 2 Volvo Penta AOAD-41A diesel stern drives; 400 hp(m) (294 kW), 2 props
Speed, knots: 24
Range, n miles: 300 at 12 kt
Complement: 4 (1 officer)
Radars: Navigation: JRC; I-band.

Comment: Six Survey Motor Boats (SMB) built by Pro Marine, Victoria 1992-1993. Two additional SMBs (CAS and GEO) were built in 1997 to supplement the Leeuwin-class AGS. One SMB has been taken out of service. The remaining seven SMBs are fitted with an Atlas Hydrographic Fansweep 20 multibeam echo sounder and Atlas Hydrographic Deso 15 single beam echo sounder. Three SMBs are fitted for the Klein 2000 towed lightweight side scan sonar. SMB Conder built by North Queensland Engineers and Agents in 2003 as a prototype replacement SMB is fitted with an Atlas Hydrographic Fansweep 20 multibeam echo sounder and Atlas Hydrographic Deso 15 single beam echo sounder. Six SMBs are allocated to the Leeuwin class AGS in Cairns and two to the hydrographic school at HMAS Penguin. The Antarctic Survey Vessel (ASV) Wyatt Earp, a 9 m craft purpose built by Pro Marine, Victoria in 1992 for operations in the Antarctic. ASV Wyatt Earp is allocated to the Deployable Geospatial Support Team (DGST 1) in Wollongong and is fitted with ODOM Hydrotrac single beam echo sounder. The ASV is also fitted for a C-MAX CM2 towed lightweight side scan sonar or JW Fishers, Proton 4 marine magnetometer.

TOM THUMB 8/2008, Chris Settler / 1335612

DEEP SUBMERGENCE VEHICLES

1 RESCUE SUBMERSIBLE (DSRV)

REMORA

Displacement, tons: 16.5
Dimensions, feet (metres): 19.7 × 7.9 × 13.4 (with skirt); 7.9 (without skirt)
 (6.0 × 2.4 × 4.1; 2.4)
Main machinery: 2 electric motors, 150 hp (112 kW), 4 axial thrusters, 4 vertical thrusters, 2 transverse thrusters
Speed, knots: 3 (dived)
Complement: 1 operator and 6 survivors

Comment: Manufactured in 1985 by Can Dive Marine Services, Canada for Australian Submarine Corporation and subsequently in 2001 wholly owned by the RAN, *Remora* is operated and maintained (at 12 h notice) by a contractor. Capable of operating to depths in excess of 500 m in a current of 3 kt, it can evacuate six personnel at a time and transfer them under pressure of up to 5 Bar directly to two 36-man decompression chambers for medical and hyperbaric treatment. A Remotely Operated Vehicle (ROV), *Remora* is flown and powered from the surface giving it unlimited endurance (emergency life support onboard is 240 man-hours). It is launchable from a craft of opportunity in up to Sea State 5 using a Launch And Recovery System (LARS) that is part of the deployable suite. The skirt on the vehicle can be remotely manipulated to achieve mating angles up to 60°.

Communications are by fibre-optic cable. The entire suite of *Remora*, LARS and all associated equipment can be fitted into ISO containers to facilitate rapid worldwide deployment. The USN replacement system, SRDRS, is based on the *Remora* system. Following an accident on 5 December 2006, the DSRV was stranded on the seabed until it was recovered on 24 April 2007. However, safety certification for the system had not been obtained by early 2008 and alternative options are under consideration.

REMORA 6/2002, K Bristow, RAN / 0528408

YOUNG ENDEAVOUR 5/2007, Chris Sattler / 1167902

1 SAIL TRAINING SHIP (AXS)

SALTHORSE

Displacement, tons: 32 full load
Dimensions, feet (metres): 65.0 × 16.7 × 7.6 (19.8 × 5.1 × 2.3)
Main machinery: 2 Ford Lehman diesel; 120 hp (89 kW)
Speed, knots: 8
Range, n miles: 1,400 at 6 kt
Complement: 1 JRC JMA-2253, I-band

Comment: Ketch with steel hull and aluminium masts. Acquired in 1999 for officer training at HMAS *Creswell*.

SALTHORSE 6/2002, Royal Australian Navy / 0528411

1 TRAINING SHIP (AXL)

Name	Builders	Launched
SEAHORSE MERCATOR	Tenix Shipbuilding, Henderson WA	15 Oct 1998

Displacement, tons: 165 full load.
Dimensions, feet (metres): 103.3 × 26.9 × 7.9 (31.5 × 8.2 × 2.4)
Main machinery: 2 Caterpillar 3412 diesels; 2 shafts
Speed, knots: 16
Range, n miles: 2,700 at 10 kt
Complement: 8 plus 18 trainees

Comment: Operated by Defence Maritime Services as a Navigation training ship based at Sydney. Similar to Pacific class patrol craft.

SEAHORSE MERCATOR 11/2008*, Chris Sattler / 1335634

TRAINING SHIPS

Notes: In addition to *Young Endeavour* (navy operated) and *Salthorse* there are five Fleet class yachts. Of 36.1 ft (11 m). GRP yachts named *Charlotte of Carberus*, *Friendship of Leeuwin*, *Scarborough of Carberus*, *Lady Penrhyn of Nirimba* and *Alexander of Creswell*. The names are a combination of Australia's first colonising fleet and the training base to which each yacht is allocated.

1 SAIL TRAINING SHIP (AXS)

Name	Builders	Launched	Commissioned
YOUNG ENDEAVOUR	Brooke Yachts, Lowestoft	2 June 1987	25 Jan 1988

Displacement, tons: 239 full load
Dimensions, feet (metres): 144 × 26 × 13 (44 × 7.8 × 4)
Main machinery: 2 Perkins V8 diesels, 334 hp (294 kW); 2 shafts
Speed, knots: 14 sail; 10 diesel
Range, n miles: 2,500 at 7 kt
Complement: 33 (9 RAN, 24 youth)

Comment: Built to Lloyds 100 AI LMC yacht classification by Brooke Yachts, Lowestoft. Sail area 707.1 m². Presented to Australia by UK Government as a bicentennial gift. Operated by RAN on behalf of the Young Endeavour Youth Scheme

AUXILIARIES

Notes: (1) Only *Sirius* and *Success* are navy operated. The rest have been contracted to the Defence Maritime Services. These craft have blue hulls and buff superstructures, and are chartered as required.

(2) In addition to the vessels listed there are some 24 workboats (AWB and NWB numbers), a VIP launch *Tresco II* and an admiral's barge *Admiral Hudson*.

1 SIRIUS CLASS (REPLENISHMENT TANKER) (AORH)

Name	No	Builders	Launched	Commissioned
SIRIUS (ex-Delos)	O 268	Hyundai Mipo Dockyard, Korea	12 Apr 2004	16 Sep 2006

Displacement, tons: 46,017 full load
Measurement, tons: 8,585 light
Dimensions, feet (metres): 621.7 x 101.7 x 34.5 (189.5 x 31.0 x 10.5)
Main machinery: 1 Hyundai B&W 6S 50MC diesel; 1 shaft; bow thruster
Speed, knots: 16.5
Range, n miles: 16,000 at 14 kt
Complement: 56 (8 officers)
Cargo capacity: Total volume in excess of 36,000 m³. Dry cargo capacity 240 tonnes
Guns: 5—12.7 mm MGs (Rafael Mini Typhoon 12.7 mm from 2010).
Radars: 2 Sperry Marine Bridgmaster-E; E/F/I-bands.

Helicopter: Platform for day/night operations.

Comment: Acquired as the replacement for the single-hulled *Westralia*, *Sirius* is a double-hulled ship built to Lloyd's standard. Bought new in June 2004 as *MT Delos* and subsequently leased for use as an oil tanker until September 2005. Contract for the conversion of the ship to military use awarded to Tenix Defence on 15 March 2005. The conversion included the addition of a flight deck and RAS equipment. The first RAN ship to carry the name *Sirius*, she is named after the flagship of the First Fleet which arrived in Australia in 1788. To remain in service until 2020.

SIRIUS 2/2007, Chris Sattler / 1167803

2 TRIALS AND SAFETY VESSELS (ASR)

Name	Builders	Commissioned
SEAHORSE STANDARD (ex-British Viking)	Marystown Shipyard, Newfoundland	1980
SEAHORSE SPIRIT (ex-British Magnus)	Marystown Shipyard, Newfoundland	1980

Measurement, tons: 2,090 grt; 1,835 dwt
Dimensions, feet (metres): 236.2 x 52.5 x 17.4 (72 x 16 x 5.3)
Main machinery: 2 MLW-ALCO Model 251 V-12 diesels; 5,480 hp(m) (4.03 MW); 1 shaft; cp prop; 2 stern and 2 bow thrusters
Speed, knots: 9
Complement: 20 plus 44 spare

Comment: Acquired 2 December 1998 by Defence Maritime Services to support RAN trials in Western and Southern Australian waters. Dynamic Positioning system. These ships are also used for weapon recovery and can embark the 'Remora' submarine rescue suite.

SEAHORSE SPIRIT 8/2008, Chris Sattler / 1139537

1 TRIALS AND SAFETY VESSEL (ASR)

Name	No	Builders	Commissioned
SEAHORSE HORIZON (ex-Protector, ex-Blue, Nabilla, ex-Osprey)	—(ex-ASR 241)	Stirling Marine Services, WA	1984

Displacement, tons: 670 full load
Dimensions, feet (metres): 140.1 x 31.2 x 9.8 (42.7 x 9.5 x 3)
Main machinery: 2 Detroit 12V-92TA diesels; 2,440 hp (1.82 MW) sustained; 2 Herdial cp props
Speed, knots: 11.5
Range, n miles: 10,000 at 11 kt
Complement: 6 civilian or 9 navy (for training)
Radars: Navigation: JRC 310; I-band. Decca RM 970BT, I-band.
Sonars: Klein; side scan; high frequency.

Helicopters: Platform for 1 light.

Comment: A former National Safety Council of Australia vessel commissioned into the Navy in November 1990. Used to support contractor's sea trials of the Collins class submarines, and for mine warfare trials and diving operations. LIPS dynamic positioning, two ROVs and a recompression chamber. Helicopter deck and a submersible were removed in 1992. Based at Jarvis Bay. Decommissioned in early 1998 and run as part of the commercial support programme. Also used for junior officer training.

SEAHORSE HORIZON 10/2006, Chris Sattler / 1164767

3 FISH CLASS (TORPEDO RECOVERY VESSELS) (YPT)

TUNAR TRV 801	TREVALLY TRV 802	TAILOR TRV 803
---------------	------------------	----------------

Displacement, tons: 91.6 full load
Dimensions, feet (metres): 88.5 x 20.9 x 4.5 (27 x 6.4 x 1.4)
Main machinery: 3 GM diesels, 890 hp (664 kW); 3 shafts
Speed, knots: 13
Complement: 9
Radars: Navigation: I-band.

Comment: All built at Williamstown completed between January 1970 and April 1971. Can transport eight torpedoes. Based at Jarvis Bay, Sydney and Fleet Base West respectively. Run as part of the commercial support programme from 1997. Blue hulls and buff superstructures.

TREVALLY 5/2006, Bob Fildes / 1158952

1 DURANCE CLASS (UNDERWAY REPLENISHMENT TANKER) (AORH)

Name	No	Builders	Laid down	Launched	Commissioned
SUCCESS	OR 304	Cockatoo Dockyard, Sydney	9 Aug 1980	3 Mar 1984	19 Feb 1986

Displacement, tons: 17,933 full load
Dimensions, feet (metres): 515.7 x 69.5 x 30.6 (157.2 x 21.2 x 8.6)
Main machinery: 2 SEMT Pielstick 16 PC2.5 V 400 diesels; 20,800 hp(m) (15.3 MW) sustained; 2 shafts; LIPS cp props
Speed, knots: 20
Range, n miles: 8,616 at 15 kt
Complement: 237 (25 officers)
Cargo capacity: 10,200 tons; 8,707 diesel, 975 Avcat; 116 distilled water; 57 victuals; 250 munitions including SM1 missiles and Mk 46 torpedoes; 95 naval stores and spares
Guns: 1 Vulcan Phalanx Mk 15 CIWS 7—12.7 mm MGs. Rafael Mini Typhoon 12.7 mm guns from 2010
Radars: Navigation: 2 Kelvin Hughes Type 1006, I-band

Helicopters: 1 AS 350B Squirrel, Sea King or Seahawk.

Comment: Based on French Durance class design. Replenishment at sea from four beam positions (two having heavy transfer capability) and vertrep. One LCVP is carried on the starboard side aft. Hanger modified to take Sea Kings. Phalanx gun fitted aft in 1997. The ship is to be replaced in about 2015.

SUCCESS 4/2008, Chris Sattler / 1139533

4 SELF-PROPELLED LIGHTERS (WFL/AOTL)

WARRIGAL 333 (ex-WFL 8001) **WOMBAT** 332 (ex-WFL 8003)
WALLABY 331 (ex-WFL 8002) **WYULDA** 334 (ex-WFL 8004)

Displacement, tons: 265 light; 1,206 full load
Dimensions, feet (metres): 124.6 × 33.5 × 12.5 (38 × 10.2 × 3.8)
Main machinery: 2 Harbourmaster outdrives (1 fwd, 1 aft)
Speed, knots: 8
Cargo capacity: 560 tons diesel and 200 tons water

Comment: First three were laid down at Williamstown in 1978. The fourth, for HMAS *Stirling*, was ordered in 1981 from Williamstown Dockyard. Used for water/fuel transport. Steel hulls with twin, swivelling, outboard propellers. *Warrigal* at Darwin; *Wombat* and *Wallaby* at Fleet Base East, *Wyulda* at Fleet Base West.

WALLABY 9/2007, Chris Sattler / 1167895

3 WATTLE CLASS STORES LIGHTERS (YE)

WATTLE CSL 01 **BORONIA** CSL 02 **TELOPEA** CSL 03

Displacement, tons: 147 full load
Dimensions, feet (metres): 79.4 × 32.8 × 5.4 (24.2 × 10.0 × 1.66)
Main machinery: 2 Caterpillar D333C diesels; 600 hp (447 kW)
Speed, knots: 8
Range, n miles: 320 at 8 kt
Radars: Navigation: 1 JRC JMA-2253; I-band.

Comment: Built by Cockatoo DY, Sydney and delivered in 1972. Employed to transport ammunition and stores. Equipped with 3-ton electric crane. CSL 02 and 03 based at Sydney and CSL 01 at Darwin.

TELOPEA 10/2006, Chris Sattler / 1164784

4 DIVING TENDERS (YDT/PB)

SEAL 2001 **MALU BAIZAM** 2003 **SHARK** 2004 **DUGONG** 21689

Displacement, tons: 22 full load
Dimensions, feet (metres): 65.5 × 18.5 × 4.6 (20 × 5.6 × 1.4)
Main machinery: 2 MTU 8V 183 diesels, 2 shafts
Speed, knots: 26
Range, n miles: 450 at 20 kt
Complement: 6 plus 16 divers

Comment: Built by Geraldton Boat Builders, Western Australia and completed in August 1993. Carry 2 tons of diving equipment to support 24 hour diving operations in depths of 54 m. *Shark* based at *Stirling*, *Seal* at *Waterhen* and *Dugong* at Sydney, *Malu Baizam* is based at Thursday Island in the Torres Strait and is navy manned. *Porpoise* grounded in 1995 and was assessed as being beyond economical repair. Replacement built in 1996. Run as part of the commercial support operation from 1997. Sister craft *Coral Snake* and *Red Viper* are operated by the Army

SEAL 3/2007, John Mortimer / 1335631

TUGS

Notes: In addition the two MSCD are used as tugs. Details under Mine Warfare Forces.

7 HARBOUR TUGS (YTL)

TAMMAR DT 2601 **BRONZEWING** HTS 501 (152) **MOLLYMAWK** HTS 504 (154)
QUOKKA DT 1801 **CURRAWONG** HTS 502 (153) **SEAHORSE** CHUDITCH
SEAHORSE QUENDA

Comment: *Tammar* has a bollard pull of 35 tons and is based at *Stirling*; *Quokka* bollard pull 8 tons, is based at Darwin. The three HTS vessels have a bollard pull of 5 tons. Run as part of the commercial support programme from 1997. *Seahorse Chuditch* and *Seahorse Quenda* were built in Malaysia and delivered in 2003. 23 m long they have a bollard pull of 16 tons.

CURRAWONG 8/2006, Chris Sattler / 1335630

QUOKKA 8/2006, Chris Sattler / 1335679

ARMY

Notes: (1) Operated by Royal Australian Army Corps of Transport. Personnel: About 300 as required
 (2) In addition to the craft listed below there are 159 assault boats 16.4 ft (5 m) in length and capable of 30 kt. Can carry 12 troops or 1,200 kg of equipment. Also there are 12 ex-US Army LARC-V amphibious wheeled lighters can operate with *Manoora* and *Kanimba* and have limited capability cooperate with *Tabrak* and LCHs. They will be able to operate with LHDs.
 (3) All LCM are to be replaced in about 2016 by new amphibious watercraft (JP 2048)

6 AMPHIBIOUS WATERCRAFT (LCM)

AB 2000–2005

Displacement, tons: 135 full load
Dimensions, feet (metres): 83.3 × 24.9 × 3.3 (25.4 × 7.6 × 1.0)
Main machinery: 2 Detroit 6062 diesels; 2 Doan waterjets
Speed, knots: 11
Range, n miles: 720 at 10 kt
Complement: 5
Guns: 2–12.7 mm MGs

Comment: Contract signed with ADI in June 2002 to provide watercraft to operate in conjunction with the LPAs. Two carried by each ship. Of aluminium construction, they have through-deck, roll-on/roll-off design and bow and stern ramps. With 65 tonne cargo capacity, the craft can carry five armoured vehicles

AB 2000 12/2004, Bob Fildes / 1153864

40 Australia/Army – Non-naval patrol craft

14 LCM 8 CLASS

AB 1050-1051, 1053, 1056, 1058-1067

Displacement, tons: 107 full load
Dimensions, feet (metres): 73.5 x 21 x 5.2 (22.4 x 6.4 x 1.6)
Main machinery: 2 8V92GM diesels; 720 hp (547 kW), 2 shafts
Speed, knots: 11
Range, n miles: 290 at 10 kt
Complement: 4
Military lift: 55 tons
Guns: 2—12.7 mm MGs.

Comment: Built by North Queensland Engineers, Cairns and Dillinghams, Fremantle to US design. Based at Townsville and Darwin. AB 1057 transferred to Tonga 1982, AB 1052 and AB 1054 sold to civilian use in 1992. All upgraded to Mod 2 standard by late 1999 with new engines and with endurance increased

AB 1056

10/2002, John Mortimer / 0528389

2 SAFCOL CRAFT

CORAL SNAKE AM 1353 RED VIPER

Displacement, tons: 22 full load
Dimensions, feet (metres): 65.5 x 20.0 x 4.6 (20 x 6.1 x 1.4)
Main machinery: 2 General Motors Detroit 8V92 diesels; 1,800 hp (1.34 MW)
Speed, knots: 28
Range, n miles: 350 at 25 kt
Complement: 3

Comment: Sister to Seal class built at Geraldton Boat Builders. Coral Snake delivered in 1994 and Red Viper in 1996. Used as Special Action Forces Craft Offshore Large (SAFCOL) to support dives and transport of stores and personnel

RED VIPER

7/2007, Mick Prendergast / 1167934

9 EXPRESS SHARK CAT CLASS (PB)

AM 237-244 AM 428

Comment: Built by NoosaCat, Queensland and delivered by 1995. Trailer transportable. Similar craft in service with Navy and Police. Multihulls 30.8 ft (9.4 m) in length overall with twin Johnson outboards; 450 hp (336 kW) total power output, giving 40 kt maximum speed

AM 243

11/1997, van Ginderen Collection / 0012946

NON-NAVAL PATROL CRAFT

Notes: (1) In addition to the commercial support craft already listed, various State and Federal agencies, including some fishery departments, have built offshore patrol craft up to 25 m and 26 kt.
 (2) Cocos Island patrol carried out by Sir Zelman Cowan of 47.9 x 14 ft (14.6 x 4.3 m), with two Cummins diesels; 20 kt, range 400 n miles at 17 kt, complement 13 (3 officers) Operated by West Australian Department of Harbours and Lights.
 (3) All previously listed RAAF craft have been sold for civilian use

4 SHARK CAT 800 CLASS (WORKBOATS) (YFL)

0801-0803 0805

Displacement, tons: 13.7 full load
Dimensions, feet (metres): 27.4 x 9.2 x 3.3 (8.35 x 2.8 x 1.0)
Main machinery: 2 Mercury outboard engines
Speed, knots: 30
Complement: 1 plus 11 passengers

Comment: Built by Shark Cat, Noosaville, Queensland and delivered in 1980s. GRP construction. Used for target-towing, naval police and range clearance duties. 0801 and 0802 based at Fleet Base East; 0803 and 0805 at HMAS Creswell

SHARK CAT 0801

9/2006, Chris Sattler / 1164782

4 NOOSACAT 930 WORKBOATS (YFL)

0901-0904

Dimensions, feet (metres): 30.5 x 11.5 x 2.3 (9.3 x 3.5 x 0.7)
Main machinery: 2 Volvo Penta A0Q41DP diesels; 2 props
Speed, knots: 30 **Range, n miles:** 240 at 20 kt

Comment: Built by Noosacat, Queensland and delivered in 1994. GRP hulled craft for general purpose stores and personnel transport. 0903 and 0904 based at Sydney, 0902 at HMAS Creswell and 0901 at HMAS Cerberus.

NOOSACAT 0904

CUSTOMS

Notes: (1) Surface Vessels: The Australian Customs Service (ACS) has initiated a study of a replacement vessel for the Bay class.

(2) Aircraft: The ACS manages its civil aerial surveillance programme through commercial contracts with Surveillance Australia (fixed wing), Australian Helicopters (Torres Strait) and Helicopters Australia (Gove). The new fixed wing aircraft fleet consists of six De Havilland Dash 8-202 and four Dash 8-315 equipped with radar, IR and EO sensors. These aircraft are either new or have been upgraded under Project Sentinel which provided the Dash 8 with new electro-optics and the Raytheon 2022 SAR/ISAR radar, as well as an integrated information management system and a range of other electronic sensors. The aircraft are based in Broome (WA), Darwin (NT), Horn Island (QLD - Torres Strait), Weipa (QLD) and Cairns (QLD). The ACS helicopter surveillance fleet consists of a Bell 412 and an AS350 Squirrel (Australian Helicopters) which are both based in the Torres Strait. A Eurocopter-145 helicopter is based in Gove (NT) in a rapid response and surveillance role.

DASH 8-200 6/2005, Massimo Anneti / 1153871

8 BAY CLASS (PB)

ROEBUCK BAY ACV 10	HERVEY BAY ACV 40	DAME ROMA MITCHELL ACV 70
HOLDFAST BAY ACV 20	CORIO BAY ACV 50	STORM BAY ACV 80
BOTANY BAY ACV 30	ARNHEM BAY ACV 50	

Displacement, tons: 134
Dimensions, feet (metres): 125.3 x 23.6 x 7.9 (38.2 x 7.2 x 2.4)
Main machinery: 2 MTU 16V 2000M 70 diesels, 2,856 hp(m) (2.1 MW) sustained; 2 shafts.
 1 Vosper Thornycroft bow thruster
Speed, knots: 24
Range, n miles: 1,000 at 20 kt
Complement: 12
Radars: Surface search: Racal Decca; E/F and I band.
Sonars: Wesmar SS 390E dipping sonar

Comment: Built by Austal Ships and delivered from February 1999 to August 2000. The craft carry two RIBs capable of 35 kt.

CORIO BAY 7/2008*, John Mortimer / 1335677

1 OFFSHORE PATROL VESSEL (PSO)

Name	Builders	Commissioned
OCEANIC VIKING	Flekkefjord Slip & Maskinfabrik AS, Norway	1996

Displacement, tons: 12,698 full load
Measurement, tons: 9,075 grt
Dimensions, feet (metres): 346.4 x 72.2 x 22.3 (105.6 x 22.0 x 6.8)
Main machinery: 2 Wärtsilä 12V 28 B diesels; 10,770 hp (7.9 MW). 2 shafts; bow and stern thrusters; bow and midships azimuth propellers
Speed, knots: 18
Range, n miles: 33,800 at 12 kt
Complement: 20 plus 35 government officials
Guns: 2 - 12.7 mm MGs.
Radars: Surface search, Kelvin Hughes 6000R2/S-U; E/F band.
Navigation: Kelvin Hughes 6000A/1/6-U; I-band.

Comment: Originally built as a cable-laying vessel. Chartered by the Customs Service to conduct patrols in the Southern Ocean particularly in the vicinity of Australian waters surrounding Heard Island and McDonald Islands. Also available for general border protection tasks. Usually carries fisheries officers and an armed boarding party. Equipped with infra-red camera for low-light and night vision. Carries three high-speed craft for boarding, interception and surveillance.

OCEANIC VIKING 1/2007, ACS / 1167437

1 OFFSHORE PATROL VESSEL (PSOH)

Name	Builders	Commissioned
TRITON	Vosper Thornycroft, Woolston	Sep 2000

Displacement, tons: 1,100 full load
Measurement, tons: 2,236 grt
Dimensions, feet (metres): 323.8 x 73.8 x 10.5 (98.7 x 22.5 x 3.2)
Main machinery: Diesel-electric; 2 Paxman 12V 185 diesel generators; 5,364 hp (4 MW); 1 HMA motor; 4,700 hp (3.5 MW); 1 shaft (centreline); 2 HMA motors, 938 hp (700 kW); 2 Schottel propulsors (outer hulls)
Speed, knots: 20; 8 (outer propulsors)
Range, n miles: 17,000 at 10 kt
Complement: 14 plus 30 government officials
Guns: 2 - 12.7 mm MGs
Radars: Surface search/navigation: Grumman Sperry Marine Bridgemaster E, E/F/I bands

Helicopters: Platform for 1 medium

Comment: Originally built as trimaran hull demonstrator vessel for the UK MoD research agency. Following five years of trials, sold to Gardline Shipping in 2005 and thereafter acted as a hydrographic survey vessel for the UK Maritime and Coast Guard Agency. Contracted in early 2007 by the Australian Customs Service to act as an offshore patrol vessel in northern waters from Broome, West Australia, to Cairns, Queensland. It carries two 7 m high-speed interception craft.

TRITON 12/2006, Gardline Shipping Ltd / 1167431

1 OFFSHORE PATROL VESSEL (PBO)

ASHMORE GUARDIAN ACV 110

Measurement, tons: 339 grt
Dimensions, feet (metres): 114.5 x 26.2 x 7 (34.9 x 8.0 x 2)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 10
Complement: 6 plus 10 government officials
Radars: Surface search/navigation. To be announced.

Comment: Modified commercial fleet support ship chartered by Border Defence Command to protect offshore maritime areas off north-western Australia. Priority tasks are environmental protection and the prevention of illegal fishing and people smuggling. The vessel is stationed at the Ashmore Reef National Nature Reserve and Cartier Island Marine Reserves. The ship is equipped with two 7 m RHIBs

ASHMORE GUARDIAN 12/2008*, Australian Customs Service / 1335635

Azerbaijan

Country Overview

Formerly part of the USSR, the Republic of Azerbaijan declared its independence in 1991. Situated in the Transcaucasia region of western Asia, the country, which includes the disputed region of Nagorno-Karabakh, has an area of 33,400 square miles and is bordered to the north by Russia and Georgia and to the south with Iran. Armenia to the west includes the

exclave of Nakhichevan. Azerbaijan has a coastline of 398 n miles with the Caspian Sea on which Baku, the capital and largest city, is the principal port. Maritime claims in the Caspian Sea have yet to be resolved. Coast Guard formed in July 1992 with ships transferred from the Russian Caspian Flotilla and Border Guard. Operational control and maintenance was assumed by Russia 1995–99 but since then, the Azari Navy has taken back full responsibility. During 2003 there were

increasing signs of a drive to improve effectiveness, reflecting heightened tensions in the Caspian Sea. US assistance has been granted as part of the Caspian Guard initiative.

FRIGATES

1 PETYA II (PROJECT 159A) CLASS (FFL)

BAKINETS (ex-SKR 16) G 121

Displacement, tons: 950 standard, 1,180 full load
Dimensions, feet (metres): 268.3 × 29.9 × 9.5 (81.8 × 9.1 × 2.9)
Main machinery: CODAG: 2 gas turbines; 30,000 hp (m) (22 MW); 1 Type 61V-3 diesel; 6,400 hp (m) (3.97 MW) sustained; centre shaft, 3 shafts
Speed, knots: 32
Range, n miles: 4,870 at 10 kt
Complement: 98 (8 officers)

Guns: 4–3 in (76 mm)/69 AK 726 (2 twin); 90 rds/min to 15 km (8 n miles); weight of shell 5.9 kg. 4–30 mm/65 (2 twin) AK 230; 500 rds/min to 5 km (2.7 n miles), weight of shell 0.54 kg
A/S mortars: 2 RBU 6000 12-tubed trainable; range 6,000 m; warhead 31 kg
Mines: Can carry 22
Countermeasures: ESM.

Radars: Air/surface search. Strut Curve; F-band
Navigat on: I-band.

Comment: Probably transferred from the Russian Caspian Flotilla in 1992. The bridge superstructure has been extended aft to provide another deck at 01 level. The removal of the funnel suggests that there may be an underwater exhaust system. There appears not to be a fire-control radar.

3 PETRUSHKA (UK-3) CLASS (PB/AXL)

P 213–215

Displacement, tons: 335 full load
Dimensions, feet (metres): 129.3 × 27.6 × 7.2 (39.4 × 8.4 × 2.2)
Main machinery: 2 Wole H12 diesels; 756 hp (m) (556 kW); 2 shafts
Speed, knots: 11
Range, n miles: 1,000 at 11 kt
Complement: 13 plus 30

Comment: Built as training ships at Wisla Shipyard, Poland. Probably operated both in the training and patrol ship role.

P 214

7/2008*, *M Globke* / 1335/03

1 LUGA CLASS (PROJECT 888) (PB/AXT)

T 710 (ex-Oka)

Displacement, tons: 1,697 standard; 1,820 full load
Dimensions, feet (metres): 234.3 × 38.1 × 14.8 (77.4 × 11.6 × 4.5)
Main machinery: 2 Zgoda-Sulzer 6TD48 diesels; 2,650 hp(m) (1.95 MW) sustained; 2 shafts, cp props
Speed, knots: 16
Range, n miles: 7,200 at 11 kt
Complement: 56 (24 officers)
Guns: 4 ZU-23-2MR Wrabel 23 mm (2 twin).
Radars: Navigation: 2 Don 2; I-band.

Comment: Built at Gdansk, Poland in 1976-77. Of same general design as Polish Wodnik class ships with an extra deck and a larger superstructure. Probably employed in both training and patrol ship roles.

AMPHIBIOUS FORCES**2 POLNOCHNY B CLASS (PROJECT 771) (LSM)**

D 432 (ex-MDK 36) D 433 (ex-MDK 37)

Displacement, tons: 760 standard; 834 full load
Dimensions, feet (metres): 246.1 × 31.5 × 7.6 (78 × 9.6 × 2.3)
Main machinery: 2 Kolomna Type 40-D diesels; 4,400 hp(m) (3.2 MW) sustained; 2 shafts
Speed, knots: 18
Range, n miles: 1,000 at 18 kt
Complement: 42
Military lift: 180 troops; 350 tons including up to 6 tanks
Guns: 2—30 mm/65 (twin) AK 230; 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.
 2—140 mm 18-tubed rocket launchers.
Radars: Navigation, Don 2, I-band.
Fire control: Drum Tilt; H/I-band.
IFF: Square Head High Pole B.

Comment: Built in Poland 1968-70. Tank deck covers 237 m².

D 432 6/2008* / 1335326

1 POLNOCHNY A (PROJECT 770) CLASS (LSM)

D 431 (ex-MDK 107)

Displacement, tons: 800 full load
Dimensions, feet (metres): 239.5 × 27.9 × 5.8 (73 × 8.5 × 1.8)
Main machinery: 2 Kolomna Type 40-D diesels; 4,400 hp(m) (3.2 MW) sustained; 2 shafts
Speed, knots: 19
Range, n miles: 1,000 at 18 kt
Complement: 40
Military lift: 6 tanks; 350 tons
Guns: 2 USSR 30 mm/65 (twin); 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.
 2—140 mm rocket launchers; 18 barrels to 9 km (4.9 n miles)
Radars: Surface search, Decca; I-band.
Fire control: Drum Tilt; H/I-band.

Comment: Built at Northern Shipyard, Gdansk in the late 1960s.

POLNOCHNY CLASS (Egyptian colours) 10/2000, F Sadek / 0103742

Comment: Transferred from US Coast Guard on 28 February 2003.

POINT CLASS 6/2008* / 133579

1 ZHUK (GRIF) CLASS (PROJECT 1400M) (PB)

P 222 (ex AK 55)

Displacement, tons: 39 full load
Dimensions, feet (metres): 78.7 x 16.4 x 3.9 (24 x 5 x 1.2)
Main machinery: 2 Type M 401B diesels, 2,200 hp(m) (1.6 MW) sustained; 2 shafts
Speed, knots: 30
Range, n miles: 1,100 at 15 kt
Complement: 13
Guns: 2–14.5 mm (twin), 1–12.7 mm MG
Radars: Surface search: Spin Trough; I-band.

Comment: Ex-Russian craft built in the 1970s.

ZHUK CLASS (Ukraine colours) 7/2000, Hartmut Ehlers / 0106655

Bahamas

Country Overview

The Commonwealth of the Bahamas gained independence in 1971; the British monarch, represented by a governor-general, is head of state. Situated in the west Atlantic Ocean, it comprises about 700 islands and islets, and nearly 2,400 cays and rocks which stretch between Florida and Hispaniola. About 30 of the islands are inhabited. The capital, Nassau, is on New Providence Island which contains more than half of the total population. Grand Bahama, the most northerly of the group, is the second

major island. An archipelagic regime, territorial seas (12 n miles) and a fishery zone (200 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits are not defined.

Headquarters Appointments

Commander Royal Bahamas Defence Force:
 Commodore Clifford Scaveia
Squadron Commanding Officer:
 Commander Samuel Evans

Bases

HMBS Coral Harbour (New Providence Island)
 HMBS Matthew Town (Great Inagua Island)

Personnel

PATROL FORCES

Notes: There are three interception craft P 121–123

2 BAHAMAS CLASS

Name	No	Builders	Commissioned
BAHAMAS	P 60	Moss Point Marine, Escatawpa	27 Jan 2000
NASSAU	P 61	Moss Point Marine, Escatawpa	27 Jan 2000

Displacement, tons: 375 full load
Dimensions, feet (metres): 198.8 x 29.2 x 8.5 (60.6 x 8.9 x 2.6)
Main machinery: 3 Caterpillar 3516B diesels, 6,600 hp(m) (4.85 MW); 3 shafts
Speed, knots: 24
Range, n miles: 3,000 at 10 kt
Complement: 35 plus 28 spare
Guns: 1 Bushmaster 25 mm, 3–12.7 mm MGs
Radars: Surface search/Navigation, Decca Bridgmaster Type 656-14/CAB; I band.

Comment: Order placed 14 March 1997 with Halker Marine Group. Aluminium superstructures fabricated at Equitable Shipyards while hulls built at Moss Point. The design is an adapted Vosper International Europatrol 250 with a RIB and launching crane at the stern. Based at Nassau.

BAHAMAS 6/2003, Marco Ghiglino / 1129991

1 CHALLENGER CLASS (PB)

P 41

Displacement, tons: 8 full load
Dimensions, feet (metres): 27 x 5.5 x 1 (8.2 x 1.7 x 0.3)
Main machinery: 2 Evinrude outboards; 450 hp (330 kW)
Speed, knots: 26
Complement: 4
Guns: 1 7.62 mm MG.

Comment: Built by Boston Whaler Edgewater, Florida and delivered in September 1995 GRP hull.

P 41 9/1996, RBDF / 0056530

46 Bahamas/Patrol forces

1 PROTECTOR CLASS (PB)

Name	No	Builders	Commissioned
YELLOW ELDER	P 03	Fairey Marine, Cowes	20 Nov 1986

Displacement, tons: 110 standard; 180 full load
Dimensions, feet (metres): 108.3 × 22 × 6.9 (33 × 6.7 × 2.1)
Main machinery: 3 Detroit 16V-149TI diesels; 3,483 hp (2.6 MW) sustained; 3 shafts
Speed, knots: 30
Range, n miles: 300 at 24 kt, 600 at 14 kt on 1 engine
Complement: 20 (3 officers) plus 5 spare
Guns: 1 Rheinmetall 20 mm 3—7.62 mm MGs.
Radars: Surface search, Furuno; I-band.

Comment: Ordered December 1984. Steel hull. One RIB is carried and can be launched by a trainable crane. Based at Coral Harbour. *Port Nelson* and *Samana* decommissioned in 2007.

PROTECTOR CLASS 4/1996, RBDF / 0018527

1 ELEUTHERA (KEITH NELSON) CLASS (PB)

Name	No	Builders	Commissioned
INAGUA	P 27	Vosper Thornycroft	10 Dec 1979

Displacement, tons: 30 standard; 37 full load
Dimensions, feet (metres): 60 × 15.8 × 4.6 (18.3 × 4.8 × 1.4)
Main machinery: 2 Caterpillar 3408BTA diesels; 1,070 hp (800 kW) sustained; 2 shafts
Speed, knots: 20
Range, n miles: 650 at 16 kt
Complement: 11
Guns: 3—7.62 mm MGs
Radars: Surface search, Furuno; I-band.

Comment: The survivor of a class of five. Light machine guns mounted in sockets either side of the bridge. One more is used as a museum. Main engine replaced in 1990

INAGUA 6/1998, RBDF / 0017574

2 DAUNTLESS CLASS (INSHORE PATROL CRAFT) (PB)

P 42 P 43

Displacement, tons: 11 full load
Dimensions, feet (metres): 40.4 × 14 × 4.3 (12.3 × 4.3 × 1.3)
Main machinery: 2 Caterpillar 3208TA diesels; 870 hp (650 kW) sustained; 2 shafts
Speed, knots: 25
Range, n miles: 600 at 16 kt
Complement: 5
Guns: 2—7.62 mm MGs.
Radars: Furuno 1761; I-band.

Comment: Built by SeaArk Marine, Monticello, Arkansas and delivered in January 1996 Aluminium construction. Used primarily for medium-range search and rescue missions. Based at Coral Harbour.

P 43 6/1999, RBDF / 0081453

4 BOSTON WHALERS (PBF)

P 110-113

Displacement, tons: 1.5 full load
Dimensions, feet (metres): 20 × 7.2 × 1.1 (6.1 × 2.2 × 0.4)
Main machinery: 2 Evinrude outboards; 180 hp (134 kW) (P 110-111); 2 Meriner outboards; 150 hp (120 kW) (P 112-113)
Speed, knots: 45 (P 110-111); 38 (P 112 113)
Complement: 3

Comment: P 110 and 111 are impact designs commissioned 25 September 1995. P 112 and 113 are Wahoo types commissioned 23 October 1995.

P 110 and P 111 9/1997, RBDF / 0012053

P 113 6/1999, RBDF / 0081454

2 SEA ARK 49 ft CUTTERS (PB)

P 48-49

Displacement, tons: 16.5 full load
Dimensions, feet (metres): 49.0 × 16.0 × 4.5 (14.9 × 5.25 × 1.4)
Main machinery: 2 Caterpillar C-12 diesels; 1,320 hp (984 kW); 2 shafts
Speed, knots: 30
Range, n miles: 300 at 12 kt
Complement: 6
Radars: Navigation, Furuno; I band.

Comment: Sea Ark Dauntless RAM design. Aluminium construction. Donated by the US on 26 May 2006. Delivered on 18 July 2008.

P 48 6/2008, SeaArk Marine / 1298814

Bahrain

Country Overview

Formerly under British control from 1861, Bahrain gained its independence in 1971. Situated in the southern Gulf, with which it has a coastline of 87 n miles, the country comprises a group of 33 islands between the Qatar Peninsula to the east and Saudi Arabia to the west. The principal islands include Bahrain (217 square miles), Al Muharraq, Umm an Na'san, Sitrah, Jiddah and the Hawar group. The capital, largest city and principal port is Manama. Territorial seas (12 n miles) are claimed. An EEZ has not been claimed.

Headquarters Appointments

Chief of Staff

Major General Shaikh Abdulrah Bin Salman Bin Khalid A. Khalifa

Headquarters Appointments – continued

Commander of Navy:
Brigadier Abdulla al Mansoori
Director of Coast Guard:
Colonel Ala Abdulla Seyad

SABHA (ex-Jack Williams)	90 (ex-FFG 24)	Bath Iron Works	25 Feb 1980	30 Aug 1980	19 Sep 1981	25 Feb 1997

Displacement, tons: 2,750 light; 3,638 full load
Dimensions, feet (metres): 446 × 45 × 14.8, 24.5 (sonar)
(135.6 × 13.7 × 4.5; 7.5)

Main machinery: 2 GE LM 2500 gas turbines; 41,000 hp (30.59 MW) sustained; 1 shaft, cp prop
2 auxiliary retractable props; 650 hp (484 kW)

Speed, knots: 29. **Range, n miles:** 4,500 at 20 kt

Complement: 206 (13 officers) including 19 aircrew

Missiles: SSM: 4 McDonnell Douglas Harpoon; active radar homing to 90 km (52 n miles) at 0.9 Mach; warhead 227 kg
SAM: 36 GDC Standard SM-1MR Block VI; command guidance; semi-active radar homing to 38 km (20.5 n miles) at 2 Mach.

1 Mk 13 Mod 4 launcher for both SSM and SAM missiles
Guns: 1 OTO Melara 3 in (76 mm)/62 Mk 75 85 rds/min to 16 km (8.7 n miles) anti-surface, 12 km (6.6 n miles) anti-aircraft; weight of shell 6 kg

1 General Electric/General Dynamics 20 mm/76 6-barrelled Mk 15 Vulcan Phalanx 3,000 rds/min (4,500 in Block 1) combined to 1.5 km.
4–12 7 mm MGs

Torpedoes: 8–324 mm Mk 32 Mod 7 (2 triple) tubes
24 Honeywell Mk 46; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt, warhead 44 kg.

Countermeasures: Decoys: 2 Loral Hycoor SRBOC 6-barrelled fixed Mk 36; IR flares and chaff to 4 km (2.2 n miles).
SLQ-25 Nixie, torpedo decoy.

SABHA

(Scale 1 : 1,200), Ian Sturton / 0056537

ESM/ECM: SLQ-32(V)2 radar warning. Sidekick modification adds jammer and deception system.

Combat data systems: NTDS with Link 14. INMARSAT

Weapons control: SWG-1 Harpoon LCS. Mk 92 (Mod 4).

The Mk 92 is the US version of the Signal WM28 system.

Mk 13 weapon direction system. 2 Mk 24 optical directors.

Radars: Air search: Raytheon SPS-49(V)4 C-band; range 467 km (250 n miles).

Surface search: ISC Cardion SPS-55 I-band.

Fire control: Lockheed STIR (modified SPG-60) WJ-band, range 110 km (60 n miles).

Sperry Mk 92 (Signal WM28) WJ-band.

Tacan: URN 25.

Sonars: Raytheon SQS-56; hull-mounted, active search and attack; medium frequency.

Helicopters: 1 Eurocopter BO 105. Space for 2 SH-2G

Programmes: *Sabha* transferred from the US by grant 18 September 1986. Arrived in the Gulf in June 1997 for a work-up and training period. Transfer of a second ship is unlikely.

Structure: Apart from the removal of the US SATCOM aerials there are no visible changes from US service.

Operational: A transfer of helicopters is required if the ASW potential of the ship is to be realised.

AL MUHARRAQ

Displacement, tons: 90 standard, 103 full load
Dimensions, feet (metres): 98.5 × 21 × 5.5 (30 × 6.4 × 1.6)
Main machinery: 2 Detroit 16V-149TI diesels; 2,322 hp (1.73 MW) sustained, 2 shafts
Speed, knots: 26
Range, n miles: 500 at 22 kt
Complement: 9
Guns: 2—7.62 mm MGs,
 1 Hughes chain 7.62 mm.
Radars: Surface search: Racal Decca, I-band

Comment: Ordered from Souters, Cowes, Isle of Wight in 1984. Laid down November 1984, launched 12 August 1985, shipped 21 October 1985. GRP hull.

AL MUHARRAQ

4/2003, A Sharma / 0568841

4 HALMATIC 20 METRE CLASS (WPB)

DERA'A 2 DERA'A 6 DERA'A 7 DERA'A 8

Displacement, tons: 31.5 full load
Dimensions, feet (metres): 65.9 × 19.4 × 5.1 (20.1 × 6.9 × 1.5)
Main machinery: 2 MTU 8V 2000 M92 diesels; 2,170 hp (1.6 MW) sustained; 2 shafts
Speed, knots: 29
Range, n miles: 500 at 20 kt
Complement: 7
Guns: 1—12.7 mm MG 2—7.62 mm MGs.

Comment: Three delivered in late 1991, the last in early 1992. GRP hulls. All four craft underwent a mid-life refit at Abu Dhabi shipbuilding 2008–09.

DERA'A 8 11/2008*, John Fidler / 1335639

2 WASP 20 METRE CLASS (WPB)

DERA'A 4 DERA'A 5

Displacement, tons: 36.3 full load
Dimensions, feet (metres): 65.8 × 16.4 × 4.9 (20 × 5 × 1.5)
Main machinery: 2 Detroit 12V-71TA diesels; 840 hp (626 kW) sustained; 2 shafts
Speed, knots: 24.5
Range, n miles: 500 at 20 kt
Complement: 8
Guns: 2 7.62 mm MGs
Radars: Surface search: Racal Decca; I-band

Comment: Built by Souters, Cowes, Isle of Wight. Delivered 1983. GRP hulls.

DERA'A 4 6/2000, Bahrain Coast Guard / 0104206

6 HALMATIC 160 CLASS (WPB)

SAIF 5–10

Displacement, tons: 17 full load
Dimensions, feet (metres): 47.2 × 12.8 × 3.9 (14.4 × 3.9 × 1.2)
Main machinery: 2 MTU S6062 06N04M diesels; 950 hp (708 kW) sustained; 2 shafts
Speed, knots: 27
Range, n miles: 500 at 20 kt
Complement: 4
Guns: 1 7.62 mm MG.
Radars: Surface search: Furuno; I-band

Comment: Built by Halmatic, UK, and delivered in 1990–91. GRP hulls. All six craft underwent a mid-life refit at Abu Dhabi Shipbuilding 2008–09.

SAIF 10 10/2008*, John Fidler / 1335637

4 FAIREY SWORD CLASS (WPB)

SAIF 1–4

Displacement, tons: 15
Dimensions, feet (metres): 44.9 × 13.4 × 4.3 (13.7 × 4.1 × 1.3)
Main machinery: 2 GM 8V-71 diesels; 590 hp (440 kW) sustained; 2 shafts
Speed, knots: 22
Complement: 6
Radars: Navigation: Furuno; I-band.

Comment: Purchased in 1980. Built by Fairey Marine Ltd.

SAIF 3 11/1999, Bahrain Coast Guard / 0056543

2 HAWAR CLASS (PB)

HAWAR 1 HAWAR 2

Displacement, tons: 10.5 full load
Dimensions, feet (metres): 40.7 × 13.0 × 2.3 (12.4 × 4.0 × 0.7)
Main machinery: 2 Cummins 6CTA8.3 diesels
Speed, knots: 30
Guns: 1—7.62 mm MG

Comment: Entered service in 2003.

HAWAR 1 6/2003, John Fidler / 0167903

1 SUPPORT CRAFT (YAG)

SAFRA 3

Displacement, tons: 165 full load
Dimensions, feet (metres): 85 × 25.9 × 5.2 (25.9 × 7.9 × 1.6)
Main machinery: 2 Detroit 16V-92TA diesels; 1,380 hp (1.03 MW); 2 shafts
Speed, knots: 13 **Range, n miles:** 700 at 12 kt
Complement: 6
Radars: Navigation: Racal Decca; I-band

Comment: Built by Halmatic, Havant and delivered in early 1992. Logistic support work boat equipped for towing and firefighting. Can carry 15 tons.

SAFRA 3 4/2003, A Sharma / 0568840

1 LANDING CRAFT (LCM)

SAFRA 2

Displacement, tons: 150 full load
Dimensions, feet (metres): 73.9 × 24.6 × 4 (22.5 × 7.5 × 1.2)
Main machinery: 2 General Motors 8V92N diesels; 780 hp (575 kW); 2 shafts
Speed, knots: 6
Complement: 8
Radars: Navigation: Furuno; I-band.

Comment: Fairey Marine Loadmaster II class which was delivered in 1981. Based at Bandar-Dar. Similar to craft in naval service.

52 Bahrain/Coast guard — Bangladesh/Submarines

3 WASP 11 METRE CLASS (WPB)

SAHAM 1-3

Displacement, tons: 7 full load
Dimensions, feet (metres): 36.1 × 10.5 × 2.6 (11 × 3.2 × 0.8)
Main machinery: 2 Yamaha outboards; 400 hp(m) (294 kW)
Speed, knots: 25
Complement: 3
Radars: Navigation: I-band.

Comment: Built by Souters, Cowes in 1983.

SAHAM 2

10/1997, Bahrain Coast Guard / 0012061

4 RODMAN 20 M CLASS (PB)

DERA'A 11-14

Displacement, tons: 33 full load
Dimensions, feet (metres): 67.2 × 16.2 × 7.4 (20.5 × 4.93 × 2.25)
Main machinery: 2 MTU 8V 2000 M92 diesels; 2,170 hp (1.6 MW), 2 shafts
Speed, knots: 30
Complement: 11
Guns: 1—12.7 mm MG 2—7.62 mm MGs
Radars: Navigation: I-band.

Comment: Built by Rodman, Spain, and delivered 2008-09.

DERA'A 11

11/2008, John Fidler / 1335638

Bangladesh

Country Overview

The People's Republic of Bangladesh, formerly East Pakistan, proclaimed independence in 1971. Situated in south Asia and with an area of 55,598 square miles, most of its land border is with India (cutting off north-east India from the rest). There is a short border with Myanmar to the south-east. Its 313 n mile coastline is with the Bay of Bengal on which the principal port of Chittagong is situated. The capital and largest city is Dhaka. Territorial waters (12 n miles) are claimed. An EEZ (200 n miles) has been claimed but the limits have not been defined.

Headquarters Appointments

Chief of Naval Staff:
 Vice Admiral Sarwar Jahan Nizam
Assistant Chief of Naval Staff (Operations):
 Rear Admiral Abu Sayed Mohammed Abdul Awal
Assistant Chief of Naval Staff (Personnel):
 Rear Admiral Mohammed Farid Habib
Assistant Chief of Naval Staff (Materials):
 Commodore Abul Khair Chowdhury
Assistant Chief of Naval Staff (Logistics):
 Commodore H Habibur Rahman Bhuiyan

Senior Appointments

Naval Administrative Authority, Dhaka:
 Commodore Mudasser Nasir
Commodore Commanding BN Flotilla:
 M Anwarul Islam
Commodore Commanding Chittagong:
 Commodore Zahir Uddin Ahmed
Commodore Commanding Khulna:
 Commodore M Mohiuddin Razib
Director General Coast Guard:
 Commodore M A K Azad
Commodore Superintendent, Dockyard:
 Commodore M M Jasimuddin Bhuiyan

Bases

Chittagong (BNS *Issa Khan*, BN Dockyard, Naval Stores Depot, Chittagong, BNS *Ulka*, Bangladesh Naval Academy, BNS *Patenga*, BNS *Bhatri*, Naval Units *Cox's Bazar*, *Chanua* and *St Martins*), Kaptai (BNS *Shaheed Moazzam*), Dhaka (NHQ, BNS *Hajj Mohsin* and Naval Unit *Paglia*), Khulna (BNS *Titumir*, BNS *Mongla*, BNS *Upasham*, Forward Bases *Khepupara* and *Hiron Point*).

Personnel

(a) 2009: 12,150 (1,300 officers)
 (b) Voluntary service

Strength of the Fleet

Type	Active	Building
Frigates	5	—
Fast Attack Craft (Missile)	9	—
Fast Attack Craft (Torpedo)	8	—
Fast Attack Craft (Gun)	13	—

SUBMARINES

Notes: Plans to acquire a submarine service were announced by the Defence Minister in April 2004 but there has been little apparent development of the programme.

FRIGATES

Notes: Replacement of the Salisbury and Leopard class frigates is a high priority although timescales have not been announced

1 MODIFIED ULSAN CLASS

Name	No	Builders	Laid down	Launched	Commissioned	Recommissioned
KHALID BIN WALID (ex: <i>Bangabandhu</i>)	F 25	Daewoo Heavy Industries	12 May 1999	29 Aug 2000	20 June 2001	12 July 2007

Displacement, tons: 2,170 standard; 2,370 full load
Dimensions, feet (metres): 340.3 x 41 x 12.5 (103.7 x 12.5 x 3.8)
Main machinery: CODAD: 4 SEMT-Pielstick 12V PA6V280 STC diesels; 22,501 hp (16.78 MW) sustained; 2 shafts
Speed, knots: 25
Range, n miles: 4,000 at 18 kt
Complement: 186 (16 officers)

Missiles: 4 Otomat Mk 2 ●, command guidance; active radar homing to 180 km (97.2 n miles), at 0.9 Mach; warhead 210 kg; sea-skimmer.
SAM: 1 HQ-7 (FM-90N); line of sight guidance to 13 km (7 n miles) at 2.4 Mach; warhead 14 kg
Guns: 1 Otobreda 3 in (76 mm) 62 Super Rapid ●, 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.
 4 Otobreda 40 mm/70 (2 twin) compact ●, 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg
Torpedoes: 6—324 mm 8-515 (2 triple) tubes ●, Whitehead A244S; anti-submarine; active/passive homing to 7 km (3.8 n miles); warhead 34 kg (shaped charge).
Countermeasures: Decoys: 2 Super Barricade launchers ●. ESM: Racal Cutlass 242, intercept.
 ECM: Racal Scorpion; jammer.
Combat data systems: Thales TACTICOS

KHALID BIN WALID

(Scale 1 : 900), Ian Sturton / 0130076

Weapons control: Signaal Mirador optronic director ●
Radars: Air search: Signaal DA08 ●, F-band.
 Surface search: Thales Variant, G-band
Fire control: Signaal Lirod Mk 2; K-band.
Navigation: 2 KH-1007, I-band
Sonars: STN Atlas ASO 90; hull-mounted, active search, medium frequency.
Helicopters: Hangar and platform for operation of 'Lynx' sized helicopter.

Programmes: Modified Ulsan class ordered from Daewoo in March 1998. Arrived at Chittagong on 16 June 2001.
Operational: The ship was decommissioned on 13 February 2002 for design modification, warranty repairs and capability upgrades. This included installation of FM-90N, the export version of the Chinese HQ-7 SAM system. A period of uncertainty, during which the ship's future was kept under review, followed. This ended on 12 July 2007 when the ship was recommissioned.

KHALID BIN WALID

KHALID BIN WALID

6/2001, Daewoo / 0094449

1 OSMAN (JIANGHU I) CLASS (TYPE 053 H1) (FFG)

Name	No	Builders	Laid down	Launched	Commissioned
OSMAN (ex-Xiangtan)	F 18 (ex-556)	Hudong Shipyard, Shanghai	1986	Dec 1988	4 Nov 1989

Displacement, tons: 1,425 standard; 1,702 full load
Dimensions, feet (metres): 338.6 × 35.4 × 10.2
 (103.2 × 10.7 × 3.1)
Main machinery: 2 Type 12 E 380V diesels; 16,000 hp(m)
 (11.9 MW) sustained; 2 shafts
Speed, knots: 26
Range, n miles, 2,700 at 18 kt
Complement: 300 (27 officers)

Missiles: SSM: 8 C-802 (YK-83 (CSS-N-8 Saccade)) ● mid-course guidance and active radar homing to 150 km (81 n miles) at 0.9 Mach; warhead 165 kg
Guns: 4 China 3.9 in (100 mm)/56 (2 twin) ●; 25 rds/min to 22 km (12 n miles); weight of shell 15.6 kg
 8 China 37 mm/76 (4 twin) ●; 180 rds/min to 8.5 km (4.6 n miles) anti-aircraft; weight of shell 1.42 kg.
A/S mortars: 2 RBU 1200 5-tubed fixed launchers ●, range 1,200 m; warhead 34 kg.
Depth charges: 2 BMB-2 projectors; 2 racks.
Mines: Can carry up to 60.
Countermeasures: Decoys: 2 Loral Hycor SRBOC Mk 36 6-barreled chaff launchers
ESM: Watchdog; radar warning.
Weapons control: Wok Won director (752A) ●

OSMAN (before conversion to C-802)

(Scale 1 : 900), Ian Sturton / 0130383

Radars: Air/surface search: MX 902 Eye Shield (922-1) ●; G-band.
 Surface search/fire control: Square Tie (254) ●; I-band.
 Navigation: Fin Curve (352); I-band.
 IFF: High Pole A.
Sonars: Echo Type 5; hull-mounted; active search and attack; medium frequency.

Modernisation: C-802 missiles replaced HY-2 (C-201) missiles in 2007.

Structure: This is a Jianghu Type I (version 4) hull with twin 100 mm guns (vice the 57 mm in the ships sold to Egypt), Wok Won fire-control system and a rounded funnel.

Operational: A test-firing of C-802 was carried out on 12 May 2008.

Programmes: Transferred 26 September 1989 from China, arrived Bangladesh 8 October 1989. Second order expected in 1991 was cancelled.

OSMAN (before conversion to C-802)

10/2003, Hartmut Ehlers / 0569148

1 SALISBURY CLASS (TYPE 61) (FF)

Name	No	Builders	Laid down	Launched	Commissioned
UMAR FAROOQ (ex-Llandaff)	F 15	Hawthorn Leslie Ltd	27 Aug 1953	30 Nov 1955	11 Apr 1958

Displacement, tons: 2,170 standard; 2,408 full load
Dimensions, feet (metres): 339.8 × 40 × 15.5 (screws)
 (103.6 × 12.2 × 4.7)
Main machinery: 8 16 VTS ASR 1 diesels; 14,400 hp
 (10.7 MW) sustained; 2 shafts
Speed, knots: 24. Range, n miles, 2,300 at 24 kt; 7,500 at 16 kt
Complement: 237 (14 officers)

Guns: 2 Vickers 4.5 in (115 mm)/45 (twin) Mk 6 ●; dual purpose; 20 rds/min to 19 km (10 n miles) anti-surface; 6 km (3.3 n miles) anti-aircraft; weight of shell 25 kg.
 2 Bofors 40 mm/60 Mk 9 ●; 120 rds/min to 3 km (1.6 n miles) anti-aircraft, 10 km (5.5 n miles) maximum.

A/S mortars: 1 triple-barrelled Squid Mk 4 ●; fires pattern of 3 depth charges to 300 m ahead of ship.

Countermeasures: Decoys: Corvus chaff launchers.

Weapons control: 1 Mk 6M gun director.

Radars: A r search, Marconi Type 965 with double AKE 2 array ●; A-band

Air/surface search: Plessey Type 993 ●; E/F-band.

Heightfinder: Type 278M ●; E-band.

UMAR FAROOQ

(Scale 1 : 900), Ian Sturton / 0508857

Surface search: Decca Type 978 ●; I-band.

Navigation: Decca Type 978, I-band.

Fire control: Type 275 ●; F-band.

Sonars: Type 174; hull-mounted; active search; medium frequency

Graseby Type 170B; hull-mounted; active attack; 15 kHz.

Programmes: Transferred from UK at Royal Albert Dock, London 10 December 1976.

Operational: The radar Type 982 aerial is still retained on the after mast but the set is non-operational. The ship has been modified as a training ship and is expected to remain in service for some years.

UMAR FAROOQ

3/2007, Paul Daly / 1188506

2 LEOPARD CLASS (TYPE 41) (FF/FFT)

Name	No	Builders	Laid down	Launched	Commissioned
ABU BAKR (ex-Lynx)	F 15	John Brown & Co Ltd, Clydebank	13 Aug 1953	12 Jan 1955	14 Mar 1957
ALI HAIDER (ex-Jaguar)	F 17	Wm Donny & Bros Ltd, Dumbarton	2 Nov 1953	30 July 1957	12 Dec 1959

Displacement, tons: 2,300 standard; 2,520 full load
Dimensions, feet (metres) 339.8 x 40 x 15.5 (screws)
 (103.6 x 12.2 x 4.7)
Main machinery: 8 16 VTS ASR 1 diesels; 14,400 hp (10.7 MW) sustained; 2 shafts; F 17 fitted with cp props
Speed, knots: 24
Range, n miles: 2,300 at full power; 7,500 at 16 kt
Complement: 235 (15 officers)

Guns: 4 Vickers 4.5 in (115 mm)/45 (2 twin) Mk 6 ●, dual purpose, 20 rds/min to 18 km (10 n miles) anti-surface; 6 km (3.3 n miles) anti-aircraft; weight of shell 25 kg.
 1 Bofors 40 mm/60 Mk 9 ●, 120 rds/min to 3 km (1.6 n miles) anti-aircraft, 10 km (5.5 n miles).
 2—7.62 mm MGs
Countermeasures: Decoys; Corvus chaff launchers.
ESM: Radar warning.
Weapons control: Mk 6M gun director.
Radars: Air search: Marconi Type 966 with single AKE 1 array ●; A-band.
Air/surface search: Plessey Type 993 ●, E/F-band.

ABU BAKR
 Navigation: Decca Type 978, Kelvin Hughes 1007; I-band.
 Fire control: Type 275 ●, F-band
Programmes: *Ali Haider* transferred from UK 16 July 1978 and *Abu Bakr* on 12 March 1982. *Ali Haider* refitted at Vosper Thornycroft August-October 1978. *Abu Bakr* extensively refitted in 1982.
Structure: All welded. Fitted with stabilisers. Sonars removed while still in service with RN. Fuel tanks have a water compensation system to improve stability.
Operational: Both to remain in service until replacements have been acquired.
 (Scale 1 : 900), Ian Sturton / 0505958

ALI HAIDER 2/2001, Michael Nitz / 0529087

PATROL FORCES

Notes: (1) Plans to acquire an offshore patrol vessel, four missile-firing craft and further patrol craft were announced by the Defence Minister in April 2004. Five patrol craft are to be constructed at Khulna Shipyard. They are to be operated by the navy.
 (2) Six harbour patrol craft are being built at Khulna Shipyard for the Coast Guard. The first, *Atrai*, was commissioned in September 2007.

1 MADHUMATI (SEA DRAGON) CLASS (LARGE PATROL CRAFT) (PSO)

Name	No	Builders	Commissioned
MADHUMATI	P 911	Hyundai, Ulsan	18 Feb 1998

Displacement, tons: 635 full load
Dimensions, feet (metres): 199.5 x 26.2 x 8.9 (60.8 x 8 x 2.7)
Main machinery: 2 SEMT-Pielstick 12 PA6 diesels; 9,600 hp(m) (7.08 MW) sustained; 2 shafts
Speed, knots: 24
Range, n miles: 6,000 at 15 kt
Complement: 43 (7 officers)
Guns: 1 Bofors 57 mm/70 Mk 1; 220 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg.
 1 Bofors 40 mm/70. 2 Oerlikon 20 mm.
Weapons control: Optronic director.
Radars: Surface search: Kelvin Hughes KH 1007; I-band
Navigation: GEM Electronics SPN 753B; I-band.

Comment: Ordered in 1995 and delivered in October 1997. Very similar to the South Korean Coast Guard vessels, but with improved fire-control equipment, Vosper stabilisers.

MADHUMATI 2/1998, Bangladesh Navy / 0017589

6 ISLAND CLASS (COASTAL PATROL CRAFT/TRAINING CRAFT) (PBO/AX)

Name	No	Builders	Commissioned	Recommissioned
SHAHEED RUHUL AMIN (ex-Jersey)	A 511 (ex-P 295)	Hall Russell, Aberdeen	15 Oct 1976	1994
KAPATAKHAYA (ex-Shetland)	P 912 (ex-P 298)	Hall Russell, Aberdeen	14 July 1977	4 May 2003
KARATOA (ex-Alderney)	P 913 (ex-P 278)	Hall Russell, Aberdeen	6 Oct 1979	4 May 2003
GOMATI (ex-Anglesey)	P 914 (ex-P 277)	Hall Russell, Aberdeen	1 June 1979	3 Oct 2004
SANGU (ex-Guernsey)	P 713 (ex-P 297)	Hall Russell, Aberdeen	28 Oct 1977	3 Oct 2004
TURAG (ex-Lindisfarne)	P 714 (ex-P 300)	Hall Russell, Aberdeen	3 Mar 1978	3 Oct 2004

Displacement, tons: 925 standard; 1,260 full load
Dimensions, feet (metres): 176 wl; 195.3 oa x 36 x 15 (53.7, 59.5 x 11 x 4.5)
Main machinery: 2 Ruston 12RKC diesels; 5,640 hp (4.21 MW) sustained; 1 shaft, cp prop
Speed, knots: 16.5
Range, n miles: 7,000 at 12 kt
Complement: 39
Guns: 1 Bofors 40 mm/60 Mk 3. 2 FN 7.62 mm MGs.
Countermeasures: ESM: Orange Crop; intercept
Combat data systems: Racal CANE DEA-1 action data automation.
Radars: Navigation: Kelvin Hughes Type 1006; I-band.

Comment: *Shaheed Ruhul Amin* transferred as a training craft in 1993. Five further former UK Island class acquired as patrol craft. *Kapatakhaya* transferred 31 July 2002, *Karatoa* 31 October 2002, *Gomati* on 12 September 2003 and *Sangu* and *Turag* on 29 January 2004.

TURAG 3/2004, Derek Fox / 1042116

4 DURDHARSHA (HUANGFEN) CLASS (TYPE 021) (FAST ATTACK CRAFT—MISSILE) (PTFG)

DURDHARSHA P 8125 DURDANTA P 8126 DORDANDA P 8128 ANIRBAN P 8131

Displacement, tons: 171 standard, 205 full load
Dimensions, feet (metres): 126.6 × 24.9 × 8.9 (38.6 × 7.6 × 2.7)
Main machinery: 3 diesels, 12,000 hp(m) (8.8 MW); 3 shafts
Speed, knots: 35 **Range, n miles:** 800 at 30 kt
Complement: 35 (5 officers)
Missiles: SSM-4 HY-2; active radar or IR homing to 80 km (43.2 n miles) at 0.9 Mach; warhead 513 kg
Guns: 4 USSR 30 mm/85 (2 twin)
Radars: Surface search: SquareTie; I-band
IFF: High Pole A

Comment: Built in China. First four commissioned in Bangladesh Navy on 10 November 1988. Chinese equivalent of the Soviet Osa class which started building in 1985. All damaged in April 1991 typhoon but recovered and repaired (*Durnibar* was converted to a patrol craft). A fifth vessel *Anirban* was delivered in June 1992. Original main machinery replaced.

DORDANDA

6/2003, Bangladesh Navy / 05/2413

5 DURBAR (HEGU) CLASS (TYPE 024) (FAST ATTACK CRAFT—MISSILE) (PTFG)

DURBAR P 8111 DURANTA P 8112 DURVEDYA P 8113 DURDAM P 8114 UTTAL P 8141

Displacement, tons: 68 standard; 79.2 full load
Dimensions, feet (metres): 88.6 × 20.7 × 4.3 (27 × 6.3 × 1.3)
Main machinery: 4 Type L-12V-180B diesels; 4,800 hp(m) (3.57 MW); 4 shafts
Speed, knots: 37.5 **Range, n miles:** 400 at 30 kt
Complement: 17 (4 officers)
Missiles: SSM-2 SY-1; active radar or IR homing to 46 km (24.3 n miles) at 0.9 Mach; warhead 513 kg
Guns: 2 -25 mm/80 (twin); 270 rds/min to 3 km (1.6 n miles); weight of shell 0.34 kg.
Radars: Surface search: SquareTie; I-band

Comment: Built in China. First pair commissioned in Bangladesh Navy on 6 April 1983, second pair on 10 November 1983. Two badly damaged in April 1991 typhoon but were repaired. *Uttal* was delivered in June 1992. Missiles are seldom embarked. All have been refitted with new versions of original engines.

UTTAL

3/1998 / 0017590

4 HUCHUAN CLASS (TYPE 026) (FAST ATTACK CRAFT—TORPEDO) (PTK)

TB 36 P 8235 TB 36 P 8236 TB 37 P 8237 TB 38 P 8238

Displacement, tons: 46 full load
Dimensions, feet (metres): 73.8 × 16.4 × 6.9 (foil) (22.5 × 5 × 2.1)
Main machinery: 3 Type L-12V-180 diesels; 3,600 hp(m) (2.64 MW); 3 shafts
Speed, knots: 50 **Range, n miles:** 500 at 30 kt
Complement: 23 (3 officers)
Guns: 4 China 14.5 mm (2 twin); 600 rds/min to 7 km (3.8 km)
Torpedoes: 2 -21 in (533 mm) China YU-1; anti-ship, to 9.2 km (5 n miles) at 39 kt or 3.7 km (2.1 n miles) at 51 kt; warhead 400 kg.
Radars: Surface search: China Type 763; I-band

Comment: Chinese Huchuan class. Two damaged in April 1991 typhoon but were repaired. All reported operational.

TB 38

6/2003, Bangladesh Navy / 05/2416

1 DURJOY (HAINAN) CLASS (TYPE 037) (LARGE PATROL CRAFT) (PC)

NIRBHOY P 812

Displacement, tons: 375 standard; 392 full load
Dimensions, feet (metres): 192.8 × 23.6 × 7.2 (58.8 × 7.2 × 2.2)
Main machinery: 4 diesels, 4,000 hp(m) (2.94 MW) sustained; 4 shafts
Speed, knots: 30.5 **Range, n miles:** 1,300 at 15 kt
Complement: 70
Guns: 4 China 57 mm/70 (2 twin), 120 rds/min to 12 km (6.5 n miles); weight of shell 6.31 kg.
 4 -25 mm/80 (2 twin); 270 rds/min to 3 km (1.6 n miles); anti-aircraft
A/S mortars: 4 RBU 1200 fixed 5-barralled launchers; range 1,200 m; warhead 34 kg
Depth charges: 2 racks; 2 throwers, 18 DCs.
Mines: Fitted with rails for 12 mines.
Radars: Surface search I-band.
IFF: High Pole.
Sonars: Tamir II; hull-mounted; short-range attack; high frequency.

Comment: Transferred from China and commissioned 1 December 1985. Forms part of Escort Squadron 81 at Chittagong. *Durjoy* damaged beyond repair by cyclone in 1991. *Nirbhoy* refitted with new main machinery.

NIRBHOY

6/2003, Bangladesh Navy / 05/2414

8 SHAHEED (SHANGHAI II) (TYPE 062) CLASS (FAST ATTACK CRAFT—GUN) (PC)

SHAHEED DAULAT P 411 SHAHEED AKTHERUDDIN P 414 TAMJEED P 613
 SHAHEED FARID P 412 SHAHEED P 611 TANVEER P 614
 SHAHEED MOHIBULLAH P 413 TAWFIQ P 612

Displacement, tons: 113 standard; 134 full load
Dimensions, feet (metres): 127.3 × 17.7 × 5.6 (38.8 × 5.4 × 1.7)
Main machinery: 4 Type L-12-180 diesels; 4,400 hp(m) (3.2 MW) sustained; 4 shafts
Speed, knots: 30 **Range, n miles:** 800 at 16.5 kt
Complement: 36 (4 officers)
Guns: 4 -37 mm/63 (2 twin); 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.4 kg.
 4 -25 mm/80 (2 twin); 270 rds/min to 3 km (1.6 n miles) anti-aircraft
Depth charges: 2 throwers; 8 charges.
Mines: 10 can be carried
Radars: Surface search, Skin Head/Pot Head; E-band
Sonars: Hull mounted; active; short range, high frequency. Some reported to have VDS

Comment: Transferred from China March 1982. Different engine arrangement from Chinese craft. P 411-414 form Patrol Squadron 41 based at Khulna. P 611 was handed over to the Coast Guard in March 2003 and P 612, P 613 and P 614 were lent to the Coast Guard 2005-2007. P 412 capsized in a storm on 20 September 2006 but is reported to have been salvaged.

TAMJEED

3/1998 / 0017591

4 SEA DOLPHIN CLASS (FAST ATTACK CLASS—GUN) (PTF)

TITAS P 1011 KUSIYARA P 1012 CHITRA P 1013 DHANSIRI P 1014

Displacement, tons: 143 full load
Dimensions, feet (metres): 107.9 × 22.6 × 7.9 (32.9 × 6.9 × 2.4)
Main machinery: 2 MTU MD 16V 538 TB90 diesels; 4,500 hp(m) (3.35 MW) sustained; 2 shafts
Speed, knots: 37 **Range, n miles:** 600 at 20 kt
Complement: 28 (4 officers)
Guns: 1 -40 mm
 2 -30 mm (1 twin).
 2 -20 mm
Weapons control: Optical director.
Radars: Surface search. Raytheon 1645; I-band.

Comment: Built by Korea SEC in the 1980s and transferred from South Korea as a gift. First pair (P 1011, 1012) recommissioned on 27 May 2000 and second pair (P 1013, 1014) on 3 October 2004. All form 101 Patrol Squadron based at Chittagong.

TITAS

6/2001, Bangladesh Navy / 05/2300b

1 RUPOSHI BANGLA CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Launched	Commissioned
RUPOSHI BANGLA	P 201	Hong Leong-Lürssen	28 June 1999	23 Jan 2000

Displacement, tons: 195 full load
Dimensions, feet (metres): 126.3 × 23 × 13.5 (38.5 × 7 × 4.1)
Main machinery: 2 Paxman 12VP 185 diesels; 6,729 hp(m) (4.95 MW) sustained; 2 shafts
Speed, knots: 30
Complement: 27 (5 officers)
Guns: 1 Oto Melara 25 mm KBA, 2—762 mm MGs.
Radars: Surface search, Furuno; I-band

Comment: Ordered in June 1998 and laid down 11 August 1998. Based on the PZ design for the Malaysian Police. Operated by the Coast Guard.

RUPOSHI BANGLA 10/1999, Hong Leong-Lürssen / 0064675

1 HAIZHUI (TYPE 062/1) CLASS (COASTAL PATROL CRAFT) (PC)

Name	No	Commissioned
BARKAT	P 711	4 Aug 1996

Displacement, tons: 139 full load
Dimensions, feet (metres): 134.5 × 17.4 × 5.9 (40.9 × 5.3 × 1.8)
Main machinery: 4 Chinese L12-180A diesels; 4,800 hp(m) (35.3 MW), 4 shafts
Speed, knots: 28
Range, n miles: 750 at 17 kt
Complement: 43 (4 officers)
Guns: 4 China 37 mm/63 (2 twin); 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg
 4 China 25 mm/80 (2 twin).
Depth charges: 2 rails
Radars: Surface search; Anitsu 726; I-band
Sonars: Stag Ear; active; high frequency.

Comment: Acquired from China in 1995. This is the Shanghai III, the larger and slower version of the Shanghai II which in Chinese service has anti-submarine mortars. An inclined pole mast and platform behind the bridge are distinguishing features.

BARKAT 3/1996 / 0017592

1 COASTAL PATROL CRAFT (PB)

Name	No	Builders	Commissioned
SALAM (ex-Durnibar)	P 712 (ex-P 8127)	Khulna Shipyard	19 Mar 2002

Displacement, tons: 185 standard; 216 full load
Dimensions, feet (metres): 126.6 × 24.9 × 8.9 (38.6 × 7.6 × 2.7)
Main machinery: 2 Paxman 12V 185 diesels; 4,800 hp (3.6 MW) sustained; 2 shafts
Speed, knots: 24
Range, n miles: 3,460 at 13 kt
Complement: 27 (5 officers)
Guns: 1 Bofors 40 mm/60; 120 rds/min to 3 km (1.6 n miles)
 2 GCM A02 30 mm (twin).
Radars: Surface search: Furuno HR 2010; E/F-band.
Navigation: Anritsu; I-band.

Comment: Former Huangfen class missile craft transferred from China in 1988. Sunk in River Karnaphuli in 1991 during cyclone and later recovered. Renovated and converted to patrol craft role and recommissioned in 2002.

2 KARNAPHULI (KRALJEVICA) CLASS (LARGE PATROL CRAFT) (PC)

Name	No	Builders	Commissioned
KARNAPHULI (ex-PBR 502)	P 314	Yugoslavia	1956
TISTA (ex-PBR 505)	P 315	Yugoslavia	1956

Displacement, tons: 195 standard; 245 full load
Dimensions, feet (metres): 141.4 × 20.7 × 5.7 (43.1 × 6.3 × 1.8)
Main machinery: 2 Paxman 12V P185 (P 314); 2 MTU 12V 396TE84 (P 315); 2 shafts
Speed, knots: 24
Range, n miles: 1,500 at 12 kt
Complement: 44 (4 officers)
Guns: 2 Bofors 40 mm/70, 2 Oerlikon 20 mm, 2—128 mm rocket launchers (5 barrels per mounting).
Depth charges: 2 racks; 2 Mk 6 projectors.
Radars: Surface search Decca 1229, I-band
Sonars: QCU 2; hull-mounted; active; high frequency

Comment: Transferred and commissioned 6 June 1975. Karnaphuli re-engined in 1995. Tista in 1998.

TISTA 6/1995, Bangladesh Navy / 0058550

2 AKSHAY CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
PADMA (ex-Akshay)	P 312	Hooghly D & E Co, Calcutta	4 Apr 1973
SURMA (ex-Ajay)	P 313	Hooghly D & E Co, Calcutta	26 July 1974

Displacement, tons: 120 standard, 150 full load
Dimensions, feet (metres): 117.2 × 20 × 5.5 (35.7 × 6.1 × 1.7)
Main machinery: 2 Paxman YHAXM diesels; 1,100 hp (820 kW); 2 shafts
Speed, knots: 18
Range, n miles: 500 at 12 kt
Complement: 35 (3 officers)
Guns: 4 or 8 Oerlikon 20 mm 1 or (2 quad), 2 Bofors 40 mm/60 (twin) (Surma).
Radars: Surface search: Racal Decca, I-band

Comment: Built in 1962 and transferred from India in 1973-4. Surma has a 40 mm gun aft vice the second quad 20 mm.

PADMA 6/1997, Bangladesh Navy / 0012065

2 MEGHNA CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Launched
MEGHNA	P 211	Vosper Private, Singapore	6 May 1984
JAMUNA	P 212	Vosper Private, Singapore	25 Sep 1984

Displacement, tons: 410 full load
Dimensions, feet (metres): 152.5 × 24.6 × 6.6 (46.5 × 7.5 × 2)
Main machinery: 2 Paxman Valenta 12CM diesels; 5,000 hp (3.73 MW) sustained; 2 shafts
Speed, knots: 20
Range, n miles: 2,000 at 16 kt
Complement: 47 (3 officers)
Guns: 1 Bofors 57 mm/70 Mk 1; 200 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg.
 1 Bofors 40 mm/70; 300 rds/min to 12 km (6.5 n miles); weight of shell 0.96 kg.
 2—762 mm MGs; launchers for illuminants on the 57 mm gun.
Weapons control: Selenia NA 18 B optronic system.
Radars: Surface search: Decca 1229, I-band

Comment: Built for EEZ work under the Ministry of Agriculture. Both completed late 1984. Both damaged in April 1991 typhoon but have been repaired. P 212 damaged by container ship at Chittagong in September 2003.

MEGHNA 6/2003, Bangladesh Navy / 0572416

58 Bangladesh/Patrol forces — Mine warfare forces

4 TYPE 123K (CHINESE P4) CLASS (FAST ATTACK CRAFT—TORPEDO) (PTL)

TB 1 P 8221 TB 2 P 8222 TB 3 P 8223 TB 4 P 8224

Displacement, tons: 25 full load
Dimensions, feet (metres): 62.3 × 10.8 × 3.3 (19 × 3.3 × 1)
Main machinery: 2 Typo L-12V-180 diesels; 2,400 hp(m) (1.76 MW); 2 shafts
Speed, knots: 50. **Range, n miles:** 410 at 30 kt
Complement: 12 (1 officer)
Guns: 2—14.5 mm (twin) MG.
Torpedoes: 2—127 in (450 mm); anti-ship.
Radars: Surface search: Pot Head; I-band

Comment: Transferred from China 6 April 1983. Three reported to be operational

TB 4 6/2003, Bangladesh Navy / 0577417

1 RIVER CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
BISHKHALI (ex-Jessora)	P 311	Brooke Marine Ltd	20 May 1965

Displacement, tons: 115 standard; 143 full load
Dimensions, feet (metres): 107 × 20 × 6.9 (32.6 × 6.1 × 2.1)
Main machinery: 2 MTU 12V 538TB90 diesels; 4,500 hp(m) (3.3 MW) sustained; 2 shafts
Speed, knots: 24
Complement: 30
Guns: 2 Breda 40 mm/70; 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg
Radars: Surface search: Racal Decca; I-band.

Comment: PNS *Jessora*, which was sunk during the 1971 war, was salvaged and extensively repaired at Khulna Shipyard and recommissioned as *Bishkhali* on 23 November 1978.

BISHKHALI 6/1996, Bangladesh Navy / 0056554

5 PABNA CLASS (RIVERINE PATROL CRAFT) (PBR)

Name	No	Builders	Commissioned
PABNA	P 111	DEW Narayangonj, Dhaka	12 June 1972
NOAKHALI	P 112	DEW Narayangonj, Dhaka	10 July 1972
PATUAKHALI	P 113	DEW Narayangonj, Dhaka	27 Mar 1975
RANGAMATI	P 114	DEW Narayangonj, Dhaka	12 Feb 1977
BOGRA	P 115	DEW Narayangonj, Dhaka	15 July 1977

Displacement, tons: 69.5 full load
Dimensions, feet (metres): 75 × 20 × 3.5 (22.9 × 6.1 × 1.1)
Main machinery: 2 Cummins diesels; 2 shafts
Speed, knots: 10.8. **Range, n miles:** 700 at 8 kt
Complement: 33 (3 officers)
Guns: 1 Bofors 40 mm/60 or Oerlikon 20 mm

Comment: The first indigenous naval craft built in Bangladesh. Form River Patrol Squadron 11 at Mongla. All operated by the Coast Guard from 2003.

PABNA 6/2003, Bangladesh Navy / 0572418

2 PATROL CRAFT (PB)

SHETGANG P 102 PORTE GRANDE

Dimensions, feet (metres): 102.3 × 17.7 × 4.6 (31.2 × 5.4 × 1.4)
Main machinery: 2 MTU diesels; 3,000 hp (2.2 MW), 2 shafts
Speed, knots: 25
Complement: To be announced
Guns: To be announced
Radars: To be announced.

Comment: Both ships constructed by Chittagong Port Authority and commissioned on 29 May 2006. Operated by the Coast Guard.

6 HIGH-SPEED INTERCEPTION CRAFT (HSIC)

Displacement, tons: 3.4 full load
Dimensions, feet (metres): 34.1 × 9.2 × 2.0 (10.4 × 2.8 × 0.6)
Main machinery: 2 VM diesels; 640 hp (480 kW); 2 shafts
Speed, knots: 54. **Range, n miles:** 200 at 35 kt
Complement: 2 plus 8
Guns: 1—762 mm MG

Comment: RIB33SC design by FB Design, Italy. Funded by UN for riverine and coastal patrol in southern Sudan. Craft in UN livery but commissioned in Bangladesh Navy in 2005.

INTERCEPTION CRAFT 6/2007, Massimo Anneti / 1166507

MINE WARFARE FORCES

4 SHAPLA (RIVER) CLASS (MINESWEEPERS/PATROL CRAFT/ SURVEY SHIPS) (MHSC/PBO/AGS)

Name	No	Builders	Commissioned
SHAPLA (ex-Wavanday)	M 96	Richards, Lowestoft	12 July 1984
SAIKAT (ex-Carron)	M 96	Richards, Great Yarmouth	30 Sep 1984
SUROVI (ex-Dovey)	M 97	Richards, Great Yarmouth	30 Mar 1985
SHAIBAL (ex-Helford)	M 98	Richards, Great Yarmouth	7 June 1985

Displacement, tons: 690 full load
Dimensions, feet (metres): 156 × 34.5 × 9.5 (47.5 × 10.5 × 2.9)
Main machinery: 2 Ruston BRKC diesels; 3,100 hp (2.3 MW) sustained; 2 shafts; cp props
Speed, knots: 14. **Range, n miles:** 4,500 at 10 kt
Complement: 30 (7 officers)
Guns: 1 Bofors 40 mm/60 Mk 3.
Radars: Navigation: 2 Racal Decca TM 1226C; I-band.

Comment: These ships are four of a class of 12 of which seven are in service with Brazil. Transferred from the UK on 3 October 1994 and recommissioned on 27 April 1995. Steel hulled for deep-armed team sweeping with wire sweeps, and intended for use both as minesweepers and as patrol craft. Fitted with Racal Integrated Minehunting System. *Shaibal* converted for hydrographic survey duties but retains minesweeping gear. Fitted with echo sounders, side-scan sonar and a laboratory.

SUROVI 3/1998 / 0017593

1 SAGAR (T 43) CLASS (MINESWEEPER) (MSO)

Name	No	Builders	Commissioned
SAGAR	M 91	Wuhan Shipyard	27 Apr 1995

Displacement, tons: 520 standard; 590 full load
Dimensions, feet (metres): 196.8 × 27.6 × 6.9 (60 × 8.8 × 2.3)
Main machinery: 2 CXZ MAN B&W Type 9L 20-27 diesels; 2,400 hp (1.8 MW) sustained; 2 shafts; cp props
Speed, knots: 14. **Range, n miles:** 3,000 at 10 kt
Complement: 70 (10 officers)

Guns: 4 China 37 mm/63 (2 twin); 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg.

4—25 mm/60 (2 twin); 270 rds/min to 3 km (1.6 n miles).

4 China 14.5 mm/93 (2 twin); 600 rds/min to 7 km (3.8 n miles).

Depth charges: 2 BMB-2 projectors; 20 depth charges.

Mines: Can carry 12-16.

Countermeasures: MCMV; MPT-1 paravanes; MPT-3 mechanical sweep; acoustic and magnetic gear.

Radars: Surface search: Fin Curve; I-band.

Sonars: Celcius Tech CMAS 36/39, active high frequency mine detection.

Comment: Ordered from China in 1993. Based on Type 010G minesweeper design. Used mostly as a patrol ship. New sonar fitted in 1998.

SAGAR 3/1998 / 0017594

SURVEY AND RESEARCH SHIPS

1 SURVEY SHIP (AGS)

Name	No	Builders	Commissioned
AGRADOOT (ex-Kadan)	A 583	Khulna Shipyard	19 Mar 2002

Displacement, tons: 687 full load
 Dimensions, feet (metres): 157.0 × 25.6 × 11.5 (478 × 78 × 3.5)
 Main machinery: 2 Baudouin diesels
 Speed, knots: 12.5
 Complement: 70 (8 officers)
 Guns: 1 Oerlikon 20 mm.
 Radars: Furuno HR 2110, Kelvin Hughes HR-3000A.

Comment: Former Thai trawler converted into a Survey vessel by Khulna shipyard. Fitted with two dual frequency digital hydrographic echo sounders, side-scan sonar and laboratories. Carries a survey launch.

AGRADOOT 6/2003, Bangladesh Navy / 05/2419

1 REPAIR SHIP (YR)

SHAHAYAK A 512

Displacement, tons: 477 full load
 Dimensions, feet (metres): 146.6 × 26.2 × 6.6 (44.7 × 8 × 2)
 Main machinery: 1 Cummins 12 VTS 6 diesel; 425 hp (317 kW); 1 shaft
 Speed, knots: 11.5
 Range, n miles: 3,800 at 11.5 kt
 Complement: 45 (1 officer)
 Guns: 1 Oerlikon 20 mm.

Comment: Re-engined and modernised at Khulna Shipyard and commissioned on 23 November 1978 to act as repair vessel.

SHAHAYAK 6/1996, Bangladesh Navy / 0056657

1 TENDER (AG)

SHAHJALAL A 513

Displacement, tons: 600 full load
 Dimensions, feet (metres): 131.8 × 29.7 × 12.6 (40.2 × 9.1 × 3.8)
 Main machinery: 1 V 16-cyl type diesel; 1 shaft
 Speed, knots: 12
 Range, n miles: 7,000 at 12 kt
 Complement: 55 (3 officers)
 Guns: 1 Oerlikon 20 mm.

Comment: Ex-Thai fishing vessel SMS *Gold 4*. Probably built in Tokyo. Commissioned on 15 January 1987 and used as a diving/salvage tender.

SHAHJALAL 6/1996, Bangladesh Navy / 0056658

AUXILIARIES

Notes: Floating Dock A 711 (*Sundarban*) acquired from Brodogradiliste Joso Lozovina-Mosor, Trogir, Yugoslavia in 1980, capacity 3,600 tons. Has a complement of 85 (5 officers). Floating crane A 731 (*Balaban*) is self-propelled at 9 kt and has a lift of 70 tons; built at Khulna Shipyard and commissioned 18 May 1988, she has a complement of 29 (two officers)

1 TANKER (AOTL)

Name	No	Commissioned
KHAN JAHAN ALI	A 515	14 July 1987

Displacement, tons: 2,900 full load
 Measurement, tons: 1,343 gross
 Dimensions, feet (metres): 250.8 × 37.5 × 18.4 (76.4 × 11.4 × 5.6)
 Main machinery: 1 diesel; 1,350 hp(m) (992 kW); 1 shaft
 Speed, knots: 12
 Complement: 28 (3 officers)
 Cargo capacity: 1,500 tons
 Guns: 2 Oerlikon 20 mm.

Comment: Completed in Japan in 1983. Can carry out stern replenishment at sea but is seldom used in this role. Replacement is under consideration.

KHAN JAHAN ALI 3/1998 / 0017595

1 TANKER (AOTL)

IMAN GAZZALI A 516

Displacement, tons: 213 full load
 Dimensions, feet (metres): 146.8 × 23 × 11.2 (44.8 × 7 × 3.4)
 Main machinery: 1 Cummins diesel; 1 shaft
 Speed, knots: 8
 Complement: 30 (2 officers)

Comment: An oil tanker of some 600,000 litres capacity acquired in 1994 and commissioned 6 May 1997

IMAN GAZZALI 6/1999, Bangladesh Navy / 0056656

1 HARBOUR TENDER (YAG)

SANKET

Displacement, tons: 80 full load
 Dimensions, feet (metres): 96.5 × 20 × 5.9 (29.4 × 6.1 × 1.8)
 Main machinery: 2 Deutz diesels, 2,400 hp(m) (1.76 MW); 2 shafts
 Speed, knots: 16
 Range, n miles: 1,000 at 16 kt
 Complement: 18 (1 officer)
 Guns: 1 Oerlikon 20 mm

Comment: Former harbour craft of the Chittagong Port Authority taken over by the navy in 1984. It is used as a utility harbour craft. No pennant number has been allocated.

SANKET 3/1996 / 0056659

1 LANDING CRAFT LOGISTIC (LSL)

SHAH AMANAT L 900

Displacement, tons: 366 full load
Dimensions, feet (metres): 154.2 × 34.1 × 8 (47 × 10.4 × 2.4)
Main machinery: 2 Caterpillar D 343 diesels; 730 hp (544 kW) sustained; 2 shafts
Speed, knots: 9.5
Complement: 31 (3 officers)
Military lift: 150 tons
Guns: 2—12.7 mm MGs.

Comment: Australian civil vessel confiscated by the Navy while engaged in smuggling in 1988. Transferred to the Navy and commissioned in 1990.

SHAH AMANAT

6/1996, Bangladesh Navy / 0056567

2 LCU 1512 CLASS (LCU)

SHAH PORAN (ex-Cerro Gordo) L 901

SHAH MAKHDUM (ex-Cadge) L 902

Displacement, tons: 375 full load
Dimensions, feet (metres): 134.9 × 29 × 6.1 (41.1 × 8.8 × 1.9)
Main machinery: 4 Detroit 6-71 diesels, 696 hp (508 kW) sustained; 2 shafts
Speed, knots: 11. **Range, n miles:** 1,200 at 8 kt
Complement: 14 (2 officers)
Military lift: 170 tons
Guns: 2—12.7 mm MGs
Radars: Navigation: LN 66; I-band.

Comment: Ex-US Army landing craft transferred in April 1991 and commissioned 30 January 1993 after refit.

SHAH MAKHDUM

6/1996, Bangladesh Navy / 0056563

5 YUCH'IN CLASS (TYPE 068/069) (LCU/LCP)

DARSHAK A 581

LCT 101 A 584

LCT 104 A 587

TALLASHI A 582

LCT 102 A 585

Displacement, tons: 85 full load
Dimensions, feet (metres): 81.2 × 17.1 × 4.3 (24.8 × 5.2 × 1.3)
Main machinery: 2 Type 12V 150 diesels, 600 hp(m) (440 kW); 2 shafts
Speed, knots: 11.5. **Range, n miles:** 450 at 11.5 kt
Complement: 23
Military lift: Up to 150 troops (L 101-104)
Guns: 4 China 14.5 mm (2 twin) MGs can be carried

Comment: Named craft transferred from China in 1983 fitted with survey equipment and used as inshore survey craft. Second pair transferred 4 May 1986, third pair 1 July 1986. Probably built in the late 1960s. Two badly damaged in April 1991 typhoon and LCT 103 was subsequently scrapped.

TUGS

1 HUJIU CLASS (OCEAN TUG) (ATA)

KHADEM A 721

Displacement, tons: 1,472 full load
Dimensions, feet (metres): 197.5 × 38 × 16.1 (60.2 × 11.6 × 4.9)
Main machinery: 2 LVP 24 diesels; 1,800 hp(m) (1.32 MW); 2 shafts
Speed, knots: 14
Range, n miles: 7,200 at 14 kt
Complement: 56 (7 officers)
Guns: 2—12.7 mm MGs
Radars: Navigation: China Type 756; I-band

Comment: Commissioned 6 May 1984 after transfer from China.

KHADEM

6/1996, Bangladesh Navy / 0056565

3 COASTAL TUGS (YTM)

SEBAK A 722

RUPSHA A 723

SHIBSHA A 724

Displacement, tons: 330 full load
Dimensions, feet (metres): 99.9 × 28.1 × 1.8 (30.0 × 8.4 × 3.5)
Main machinery: 2 Caterpillar 12V 3512B diesels, 2,700 hp (2.0 MW); 2 shafts
Speed, knots: 12
Range, n miles: 1,800 at 12 kt
Complement: 23 (3 officers)
Guns: 2—7.62 mm MGs (fitted for).

Comment: Details are for *Rupsha* and *Shibsha* built to a Damen Stan Tug 3008 design by Khulna Shipyard. Construction started in 2001, completed in 2003 and commissioned on 3 October 2004. *Sebak* built in Narayangang Dockyard in 1993 and commissioned on 23 December 1993.

SHIBSHA

6/2003, Bangladesh Navy / 0572427

Barbados

Country Overview

Barbados gained independence in 1966; the British monarch, represented by a governor-general, is head of state. The easternmost island of the Windward Islands of the Lesser Antilles chain, it consists of a single island of 166 square miles. The capital, largest town and principal port is Bridgetown, located on the southwestern coast. Territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has also been claimed but the limits are not defined. A Coast Guard was formed in 1973 and became the naval arm of the Barbados Defence Force in 1978.

Headquarters Appointments

Chief of Staff, Barbados Defence Force:
Colonel Alvin Quintyne
Commanding Officer Coast Guard Squadron:
Lieutenant Commander Errington Shurland

Personnel

2009
(a) 96 (11 officers)
(b) Voluntary service

Bases

Spring Garden, Bridgetown (HMBS *Pelican*).

Prefix to Ships' Names

HMBS

COAST GUARD

Notes: (1) Three 10 m Damen RIB 1000 capable of 35 kt were delivered in June 2007.
(2) A Zodiac 920 RHIB was donated by the US in 2004

1 KEBIR CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Launched	Commissioned
TRIDENT	P 01	Brooke Marine	14 Apr 1981	Nov 1981

Displacement, tons: 155.5 standard; 190 full load
Dimensions, feet (metres): 123 x 22.6 x 5.6 (375 x 6.9 x 1.7)
Main machinery: 2 Paxman Valenta 12CM diesels; 5,000 hp (3.73 MW) sustained; 2 shafts
Speed, knots: 29
Range, n miles: 3,000 at 12 kt
Complement: 18
Guns: 2–12.7 mm MGs 2–7.62 mm MGs
Radars: Surface search: Racal Decca Bridgemaster; I-band.

Comment: Refitted by Bender Shipyard in 1990 when the old guns were removed. Refitted again by Cable Marine in 1988 after a main engine seized. Same hull as Algerian Kobir class. To be decommissioned when third Damen 4207 enters service.

TRIDENT 4/2008*, Marco Ghiglino / 1335332

3 DAMEN STAN PATROL 4207 (PB)

Name	No	Builders	Commissioned
LEONARD C BANFIELD	P 02	Damen Shipyard, Gorinchem	14 Sep 2007
RUDYARD LEWIS	P 03	Damen Shipyard, Gorinchem	13 Sep 2008
-	P 04	Damen Shipyard, Gorinchem	Apr 2009

Displacement, tons: 205
Dimensions, feet (metres): 140.4 x 23.3 x 8.3 (42.8 x 7.11 x 2.52)
Main machinery: 2 Caterpillar 3516B DI-TA; 5,600 hp (4.17 MW); 2 cp props
Speed, knots: 26
Complement: 14
Guns: To be announced.

Comment: Contract signed with Damen Shipyards, Gorinchem for construction of a Damen Stan Patrol 4207 offshore patrol craft. *Leonard C Banfield* arrived Barbados on 6 September 2007. Steel hull with aluminium superstructure. Capable of carrying a 7 m RIB. Similar craft in service in Jamaica Coast Guard.

RUDYARD LEWIS 3/2008*, Marco Ghiglino / 1335331

2 DAMEN STAN PATROL 1204 (PB)

Name	Commissioned
ENTERPRISE P 05	EXCELLENCE P 06

Displacement, tons: To be announced
Dimensions, feet (metres): 39.3 x 12.1 x 2.2 (11.98 x 3.7 x 0.66)
Main machinery: 2 Caterpillar C7 diesels; 740 hp (550 kW); 2 Hamilton waterjets
Speed, knots: 24
Complement: 4

Comment: Contract signed with Damen Shipyards, Gorinchem for construction of three Damen Stan Patrol 1204 patrol craft. Both commissioned on 13 September 2008. Aluminium hull with GRP superstructure

EXCELLENCE 2/2008*, Damen Shipyards / 1316301

Belgium

Country Overview

The Kingdom of Belgium is situated in north-western Europe. With an area of 11,787 square miles, it is bordered to the north by the Netherlands and to the south by France. It has a 35 n mile coastline with the North Sea. The capital and largest city is Brussels while the principal port is Antwerp which is accessible via the Scheldt and Meuse estuaries, which lie within the Netherlands. Antwerp is also connected to an extensive canal system. Territorial seas (12 n miles) are claimed and an EEZ has also been claimed.

Headquarters Appointments

Commander, Maritime Command:
Rear Admiral Jean Paul Robyns

Headquarters Appointments — continued

Deputy Commander, Maritime Command:
Captain Georges Heeren

Personnel

(a) 2009: 2,566
(b) Voluntary service

Bases

Zeebrugge: Frigates, MCMV, Reserve Units, Training Ships, Logistics, Diving Centre. Mine Warfare Operational Sea Test centre (MOST)
Oostende: Belgium-Netherlands Mine-warfare school (EGUERMIN)

Koksijde: Naval aviation.
Brugge: Naval training centre

Fleet Disposition

Operational control of Belgian and Netherlands surface forces is under Admiral Benelux Command at Den Helder

2007	<i>Westdorp</i> (to Bulgaria)

FRIGATES

2 KAREL DOORMAN CLASS (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned	Recommissioned
LEOPOLD 1 (ex-Karel Doorman)	F 930 (ex-F 827)	Koninklijke Maatschappij De Scheide, Flushing	26 Feb 1985	20 Apr 1988	31 May 1991	26 Mar 2007
LOUISE-MARIE (ex-Willem Van Der Zaan)	F 931 (ex-F 829)	Koninklijke Maatschappij De Scheide, Flushing	6 Nov 1985	21 Jan 1989	28 Nov 1991	4 Apr 2008

Displacement, tons: 3,320 full load
Dimensions, feet (metres): 401.2 oa; 374.7 wl × 47.2 × 14.1 (122.3, 114.2 × 14.4 × 4.3)
Flight deck, feet (metres): 72.2 × 47.2 (22 × 14.4)
Main machinery: CODOG; 2 RR Spey SM1C; 33,800 hp (25.2 MW) sustained; 2 Stork-Wartsilä 12SW280 diesels, 9,790 hp(m) (7.2 MW) sustained, 2 shafts; LIPS cp props
Speed, knots: 30 (Speys); 21 (diesels)
Range, n miles: 5,000 at 18 kt
Complement: 155 (16 officers) (accommodation for 163)

Missiles: SSM: 8 McDonnell Douglas Harpoon Block 1C (2 quad) launchers ●; active radar homing to 124 km (67 n miles) at 0.9 Mach; warhead 227 kg.
SAM: Raytheon Sea Sparrow RIM 7P Mk 48 vertical launchers ●; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg, 16 missiles. Canisters mounted on port side of hangar
Guns: 1–3 in (76 mm)/62 OTO Melara compact Mk 100 ●; 100 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg. 1 Signaal SGE-30 Goalkeeper with General Electric 30 mm 7-barrelled ●; 4,200 rds/min combined to 2 km. 2 Oerlikon 20 mm, 800 rds/min to 2 km.
Torpedoes: 4–324 mm US Mk 32 Mod 9 (2 twin) tubes (mounted inside the after superstructure) ● Honeywell Mk 46 Mod 5, anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg
Countermeasures: Decoys: 2 Loral Hycor SRBOC 6-tubed fixed Mk 36 quad launchers, IR flares and chaff to 4 km (2.2 n miles). SLQ-25 Nixie towed torpedo decoy.

LEOPOLD I

ESM/ECM: Argo APECS II (includes AR 700 ESM) ●; intercept and jammers.
Combat data systems: Signaal SEWACO VIIIB action data automation, Link 11. SATCOM ● WSC 6 twin aeriels.
Radars: Air/surface search: Signaal SMART ●; 3D; F-band Air search: Signaal LW08 ●; D-band Surface search: Signaal Scout ●; I-band Navigation: Rascal Decca 1226; I-band.
Fire control: 2 Signaal STIR ●; I/J/K-band; range 140 km (76 n miles) for 1 m target
Sonars: Signaal PHS-36, hull-mounted, active search and attack; medium frequency Thomson Sintra Anaconda DSBV 61, towed array; passive low frequency.

Helicopters. 1 NH 90 ●

Programmes: The purchase of two ex-Netherlands frigates was approved by Belgium's Council of Ministers on

(Scale 1 : 1,200), Ian Sturton / 1335443

20 July 2005 and a contract for their supply, a support package, weapons transfer, joint upgrades and crew training was signed on 21 December 2005.
Modernisation: Modification of flight decks to operate the NH90 helicopter has been completed in F 931 and is to be undertaken in F 930 by 2008. In conjunction with the Netherlands programme, both ships are to undergo a mid-life modernisation period 2010–2012. Upgrades are to include replacement of the combat data system by Guardian MRF, addition of a Thales Seastar radar, installation of a low-frequency active sonar and replacement of SATCOM systems. Platform systems are also to be upgraded.
Structure: The VLS SAM is similar to Canadian Halifax and Greek MEKO classes. The ship is designed to reduce radar and IR signatures and has extensive NBCD arrangements. Full automation and roll stabilisation fitted. The APECS jammers are mounted starboard forward of the bridge and port aft corner of the hangar.

LEOPOLD 1

LEOPOLD I

10/2008, M Declerck / 1335447

LOUISE-MARIE

1/2008*, Piet Cornelis / 1335243

SHIPBORNE AIRCRAFT

Numbers/Type: 3 Aerospatiale SA 316B Alouette III.

Operational speed: 113 kt (210 km/h).

Service ceiling: 10,500 ft (3,200 m).

Range: 290 n miles (540 km).

Role/Weapon systems: CG helicopter; used for close-range search and rescue and support for commando forces. Sensors: Carriesthompson-CSF search radar. Weapons: Unarmed. It is planned to upgrade these aircraft with new navigation and communications systems.

ALOUETTE III

7/2008*, Maritime Photographic / 1335242

Numbers/Type: 10 NHIndustries NH90.

Operational speed: 157 kt (291 km/h).

Service ceiling: 13,940 ft (4,250 m).

Range: 621 n miles (1,150 km).

Role/Weapon systems: Two NFH shipborne aircraft, three SAR helicopters and five TTH (troop transport) to start entering service in mid-2011. Sensors and weapons to be announced

NH90

6/2001, NHIndustries / 0094462

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 4 Westland Sea King Mk 48

Operational speed: 140 kt (260 km/h).

Service ceiling: 10,500 ft (3,200 m).

Range: 630 n miles (1,165 km).

Role/Weapon systems: SAR helicopter; operated by air force; used for surface search and combat rescue tasks. Upgraded in 1995 with new radar, FLIR and GPS. One decommissioned in 2005 and two reported operational. Sensors: Bendix RDR 1500B search radar. FLIR 2000F Weapons: Unarmed.

SEA KING

6/2008*, Michael Nitz / 1335241

PATROL FORCES

Notes: (1) Three 7 m RIC were acquired in May 1994 from RIBTEC, Swanwick

(2) A range safety craft A 998 has replaced the hovercraft *Barbara A 999*

(3) There are plans to acquire three new Ready Duty Ships which are also to be used as training platforms. Their duties are to include fishery protection, immigration control, surveillance and SAR.

A 998

6/2005, M Declerck / 1151239

64 Belgium/Patrol forces — Training ships

1 RIVER PATROL CRAFT (PBR/YFLB)

Name	No	Builders	Launched	Commissioned
LIBERATION	P 902	Hitzler, Regensburg	29 July 1954	4 Aug 1954

Displacement, tons: 45 full load
Dimensions, feet (metres): 85.5 × 13.1 × 3.2 (26.1 × 4 × 1)
Main machinery: 2 MWM diesels; 440 hp(m) (323 kW); 2 shafts
Speed, knots: 10
Complement: 7
Guns: 2—12.7 mm MGs
Radars, Navigation: Racal Decca; I-band.

Comment: Laid down 12 March 1954. Paid off 12 June 1987 but put back in active service 15 September 1989 after repairs. Last of a class of 10 used for patrol and personnel transport. Replacement planned when funds are available

LIBERATION 6/2005, M Declerck / 1151237

MINE WARFARE FORCES

6 FLOWER CLASS (TRIPARTITE) (MINEHUNTERS—COASTAL) (MHC/AEL)

Name	No	Builders	Launched	Commissioned
ASTER	M 915	Beliard, Ostend	6 June 1985	17 Dec 1985
BELLIS	M 916	Beliard, Ostend	14 Feb 1986	14 Aug 1986
CROCUS	M 917	Beliard, Ostend	6 Aug 1986	5 Feb 1987
LOBELIA	M 921	Beliard, Ostend	6 Jan 1988	9 May 1989
NARCIS	M 923	Beliard, Ostend	30 Mar 1990	27 Sep 1990
PRIMULA	M 924	Beliard, Ostend	17 Dec 1990	29 May 1991

Displacement, tons: 620 standard; 650 full load
Dimensions, feet (metres): 168.9 × 29.2 × 8.2 (51.5 × 8.9 × 2.5)
Main machinery: 1 Stork Wärtsilä A-RUB 215W-12 diesel; 1,860 hp(m) (1.37 MW) sustained;
 1 shaft; LIPS cp prop; 2 motors; 240 hp(m) (176 kW); 2 active rudders; 2 bow thrusters
Speed, knots: 15
Range, n miles: 3,000 at 12 kt
Complement: 46 (5 officers)

Guns: 1 DCN 20 mm/20, 720 rds/min to 10 km (5.5 n miles). 2—12.7 mm MGs.
Countermeasures: MCM: 2 PAP 104 remote-controlled mine locators; 39 charges.
 Mechanical sweep gear (medium depth).

Combat data systems: Atlas Elektronik IMCMS

Radars, Navigation: Racal Decca 1229; I-band.

Sonars: Thales TSM 2022 Mk III; hull-mounted; active minehunting; 100, 200 and 400 kHz.

Programmes: Developed in co-operation with France and the Netherlands. A 'ship factory' for the hulls was built at Ostend and the hulls were towed to Rupelmonde for fitting out. Each country built its own hulls but France provided all MCM gear and electronics, Belgium electrical installation and the Netherlands the engine room equipment.

Modernisation: Propulsion system upgrade completed in 1999 for all of the class. Capability upgrade to extend service life of six ships to 2020 is in progress at Zeebrugge. Modifications include an MCM command and control system, an Integrated Mine Countermeasures System (comprising hull-mounted and self-propelled variable-depth sonar (installed in Double Eagle Mk III Mod 1 ROV)) and a Mine-Identification and Disposal System (MIDS) based on the STN Atlas Seafox. Linked to the ship by a 3,000 m fibre optic tether, one variant (Seafox-C) is used for mine disposal and another (Seafox-I) is used for identification. The equipment was first installed in HrMS *Hellevoetsluis*. Completion dates for capability upgrades were: *Primula* (February 2006), *Aster* (October 2006), *Lobelia* (October 2007), *Bellis* (February 2008), *Crocus* (October 2008) and *Narcis* (February 2009).

Structure: GRP hull fitted with active tank stabilisation, full NBC protection and air conditioning. Has automatic pilot and buoy tracking.

Operational: A 5 ton container can be carried, stored for varying tasks—HQ support, research, patrol, extended diving, drone control. The ship's company varies from 33 to 46 depending on the assigned task. Six divers are carried when minehunting. All of the class are based at Zeebrugge

Sales: Three of the class paid off for sale in July 1993 and were bought by France in 1997

PRIMULA 6/2008, Harald Carstens / 1335240

BELLIS 7/2008, Maritime Photographic / 1335239

SURVEY SHIPS

Notes: In addition to *Belgica* there are five small civilian manned survey craft. *Ter Streep*, *Scheldewacht II*, *De Parel II*, *Veremans* and *Prosper*.

1 SURVEY SHIP (AGOR/PBO)

Name	No	Builders	Launched	Commissioned
BELGICA	A 962	Boelwerf, Temse	6 Jan 1984	5 July 1984

Displacement, tons: 1,085 full load
Dimensions, feet (metres): 167.8 × 32.8 × 14.4 (51.1 × 10 × 4.4)
Main machinery: 1 ABC 6M DZC diesel; 1,600 hp(m) (1.18 MW) sustained; 1 Kort nozzle prop
Speed, knots: 13.5
Range, n miles: 5,000 at 12 kt
Complement: 26 (11 civilian)
Radars, Navigation: Racal Decca 1229; I-band.

Comment: Ordered 1 December 1982. Laid down 17 October 1983. Used for hydrography, oceanography, meteorology and fishery control. Marisat fitted. Based at Zeebrugge. Painted white.

BELGICA 6/2004, B Prézellen / 1044079

TRAINING SHIPS

1 SAIL TRAINING VESSEL (AXS)

Name	No	Builders	Commissioned
ZENOBE GRAMME	A 958	Boal and Zonen, Temse	27 Dec 1961

Displacement, tons: 149 full load
Dimensions, feet (metres): 92 × 22.5 × 7 (28 × 6.8 × 2.1)
Main machinery: 1 MWM diesel, 200 hp(m) (147 kW); 1 shaft
Speed, knots: 10
Complement: 14 (2 officers)
Radars, Navigation: Racal Decca; I-band.

Comment: Auxiliary sail ketch. Laid down 7 October 1960 and launched 23 October 1961. Designed for scientific research but now only used as a training ship.

ZENOBE GRAMME 7/2007, Adolfo Ortigueira Gil / 1167854

AUXILIARIES

Notes: It is planned to acquire a Command and Support Ship (MCS) to replace BNS *Godetia* in about 2015.

1 COMMAND AND SUPPORT SHIP (AGFH)

Name	No	Builders	Launched	Commissioned
GODETIA	A 960	Boelwerf, Ternse	7 Dec 1965	23 May 1966

Displacement, tons: 2,000 standard; 2,260 full load
Dimensions, feet (metres): 301 × 46 × 11.5 (91.8 × 14 × 3.5)
Main machinery: 4 ACEC-MAN diesels; 5,400 hp(m) (3.97 MW); 2 shafts; cp props
Speed, knots: 19
Range, n miles: 8,700 at 12.5 kt
Complement: 105 (8 officers)
Guns: 6 — 12 7 mm MGs.
Radars: Surface search: Racal Decca 1229; I-band
Helicopters: 1 Alouette III.

Comment: Laid down 15 February 1965. Rated as Command and Logistic Support Ship. Refit (1979-80) and mid-life conversion (1981-82) included helicopter deck and replacement cranes. Refitted in 1992 and again in 2006. To be equipped with a mine-avoidance sonar in 2009. Minesweeping cables fitted either side of helo deck have been removed. Can also serve as a Royal Yacht. To be replaced by new ship in about 2015.

GODETIA 5/2007, M Declerck / 1167853

1 SUPPORT SHIP (AGFH)

Name	No	Builders	Commissioned
STERN (ex-KBV 171)	A 963	Karliskronavarvet	3 Sep 1980

Displacement, tons: 375 full load
Dimensions, feet (metres): 164 × 279 × 7.9 (50 × 8.5 × 2.4)
Main machinery: 2 Hedemora V16A diesels; 4,480 hp(m) (3.28 MW) sustained; 2 shafts; cp props
Speed, knots: 18
Range, n miles: 3,000 at 12 kt
Complement: 13
Guns: 1 — 20 mm.
Radars: Navigation: 2 Kelvin Hughes; E/F- and I-band.
Helicopters: Platform for 1 light.

Comment: Transferred from Swedish Coast Guard on 6 October 1998. GRP hull identical to Landsort class. In Swedish service the ship carried a 20 mm gun, and had a Subsea sonar. Known as a Ready Duty Ship and used for fishery protection and SAR duties

STERN 6/2008, Herald Carstens / 1335238

TUGS

2 COASTAL TUGS (YTM)

Name	No	Launched
VALCKE (ex-Steenbank, ex-Astroloog)	A 950	1960
ALBATROS (ex-Wastgat)	A 996	1967

Displacement, tons: 183 full load
Dimensions, feet (metres): 89.7 × 24.9 × 11.8 (30.4 × 7.6 × 3.6)
Main machinery: Diesel-electric; 2 Deutz diesel generators; 1,240 hp(m) (911 kW); 1 shaft; 1 bow thruster
Speed, knots: 11
Complement: 8

Comment: Known as Ready Duty Ships. Details given are for A 950 which was launched in 1960. A 996 is 206 tons and was launched in 1967

ALBATROS 5/2008, A A de Kruif / 1335231

Belize

Country Overview

Formerly known as British Honduras, Belize became an independent state in 1981. The British monarch, represented by a governor-general, is head of state. With an area of 8,867 square miles, it has borders with Mexico to the north and Guatemala to the west; its 208 n mile coastline is on the Caribbean Sea and fringed by numerous coral barrier reefs and cays. The capital city is Belmopan while

the largest city and major port is Belize City. Territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits are not defined. The Belize National Coast Guard Service was formed on 29 November 2005.

Headquarters Appointments

Commander of the Coast Guard: Brigadier Cedric Borland

Personnel

- (a) 2009: 152 (2 officers)
- (b) The Maritime Wing of the Belize Defence Force comprises volunteers from the Army

Bases

Ladyville, Hunting Cay, Calabash Cay (Turneffe Atoll) (planned)

Maritime Patrol

Two Air Force operated Pilatus Britton-Norman Defenders are used for maritime surveillance.

PATROL FORCES

Notes: Current assets include

1. Two Helmatic 22 ft RIBs with twin Yamaha 115 hp outboards. Names *Stingray Commando* and *Blue Marlin Ranger*.
2. Two Pelikan 35 ft craft with twin Yamaha 200 hp outboards. Built at Bradloys Boatyard in 1996 and called *Ocean Sentinel* and *Reef Snipor*.
3. Six Colombian 32 ft skiffs with twin Yamaha 200 hp outboards, confiscated and commissioned in service 1995–97.
4. One 36 ft skiff.
5. Two US donated craft *Stinger I* and *Stinger II*.

PELIKAN CRAFT

6/2001, Belize Defence Force / 0109932

Benin FORCES NAVALES

Country Overview

Formerly part of French West Africa, the republic gained full independence in 1960 as the Republic of Dahomey; it was renamed The Republic of Benin in 1975. With an area of 43,484 square miles it has borders to the east with Nigeria and to the west

with Togo. Benin has a short coastline of 65 n miles with the Gulf of Guinea. The capital is Porto-Novo while Cotonou is the largest city and principal port. Benin has not claimed an Exclusive Economic Zone (EEZ) but is one of a few coastal states which claims a 200 n mile territorial sea. The naval force was established in 1978.

Headquarters Appointments

Commander of the Navy:
Commander Maxime Ahoyo

Aircraft

Dornier Do 128 and a DHC-6 Twin Otter reconnaissance aircraft are used for surveillance.

Bases

Cotonou

Personnel

2009: 220 (30 officers)

PATROL FORCES

Notes: There are two French-built 6 m river patrol craft with hydrojet propulsion.

2 CHINESE 27 METRE CLASS (PATROL CRAFT) (PB)

MATELOT BRICE KPOMASSE 798 LA SOTA 799

Displacement, tons: 80 full load
Dimensions, feet (metres): 88.6 × 13.4 × 4.6 (27 × 4.1 × 1.4)
Main machinery: 2 diesels; 1,000 hp (746 kW)
Complement: 13
Guns: 4—14.5 mm (2 twin) MGs
Radars: Navigation: I-band.

Comment: Understood to have been transferred from China in 2000. A similar craft is in service in Cape Verde.

KPOMASSE and SOTA
2001, Benin Navy
0114348

Bermuda

Country Overview

A British self-governing dependency, a Governor, appointed by the British Crown, is responsible for external affairs, internal security, defence, and the police. Situated in the north Atlantic Ocean some 650 n miles southeast of Cape Hatteras, the country consists

of six principal islands, of which the largest is 14 miles long, linked by bridges and a causeway; there are some 150 other small islands, islets, and rocks, of which about 20 are inhabited. Hamilton is the capital, chief port and largest town. Territorial seas (12 n miles) and an Exclusive Economic Zone (EEZ) (200 n miles) are claimed.

Headquarters Appointments

Commanding Officer: Sergeant Keith Senior

Bases

Hamilton

POLICE

Notes: In addition to patrol craft, three tugs, *Powerful*, *Faithful* and *Refit* are operated by the Department of Marine and Port Services.

1 AUSTAL PATROL CRAFT (PB)

GUARDIAN

Displacement, tons: To be announced
Dimensions, feet (metres): 53.5 x 16.1 x 3.9 (16.3 x 4.9 x 1.2)
Main machinery: 2 Caterpillar C12 diesels; 1,300 hp (970 kW); 2 shafts
Speed, knots: 28
Range, n miles: 400 at 25 kt
Complement: 3 plus 8 passengers

Comment: Contract with Austal Ships in August 2005 to build aluminium hull craft for operations up to 200 n miles from shore. Similar to craft operated by the New South Wales police. Delivery was made on 25 September 2006.

GUARDIAN

9/2006, Austal / 1335333

4 PATROL CRAFT (PBI)

HERON IV

Comment: *Heron I*, delivered in July 1997 to replace the previous craft of the same name, and *Heron III* delivered in June 1992 are 22 ft Boston Whalers fitted with twin Yamaha 225 hp and twin Yamaha 115 hp outboards, respectively. *Heron II* delivered in August 1996 to replace the previous craft of the same name, is a 27 ft Boston Whaler with twin Yamaha 250 hp(m) outboard engines. *Heron IV*, delivered in 2001, is a further 22 ft Boston Whaler with twin 115 hp outboards.

HERON II

6/1997, Bermuda Police / 0012079

2 SAR CRAFT (SAR)

RESCUE I RESCUE II

Comment: *Rescue I* replaced the craft of the same name in November 1998 and *Rescue II* replaced the craft of the same name in 2001. Both are Halmatic 24 ft Arctic RIBs with twin 200 hp Yamaha outboards and a complement of three.

HALMATIC ARCTIC RIB

2001, Bermuda Police / 0108933

Bolivia

ARMADA BOLIVIANA

Country Overview

The Republic of Bolivia is one of two landlocked countries in South America; Paraguay is the other. With an area of 424,165 square miles, it has borders to the north and east with Brazil, to the southeast with Paraguay, to the south with Argentina, and to the west with Chile and Peru. It has a 211 n mile shoreline with Lake Titicaca. The constitutional capital is Sucre while the administrative capital and seat of government is La Paz which is connected by railway to the Chilean port of Antofagasta.

The Bolivian Navy was founded in 1963 and received its present name in 1982. Its purpose is to patrol some 10,000 miles in three geographical areas. The Amazon basin includes the rivers Ichilo, Mamore, Itenez, Yacuma, Orthon, Abuna, Beni and Madre de Dios. The central basin comprises Lake Titicaca while the Del Plata basin includes the rivers Paraguay and Bermejo. Most advanced training is carried out in Argentina and Peru.

Headquarters Appointments

Commandant General of the Navy:
 Vice Admiral José Luis Cabas V

Headquarters Appointments — continued

Chief of the Naval Staff:
 Rear Admiral Rafael Bandeira Arza
Inspector General:
 Rear Admiral Armando Pacheco Gutierrez

Personnel

- (a) 2009: 6,658 (including Marines)
 (b) 12 months' selective military service

Organisation

The country is divided into six naval districts, three naval areas and a Fuerza de Tareas Especiales.
 1st Naval District (Beni) (HQ Riberaita). Rivers Beni.
 2nd Naval District (Mamore) (HQ Trinidad). Rivers Ichilo and Mamore.
 3rd Naval District (Madera) (HQ Puerto Guayamerin). Rivers Madera and Itenez.
 4th Naval District (Titicaca) (HQ San Pedro de Tiquina). Lake Titicaca.

5th Naval District (Santa Cruz de la Sierra) (HQ Puerto Quijarro). River Paraguay.
 6th Naval District (Pando) (HQ Cobija). Rivers Acre, Madre dos Dios and Tahuamanu.
 1st Naval Area (Cochabamba) (Puerto Villarreal). Naval yard and oil transport.
 2nd Naval Area (Santa Cruz). Support duties.
 3rd Naval Area (Bermejo)
 4th Naval Area (La Paz).
 Fuerza de Tareas Especiales consists of five task groups (based at Guayamerin, Cobija, Riberaita, Puerto Suarez and Copacabana) to provide support in counter-drug operations.

Marine Corps

The Bolivian Navy has seven marine corps battalions (BIM I-VII). Two are located in 4th Naval District and one in each of the remainder.

Prefix to Ships' Names

ARB

PATROL FORCES

Notes: It is reported that an unknown number of assault craft were donated by China in 2007-08 and 18 RHIBs by Chile in 2008.

3 RIVER PATROL CRAFT (PBR)

CAPITÁN PALOMEQUE PR 221 ANTOFAGASTA PR 302 GENERAL BANZER PR 301

Displacement, tons: 8 full load
Dimensions, feet (metres): 42.7 × 10.5 × 1.6 (13.8 × 3.2 × 0.6)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 27
Complement: 4
Guns: 1 – 7.62 mm MG

Comment: Details given are for *Capitán Palomeque* acquired in 1993. The others are similar in appearance and all are less than ten years old. Operate in the 2nd and 3rd Districts

CAPITÁN PALOMEQUE

1996, Bolivian Navy / 0056585

1 SANTA CRUZ CLASS (PBR)

SANTA CRUZ DE LA SIERRA PR 501

Displacement, tons: 46 full load
Dimensions, feet (metres): 68.9 × 19 × 3.9 (21 × 5.8 × 1.2)
Main machinery: 2 Detroit diesels; 2 shafts
Speed, knots: 20
Range, n miles: 800 at 16 kt
Complement: 10
Guns: 2 – 12.7 mm MGs
Radars: Surface search: Furuno; I-band.

Comment: Built by Hope Shipyards, Louisiana, in 1985. Used both as a patrol craft and supply ship. Operates in the 5th District on the river Paraguay.

SANTA CRUZ DE LA SIERRA (old number)

1996, Bolivian Navy / 0056584

42 RIVER PATROL CRAFT (PBR)

LP 01-42

Comment: Thirty-two Piranas were delivered from 1992-96. Fitted with one 12.7 mm MG and has twin outboards. Ten more craft delivered by the US 1998-99.

PIRANA Mk II

1996, Bolivian Navy / 0056588

LAND-BASED MARITIME AIRCRAFT

Notes: (1) One Cossne 402C is based at La Paz-El Alto
 (2) An agreement was reached in 2006 to acquire three ex-Spanish Army CASA C-212-100 aircraft. These are probably used as transport aircraft and/or for medevac.
 (3) Two Cougar AS 532AC helicopters are on extended loan from Venezuela. They are used for transport and VIP purposes.

AUXILIARIES

Notes: (1) Approximately 30 Rodman craft are used for transport and logistic support. A mixture of craft was acquired from Spain in 1998. These include 15 craft of 6-8 m with pennant numbers BA 401-415. They are capable of carrying 20 troops or one medium tracked vehicle. There are five 11 m craft with pennant numbers FNM 400-404. There are two 17 m catamaran craft with pennant numbers FNM 342-343
 (2) *Guayamerín* (TNTB-01) is an LCM used as a transport vessel on Lake Titicaca. Built in Bolivia she was commissioned on 22 July 1998.
 (3) A dredger *Pirai II* (FNDR-01) was commissioned on 11 August 2001.

Name	No	Tonnage
JULIAN APAZA	TNBH 401	150
XAVIER PINTO TELLERIA	TNBH 01	-

Comment: Julian Apaza given by the US; assembled in 1972 and based at Lake Titicaca. Telleria was built in 1997 and is based at Puerto Villarród.

1 TRAINING VESSEL

BUQUE ESCUELA NAVAL MILITAR

Displacement, tons: 80 full load
Dimensions, feet (metres): 117.3 x 29.5 x 3.9 (35.7 x 9.0 x 1.2)
Main machinery: 2 diesels; 1,300 hp (969 kW)
Speed, knots: 18
Complement: 15 plus 50 trainees

Comment: Catamaran design. Launched at Tiquina, Lake Titicaca on 9 May 2001. Following a donation by the Venezuelan government in 2007, the ship was launched in 2008 and is expected to be completed in 2009.

Brazil

MARINHA DO BRASIL

Country Overview

The Federal Republic of Brazil is the largest country in South America. With an area of 3,286,500 square miles it has borders to the north with Colombia, Venezuela, Guyana, Suriname and French Guiana, to the south with Uruguay and to the west with Argentina, Paraguay, Bolivia, and Peru. It has a coastline of 4,045 n miles with the south Atlantic Ocean. There are some 23,220 n miles of internal waterways that consist primarily of the Amazon and its tributaries; the river is navigable by ocean-going ships from its mouth to Iquitos in Peru. The capital is Brasilia while the largest city is São Paulo. The principal ports are the former capital, Rio de Janeiro, Santos, Paranaguá, Recife, and Vitória. Manaus is an important river port. Territorial seas (12 n miles) are claimed. An EEZ (200 n miles) is claimed and its limits have been partly defined by boundary agreements.

Headquarters Appointments

Commander of the Navy:
 Admiral Júlio Soares de Moura Neto
Chief of Naval Staff:
 Admiral Aurélio Ribeiro da Silva Filho
Commandant General Brazilian Marine Corps:
 Admiral (Marine Corps) Alvaro Augusto Dias Monteiro
General Director of Personnel:
 Admiral José Antonio de Castro Leal
General Director of Material:
 Admiral Marcus Vinicius Oliveira dos Santos
General Secretary of Navy:
 Admiral Marcus Martins Torres
Vice Chief of Naval Staff:
 Vice Admiral Rodrigo Otávio Fernandes de Hônkis

Senior Officers

Commander-in-Chief, Fleet:
 Vice Admiral Fernando Edoardo Studart Wiemer
Commander, Fleet Marine Force:
 Vice Admiral (Marine Corps) Paulo César Stingelím Guimarães
Commander, I Naval District:
 Vice Admiral Gilberto Max Roffé Hirschfeld
Commander, II Naval District:
 Vice Admiral Amon Lima Barbosa
Commander, III Naval District:
 Vice Admiral Edison Lawrence Maristh Dantas
Commander, IV Naval District:
 Vice Admiral Eduardo Monteiro Lopes
Commander, V Naval District:
 Vice Admiral Arthur Pires Ramos
Commander, VI Naval District:
 Rear Admiral Cesar Sidonio Daihs Moreira de Souza
Commander, VII Naval District:
 Rear Admiral Edouardo Bacellar Leal Ferreira
Commander, VIII Naval District:
 Vice Admiral Terenilton Sousa Santos

Senior Officers – continued

Commander, IX Naval District:
 Vice Admiral Pedro Fava

Personnel

- a) 2009. 38,800 (5,800 officers) Navy; (including 2,100 naval air)
 15,800 (800 officers) Marincs
- b) One year's national service

Bases

Arsenal de Marinha do Rio de Janeiro – Rio de Janeiro (Nava shipyard with three dry docks and one floating dock with graving docks of up to 70,000 tons capacity)
 Base Naval do Rio de Janeiro – Rio de Janeiro (Main Naval Base with two dry docks)
 Base Almirante Castro e Silva – Rio de Janeiro (Naval Base for submarines)
 Base Naval de Aratu – Bahia (Naval Base and repair yard with one dry dock and synchrolift)
 Base Naval de Val-de-Côes – Pará (Naval River and repair yard with one dry dock)
 Base Naval de Natal – Rio Grande do Norte (Small Naval Base and repair yard with one floating dock)
 Base Fluvial de Ladário – Mato Grosso do Sul (Small Naval River Base and repair yard with one dry dock)
 Base Aérea Naval de São Pedro d’Aldeia – Rio de Janeiro (Naval Air Station)
 Estação Naval do Rio Negro – Amazonas (Small Naval River Station and repair yard with one floating dock)
 Estação Naval do Rio Grande – Rio Grande do Sul (Small Naval Station and repair yard)

Organisation

Naval Districts as follows:
 I Naval District (HQ Rio de Janeiro)
 II Naval District (HQ Salvador)
 III Naval District (HQ Natal)
 IV Naval District (HQ Belém)
 V Naval District (HQ Rio Grande)
 VI Naval District (HQ Ladário)
 VII Naval District (HQ Brasília)
 VIII Naval District (HQ São Paulo)
 IX Naval District (HQ Manaus)

Naval Aviation

Squadrons: São Pedro da Aldeia; HA-1 Super Lynx; HS-1 Sea King; HI-1 JetRanger; HU-1 Ecureuil 1 and 2; HU-2 Super Puma/Cougar; VF 1 Skyhawk AF1
 Manaus; HU-3 Ecureuil.
 Ladário; HU-4 Jat Ranger.
 Rio Grande; HU-5 Ecureuil.

Prefix to Ships’ Names

These vary, indicating the type of ship for example, N Ae = Aircraft Carrier; CT = Destroyer.

Marines (Corpo de Fuzileiros Navais)

Headquarters at Fort São José, Rio de Janeiro.
 Divisão Anfíbia: 3 Infantry Battalions (Riachuelo, Humaitá and Paissandu), 1 Artillery Battalion, 1 C^o Battalion, 1 Air Control and Air Defence Battalion, 1 Tank Battalion, Tropa de Reforço: 1 Engineer Battalion, 1 Amphib Vehicles Battalion, 1 Logistic Battalion, 1 Police Company, 1 Disembarkation Support Company.
 Special Forces Battalion (Tonelero).
 Grupamentos Regionais: One security group in each naval district and command (Rio de Janeiro, Salvador, Natal, Belem, Rio Grande and Ladário). There is an amphibious river group at Manaus.

SUBMARINES

Notes: (1) Following the revival by President Lula in June 2007 of plans to acquire a nuclear-powered submarine, the programme was formally re-launched on 26 September 2008 by the Commander of the Brazilian Navy. The co-ordination office COGESN is to be based in Rio de Janeiro and is to be headed by Fleet

Admiral (Reserve) José Alberto Accioli Fragelli who is to administer an annual budget of USD250 million. The 6,000 ton submarine is to enter service in 2020. A 11 MW prototype nuclear reactor is under development at the Aramar Experimental Centre in Sao Paulo state. A co-operative agreement with the French shipbuilder

DCNS is expected to facilitate French design support on the hull and propulsion.

(2) As part of the Franco-Brazilian arms package signed between the Presidents of France and Brazil on 12 February 2008, it is likely that agreement will be reached to build up to four Marlin-class conventional submarines. The first boat is likely to be built

in France while the remainder may be built at a new Brazilian Navy shipyard at Sepetiba Bay, Rio de Janeiro State. The existing submarine building shipyard at Arsenal de Marinha, Rio de Janeiro, is to remain available for the support and upgrade of the Tupi and Tikuna classes, both based on the Gorman Type 209/1400 class.

1 TIKUNA (TYPE 209/1450) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
TIKUNA	S 34	Arsenal de Marinha, Rio de Janeiro	11 June 1986	9 Mar 2005	16 Dec 2005
Displacement, tons: 1,454 surfaced; 1,586 dived		A/S torpedoes may also be carried, 18 km (9.7 n miles) at 45 kt. Total of 16 torpedoes		Directorate. Contract effective with HDW in October 1995. Plans for a second of class have been cancelled	
Dimensions, feet (metres): 203.4 × 20.3 × 18 (62.0 × 6.2 × 5.5)		Mines: 32 IPQM/Consub MCF-01/100 carried in lieu of torpedoes		Modernisation: Tigerfish torpedoes are likely to be replaced by Mk 48 Mod 6 and a Lockheed Martin integrated combat system AN/BYG-501 Mod 1D is to be installed. The upgrade is also likely to include a new flank array. Work is to be completed by 2011	
Main machinery: Diesel-electric; 4 MTU 12V 396 diesels; 3,760 hp (m) (2.76 MW); 4 Siemens alternators; 1 Siemens motor; 1 shaft		Countermeasures: ESM. Argos AR-900, radar warning.		Structure: Improved Tupi design similar to Turkish Gur class. Diving depth, 300 m (985 ft). Very high-capacity batteries with GRP lead-acid cells by Microrite. More powerful engines than Tupi. Fitted with two Kollmorgen Mod 76 non penetrative optronic masts.	
Speed, knots: 11 surfaced/snorting; 22 dived		Weapons control: STN Atlas Elektronik ISUS 83-13; 2 Kollmorgen Mod 76 periscopes.		Operational: Endurance, 60 days. Sea trials began on 10 November 2005	
Range, n miles: 11,000 at 8 kt surfaced; 400 at 4 kt dived		Radars: Navigation Terma Scantier; I-band.			
Complement: 41 (8 officers)		Sonars: Atlas Elektronik CSU-83/1; hull-mounted; passive/active search and attack; medium frequency. STN Atlas Elektronik FAS-3 flank array.			
Torpedoes: 8–21 in (533 mm) bow tubes. Marconi Mk 24 Tigerfish Mod 1 or 2; wire-guided; active homing to 13 km (7 n miles) at 35 kt, passive homing to 29 km (15.7 n miles) at 24 kt; warhead 134 kg. IPQM designed		Programmes: Planned intermediate stage between Tupi class and the first SSN. Designed by the Naval Engineering

4 TUPI (TYPE 209/1400) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
TUPI	S 30	Howaldtswerke-Deutsche Werft, Kiel	8 Mar 1985	28 Apr 1987	6 May 1989
TAMOKO	S 31	Arsenal de Marinha, Rio de Janeiro	15 July 1986	18 Nov 1993	17 July 1995
TIMBIRA	S 32	Arsenal de Marinha, Rio de Janeiro	15 Sep 1987	5 Jan 1996	16 Dec 1996
TAPAJÓ	S 33	Arsenal de Marinha, Rio de Janeiro	6 Aug 1992	5 June 1998	21 Dec 1999

Displacement, tons: 1,453 surfaced; 1,590 dived
Dimensions, feet (metres): 200.8 × 20.3 × 18
 (61.2 × 6.2 × 5.5)

Main machinery: Diesel-electric; 4 MTU 12V 493 AZ80 GA31L diesels; 2,400 hp(m) (1.76 MW); 4 Siemens alternators; 1.7 MW; 1 Siemens motor; 4,600 hp(m) (3.36 MW) sustained; 1 shaft

Speed, knots: 11 surfaced/snorting; 21.5 dived
Range, n miles: 8,200 at 8 kt surfaced, 400 at 4 kt dived
Complement: 36 (7 officers)

Torpedoes: 8–21 in (533 mm) bow tubes. 16 Marconi Mk 24 Tigerfish Mod 1 or 2; wire-guided; active homing to 13 km (7 n miles) at 35 kt; passive homing to 29 km (15.7 n miles) at 24 kt; warhead 134 kg. IPQM anti-submarine torpedoes may also be carried; range 18 km (9.7 n miles) at 45 kt. Swim-out discharge.

Countermeasures: ESM: IPQM/Elebra Defensor ET/SLR-1X; radar intercept.

Weapons control: Ferranti KAFS-A10 action data automation (to be replaced by UDS SUBTICS)

Radars: Navigation: Terma Scantec; I-band.

Sonars: Atlas Elektronik CSU-83/1; hull-mounted; passive/active search and attack; medium frequency. STN Atlas Elektronik FAS-3 flank array.

Programmes: Contract signed with Howaldtswerke in February 1984. Financial negotiations were completed with the West German Government in October 1984. Original plans included building four in Brazil followed by two improved Tupis for a total of six. In the end only three were constructed in Brazil

Modernisation. A programme (Mod Sub) to upgrade auxiliary machinery, sonars, weapon control, countermeasures

and navigation systems was announced in 2003. Refit work on S 31 was completed in June 2005 while work on S 32 was completed in January 2007. The programme is to be completed in 2008. Tigerfish torpedoes are to be replaced by Mk 48 Mod 6 and a Lockheed Martin integrated combat system AN/BYG-501 Mod 1D is to be installed. The upgrade is also likely to include a new flank array. Work on all four boats is to be completed by 2011

Structure: Hull constructed of HY 80 steel. Single hull. Diving depth, 250 m (820 ft). Equipped with Sperry Mk 29 Mod 3 SINS and two Kollmorgen Mod 76 periscopes.

Operational: Based at Niterói, Rio de Janeiro.

AIRCRAFT CARRIERS

1 CLEMENCEAU CLASS (CVM)

Name	No	Builders	Laid down	Launched	Commissioned
SÃO PAULO (ex-Foch)	A 12 (ex-R 99)	Chantiers de l'Atlantique, St. Nazaire	15 Feb 1957	23 July 1960	15 July 1963

Displacement, tons: 27,307 standard; 33,673 full load
Dimensions, feet (metres): 869.4 oa; 780.8 pp x 104.1 hull (168 oa) x 28.2 (265, 238 x 31.7; 51.2 x 8.6)
Flight deck, feet (metres): 850 x 154 (259 x 47)
Main machinery: 5 Le Valley boilers; 640 psi (45 kg/cm²); 840°F (450°C); 2 GEC Alsthom turbines; 126,000 hp (93 MW); 2 shafts
Speed, knots: 30
Range, n miles: 7,000 at 18 kt; 4,800 at 24 kt; 3,500 at full power
Complement: 1,220 (80 officers); 358 (80 officers) aircrew

Missiles: SAM: 3 Matra Sadral; Mistral missiles; IR homing to 4 km (2.2 n miles) at 2.5 Mach; warhead 3 kg
Guns: 5-12.7 mm MGs.
Countermeasures: 2 CSEE AMBL 2A Sagai (10 barrelled trainable launchers), chaff and IR flares.
Combat data systems: IPqM/Elebra SICONTA Mk 4 tactical system, Links YB and 14, Inmarsat.
Weapons control: 2 Sagem DMa optical directors.
Radars: Air search: Thomson-CSF DRBV 23B ①, D-band. Air/surface search: Thomson-CSF DRBV 15 ②, E/F-band. Heightfinder: 2 DRBI 10 ③, E/F-band. Navigation: Racal Decca 1226; I-band. Fire control: 2 Thomson-CSF DRBC 32C. Tacan: NRBP-2B. Landing approach control: NRBA 51 ④, I-band.

Fixed-wing aircraft: 10-15 A-4 Skyhawks.
Helicopters: 4-6 Agusta SH-3A/D Sea Kings; 3 Aerospatiale UH-12/13; 2 UH-14 Cougar.

Programmes: Acquired from France on 15 November 2000 and following modifications in Brest, arrived in Brazil in February 2001.

Modernisation: A foldable mini ski-jump has been fitted to both catapults. The jet deflectors are enlarged (this implies reducing the area of the forward lift). Crotale and Sadral systems disembarked before transfer. Refit in 2003 included re-tubing of boilers and refurbishment of catapults. A further refit 2005-08 included a full machinery overhaul, flight deck renovations and the installation of three twin Matra SAM. The combat data system was upgraded to SICONTA Mk 4.

Structure: Flight deck, island superstructure and bridges, hull (over machinery spaces and magazines) are all armour plated. There are three bridges. Flag, Command and Aviation.

Two Mitchell-Brown steam catapults, Mk BS 5; able to launch 20 ton aircraft at 110 kt. The flight deck is angled at 8°. Two lifts 52.5 x 36 ft (16 x 10.97 m) one of which is on the starboard deck edge. Dimensions of the hangar are 590.6 x 78.7 x 23 ft (180 x 24 x 7 m).

Operational: Oil fuel capacity is 3,720 tons. Service life 2025.

FRIGATES

Notes. Acquisition of up to six new frigates is reportedly under consideration. Following the Franco-Brazilian arms package of 12 February 2008, the French FREMM class is likely to be a strong contender.

3 BROADSWORD CLASS (TYPE 22) (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned	Recommissioned
GREENHALGH (ex-Broadsword)	F 48 (ex-F 88)	Yarrow Shipbuilders, Glasgow	7 Feb 1975	12 May 1976	3 May 1978	30 June 1995
BOSISIO (ex-Brazen)	F 48 (ex-F 91)	Yarrow Shipbuilders, Glasgow	18 Aug 1978	4 Mar 1980	2 July 1982	31 Aug 1996
RADEMAKER (ex-Battleaxe)	F 49 (ex-F 89)	Yarrow Shipbuilders, Glasgow	4 Feb 1976	18 May 1977	28 Mar 1980	30 Apr 1997

Displacement, tons: 3,500 standard; 4,731 full load
Dimensions, feet (metres): 430 oa, 410 wl x 48.5 x 19.9 (screws) (131.2; 125 x 14.8 x 6)

Main machinery: COGOG; 2 RR Olympus TM3B gas turbines, 50,000 hp (37.3 MW) sustained; 2 RR Tyne RM1C gas turbines, 9,900 hp (7.4 MW) sustained; 2 shafts; cp props

Speed, knots: 30; 18 on Tynes
Range, n miles: 4,500 at 18 kt on Tynes
Complement: 239 (17 officers)

Missiles, SSM: 4 Aerospatiale MM 38 Exocet ●; inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.

SAM: 2 British Aerospace 8-barrelled Seawolf GWS 25 Mod 4 ●; command line of sight (CLOS) TV/radar tracking to 5 km (2.7 n miles) at 2+ Mach; warhead 14 kg; 32 rounds.

Guns: 2 Bofors SAK 40 mm/L 70-350 A-3 ●; 300 rds/min to 12 km (6.5 n miles)
 2 Oerlikon BMARC 20 mm GAM BO1; 1,000 rds/min to 2 km.

Torpedoes: 6 324 mm Plessey STWS Mk 2 (2 triple) tubes ●
 Honeywell Mk 46 Mod 5; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys: 4 Loral Hycor SRBOC Mk 36, 6-barrelled fixed launchers ●; for chaff
 Graseby Type 182, towed torpedo decoy.

GREENHALGH

ESM MEL UAA-2; intercept.
Combat data systems: CAAIS; Link YB being fitted. Inmarsat

Weapons control: GWS 25 Mod 4 (for SAM), GWS 50 (Exocet).
Radars: Air/surface search: Marconi Type 967/968 ●, D/E-band.
 Navigation: Kelvin Hughes Type 1006; I-band
 Fire control: Two Marconi Type 910 ●; MKu-band (for Seawolf).

Sonars: Plessey Type 2050; hull-mounted; search and attack, medium frequency

Helicopters: 2 Westland Super Lynx AH-11A ●

Programmes: Contract signed on 18 November 1994 to transfer four Batch I Type 22 frigates from the UK, one

(Scale 1 : 1,200), Ian Sturton / 0017084

in 1995, two in 1996 and one in 1997. It is not planned to buy more Type 22s.

Modernisation: Plans to fit a single 57 mm gun on the bow were shelved in favour of a 40 mm gun on each beam. These guns are being taken from the Niteroi class. A modernisation programme is planned to start in mid-2009. Upgrades are likely to include replacement of Exocet MM 38 with MM 40 and modernisation of the Seawolf SAM system.

Structure: Accommodation modified in UK service to take 65 officers under training

Operational: Primary role is ASW. Form part of Second Escort Squadron at Niteroi, Rio de Janeiro. F 47 decommissioned in 2005

Range, n miles: 5,300 at 17 kt on 2 diesels; 4,200 at 19 kt on 4 diesels; 1,300 at 28 kt on gas

Complement: 209 (22 officers)

Missiles: SSM: 4 Aerospatiale MM 40 Exocet (2 twin) launchers; inertial cruise; active radar homing to 70 km (40 n miles) at 0.9 Mach; warhead 165 kg, sea-skimmer.

SAM: AESN Albatros (8 cell, 2 reloads); Aspide 2000, semi-active radar homing to 21 km (11 n miles) at 2.5 Mach.

Guns: 1 Vickers 4.5 in (115 mm)/55 Mk 8; 25 rds/min to 22 km (12 n miles) anti-surface; 8 km (3.2 n miles) anti-aircraft; weight of shell 21 kg.

2 Bofors SAK 40 mm/L 70-800 Mk 3 Sea Trinity; 330 rds/min to 4 km (2.2 n miles).

Torpedoes: 8-324 mm Mk 32 (2 triple) tubes; Honeywell Mk 46 Mod 5; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

A/S mortars: 1 Bofors 375 mm trainable rocket launcher (twin-tube); automatic loading; range 1,600 m.

Countermeasures: Decoys: 4 IPqM/Elebra MDLS 16-barrel chaff launchers

ESM. Rascal Cutlass B-1B; intercept.

LIBERAL

Combat data systems: IPqM/Elebra Siconta II Link Y8.

Weapons control: Saab/Combtech: EOS-400/10B optronic director, WSA 401 FCS

Radars: Air/surface search: AESN RAN 20 S (3L); D-band. Surface search: Terma Scantec 4100; I-band.

Fire control: 2 AESN RTN 30X; I/J-band.

Navigation: Furuno FR-1942 Mk 2; I-band.

Sonars: EDO 997F; hull-mounted, active search and attack; medium frequency. EDO 700E VDS (F 40, F 41); active search and attack.

Helicopters: 1 Westland Super Lynx AH-11A

Programmes: A contract announced on 29 September 1970 was signed between the Brazilian government and Vosper Thornycroft for the design and building of six Vosper Thornycroft Mark 10 frigates. Seventh ship with

differing armament was ordered from Navy Yard, Rio de Janeiro in June 1981 and is used as a training ship.

Modernisation: The modernisation plan (Mod Frag) first signed in March 1995 included replacing Seacat by Aspide, Plessey AWS 2 radar by Alenia RAN 20S, RTN 10X by RTN 30X, ZW06 radar by Terma Scantec, new 40 mm mountings, new EW equipment, combat data system and hull-mounted sonar. Ikara removed. Work was undertaken by Elebra. *Liberal* completed 2001. *Defensora* (2002), *Independência* (2004) and *Niterói* (2004). *Constituição* and *União* were completed in 2005.

Structure: Originally F 40, 41, 44 and 45 were of the A/S configuration. F 42 and 43 general purpose design. Fitted with retractable stabilisers.

Operational: Endurance, 45 days' stores, 60 days' provisions. The helicopter has Sea Skua ASM. All are based at Niterói and form the First Escort Squadron.

Radars: Surface search: AESN RAN-20S ●; F-band.
Navigation: Terna Scenter 4100, E/F/I-band
Fire control: AESN RTN 30-X ●; I/J-band (for Albatross
and guns).
Sonars: EDO 997(F), hull-mounted; active; medium
frequency.

Helicopters: 1 AH-11A West and Super Lynx ●.

Programmes: Ordered in 1994 as a follow-on to the
Inhauma programme. The building programme has

BARROSO

(Scale 1 : 900), Ian Sturton / 0506270

BARROSO

6/2008* / 133540

been beset by funding difficulties and although a
class of six vessels was once projected, it is unlikely
that more than a further three vessels will be
built.

Structure: The hull is some 4.2 m longer than the Inhauma
class to improve sea-keeping qualities and allow extra

space in the engine room. The design allows the use of
containerised equipment to aid modernisation. Efforts
have been made to incorporate stealth technology
Vosper stabilisers.

Operational: To become operational in March 2009

SHIPBORNE AIRCRAFT (FRONT LINE)

Notes: It is planned to acquire up to three AEW aircraft by 2022

Numbers/Type: 15/3 McDonnell Douglas AF-1/AF-1A Skyhawk.
Operational speed: 560 kt (1,040 km/h).
Service ceiling: 45,000 ft (13,780 m).
Range: 1,060 n miles (1,965 km).

Role/Weapon systems: Acquired from Kuwait Air Force in September 1998 to restore carrier fixed wing flying. A further five aircraft are kept as spares. An upgrade programme is under consideration. A Letter of Intent is expected in 2009. Sensors: APQ 145B radar; ESM/ECM. Weapons: AAM; 4 AIM 9H, 2 Colt 20 mm cannon; ASVW; bombs and rocket pods.

AF-1 10/2001, S C Neto/Mario R V Carneiro / 0569157

Numbers/Type: 4/1 Sikorsky SH-3A/SH-3B.
Operational speed: 125 kt (230 km/h).
Service ceiling: 12,200 ft (3,720 m).
Range: 400 n miles (740 km).

Role/Weapon systems: ASW helicopter, carrierborne and shore-based for medium-range ASW, ASVW and SAR. Sixteen delivered between 1970 and 1997. Three have been lost. Sensors: SMA APS-705(V)II or Northrop Grumman LN-66 HP search radar; Bendix AQS 13B or AQS 18(V) dipping sonar. Weapons: ASW; up to 2 x Mk 46 torpedoes, or 4 Mk II depth bombs. ASVW; 2 x AM 39 Exocet missiles.

Numbers/Type: 2/5 Aerospatiale UH-14 (AS 332F1 Super Puma)/UH-14 (AS 532 SC Cougar)

Operational speed: 120 kt (222 km/h).
Service ceiling: 12,000 ft (3,657 m).
Range: 445 n miles (825 km).

Role/Weapon systems: SAR, troop transport and ASVW. Sensors: Bendix RDR 1400C search radar. Weapons: None.

UH-14 6/2003, S C Neto/Mario R V Carneiro / 0569155

Numbers/Type: 4 Sikorsky S-70B Seahawk.
Operational speed: 135 kt (250 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 600 n miles (1,110 km).

Role/Weapon systems: Four ex-US Navy aircraft ordered, under FMS funding arrangements, in June 2008. The aircraft are to have an ASW/ASUW role. Sensors: APS-124 search radar; Helras dipping sonar. Weapons: ASW: 2 Mk 46 torpedoes; Penguin ASM.

SEAHAWK S-70B (Turkish colours) 6/2002, Selçuk Emre / 0533251

Numbers/Type: 12 AH-IIA Westland Super Lynx.
Operational speed: 125 kt (232 km/h).
Service ceiling: 12,000 ft (3,650 m).
Range: 130 n miles (240 km).

Role/Weapon systems: ASW/ASV roles. First batch upgraded in 1994-97 to Super Lynx standard with Mk 3 radar and Racal Kestrel EW suite. Sensors: Sea Spray Mk 1/Mk 3 radar; Racal MIR 2 ESM; Sea Star III FLIR. Weapons: ASW; 2 x Mk 46 torpedoes, or Mk II depth bombs. ASV; 4 x BAe/Ferranti Sea Skua missiles.

AH-IIA 5/2006, Guy Toremans / 1335337

Numbers/Type: 18 Aerospatiale UH-12 Esquilo (AS-350BA Ecureuil).
Operational speed: 147 kt (272 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 240 n miles (445 km).

Role/Weapon systems: Support helicopters for Fleet liaison and Marine Corps transportation. Sensors: None. Weapons: 2 x axial 7.62 mm MGs or 1 x lateral MG or 1 x rocket pod.

UH-12 12/2002, Mario R V Carneiro / 0569156

Numbers/Type: 7 Aerospatiale UH-13 Esquilo (AS 355F2 Ecureuil 2).
Operational speed: 121 kt (224 km/h).
Service ceiling: 11,150 ft (3,400 m).
Range: 240 n miles (445 km).

Role/Weapon systems: SAR, liaison and utility in support of Marine Corps. One transferred to Uruguay in 2006. Sensors: Search radar. Weapons: 2 x axial 7.62 mm MGs or 1 x lateral MG or 1 x rocket pod.

UH-13 3/2008, M Declerck / 1335336

Numbers/Type: 16 IH-6B (Bell JetRanger III).
Operational speed: 115 kt (213 km/h).
Service ceiling: 20,000 ft (6,100 m).
Range: 368 n miles (682 km).

Role/Weapon systems: Utility and training helicopters. One lost in June 2005. Sensors: None. Weapons: 2 x 7.62 mm MGs or 1 lateral 12.7 mm MG or 2 x rocket pods.

IH-6B 12/2002, Mario R V Carneiro / 0569154

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Numbers/Type: 8 Lockheed P-3BR Orion.
Operational speed: 411 kt (761 km/h).
Service ceiling: 26,300 ft (8,025 m).
Range: 4,000 m (7,410 km).

Role/Weapon systems: Twelve P-3 A/B acquired by the Air Force from the US Navy in 2002. Eight being upgraded to P-3BR standard by EADS/CASA. Contract awarded in April 2005 and aircraft to be delivered 2008–10. The remaining four aircraft are to be used for spare parts. Sensors: Raytheon AN/APS-137B(V)5 radar, ASQ-81 MAD, EADS/CASA FITS, AAR-47 warning receiver, AN/ALR 86(V)3 ESM, AN/ALQ-78A countermeasures suite. Weapons: ASW; eight Mk 46 torpedoes, eight Mk 14 depth charges. ASuW: 4 Aerospaziale AM-39 Exocet.

P-3BR 2002, Brazilian Navy / 0538045

Numbers/Type: 10/9 Bandeirante P-95A/P-95B (EMB-111(B))
Operational speed: 194 kt (360 km/h).
Service ceiling: 25,500 ft (7,770 m).
Range: 1,590 n miles (2,945 km).

Role/Weapon systems: Air Force operated for coastal surveillance role by four squadrons. Sensors: MEL Super Searcher (P-95B) or Eaton/AIL APS-28 Sea Searcher (P-95A) search radar, searchlight pod on starboard wing, EFIS-74 (electronic flight instrumentat on) and Collins APS-65 (autopilot); ESM Thomson-CSF DR2000A/Dalia 1000A Mk II, GPS (Trimble). Weapons: 4 or 6 x 127 mm rockets, or up to 28 x 70 mm rockets.

EMB-111 6/1995 / 0503479

Numbers/Type: 53 A-1 (Embraer/Alenia/Aermacchi) AMX
Operational speed: 493 kt (914 km/h).
Service ceiling: 42,650 ft (13,000 m).
Range: 1,800 n miles (3,336 km).

Role/Weapon systems: Air Force operated for strike, reconnaissance and anti-shipping attack; shore-based for fleet air defence and ASW primary roles; operated by 3rd/10th Group at Santa Maria Air Base (KS) and Santa Cruz Air Base. Sensors: Tecnasa/SMA SCP-01 Scipio radar. ECM suite/ESM flares and chaffs; GPS and IFF. Weapons: Strike; up to 3,800 kg of 'IRON' bombs, Self-defence; AAM; 2 x MAA-1 Piranha or 2 x AIM 9 Sidewinder missiles; 2 DEFA 30 mm cannon.

AMX 6/1998 / 0013614

PATROL FORCES

Notes: (1) There are plans to acquire five offshore patrol ships of approximately 1,800 tons. Construction is expected to start in 2010.
 (2) There are 114 LAEP series Instruction and Support craft. 24 LAEP-10 are 10 m long and 90 LAEP-7 are 7 m long.
 (3) There are 174 LPN series Rivar patrol craft of 3 to 15 m length.
 (4) Fifteen 8 m aluminium hulled LAR (fast insertion craft) have entered service with the Brazilian Marines. Further orders are expected. There are two other variants of the class: LIN are operated by port authorities and LAM are ambulance craft.
 (5) Four Tracker II (LPAN-21) 21 m patrol craft are employed as police patrol craft.
 (6) There are plans to acquire two 200-ton river patrol ships.

1 + 5 (4) MARLIM (MEATINI) CLASS (PB)

MARLIM LP 01

Displacement, tons: 40 full load
Dimensions, feet (metres): 74.8 x 17.1 x 3.3 (22.8 x 5.2 x 1)
Main machinery: 2 CRM 18D/52 diesels, 2,500 hp(m) (1.84 MW); 2 shafts
Speed, knots: 34
Range, n miles: 560 at 20 kt
Complement: 11 (1 officer)
Guns: 1 – 12.7 mm MG
Radars: Surface search: 1 GEM 1210, I-band

Comment: The first of a new class of patrol craft that entered service in 2005. Slightly longer version of Italian Meatini class design in service with Guardia di Finanza. Built by Inace Shipyard, Brazil. Aluminium hull. Five further craft are to be delivered in 2009 and a class of 10 is expected. Details are for those in service in Italy and may be different.

MARLIM 6/2007, L. Frangetto / 11/0089

12 GRAJAU CLASS (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Launched	Commissioned
GRAJAU	P 40	Arsenal de Marinha	21 May 1993	1 Dec 1993
GUAIBA	P 41	Arsenal de Marinha	10 Dec 1993	12 Sep 1994

GRAVATAI	P 51	Peenewerft, Germany	26 Aug 1999	17 Feb 2000

Displacement, tons: 19/ standard; 217 full load
Dimensions, feet (metres): 152.6 x 24.6 x 7.5 (46.5 x 7.5 x 2.3)
Main machinery: 2 MTU 16V 396 TB94 diesels; 5,800 hp(m) (4.26 MW) sustained; 2 shafts
Speed, knots: 26
Range, n miles: 2,200 at 12 kt
Complement: 29 (4 officers)
Guns: 1 Bofors 40 mm/70. 2 Oerlikon 20 mm (P 40-44). 2 Oerlikon BMARC 20 mm GAM-801 (P 45-51)
Weapons control: ARES/DSAM AO optronic director may be fitted in due course
Radars: Surface search: Racal Decca 1290A, I-band.

Comment: Two ordered in late 1987 to a Vosper QAF design similar to Bangladesh Meghna class. Technology transfer in February 1988 and construction started in July 1988 for the first pair; second pair started construction in September 1990. Class name changed in 1993 when the first four were renumbered to reflect revised delivery dates. Building problems are also reflected in the replacing of the order for the third pair with Peenewerft in November 1993 and the fourth pair in August 1994. Two more ordered from Inace in September 1996 and from Peenewerft in 1998. Used for EEZ patrol duties and diver support. Carry one RIB and telescopic launching crane. A similar vessel has been built for Namibia.

GUAPORÉ 4/2006, A E Galarce / 1040/73

GUAJARÁ 2/2006, Marco Ghigliano / 1167/21

2 IMPERIAL MARINHEIRO CLASS (COASTAL PATROL SHIPS) (PG/ATR)

Name	No	Builders	Commissioned
IMPERIAL MARINHEIRO	V 15	Smit, Kinderdijk, Netherlands	8 June 1955
CABOCLO	V 19	Smit, Kinderdijk, Netherlands	5 Apr 1955

Displacement, tons: 911 standard; 1,025 full load
Dimensions, feet (metres): 184 x 30.5 x 11.7 (56 x 9.3 x 3.6)
Main machinery: 2 Sulzer 6TD36 diesels; 2,160 hp(m) (1.59 MW); 2 shafts
Speed, knots: 16
Complement: 64 (6 officers)
Guns: 1--3 in (76 mm)/50 Mk 33; 60 rds/min to 12.8 km (6.9 n miles); weight of shell 6 kg, 2 or 4 Oerlikon 20 mm.
Radars: Surface search: Rocal Decca; I-band

Comment: Fleet tugs classed as corvettes. Equipped for firefighting. *Imperial Marinheiro* has acted as a submarine support ship but gave up the role in 1990. V 21 and V 23 withdrawn from service in 2002, V 24 in 2003 and V 20 in 2004. V 19 has been re-engined and returned to service.

IMPERIAL MARINHEIRO CLASS 2/2000, van Ginderen Collection / 0104279

2 PEDRO TEIXEIRA CLASS (RIVER PATROL SHIPS) (PBR)

Name	No	Builders	Launched	Commissioned
PEDRO TEIXEIRA	P 20	Arsenal de Marinha	14 Oct 1970	17 Dec 1973
RAPOSO TAVARES	P 21	Arsenal de Marinha	11 June 1972	17 Dec 1973

Displacement, tons: 690 standard; 900 full load
Dimensions, feet (metres): 208.7 x 31.8 x 5.6 (63.6 x 9.7 x 1.7)
Main machinery: 4 MAN V6 V16/18 TL diesels, 3,840 hp(m) (2.82 MW); 2 shafts
Speed, knots: 16
Range, n miles: 5,000 at 13 kt
Complement: 58 (6 officers)
Guns: 1 Bofors 40 mm/60; 120 rds/min to 12 km (6.5 n miles). 6--12.7 mm MGs. 2--81 mm Mk 2 mortars.
Radars: Surface search: 2 Rocal Decca; I-band.
Helicopters: 1 Bell JetRanger or UH-12 Esquilo

Comment: Built in Rio de Janeiro. Belong to Amazon Flotilla. Can carry two armed LCVPs and 85 marines in deck accommodation. Both ships to be re-engined.

PEDRO TEIXEIRA 6/1997, Brazilian Navy / 0012091

3 RORAIMA CLASS (RIVER PATROL SHIPS) (PBR)

Name	No	Builders	Launched	Commissioned
RORAIMA	P 30	Maclaren, Niteroi	2 Nov 1972	21 Feb 1975
RONDÔNIA	P 31	Maclaren, Niteroi	10 Jan 1973	3 Dec 1975
AMAPÁ	P 32	Maclaren, Niteroi	9 Mar 1973	12 Jan 1976

Displacement, tons: 340 standard, 365 full load
Dimensions, feet (metres): 151.9 x 27.9 x 4.6 (46.3 x 8.5 x 1.4)
Main machinery: 2 Volvo-Penta D49A-MS diesels; 1,825 hp(m) (1.36 MW); 2 shafts
Speed, knots: 17
Range, n miles: 6,000 at 15 kt
Complement: 48 (5 officers)
Guns: 1 Bofors 40 mm/60; 120 rds/min to 12 km (6.5 n miles). 2 Oerlikon 20 mm. 2--81 mm mortars. 6--12.7 mm MGs.
Radars: Surface search: 2 Rocal Decca; I-band.

Comment: Carry two armed LCVPs. Belong to Amazon Flotilla. All re-engined with Volvo engines.

RORAIMA 6/1998, Brazilian Navy / 0017523

0 + 6 VIGILANTE (NAPA 500) CLASS (PBO)

Name	Builders	Laid down	Launched	Commissioned
—	INACE, Fortaleza	26 Nov 2006	2008	Oct 2009
—	INACE, Fortaleza	17 July 2007	2008	Mar 2010

Displacement, tons: 406 standard; 477 full load
Dimensions, feet (metres): 177.8 x 26.2 x 8.9 (54.2 x 8.0 x 2.7)
Main machinery: 2 MTU 16V 538TB93 diesels; 8,000 hp(m) (5.9 MW); 2 shafts
Speed, knots: 24
Range, n miles: 2,400 at 15 kt
Complement: 43 (8 officers)
Guns: 1 Bofors SAK-40 mm/L70 Mk 3 Sea Trinity; 330 rds/min to 4 km (2.2 n miles); weight of shell 0.96 kg
 2 Oerlikon/Royal Ordnance 20 mm GAM-801; 1,000 rds/min to 2 km.
Countermeasures: Decoys: 2 IPQM/Elebra MDLS 101 (12-tubed) launchers.
 ESM. To be announced.
Weapons control: ARES/DSAM AO optical sight
Radars: Surface search: To be announced
 Navigation: To be announced

Comment: Following an invitation to tender in June 2006, contract awarded on 28 September 2006 to Indústria Naval do Ceará (INACE), Fortaleza, for the construction of two patrol ships in partnership with the French company CMN. The ships, designated NAPA 500, are to CMN's 54 m Vigilante 400CL 54 design and are to be similar in configuration to the three Al Bushra class in service in the Royal Navy of Oman. CMN is to provide technical assistance and integrated logistic support. Steel was first cut on 1 November 2006. The ships are to be employed on EEZ patrol duties. The contract for a further four vessels was let in October 2008 and a class of 12 is projected by 2016.

VIGILANTE 400 6/2006, R Scott/NAVYPIX / 1162769

1 PARNAIBA CLASS (RIVER MONITOR) (PGRH)

Name	No	Builders	Commissioned
PARNAIBA	U 17 (ex-P 2)	Arsenal de Marinha, Rio de Janeiro	6 Nov 1938

Displacement, tons: 620 standard; 720 full load
Dimensions, feet (metres): 180.5 x 33.3 x 5.1 (55 x 10.1 x 1.6)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 12
Range, n miles: 1,350 at 10 kt
Complement: 74 (6 officers)
Guns: 1 US 76 mm. 2 Bofors 40 mm/70. 6 Oerlikon 20 mm.
Radars: Surface search: Rocal Decca; I-band.
Navigation: Furuno 3600; I-band.
Helicopters: Platform for one IH-6B Jet Ranger.

Comment: Laid down 11 June 1936. Launched 2 September 1937 in Mato Grosso Flotilla. Re-armed with new guns in 1960. 3 in (76 mm) side armour and partial deck protection. Refitted in 1995/96 with improved armament, and with diesel engines replacing the steam reciprocating propulsion plant. Converted again in 1998 with Bofors 40 mm/70 guns taken from Niteroi-class frigates and a helo deck at the stern. Facilities to refuel and re-arm a UH-12 helicopter. Re-commissioned 6 May 1999.

PARNAIBA 5/2000, Hartmut Ehlers / 0087659

80 Brazil/Patrol forces – Amphibious forces

4 BRACUI (RIVER) CLASS (COASTAL PATROL CRAFT) (PBO)

Name	No	Builders	Commissioned
BRACUI (ex-Itchen)	P 60 (ex-M 2009)	Richards, Lowestoft	12 Oct 1985
BENEVENTE (ex-Blackwater)	P 61 (ex-M 2008)	Richards, Great Yarmouth	5 July 1985
BOCAINA (ex-Spey)	P 62 (ex-M 2013)	Richards, Lowestoft	4 Apr 1986
BABITONGA (ex-Arun)	P 63 (ex-M 2014)	Richards, Lowestoft	29 Aug 1986

Displacement, tons: 770 standard; 890 full load
Dimensions, feet (metres): 156 × 34.5 × 9.5 (475 × 10.5 × 2.9)
Main machinery: 2 Ruston 6 RKC diesels; 3,100 hp(m) (2.3 MW) sustained; 2 shafts
Speed, knots: 14
Range, n miles: 4,500 at 10 kt
Complement: 32 (4 officers)
Guns: 1 Bofors 40 mm/60
 2 – 7.62 mm MGs.
Mines: Rails for up to 20.
Radars: Surface search: 2 Racal Decca TM 1226C; I-band.

Comment: Second batch of ex-UK River class minesweepers transferred in 1988. These four were converted as patrol craft in UK service. Re-commissioned 6 April, 10 July, 10 July and 9 September respectively. Three others transferred in 1995 are listed as Survey Ships.

BOCAINA

7/1998, Maritime Photographic / 0056608

6 PIRATINI CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
PIRATINI (ex-PGM 109)	P 10	Arsenal de Marinha, Rio de Janeiro	30 Nov 1970
PIRAJA (ex-PGM 110)	P 11	Arsenal de Marinha, Rio de Janeiro	8 Mar 1971
PAMPEIRO (ex-PGM 118)	P 12	Arsenal de Marinha, Rio de Janeiro	16 June 1971
PARATI (ex-PGM 119)	P 13	Arsenal de Marinha, Rio de Janeiro	29 July 1971
PENEDO (ex-PGM 120)	P 14	Arsenal de Marinha, Rio de Janeiro	30 Sep 1971
POTI (ex-PGM 121)	P 15	Arsenal de Marinha, Rio de Janeiro	29 Oct 1971

Displacement, tons: 105 standard; 146 full load
Dimensions, feet (metres): 95 × 19 × 6.5 (29 × 5.8 × 2)
Main machinery: 4 Cummins VT-12M diesels; 1,100 hp (820 kW); 2 shafts
Speed, knots: 17
Range, n miles: 1,700 at 12 kt
Complement: 16 (2 officers)
Guns: 1 Oerlikon 20 mm, 2 – 12.7 mm MGs.
Radars: Surface search, Racal Decca 1070; I-band
Navigation: Furuno 3600; I-band.

Comment: Built under offshore agreement with the USA and similar to the US Cape class. 81 mm mortar removed in 1988. Carries an inflatable launch. P 10, P 11, P 14 and P 15 are based at Ladário Fluvial Base, Mato Grosso, the other two at Amazonas.

POTI

6/1988, Brazilian Navy / 0017674

AMPHIBIOUS FORCES

- Notes:** (1) Replacement of the two Ceará-class LSDs is under consideration. Options include ex-US Navy Austin class.
 (2) Construction of three EDCG 41 LCU began at AMRJ in 2008.
 (3) There are six EDVP II class landing craft of 13 tons built by BFL, Ladário and capable of carrying 3.7 tons or 37 troops at 9 kt. These are based at Ladário.
 (4) There are 32 RIBs for special operations.

1 NEWPORT CLASS (LSTH)

Name	No	Builders	Laid down	Launched	Commissioned	Re-commissioned
MATTOSO MAIA (ex-Cayuga)	G 28 (ex-LST 1186)	National Steel & Shipbuilding Co	28 Sep 1968	12 July 1969	8 Aug 1970	30 Aug 1994

Displacement, tons: 5,159 standard; 8,757 full load
Dimensions, feet (metres): 522.3 (hull) × 69.5 × 17.5 (aft)
 (159.2 × 21.2 × 5.3)
Main machinery: 6 ALCO 16-251 diesels; 16,500 hp (12.3 MW) sustained; 2 shafts; cp props; bow thruster; 800 hp (596 kW)
Speed, knots: 20
Range, n miles: 14,250 at 14 kt
Complement: 267 (17 officers)

Military lift: 351 (33 officers); 500 tons vehicles; 3 LCVPs and 1 LCPL on davits

Guns: 1 General Electric/General Dynamics 20 mm Vulcan Phalanx Mk 15. 8 – 12.7 mm MGs
Radars: Surface search: Raytheon SPS-10F; G-band.
Navigation: Raytheon SPS-64(V)6 and Furuno FR 2120; I-band.

Helicopters: Platform only.

Programmes: Transferred from the USN by lease 26 August 1994, arriving in Brazil in late October. Purchased outright on 19 September 2000.

Structure: The ramp is supported by twin derrick arms. A stern gate to the tank deck permits unloading of amphibious tractors into the water, or unloading of other vehicles into an LCU or onto a pier. Vehicle stowage covers 19,000 sq ft. Length over derrick arms is 562 ft (171.3 m); full load draught is 11.5 ft forward and 17.5 ft aft.

MATTOSO MAIA

6/2003, S C Neto/Mario R V Carneiro / 0569153

2 CEARÁ (THOMASTON) CLASS (LSDH)

Name	No	Builders	Laid down	Launched	Commissioned	Recommissioned
CEARÁ (ex-Hermitage)	G 30 (ex-LSD 34)	Ingalls, Pascagoula	11 Apr 1955	12 June 1956	14 Dec 1956	28 Nov 1989
RIO DE JANEIRO (ex-Altamo)	G 31 (ex-LSD 33)	Ingalls, Pascagoula	11 Oct 1954	20 Jan 1956	24 Aug 1956	21 Nov 1990

Displacement, tons: 6,880 standard; 12,150 full load
Dimensions, feet (metres): 510 × 84 × 19
 (155.5 × 25.6 × 5.8)
Main machinery: 2 Babcock & Wilcox boilers; 580 psi
 (40.8 kg/cm²); 2 GE turbines; 24,000 hp (17.9 MW); 2 shafts
Speed, knots: 22.5. **Range, n miles:** 14,800 at 12 kt
Complement: 223 (21 officers)
Military lift: 340 troops; 3 EDCG-41 (LCU) or 6 EDVM 25
 (LCM 8) or 50 amphibious tractors in tank-deck and
 30 amphibious tractors on upper deck

Guns: 6 USN 3 in (76 mm)/50 (3 twin) Mk 33; 50 rds/min to
 12.8 km (7 n miles); weight of shell 6 kg.
 4–12 7 mm MGs.
Raders: Surface search: Raytheon SPS-10F; G-band.
 Air/surface search: Plessey AWS-2 (G 30); AWS-4 (G 31);
 E/F-band.
Navigation: Raytheon CRP 3100 (G 30); I-band. Furuno
 ARPA M-1942, E/F/I-band

Programmes: The original plan to build a 4,500 ton LST
 was overtaken by the acquisition of these two LSDs from
 the US initially on a lease and finally by purchase on
 24 January 2001.
Structure: Has two 50 ton capacity cranes and a docking
 well of 391 × 48 ft (119.2 × 14.6 m). Two LCVPs and two
 LCP(L)s on davits. Ice-strengthened bow. SATCOM fitted
 Phalanx guns and SRBOC chaff launchers removed
 before transfer. Air search radars removed.

Helicopters: Platform for Super Puma.

CEARÁ

1 SIR GALAHAD CLASS (LSL)

Name	No	Builders	Laid down	Launched	Commissioned
GARCIA D'ÁVILA (ex-Sir Galahad)	G 29 (ex-L 3005)	Swan Hunter, Wallsend-on-Tyne	12 May 1985	13 Dec 1986	25 Nov 1987

Displacement, tons: 8,585 full load
Dimensions, feet (metres): 461.0 × 64.0 × 14.1
 (140.5 × 19.5 × 4.3)
Main machinery: 2 Mirlees-Blackstone diesels; 13,320 hp
 (9.94 MW); 2 shafts; cp props; 1 bow thruster; 400 hp (298 kW)
Speed, knots: 18. **Range, n miles:** 13,000 at 15 kt
Complement: 49 (15 officers)
Military lift: 343 troops (537 overload); 16 MBT, 34 mixed
 vehicles

Guns: 2 Oerlikon/Royal Ordnance 20 mm GAM-BO3 (twin);
 650 rds/min to 10 km (6.4 n miles); weight of shell
 0.36 kg. 2–7.62 mm MGs.
Countermeasures: Decoys: 2 Plessey Shield 200 (6-tubed
 launchers)
Combat data systems: Racal CANE data automation.
Raders: Navigation: Kolvin-Hughes Type 1007; I-band.
Helicopters: Platform for 1 medium.

Comment: Former UK Royal Fleet Auxiliary decommissioned
 in July 2006 and recommissioned into the Brazilian Navy
 on 4 December 2007 following a refit at Portsmouth. The
 work included overhaul of the engines and controllable-
 pitch propellers and upgrade of communications
 equipment. The ship is equipped with bow and stern
 ramps, a 25-tonne crane and three 8-tonne cranes.
 Up to four mexeflote pontoons can be attached to
 the hull.

3 LCU 1610 CLASS (EDCG/LCU)

Name	No	Builders	Commissioned
GUARAPARI	L 10 (ex-GED 10)	Arsenal de Marinha, Rio de Janeiro	27 Mar 1978
TAMBAÚ	L 11 (ex-GED 11)	Arsenal de Marinha, Rio de Janeiro	27 Mar 1978
CAMBORIÚ	L 12 (ex-GED 12)	Arsenal de Marinha, Rio de Janeiro	8 Jan 1981

Displacement, tons: 390 full load
Dimensions, feet (metres): 134.5 × 27.6 × 6.6 (41 × 8.4 × 2.0)
Main machinery: 2 GM 12V-71 diesels; 874 hp (650 kW) sustained; 2 shafts; cp props
Speed, knots: 11
Range, n miles: 1,200 at 8 kt
Complement: 14 (2 officers)
Military lift: 172 tons
Guns: 3–12.7 mm MGs.
Raders: Navigation: Furuno 3600; I-band.

Comment: Original pennant numbers restored in 2004. Based at Niterói.

CAMBORIÚ

6/2001, Brazilian Navy / 0130473

5 + 5 EDVM 25 CLASS (LCM)

801–805

Displacement, tons: 61 standard; 130 full load
Dimensions, feet (metres): 71 × 21 × 4.8 (21.7 × 6.4 × 1.5)
Main machinery: 2 Detroit diesels; 400 hp (294 kW) sustained; 2 shafts
Speed, knots: 9
Range, n miles: 95 at 9 kt
Complement: 5
Military lift: 150 troops plus 72 tons equipment

Comment: Five vessels constructed by Inace and delivered 1993–94. Construction of a
 further five craft started at AMRJ in 2008. LCM 8 type. Based at Niterói.

801

6/2001, Brazilian Navy / 0130472

1 SIR BEDIVERE CLASS (LANDING SHIP LOGISTIC) (LSLH)

Name	No	Builders	Laid down	Launched	Commissioned
ALMIRANTE SABOIA (ex-Sir Bedivere)	G 25 (ex L 3004)	Hawthorn Leslie, Hebburn-on-Tyne	Oct 1955	20 July 1966	18 May 1967

Displacement, tons: 3,270 light; 6,700 full load
Dimensions, feet (metres): 441.1 × 59.8 × 13 (134.4 × 18.2 × 4)
Main machinery: 2 Mirreless 10-ALSSDM diesels; 9,400 hp (7.01 MW) or 2 Wärtsilä 280 V12 diesels; 9,928 hp(m) (7.3 MW) sustained (SLEP); 2 shafts; bow thruster; 980 hp(m) (720 kW) (SLEP)
Speed, knots: 17
Range, n miles: 8,000 at 15 kt
Complement: 51 (18 officers); 49 (15 officers) (SLEP)
Military lift: 340 troops (534 hard lying); 18 MBTs; 34 mixed vehicles; 120 tons POL; 30 tons ammunition; 1–25 ton crane; 2 4.5 ton cranes. Capacity for 20 helicopters (11 tank deck and 9 vehicle deck)
Guns: 2 or 4 Oerlikon 20 mm. 4–762 mm MGs. 2 Mk 44 7.62 mm Miniguns.
Countermeasures: Decoys: 2 Plessey Shield chaff launchers.
Radars: Navigation: Kelvin Hughes Type 1006 or Racal Decca 2690, I-band. Aircraft control: Kelvin Hughes Type 1007, I-band (SLEP).
Helicopters: Platform to operate Lynx, Chinook or Sea King.

Comment: Former UK Royal Fleet Auxiliary decommissioned on 18 February 2008 and to be recommissioned into the Brazilian Navy in May 2009. Fitted for bow and stern loading with drive-through facilities and deck-to-deck ramps. Facilities provided for onboard maintenance of vehicles and for laying out pontoon equipment. Mexeflote self-propelled floating platforms can be strapped one on each side. SLEP in Rosyth from December 1994 to January 1998 included lengthening by 29 ft an enlarged flight deck, new main engines and a new bridge. The helicopter platform was lowered by one deck, which has reduced the size of the stern ramp.

ALMIRANTE SABOIA (UK colours)

1 POLAR RESEARCH SHIP (AGOBH)

Name	No	Builders	Commissioned
ARY RONGEL (ex-Polar Queen)	H 44	Eides, Norway	22 Jan 1961

Displacement, tons: 1,928 standard; 3,628 full load
Dimensions, feet (metres): 247 × 42.7 × 17.4 (75.3 × 13 × 5.3)
Main machinery: 2 MAK 6M-453 diesels; 4,500 hp(m) (3.3 MW); 1 shaft; cp prop; 2 bow thrusters; 1 stern thruster
Speed, knots: 14.5
Range, n miles: 17,000 at 12 kt
Complement: 70 (19 officers) + 22 scientists
Radars: Navigation: Sperry; I-band; Racal-Decca; I/J-band.
Cargo capacity: 2,400 m³
Helicopters: Platform for UH-13 Esquilo.

Comment: Acquired by sale 19 April 1994. Ice-strengthened hull fitted with Simrad Albatross dynamic positioning system

ARY RONGEL

6/2002, Carlos Veras, Brazilian Navy / 0572424

0 + 1 POLAR RESEARCH SHIP (AGOBH)

Name	No	Commissioned
ALMIRANTE MAXIMIANO (ex-Ocean Express)	H 45	1974

Displacement, tons: 5,450 full load
Dimensions, feet (metres): 306.4 × 43.9 × 7 (93.4 × 13.4 × 7)
Main machinery: to be announced
Speed, knots: to be announced
Complement: to be announced
Radars: Surface search: to be announced.
Navigation: to be announced.
Helicopters: 2 medium

Comment: Reportedly acquired in 2008 and undergoing conversion to an Antarctic support ship role in Germany. The refit includes provision of a hangar and flight deck to operate two helicopters.

SURVEY AND RESEARCH SHIPS

Notes: (1) Survey ships are painted white except for those operating in the Antarctic which have red hulls
(2) There are also 24 buoy tenders of between 15 and 26 m: seven LB 15, two LB 17 (Lufada and Piracema), one LB 19, 10 LB 20 (Achernar, Aldobaran, Betelgeuse, Capella, Denébola, Formalhaut, Regulus, Rigel, Vega and Pollux), two LB 23 (Suboficial Oliveira and Marco Zero) and two LB 26 (Tubarão and Boio).
(3) There is one inshore survey craft, Camocim, based at Niterói.

1 RESEARCH SHIP (AGS)

Name	No	Builders	Commissioned
ANTARES (ex-M/V Lady Harrison)	H 40	Mjøllem and Karlsen A/S, Bergen	Aug 1984

Displacement, tons: 855 standard; 1,248 full load
Dimensions, feet (metres): 180.3 × 33.8 × 14.1 (55 × 10.3 × 4.3)
Main machinery: 1 Burmeister & Wain Alpha diesel; 1,960 hp(m) (1.37 MW); 1 shaft; cp prop; bow thruster
Speed, knots: 13.5 **Range, n miles:** 10,000 at 12 kt
Complement: 58 (12 officers) + 12
Radars: Surface search: Racal Decca RMS 1230C; E/F-band
Navigation: Racal Decca RM 914C; I-band.

Comment: Research vessel acquired from Racal Energy Resources. Equipped with side scan sonar for route survey, Atlas Krupp deep echo sounder and Kongsberg/Simrad EA-500 deep echo sounder. Used for seismographic survey. Recommissioned 6 June 1988.

ANTARES 4/2000, Hartmut Ehlers / 0104233

3 AMORIM DO VALLE (RIVER) CLASS (SURVEY SHIPS) (AGS)

Name	No	Builders	Commissioned
AMORIM DO VALLE (ex-Humber)	H 35 (ex-M 2007)	Richards Ltd, Lowestoft	7 June 1985
TAURUS (ex-Helmsdale/Jorge Leite)	H 36 (ex-M 2010)	Richards Ltd, Lowestoft	1 Mar 1986
GARNIER SAMPAIO (ex-Ribble)	H 37 (ex-M-2012)	Richards, Great Yarmouth	19 Feb 1986

Displacement, tons: 770 standard; 890 full load
Dimensions, feet (metres): 156 × 34.5 × 9.5 (47.5 × 10.5 × 2.9)
Main machinery: 2 Ruston BRKC diesels; 3,100 hp (2.3 MW) sustained; 2 shafts; cp props
Speed, knots: 14
Range, n miles: 4,500 at 10 kt
Complement: 36 (4 officers)
Radars: Navigation: 2 Racal Decca TM 1226C; I-band.

Comment: Three ships transferred from the UK on 31 January 1995. The contract was signed on 18 November 1994. Steel hulled. All minesweeping gear and the 40 mm gun removed on transfer. Used as hydrographic ships. H 35 and H 36 fitted with a stern gantry and second crane amidships for oceanographic research. Equipment includes multibeam echo-sounders. Four others of the class transferred in 1998 are listed under Patrol Forces. The class is also in service with the Bangladesh Navy.

AMORIM DO VALLE 6/1995, David Cullen / 1153035

GARNIER SAMPAIO 6/2002, Brazilian Navy / 0579149

1 SIRIUS CLASS (SURVEY SHIP) (AGSH)

Name	No	Builders	Launched	Commissioned
SIRIUS	H 21	Ishikawajima Co Ltd, Tokyo	30 July 1957	17 Jan 1958

Displacement, tons: 1,448 standard; 1,885 full load
Dimensions, feet (metres): 255.7 × 39.3 × 12.2 (78 × 12.1 × 3.7)
Main machinery: 2 Vilares-Burmeister & Wain diesels; 1,550 hp (1.15 MW); 2 shafts, cp props
Speed, knots: 14. **Range, n miles:** 12,000 at 11 kt
Complement: 129 (16 officers) plus 14 scientists
Radars: Surface search: Racal Decca RMS 1230C; E/F-band.
Navigation: Furuno M 1942; E/F/I-band.
 Furuno, I-band
Helicopters: 1 Bell JetRanger or UH-12.

Comment: Laid down 1955-56. Special surveying apparatus, echo-sounders, Raydist equipment, sounding machines installed, and landing craft (LCVP), jeep, and survey launches carried. All living and working spaces are air conditioned.

SIRIUS 9/2007, Mario R V Carneiro / 1335445

1 LIGHTHOUSE TENDER (ABUH)

Name	No	Builders	Launched	Commissioned
ALMIRANTE GRAÇA ARANHA	H 34	Ebin, Niteroi	23 May 1974	9 Sep 1976

Displacement, tons: 1,070 standard; 2,440 full load
Dimensions, feet (metres): 245.3 × 42.6 × 13.8 (74.8 × 13 × 4.2)
Main machinery: 1 diesel; 2,440 hp(m) (1.8 MW); 1 shaft; bow thruster
Speed, knots: 14
Complement: 81 (13 officers)
Radars: Navigation: 2 Racal Decca; I-band
Helicopters: 1 Bell JetRanger

Comment: Laid down in 1971. Fitted with telescopic hangar, 10 ton crane, two landing craft, GP launch and two Land Rovers. Omega navigation system.

ALMIRANTE GRAÇA ARANHA 4/2000, Hartmut Ehlers / 0104234

4 BUOYTENDERS (ABU)

Name	No	Builders	Commissioned

1 BUOYTENDER (ABU)

FAROLEIRO MÁRIO SEIXAS (ex-Mestre Jerônimo) H 26

Displacement, tons: 234 standard; 294 full load
 Dimensions, feet (metres): 116.4 × 21.8 × 11.8 (35.5 × 6.6 × 3.6)
 Main machinery: 2 Scania DSI 14 M03 diesels, 900 hp (671 kW); 2 shafts
 Speed, knots: 10
 Complement: 19 (2 officers)
 Radars: Navigation: Racal Decca RD 150; I-band.

Comment: Former fishing vessel built in Vigo, Spain. Acquired by Brazilian Navy in 1979 and rebuilt as a buoy tender. Commissioned 31 January 1984.

FAROLEIRO MÁRIO SEIXAS 6/2002, Brazilian Navy / 0529148

1 RESEARCH SUPPORT VESSEL (AGS)

Name	No	Builders	Laid down	Launched	Commissioned
CRUZEIRO DO SUL (ex-DSND Surveyor)	H 38	Løngva Mek, Verksted	1 Mar 1986	1 July 1986	31 July 1986

Measurement, tons: 1,716 grt
 Dimensions, feet (metres): 180.3 × 33.8 × 14.1 (65.7 × 11.0 × 4.5)
 Main machinery: 1 Borgen KRMB-9 diesel, 1 shaft; Ulstein cp prop; 1 Ulstein forward thruster (368 kW); 1 Brunvoll forward thruster (600 kW); 1 Ulstein retractable azimuth thruster (880 kW); 2 Ulstein bow thrusters (552 kW and 368 kW)
 Speed, knots: 13.5
 Range, n miles: 10,000 at 12 kt
 Complement: 53 (11 officers)
 Radars: Surface search: Raytheon R 84, I-band.
 Navigation: Raytheon R 81; I-band.

Comment: Originally built as a multrole inspection/survey vessel and converted in 1991 into a ROV support vessel. Acquired by the Brazilian Navy and commissioned on 28 February 2008. The ship is capable of performing a range of tasks including pipeline inspection, structural inspection, geophysical and geotechnical operations and other support services. The principal features of the ship include a 6-ton Hydralift crane, large survey/inspection and data processing offices, a wet and dry lab space and a photo lab. The ship has high station-keeping performance. There is a large work-deck area and a moontube for deploying survey transducers.

TRAINING SHIPS

Notes: (1) There are 10 small sail training ships.
 (2) One training vessel *Braz de Aguiar* (ex-*Calha Norte*) is attached to the Naval Academy for merchant officers (CIABA) at Belém.
 (3) There are three small training craft (*Rosca Fina*, *Voga Picada*, *Lava Arriba*).

1 MODIFIED NITERÓI CLASS (AXH)

Name	No	Builders	Commissioned
BRASIL	U 27	Arsenal de Manhã, Rio de Janeiro	21 Aug 1986

Displacement, tons: 2,548 light; 3,729 full load
 Dimensions, feet (metres): 430.7 × 44.3 × 13.8 (131.3 × 13.5 × 4.2)
 Main machinery: 2 Pielstick/Isikawajima (Brazil) 6 PC2.5 L 400 diesels; 7,020 hp(m) (5.17 MW) sustained; 2 shafts
 Speed, knots: 18
 Range, n miles: 7,000 at 15 kt
 Complement: 218 (27 officers) plus 201 midshipmen
 Guns: 2 Bofors 40 mm/70, 4 saluting guns.
 Countermeasures: Decoys: 2 CBV 50.8 mm flare launchers.
 ESM: Racal RDL-2 ABC; radar intercept
 Weapons control: Saab Scania TVT 300 optronic director
 Radars: Surface search: Racal Decca RMS 1230C; E/F-band
 Navigation: Racal Decca TM 1226C and TMS 1230; I-band.
 Helicopters: Platform for 1 Sea King

Comment: A modification of the Vosper Thornycroft Mk 10 Frigate design ordered in June 1981. Laid down 18 September 1981, launched 23 September 1983. Designed to carry midshipmen and other trainees from the Naval and Merchant Marine Academies. Minimum electronics as required for training. There are two 51 mm launchers for flares and other illuminants.

BRASIL 10/2008, Kazumasa Watanabe / 1335452

3 NASCIMENTO CLASS (AXL)

Name	No	Builders	Commissioned
ASPIRANTE NASCIMENTO	U 10	Ebrasa, Santa Catarina	13 Dec 1980
GUARDA MARINHA JANSEN	U 11	Ebrasa, Santa Catarina	22 July 1981
GUARDA MARINHA BRITO	U 12	Ebrasa, Santa Catarina	22 July 1981

Displacement, tons: 108.5 standard; 136 full load
 Dimensions, feet (metres): 91.8 × 21.3 × 5.9 (28 × 6.5 × 1.8)
 Main machinery: 2 Mercedes Benz OM-352A diesels; 650 hp(m) (484 kW); 2 shafts
 Speed, knots: 10
 Range, n miles: 700 at 10 kt
 Complement: 6 (2 officers) + 10 midshipmen
 Guns: 2 – 12.7 mm MGs.
 Radars: Navigation: Racal Decca; I-band

Comment: Can carry 10 trainees overnight. All of the class are attached to the Naval Academy at Rio de Janeiro.

GUARDA MARINHA JANSEN 5/2003, A E Galarce / 0572425

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Launched	Commissioned
CISNE BRANCO	U 20	Damen Shipyards, Gorinchem	4 Aug 1999	28 Feb 2000

Displacement, tons: 1,038 full load
 Dimensions, feet (metres): 249.3 × 34.4 × 15.7 (76 × 10.5 × 4.8)
 Main machinery: 1 Caterpillar 3508B DI-TA diesel; 1,015 hp(m) (746 kW) sustained; 1 shaft; Berg cp prop; bow thruster; 408 hp(m) (300 kW)
 Speed, knots: 17 (sail), 11 (diesel)
 Complement: 50 (10 officers) + 31 midshipmen
 Radars: Navigation: Furuno FR 1510 Mk 3; I-band.

Comment: Ordered in 1998. Maximum sail area 2,195 m².

CISNE BRANCO 7/2008, Maritime Photographic / 1335334

AUXILIARIES

Notes: (1) There are four Rio Pardo class transport vessels (*Rio Pardo*, *Rio Negro*, *Rio Chui* and *Rio Cisapoque*). Capable of carrying 600 passengers, they are all based at Rio de Janeiro.
 (2) One Torpedo Recovery Craft, *Almirante Hess*, is based at Niterói.
 (3) Acquisition of a replenishment tanker, to replace *Marajo*, is under consideration. Options include an ex-US Navy Cimarron-class oiler.
 (4) A new hospital ship, U 28, to be based at Ladário on the Paraguay River, is to enter service in 2009.

1 PARÁ CLASS (RIVER TRANSPORT SHIP) (YFB)

Name	No	Builders	Commissioned
PARÁ	U 15	Inconavi/MacLaren, Niterói	19 Jan 2005

Displacement, tons: 1,064 standard; 1,327 full load
 Dimensions, feet (metres): 184.1 × 70.2 × 13.0 (56.1 × 21.4 × 3.97)
 Main machinery: 2 Ishibras-Daihatsu diesels; 2 shafts
 Speed, knots: 10
 Range, n miles: 2,380 at 10 kt
 Complement: 66 (7 officers)
 Guns: 4 Oerlikon 20 mm.
 Radars: Navigation: Furuno 1830 and 1942; I-band.

Comment: Ex-civilian catamaran hull vessel capable of carrying 175 marines and 350 tons cargo.

1 SUBMARINE RESCUE SHIP (ASRH)

Name	No	Builders	Commissioned
FELINTO PERRY <i>(ex-Holger Dane, ex-Wildrake)</i>	K 11	Stord Verft, Norway	Dec 1979

Displacement, tons: 2,840 standard; 4,107 full load
Dimensions, feet (metres): 256.6 x 57.4 x 15.1 (78.2 x 17.5 x 4.6)
Main machinery: Diesel-electric; 2 BMK KVG B12 and 2 KVG B16 diesels; 11,400 hp(m) (8.4 MW); 2 Daumler-Benz motors; 7,000 hp(m) (5.15 MW); 2 shafts; cp props; 2 bow thrusters; 2 stern thrusters
Speed, knots: 14.5
Complement: 65 (9 officers)
Radars: Navigation: 2 Raytheon; I-band.
Helicopters: Platform only

Comment: Former oilfield support ship acquired 28 December 1988. Has an octagonal heliport (62.5 ft diameter) above the bridge. Equipped with a moonpool for saturation diving, and rescue and recompression chambers as the submarine rescue ship A DeepOcean Phantom DS4 ROV, capable of operating to 610 m, is also carried. Dynamic positioning system. Based at Niteroi, Rio de Janeiro.

FELINTO PERRY 2/2003, Mario R V Carneiro / 0569157

1 BARROSO PEREIRA CLASS (TRANSPORT) (AKSH)

Name	No	Builders	Commissioned
ARY PARREIRAS	G 21	Ishikawajima, Tokyo	6 Mar 1957

Displacement, tons: 5,820 standard, 9,464 full load
Measurement, tons: 4,200 dwt, 4,879 gross (Panama)
Dimensions, feet (metres): 362 pp; 391.8 oa x 52.5 x 20.5 (110.4; 119.5 x 16 x 6.3)
Main machinery: 2 Ishikawajima boilers and turbines; 4,800 hp(m) (3.53 MW); 2 shafts
Speed, knots: 15
Complement: 127 (15 officers)
Military lift: 1,972 troops (overload); 497 troops (normal)
Cargo capacity: 425 m³ refrigerated cargo space, 4,000 tons
Guns: 2-3 in (76 mm) Mk 33; 50 rds/min to 12.8 km (6.9 n miles) anti-aircraft; weight of shell 6 kg; 2 or 4 Oerlikon 20 mm.
Radars: Navigation: 2 Racal Decca; I-band.
Helicopters: Platform for one medium

Comment: Transport and cargo vessel. Helicopter landing platform aft. Medical, hospital and dental facilities. Working and living quarters are mechanically ventilated with partial air conditioning. Refrigerated cargo space 15,500 cu ft. Operates commercially from time to time. Likely to be decommissioned in 2009, having been replaced in the transport role by Garcia d'Avila.

ARY PARREIRAS 2/2006, Marco Ghigliano / 1167120

1 RIVER TRANSPORT SHIP (AP)

Name	No	Builders	Commissioned
PARAGUASSÚ (ex-Garapuaa)	G 15	Amsterdam Drydock	1951

Displacement, tons: 200 standard, 285 full load
Dimensions, feet (metres): 131.2 x 23 x 4.9 (40 x 7 x 1.5)
Main machinery: 3 diesels; 2,505 hp(m) (1.84 MW); 1 shaft
Speed, knots: 13
Range, n miles: 2,600 at 10 kt
Complement: 35 (4 officers)
Military lift: 178 troops
Guns: 6 - 7.62 mm MGs.
Radars: Furuno 3600, I-band.

Comment: Passenger ship converted into a troop carrier in 1957 and acquired on 20 June 1972

PARAGUASSU 5/2000, Hartmut Ehlers / 0104240

1 RIVER TRANSPORT (YFBH)

Name	No	Builders	Commissioned
PIRAIM (ex-Guacuru)	U 29	Estaleiro SNBP, Mato Grosso	10 Mar 1982

Displacement, tons: 73.3 standard; 91.5 full load
Dimensions, feet (metres): 82.0 x 18.0 x 3.2 (25.0 x 5.5 x 0.97)
Main machinery: 2 MWM diesels; 400 hp(m) (294 kW); 2 shafts
Speed, knots: 7. Range, n miles: 700 at 7 kt
Complement: 17 (2 officers)
Guns: 4 - 7.62 mm MG
Radars: Navigation: Furuno 3600; I-band.
Helicopters: Platform for UH-12.

Comment: Used as a logistics support ship for the Mato Grosso Flotilla. Can carry two platoons of marines and two rigid inflatable boats.

PIRAIM 6/1998, Brazilian Navy / 0017835

2 HOSPITAL SHIPS (AHH)

Name	No	Builders	Commissioned
OSWALDO CRUZ	U 18	Arsenal de Marinha, Rio de Janeiro	29 May 1984
CARLOS CHAGAS	U 19	Arsenal de Marinha, Rio de Janeiro	7 Dec 1984

Displacement, tons: 360 standard, 490 full load
Dimensions, feet (metres): 154.2 x 26.9 x 5.9 (47.2 x 8.5 x 1.8)
Main machinery: 2 Volvo diesels; 714 hp(m) (525 kW); 2 shafts
Speed, knots: 17. Range, n miles: 4,000 at 12 kt
Complement: 25 (4 officers) plus 21 medical (6 doctors/dentists)
Radars: Navigation: Racal Decca; I-band.
Helicopters: Platform for 1 UH-12/13 Esquilo.

Comment: Oswaldo Cruz launched 11 July 1983, and Carlos Chagas 16 April 1984. Has two sick bays, dental surgery, a laboratory, two clinics and X-ray centre. The design is a development of the Roraima class with which they operate in the Amazon Flotilla. Since 1992 both ships painted grey with dark green crosses on the hull.

OSWALDO CRUZ 6/2004, Brazilian Navy / 1044086

1 HOSPITAL SHIP (AH)

Name	No	Builders	Commissioned
DOUTOR MONTENEGRO	U 16	CONAVE Shipyard, Manaus	17 May 2000

Displacement, tons: 300 standard; 347 full load
Dimensions, feet (metres): 134.5 x 36 x 7.9 (41.0 x 11 x 2.4)
Main machinery: 2 Cummins NT 855M diesels; 720 hp (537 kW); 2 shafts
Speed, knots: 5
Complement: 50 (8 officers) plus 11 (8 doctors/dentists)
Radars: Navigation, Furuno 1942 Mk 2.

Comment: U 16 was built in January 1997 and belonged to the government of the Acre state before transfer to the Brazilian Navy. The ship has two wards, a paediatric ICU, an operating theatre, an X-ray room, a dentist office, a lab for clinical analysis, a trauma room and a pharmacy.

DOUTOR MONTENEGRO 6/2007, Brazilian Navy / 1170088

1 REPLENISHMENT TANKER (AOR)

Name	No	Builders	Commissioned
ALMIRANTE GASTÃO MOTTA	G 23	Ishibras, Rio de Janeiro	26 Nov 1991

Displacement, tons: 4,471 standard; 10,320 full load
Dimensions, feet (metres): 442.9 × 62.3 × 24.6 (135 × 19 × 7.5)
Main machinery: Diesel-electric; 2 Wärtsilä 12V32 diesel generators; 11,700 hp(m) (8.57 MW) sustained; 1 motor; 1 shaft; Kamewa cp prop
Speed, knots: 20
Range, n miles: 9,000 at 15 kt
Complement: 121 (13 officers) + 12 spare
Cargo capacity: 5,920 tons diesel, 950 tons JP-5; 200 tons dry
Guns: 2—12.7 mm MGs.
Radars: 2 unknown; I-band.

Comment: Ordered March 1987. Laid down 11 December 1989 and launched 1 June 1990. Fitted for abeam and stern refuelling.

ALMIRANTE GASTÃO MOTTA 9/2007, Mario R V Carneiro / 1335450

1 REPLENISHMENT TANKER (AOR)

Name	No	Builders	Launched	Commissioned
MARAJÓ	G 27	Ishikawajima do Brasil	31 Jan 1968	8 Jan 1969

Displacement, tons: 7,500 standard; 15,110 full load
Dimensions, feet (metres): 440.7 × 63.3 × 24 (134.4 × 19.3 × 7.3)
Main machinery: 1 Sulzer GRD 68 diesel; 8,000 hp(m) (5.88 MW); 1 shaft
Speed, knots: 13
Range, n miles: 9,200 at 13 kt
Complement: 80 (13 officers)
Cargo capacity: 7,470 tons fuel
Radars: Surface search: Racal Decca TM 1226C, I-band. Navigation: Racal Decca BT 503; I-band.

Comment: Fitted for abeam replenishment with two stations on each side. Was to have been replaced by *Gastao Motta* but is to be retained in service until 2009.

MARAJÓ 1/1999 / 0058623

1 RIVER TENDER (AG)

Name	No	Builders	Commissioned
POTENGI	G 17	Papendrecht, Netherlands	28 June 1938

Displacement, tons: 150 standard; 594 full load
Dimensions, feet (metres): 178.8 × 24.5 × 8 (54.5 × 7.5 × 1.8)
Main machinery: 2 Krohout diesels, 550 hp(m) (404 kW); 2 shafts
Speed, knots: 10
Range, n miles: 600 at 8 kt
Complement: 19 (2 officers)
Cargo capacity: 480 tons of general cargo including fuel, frozen and dry stores
Guns: 4—762 mm MGs.
Radars: Furuno 3600, I-band

Comment: Launched 16 March 1938. Employed in the Mato Grosso Flotilla on river service. Converted to logistic support ship and recommissioned 6 May 1999.

POTENGI 6/2000, Hartmut Ehlers / 0104241

4 FLOATING DOCKS

Name	No	Builders	Commissioned
CIDADE DE NATAL (ex-G 27, ex-AFDL 39)			
ALMIRANTE SCHIECK			
ALFONSO PENA (ex-ARD 14)			
ALMIRANTE JERONIMO GONÇALVES			
(ex-G 26, ex-Golaz AFDL 4)			

Comment: The first two are floating docks loaned to Brazil by US Navy in the mid-1960s and purchased 11 February 1980. Ship lifts of 2,800 tons and 1,000 tons respectively. *Cidade de Natal* based at Natal and *Almirante Jeronimo Gonçalves* at Manaus. *Almirante Schieck* of 3,600 tons displacement was built by Arsenal de Marinha, Rio de Janeiro and commissioned 12 October 1989. *Alfonso Pena* acquired from US and based at Val-de-Caes (Para).

TUGS

Notes: (1) In addition to the vessels listed below there are eight harbour tugs: *Comandante Marroig* (BNRJ 03), *Comandante Didier* (BNRJ 04), *Tenente Magalhães* (BNA 08), *Cabo Schram* (BNVC 01), *Intrepido* (BNRJ 16), *Arrojado* (BNRJ 17), *Veloz* (BNRJ 18) and *Impávido* (BNRJ 19).
 (2) There are plans to procure six ocean tugs from 2009–22. These are also to serve as offshore patrol ships.

2 ALMIRANTE GUILHEM CLASS (FLEET OCEAN TUGS) (ATF)

Name	No	Builders	Commissioned
ALMIRANTE GUILHEM (ex-Superpassa 4)	R 24	Sumitomo, Uraga	1976
ALMIRANTE GUILLOBEL (ex-Superpassa 5)	R 25	Sumitomo, Uraga	1976

Displacement, tons: 2,393 standard; 2,735 full load
Dimensions, feet (metres): 207 × 44 × 14.8 (63.2 × 13.4 × 4.5)
Main machinery: 2 GM EMD 20 645F7B diesels; 7,120 hp (5.31 MW) sustained; 2 shafts, cp props, bow thruster
Speed, knots: 14
Range, n miles: 10,000 at 13 kt
Complement: 40 (4 officers)
Guns: 2 Oerlikon 20 mm (not always carried)
Radars: Racal Decca; I-band. Furuno; I-band.

Comment: Originally built as civilian tugs. Bollard pull, 84 tons. Commissioned into the Navy 22 January 1981.

ALMIRANTE GUILLOBEL 5/2003, A E Galarce / 0577476

3 TRITÃO CLASS (FLEET OCEAN TUGS) (ATA)

Name	No	Builders	Commissioned
TRITÃO (ex-Sarandí)	R 21	Estanave, Manaus	19 Feb 1987
TRIDENTE (ex-Sambaíba)	R 22	Estanave, Manaus	8 Oct 1987
TRIUNFO (ex-Sorocabá)	R 23	Estanave, Manaus	5 July 1986

Displacement, tons: 819 standard; 1,680 full load
Dimensions, feet (metres): 181.8 × 38.1 × 11.2 (55.4 × 11.6 × 3.4)
Main machinery: 2 Vilares-Burmoister and Wain Alpha diesels; 2,480 hp(m) (1.82 MW); 2 shafts, bow thruster
Speed, knots: 13
Complement: 44 (6 officers)
Guns: 2 Oerlikon 20 mm.
Radars: Navigation: 1 Racal Decca; I-band. 2 Furuno; I-band.

Comment: Offshore supply vessels acquired from National Oil Company of Brazil and converted for naval use. Assumed names of previous three ships of Sotoyomo class. Fitted to act both as tugs and patrol vessels. Bollard pull, 23.5 tons. Firefighting capability Endurance, 45 days.

TRIDENTE 10/2004, A E Galarce / 1153016

British Indian Ocean Territory

Country Overview

The British Indian Ocean Territory was established as a British dependency in 1965 and is administered by a Commissioner and Administrator who reside in the UK. Situated in the Indian Ocean, halfway between Africa and Indonesia, the territory comprises six atolls of the

Chagos Archipelago which consist of the order of 1,000 uninhabited islands. The largest island is Diego Garcia (17 square miles) which was leased to the United States in 1971 in order to build an air and naval base. Adjacent to the small military port, the lagoon provides a protected anchorage for US pre-positioned forces while the island is also home to a number of communications

and space-related facilities. Exclusively occupied by military (largely US) forces and contractors, the base includes a small British garrison, whose commanding officer represents the Commissioner. Territorial waters (12 n miles) are claimed as is a 200 n mile fishery zone.

PATROL FORCES

1 FISHERY PATROL SHIP (PSO)

PACIFIC MARLIN (ex-*Bigorange XI*)

Measurement, tons: 1,200 grt

Dimensions, feet (metres): 189.3 × 40.0 × 12.5 (577 × 12.2 × 3.8)

Main machinery: 2 Yanmar G250-E diesels; 2,600 hp (1.9 MW); 2 shafts; 1 Kamome TF30DLN bow thruster; 300 hp (225 kW)

Speed, knots: 12.5

Complement: 20 (accommodation for 33)

Radars: Surface search/navigation: JRC JMA-3210, I-band.

Comment: Former Production Testing Vessel built by Teraoka Zosen, Japan in 1978. Converted for fishery protection duties and chartered from Swire Pacific Offshore until December 2009. Equipped with 32 ton deck crane and two fast rescue craft. Steel construction.

PACIFIC MARLIN
6/2008, Swire Pacific Offshore

Brunei

ANGKATAN TENTERA LAUT DIRAJA BRUNEI

Country Overview

Formerly a British dependency, the Nation of Brunei is a sultanate that gained full independence in 1984. Situated on the northern coast of the island of Borneo, the country has a total area of 2,226 square miles and is bordered and divided into two halves by the Malaysian state of Sarawak. It has an 87 n mile coastline with the South China Sea. The capital and largest town is Bandar Seri Begawan which also has port facilities. There are further ports at Kuala Belait and Muara. Territorial seas (3 n miles) and an EEZ (200 n mile) are claimed.

Headquarters Appointments

JERAMBAK	30	BAE System Marine (Scotstoun)	5 Apr 2000	22 June 2002

Displacement, tons: 1,940 full load
Dimensions, feet (metres): 311.7 oa; 294.9 wl x 42 x 11.8 (95.89 x 12.8 x 3.6)
Main machinery: CODAD; 4 MAN 20 RK270 diesels; 2 shafts; cp props
Speed, knots: 30. **Range, n miles:** 5,000 at 12 kt
Complement: 79 plus 24 spare

Missiles: SSM: 8 MBDA Exocet MM 40 Block II (1), active radar homing to 70 km (40 n miles) at 0.9 Mach.
SAM: BAe 16 cell VLS (2), BAe Sea Wolf; Command Line Of Sight (CLOS) radar/TV tracking to 6 km (3.3 n miles) at 2.5 Mach; warhead 14 kg; 16 missiles.
Guns: Otobreda 76 mm Super Rapid (2), 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.
 2 MSI 30 mm/75, 650 rds/min to 10 km (5.4 n miles) (2).
Torpedoes: 6 Marconi 324 mm (2 triple) tubes (2)
Countermeasures: Decoys: 2 Super Barricade chaff launchers (2)
 ECM: Thales Scorpion, jammer.
 ESM: Thales Cutlass 242; intercept.
 CISM: Falcon DS 300; intercept.
Combat data systems: Nautis Mk 2 with Link Y.
Weapons control: Radamec 2500 optronic director (2).
Radars: Air/surface search Plessey AWS 9 (2); E/F-band.
 Surface search: Kelvin Hughes 1007 (2); I-band.
 Fire control: 2 Marconi 1802 (2); I/J-band.

NAKHODA RAGAM

(Scale 1 : 900), Ian Sturton / 0526842

Sonars: Thomson Marconi 4130C1; hull mounted.

Helicopters. Platform for 1 medium.

Programmes: Tenders requested on 28 April 1995. Yarrow Shipbuilders selected in August 1995. Detailed design done in 1996 with final contract signed 14 January 1998. Long-term support contract signed with BAE Systems in May 2002.

Structure: Scaled down version of Malaysian Lekiu class. Facilities to land and refuel S-70A and Bell 212 helicopters.

Operational: Sea trials of first of class began in January 2002. Training for all three crews provided by Flagship Training. *Jerambak* conducted acceptance trials in late 2004. Following settlement of a contractual dispute between the Brunei Procurement Agency and BAE Systems in early 2007, the Brunei government took formal possession of the vessels. Plans to commission the ships into naval service have been cancelled and it is planned to sell them to another navy. Meanwhile the ships remain under care and maintenance at Barrow.

BENDAHARA SAKAM

Bulgaria**VOENNOMORSKI SILI****Country Overview**

Situated in the Balkan Peninsula, the Republic of Bulgaria has an area of 42,823 square miles and is bordered to the north by Romania and to the south by Turkey and Greece. The River Danube forms much of the northern border. Bulgaria has a coastline of 191 n miles with the Black Sea on which Varna and Burgas are the principal ports. The capital is Sofia. Territorial waters (12 n miles) are claimed. An Exclusive Economic Zone (EEZ) was declared in 1987 but the precise limits have yet to be fully agreed and defined.

Headquarters Appointments

Commander of the Navy and Chief of Staff:
Rear Admiral Minko Slavov Kavalzhiev

Diplomatic Representation

Defence Attaché, London:
Rear Admiral P I Manushev

Organisation

Four squadrons: Submarine, Surface, MCMV and Auxiliary, with Headquarters at Varna and Burgas. There is also a Border Guard Unit.

Personnel

(a) 2009: 4,140 (695 officers)
 (b) Reserves 10,000

Bases

North Zone: HQ, Naval Base, Air Station and Higher Naval School (Nikola Yonkov Vaptsarov) at Varna.
 South Zone: Burgas (HQ) and Atiya (naval base).
 Danube: Vidin (naval base).

Coast Defence

One battalion with six truck-mounted SS-C-3 Styx twin launchers. Two Army regiments of coastal artillery with 100 mm and 130 mm guns. A coastal surveillance system, EKLAN, is planned to become operational in 2012.

DELETIONS**Submarines**

Dimensions, feet (metres) 316.3 × 41.3 × 11.5
(96.4 × 12.6 × 3.5)

Main machinery: CODAG; 1 SGW, Nikolayev M88 gas turbine (centre shaft); 18,000 hp(m) (13.25 MW) sustained; 2 Russki B-68 diesels; 15,820 hp(m) (11.63 MW) sustained; 3 shafts

Speed, knots: 27 gas, 22 diesel

Range, n miles: 1,800 at 14 kt

Complement: 110

Missiles: SAM SA-N-4 Gecko twin launcher ●, semi-active radar homing to 15 km (8 n miles) at 2.5 Mach; warhead 60 kg; altitude 9.1-3,048 m (30-10,000 ft); 20 missiles

Guns: 4-3 in (76 mm)/59 AK 726 (2 twin) ●; 90 rds/min to 15 km (8 n miles); weight of shell 5.9 kg
4-30 mm/65 (2 twin) ●; 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.

A/S mortars: 2 RBU 6000 12-tubed trainable ●; range 6,000 m; warhead 31 kg.

Depth charges: 2 racks

Mines: Capacity for 22.

SMELI

Countermeasures: Decoys. 2 PK 16 chaff launchers. ESM. 2 Watch Dog; radar warning.

Radars: Air search. Strut Curve ●; F-band; range 110 km (60 n miles) for 2 m² target.

Surface search: Don 2; I-band.

Fire control: Hawk Screech ●; I-band (for 76 mm). Drum Tilt ●; H/I-band (for 30 mm). Pop Group ●; F/H/I-band (for SA-N-4).

IFF: High Pole B.

Sonars: Hercules (MG 322); hull-mounted; active search and attack; medium frequency.

Programmes: First reported in the Black Sea in 1976. Type I retained by the USSR for training foreign crews but transferred in February 1990 when the Koni programme terminated. Others of the class acquired by the former East German Navy (now deleted), Serbia (deleted but for sale), Algeria, Cuba (deleted) and Libya.

Modernisation: Marisat fitted in 1995. Reported to be RAS capable. Communications upgrade planned to achieve NATO interoperability.

Operational: Based at Varna. Decommissioning was expected when *Drazki* entered service but remains operational

2 Sep 1974

Launched
21 June 1977
30 Mar 1976
8 Dec 1975

Commissioned
27 Oct 1978
20 Jan 1978
20 Jan 1978

Displacement, tons: 1,940 light; 2,430 full load

Dimensions, feet (metres): 349 × 40.3 × 18.4
(106.4 × 12.3 × 5.6)

Main machinery: CODAG; 1 RR Olympus TM38 gas-turbine, 25,440 hp (19 MW) sustained; 2 Cockerill 240 CO V 12 diesels; 6,000 hp(m) (4.4 MW); 2 shafts; LIPS cp props

Speed, knots: 26; 15 on 1 diesel; 20 on 2 diesels

Range, n miles: 4,500 at 18 kt; 6,000 at 15 kt

Complement: 159 (13 officers)

Missiles: SSM, 4 Aerospatiale MM 38 (2 twin) launchers ●; inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer

SAM: Raytheon Sea Sparrow RIM-7P; Mk 29 octuple launcher ●; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg.

Guns: 1 Creusot-Loire 3.9 in (100 mm)/55 Mod 68 ●; 80 rds/min to 17 km (9 n miles) anti-surface, 8 km (4.4 n miles) anti-aircraft; weight of shell 13.5 kg.

Torpedoes: 2-21 in (533 mm) launchers, ECAN L5 Mod 4; anti-submarine; active/passive homing to 9.5 km (5 n miles) at 35 kt; warhead 150 kg; depth to 550 m (1,800 ft).

A/S mortars: 1 Creusot-Loire 375 mm 6-barrelled trainable launcher ●; Bofors rockets to 1,600 m; warhead 107 kg.

Countermeasures: Decoys: 2 Tracor MBA SRBOC 6-barrelled Mk 36 launchers; chaff (Mk 214 Seagnat) and IR flares to 4 km (2.2 n miles). Nixie SLQ-25; towed anti-torpedo decoy.

ESM: Argos AR 900; intercept.

Combat data systems: Signal SEWACO IV action data automation; Link 11. SATCOM

DRAZKI

(Scale 1 : 900), Ian Sturton / 1164332

Weapons control: Sagem Vigy 105 optronic director ●.

Radars: Air/surface search: Signaal DA05 ●, E/F band.

Surface search/fire control: Signaal WM25 ●, I/J-band

Navigation: Signaal Scout; I/J band

IFF: Mk XII.

Sonars: Computing Devices Canada SQS 510; hull-mounted; active search and attack; medium frequency.

Programmes: A compact, well-armed class of frigate originally designed by and for the Belgian Navy. Following the signature of a letter of intent on 4 December 2004, the Bulgarian government gave final approval on 17 March 2005 for transfer of ex-*Wandelaar* to Bulgarian service in October 2005. The procurement of ex-*Westdiep* and ex-*Wielingen* was confirmed on 7 December 2007. Ex-*Westdiep* transferred

on 22 August 2008 and ex-*Wielingen* in February 2009.

Modernisation: The ship completed a major upgrade programme before leaving Belgian service. This included update of Sea Sparrow to 7P; modification of WM25 radar to include improved ECCM and MTI capabilities and a new navigation radar and sonar. A new optronic director, IFF and communications facilities were also installed. Platform improvements included new diesel engines and alternators.

Structure: Fully air conditioned. Fin stabilisers fitted.

Operational: The ships are used for surveillance missions in the Black Sea, maritime interdiction and contributions to international peace-support operations, both under the NATO flag and as part of the Black Sea Naval Co-operation Task Group (BLACKSEAFOR).

CORVETTES

1 TARANTUL II CLASS (PROJECT 1241.1M) (FSGM)

MULNAYA 43 (ex-101)

Displacement, tons: 385 standard; 455 full load
Dimensions, feet (metres): 184.1 x 37.7 x 8.2 (58.1 x 11.5 x 2.5)
Main machinery: COGAG; 2 Nikolayev Type DR 77 gas turbines; 16,016 hp(m) (11.77 MW) sustained; 2 Nikolayev Type DR 76 gas turbines with reversible gearboxes; 4,993 hp(m) (3.67 MW); sustained; 2 shafts
Speed, knots: 36 on 4 turbines
Range, n miles: 400 at 36 kt; 2,000 at 20 kt
Complement: 34 (5 officers)

Missiles: SSM: 4 Raduga SS-N-2C Styx (2 twin) launchers; active radar or IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg; sea-skimmer.
SAM: SA-N-5 Grail quad launcher; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg.
Guns: 1–3 in (76 mm)/59 AK 176; 120 rds/min to 15 km (8.1 n miles); weight of shell 5.9 kg
 2–30 mm/65; 6 barrels per mounting; 3,000 rds/min to 2 km.
Countermeasures: Decoys: 2 PK 16 chaff launchers
ESM: 2 Half Hat, intercept.
Weapons control: Hood Wink optronic director. Band Stand datalink for SSM
Radars: Air/surface search: Plank Shave, E-band.
Navigation: Kivach, -band
Fire control: Bass Tilt; H/I-band.
 Band Stand (Mineral ME), D-band (for SSN 2C)
IFF: Square Head, High Pole.

Comment: Built at Volodarski, Rybinsk. Transferred from USSR in December 1989. Name means Thunderbolt. Based at Atiya.

MULNAYA (old number)

7/2000, van Ginderen Collection / 0104245

2 RESHITELNI (PAUK I) (PROJECT 1241P) CLASS (FSM)

RESHITELNI 13 BODRI 14

Displacement, tons: 440 full load
Dimensions, feet (metres): 195.2 x 33.5 x 10.8 (59.5 x 10.2 x 3.3)
Main machinery: 2 Type 521 diesels; 16,180 hp(m) (11.9 MW) sustained; 2 shafts
Speed, knots: 32
Range, n miles: 2,200 at 14 kt
Complement: 38

Missiles: SAM: SA-N-5 Grail quad launcher; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg; 8 missiles.
Guns: 1–3 in (76 mm)/59 AK 176; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg.
 1–30 mm/65; 6 barrels, 3,000 rds/min combined to 2 km
Torpedoes: 4–16 in (406 mm) tubes. Type 40; anti-submarine; active/passive homing up to 15 km (8 n miles) at up to 40 kt; warhead 100–150 kg.
A/S mortars: 2 RBU 1200 6-tubed fixed; range 1,200 m; warhead 34 kg
Depth charges: 2 racks (12)
Countermeasures: Decoys: 2 PK 16 chaff launchers.
ESM: 3 Brick Plug; intercept.
Radars: Air/surface search: Peel Cone, E-band
Surface search: Spin Trough; I-band
Fire control: Bass Tilt; H/I-band.
Sonars: Foal Tail VDS (mounted on transom); active attack; high frequency

Comment: Reshitelni transferred from USSR in September 1989, Bodri in December 1990. Based at Varna.

BOORI

4/2007, C D Yaylali / 1335746

0 + (2) GOWIND 200 CLASS (CORVETTES) (FS)

Displacement, tons: 1,950 full load
Dimensions, feet (metres): 337.9 x 46.6 x ? (103.0 x 14.2 x ?)
Main machinery: CODAD, 2 waterjets
Speed, knots: 30
Range, n miles: 2,970 at 12 kt
Complement: 70

Missiles: SSM: To be announced.
SAM: To be announced.
Guns: To be announced.
Countermeasures: To be announced.
Combat data systems: DCNS Setis.
Electro-optic systems: To be announced.
Radars: Air/surface search. To be announced.
Surface search: To be announced
Fire control: To be announced.
Navigation: To be announced.

Comment: Following a meeting in October 2008 between French President Sarkozy and Bulgarian Prime Minister Stanishev, it was agreed in principle to proceed with negotiations to procure up to four corvettes. Although it had been hoped to finalise a contract by late 2007, progress was halted due to reported Bulgarian budgetary concerns until a further visit by President Sarkozy in 2008 appeared to revive the project. Negotiations continue. The design of the Gowind series of corvettes has drawn on experience gained in the FREMM frigate project. Design features include an integrated mast structure, a flight deck and hangar and space for a 16-cell VLS system, eight surface-to-surface missiles and a medium calibre gun. Particular attention has been paid to Stealth features. IR signature is reduced by channelling exhaust gases through waterjets rather than a funnel. Subject to contract, the first ship is likely to be built at Lorient and the second at Varna. There is likely to be an option for a further two ships.

GOWIND 200

10/2007, DCNS/Armaria / 1169319

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Numbers/Type: 3 Mil Mi-14PL 'Haze A'
Operational speed: 120 kt (222 km/h).
Service ceiling: 15,000 ft (4,570 m).
Range: 240 n miles (445 km).

Role/Weapon systems: Primary role as inshore/coastal ASW and Fleet support helicopter; one converted as transport. Based at Asparukhovo airport. Sensors: Search radar, MAD, sonobuoys, dipping sonar. Weapons: ASW; up to 2 x torpedoes, or mines, or depth bombs.

HAZE 6/2006, Bulgarian Navy / 1164494

Numbers/Type: 6 Eurocopter AS 565MB Panther.
Operational speed: 150 kt (278 km/h).
Service ceiling: 15,420 ft (4,700 m).
Range: 464 n miles (859 km).

Role/Weapon systems: Six aircraft ordered on 28 January 2005. Delivery is to begin in 2010. The aircraft are to be shore-based and are to be used for maritime surveillance, ASW, anti-surface and SAR roles. Sensors and weapons to be announced.

AS 565 PANTHER (French colours) 1/2007, B Prézeln / 1305023

PATROL FORCES

Notes: Customs craft operate on the Danube. Vessels include three Boston Whalers donated by the US and RIBs given by the UK in 1992-93

9 ZHUK (PROJECT 1400M) CLASS (COASTAL PATROL CRAFT) (PB)

511-513 521-523 531-533

Displacement, tons: 39 full load
Dimensions, feet (metres): 78.7 x 16.4 x 3.9 (24 x 5 x 1.2)
Main machinery: 2 Type M 401B diesels; 2,200 hp(m) (1.6 MW) sustained; 2 shafts
Speed, knots: 30
Range, n miles: 1,100 at 15 kt
Complement: 11 (3 officers)
Guns: 4 USSR 14.5 mm (2 twin) MGs.
Radars: Surface search: Spin Trough; I-band.

Comment: Transferred from USSR 1980-81. Belong to the Border Police under the Minister of the Interior and have 'Border Guard' insignia on the ships side. Based at Atiya and at Varna.

ZHUK 512 (and others) 6/1996, Bulgarian Navy / 0506272

6 OSA (PROJECT 205) CLASS (FAST ATTACK CRAFT—MISSILE) (PTFG)

URAGON 102 - 105 (ex-111)
 BURYA 103 (Osa I) - 106 (ex-112) (Osa I)
 GRUM 104 SMERCH 107 (ex-113)

Displacement, tons: 245 full load; 210 (Osa I)
Dimensions, feet (metres): 126.6 x 24.9 x 8.8 (38.6 x 7.6 x 2.7)
Main machinery: 3 Type M 504 diesels; 10,800 hp(m) (7.94 MW) sustained; 3 shafts (Osa II)
 3 Type 503A diesels; 8,025 hp(m) (5.9 MW) sustained; 3 shafts (Osa I)
Speed, knots: 37 (Osa II); 35 (Osa I)
Range, n miles: 500 at 35 kt
Complement: 26 (3 officers)

Missiles: SSM: 4 SS-N-2A/B Styx; active radar/IR homing to 46 km (25 n miles) at 0.9 Mach; warhead 513 kg SS-N-2A in Osa I.
Guns: 4 USSR 30 mm/85 (2 twin); 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.
Radars: Surface search/fire control: Square Tie; I-band.
Fire control: Drum Tilt; H/I-band.
IFF: High Pole. Square Head.

Comment: Four Osa Is built between 1965 and 1970, and transferred from USSR between 1977 and 1982. Two Osa Is transferred in 1972 and survived longer than expected. Names: 102 Hurricane, 103 Storm, 104 Thunder, and 107 Tornado. All based at Sozopol and seldom go to sea.

AMPHIBIOUS FORCES

2 POLNOCHNY A (PROJECT 770) CLASS (LSM)

SIRIUS (ex-Ivan Zagubanski) 701 ANTARES 702

Displacement, tons: 750 standard; 800 full load
Dimensions, feet (metres): 239.5 × 27.9 × 5.8 (73 × 8.5 × 1.8)
Main machinery: 2 Kolomna Type 40-D diesels; 4,400 hp(m) (3.2 MW) sustained; 2 shafts
Speed, knots: 19
Range, n miles: 1,000 at 18 kt
Complement: 40
Military lift: 350 tons including 6 tanks; 180 troops
Guns: 2 USSR 30 mm (twin). 2 — 140 mm 18-barrelled rocket launchers.
Radars: Navigation. SpinTrough; I-band.

Comment: Built 1963 to 1968. Transferred from USSR 1986-87. Not fitted either with the SA-N-5 Grail SAM system or with Drum Tilt fire-control radars. Plans to convert them to minelayers have been shelved and both are now used as transports. Based at Atiya

ANTARES

6/2006, Bulgarian Navy / 1164493

6 VYDRA (PROJECT 106K) CLASS (LCU)

703-708

Displacement, tons: 425 standard, 550 full load
Dimensions, feet (metres): 178.7 × 25.3 × 6.6 (54.8 × 7.7 × 2)
Main machinery: 2 Type 3-D-12 diesels, 600 hp(m) (440 kW) sustained; 2 shafts
Speed, knots: 12
Range, n miles: 2,500 at 10 kt
Complement: 20
Military lift: 200 tons or 100 troops or 3 MBTs
Guns: 1 — 14.5 mm.
Radars: Navigation: Don 2; I-band
IFF: High Pole.

Comment: Built 1963 to 1969. Ten transferred from the USSR in 1970, the remainder built in Bulgaria between 1974 and 1978. In 1992-93 703-707 converted to be used as minelayers. Many deleted. All based at Atiya

VYDRA 705

6/2006, Bulgarian Navy / 1164492

MINE WARFARE FORCES

Notes: (1) Six Vydra class (see Amphibious Forces) converted to minelayers in 1992-93. Some are in reserve
 (2) MCM long-term projects include:
 acquisition of up to six second-hand MCM vessels
 establishment of a mine-warfare data centre
 the acquisition of route-survey and bottom surveillance systems
 procurement of a shallow-water MCM capability.

4 BRIZ (SONYA) (PROJECT 12650) CLASS (MINESWEEPERS—COASTAL) (MSC)

BRIZ 61 SHKVAL 62 PRIBOY 63 SHTORM 64

Displacement, tons: 450 full load
Dimensions, feet (metres): 157.4 × 28.9 × 6.6 (48 × 8.8 × 2)
Main machinery: 2 Kolomna Type 9-D-8 diesels; 2,000 hp(m) (1.47 MW) sustained, 2 shafts
Speed, knots: 15
Range, n miles: 1,500 at 14 kt
Complement: 43 (5 officers)
Guns: 2 USSR 30 mm/65 (twin); 500 rds/min to 5 km (2.7 n miles), weight of shell 0.54 kg.
 2 USSR 25 mm/80 (twin); 270 rds/min to 3 km (1.6 n miles), weight of shell 0.34 kg.
Mines: 5
Radars: Surface search/navigation: Kivach, I-band.
IFF: Two Square Head, High Pole B.
Sonars: MG 69/79; hull-mounted, active minehunting; high frequency.

Comment: Wooden hulled ships transferred from USSR in 1981-84. Based at Atiya

SHKVAL

6/2006, Bulgarian Navy / 1164491

1 FLOWER (TRIPARTITE) CLASS (MINEHUNTER) (MHC)

Name	No	Builders	Laid down	Launched	Commissioned
TSIBAR	32 (ex-M 922)	Beliard, Ostend	6 July 1987	4 Aug 1988	14 Dec 1989

(ex-Myosotis)

Displacement, tons: 562 standard; 595 full load
Dimensions, feet (metres): 168.9 × 29.2 × 8.5 (51.5 × 8.9 × 2.6)
Main machinery: 1 Stork Wärtsila A-RUB 215X-12 diesel; 1,860 hp(m) (1.35 MW) sustained; 1 shaft; LIPS cp prop; 2 active rudders; 2 motors; 240 hp(m) (179 kW); 2 bow thrusters
Speed, knots: 15 diesel; 7 electric
Range, n miles: 3,000 at 12 kt
Complement: 46
Guns: 1 DCN 20 mm/20, 720 rds/min to 10 km. 2 — 12.7 mm MGs.
Countermeasures: MCM: 2 PAP 104 remote-controlled mine locators; 39 charges. Mechanical minesweeping gear
Radars: Navigation: Racal Decca TM 1229C, I-band.
Sonars: Thomson Sintra DUBM 21A, hull-mounted; minehunting, 100 kHz (±10 kHz).

Programmes: Originally procured for the Belgian Navy in co-operation with France and the Netherlands. The hull was built at Ostend and the ship was fitted out at Rupelmonde. It was subsequently modified to act as an ammunition transport. The ship was decommissioned from Belgian service in 2004 and, following an announcement on 7 December 2007 is to be re-activated and transferred to Bulgaria in early 2009. Details are based on the ships in Belgian service before modernisation.

Modernisation: The ship is to be overhauled before entering Bulgarian service.
Structure: GRP hull fitted with active tank stabilisation, full NBC protection and air conditioning. Has automatic pilot and buoy tracking. A 6-ton container can be carried for varying tasks.

4 ISCAR (VANYA) (PROJECT 257D) CLASS (MINESWEEPERS—COASTAL) (MSC)

ISKAR 31 ZIBAR 32 DOBROTICH 33 EVSTATI VINAROV 34

Displacement, tons: 245 full load
Dimensions, feet (metres): 131.2 × 23.9 × 5.9 (40 × 7.3 × 1.8)
Main machinery: 2 M 870 diesels; 2,502 hp(m) (1.84 MW); 2 shafts; cp props
Speed, knots: 16
Range, n miles: 2,400 at 10 kt
Complement: 36
Guns: 2 USSR 30 mm/65 (twin); 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg
Mines: Can carry 8
Radars: Surface search. Don 2 I-band
Sonars: MG 69/79; hull-mounted; active minehunting; high frequency

Comment: Built 1961 to 1973. Transferred from the USSR—two in 1970, two in 1971 and two in 1985. Can act as minehunters. Two paid off in 1992, but back in service in 1994 and then finally scrapped in 1995. Based at Varna.

ISKAR 6/2007, Maritime Photographic / 1166832

2 YEVGENYA (PROJECT 1258) CLASS (MINESWEEPERS—COASTAL) (MSC)

Displacement, tons: 77 standard; 90 full load
Dimensions, feet (metres): 80.4 × 18 × 4.6 (24.5 × 5.5 × 1.4)
Main machinery: 2 Type 3-D-12 diesels; 600 hp(m) (440 kW) sustained; 2 shafts
Speed, knots: 11
Range, n miles: 300 at 10 kt
Complement: 10 (1 officer)
Guns: 2—25 mm/80 (twin)
Mines: 8 racks
Radars: Surface search. Spin Trough; I-band.
IFF: High Pole
Sonars: MG-7 lifted over stern; active; high frequency.

Comment: GRP hulls built at Kolpino. Transferred from USSR 1977. Based at Varna.

YEVGENYA 66 6/2006, Bulgarian Navy / 1164490

2 PO 2 (PROJECT 501) CLASS (MINESWEEPERS—INSHORE) (MSB)

218–219

Displacement, tons: 56 full load
Dimensions, feet (metres): 70.5 × 11.5 × 3.3 (21.5 × 3.5 × 1)
Main machinery: 1 Type 3-D-12 diesel; 300 hp(m) (220 kW) sustained; 2 shafts
Speed, knots: 12
Complement: 8

Comment: Built in Bulgaria. First units completed in early 1950s and last in early 1960s. Originally a class of 24 and these are the last two to survive. Occasionally carries a 12.7 mm MG, when used for patrol duties. Both based at Varna.

PO 2 7/2000, van Ginderen Collection / 010425c

6 OLYA (PROJECT 1259) CLASS (MINESWEEPERS—INSHORE) (MSB)

51–56

Displacement, tons: 64 full load
Dimensions, feet (metres): 84.6 × 14.9 × 3.3 (25.8 × 4.5 × 1)
Main machinery: 2 Type 3D 6S11/235 diesels; 471 hp(m) (346 kW) sustained; 2 shafts
Speed, knots: 12. **Range (miles):** 300 at 10 kt
Complement: 15
Guns: 2—12.7 mm MGs (twin).
Radars: Navigation: Pachora; I-band.

Comment: First five built between 1988 and 1992 in Bulgaria to the Russian Olya design. 56 completed in 1996. Minesweeping equipment includes AT-6, SZMT-1 and 3 PKT-2 systems. 55 based at Varna, the remainder at Balchik.

OLYA 52 7/2000, van Ginderen Collection / 0104250

SURVEY SHIPS

1 MOMA (PROJECT 861) CLASS (AGS)

ADMIRAL BRANIMIR ORMANOV 401

Displacement, tons: 1,580 full load
Dimensions, feet (metres): 240.5 × 36.8 × 12.8 (73.3 × 11.2 × 3.9)
Main machinery: 2 Zgoda-Sulzer 6TD48 diesels; 3,300 hp(m) (2.43 MW) sustained; 2 shafts; cp props
Speed, knots: 17. **Range, n miles:** 9,000 at 12 kt
Complement: 37 (5 officers)
Radars: Navigation: 2 Don-2; I-band.

Comment: Built at Northern Shipyard, Gdansk, Poland in 1977. Based at Varna. Two others of the class belonging to Russia were refitted in Bulgaria in 1995–96.

ADMIRAL BRANIMIR ORMANOV 6/2007, Maritime Photographic / 1166833

2 COASTAL SURVEY VESSELS (PROJECT 612) (AGSC)

231 331

Displacement, tons: 114 full load
Dimensions, feet (metres): 87.6 × 19 × 4.9 (26.7 × 5.8 × 1.5)
Main machinery: 2 Type 3-D-12 diesels; 600 hp(m) (440 kW) sustained; 2 shafts
Speed, knots: 12. **Range, n miles:** 600 at 10 kt
Complement: 9 (2 officers)
Radars: Navigation. I-band

Comment: Built in Bulgaria in 1986 and 1988 respectively. Can carry 2 tons of equipment. 231 is based at Varna and 331 at Atiya.

AGSC 331 6/1996, Bulgarian Navy / 0506774

AUXILIARIES

1 SUPPORT TANKER (AOTL)

AKIN 303 (ex-203)

Displacement, tons: 1,250 full load
 Dimensions, feet (metres): 181.8 x 36.1 x 11.5 (55.4 x 11 x 3.5)
 Main machinery: 2 Sulzer 6AL-20-24 diesels; 1,500 hp(m) (1.1 MW); 2 shafts
 Speed, knots: 12. Range, n miles: 1,000 at 8 kt
 Complement: 23
 Cargo capacity: 650 tons fuel
 Guns: 2 ZU-23-2F Wrobo: 23 mm (twin)
 Radars: Navigation: I-band.

Comment: Laid down 1989, launched 1993 and completed in 1994 at Burgas Shipyards, Burgas. Based at Varna

AOT 303 6/2006, Bulgarian Navy / 1164488

1 MESAR CLASS (PROJECT 102) (SUPPORT TANKER) (AORL)

ATIYA 302

Displacement, tons: 3,240 full load
 Dimensions, feet (metres): 319.8 x 45.6 x 16.4 (97.5 x 13.9 x 5)
 Main machinery: 2 diesels; 12,000 hp(m) (8.82 MW); 2 shafts
 Speed, knots: 18. Range, n miles: 12,000 at 15 kt
 Complement: 32 (6 officers)
 Cargo capacity: 1,593 tons
 Guns: 4 USSR 30 mm/65 (2 twin)
 Radars: Navigation: 2 Don 2; I-band.

Comment: Built in Bulgaria in 1987. Abeam fuelling to port and astern fuelling. Mount 1.5 ton crane amidships. Also carries dry stores. Based at Atiya.

ATIYA 7/2002, S Broyer / 0568845

2 DIVING TENDERS (PROJECT 245) (YDT)

223 323

Displacement, tons: 112 full load
 Dimensions, feet (metres): 91.5 x 17.1 x 7.2 (27.9 x 5.2 x 2.2)
 Main machinery: Diesel-electric; 2 MCK 83-4 diesel generators; 1 motor; 300 hp(m) (220 kW); 1 shaft
 Speed, knots: 10. Range, n miles: 400 at 10 kt
 Complement: 6 + 7 divers
 Radars: Navigation: Don 2; I-band

Comment: Built in Bulgaria in mid-1980s. A twin 12.7 mm MG can be fitted. Capable of bell diving to 60 m. 223 based at Varna. 323 based at Atiya.

YDT 323 6/2006, Bulgarian Navy / 1164485

2 TYPE 215 (TORPEDO RECOVERY VESSELS) (ARS)

222 +1

Displacement, tons: 110 full load
 Dimensions, feet (metres): 87.3 x 19.0 x 4.9 (26.6 x 5.8 x 1.5)
 Main machinery: 1 diesel; 290 hp(m) (216 kW); 1 shaft
 Speed, knots: 12

Comment: Capable of carrying five torpedoes.

222 6/2007, Maritime Photographic / 11671907

1 BEREZA (PROJECT 130) CLASS (ADG/AX)

KAPITAN 1st RANK DIMITRI DOBREV 206

Displacement, tons: 2,051 full load
 Dimensions, feet (metres): 228 x 45.3 x 13.1 (69.5 x 13.8 x 4)
 Main machinery: 2 Zgoda-Sulzer 8 AL 25/30 diesels; 2,925 hp(m) (2.16 MW) sustained; 2 shafts; cp props
 Speed, knots: 13. Range, n miles: 1,000 at 13 kt
 Complement: 48
 Radars: Navigation: Kivach; I-band.

Comment: New construction built in Poland and transferred July 1988. Used as a degaussing ship. Fitted with an NBC citadel and upper deck wash-down system. The ship has three laboratories. Has also been used as a training ship. Based at Varna.

KAPITAN 1st RANK DIMITRI DOBREV 7/2007, Bob Fildes / 1166829

5 AUXILIARIES (ATS)

224 312 313 321 421

Comment: 421 is a survey vessel converted to a training ship. 224 and 321 are firefighting vessels. 312 and 313 are tugs.

421 6/2003, Schaeffer/Marsan / 0561677

224 6/2006, Bulgarian Navy / 1164483

1 SALVAGE SHIP (ARS)

Name	No	Builders	Commissioned
PROTEO	224 (ex-A 5310)	Cantieri Navali Riuniti, Ancona	24 Aug 1951
(ex-Protea, ex-Perseo)			

Displacement, tons: 1,865 standard; 2,147 full load
 Dimensions, feet (metres): 248 x 38 x 21 (75.6 x 11.6 x 6.4)
 Main machinery: 2 Fiat diesels; 4,800 hp(m) (3.53 MW); 1 shaft
 Speed, knots: 18. Range, n miles: 7,500 at 13 kt
 Complement: 122 (8 officers)
 Radars: Navigation: SMA-748; I-band.

Comment: Transferred to Bulgaria on 3 June 2004 having been decommissioned from the Italian Navy in 2002. Originally laid down in 1943, construction was suspended until restarted in 1949. Details are those of the ship when in Italian service

PROTEO 7/2007, Bob Fildes / 1166830

Canada

Country Overview

Canada is the world's second-largest country. The British monarch, represented by a governor-general, is head of state. With an area of 3,849,652 square miles, it occupies most of northern North America and is bordered to the south by the United States and to the west by the US state of Alaska. It has a coastline of 131,647 n miles with the Pacific, Arctic and Atlantic Oceans and with Baffin Bay and the Davis Strait. Numerous coastal islands include the Arctic Archipelago to the north, Newfoundland, Cape Breton, Prince Edward, and Anticosti to the east and Vancouver Island and the Queen Charlotte Islands to the west. Hudson Bay contains Southampton Island and many smaller islands. The 2,035 n mile St Lawrence-Great Lakes navigation system enables ocean-going vessels to sail between the Atlantic Ocean and the Great Lakes via the St Lawrence Seaway (opened 1959). Ottawa is the capital while Toronto is the largest city. Major ports include Vancouver, Montreal, Halifax, Sept-Îles, Port-Cartier, Quebec City, Saint John (New Brunswick), Thunder Bay, Prince Rupert, and Hamilton. Territorial seas (12 n miles) are claimed. A 200 n mile EEZ has been claimed but the limits have only been partly defined by boundary agreements.

Headquarters Appointments

Chief of Maritime Staff
Vice Admiral DW Robertson, CMM, MSM, CD
Assistant Chief of Maritime Staff
Commodore K E Williams, OMM, MSM, CD
Director General Maritime Personnel and Readiness
Commodore L M Hickey, OMM, CD
Director General Maritime Force Development
Captain J E T P Ellis, CD

Flag Officers

Commander, Maritime Forces, Atlantic:
Rear Admiral P A Maddison, OMM, MSM, CD
Commander, Maritime Forces, Pacific:
Rear Admiral T H W Pile, CMM, CD
Commander, Naval Reserves:
Commodore J J Bennett, OMM, CD

Diplomatic Representation

Defence Attaché, Washington:
Captain A L Garceau, CD
Naval Adviser, London
Captain N H Jolin, OMM, CD
Defence Attaché, Tokyo:
Captain J E H A Langlois, CD

Establishment

The Royal Canadian Navy (RCN) was officially established on 4 May 1910, when Royal Assent was given to the Naval Service Act. On 1 February 1968 the Canadian Forces Reorganisation Act unified the three branches of the Canadian Forces and the title 'Royal Canadian Navy' was dropped.

Personnel

2009: 8,553 (Regular), 3,850 (Reserves)

Prefix to Ships' Names

HMCS

Bases

Halifax and Esquimaux

Fleet Deployment

Atlantic
Canadian Fleet Atlantic (destroyer, frigates, ADR)
Maritime Operations Group Five (maritime warfare forces, submarines, training ships)

Pacific
Canadian Fleet Pacific (destroyer, frigates, ADR)
Maritime Operations Group Four (maritime warfare forces, submarines, training ships)

Maritime Air Components (MAC)

1 Canadian Air Division HQ Detachment Regional Air Control Element Atlantic (Halifax)
1 Canadian Air Division HQ Detachment Regional Air Control Element Pacific (Esquimaux)

Squadron/Unit	Base	Aircraft	Function
MP 404 (MP&T)	Greenwood, NS	Aurora/Arcturus	LRMP/Training
MP 405 (MP)	Greenwood, NS	Aurora	LRMP
HT 406 (M) OTS	Shearwater, NS	Sea King	Training
MP 407 (MP)	Comox, BC	Aurora	LRMP
MH 423 (MH)	Shearwater, NS	Sea King	General
MH 443 (MH)	Victoria, BC	Sea King	General
HOTEF	Shearwater, NS	Sea King	Test
MP & EU	Greenwood, NS	Aurora	Test

Notes

1. Detachments from 423 and 443 meet ships' requirements in Atlantic and Pacific Fleets respectively. Sea King helicopters are now classified as General Purpose vice the former ASW designation.
2. 413 Squadron based in Greenwood, NS, and 442 Squadron based in Comox, BC, are two maritime search and rescue squadrons under the command of 1 Canadian Air Division (CAD).
3. Combat training support provided by commercial contract from March 2002.

SUBMARINES

4 VICTORIA (UPHOLDER) CLASS (TYPE 2400) (SSK)

Name	No	Builders	Start date	Launched	Commissioned	Recommissioned
VICTORIA (ex- <i>Unseen</i>)	876 (ex-S 41)	Cammell Laird, Birkenhead	Jan 1986	14 Nov 1989	7 June 1991	2 Dec 2000
WINDSOR (ex- <i>Unicorn</i>)	877 (ex-S 43)	Cammell Laird, Birkenhead (VSEL)	Feb 1989	16 Apr 1992	25 June 1993	4 Oct 2003
CORNER BROOK (ex- <i>Ursula</i>)	878 (ex-S 42)	Cammell Laird, Birkenhead (VSEL)	Aug 1987	28 Feb 1991	8 May 1992	29 June 2003
CHICOUTIMI (ex- <i>Upholder</i>)	879 (ex-S 40)	Vickers Shipbuilding and Engineering, Barrow	Nov 1983	2 Dec 1986	8 June 1990	2 Oct 2004

Displacement, tons: 2,168 surfaced; 2,455 dived

Dimensions, feet (metres): 230.6 x 25 x 177
(70.3 x 7.6 x 5.5)

Main machinery: Diesel-electric; 2 Paxman Valenta 16SZ diesels; 3,620 hp (2.7 MW) sustained; 2 GEC alternators; 2.8 MW; 1 GEC motor; 5,400 hp (4 MW); 1 shaft

Speed, knots: 12 surfaced; 20 dived; 12 snorting

Range, n miles: 8,000 at 8 kt snorting

Complement: 48 (7 officers) plus 11 spare

Torpedoes: 6—21 in (533 mm) bow tubes, 18 Raytheon Mk 48 Mod 4M; dual purpose; active/passive homing to 50 km (27 n miles); 38 km (21 n miles) at 40/55 kt; warhead 267 kg. Air turbine pump discharge.

Countermeasures: Decoys; 2 SSE launchers.

ESM: Sea Search II; intercept

Weapons control: Lockheed Martin SFCS

Radars: Navigation: Kelvin Hughes Type 1007; I-band.

Furuno (portable); I-band.

Sonars: Thomson Sintra Type 2040; hull-mounted; passive search and intercept; medium frequency.

BAE Type 2007; flank array; passive; low frequency.

Thales Type 2046; towed array; passive very low frequency. Thales Type 2019; passive/active range and intercept (PARIS).

Programmes: First ordered 2 November 1983. Further three ordered on 2 January 1985. Laid up after post Cold War defence cuts in 1994 and acquired from the UK on 6 April 1998. Refitted at Vickers, Barrow, for delivery from June 2000.

Modernisation: A mid-life update is under consideration and there are plans to modernise the Mk 48 torpedo.

CORNER BROOK

6/2007, Blake Rodgers, RCN / 1186H.35

Structure: Single-skinned NQ1 high tensile steel hull, tear dropped shape 9:1 ratio, five man lock-out chamber in fin. Fitted with elastomeric acoustic tiles. Diving depth, greater than 200 m (650 ft). Fitted with Pilkington Optronics CK 35 search and CH 85 attack optronic periscopes.

Operational: *Victoria* is based in the Pacific Fleet at Esquimaux, BC and the remaining three submarines are based in the Atlantic Fleet at Halifax, NS. *Victoria* arrived in Canada in October 2000 and transferred to the Pacific Fleet in August

2003, following an extended work period. Currently in an Extended Docking Work Period (EDWP), *Victoria* will resume operations in mid-2010. *Windsor* was accepted in 2002, completed several patrols and is undergoing EDWP at Halifax 2007-10. *Cornor Brook* arrived in mid-2003 and is currently operational. While on passage to Canada in October 2004, *Chicoutimi* suffered a serious fire. Extensive repairs are required and will be carried out 2010-13 in conjunction with EDWP on the west coast.

WINDSOR

6/2006, Formation Imaging Services / 1335652

Displacement, tons: 4,770 full load
Dimensions, feet (metres): 441.9 oa; 408.5 pp x 53.8 x 16.4; 23.3 (screws) (134.7; 124.5 x 16.4 x 5; 71)
Main machinery: CODOG; 2 GE LM 2500 gas turbines; 47,494 hp (35.43 MW) sustained
 1 SEMT-Pielstick 20 PA6 V 280 diesel; 8,800 hp(m) (6.48 MW) sustained; 2 shafts; cp props
Speed, knots: 29
Range, n miles: 9,500 at 13 kt (diesel); 3,930 at 18 kt (gas)
Complement: 198 (17 officers) plus 17 (8 officers) aircrew

Missiles: SSM: 8 McDonnell Douglas Harpoon Block 1C (2 quad) launchers ●; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

SAM: Raytheon Sea Sparrow RIM-7P; 2 Mk 48 octuple vertical launchers ●; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg; 18 missiles. Evolved Sea Sparrow RIM-162 (339, 340), semi-active homing to 18 km (9.7 n miles) at 3.6 Mach; warhead 38 kg.

Guns: 1 Bofors 57 mm/70 Mk 2 ●; 220 rds/min to 17 km (9 n miles); weight of shell 2.4 kg
 1 GE/GDC 20 mm Vulcan Phalanx Mk 15 Mod 1 ●; anti-missile; 3,000 rds/min (6 barrels combined) to 1.5 km, 6–12.7 mm MGs

Torpedoes: 4–324 mm Mk 32 Mod 9 (2 twin) tubes ●
 24 Honeywell Mk 46 Mod 5; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys: 4 Plessey Shield Mk 2 decoy launchers ●; sextuple mountings; fires P8 chaff and P6 IR flares in distraction, decoy or centroid modes.
 Nixie SLQ-25; towed acoustic decoy

ESM: MEL/Lockheed Canews SLQ-501 ●; radar intercept; (1–18 GHz), SRD 502; intercept. Sea Search AN/UJR 501
ECM: MEL/Lockheed Ramzes SLQ-503 ●; jammer.

Combat data systems: UYC-501 SHINFADS action data automation with UYQ-504 and UYK-505 or 507 (336–341) processors. Links 11 and 14.

Weapons control: AHWCS for Harpoon. CDC UYS-503(V); sonobuoy processing system.

Radars: Air search: Raytheon SPS-49(V)5 ●; C-band.
 Air/surface search: Ericsson Sea Giraffe HC 150 ●; G/H-band

Fire control: Two Signal SPG-503 (STIR 1.8) ●; K/I-band.
 Navigation: Sperry Mk 340 being replaced by Kelvin Hughes 1007; I-band.

Tecan: URN 25. IFF Mk XII
Sonars: Westinghouse SQS-510; hull-mounted; active search and attack; medium frequency.
 General Dynamics SQR-501 CANTASS towed array (uses part of Martin Marietta SQR-19TACTASS).

Helicopters: 1 CH-124A ASW ●.

Programmes: On 29 June 1983 Saint John Shipbuilding Ltd won the competition for the first six of a new class of patrol frigates. Combat system design and integration was subcontracted to Loral Canada (formerly Paramax, a subsidiary of Unisys) Three ships were subcontracted to Marine Industries Ltd in Lauzon and Sorel. On 18 December 1987 six additional ships of the same design were ordered from Saint John SB Ltd.

Modernisation: The Halifax Class Modernisation (HCM)/Frigate Life Extension (FELEX) programme subsumes all maintenance, sustainment and stand-alone projects planned to ensure the continued operation of the class for the duration of its life. In general, combat system enhancements are to reflect increasing emphasis on littoral operations in a joint force and a coalition. Major equipment acquisitions through HCM/FELEX include a modernised command and control system, multi-LINK, IFF

HALIFAX

(Scale 1 : 1,200, Ian Sturton / 0528399)

VILLE DE QUEBEC

8/2008, RCN / 1135650

Mode S/S, upgrade or replacement of SPS-49, Sea Giraffe and SPG-503 radars, a new ESM system, upgrades to the internal communications system, Harpoon to Block II, Bofors 57 mm gun to Mk 3 standard and an improvement of the degaussing system. In addition, a CTG capability is to be added to four ships. Projects already underway include modifications to receive Evolved Sea Sparrow (ESSM) (to be completed by 2010), the upgrade of the Vulcan Phalanx to Block 1B and the fitting of SEQSS and SIRIUS Infra-Red Search and Track (IRST). ASW projects include improvement of torpedo defence. Integration of the Cyclone helicopter will also make a significant contribution to ASW improvements. The HCM/FELEX Project will also be responsible for platform changes arising from the planned modifications. These include upper deck and operations room reconfiguration, power

supplies, heating/ventilation/air-conditioning, chill water supplies, hull strength, and stability. All ships are being modified to achieve a common equipment and systems baseline before beginning the HCM/FELEX upgrade which is to begin with Halifax in 2010. Seven ships are to be refitted in Halifax Shipyard and five on the west coast at Victoria Shipyard.

Structure: Much effort has gone into stealth technology. Gas turbine engines are raft mounted. Dresbach IR suppression is fitted. Indal RAST helicopter handling system.

Operational: Problems on first of class trials included higher than designed radiated noise levels which were reported as speed associated. These have been rectified and the ships are stable and quiet in all sea conditions. Vancouver, Regina, Calgary, Winnipeg and Ottawa are Pacific based

DESTROYERS

Notes: The Canadian Surface Combatants (CSC) programme is for the construction of 15 ships to replace the current destroyer and frigate force. These vessels are to have a common hull and machinery, displace up to 7,500 tonnes, and are to employ modular concepts. The first batch of ships are to be optimised for air defence and command and control roles, as replacements for the Iroquois-class DDHGs, and later batches are to replace the Halifax-class frigates. It is planned that the first ships will become operational in the 2018–20 period.

3 IROQUOIS CLASS (DDGH)

Name	No	Builders	Laid down	Launched	Commissioned
IROQUOIS	280	Marine Industries Ltd, Sordal	15 Jan 1969	28 Nov 1970	29 July 1972
ATHABASKAN	282	Davie Shipbuilding, Lauzon	1 June 1969	27 Nov 1970	30 Sep 1972
ALGONQUIN	283	Davie Shipbuilding, Lauzon	1 Sep 1969	23 Apr 1971	3 Nov 1973

Displacement, tons: 5,300 full load
Dimensions, feet (metres): 398 wl; 426 oa x 50 x 15.5 keel/21.5 screws (121.4; 129.8 x 15.2 x 4.7/6.6)
Main machinery: COGOG; 2 Pratt & Whitney FT4A2 gas turbines; 50,000 hp (37 MW); 2 GM Allison 570-KF gas turbines; 12,700 hp (9.5 MW) sustained; 2 shafts; LIPS cp props
Speed, knots: 27
Range, n miles: 4,500 at 15 kt (cruise turbines)
Complement: 255 (23 officers) plus 30 (9 officers) aircrew

Missiles: SAM. 1 Martin Marietta Mk 41 VLS ● for 29 GDC Standard SM 2MR Block III/III-A; command/inertial guidance; semi-active radar homing to 167 km (90 n miles) at Mach 2.5.

Guns: 1 OTO Melara 3 in (76 mm)/62 Super Rapid ●; 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg. 6—12.7 mm MGs

1 GE/GDC 20 mm/76 6-barrelled Vulcan Phalanx Mk 15 ●; 3,000 rds/min combined to 1.5 km

Torpedoes: 6—324 mm Mk 32 (2 triple) tubes ●. Honeywell Mk 46 Mod 5, anti-submarine, active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys: 4 Plessey Shield Mk 2 6-tubed fixed launchers ●. P 8 chaff or P 6 IR flares. BAe Nulka offboard decoys in quad pack launchers.

SLO-25 Nixie, torpedo decoy
 ESM MEL SLO-501 Canews ●; radar warning.
 ECM BAe Nulka

Combat data systems: SHINPADS, automated data handling with UYQ-504 and UYK 507 processors. Links 11, 14 and 15. JMCIS and Marconi Matra SHF SATCOM ●.

Weapons control: Signal LIROD 8 ● optronic director. UYS-503(V) sonobuoy processor.

Radars: Air search: Signal SPQ-502 (LW08) ●; D-band

IROQUOIS

(Scale 1 : 1,200, Ian Sturton / GU56677)

Surface search: Signal SPQ-501 (DA08) ●; E/F-band.
Fire control: 2 Signal SPG-501 (STIR 1.8) ●; I/J-band.
Navigation: 2 Raytheon Pathfinder, I-band.
Tacan: URN 26

Sonars: General Dynamics SQS-510; combined VDS and hull-mounted; active search and attack; medium frequency.

Helicopters: 2 CH-124A Sea King ASW ●.

Modernisation: A contract for the Tribal Class Update and Modernisation Project (TRUMP) was awarded to Litton Systems Canada Limited in June 1986. The equipment reflected the changing role of the ship and replaced systems that did not meet the air defence requirement. *Algonquin* completed modernisation in October 1991, followed by *Iroquois* in May 1992 and *Athabaskan* in

August 1994. Sonar upgraded from 1998. Nulka system replaced ULQ-6 in 1999. JMCIS has been fitted vice JOTS II, with SHF SATCOM in all three ships. Shipboard Electro-Optic Surveillance System (SEOSS) is being fitted in all ships. Vulcan Phalanx upgraded to Block 1B from 2003. A programme to upgrade/overhaul the SPQ-501, SPQ-502 and SPG-501 radars and the LIROD 8 optronic director began in 2008.

Structures: These ships are also fitted with a landing deck equipped with double hauldown and Beartrap, pre-wetting system to counter NBC conditions, enclosed citadel and bridge control of machinery. The flume type anti-roll tanks have been replaced during modernisation with a water displaced fuel system. Design weight limit has been reached

Operational: Helicopters can carry 12.7 mm MGs and ESM/FLIR instead of ASW gear. To remain in service until 2015.

10/2007, Michael Nitz / 1335651

SHIPBORNE AIRCRAFT

Notes: The five HELTAS Sea Kings have been converted to a battlefield/utility transport role. All acoustic systems have been removed.

Numbers/Type: 28 Sikorsky CH-148 Cyclone
Operational speed: 165 kt (305 km/h)
Service ceiling: 11,320 ft (3,450 m)
Range: 444 n miles (821 km)

Role/Weapon systems: Contract for the acquisition of 28 helicopters to replace the Sea King (by 2012) made on 23 November 2004. Delivery of the aircraft is to begin in late 2010. Multimission maritime helicopter for ASW and ASUW and secondary missions of SAR, special forces operations, and Medevac. Sensors: L3 HELRAS sonar, Telephonics APS 143B(V)3 ISAR radar, GDC acoustic signal processor, FLIR Systems Star Safire III electro-optics system, Rockwell-Collins ARC-210 communications suite, ATK Alliant AN/ARR-47 MAWS, Lockheed Martin AN/ALQ-210 ESM/radar warning, Lockheed Martin AN/ALR-47 laser warning, BAE AN/ALQ-144 IR jammer, BAE AN/ALE-47 countermeasures dispenser system; Links 11 and 22. Weapons: Two Mk 46 torpedoes and C6 7.62 mm MG.

CH-148 6/2005, Sikorsky / 1123062

Numbers/Type: 22/5 Sikorsky CH-124A ASW/CH-124B SCF Utility Sea King.
Operational speed: 110 kt (203 km/h)
Service ceiling: 10,000 ft (3,030 m)
Range: 380 n miles (705 km)

Role/Weapon systems: ASW, surface surveillance and support, convertible for carriage of six troops; deployed from shore or from three classes of ships (Halifax class FFG (1 aircraft), Iroquois class DDG (2 aircraft) and 'Protecteur' AOR (3 aircraft)); Sensors: CH-124A/B: APS-503 radar, ASN-123 mission computer, GPS, ARA-5 direction finder, APX-77A IFF, HF/VHF/UHF comms (with secure voice capability), ALQ-144 IR countermeasures (fitted for but not with). CH-124A: AQS-502 dipping sonar, ARR-52A sonar receiver and ARR-1047 OTPI. CH-124B: AN/ARC-210 communications, AN/ARR-47 MAWS, AN/ALQ-144 IR jammer and AN/ALE-47 CDS. Weapons: Two Mk 46 torpedoes and C6 7.62 mm MGs for both aircraft types.

CH-124A 10/2005, M Decker / 1184751

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: Procurement of a new maritime patrol aircraft to replace the Aurora from about 2020 is under consideration.

Numbers/Type: 18 Lockheed CP-140 Aurora
Operational speed: 405 kt (750 km/h)
Service ceiling: 34,000 ft (9,930 m)
Range: 4,000 n miles (7,410 km)

Role/Weapon systems: Operated for long-range maritime surveillance over Atlantic, Pacific and Arctic Oceans; roles include ASW, ASV and SAR. Incremental modernisation (AIMP) programme to upgrade avionics and communications in up to 12 aircraft scheduled 2000-2013. Contract for update of navigation and flight instruments awarded to CMC Electronics in late 2000 and to MacDonald Dettwiler in January 2003 for replacement of AN/APS 508 radar by Telephonics AN/APS-143(V)3. In parallel, an ASLEP programme addresses airframe structural issues. Sensors: APS-506 radar, IFF, ALR-508 (to be replaced by AN/ALQ-217) ESM, ECM, FLIR OR 5008 (to be replaced by L3 Wescam MX-20), ASQ-502 MAD, OL 5004 acoustic processor. Weapons: 8 Mk 46 Mod 5 torpedoes.

AURORA 10/2007, Michael Nitz / 1335641

Numbers/Type: 2 Lockheed CP-140A Arcturus.
Operational speed: 405 kt (750 km/h)
Service ceiling: 34,000 ft (9,930 m)
Range: 4,000 n miles (7,410 km)

Role/Weapon systems: Arcturus operated for unarmed Arctic patrol, maritime surveillance, SAR and training. Fitted with same equipment as Aurora but without the ASW fit. To be withdrawn from service. Sensors: APS-507 radar, IFF

PATROL FORCES

Notes: It was announced on 9 July 2007 that up to eight Arctic/Offshore Patrol Ships (AOPS) are to be acquired. The ships are to be tasked with maritime security duties in Canada's Exclusive Economic Zone, including the full length of the Northwest Passage in Summer and approaches in Winter. The broad requirement is for a 100 m ship of about 6,000 tons with an ice-strengthened steel hull capable of operating at 3 kt in ice up to 1 m thick. With a maximum speed of about 20 kt, the ships are to be armed (possibly with a 40 mm gun) and to be helicopter capable. The first ship is to be delivered in 2013. Naval support facilities are also to be constructed at the existing deep-water port of Nanisivik on Strathcona Sound, Nunavut. These are to be completed in 2015.

AMPHIBIOUS FORCES

Notes: The Standing Contingency Force concept was evolved in response to the need for a sea-based expeditionary capability for operations in the world's littorals. As part of the process to determine the required capabilities, an Initial Integrated Tactical Effects (ITE) experiment was conducted in November 2006 using USS *Gunston Hall* as a trials platform. While development of a full SCF capability has since been placed in abeyance until at least 2011, conceptual development continues at the Maritime Warfare Centre.

MINE WARFARE FORCES

Notes: The Interim Remote Minehunting and Disposal System (IRMDS) is based on the Remote Minehunting System - Technology Demonstration (RMS-TD) system developed by Defence Research and Development Canada in conjunction with MDA Ltd of Richmond, BC, ISE Ltd of Port Moody, BC and DCNI of Paris, France. The production system is not expected to enter service until 2011 but, in the meantime, has been prepared for limited operation in an interim capacity. Initial Operating Capability was achieved on 1 April 2007. IRMDS, also known as Seakeeper, can be controlled from the Kingston class MCMVs and Sechelt class YDTs. French trials have been conducted from *Armanique* and *Taapa*. The system consists of an 8.3 m long semi-submersible drone powered by a 375 hp diesel engine and capable of up to 16 kt transit speed and 10 kt minehunting. The Aurora towfish can deploy to depths of 15-200 m and is a mount for the L3/Klein K5500 multibeam side scan sonar and Reson 8125 echo sounder. Sonar operations can be conducted in up to Sea State 5. Missions are controlled from a C2 container embarked in a host ship or installed ashore.

12 KINGSTON CLASS (MM)

Name	No	Builders	Laid down	Launched	Commissioned
KINGSTON	700	Halifax Shipyards	15 Dec 1994	12 Aug 1995	21 Sep 1996
GLACE BAY	701	Halifax Shipyards	28 Apr 1995	22 Jan 1996	26 Oct 1996
NANAIMO	702	Halifax Shipyards	11 Aug 1995	17 May 1996	10 May 1997
EDMONTON	703	Halifax Shipyards	8 Dec 1995	16 Aug 1996	21 June 1997
SHAWINIGAN	704	Halifax Shipyards	26 Apr 1996	15 Nov 1996	14 June 1997
WHITEHORSE	705	Halifax Shipyards	26 July 1996	24 Feb 1997	17 Apr 1998
YELLOWKNIFE	706	Halifax Shipyards	7 Nov 1996	5 June 1997	18 Apr 1998
GOOSE BAY	707	Halifax Shipyards	22 Feb 1997	4 Sep 1997	26 July 1998
MONCTON	708	Halifax Shipyards	31 May 1997	5 Dec 1997	12 July 1998
SASKATOON	709	Halifax Shipyards	5 Sep 1997	30 Mar 1998	21 Nov 1998
BRANDON	710	Halifax Shipyards	6 Dec 1997	3 Sep 1998	6 June 1999
SUMMERSIDE	711	Halifax Shipyards	28 Mar 1998	4 Oct 1998	18 July 1999

Displacement, tons: 962 full load
Dimensions, feet (metres): 181.4 x 37.1 x 11.2 (55.3 x 11.3 x 3.4)
Main machinery: Diesel-electric; 4 Wärtsilä UD 23V12 diesels; 4 Jeumont ANR-53-50 alternators; 72 MW; 2 Jeumont CI 560L motors; 3,000 hp(m) (2.2 MW); 2 LIPS Z drive azimuth thrusters
Speed, knots: 15; 10 sweeping
Range, n miles: 5,000 at 8 kt
Complement: 31 (Patrol); 37 (MCM)

Guns: 1 Bofors 40 mm/60 Mk 5C. 2—12.7 mm MGs.
Countermeasures: Three positions on the sweep deck can receive a variety of mission payloads on a 20 ft ISO footprint: (a) Indal Technologies AN/SLQ 38 deep mechanical minesweeping system (MMS) (2 systems); (b) MDA Ltd. AN/SQS 511 heavy-weight high-definition Route Survey System (RSS) (4 systems); (c) ISE Ltd. Trailblazer 25 bottom object inspection vehicle (BOIV) (1 system); (d) ISE Ltd. HYSUB 50 deep seabed intervention system (DSIS) (1 system); (e) Fullerton and Sherwood Ltd. 6-man, 2-compartment containerised diving system (CDS) (2 systems); (f) Naval engineered 6-person accommodation module (6 modules); and (g) MDA Ltd. Interim Remote Minehunting and Disposal System (IRMDS) control van (1 system). In addition, a number of light-weight systems, not normally fitted on 20 ft ISO bedplates or in containers, can be embarked: (a) L3/Klein K5500 high-definition side scan sonar (2 systems); (b) L3/Klein K 3000 dual frequency side scan sonar (4 systems); and (c) Deep Ocean Engineering Inc. Phantom 4 remotely operated vehicle (P4ROV) (2 systems)
Radars: Surface search, Kelvin Hughes 6000; E/F-band.
Navigat on: Kelvin Hughes, I-band.

Programmes: Contract awarded to Fenco MacLaren on 15 May 1992. Halifax Shipyards is owned by Saint John Shipbuilding. Known as Maritime Coastal Defence Vessels (MCDV) combining MCM with general patrol duties.
Modernisation: Radars are to be replaced 2009-10.
Operational: Predominantly manned by reservists. Six on each coast (700, 701, 704, 707, 708 and 711 Atlantic, remainder Pacific). One ship per coast is kept at extended readiness on a rotational basis.

SASKATOON 10/2006, Michael Nitz / 1166835

SURVEY AND RESEARCH SHIPS

1 RESEARCH SHIP (AGORH)

Name	No	Builders	Launched	Commissioned
QUEST	AGOR 172	Burrard, Vancouver	9 July 1969	21 Aug 1969

Displacement, tons: 2,130 full load
Dimensions, feet (metres), 252.0 x 42 x 18.4 (76.8 x 12.8 x 5.6)
Main machinery: Diesel-electric; 2 Fairbanks-Morse diesel generators; 2 GE motors; 2 shafts
Speed, knots: 14.5 **Range, n miles:** 10,000 at 12 kt
Complement: 24 plus 21 scientists

Comment: Used by Defence Research and Development Canada (DRDC) for acoustic, hydrographic and general oceanographic research activities. Designed with special acoustic quieting (anechoic tiles, rotating machinery on resilient mounts, propulsion and service diesels resiliently mounted and acoustically enclosed, various operational quiet states). Capable of operating in summer ice conditions (Ice Class I). Based in Halifax, NS, operates mainly in North and Mid Atlantic. Mid-life update in 1997-99 included new communications and navigation equipment, improved noise insulation, updated deck cranes and hardware, and modernised laboratories.

QUEST 6/2008, Don Glencross / 1335646

RENARD 5/2008, RCN / 1335645

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Launched
ORIOLE	YAC 3	Owens	4 June 1921

Displacement, tons: 92 full load
Dimensions, feet (metres): 102 x 19 x 9 (31.1 x 5.8 x 2.7)
Main machinery: 1 Cummins diesel; 165 hp (123 kW); 1 shaft
Speed, knots: 8
Complement: 6 (1 officer) plus 18 trainees

Comment: Commissioned in the Navy in 1948 and based at Esquimalt. Sail area (with spinnaker) 11,000 sq ft. Height of mainmast 94 ft (28.7 m), mizzen 55.2 ft (16.8 m).

ORIOLE 6/2008, RCN / 1335644

TRAINING SHIPS

8 ORCA CLASS (TRAINING SHIPS) (AXL)

ORCA 65	CARIBOU 57	WOLF 59	COUGAR 61
RAVEN 56	RENARD 58	GRIZZLY 60	MOOSE 62

Displacement, tons: 210 full load
Dimensions, feet (metres): 108.3 x 27.6 x 8.2 (33.0 x 8.4 x 2.5)
Main machinery: 2 Caterpillar 3516 diesels; 5,000 hp (3.7 MW); 2 shafts
Speed, knots: 21
Range, n miles: 750 at 15 kt
Complement: 4 plus 16 trainees
Guns: 1—12.7 mm MG (fitted for).
Radars: 2 Raytheon NSC 1810; I-band.

Comment: Contract awarded to Victoria Shipyards, BC, on 8 November 2004 for the construction of six training vessels. The option to build a further two has been exercised. Based on the Australian *Seahorse Mercator* design. Construction of the first vessel began on 8 September 2005 with formal acceptance on 17 November 2006. The eighth and final vessel was delivered in late 2008. All vessels based at Esquimalt.

AUXILIARIES

Notes: Plans to procure three Joint Support Ships were cancelled on 22 August 2008 on cost grounds; it is reported that the Statement of Requirement could not be met with the funds allocated. While the requirement to replace the AORs remains a high priority, extension of the project definition stage is likely to result in a delay of at least two years and a contract is unlikely to be let until late 2010.

2 PROTECTEUR CLASS (AORH)

Name	No	Builders	Laid down	Launched	Commissioned
PROTECTEUR	AOR 509	St John Dry Dock Co, NB	17 Oct 1967	18 July 1968	30 Aug 1969
PRESERVER	AOR 510	St John Dry Dock Co, NB	17 Oct 1967	29 May 1968	30 July 1970

Displacement, tons: 9,259 light; 25,676 full load
Dimensions, feet (metres): 564 x 76 x 34.3
 (171.9 x 23.2 x 10.46)
Main machinery: 2 Babcock & Wilcox boilers; 1 GE Canada turbine; 21,000 hp (15.7 MW); 1 shaft; bow thruster
Speed, knots: 21
Range, n miles: 4,100 at 20 kt; 7,500 at 11.5 kt
Complement: 335 (38 officers) including 45 aircrew
Cargo capacity: 13,036 tons fuel; 506 tons aviation fuel; 362 tons dry cargo; 300 tons ammunition; 2 cranes (15 ton lift)

Guns: 2 GE/GDC 20 mm/76 6-barrelled Vulcan Phalanx Mk 15. 8—12.7 mm MGs.
Countermeasures: Decoys: 6 Loral Hyco SRBOC chaff launchers.
ESM: Racal Kestrel. SLQ-504; radar warning.
Combat data systems: EDO Link 11; SATCOM WSC-3(V).
Radars: Surface search: Norden SPS 502 with Mk XII IFF.
Navigation: Racal Decca 1630 and 1629; I-band.
Tacan: URN 20.

Helicopters: 3 CH-124A or CH-124B Sea King

Comment: Four replenishment positions. Both have been used as flagships and troop carriers. They can carry military vehicles and bulk equipment for sealift purposes, also two LCVPs. For the Gulf deployment in 1991, the 76 mm gun was remounted, two Vulcan Phalanx and two Bofors 40/60 guns were fitted, four Plessey Shield chaff launchers and ESM equipment were provided for *Protecteur*. Bofors and 76 mm guns are unlikely to be fitted again. *Protecteur* transferred to the Pacific Fleet November 1992.

PROTECTEUR 10/2008, Michael Nitz / 1335643

4 SECHELT CLASS (YT/YP/YPT/YDT)

Name	No	Builders	Commissioned
SECHELT	YDT 610	West Coast Manly	10 Nov 1990
SIKANNI	YPT 611	West Coast Manly	10 Nov 1990
SOOKE	YDT 612	West Coast Manly	10 Nov 1990
STIKINE	YPT 613	West Coast Manly	10 Nov 1990

Displacement, tons: 290 full load
 Dimensions, feet (metres): 108.5 x 27.8 x 7.8 (33.1 x 8.5 x 2.4)
 Main machinery: 2 Caterpillar 3412T diesels, 1,080 hp (806 kW) sustained; 2 shafts
 Speed, knots: 12.5
 Complement: 4 or 12 (610 and 612)
 Sonars: Fitted for (610 and 612) L3/Klein K 3000 or K 5500 side scan sonar.

Comment: *Sikanni* and *Stikine* based at the Nanoose Bay Maritime Experimental and Test Range. *Sechelt* and *Sooke* converted to diving tenders in 1997 with a 6 place recompression chamber embarked. Diving operations supported to 80 m. Both have been used as control platforms for IRMDS and are also fitted for the Phantom 4 ROV. *Sechelt* based at Halifax, Nova Scotia, *Sooke* at Esquimalt, British Columbia.

SOOKE (with containerised diving system) 6/2002, CDF / 0528415

2 GRANBY CLASS (GENERAL PURPOSE DIVING TENDERS) (YDT)

YDT 11 GRANBY YDT 12

Displacement, tons: 110
 Dimensions, feet (metres): 99 x 20 x 8.5 (27.3 x 6.2 x 2.6)
 Main machinery: Diesel; 228 hp (170 kW); 1 shaft
 Speed, knots: 11
 Complement: 13
 Radars: Navigation Facal Decca; I-band
 Sonars: Fitted for L3/Klein K 5500.

Comment: Built to provide platform for underwater engineering and 100 m surface supplied diving operations. Secondary role is support of MCM operations and maritime explosive ordnance disposal operations. The ships are equipped to deploy the Deep Ocean Engineering Phantom 4 ROV. Both ships are to be replaced by new construction ships in about 2010.

GRANBY 11/1995, CDF / 0056682

TUGS AND TENDERS

13 COASTAL TUGS (YT/TL/YTR/YTM)

GLENDYNE YTB 640	LAWRENCEVILLE YTL 590	FIREBIRD YTR 561
GLENDALE YTB 641	PARKSVILLE YTL 591	FIREBRAND YTR 562
GLENEVIS YTB 642	LISTERVILLE YTL 592	TILLICUM YTM 555
GLENBROOK YTB 643	MERRICKVILLE YTL 593	
GLENSIDE YTB 644	GRANVILLE (ex-Marysville) YTL 594	

Comment: Glen class are 265 ton tugs built in the mid-1970s. Ville class are 70 ton tugs built in mid-1970s. The two YTRs are firefighting craft of 130 tons. The YTM is a 160 ton tug.

GLENDYNE 11/2008, RCN / 1335641

6 DIVING SUPPORT CRAFT (YDT)

FORTUNE ABALONE	RESOLUTE DUNGENESS	TONNERRE SCULPIN
--------------------	-----------------------	---------------------

Displacement, tons: 2.2 full load
 Dimensions, feet (metres): 39 x 12.5 x 2.3 (11.9 x 3.8 x 0.7)
 Main machinery: 2 Caterpillar 3126TA diesels; 740 hp(m) (548 kW); 2 WMC 357 waterjets
 Speed, knots: 36
 Range, n miles: 600 at 29 kt
 Complement: 3 plus 14 divers
 Sonars: Fitted for L3/Klein K 3000 and K 5500 side scan sonars.

Comment: Built by Celtic Shipyards and delivered in early 1997. Landing craft bows for launching unmanned submersibles (fitted for Phantom 4 ROV). Boliard pull 6,560 lb. 1,000 kg hydraulic crane. *Fortune*, *Resolute* and *Tonnerre* based at Halifax, Nova Scotia, and the remainder at Esquimalt, British Columbia

DIVING SUPPORT CRAFT 11/2008, RCN / 1335647

COAST GUARD

Administration

Commissioner Canadian Coast Guard:
 George De Pont
 Deputy Commissioner
 Charles Gaudin

Establishment

In January 1962, the ships owned and operated by the Department of Transport along with vessels operated by some other government agencies were amalgamated into a new organisation to be known as the Canadian Coast Guard. This reflected the increase in duties that had occurred since 1945, especially in the Arctic. Further expansion and diversification followed: notably of the dedicated search and rescue facilities, vessel traffic management and pollution prevention and response.

On 1 April 1995, the fleet of the Department of Fisheries and Oceans was merged with the Coast Guard under the direction of the Minister of Fisheries and Oceans. Its headquarters are in Ottawa while operations are administered from regional offices in Vancouver, British Columbia (Pacific Region); Sarnia, Ontario (Central and Arctic Region); Quebec, Quebec (Quebec Region); Dartmouth, Nova Scotia, (Maritimes Region) and St John's, Newfoundland (Newfoundland Region).

Missions

The Canadian Coast Guard carries out the following missions:

1. Provides services for the safe, economical and efficient movement of ships in Canadian waters through the provision of aids to navigation systems, marine communication and traffic management and channel maintenance.
2. Provides icebreaking services and vessel escort through ice in the Arctic and, in Winter, in the Gulf and River St Lawrence and the Great Lakes.
3. Contributes to the manne component of the Search and Rescue programme and participates with the Department of National Defence in Joint Rescue Coordination Centres in Victoria, British Columbia; Trenton, Ontario and Halifax, Nova Scotia. Sponsors a Coast Guard Auxiliary and promotes pleasure craft safety.
4. Participates (from April 2005) as a Special Operating Agency in joint patrols with the Royal Canadian Mounted Police to combat organised crime and terrorism.
5. Carries out fisheries patrols and enforcement of fishery regulations.
6. Provides and operates hydrographic survey, oceanographic and fisheries research vessels.
7. Supports other departments, boards and agencies of the government through the provision of ships, aircraft and other maritime services.

Shipborne Aircraft

A total of 22 helicopters can be operated from vessels equipped with flight decks. There are 15 MBB BO 105, four Bell 212 and three Bell 206L. One Sikorsky S 61N is based at Prince Rupert, BC, in the Pacific Region. This aircraft cannot operate from current vessels. Helicopters are painted in Canadian Coast Guard markings.

Small Craft

In addition to the ships listed there are numerous lifeboats, surfboats, self-propelled barges and other small craft which are carried on board the larger vessels. Also excluded are shore-based work boats, floating oil spill boats, oil slick-lickers or any of the small boats which are available for use at the various Canadian Coast Guard Bases and lighthouse stations.

DELETIONS

2006	J E Bernier
2007	Simcoe
2008	Ile des Barques

HEAVY ICEBREAKERS

Notes: The programme for a new heavy icebreaker, to replace *Louis St Laurent* was announced in February 2008. The new ship, to be named *John G Diefenbaker*, is to enter service in 2017

1 GULF CLASS (TYPE 1300)

Name	Builders	Launched	Commissioned
LOUIS S ST LAURENT	Canadian Vickers Ltd, Montreal	3 Dec 1966	Oct 1969

Displacement, tons: 14,500 full load
Measurement, tons: 11,441 grt; 5,370 net
Dimensions, feet (metres): 392.7 × 80.1 × 32.2 (119.7 × 24.4 × 9.8)
Main machinery: Diesel-electric; 5 Krupp MaK 16 M 453C diesels; 39,400 hp(m) (28.96 MW); 5 Siemens alternators; 3 GE motors; 27,000 hp(m) (19.85 MW); 3 shafts; bow thruster
Speed, knots: 20
Range, n miles: 23,000 at 16 kt
Complement: 46 (13 officers) plus 38 scientists
Radars: Navigation: 3 Kelvin Hughes; I-band.
Helicopters: 2 BO 105 CBS

Comment: Larger than any of the former Coast Guard icebreakers. Two 49.2 ft (15 m) landing craft embarked. Mid-life modernisation July 1988 to early 1993 included replacing main engines with a diesel-electric system, adding a more efficient *Henry Larsen* type icebreaking bow (adds 8 m to length) with an air bubbler system and improving helicopter facilities with a fixed hanger. In addition the complement was reduced. Based in the Maritimes Region at Dartmouth, NS but to re-deploy to the Newfoundland and Labrador region in 2009. On 22 August 1994 became the first Canadian ship to reach the North Pole, in company with USCG *Polar Sea*. To be decommissioned in 2017.

LOUIS S ST LAURENT

6/1998, Harald Carstens / 0017665

LOUIS S ST LAURENT

6/1998, Harald Carstens / 0056691

1 TERRY FOX CLASS (TYPE 1200)

Name	Builders	Launched	Commissioned
TERRY FOX	Burrard Yarrow, Vancouver	1982	1983

Displacement, tons: 7,100 full load
Measurement, tons: 4,233 gross; 1,955 net
Dimensions, feet (metres): 288.7 × 58.7 × 27.2 (88 × 17.9 × 8.3)
Main machinery: 4 Werkspoor 8-cyl 4SA diesels; 23,200 hp(m) (17 MW); 2 shafts; cp props, bow and stern thrusters
Speed, knots: 16. **Range, n miles:** 1,920 at 15 kt
Complement: 24 (10 officers)
Radars: Navigation: 2 Racal Decca ARPA, 1 Furuno 1411; E/F- and I-bands.

Comment: Initially leased for two years from Gulf Canada Resources during the completion of *Louis S St Laurent* conversion but has now been retained. Commissioned in Coast Guard colours 1 November 1991 and purchased 1 November 1993. Based in the Newfoundland and Labrador region.

TERRY FOX

7/1997, M B MacKay / 0012133

MEDIUM ICEBREAKERS

3 R CLASS (TYPE 1200)

Name	Builders	Launched	Commissioned
PIERRE RADISSON	Burrard, Vancouver	3 June 1977	June 1978
AMUNDSEN (ex-Sir John Franklin)	Burrard, Vancouver	10 Mar 1978	Mar 1979
DES GROSEILLIERS	Port Weller, Ontario	20 Feb 1982	Aug 1982

Displacement, tons: 6,400 standard; 8,180 (7,594, *Des Groseilliers*) full load
Measurement, tons: 5,910 gross; 1,678 net
Dimensions, feet (metres): 322 × 64 × 23.6 (98.1 × 19.5 × 7.2)
Main machinery: Diesel-electric; 6 Montreal Loco 251V-16F diesels; 17,580 hp (13.1 MW); 6 GEC generators; 11.1 MW sustained; 2 motors; 13,600 hp (10.14 MW); 2 shafts, bow thruster
Speed, knots: 16
Range, n miles: 15,000 at 13.5 kt
Complement: 38 (12 officers)
Radars: Navigation: Sperry; E/F- and I-band.
Helicopters: 1 Bell 212.

Comment: Based in the Quebec Region at Quebec. *Amundsen* underwent a major refit in 2003 to convert her to an Arctic research role

AMUNDSEN

6/2003, P Dionne / 0572428

1 MODIFIED R CLASS (TYPE 1200)

Name	Builders	Launched	Commissioned
HENRY LARSEN	Versatile Pacific SY, Vancouver, BC	3 Jan 1987	29 June 1988

Displacement, tons: 5,798 light; 8,290 full load
Measurement, tons: 6,172 gross; 1,756 net
Dimensions, feet (metres): 327.3 × 64.6 × 24 (99.8 × 19.7 × 7.3)
Main machinery: Diesel-electric; 3 Wärtsilä Vasa 16V32 diesel generators; 17.13 MW/60 Hz sustained; 3 motors; 16,320 hp(m) (12 MW); 3 shafts
Speed, knots: 16
Range, n miles: 15,000 at 13.5 kt
Complement: 31 (11 officers) plus 20 spare berths
Radars: Navigation: Racal Decca Bridgemaster; I-band.
Helicopters: 1 Bell 212.

Comment: Contract date 25 May 1984, laid down 23 August 1985. Although similar in many ways to the R class she has a different hull form particularly at the bow and a very different propulsion system. Fitted with Wärtsilä air bubbling system. Based at St John's in the Newfoundland and Labrador Region. Engine room fire in 1998 put her out of commission for some time.

HENRY LARSEN

3/1999, Canadian Coast Guard / 0056707

LIGHT ICEBREAKERS

6 MARTHA L BLACK CLASS (TYPE 1100)

Name	Builders	Commissioned
MARTHA L BLACK	Versatile Pacific, Vancouver, BC	30 Apr 1986
GEORGE R PEARKES	Versatile Pacific, Vancouver, BC	17 Apr 1986
EDWARD CORNWALLIS	Marine Industries Ltd, Tracy, Quebec	14 Aug 1986
SIR WILLIAM ALEXANDER	Marine Industries Ltd, Tracy, Quebec	13 Feb 1987
SIR WILFRID LAURIER	Canadian Shipbuilding Ltd, Ontario	15 Nov 1986
ANN HARVEY	Halifax Industries Ltd, Halifax, NS	29 June 1987

Displacement, tons: 4,662 full load
Measurement, tons: 3,818 (*Martha L Black*); 3,809 (*George R Pearkes*); 3,812 (*Sir Wilfrid Laurier*); 3,727 (*Edward Cornwallis* and *Sir William Alexander*); 3,823 (*Ann Harvey*) gross
Dimensions, feet (metres): 272.2 × 53.1 × 18.9 (83 × 16.2 × 5.8)
Main machinery: Diesel-electric; 3 Bombardier/Alco 12V-251 diesels; 8,019 hp (6 MW), sustained; 3 Canadian GE generators; 6 MW; 2 Canadian GE motors; 7,040 hp (5.25 MW), 2 shafts; bow thrusters
Speed, knots: 15.5
Range, n miles: 6,500 at 15 kt
Complement: 25 (10 officers)
Radars: Navigation: Racal Decca Bridgemaster; I-band.
Helicopters: 1 light type, such as Bell 206L.

Comment: *Black* based in the Quebec Region at Quebec, *Cornwallis* and *Alexander* in the Maritimes Region at Dartmouth, *Ann Harvey* and *Pearkes* in the Newfoundland and Labrador Region at St John's and *Laurier* in the Pacific Region at Victoria. The feasibility of converting *Cornwallis* to a survey ship was investigated but not taken forward.

GEORGE R PEARKES 4/1996, van Ginderen Collection / 0056692

SIR WILLIAM ALEXANDER 8/1998, M B MacKay / 0017668

1 GRIFFON CLASS (TYPE 1100)

Name	Builders	Commissioned
GRIFFON	Davie Shipbuilding, Lauzon	Dec 1970

Displacement, tons: 3,096 full load
Measurement, tons: 2,212 gross; 752 net
Dimensions, feet (metres): 233.9 × 49 × 15.5 (71.3 × 14.9 × 4.7)
Main machinery: Diesel-electric; 4 Fairbanks-Morse 38DB-1/8-12 diesel generators; 5.8 MW sustained; 2 motors; 3,982 hp(m) (2.97 MW); 2 shafts
Speed, knots: 14
Range, n miles: 5,600 at 10 kt
Complement: 25 (9 officers)
Radars: Navigation: 2 Kelvin Hughes, I-band.
Helicopters: Platform for 1 light type, such as Bell 206L.

Comment: Based in the Central and Arctic Region at Prescott, Ontario.

GRIFFON 7/1998, van Ginderen Collection / 0017669

MULTIROLE VESSELS

2 SAMUEL RISLEY CLASS (TYPE 1050)

Name	Builders	Commissioned
SAMUEL RISLEY	Vito Construction Ltd, Delta, BC	4 July 1985
EARL GREY	Pictou Shipyards Ltd, Pictou, NS	30 May 1986

Displacement, tons: 2,935 full load
Measurement, tons: 1,988 gross (*Grey*); 1,967 gross (*Risley*); 642 net (*Grey*); 649.5 net (*Risley*)
Dimensions, feet (metres): 228.7 × 44.9 × 19 (69.7 × 13.7 × 5.8)
Main machinery: Diesel-electric; 4 Wärtsilä 4SA 12-cyl diesels; 8,644 hp(m) (6.4 MW) (*Samuel Risley*); 4 Deutz 4SA 9-cyl diesels; 8,836 hp(m) (6.5 MW) (*Earl Grey*); 2 shafts, cp props
Speed, knots: 13. **Range, n miles:** 18,000 at 12 kt
Complement: 22 (9 officers)
Radars: Navigation: 2 Racal Decca, I-band

Comment: *Risley* based in the Central and Arctic Region at Pary Sound, Ontario, *Grey* in the Maritimes Region at Charlottetown, PEI.

SAMUEL RISLEY 4/1993, Canadian Coast Guard / 0056694

2 PROVO WALLIS CLASS (TYPE 1000)

Name	Builders	Commissioned
BARTLETT	Marine Industries, Sorel	Dec 1969
PROVO WALLIS	Marine Industries, Sorel	Oct 1969

Displacement, tons: 1,620 full load (*Bartlett*)
Measurement, tons: 1,317 gross; 491 net
Dimensions, feet (metres): 189.3; 209 (*Provo Wallis*) × 42.5 × 15.4 (57.7; 63.7 × 13 × 4.7)
Main machinery: 2 National Gas 6-cyl diesels; 2,100 hp (1.55 MW), 2 shafts, LIPS cp props
Speed, knots: 12.5. **Range, n miles:** 3,300 at 11 kt
Complement: 24 (9 officers)
Radars: Navigation: 2 Kelvin Hughes; I-band

Comment: Both ships based in Pacific Region at Victoria. *Bartlett* was modernised in 1988 and *Provo Wallis* completed one year modernisation at Marystown, Newfoundland at the end of 1990. Work included lengthening the hull by 6 m, installing new equipment and improving accommodation.

PROVO WALLIS 6/2008, M Mazumdar / 1335247

1 TRACY CLASS (TYPE 1000)

Name	Builders	Commissioned
TRACY	Port Weller Drydocks, Ontario	17 Apr 1968

Displacement, tons: 1,300 full load
Measurement, tons: 963 gross; 290 net
Dimensions, feet (metres): 181.1 × 38 × 12.1 (55.2 × 11.6 × 3.7)
Main machinery: Diesel-electric; 2 Fairbanks-Morse 38DB-1/8-8 diesel generators; 1.94 MW sustained; 2 motors; 2,000 hp (1.49 MW); 2 shafts
Speed, knots: 13. **Range, n miles:** 5,000 at 11 kt
Complement: 23 (8 officers)
Radars: Navigation: Kelvin Hughes, I-band.

Comment: Based in Quebec Region at Sorel

TRACY 4/1999, Canadian Coast Guard / 0056715

OFFSHORE PATROL VESSELS

1 SIR WILFRED GRENFELL (TYPE 600)

Name	Builders	Commissioned
SIR WILFRED GRENFELL	Marystown SY, Newfoundland	1987

Displacement, tons: 3,753 full load
Measurement, tons: 2,403 gross; 664.5 net
Dimensions, feet (metres): 224.7 × 49.2 × 16.4 (68.5 × 15 × 5)
Main machinery: 4 Deutz 4SA (2-16-cyl, 2-9-cyl) diesels; 12,862 hp(m) (9.46 MW); 2 shafts; cp props
Speed, knots: 16 **Range, n miles:** 11,000 at 14 kt
Complement: 20

Comment: Built on speculation in 1984–85. Modified to include an 85 tonnes towing winch and additional SAR accommodation and equipment. Ice strengthened hull. Based in the Newfoundland Region and Labrador at St John's.

SIR WILFRED GRENFELL 8/1997, M B MacKay / 0012137

1 LEONARD J COWLEY CLASS (TYPE 600)

Name	Builders	Commissioned
LEONARD J COWLEY	Manly Shipyard, RivTow Ind, Vancouver BC	June 1985

Displacement, tons: 2,080 full load
Measurement, tons: 2,244 grt; 655 net
Dimensions, feet (metres): 236.2 × 45.9 × 16.1 (72 × 14 × 4.9)
Main machinery: 2 Wärtsilä Nohab F 312A diesels; 2,325 hp(m) (1.71 MW); 1 shaft; bow thruster
Speed, knots: 12
Range, n miles: 12,000 at 12 kt
Complement: 19 (7 officers)
Guns: 2—12.7 mm MGs.
Radars: Surface search: Sperry 340; E/F-band.
Navigation: Sperry ARPA; I-band.
Helicopters: Capability for 1 light.

Comment: Based in Newfoundland and Labrador Region at St John's.

LEONARD J COWLEY 9/1996, D Maginley / 0058698

2 CAPE ROGER CLASS (TYPE 600)

Name	Builders	Commissioned
CYGNUS	Marystown SY, Newfoundland	May 1981
CAPE ROGER	Ferguson Industries, Pictou NS	Aug 1977

Displacement, tons: 1,465 full load
Measurement, tons: 1,255 grt; 357 net
Dimensions, feet (metres): 205 × 40 × 13 (62.5 × 12.2 × 4.1)
Main machinery: 2 Wärtsilä Nohab F 212V diesels, 4,461 hp(m) (3.28 MW); 1 shaft; bow thruster
Speed, knots: 13 **Range, n miles:** 10,000 at 12 kt
Complement: 19
Guns: 2—12.7 mm MGs.
Helicopters: Capability for 1 light.

Comment: Cygnus based in Maritimes Region at Dartmouth and Cape Roger in Newfoundland and Labrador Region at St John's. Half-life refits completed in 1995–97.

CYGNUS 9/1999, Canadian Coast Guard / 0056704

MIDSHORE PATROL VESSELS

Notes: The acquisition of 12 40 m mid-shore patrol vessels was approved in the 2007 budget. Eight of these vessels are to be used for conservation and protection duties in the Maritimes, Quebec and Pacific regions. The remaining four vessels are to be used for maritime security duties on the St Lawrence Seaway-Great Lakes system and are to be operated jointly by the Coast Guard and by the RCMP. Bids for the design were re-invited in September 2007 for submission by March 2008. A contract is expected in 2009.

1 TANU CLASS (TYPE 500)

Name	Builders	Commissioned
TANU	Yarows Ltd, Victoria BC	Sep 1968

Displacement, tons: 925 full load
Measurement, tons: 746 grt; 203 net
Dimensions, feet (metres): 164.3 × 3.2 × 15.1 (50.1 × 9.8 × 4.6)
Main machinery: 2 Fairbanks-Morse diesels; 2,824 hp (1.96 MW); 1 shaft
Speed, knots: 11 **Range, n miles:** 5,000 at 11 kt
Complement: 16 (6 officers)
Guns: 2—12.7 mm MGs

Comment: Based in Pacific Region at Patricia Bay

TANU 7/2004, M K Mitchell / 1042125

2 LOUISBOURG CLASS (TYPE 500)

Name	Builders	Commissioned
LOUISBOURG	Breton Industries, Port Hawkesbury, NS	1977
LOUIS M LAUZIER	Breton Industries, Port Hawkesbury, NS	1976

Displacement, tons: 460 full load
Measurement, tons: 295 grt; 65 net
Dimensions, feet (metres): 125 × 27.2 × 8.5 (38.1 × 8.3 × 2.6)
Main machinery: 2 MTU 12V 538TB91 diesels; 4,600 hp(m) (3.38 MW); 2 shafts
Speed, knots: 13.5 **Range, n miles:** 3,840 at 10 kt
Complement: 14
Guns: 2—12.7 mm MGs.

Comment: Both based in the Quebec Region. Louis M Lauzier returned to service from charter (to Memorial University) in 2005

LOUISBOURG 9/1999, Canadian Coast Guard / 0056708

1 ARROW POST CLASS

Name	Builders	Commissioned
ARROW POST	Hike Metal Products, Wheatley, Ontario	1991

Measurement, tons: 228 gross; 93.1 net
Dimensions, feet (metres): 94.8 × 28.9 × 7 (28.9 × 8.8 × 7)
Main machinery: 1 Caterpillar 3512 diesel; 711 hp (954 kW); 1 shaft
Speed, knots: 12 **Range, n miles:** 2,800 at 11 kt
Complement: 6 (3 officers)

Comment: Based in Pacific Region at Prince Rupert, British Columbia. To be replaced by new midshore patrol vessel

ARROW POST 6/2004, M K Mitchell / 1042124

1 CUTTER (TYPE 200)

Name	Builders	Commissioned
HARP	Georgetown SY, PEI	12 Dec 1986

Displacement, tons: 225 full load
 Measurement, tons: 179 gross, 69 net
 Dimensions, feet (metres): 76.1 x 24.9 x 8.2 (23.2 x 7.6 x 2.5)
 Main machinery: 2 Caterpillar 3408 diesels, 850 hp (634 kW); 2 Kort nozzle props
 Speed, knots: 10. Range, n miles: 500 at 10 kt
 Complement: 7 (3 officers)
 Radars: Navigation: Sperry Mk 1270; I-band.

Comment: Ordered 26 April 1985. Ice strengthened hull. Based in Newfoundland and Labrador Region at St Anthony.

TYPE 200 CUTTER 3/1999, Canadian Coast Guard / 0056706

1 GORDON REID CLASS (TYPE 500)

Name	Builders	Commissioned
GORDON REID	Versatile Pacific, Vancouver	Oct 1990

Measurement, tons: 836 gross, 247 net
 Dimensions, feet (metres): 163.9 x 36.1 x 13.1 (49.9 x 11 x 4)
 Main machinery: 4 Deutz SBV-6M-628 diesels; 2,475 hp(m) (1.82 MW) sustained, 2 shafts, bow thruster, 400 hp (294 kW)
 Speed, knots: 15. Range, n miles: 2,500 at 15 kt
 Complement: 14 (6 officers)

Comment: Designed for long-range patrols along the British Columbian coast out to 200 mile limit. Has a stern ramp for launching Zodiac Hurricane 733 rigid inflatables in up to Sea State 6. The Zodiac has a speed of 50 kt and is radar equipped. Based in the Pacific Region at Victoria.

GORDON REID 6/2004, M K Mitchell / 1042122

NAVAIDS VESSELS

1 NAHIDIK CLASS (TYPE 700)

Name	Builders	Commissioned
NAHIDIK	Allied Shipbuilders Ltd, N Vancouver	1974

Displacement, tons: 1,125 full load
 Measurement, tons: 856 gross, 392 net
 Dimensions, feet (metres): 175.2 x 49.9 x 6.6 (53.4 x 15.2 x 2)
 Main machinery: 2 Detroit diesels, 4,290 hp (3.2 MW); 2 shafts
 Speed, knots: 14. Range, n miles: 5,000 at 10 kt
 Complement: 12 (6 officers)

Comment: Based in Central and Arctic Region at Hay River, North West Territories

NAHIDIK 6/2004, Canadian Coast Guard / 1042126

1 DUMIT CLASS (TYPE 700)

Name	Builders	Commissioned
DUMIT	Allied Shipbuilders Ltd, N Vancouver	July 1979

Displacement, tons: 629 full load
 Measurement, tons: 569 gross; 176 net
 Dimensions, feet (metres): 160.1 x 40 x 5.2 (48.8 x 12.2 x 1.6)
 Main machinery: 2 Caterpillar 3512TA; 2,420 hp (1.8 MW) sustained; 2 shafts
 Speed, knots: 13.5
 Range, n miles: 7,700 at 11 kt
 Complement: 10

Comment: Similar to Eckaloo. Based in Central and Arctic Region at Hay River, North West Terr tones.

DUMIT 7/1996, Canadian Coast Guard / 0017671

1 TEMBAH CLASS (TYPE 700)

Name	Builders	Commissioned
TEMBIAH	Allied Shipbuilders Ltd, N Vancouver	Oct 1963

Measurement, tons: 189 gross; 58 net
 Dimensions, feet (metres): 123 x 25.9 x 3 (37.5 x 7.9 x 0.9)
 Main machinery: 2 Cummins diesels, 500 hp (373 kW); 2 shafts
 Speed, knots: 12
 Range, n miles: 1,300 at 10 kt
 Complement: 9

Comment: Based in Central and Arctic Region at Hay River, North West Territories.

TEMBIAH 4/1999, Canadian Coast Guard / 0056714

1 ECKALOO CLASS (TYPE 700)

Name	Builders	Commissioned
ECKALOO	Vancouver SY Ltd	31 Aug 1988

Displacement, tons: 534 full load
 Measurement, tons: 661 gross; 213 net
 Dimensions, feet (metres): 160.8 x 44 x 4 (49 x 13.4 x 1.2)
 Main machinery: 2 Caterpillar 3512TA, 2,420 hp (1.8 MW) sustained; 2 shafts
 Speed, knots: 13
 Range, n miles: 2,000 at 11 kt
 Complement: 10
 Helicopters: Platform for 1 Bell 206L/L-1.

Comment: Replaced vessel of the same name. Similar design to Dumit. Based in Central and Arctic Region at Hay River, North West Territories.

ECKALOO 9/1994, van Ginderen Collection / 0096697

SPECIAL ROLE VESSELS

1 VAKTA CLASS

Name	Builders	Commissioned
VAKTA	Hike Metal Products Ltd, Wheatley, Ontario	2004

Measurement, tons: 34 gross, 26 net
 Dimensions, feet (metres): 53.5 x 14.8 x 9.8 (16.3 x 4.5 x 3.0)
 Main machinery: 2 Caterpillar diesels; 980 hp (731 kW); 2 shafts
 Speed, knots: 21
 Complement: 3

Comment: Replaced *Nemao* in 2005. Provides navigational aids and SAR services on Lake Winnipeg. Based in the Central and Arctic Region at Gimli, Manitoba.

VAKTA 6/2005, Canadian Coast Guard / 1151242

5 COVE ISLAND CLASS (TYPE 800)

Name	Builders	Commissioned
COVE ISLE	Canadian D and D, Kingston, Ontario	1980
GULL ISLE	Canadian D and D, Kingston, Ontario	1980
TSEKOA II	Allied Shipbuilders, Vancouver	1984
ILE SAINT-OURS	Breton Industries, Port Hawkesbury, NS	15 May 1986
CARIBOU ISLE	Breton Industries, Port Hawkesbury, NS	16 June 1986

Displacement, tons: 138 full load
 Measurement, tons: 92 gross, 36 net
 Dimensions, feet (metres): 75.5 x 19.7 x 4.4 (23 x 6 x 1.4)
 Main machinery: 2 Detroit 8V-92 diesels; 475 hp (354 kW); 2 shafts
 Speed, knots: 11
 Range, n miles: 1,800 at 11 kt
 Complement: 5
 Radars: Navigation: Sperry 1270; I-band.

Comment: Details given are for the last two. *Cove Isle* and *Gull Isle* are 3 m shorter in length; *Tsekoa II* is 3.7 m longer. *Cove Isle*, *Gull Isle* and *Caribou Isle* are based in the Central and Arctic Region at Parry Sound, Amherstburg and Prescott respectively. *Tsekoa II* is based in the Pacific at Victoria. *Ile Saint-Ours* is based in the Quebec Region at Sorel. *Ile des Barques* was decommissioned in 2008.

ILE SAINT-OURS 9/1994, van Ginderen Collection / 0056696

4 CUTTERS (TYPE 400)

Name	Builders	Commissioned
POINT HENRY	Breton Industrial and Machinery, Pt Hawkesbury, NS	1980
ISLE ROUGE	Breton Industrial and Machinery, Pt Hawkesbury, NS	1980
POINT RACE	Breton Industrial and Machinery, Pt Hawkesbury, NS	1982
CAPE HURD	Breton Industrial and Machinery, Pt Hawkesbury, NS	1982

Displacement, tons: 97 full load
 Measurement, tons: 57 gross, 14 net
 Dimensions, feet (metres): 70.8 x 18 x 5.6 (21.6 x 5.5 x 1.7)
 Main machinery: 2 MTU 8V 396TC82 diesels; 1,740 hp(m) (1.28 MW) sustained; 2 shafts
 Speed, knots: 20
 Range, n miles: 950 at 12 kt
 Complement: 5

Comment: Aluminum alloy hulls. *Point Henry* and *Point Race* based in Pacific Region at Prince Rupert and Campbell River respectively; *Cape Hurd* and *Isle Rouge* in Central and Arctic Region at Amherstburg.

POINT RACE 6/2001, Canadian Coast Guard / 0176356

3 POST CLASS

Name	Builders	Commissioned
ATLIN POST	Philbrooks Shipyard Ltd, Sidney, BC	1975
KITMAT II	Philbrooks Shipyard Ltd, Sidney, BC	1974
SOOKE POST	Philbrooks Shipyard Ltd, Sidney, BC	1973

Measurement, tons: 57 gross; 15 net
 Dimensions, feet (metres): 65.0 x 17.1 x 7 (19.8 x 5.2 x 7)
 Main machinery: 2 General Motors V12-71 diesels; 800 hp (596 kW); 2 shafts
 Speed, knots: 15
 Range, n miles: 400 at 12 kt
 Complement: 4 (3 officers)

Comment: *Atlin Post* based at Patricia Bay, British Columbia, *Kitmat II* at Prince Rupert, British Columbia and *Sooke Post* at Port Hardy, BC. To be replaced by new midshore patrol vessels.

ATLIN POST 6/2001, Canadian Coast Guard / 0176355

1 CUMELLA CLASS

Name	Builders	Commissioned
CUMELLA	A F Theriault & Son, Meteghan, NS	1983

Measurement, tons: 80 gross; 19 net
 Dimensions, feet (metres): 76.1 x 15.7 x 7 (23.2 x 4.8 x 7)
 Main machinery: 2 General Motors V6-24L diesels; 1,680 hp (1.25 MW); 2 shafts
 Speed, knots: 15
 Range, n miles: 600 at 12 kt
 Complement: 4 (2 officers)

Comment: Based in Maritimes Region at Grand Menan, New Brunswick. To be replaced by new midshore patrol vessel.

CUMELLA 6/2001, Canadian Coast Guard / 0176354

1 QUÉBÉCOIS CLASS

Name *Builders* *Commissioned*
E P LE QUÉBÉCOIS Les Chantiers Maritimes, Paspébiac, Quebec 1968

Measurement, tons: 186 gross; 32 net
Dimensions, feet (metres): 78.1 x 23.3 x 7 (28.3 x 7.1 x 7)
Main machinery: 1 Caterpillar 3509 diesel; 509 hp (380 kW); 1 shaft
Speed, knots, 11 Range, n miles: 2,800 at 9 kt
Complement: 8 (4 officers)

Comment: Based at Sept Îles, Quebec. Refitted in 1994. To be replaced by new midshore patrol vessel.

E P LE QUÉBÉCOIS 6/2002, Canadian Coast Guard / 0578823

5 SAR CRAFT (TYPE 100)

Name *Builders* *Commissioned*
CG 119 Eastern Equipment, Montreal 1973
MALLARD Matsumoto Shipyard, Vancouver, BC Feb 1986
SKUA Matsumoto Shipyard, Vancouver, BC Mar 1986
OSPREY Matsumoto Shipyard, Vancouver, BC May 1986
STERNE Matsumoto Shipyard, Vancouver, BC Mar 1987

Measurement, tons: 15 gross
Dimensions, feet (metres): 40.8 x 13.2 x 4.2 (12.4 x 4.1 x 1.3)
Main machinery: 2 Mitsubishi diesels; 637 hp (475 kW); 2 shafts
Speed, knots: 26. Range, n miles: 300 at 18 kt
Complement: 6 (3 officers)

Comment: CG 119 (laid up) based in Central and Arctic Region at Prescott; *Sterne* (laid up) is based in Quebec Region at Quebec and *Mallard*, *Skua* (laid up) and *Osprey* in the Pacific Region at Powell River, Ganges and Kitsilano respectively. CG 119 is structurally different to and slower than the remainder

CG 119 1990, van Ginderen Collection / 0504968

SAR LIFEBOATS

Measurement, tons: 33.8 gross
Dimensions, feet (metres): 47.9 x 14 x 4.5 (14.6 x 4.27 x 1.37)
Main machinery: 2 Caterpillar 3186 diesels; 905 hp (675 kW) sustained; 2 shafts
Speed, knots: 22-25
Range, n miles: 200 n miles
Complement: 4
Radars: Navigation: Furuno 1942; I-band.

Comment: Multitask medium endurance lifeboat

THUNDER CAPE 2000, Canadian Coast Guard / 0104265

AIR CUSHION VEHICLES

Notes: Plans to acquire a new Air Cushion to replace *Waban Aku* were announced in 2007. The new craft, to enter service in 2009, is expected to be similar to the 28.5 m AP1-88/400 type that is already in service.

1 AP1-88/200 TYPE

Name WABAN-AKI **Builders** Westland Aerospace **Commissioned** 16 July 1987

Displacement, tons: 47.6 (light)
Dimensions, feet (metres): 80.4 x 36.7 x 19.6 (24.5 x 11.2 x 6.6, (height on cushion))
Main machinery: 4 Deutz diesels, 2,394 hp(m) (1.76 MW)
Speed, knots: 50; 35 cruising
Complement: 4 (3 officers)
Cargo capacity: 12 tons

Comment: *Waban-Aki* is based at Trois Rivières and capable of year round operation as a Navaid Tender for flood control operations in the St Lawrence. Fitted with a hydraulic crane. The name means People of the Dawn.

WABAN-AKI 4/1999, Canadian Coast Guard / 0056717

2 AP1-88/400 TYPE

SIPU MUIN **SIYAY**

Displacement, tons: 69 full load
Dimensions, feet (metres): 93.5 x 39.4 (28.5 x 12)
Main machinery: 4 Caterpillar 3412 TTA diesels; 3,650 hp(m) (2.68 MW) sustained
Speed, knots: 50; 35 cruising
Complement: 4
Cargo capacity: 22.6 tons

Comment: Contract awarded to GKN Westland in May 1996. Built at Hike Metal Products, Wheatley, Ontario and completed in August and December 1998 respectively. Well-deck size 8.2 x 4.6 m. There is a 5,000 kg load crane. *Sipu Mui* is based at Trois Rivières and the second at Sea Island, BC

SIPU MUIN 5/1998, Canada Coast Guard / 0017677

1 AP1-88/100 TYPE (TRAINING SHIP) (AXL)

PENAC (ex-Liv Viking)

Displacement, tons: 45.5 full load
Dimensions, feet (metres): 80.4 x 39.0 (24.5 x 11.9)
Main machinery: 2 Deutz BF 12L513 diesels, 1,050 hp(m) (785 kW) 2 MTU 12V 183TB32 diesels; 1,640 hp(m) (1.25 MW) sustained
Speed, knots: 50; 35 cruising
Complement: 7
Cargo capacity: 5.3 tons

Comment: Built by Hoverworks Ltd, Isle of Wight, UK in 1984. Procured by Canadian Coast Guard in 2004. Based in Vancouver, BC.

PENAC 6/2004, Canadian Coast Guard / 1042123

Cape Verde

Country Overview

A former Portuguese colony, the Republic of Cape Verde became independent in 1975. Situated in the Atlantic Ocean some 335 n miles due west of the western point of Africa, it has a land area of 1,557 square miles and consists of ten islands and a number of islets. These are divided into the northerly windward (Barlavento) and southerly leeward (Sotavento) groups. The windward group includes the islands of Santo Antão, São Vicente, Santa Luzia, São Nicolau, Sal and Boa Vista and the islets of Branco and Raso, the leeward group includes the islands of Santiago, Brava, Fogo and Maio and the islets of the

Secos group. Mindelo, on São Vicente, is the principal port and economic centre while Praia on Santiago is the capital and largest town. An archipelagic state, territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits are not fully defined.

Headquarters Appointments

Commander, Coast Guard:
 Lieutenant Colonel Fernando Carvalho Pereira

Personnel

2009: 50

Bases

Praia, main naval base
 Mindelo (Isle de São Vicente), naval repair yard

Maritime Aircraft

One Dornier 228-212 and one Embraer EMB 110 Bandeirante are used for maritime surveillance.

PATROL FORCES

1 KONDOR I CLASS (COASTAL PATROL CRAFT) (PBO)

Name	No	Builders	Commissioned
VIGILANTE (ex-Kühlungsborn)	P 521 (ex-BG 32, ex-GS 07)	Peenewerft, Wolgast	1970

Displacement, tons: 360 full load
Dimensions, feet (metres): 170.3 × 23.3 × 7.2 (51.9 × 7.1 × 2.2)
Main machinery: 2 Russki/Kolomna Type 40DM diesels; 4,408 hp(m) (3.24 MW) sustained; 2 shafts; cp props
Speed, knots: 18
Range, n miles: 1,800 at 15 kt
Complement: 19 (3 officers)
Guns: 2 -25 mm (twin) (ZU 23)
Radars: Surface search: Kelvin Hughes Nuclaus 2 5000A; i-band.

Comment: Former GDR minesweeper taken over by the German Coast Guard, and then acquired by Cape Verde in September 1998. Armament refitted in Cape Verde in 1999. Started refit in 2007.

KONDOR I (Malta colours)

Cayman Islands

Country Overview

A British dependency since 1962, the island group is situated south of Cuba in the Caribbean Sea. It comprises three islands: Grand Cayman, containing the capital George Town, Little Cayman and Cayman Brac, located about 80 miles northeast of Grand Cayman. Territorial seas (12 n miles) and a Fishery Zone (200 n miles) are claimed. A governor, appointed by the British Crown, is responsible for external affairs, internal security, defence

and the police. The Marine section is a division of the Royal Cayman Islands Police (RCIP) and UK Customs Drugs Task Force. Its roles are Maritime Drug Interdiction, SAR, Safety, Conservation and Fishery Protection.

Personnel

2009. 15 (mixture of police and customs)

Headquarters Appointments

Commander Royal Cayman Islands Police (Marine):
 Brad Ebanks

Bases

Grand Cayman (main), Little Cayman, Cayman Brac.

POLICE

Notes: (1) Two SAFE Boats 38 ft interceptors were delivered in January 2009.
 (2) A Concept pursuit craft, *Derry's Pride*, with twin 225 hp Johnson outboards is based at Grand Cayman together with *Intrapid*, an 'Eduardono' Colombian craft, and *Typhoon*, a 24 ft RIB. Two Boston Whalers, *Lima 1* and *Miss Molly*, are based at Little Cayman and Cayman Brac respectively.

DERRY'S PRIDE 6/2001, RCIP / 0121307

LIMA 1 6/2001, RCIP / 0121305

1 DAUNTLESS CLASS (PB)

CAYMAN PROTECTOR

Displacement, tons: 17 full load
Dimensions, feet (metres): 47.9 x 14.1 x 3.3 (14.6 x 4.3 x 1)
Main machinery: 2 Caterpillar 3208TA diesels; 720 hp (mi) (529 kW) sustained; 2 shafts
Speed, knots: 26 **Range, n miles:** 400 at 20 kt
Complement: 11
Guns: 2—7.62 mm MGs.
Radars: Raytheon R40; I-band.

Comment: Built by SeaArk Marine, Monticello and acquired in July 1994. Aluminium construction. Based at Grand Cayman.

CAYMAN PROTECTOR 6/2001, RCIP / 0121305

1 SEA ARK 65 ft CUTTER (PB)

CAYMAN GUARDIAN

Displacement, tons: 27 standard
Dimensions, feet (metres): 65.0 x 18.0 x 5.5 (19.8 x 5.5 x 1.7)
Main machinery: 2 diesels; 2 shafts
Speed, knots: to be announced
Complement: 8
Radars: Navigation: Raymarine; I-band.

Comment: SeaArk Marine Dauntless RAM patrol craft acquired in December 2008. To be employed on border protection tasks. Aluminium construction.

CAYMAN GUARDIAN 12/2008, SeaArk Marine / 1335347

1 SEA ARK 38 ft CUTTER (PB)

CAYMAN DEFENDER

Displacement, tons: 10.1 full load
Dimensions, feet (metres): 38.0 x 13.0 x 3.7 (11.6 x 4.0 x 1.1)
Main machinery: 2 MAN diesels; 1,100 hp (820 kW)
Speed, knots: 33
Complement: 4
Radars: Navigation: Raymarine; I-band.

Comment: SeaArk Marine Dauntless RAM patrol craft acquired on 7 October 2008. To be employed on border protection tasks. Aluminium construction.

CAYMAN DEFENDER 10/2008, SeaArk Marine / 1335341

Chile

ARMADA DE CHILE

Country Overview

The Republic of Chile is situated in western South America. With an area of 292,135 square miles it has borders to the north with Peru and to the east with Bolivia and Argentina. Off the 2,305 n mile coastline with the Pacific Ocean lie the Chonos Archipelago, Wellington Island and the western portion of Tierra del Fuogo. Chiloan islands in the south Pacific include the Juan Fernández Islands, Easter Island, and Salas y Gómez. The capital and largest city is Santiago. Principal ports include Valparaiso, Talcahuano, Tomé, Antofagasta, San Antonio, Arica, Iquique, Coquimbo, San Vicente, Puerto Montt, and Punta Arenas. Territorial seas (12 n miles) and an EEZ (200 n miles) are claimed.

Headquarters Appointments

Commander-in-Chief:

Admiral Rodolfo Codina Diaz

Chief of Naval Staff:

Vice Admiral Sergio Robinson Prieto

Naval Operations Command:

Vice Admiral Gustavo Jordan Astaburuaga

Director General, Naval Personnel:

Vice Admiral Cristian Milar Drago

Director General, Naval Services:

Vice Admiral Cristian Gantes Young

Director General Maritime Territory and Merchant Marine:

Vice Admiral Edmundo Gonzales Robles

Flag Officer, Fleet:

Rear Admiral Federico Niemann Figari

Flag Officer, Submarines:

Rear Admiral Ellis Berg Pearce

Commander, Naval Infantry:

Rear Admiral Cristian del Real Pérez

Flag Officer, 1st Naval Zone:

Rear Admiral Robert Gibbons Hodgson

Flag Officer, 2nd Naval Zone:

Rear Admiral Eduardo Junge Pumpin

Flag Officer, 3rd Naval Zone:

Rear Admiral Felipe Ojeda Simons

Flag Officer, 4th Naval Zone:

Rear Admiral Francisco Guzmán Vial

Flag Officer, Aviation:

Rear Admiral Felipe Carvajal Carvallo

Diplomatic Representation

Naval Attaché in Ottawa:

Captain Alfredo Whittle Pinto

Naval Attaché in Beijing:

Captain Ivo Alexis Brito

Naval Attaché in London:

Captain José Miguel Romero Aguirre

Naval Attaché in Washington:

Rear Admiral Marcelo Barbieri Wiedmeier

Naval Attaché in Buenos Aires:

Captain Cristian Figan Oxley

Naval Attaché in Seoul:

Captain Jorge Eduardo Montenegro

Naval Attaché in Lima:

Captain Juan Carlos Pons

Naval Attaché in Madrid:

Captain Jorge Ugalde Jacques

Diplomatic Representation—continued

Naval Attaché in Brasilia:

Captain Hernán Miller

Naval Attaché in Quito:

Captain Alejandro Campos Calvo

Naval Attaché in Paris:

Captain Guillermo Luttings Mathieus

Naval Attaché in Panama City:

Captain Eduardo Felipe Encina

Personnel

(a) 2009 16,500 (11,988 officers)

(b) 3,400 Marines

(c) 2 years' national service (1,300)

Command Organisation

1st Naval Zone HQ at Valparaiso. From 26° 00' S to 34° 09' S.

2nd Naval Zone. HQ at Talcahuano. From 34° 09' S to 46° 00' S.

3rd Naval Zone. HQ at Punta Arenas. From 46° 00' S to South Pole

4th Naval Zone. HQ at Iquique. From 18° 21' S to 26° 00' S.

Coast Guard is fully integrated with the Navy.

Naval Air Stations and Organisation

Having won the battle to own all military aircraft flying over the sea, a fixed-wing squadron of about 20 CASA/ENAER Halcón is envisaged when finances permit.

Viña del Mar (Valparaiso); *Almirante Von Schroeders* (Punta Arenas); *Guardiamarina Zañartu* (Puerto Williams).

Four Squadrons: VP1: EMB-111, P-3A and C-295

HA1: NAS 332C Cougar

VC1: EMB-111, CASA-212 and O-2A

HU1, BO 105C, Bell 206B AS-365

VP1: PC 7

Infantería de Marina

Organisation: 4 detachments each comprising Amphibious Warfare, Coast Defence and Local Security. Also embarked are detachments of commandos, engineering units and a logistic battalion.

1st Marine Infantry Detachment 'Patricio Lynch'. At Iquique.

2nd Marine Infantry Detachment 'Miller'. At Viña del Mar

3rd Marine Infantry Detachment 'Sargento Aldea'. At Talcahuano.

4th Marine Infantry Detachment 'Cochrane'. At Punta Arenas

51 Commando Group. At Valparaiso

Some embarked units, commando and engineering units and a logistics battalion.

Bases

Valparaiso. Main naval base, schools, repair yard. HQ 1st Naval Zone. Air station

Bases—continued

Talcahuano. Naval base, schools, major repair yard (two dry docks, three floating docks), two floating cranes. HQ 2nd Naval Zone. Submarine base.

Punta Arenas. Naval base. Dockyard with slipway having building and repair facilities. HQ 3rd Naval Zone. Air station.

Iquique. Small naval base. HQ 4th Naval Zone.

Puerto Montt. Small naval base.

Puerto Williams (Beagle Channel). Small naval base. Air station.

Dawson Island (Magellan Straits). Small naval base.

2 SCORPENE CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
O'HIGGINS	23	DCN Cherbourg/IZAR	18 Nov 1999	1 Nov 2003	8 Sep 2005
CARRERA	22	IZAR, Cartagena/DCN	Nov 2000	24 Nov 2004	20 July 2006

Displacement, tons: 1,577 surfaced, 1,711 dived

Dimensions, feet (metres): 217.8 × 20.3 × 19
(66.4 × 6.2 × 5.8)

Main machinery: Diesel electric; 4 MTU 16V 396 SE84 diesels; 2,992 hp(m) (2.4 MW); 1 Jeumont Schneider motor; 3,808 hp(m) (2.8 MW); 1 shaft

Speed, knots: 20 dived; 12 surfaced

Range, n miles: 550 at 4 kt dived; 6,500 at 8 kt surfaced

Complement: 31 (6 officers)

Missiles: MBDA Exocet SM39 Block 2; launched from 21 in (533 mm) tubes; inertial cruise; active terminal homing to 50 km (27 n miles) at 0.9 Mach; warhead 165 kg.

Torpedoes: 6–21 in (533 mm) tubes. 18 WASS Black Shark torpedoes; wire (fibre-optic cable) guided; active/passive homing to 50 km (27 n miles) at 50 kt; warhead 250 kg.

Countermeasures: ECM; Argos AR 900, intercept.

Weapons control: UDS International SLBTICS.

Radars: Navigation: Sagem, I-band

Sonars: Hull mounted; active/passive search and attack, medium frequency

Programmes: Project Neptune. Contract awarded to DCN and Bazán on 18 December 1997 and became effective in April 1998. The bows of both boats were built at Cherbourg and the sterns at Cartagena. First steel cut for

O'Higgins on 22 July 1998 and final assembly by DCN began on 15 November 2002 when the stern arrived at Cherbourg. Final assembly of *Carrera* began on 22 March 2004 when the bow arrived at Cartagena. *O'Higgins* arrived at Valparaíso on 10 December 2005 and *Carrera* at Talcahuano on 13 December 2006

Modernisation: Procurement of Exocet SM 39 is reportedly under consideration.

Structure: Equipped with Sagem APS attack periscope, an SMS optronic search periscope and SISDEF datalink terminal. Diving depth more than 300 m (984 ft). AIP is not fitted.

Operational: Based at Talcahuano.

Complement: 32 (5 officers)

Missiles: MBDA Exocet SM 39 Block 2; launched from 21 in (533 mm) torpedo tubes; inertial cruise; active terminal

homing to 50 km (27 n miles) at 0.9 Mach; warhead 165 kg

Torpedoes: 8–21 in (533 mm) bow tubes. 14 WASS Black Shark torpedoes; wire (fibre-optic cable) guided; active/passive homing to 50 km (27 n miles) at 50 kt; warhead 250 kg.

Countermeasures: ESM. Thomson-CSF DR 2000U; radar warning.

Weapons control: UDS International SUBTICS

Radars: Surface search: Thomson-CSF Calypso II; I-band.

Sonars: Atlas Elektronik CSU 3; hull-mounted; active/passive search and attack; medium frequency

Programmes: Ordered from Howaldtswerke, Kiel in 1980.

Modernisation: Thomson refit completed at Talcahuano in late 1990, Simpson in 1991. Refit duration about 10 months each. A major programme to upgrade and extend the service life of both boats to 2025 has been initiated. The work is to include the fitting of a UDS Subtics combat management system and a new fire-control system. Torpedo tubes are to be upgraded to enable the Whitehead Black Shark torpedoes and anti-ship missiles to be fired while platform improvements are likely to include a new engine-control system and battery set. Work on Simpson started in 2006 and is to complete by early 2008. Modernisation of Thomson is to be undertaken 2008–10.

Structure: Fin and associated masts lengthened by 50 cm to cope with wave size off Chilean coast.

SIMPSON

10/2007, Michael Nitz / 1170096

FRIGATES

2 LATORRE CLASS (FFGM)

Name	No	Builders	Laid down	Launched	Commissioned
ALMIRANTE LATORRE (ex-Jacob van Heemskerck)	14 (ex-F 812)	Koninklijke Maatschappij De Schelde, Flushing	21 Jan 1981	5 Nov 1983	15 Jan 1986
CAPITÁN PRAT (ex-Witte de With)	11 (ex-F 813)	Koninklijke Maatschappij De Schelde, Flushing	15 Dec 1981	25 Aug 1984	17 Sep 1986

Displacement, tons: 3,750 full load

Dimensions, feet (metres): 428 × 47.9 × 14.1 (20.3 screws)
 (130.5 × 14.6 × 4.3; 6.2)

Main machinery: COGOG; 2 RR Olympus TM3B gas turbines; 50,880 hp (37.9 MW) sustained
 2 RR Tyne RM1C gas turbines; 9,900 hp (7.4 MW) sustained; 2 shafts, LIPS cp props

Speed, knots: 30

Range, n miles: 4,700 at 18 kt on Tynes

Complement: 197 (23 officers)

Missiles: SSM: 4 McDonnell Douglas Harpoon Block 2 ●, active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

SAM: 40 GDC Pomona Standard SM-1MR; Block VI; Mk 13 Mod 1 launcher ●, command guidance; semi-active radar homing to 38 km (20.5 n miles) at 2 Mach.

Raytheon RIM-7P Sea Sparrow Mk 29 octuple launcher ●, semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 39 kg, 24 missiles

Guns: 1 Signaal SGE-30 Goalkeeper ● with General Electric 30 mm 7-barrelled; 4,200 rds/min combined to 2 km. 2 Oerlikon 20 mm.

Torpedoes: 4–324 mm US Mk 32 (2 twin) tubes ● Honeywell Mk 46 Mod 5; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys: 2 Loral Hycor Mk 36 SRBOC 6-tube fixed quad launchers ●; IR flares and chaff to 4 km (2.2 n miles). SLQ-25 Nixie towed torpedo decoy.

ESM/ECM. Sphinx and Ramses; intercept and jammer.
Combat data systems: Signaal SEWACO VI action data automation; Link 11 SHF SATCOM ● JMCIS

Radars: Air search: Signaal LW08 ●, D-band; range 264 km (145 n miles) for 2 m² target.

Air/surface search: Signaal Smart; 3D ●, F-band

Surface search: Signaal Scout ●, I-band.

Fire control: 2 Signaal STIR 240 ●, I/J/K-band; range 140 km (76 n miles) for 1 m² target.

Signaal STIR 180 ●, I/J/K-band.

Sonars: Westinghouse SOS-509; hull-mounted; active search and attack; medium frequency.

Programmes: Contract signed on 26 March 2004 for the acquisition of two air-defence frigates. Latorre transferred on 16 December 2005 and arrived in Chile on 3 March 2006. Prat transferred on 17 July 2006 and arrived in Chile on 26 October 2006. 200 SM-1 missiles also reported acquired Harpoon Block II missiles procured separately from the US.

Operational: Command facilities for a task group commander and his staff.

2 BLANCO ENCALADA (KAREL DOORMAN) CLASS (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned
ALMIRANTE BLANCO ENCALADA (ex- <i>Abraham van der Hulst</i>)	15 (ex-F 832)	Koninklijke Maatschappij De Scheide, Flushing	8 Feb 1989	7 Sep 1991	15 Dec 1993
ALMIRANTE RIVEROS (ex- <i>Tjerk Hiddas</i>)	18 (ex-F 830)	Koninklijke Maatschappij De Scheide, Flushing	28 Oct 1986	9 Dec 1989	3 Dec 1992

Displacement, tons: 3,320 full load
Dimensions, feet (metres): 401.2 oa; 374.7 wl x 47.2 x 14.1 (122.3; 114.2 x 14.4 x 4.3)

Flight deck, feet (metres): 72.2 x 47.2 (22 x 14.4)

Main machinery: CODOG; 2 RR Spey SM1C, 33,800 hp (25.2 MW) sustained (early ships of the class will initially only have SM1A gas generators and 30,800 hp (23 MW) sustained available); 2 Stork-Wärtsilä 12SW280 diesels; 9,790 hp(m) (7.2 MW) sustained; 2 shafts; LIPS cp props

Speed, knots: 30 (Speys); 21 (diesels)
Range, n miles: 5,000 at 18 kt
Complement: 156 (16 officers) (accommodation for 163)

Missiles: SSM: 4 McDonnell Douglas Harpoon Block II launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

SAM: Raytheon RIM-7P Sea Sparrow Mk 48 vertical launchers; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg; 16 missiles. Canisters mounted on port side of hangar.

Guns: 1-3 in (76 mm)/62 OTO Melara compact Mk 100; 100 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg. This is the version with an improved rate of fire.

Torpedoes: 4-324 mm US Mk 32 Mod 9 (2 twin) tubes (mounted inside the after superstructure); Honeywell Mk 46 Mod 5; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys: 2 Loral Hycor SRBOC 6-tube fixed Mk 36 quad launchers; IR flares and chaff to 4 km (2.2 n miles).

SLQ-25 Nixie towed torpedo decoy.
ESM/ECM: Argo APECS II (includes AR 700 ESM); intercept and jammers.

Combat data systems: Signaal SEWACO VIIB action data automation; Link 11 WSC-6 twin aerials

Weapons control: Signaal IRSCAN infra-red detector (fitted in F 829 for trials and may be retrofitted in all in due course). Signaal VESTA helo transponder

Radars: Air/surface search: Signaal SMART; 3D, F-band Air search. Signaal LW08; D-band.

Surface search: Signaal Scout; I-band.
Navigation: Racal Decca 1226, I-band
Fire control: 2 Signaal STIR 180; I/J/K-band; range 140 km (76 n miles) for 1 m² target.

ALMIRANTE BLANCO ENCALADA

(Scale 1 : 1,200), Ian Sturton / 1164333

ALMIRANTE RIVEROS

3/2007, Piet Cornelis / 1335345

Sonars: Signaal PHS 36; hull-mounted; active search and attack; medium frequency.
 Thomson Sintra Anaconda DSBV 61; towed array; passive low frequency. LFAS may be fitted in due course.

Helicopters: 1 NAS 332SC Cougar

Programmes: Contract signed on 26 March 2004 for the acquisition of two frigates. *Blanco Encalada* transferred on 16 December 2005 and arrived in Chile on 3 March

2006. *Riveros* was handed over on 18 April 2007 and arrived in Chile on 1 August 2007

Structure: The VLS SAM is similar to Canadian Halifax and Greek MEKO classes. Both ships modified to operate Cougar helicopters. This includes lengthening and partly raising the helicopter hangar and replacement of the flight-deck grid with the ASIST system which includes 35 m traverse rails. A new horizon bar has also been installed

3 COCHRANE CLASS (TYPE 23) (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned
ALMIRANTE COCHRANE (ex- <i>Norfolk</i>)	05 (ex-F 230)	Yarrow Shipbuilders, Glasgow	14 Dec 1985	10 July 1987	1 June 1990
ALMIRANTE CONDELL (ex- <i>Marlborough</i>)	06 (ex-F 233)	Swan Hunter Shipbuilder, Wallsend-on Tyne	22 Oct 1987	21 Jan 1989	14 June 1991
ALMIRANTE LYNCH (ex- <i>Grafton</i>)	07 (ex-F 80)	Yarrow Shipbuilders, Glasgow	13 May 1993	5 Nov 1994	29 May 1997

Displacement, tons: 3,500 standard; 4,200 full load
Dimensions, feet (metres): 436.2 x 52.8 x 18 (screws); 24 (sonar) (133 x 16.1 x 5.5; 7.3)

Main machinery: CODLAG; 2 RR Spey SM1A (ex-F 230 and F 233) or SM1C (ex-F 80) gas turbines (see *Structure*); 31,100 hp (23.2 MW) sustained; 4 Paxman 12CM diesels; 8,100 hp (6 MW); 2 GEC motors; 4,000 hp (3 MW); 2 shafts

Speed, knots: 28, 15 on diesel-electric
Range, n miles: 7,800 miles at 15 kt
Complement: 181 (13 officers)

Missiles: SSM: 8 McDonnell Douglas Harpoon (2 quad) launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg (84C). 4 normally carried

SAM: British Aerospace SeaWolf GWS 26 Mod 1 VLS; Command Line Of Sight (CLOS) radar/TV tracking to 6 km (3.3 n miles) at 2.5 Mach, warhead 14 kg; 32 canisters.

Guns: 1 Vickers 4.5 in (114 mm)/55 Mk 8 Mod 1; 25 rds/min to 27.5 km (14.8 n miles) anti-surface; weight of shell 21 kg Mk 8 Mod 1 being progressively fitted
 2 DES/MSI DS 30B 30 mm/75; 850 rds/min to 10 km (5.4 n miles) anti-surface; 3 km (1.6 n miles) anti aircraft, weight of shell 0.36 kg

Torpedoes: 4 Cray Marine 324 mm fixed (2 twin) tubes; Honeywell Mk 46 Mod 5; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys: Outfit DLH; 4 Sea Gnat 6-barrelled 130 mm/102 mm launchers; DLF 2/3 offboard decoys.

ESM. Racal UAT; intercept

ALMIRANTE COCHRANE

(Scale 1 : 1,200), Ian Sturton / 1164334

Combat data systems: BAe SEMA Surface Ship Command System (DNA); Link 11.

Weapons control: BAe GSA 8B/GPEOD optronic director; GWS 80 (for SSM). GWS 26 (for SAM)

Radars: Air/surface search: Plessey Type 996(I); 3D; E/F-band.

Surface search: Racal Decca Type 1008; E/F-band.
 Navigation: Kelvin Hughes Type 1007; I-band
 Fire control: 2 Marconi Type 911; J/Ku-band
 IFF: 1010/1011 or 1018/1019

Sonars: Ferranti/Thomson Sintra Type 2050; bow-mounted; active search and attack.

Helicopters: 1 NAS 332C Cougar

Programmes: Formerly in UK Royal Navy service, letter of intent for purchase of the three ships signed by Chilean government in December 2004 followed by formal agreement on 7 September 2005. The contract includes

purchase of the three ships, pre-sale sanitisation and maintenance and a package of operator and maintainer training. BAE Systems to act as lead contractor with Fictet Support Limited to undertake overhauls in Portsmouth. Work started on *Cochrane* in late 2005; she was recommissioned on 22 November 2006, *Lynch* was recommissioned on 28 March 2007 and *Condeill* on 28 May 2008.

Modernisation: Most of the pre-transfer work was focused on the ships' power plants, with both diesel engines and gas turbines being removed for scheduled maintenance. Main gearwheel changes were also being effected on *Condeill* and *Lynch*. Mk 46 torpedoes are to be replaced by Eurotorp MU 90.

Structure: Incorporates stealth technology to minimise acoustic, magnetic, radar and IR signatures. The design includes a 7° slope to all vertical surfaces, rounded edges, reduction of IR emissions and a hull bubble system to reduce radiated noise.

ALMIRANTE LYNCH

7/2007, J Brodie / 1305002

ALMIRANTE CONDELL

7/2008*, Ian Harris 1335344

1 BROADSWORD CLASS (TYPE 22) (FFHM)

Name	No	Builders	Laid down	Launched	Commissioned
ALMIRANTE WILLIAMS (ex-Sheffield)	19 (ex-F 96)	Swan Hunter Shipbuilders, Wallsend-on-Tyne	29 Mar 1984	26 Mar 1986	26 July 1988
Displacement, tons: 4,100 standard; 4,800 full load		Guns: 1 Vickers 4.5 in (114 mm) 55 Mk 8; 25 rds/min to 22 km (11.9 n miles); weight of shell 21 kg. 2 Oerlikon 20 mm	Programmes: Originally successors to the UK Leander class, these ships entered RN service in 1987 but were withdrawn, half-way through their ships' lives, as a result of the 1998 UK Defence Review. Agreement for transfer to Chile ratified by the Chilean government in April 2003.		
Dimensions, feet (metres): 480.5 x 48.5 x 21 (146.5 x 14.8 x 6.4)		Torpedoes: 6-324 mm tubes.	Modernisation: The ship is to undergo a modernisation programme which started in March 2008 at ASMAR-Talcahuano Yard. This is to include installation of a new combat data system, Harpoon surface-to-surface missiles, and a 114 mm gun. The hangar and flightdeck are to be adapted to operate Cougar		
Main machinery: COGOG: 2 RR Olympus TM3B gas turbines; 50,000 hp (37.3 MW) sustained; 2 RR Tyne RM1C gas turbines, 9,900 hp (7.4 MW); 2 shafts; cp props		Countermeasures: Decoys: Outfit DLJ Sea Gnat. ESM UAT intercept. ECM Type 670	Structure: Broadsword Batch 2 ships were stretched versions of Batch 1.		
Speed, knots: 30; 18 on Tynes		Combat data systems: CACS 1.	Operational: The ship entered service on 5 September 2003.		
Complement: 273 (30 officers) (accommodation for 296)		Weapons control: To be announced.			
Missiles: SSM: 4 McDonnell Douglas Harpoon Block II; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.		Radars: Air/surface search: Marconi Type 967/968; D/E-band. Surface search: Racal Decca Type 2008; E/F-band.			
SAM: 2 British Aerospace Seawolf Block II (GWS 25 Mod 3 launcher); Command Line Of Sight (CLOS) with 2 channel radar tracking to 5 km (2.7 n miles) at 2+ Mach; warhead 14 kg.		Navigation: Kelvin Hughes Type 1008; I-band			
		Fire control: 2 Marconi Type 911; I-Ku-band (for Seawolf)			
		Sonars: Ferranti/Thomson Sintra Type 2050; hull-mounted, active search and attack.			
		Helicopters: 1 NAS 332SC Cougar.			

ALMIRANTE WILLIAMS

9/2003, B Sullivan / 0567435

SHIPBORNE AIRCRAFT

Numbers/Type: 8 Aerospatiale Dauphin AS 365N2
Operational speed: 150 kt (388 km/h).
Service ceiling: 15,000 ft (4,575 m).
Range: 410 n miles (758 km).

Role/Weapon systems: Multipurpose aircraft which replaced Bell 412 in SAR and surveillance roles. Three new aircraft were received in 2006 to replace older aircraft and a further four AS-365F (ex-Irish Corps) acquired in 2008.

AS-365 6/2006, Chilean Navy / 1164415

Numbers/Type: 5 Nurtanio (Aerospatiale) NAS 332C Cougar.
Operational speed: 151 kt (279 km/h).
Service ceiling: 15,090 ft (4,600 m).
Range: 335 n miles (620 km).

Role/Weapon systems: ASV/ASW helicopters; surface search and SAR secondary roles. All five aircraft undergoing modernisation and refurbishment from 2007 to extend service life until 2022. Two further new aircraft and one second-hand may be acquired. Sensors: Thomson-CSF Varam radar and Thomson Sintra HS-312 dipping sonar DR 2000 ESM. Weapons: ASW; 2 x Alliant Mk 46 Mod 2 torpedoes or depth bombs ASV; 1 or 2 x Aerospatiale AM 39 Exocet missiles.

COUGAR 7/2001, Maritime Photographia / 0121314

Numbers/Type: 4 MBB BO105C.
Operational speed: 113 kt (210 km/h).
Service ceiling: 8,845 ft (3,000 m).
Range: 407 n miles (754 km).

Role/Weapon systems: Coastal patrol helicopter for patrol, training and liaison duties; SAR as secondary role. Sensors: Bendix search radar. Weapons: Unarmed.

BO 105C 11/2001, Freddie Phillips / 053M054

Numbers/Type: 4 Bell 206B JetRanger.
Operational speed: 115 kt (213 km/h).
Service ceiling: 13,500 ft (4,115 m).
Range: 368 n miles (682 km).

Role/Weapon systems: Some tasks and training carried out by torpedo-armed liaison helicopter; emergency war role for ASW. To be replaced by Bell 412. Weapons: ASW, 1 x Mk 46 torpedo or 2 depth bombs.

JETRANGER 7/2001, Maritime Photographia / 0121315

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: (1) In addition there are one EMB-110 and three Casa Aviocar 212/300 support aircraft.
 (2) The Air Force has one Boeing 707 converted for AEW duties.

Numbers/Type: 3 Embraer EMB-111 Bandeirante.
Operational speed: 194 kt (360 km/h).
Service ceiling: 25,500 ft (7,770 m).
Range: 1,590 n miles (2,945 km).

Role/Weapon systems: Designated EMB-111N for peacetime EEZ and wartime MR. Sensors: Eaton-AIL AN/APS-128 search radar, Thomson-CSF DR 2000 ESM, searchlight. Weapons: Strike; 6 x 127 mm or 28 x 70 mm rockets.

Numbers/Type: 7 Pilatus PC-7 Turbo-Trainer.
Operational speed: 270 kt (500 km/h).
Service ceiling: 32,000 ft (9,755 m).
Range: 1,420 n miles (2,630 km).

Role/Weapon systems: Training includes simulated attacks to exercise ships' AA defences; emergency war role for strike operations. Sensors: None. Weapons: 4 x 127 mm or similar rockets and machine gun pods.

Numbers/Type: 3 Lockheed P-3A Orion
Operational speed: 410 kt (760 km/h).
Service ceiling: 28,300 ft (8,625 m).
Range: 4,000 n miles (7,410 km).

Role/Weapon systems: Long-range MR for surveillance and SAR. First one delivered from US in March 1993 followed by seven more of which one has been modified for transport, two are in reserve and two are used for spares. Sensors: Three aircraft upgraded with new radar, ESM and FLIR. APS-115 radar. Weapons: Armed with Harpoon from mid-2007.

ORION 6/2003, Chilean Navy / 0568794

Numbers/Type: 9 Cessna 0-2A Skymaster.
Operational speed: 130 kt (241 km/h).
Service ceiling: 5,000 ft (1,524 m).
Range: 550 n miles (1,019 km).

Role/Weapon systems: Maritime coastal patrol and training acquired in 1998/99. Sensors: None. Weapons: May be equipped with 4 weapons stations in due course.

SKYMASTER 6/1999, Chilean Navy / 0056723

Numbers/Type: 3 EADS CASA C-295 Persuader.
Operational speed: 260 kt (482 km/h).
Service ceiling: 13,540 ft (4,125 m).
Range: 840 n miles (1,555 km).

Role/Weapon systems: Three maritime surveillance aircraft (stretched versions of CN-235) ordered on 18 October 2007. There is an option for a further five aircraft. To be equipped with Fully Integrated Tactical System (FITS). Sensors to be announced.

EADS CASA C-295 10/2007, EADS / 1170095

PATROL FORCES

Notes: It is planned to procure three new corvettes, possibly derived from the Fassmer OPV (Coast Guard) design. Such ships would be more heavily armed and would replace the Casma class fast attack craft.

3 CASMA (SAAR 4) CLASS (FAST ATTACK CRAFT—MISSILE) (PGG)

Name	No	Builders	Commissioned
CASMA (ex-Romah)	LM 30	Haifa Shipyard	Mar 1974
CHIPANA (ex-Kashef)	LM 31	Haifa Shipyard	Oct 1973
ANGAMOS (ex-Reshef)	LM 34	Haifa Shipyard	Apr 1973

Displacement, tons: 415 standard, 450 full load
Dimensions, feet (metres): 190.7 × 24.9 × 9.2 (58.1 × 7.6 × 2.8)
Main machinery: 4 MTU 16V 396 diesels; 13,029 hp(m) (9.58 MW) (30 and 31); 4 MTU 16V 596TB91 diesels, 15,000 hp(m) (11.3 MW) (34); 4 shafts
Speed, knots: 32. **Range, n miles:** 1,650 at 30 kt; 3,700 at 18 kt
Complement: 46 (8 officers)

Missiles: SSM: 4 IAI Gabriel I or II; radar or optical guidance; semi-active radar homing to 20 km (10.8 n miles) (I) or 36 km (20 n miles) (II); at 0.7 Mach, warhead 75 kg HE.
Guns: 2 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.
 2 Oerlikon 20 mm; 800 rds/min to 2 km
 2—12.7 mm MGs

Countermeasures: Decoys: 4 Rafael LRCR chaff decoy launchers.

ESM: Eta Electronics MN-53; intercept.

ECM: Eta Rattler; jammer

Radars: Surface search: Eta EL 2208C; E/F-band.

Navigation: Raytheon 20X; I-band

Fire control: Selenia Orion RTN 10X, I/J-band.

Programmes: One transferred from Israel December 1979 and second in January 1981. Two more acquired from Israel 1 June 1997 but one (ex-Terishish) was cannibalised for spares in 1998

Modernisation: New engines fitted in the first pair in 2000. Weapons control systems have been upgraded in LM 30 and LM 34. Similar refit of LM 31 completed by 2003.

Operational: All operate in Third Naval Zone (Beagle Channel).

CASMA 9/2000, MTU / 0094035

4 RIQUELME (TIGER) CLASS (TYPE 148) (FAST ATTACK CRAFT—MISSILE) (PGG)

Name	No	Builders	Commissioned
RIQUELME (ex-Wolf)	LM 36 (ex-P 6149)	CMN Cherbourg	26 Feb 1974
ORELLA (ex-Elster)	LM 37 (ex-P 6154)	CMN Cherbourg	14 Nov 1974
SERRANO (ex-Tiger)	LM 38 (ex-P 6141)	CMN Cherbourg	30 Oct 1972
URIBE (ex-Luchs)	LM 39 (ex-P 6143)	CMN Cherbourg	8 Apr 1973

Displacement, tons: 234 standard; 265 full load
Dimensions, feet (metres): 154.2 × 23 × 8.9 (47 × 7 × 2.7)
Main machinery: 4 MTU 16V 396 diesels; 13,029 hp(m) (9.58 MW) sustained; 4 shafts
Speed, knots: 31. **Range, n miles:** 570 at 30 kt; 1,600 at 15 kt
Complement: 30 (4 officers)

Missiles: SSM: 4 Aerospaiale MM 38 Exocet (2 twin) launchers; inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 165 kg, sea-skimmer

Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface, 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg
 1 Bofors 40 mm/70; 330 rds/min to 12 km (6.5 n miles) anti-surface; 4 km (2.2 n miles) anti-aircraft; weight of shell 0.96 kg; fitted with GRP dome (1984).
 2—12.7 mm MGs.

Mines: Laying capability.

Countermeasures: Decoys: Woika chaff launcher.

Combat data systems: PALIS and Link 11.

Weapons control: CSEE Panda optical director. Thomson-CSF Vega PCET system, controlling missiles and guns.

Radars: Air/surface search: Thomson-CSF Triton; G-band, range 33 km (18 n miles) for 2 m² target.

Navigation: SMA 3 RM 20; I-band; range 73 km (40 n miles).

Fire control: Thomson-CSF Castor; I/J-band.

Programmes: First pair transferred from Germany on 27 August 1997 and sailed in a transport ship on 2 September 1997. Four more transferred on 22 September 1998 and sailed 11 October. These four were all damaged during a storm in transit, and the two best were taken into service, with the other pair (Pelikan and Kranich) being used for spares. The ship names have prefixed ranks but these are not used.

Modernisation: New engines fitted in 2000. Speed reduced to 31 kt.

Structure: Similar to Combattante II craft. EW equipment was removed prior to transfer.

Operational: Operate in 4th Naval Zone (Iquique). Exocet missiles were not part of the transfer but have been acquired separately

URIBE 7/2001, Maritime Photographic / 0121316

SERRANO 7/2001, Maritime Photographic / 0121317

8 GRUMETE DIAZ (DABUR) CLASS (COASTAL PATROL CRAFT) (PB)

DIAZ 1814	TELLEZ 1817	TRONCOSO 1822
BOLADOS 1815	BRAVO 1818	HUDSON 1823
SALINAS 1816	MACHADO 1820	

Displacement, tons: 39 full load
Dimensions, feet (metres): 64.9 × 18 × 5.9 (19.8 × 5.5 × 1.8)
Main machinery: 2 Detroit 12V 71TA diesels, 840 hp (627 kW) sustained; 2 shafts
Speed, knots: 19
Range, n miles: 450 at 13 kt
Complement: 8 (2 officers)
Guns: 2 Oerlikon 20 mm or 2—12.7 mm MGs.
Radars: Surface search: Racal Decca Super 101 Mk 3; I-band.

Comment: All have LPC numbers and Grumete precedes the ships' names. First six transferred from Israel and commissioned 3 January 1991. Second batch of four more transferred and commissioned 17 March 1995. A RIB inspection boat is carried on the stern. Deployed in 4th Naval Zone (Iquique) and in 2nd Naval Zone and operate in the Chiloé area. All underwent life extension refits in 2001–02 at Valparaíso and Puerto Montt. Two craft deleted in 2006. Service lives end by 2012.

HUDSON 7/2001, Maritime Photographic / 0121321

6 MICALVI CLASS (LARGE PATROL CRAFT) (PB/AEM)

Name	No	Builders	Launched	Commissioned
MICALVI	PSG 71	ASMAR, Talcahuano	12 Sep 1992	30 Mar 1993
ORTIZ	PSG 72	ASMAR, Talcahuano	23 July 1993	15 Dec 1993
ISAZA	PSG 73	ASMAR, Talcahuano	7 Jan 1994	31 May 1994
VIDELA (ex-Mora)	PMD 74	ASMAR, Talcahuano	21 Apr 1994	11 Aug 1994
CABRALES	PSH 77	ASMAR, Talcahuano	4 Apr 1996	29 June 1996
SIBBALD	PSG 78	ASMAR, Talcahuano	5 June 1996	29 Aug 1996

Displacement, tons: 518 full load
Dimensions, feet (metres): 139.4 × 27.9 × 9.5 (42.5 × 8.5 × 2.9)
Main machinery: 2 Caterpillar 3512 TA diesels, 2,560 hp(m) (1.88 MW) sustained; 2 shafts
Speed, knots: 15. **Range, n miles:** 4,200 at 12 kt
Complement: 23 (5 officers) plus 10 spare
Guns: 1 Bofors 40 mm/60 2 Derlikon 20 mm.
Radars: Surface search: Racal Decca; I-band

Comment: First four built under design project Taitao. Last pair built for export but bought by the Navy. Multipurpose patrol vessels with a secondary mission of transport and servicing navigational aids. Provision for bow thruster, sonar and mine rails. Can carry 35 tons cargo in holds and 18 tons in containers. Crane lift of 2.5 tons. The ships' names all have prefixed ranks but these are not used. Micalvi and Ortiz were classified as missile tenders in 1999 but reclassified as patrol craft in 2004. Cabrales has been converted for use as a survey vessel. Videla has been modified to provide medical support.

ORTIZ 7/2001, Maritime Photographic 0534129

MICALVI 11/2001, Freddie Phillips / 0534131

AMPHIBIOUS FORCES

Notes: There are plans to acquire a multipurpose vessel capable of force-projection and disaster-relief roles. The broad requirement is for a ship of up to 10,000 tons with a flightdeck capable of operating four medium lift helicopters, a dock and Ro-Ro capabilities. The ship is likely to be procured on the second-hand market and would replace *Valdivia*.

1 NEWPORT CLASS (LSTH)

Name	No	Builders	Laid down	Launched	Commissioned	Recommissioned
VALDIVIA (ex-San Bernardino)	93 (ex-LST 1189)	National Steel & Shipbuilding Co	12 July 1969	28 Mar 1970	27 Mar 1971	30 Sep 1995

Displacement, tons: 4,975 light; 8,450 full load
Dimensions, feet (metres): 522.3 (hull) × 69.5 × 17.5 (aft) (159.2 × 21.2 × 5.3)

Main machinery: 6ALCO 16-251 diesels, 16,500 hp (12.3 MW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 20 **Range, n miles:** 14,250 at 14 kt
Complement: 257 (13 officers)

Military lift: 400 troops; 500 tons vehicles; 3 LCVPs and 1 LCPL on davits

Radars: Surface search. Raytheon SPS-67; G-band.

Navigation: Marcon; LN66; I/J-band

Helicopters. Platform only

Programmes: Transferred from the US by lease on 30 September 1995. A second of class was offered but not accepted due to its poor condition.

Structure: The hull form required to achieve 20 kt would not permit bow doors, thus these ships unload by a 112 ft ramp over their bow. The ramp is supported by twin derrick arms. A ramp just forward of the superstructure connects the lower tank deck with the main deck and a vehicle passage through the superstructure provides

access to the parking area amidships. A stern gate to the tank deck permits unloading of amphibious tractors into the water, or unloading of other vehicles into an LCU or on to a pier. Vehicle stowage covers 19,000 sq ft. Length over derrick arms is 562 ft (171.3 m); full load draught is 11.5 ft forward and 17.5 ft aft. Bow thruster fitted to hold position offshore while unloading amphibious tractors.

Operational: Damaged by grounding in mid-1997, but subsequently repaired.

VALDIVIA

1/1999, van Ginderen Collection / 0056726

2 MAIPO (BATRAL) CLASS (LSTH)

Name	No	Builders	Launched	Commissioned
RANCAGUA	92	ASMAR, Talcahuano	6 Mar 1982	8 Aug 1983
CHACABUCO	95 (ex-93)	ASMAR, Talcahuano	16 July 1985	15 Apr 1986

Displacement, tons: 873 standard; 1,409 full load

Dimensions, feet (metres): 260.4 × 42.7 × 8.2 (79.4 × 13 × 2.5)

Main machinery: 2 Caterpillar diesels; 4,012 hp (m) (2.95 MW) sustained; 2 shafts, cp props

Speed, knots: 16 **Range, n miles:** 3,500 at 13 kt

Complement: 43 (5 officers)

Military lift: 180 troops; 12 vehicles; 350 tons

Guns: 2 Bofors 40 mm/60. 1 Oerlikon 20 mm. 2–81 mm mortars.

Radars: Navigation: Decca 1229; I/J-band.

Helicopters. Platform for 1 Bell 206B or BO 105C.

Comment: First laid down in 1980 to standard French design with French equipment. Have 40 ton bow ramps and vehicle stowage above and below deck. Both ships underwent life-extension refits in 2002–03.

CHACABUCO

12/2004, Globke Collection / 1047869

2 ELICURA CLASS (LSM)

Name	No	Builders	Commissioned
ELICURA	90	Talcahuano	10 Dec 1968
OROMPELLO	94	Dade Dry Dock Co, MI	15 Sep 1964

Displacement, tons: 290 light, 750 full load

Dimensions, feet (metres): 145 × 34 × 12.8 (44.2 × 10.4 × 3.9)

Main machinery: 2 Cummins VT-17-700M diesels, 900 hp (660 kW); 2 shafts

Speed, knots: 10.5. **Range, n miles:** 2,900 at 9 kt

Complement: 20

Military lift: 350 tons

Guns: 3 Oerlikon 20 mm (can be carried).

Radars: Navigation: Raytheon 1500B, I/J-band.

Comment: Two of similar class operated by Chilean Shipping Co. Oil fuel, 77 tons.

ELICURA

10/2001, Freddie Philips / 0534137

SURVEY SHIPS

Notes: Replacement of the Antarctic support ship *Oscar Viel Toro* is under consideration.

1 TYPE 1200 CLASS (AGS/AGOBH)

Name	No	Builders	Commissioned
CONTRE-ALMIRANTE OSCAR VIEL TORO (ex-Norman McLeod Rogers)	AP 48	Canadian Vickers, Montreal	Oct 1960

Displacement, tons: 6,320 full load

Measurement, tons: 4,179 gross; 1,847 net

Dimensions, feet (metres): 294.9 × 62.5 × 20 (89.9 × 19.1 × 6.1)

Main machinery: 4 Fairbanks-Morse 38D8-1/8-12 diesels, 8,496 hp (6.34 MW) sustained;

4 GE generators; 4.8 MW; 2 Ruston RK3CZ diesels; 7,250 hp (5.6 MW) sustained, 2 GE

generators; 2.78 MW; 2 GE motors; 12,000 hp (8.95 MW); 2 shafts

Speed, knots: 15

Range, n miles: 12,000 at 12 kt

Complement: 33

Guns: 2 Oerlikon 20 mm.

Helicopters: 1 BO 105C

Comment: Acquired from the Canadian Coast Guard on 16 February 1995. The ship was formerly based on the west coast at Victoria, BC, and was laid up in 1993. Replaced the dated *Piloto Pardo* as the Antarctic patrol and survey ship.

CONTRE-ALMIRANTE OSCAR VIEL TORO

6/2004, Chilean Navy / 1044093

1 ROBERT D CONRAD CLASS (AGOR)

Name	No	Builders	Commissioned
VIDAL GORMAZ (ex-Thomas Washington)	AGOR 60 (ex-AGOR 10)	Marinette Marine, WI	27 Sep 1965

Displacement, tons: 1,490 full load
 Dimensions, feet (metres): 208.9 x 40 x 15.3 (63.7 x 12.2 x 4.7)
 Main machinery: Diesel-electric; 2 FBM diesel generators; 1 Reliance motor; 1,000 hp (746 kW); 1 shaft
 Speed, knots: 12
 Range, n miles: 14,500 at 10 kt
 Complement: 48 (10 officers and 17 scientists)
 Guns: 2 Oerlikon 20 mm.
 Radars: Navigation: Decca 252/6; I-band. Raytheon R-84, I-band.

Comment: Transferred from US on 28 September 1992. This is the first class of ships designed and built by the US Navy for oceanographic research. Fitted with instrumentation and laboratories to measure gravity and magnetism, water temperature, sound transmission in water, and the profile of the ocean floor. Special features include 10 ton capacity boom and winches for handling over-the-side equipment; 620 hp gas turbine (housed in funnel structure) for providing 'quiet' power when conducting experiments; can propel the ship at 6.5 kt. Ships of this class are in service with several other navies. To be replaced by a new vessel in about 2010.

VIDAL GORMAZ 6/2008*, Chilean Navy / 1335350

1 BUOY TENDER (ABU)

Name	No	Builders	Commissioned
GEORGE SLIGHT MARSHALL (ex-MV Vigilant)	BRS 63	Netherlands	July 1978

Displacement, tons: 1,100 full load
 Dimensions, feet (metres): 173.9 x 36.7 x 11.5 (53 x 11.2 x 3.5)
 Main machinery: 2 Ruston 6AP230 diesels; 1,380 hp (1 MW); 2 shafts; bow thruster
 Speed, knots: 10
 Range, n miles: 4,600 at 5 kt
 Complement: 20
 Guns: 2 Oerlikon 20 mm.
 Radars: Navigation: Decca 252/6; I-band.

Comment: Acquired from the UK Mersey Harbour Board and recommissioned 5 February 1997. Carries a 15 ton derrick.

GEORGE SLIGHT MARSHALL 6/2008*, Chilean Navy / 1335349

0 + 1 OCEANOGRAPHIC RESEARCH SHIP (AGOR)

Name	No	Builders	Laid down	Launched	Commissioned
—	—	ASMAR, Talcahuano	2008	2008	Nov 2010

Measurement, tons: 3,020 grt
 Dimensions, feet (metres): 243.1 x 51.2 x 17.7 (74.1 x 15.6 x 5.4)
 Main machinery: Diesel electric; 3 Wärtsilä 8L20 diesel generators; 6,435 hp (4.8 MW); 2 Ansaldo motors; 4,023 hp (3.0 MW); 1 shaft; 1 bow thruster (450 kW); 1 stern thruster (450 kW)
 Speed, knots: 14.5
 Range, n miles: 10,000 at 12 kt
 Complement: 43 (9 officers) plus 25 scientists
 Radars: Surface search: To be announced
 Navigation: To be announced.

Comment: Project Medusa: Contract signed with ASMAR Talcahuano on 28 December 2007 for the construction of an oceanographic and fisheries research vessel to replace Vidal Gormez. The ST-367 design was developed by Skipsteknisk of Norway. The ship is equipped with four laboratories while the hydroacoustic research and positioning equipment is to be provided by Kongsberg Simrad. This includes: multibeam echosounders for deep and medium depth water, singlebeam echosounder for deep water, sub-bottom profiler, omni-directional sonar for biomass, surface sound velocity profiler and an acoustic Doppler current profiler.

ST-367 1/2008*, Skipsteknisk / 1294329

TRAINING SHIPS

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Commissioned
ESMERALDA (ex-Don Juan de Austria)	BE 43	Bazan, Cadiz	15 June 1954

Displacement, tons: 3,420 standard, 3,754 full load
 Dimensions, feet (metres): 371.0 x 44.6 x 23 (113.7 x 13.7 x 7)
 Main machinery: 1 Burmeister & Wain diesel; 1,400 hp(m) (1.03 MW); 1 shaft
 Speed, knots: 13. Range, n miles: 11,600 at 10 kt
 Complement: 306 (23 officers and 79 cadets)
 Guns: 4 Hotchkiss saluting guns.

Comment: Four-masted schooner originally intended for the Spanish Navy. Near sister ship of Juan Sebastian de Elcano in the Spanish Navy. Refitted Saldanha Bay, South Africa, 1977. Sail area, 26,910 sq ft.

ESMERALDA 6/2007, Chris Sattler / 1170094

AUXILIARIES

Notes: Plans to replace the replenishment ship *Araucano* are under consideration. The most likely option is procurement on the second-hand market. Contenders include ex-US Navy Henry J Kaiser class *Andrew Higgins* AO 190.

3 FLOATING DOCKS (YFD)

Name	No	Commissioned	Lift
INGENIERO MERY (ex-ARD 25)	131	1944 (1973)	3,000 tons
MUTILLA (ex-ARD 32)	132	1944 (1960)	3,000 tons
TALCAHUANO (ex-ARD 5)	133	1944 (1999)	3,000 tons

Comment: There is also a Floating Dock *Marinero Gutierrez* with a 1,200 ton lift. Built in 1991

1 TRANSPORT SHIP (APH)

Name	No	Builders	Launched	Commissioned
AQUILES	AP 41	ASMAR, Talcahuano	4 Dec 1987	15 July 1988

Displacement, tons: 2,767 light; 4,550 full load
 Dimensions, feet (metres): 337.8 x 55.8 x 18 (103 x 17 x 5.5; max)
 Main machinery: 2 Krupp MaK 8 M 453B diesels; 7,080 hp(m) (5.10 MW) sustained; 1 shaft; bow thruster
 Speed, knots: 18
 Complement: 80
 Military lift: 250 troops
 Helicopters: Platform for up to Cougar size

Comment: Ordered 4 October 1985. Can be converted rapidly to act as hospital ship.

AQUILES 7/2001, Maritime Photographic / 0121377

For details of the latest updates to *Jane's Fighting Ships* online and to discover the additional information available exclusively to online subscribers please visit jfs.janes.com

124 Chile/Auxiliaries—Tugs

1 ÄLVSBERG CLASS (SUPPORT SHIP) (AGP/ASH)

Name	No	Builders	Launched	Commissioned
MERINO (ex-Älvsborg)	42 (ex-A 234, ex-M 02)	Karlskronavarvet	11 Nov 1969	6 Apr 1971

Displacement, tons: 2,660 full load
Dimensions, feet (metres): 303 1 × 48.2 × 13.2 (92.4 × 14.7 × 4)
Main machinery: 2 Nohab-Polar 112 VS diesels, 4,200 hp(m) (3.1 MW); 1 shaft; cp prop; bow thruster, 350 hp(m) (257 kW)
Speed, knots: 18
Complement: 52 (accommodation for 205)
Guns: 3 Bofors 40 mm/70 SAK 48.
Countermasures: Decoys: 2 Philax chaff/IR launchers.
Radars: Raytheon; E/F-band.
Surface search: Philips 9GR 600; I-band
Fire control: Philips 9LV 200 Mk 2; I/J-band.
Navigation: Terma Scantec 009, I-band.
Helicopters: Platform for 1 medium.

Comment: Ordered in 1968 as a minelayer. Transferred from the Swedish Navy in November 1996, having been paid off in 1995. Recommissioned 7 February 1997. Originally designed as a minelayer with a capacity of 300 mines. Converted to act as a general support ship with improved accommodation and workshops. Acts as a depot ship for submarines and attack craft. The full name is *Almirante José Toribio Merino Castro*.

MERINO 7/2001, Maritime Photographic / 0121328

1 REPLENISHMENT SHIP (AOR)

Name	No	Builders	Commissioned
ARAUCANO	AO 53	Burmeister & Wain, Copenhagen	10 Jan 1967

Displacement, tons: 23,000 full load
Dimensions, feet (metres): 497.6 × 74.9 × 29.8 (151.7 × 22.8 × 8.8)
Main machinery: 1 Burmeister & Wain Type 62 VT 2BF140 diesel; 10,800 hp(m) (794 MW); 1 shaft
Speed, knots: 17. Range, n miles: 12,000 at 15.5 kt
Complement: 130 (14 officers)
Cargo capacity: 21,126 m³ liquid; 1,444 m³ dry
Guns: 4 Bofors 40 mm/60 (2 twin)
Radars: Navigation. Racal Decca; I-band.

Comment: Launched on 21 June 1966. Single-hulled design.

ARAUCANO 7/2001, Chilean Navy / 0121329

1 HARBOUR TRANSPORT (YFB)

Name	No	Builders	Commissioned
GRUMETE PEREZ	YFB 114	ASMAR, Talcahuano	12 Dec 1975

Displacement, tons: 165 full load
Dimensions, feet (metres): 80 × 22 × 8.6 (24.4 × 6.7 × 2.6)
Main machinery: 1 diesel; 370 hp(m) (272 kW); 1 shaft
Speed, knots: 10
Complement: 6
Guns: 1 Oerlikon 20 mm can be carried
Radars: Navigation: Furuno; I-band.

Comment: Transferred to Seaman's School as harbour transport. Modified fishing boat design.

GRUMETE PEREZ 8/1997, Chilean Navy / 0012168

1 SUPPLY SHIP (AKSL)

Name	No	Builders	Commissioned
PISAGUA	116	SiMAR, Santiago	11 July 1995

Displacement, tons: 195 full load
Dimensions, feet (metres): 73.2 × 19.7 × 4.9 (22.3 × 6 × 1.5)
Main machinery: 1 diesel, 1 shaft
Speed, knots: 8. Range, n miles: 500 at 8 kt
Cargo capacity: 50 tons
Radars: Navigation: Furuno; I-band

Comment: LCU design operated by the Seaman's School, Quiriquina Island as a general purpose stores ship.

PISAGUA 8/1997, Chilean Navy / 0012169

TUGS

Notes: Small harbour tugs *Reyes*, *Cortés* (both 100 tons and built in 1960) and *Galvez* (built in 1975), and the small personnel transport *Buzo Sobenes* BRT 112 are also in commission.

BUZO SOBENES 7/1997, Chilean Navy / 0012170

2 VERITAS CLASS (TUG/SUPPLY VESSELS) (ATF)

Name	No	Builders	Commissioned
GALVARINO (ex-Maersk Traveller)	ATF 66	Aukra Bruk, Aukra	1974
LAUTARO (ex-Maersk Tander)	ATF 67	Aukra Bruk, Aukra	1973

Displacement, tons: 941 light; 2,380 full load
Dimensions, feet (metres): 191.3 × 41.4 × 12.8 (58.3 × 12.6 × 3.9)
Main machinery: 2 Krupp MaK 8 M 453AK diesels; 6,400 hp(m) (4.7 MW); 2 shafts, cp props; bow thruster
Speed, knots: 14
Complement: 11 plus 12 spare berths
Cargo capacity: 1,400 tons
Guns: 1 Bofors 40 mm/70 can be carried.
Radars: Navigation: Terma Pilot 7T-48, Furuno FR 240; I-band.

Comment: *Janequero* and *Galvarino* delivered from Maersk and commissioned into Navy 26 January 1988. *Lautaro* delivered in 1991. *Janequero* since deleted. Bollard pull, 70 tonnes; towing winch, 100 tons. Fully air conditioned. Designed for towing large semi-submersible platform in extreme weather conditions. Ice strengthened. *Lautaro* underwent refit at ASMAR October 2006 to January 2007.

GALVARINO 7/2001, Maritime Photographic / 0121330

COAST GUARD

Notes: There are also large numbers of harbour and SAR craft.

1 + 1 (2) OFFSHORE PATROL VESSELS (PSO)

Name	No	Builders	Launched	Commissioned
PILOTO PARDO	PZM 81	ASMAR, Talcahuano	14 June 2007	13 June 2008
COMANDANTE TORO	PZM 82	ASMAR, Talcahuano	15 Oct 2008	June 2009

Displacement, tons: 1,728 full load
Dimensions, feet (metres): 264.4 x 42.6 x 12.5 (80.6 x 13.0 x 3.8)
Main machinery: 2 Wärtsilä 12V26 diesels; 10,950 hp (8.2 MW); 2 shafts; LIPS cp props; 2 bow thrusters
Speed, knots: 20
Range, n miles: 8,600 at 12 kt
Complement: 35 + 30 passengers
Guns: 1—40 mm/70, 6—12.7 mm MGs.
Radars: Surface search/navigation: Sperry Marine Bridgemaster E, E/F/I-bands.
Fire control: To be announced.
Helicopters: AS 365 or BO 105.

Programmes: Project Danubio IV. Contract signed on 20 May 2005 with Fassmer GmbH & Co. and Astilleros y Maestranzas de la Armada (ASMAR) for the design and construction of two patrol vessels. Fassmer is providing the design and construction assistance for the vessels which are under construction at Talcahuano Yard. Two further units are planned for delivery in 2010 and 2011.

Structure: Steel construction. The design includes stealth features. Upper-deck layout features a hangar, flight deck, crane, two 7 m RIBs, container storage and a special rescue zone.

Operational: PZM 81 based at Talcahuano.

PILOTO PARDO 6/2008*, Chilean Navy / 1335348

18 PROTECTOR CLASS (WPB)

ALACALUFE LEP 1603	COQUIMBO LSG 1616
HALLEF LEP 1604	PUERTO NATALES LSG 1617

Complement: 3
Guns: 1—12.7 mm MG.
Radars, Navigation: Raytheon; I-band.

Comment: Built by Rodman Polyships, Vigo and all delivered by 17 May 1996.

China

PEOPLE'S LIBERATION ARMY NAVY (PLAN)

Country Overview

The People's Republic of China, proclaimed on 1 October 1949, is the world's third-largest country by area (3,695,000 square miles) and the largest by population. It is bordered to the north by Kyrgyzstan, Kazakhstan, Mongolia and Russia, to the south by Vietnam, Laos, Myanmar, India, Bhutan, Nepal and North Korea and to the west by Pakistan, Afghanistan and Tajikistan. It has a 7,830 n mile coastline with the Yellow, East China and South China seas. There are more than 3,400 offshore islands of which Hainan is the largest. Sovereignty over Taiwan, still formally a province of China, is also claimed. Ownership of some or all of the Spratly Islands is disputed between China, Brunei, Taiwan, Vietnam, Malaysia and the Philippines although a code of conduct was mutually brokered in 2002. The principal ports are Shanghai (largest city), Fuzhou, Qingdao, Tianjin, Guangzhou and Hangzhou which is linked to the capital Beijing by the Grand Canal. Overall there are 54,000 n miles of navigable inland waterways including the Yangtze River on which the port of Wuhan is situated. Territorial seas (12 n miles) are claimed. A 200 n mile EEZ has also been claimed but the limits have not been defined.

Headquarters Appointments

Commander-in-Chief of the Navy:

Admiral Wu Shengli

Political Commissar of the Navy:

Admiral Liu Xiaojiang

Deputy Commanders-in-Chief of the Navy:

Vice Admiral Zhao Xingta
 Vice Admiral Zhang Yongyi
 Vice Admiral Zhang Zhannan
 Vice Admiral Ding Yiping
 Vice Admiral Wang Yucheng

Fleet Commanders

North Sea Fleet:

Rear Admiral Tian Zhong

East Sea Fleet:

Rear Admiral Xu Hongmeng

South Sea Fleet:

Vice Admiral Su Shiliang

Personnel

- (a) 2009: 250,000 officers and men, including 25,000 naval air force, 8-10,000 marines (28,000 in time of war) and 28,000 for coastal defence
 (b) 2 years' national service for sailors afloat; 3 years for those in shore service. Some stay on for up to 15 years. 41,000 conscripts

Operational Numbers

Because numbers of vessels are kept in operational reserve, the Chinese version of the order of battle tends to show fewer ships than are counted by Western observers.

Organisation

Each of the North, East and South Sea Fleets has two submarine divisions, three DD/FF divisions and one MCMV division. The North also has one Amphibious Division, and the other Fleets have two each. The South has two Marine Infantry Brigades.

Bases

North Sea Fleet. Major bases: Qingdao (HQ), Huludao, Jiangezhuang, Guzhen Bay, Lushun, Xiaopingdao. Minor bases: Weihai Wei, Qingshan, Luda, Lianyungang, Ling Shan, Ta Ku Shan. Changshandao, Luozhuang, Dayuanjiadun, Dalian

East Sea Fleet. Major bases: Ningbo (HQ), Zhoushan, Shanghai, Daxie, Fujian. Minor bases: Zhenjianguan, Wusong, Xinxiang, Wenzhou, Sanduao, Xiemen, Xingxiang, Quandou, Wen Zhou SE, Wuhan, Dinghai, Jiaotou
 South Sea Fleet. Major bases: Zhanjiang (HQ), Yulin (Hainan Island), Huangfu, Hong Kong, Yalong (Hainan Island), Guangzhou (Canton). Minor bases: Haikou, Shantou, Humen, Kuanchuang, Tsun, Kuan Chung, Mawai, Beihai, Ping Tan, San Chou Shih, Tang-Chiah Huan, Longmen, Bailong, Dongcun, Beimaqing, Xiechuandao, Yuchi

Coast Defence

A large number of HY-2 (CSSC-3) and HY-3 (CSSC-301) SSMs in 20 semi-fixed armoured sites. 36 Coastal Artillery regiments.

Equipment Procurement

Although often listed under the name of the designer, equipment has not necessarily been supplied direct from the parent company. It may have been acquired from a third party or by reverse engineering.

Training

The main training centres are:

Dalian: Naval Vessel Academy
 Guangzhou (Canton): Naval Arms Command College
 Qingdao: Submarine Academy
 Wuhan: Naval Engineering University
 Nanjing: Naval Staff College
 Yan Tai: Aviation Engineering College

Marines

There are two brigades based at Haisu and subordinate to the Navy. Each has three Infantry regiments and one Artillery regiment.

Naval Air Force

With 25,000 officers and men and over 800 aircraft, this is a considerable naval air force primarily land-based. There is

a total of eight Divisions with 27 Regiments split between the three Fleets. Some aircraft are laid up unrepared.

Air bases include:

North Sea Fleet: Dalian, Qingdao, Jinxi, Jiyuan, Laiyang, Jiaoxian, Xingtai, Laishan, Anyang, Changzhi, Liangxiang and Shan Hai Guan

East Sea Fleet: Danyang, Daishan, Shanghai (Dachang), Ningbo, Luqiao, Feidong and Shitangqiao

South Sea Fleet: Foluo, Haikou, Lingshui, Sanya, Gurping, Jialaishi and Lingling

SUBMARINES

Strategic Missile Submarines

Notes: The fourth test flight of a JL-2 missile was successfully accomplished on about 12 June 2006. The firing was made from a submarine, probably the Golf class SSB, off Qingdao and impacted in the western desert. The first launch from a Jin-class submarine is expected once missile flight testing has been completed, probably in 2009.

0 + 5 (1) JIN CLASS (TYPE 094) (SSBN)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	Bohai Shipyard, Huludao	2001	28 July 2004	Mar 2007
-	-	Bohai Shipyard, Huludao	2003	2006	2009
-	-	Bohai Shipyard, Huludao	2004	2009	2011
-	-	Bohai Shipyard, Huludao	2006	2011	2013
-	-	Bohai Shipyard, Huludao	2007	2012	2014

Displacement, tons: 8,000
Dimensions, feet (metres), 449.5 x 38.7 x 7.5
 (1370 x 11.8 x 2.3)

Main machinery: Nuclear; 2 PWR; 150 MW; 2 turbines; 1 shaft
Speed, knots: To be announced
Complement: 140

Missiles: SLBM; 12 JL-2 (CSS-NX-5); 3-stage solid-fuel rocket; stellar inertial guidance to over 8,000 km (4,320 n miles); single nuclear warhead of 1 MT or 3-8 MIRV of smaller yield. CEP 300 m approx.

Torpedoes: 6-21 in (533 mm tubes).

Countermeasures: Decoy: ESM.

Radars: Surface search

Sonars: Hull mounted passive/active; flank and towed arrays.

Programmes: The first of class became operational as a submarine in mid-2007 and as a ballistic-missile submarine in about 2009-10, depending on the successful introduction into service of the JL-2 missile. Four further boats are thought to be under construction and are likely to commission at two year intervals. A class of six is expected.

Structure: Likely to be based on the Type 093 SSN design which in turn is believed to be derived from the Russian Victor III design. The dimensions of the hull assume the incorporation of a 30 m 'missile plug' of 12 tubes for the 42 ton JL-2 missiles.

Operational: Likely to be based at Yalong, Hainan Island. While the performance of the missile is speculative, its range may prompt a change in operating concept to a 'bastion' patrol approach. The second of class began sea trials in 2008.

JIN CLASS

12/2006 / 1167755

JIN CLASS
10/2007
1165717

1 XIA CLASS (TYPE 092) (SSBN)

Name	No	Builders	Laid down	Launched	Commissioned
XIA	406	Bohai Shipyard, Huludao	1978	30 Apr 1981	1987

Displacement, tons: 6,500 dived
Dimensions, feet (metres), 393.6 x 33 x 26.2
 (120 x 10 x 8)

Main machinery: Nuclear; turbo-electric; 1 PWR; 90 MW; 1 shaft

Speed, knots: 22 dived
Complement: 140

Missiles: SLBM; 12 JL-1 (CSS-N-3); inertial guidance to 2,150 km (1,160 n miles); warhead single nuclear 250 kT.

Torpedoes: 6-21 in (533 mm) bow tubes. Yu-3 (SET-65E); active/passive homing to 15 km (8.1 n miles) at 40 kt; warhead 205 kg.

Countermeasures: ESM Type 921-A; radar warning

Radars: Surface search Snoop Tray; I-band.

Sonars: Trout Cheek, hull-mounted; active/passive search and attack; medium frequency

Programmes: A second of class was reported launched in 1982 and an unconfirmed report suggests that one of the two was lost in an accident in 1985

Modernisation: Started major update in late 1995 at Huludao, thought to include fitting improved JL-1A missile with increased range but this has not been confirmed

Structure: Diving depth 300 m (985 ft).

Operational: First test launch of the JL-1 missile took place on 30 April 1982 from a submerged pontoon near Huludao (Yellow Sea). Second launched on 12 October 1982, from the Golf class trials submarine. The first firing from Xia was in 1985 and was unsuccessful (delaying final acceptance into service of the submarine) and it was not until 27 September 1988 that a satisfactory launch took place. Based in the North Sea Fleet at Jianggezhuang. Following a refit which completed in late 1998, was reported to be operational as a submarine in 2003 although firing of a JL-1 missile has not been reported and its status as a ballistic-missile submarine is uncertain.

XIA

2002, Ships of the World / 0579138

1 GOLF CLASS (TYPE 031) (SSB)

200

Displacement, tons: 2,350 surfaced; 2,950 dived**Dimensions, feet (metres):** 319.9 × 28.2 × 21.7
(97.5 × 8.6 × 6.6)**Main machinery:** Diesel-electric; 3 Type 37-D diesels;
6,000 hp(m) (4.41 MW); 3 motors; 5,500 hp(m) (4 MW);
3 shafts**Speed, knots:** 17 surfaced; 13 dived**Range, n miles:** 6,000 surfaced at 15 kt**Complement:** 86 (12 officers)**Missiles:** SLBM: 1 JL-2 (CSS-NX-5); 3-stage solid fuel;
stellar inertial guidance to 8,000 km (4,320 n miles);single nuclear warhead of 1 MT or 3-8 MIRV of smaller
yield. CEP 300 m approx.**Torpedoes:** 10-21 in (533 mm) tubes (8 bow, 4 stern).
12 Type Yu-4 (SAET-60); passive homing to 15 km (8.1 n
miles) at 30 kt; warhead 309 kg**Radars:** Navigation: Snoop Plate; I-band**Sonars:** Pike Jaw; hull-mounted; active/passive search;
medium frequency.**Programmes:** Ballistic missile submarine similar but not
identical to the deleted USSR Golf class. Built at Dalian
and launched in September 1966.**Modernisation:** Refitted in 1995 to take the JL-2 missile.**Operational:** This was the trials submarine for the JL-1
ballistic missile which was successfully launched to
1,800 km in October 1982. Continues to be available
as a trials platform for the successor missile JL-2 and
probably conducted a test firing on 12 June 2005. Based
in the North Sea Fleet.

GOLF 200

2002, *Ships of the World* / 0579137

Attack Submarines

Notes. Following the entry into service of two units of the Shang class, it is believed that further attack submarines are under consideration. These are likely to be to a modified evolutionary design, possibly to be known as the Type 095 class.

2 SHANG CLASS (TYPE 093) (SSN)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	Bohai Shipyard, Huludao	1994	24 Dec 2002	Dec 2006
-	-	Bohai Shipyard, Huludao	2000	Dec 2003	June 2007

Displacement, tons: 6,000 dived**Dimensions, feet (metres):** 351 × 36 × 24.6
(107 × 11 × 7.5)**Main machinery:** Nuclear: 2 PWR; 150 MW; 2 turbines; 1 shaft**Speed, knots:** 30 dived**Complement:** 100**Missiles:** SSM: YJ-82 (C-801A); radar active homing to
40 km (22 n miles) at 0.9 Mach, warhead 165 kg.**Torpedoes:** 6-21 in (533 mm) bow tubes; combination of
Yu-3 (SET-65E); active/passive homing to 15 km (8.1 n
miles) at 40 kt; warhead 205 kg and Yu-4; active/passive
homing to 15 km (8.1 n miles) at 30 kt; warhead 309 kg.
Yu-6 wake-homing torpedo may also be carried.**Countermeasures:** Decoys. ESM.**Radars:** Surface search**Sonars:** Hull mounted passive/active; flank and towed
arrays.**Programmes:** Designed in conjunction with Russian
experts. Prefabrication started in late 1994 and the first
launch took place in late 2002. The boats entered service
in 2006 and 2007 respectively.**Structure:** Performance is likely to be similar to the double-
hulled Russian Victor III design.**Operational.** Sea trials of the first of class began in 2005
and of the second boat in 2006. Both based at Yalong,
Hainan Island

SHANG CLASS

6/2007 / 1165715

SHANG CLASS

6/2007 / 1165715

4 HAN CLASS (TYPE 091/091G) (SSN)

No	Builders	Laid down	Launched	Commissioned
402	Bohai Shipyard, Huludao	1974	1977	Jan 1980
403	Bohai Shipyard, Huludao	1980	1983	21 Sep 1984
404	Bohai Shipyard, Huludao	1984	1987	Nov 1988
405	Bohai Shipyard, Huludao	1987	8 Apr 1990	Dec 1990

Displacement, tons: 4,500 surfaced; 5,550 dived
Dimensions, feet (metres): 314.9; 331.4 (404 onwards) x 32.8 x 24.2 (96.0, 101.0 x 10 x 7.4)
Main machinery: Nuclear; turbo-electric; 1 PWR; 90 MW; 1 shaft
Speed, knots: 25 dived, 12 surfaced
Complement: 75

Missiles: SSM: YJ-82 (C-801A); inertial cruise; active radar homing to 40 km (22 n miles) at 0.9 Mach; warhead 165 kg.
Torpedoes: 6-21 in (533 mm) bow tubes; combination of Yu-3 (SET-65E); active/passive homing to 15 km (8.1 n miles) at 40 kt; warhead 205 kg and Yu-4; active/passive homing to 15 km (8.1 n miles) at 36 kt; warhead 309 kg
Mines: 36 in lieu of torpedoes.
Countermeasures: ESM: Type 921-A, radar warning.
Radars: Surface search; Snoop Tray; I-band
Sonars: Trout Cheek; hull-mounted, active/passive search and attack; medium frequency.
 DUUX-5; passive ranging and intercept, low frequency.

Programmes: First of this class delayed by problems with the power plant. Although completed in 1974 she was not fully operational until the 1980s.

Modernisation: The basic Russian ESM equipment was replaced by a French design. A French intercept sonar set has been fitted.

Structure: From 404 onwards the hull has been extended by some 5 m although this was not to accommodate missile tubes as previously reported. SSMs may be fired from the torpedo tubes. Diving depth 300 m (985 ft).

Operational: Three based in North Sea Fleet at Jianggezhuang, one based at the new submarine base

HAN 404

5/1996, Ships of the World / 05062/1

at Yalong, Hainan Island, in 2005. 403 and 404 started mid-life refits in 1998 which completed in early 2000. 405 started mid-life refit in 2000 and was reported completed in 2002. Torpedoes are a combination of older

straight running and more modern Russian homing types. The first of class 401 was reported to have been decommissioned in 2003 and it is expected that others will follow now that the Type 093 has entered service.

HAN 402

1990 / 06067/16

Patrol Submarines

Notes: An unknown number of midget submannes are reported in service

Weapons control: To be announced.
Radars: To be announced
Sonars: Bow-mounted, active/passive search and attack, medium; medium frequency. Flank array; passive search, low frequency.

Programmes: A new class of submarine of which the first of class was launched in May 2004. Production of the second of class was delayed by trials of

the first of class. Series production is expected to proceed.

Structure: The boat appears to be a Chinese indigenous design. Shorter and broader than the Song class, it exhibits some of the features of the Russian Kilo class design including a teardrop-shaped hull with a distinctive 'hump' and large fin. The teardrop shape suggests a pressurised double hull construction. The stern of the boat resembles the Song class; the single shaft has a seven-bladed propeller. The submarine is covered with anechoic tiles. The submarine is believed to incorporate air-independent propulsion using Stirling engine technology.

Operational: Sea trials of the first of class started in 2005.

329	Jiangnan Shipyard, Shanghai	2003	Nov 2004	2006

Displacement, tons: 1,700 surfaced; 2,250 dived

Dimensions, feet (metres): 246 × 24.6 × 17.5
(74.9 × 7.5 × 5.3)

Main machinery: Diesel-electric; 4 MTU 16V 396 SE, 6,092

hpim) (4.48 MW) diesels; 4 alternators; 1 motor; 1 shaft

Speed, knots: 15 surfaced; 22 dived

Complement: 60 (10 officers)

Missiles: SSM: YJ-82 (C-801A); radar active homing to 40 km (22 n miles) at 0.9 Mach; warhead 165 kg

Torpedoes: 6–21 in (533 mm) tubes. Combination of Yu-4 (SAET-50); passive homing to 15 km (8.1 n miles) at 30 kt; warhead 309 kg and Yu-3 (SET-65E); active/passive homing to 15 km (8.1 n miles) at 40 kt; warhead 205 kg. Yu-6 wake-homing torpedoes may also be fitted.

Mines: In lieu of torpedoes.

Countermeasures: ESM Type 921-A; radar warning

Radars: Surface search: I-band.

Sonars: Bow-mounted; passive/active search and attack, medium frequency.

Flank array; passive search; low frequency.

Programmes: First of class (Type 039) started sea trials in August 1995, as a result of which substantial modifications were made. Second of class (Type 039G) trials started in early 2000 and third in early 2001. Fourth commissioned in 2003 while fifth and sixth conducted trials in late 2003. Construction of the seventh hull is understood to have started in 2001 and of the eighth, ninth and tenth hulls in 2002. The twelfth hull is reported to have started construction at Wuhan in 2003. The building programme appears to have been switched to Jiangnan Shipyard, Shanghai, where the eleventh and thirteenth boats were built. Further units of the class are not expected.

Structure: Comparable in size to Ming class but with a single skew propeller and an integrated spherical bow sonar. The forward hydroplanes are mounted below the bridge, which is on a step lower than the part of the fin that contains the masts in earlier boats. The fin is of a different shape (no cutaway) in later boats. Some of the details are speculative and the latest hulls of the class may have benefited from experience gained with the Kilos. The diesel engines are likely to be reverse engineered. Sonars are reported to be of French design.

Displacement, tons: 2,325 surfaced; 3,076 dived
Dimensions, feet (metres): 238.2; 242.1 (Project 636) x 32.5 x 21.7 (72.6; 73.8 x 9.9 x 6.6)
Main machinery: Diesel-electric; 2 diesels; 3,650 hp(m) (2.68 MW); 2 generators; 1 motor; 6,900 hp(m) (4.34 MW); 1 shaft; 2 auxiliary motors; 204 hp(m) (150 kW); 1 economic speed motor; 130 hp(m) (95 kW)
Speed, knots: 17 dived; 10 surfaced
Complement: 52 (13 officers)

Missiles: SLCM. Novator Alfa Klub SS-N-27 (3M-54E1); active radar homing to 180 km (97.2 n miles) at 0.7 Mach (cruise) and 2.5 Mach (attack); warhead 450 kg.

Torpedoes: 6-21 in (533 mm) tubes. 18 torpedoes. Combination of TEST 71/96, wire-guided; active/passive homing to 15 km (8.1 n miles) at 40 kt; warhead 205 kg and 53-65; passive wake homing to 19 km (10.3 n miles) at 45 kt; warhead 300 kg

Mines: 24 in lieu of torpedoes.

Countermeasures: ESM Squid Head or Brick Pulp; radar warning.

Weapons control: MVU-119 EM Murena TFCS

Radars: Surface search. SnoopTray; I-band

Sonars: Shark Teeth; hull-mounted, passive/active search and attack; medium frequency
 Mouse Roar; hull-mounted, active attack; high frequency

Programmes: The first four boats were ordered in mid-1993. The first two are Project 877 hulls built for a former Warsaw Pact country and subsequently cancelled. The first one departed the Baltic in December 1994 and arrived by transporter ship in February 1995. The second was delivered by the same method in November 1995. The third and fourth are of the newer Project 636 design. The first of these two left the Baltic by transporter in November 1997 and arrived in January 1998. The second followed in December 1998 arriving on 1 February 1999. A contract for a further eight 636 or 636M variants armed with SS-N-27 was signed on 3 May 2002. The first of these was originally laid down at Nizhny Novgorod for the Russian Navy, but was never completed due to lack of funding.

She is likely to be the last submarine to have been built at the shipyard. Five of the boats were built by Admiralty Yard, St Petersburg and the remaining two boats at Severodvinsk. The programme was completed in 2006.

Modernisation: The first four submarines are to be refitted in Russian shipyards. Upgrades are likely to include installation of the Klub (3M54) (SS-N-27) anti-ship missile system.

Structure: Latest export version of the elderly Kilo design and has better weapon systems co-ordination and improved accommodation than the earlier ships of the class. Double-hull construction with six watertight compartments. Normal diving depth is 240 m with 300 m available in emergency. At least two torpedo tubes can fire wire-guided weapons. An SA-N-8 SAM launcher may be fitted on top of the fin. Some modifications have been carried out after arrival in China including a possible new ESM

Operational: The first four based at Xiangshan in the East Sea Fleet. Of the remaining eight boats, four are likely to be based in the East Sea Fleet and four in the South Sea Fleet.

352-354

356-363

305-308

310-313

Displacement, tons: 1,584 surfaced; 2,113 dived
Dimensions, feet (metres), 249.3 × 24.9 × 16.7
 (76 × 7.6 × 5.1)

Main machinery: Diesel-electric; 2 diesels, 5,200 hp(m)
 (3.82 MW); 2 shafts

Speed, knots: 15 surfaced; 18 dived; 10 snorkeling

Range, n miles: 8,000 at 8 kt snorkeling; 330 at 4 kt dived

Complement: 57 (10 officers)

Torpedoes: 8-21 in (533 mm) (6 fwd, 2 aft) tubes.
 Combination of Yu-4 (SAET-50); passive homing to 15 km
 (8.7 n miles) at 30 kt; warhead 309 kg, and Yu-1 (53-51) to
 9.2 km (5 n miles) at 39 kt or 3.7 km (2.1 n miles) at 51 kt;
 warhead 400 kg; 16 weapons.

Mines: 32 in lieu of torpedoes.

Raders: Surface search SnoopTray; i-band

Sonars: Pike Jaw; hull-mounted; active/passive search and
 attack, medium frequency
 DUUX 5; passive ranging and intercept; low frequency

Programmes: First three completed between 1971 and
 1979 one of which was scrapped after a fire and another
 (232) has been decommissioned. These were Type
 ES5C/D. Building resumed at Wuhan Shipyard in 1987
 at the rate of one per year to a modified design ES5E.
 The programme was thought to have ended with hull
 number 14 (363) launched in May 1996, but 305 was
 launched in June 1997 followed by 306 in September
 1997, 307 in May 1998, 308 in October 1998, 310 in June
 2000, 311 in September 2000, 312 in May 2001 and 313 in

April 2002. The expected launch of a further boat in 2003
 did not take place and, in view of the 'Kilo' programme,
 this programme has probably been discontinued.

Structure: Diving depth, 300 m (985 ft). Only the later
 models have the DUUX 5 sonar. Hull 20 is reported to
 have a 2 m extension to its machinery space.

Operational: Thirteen are based in the North Sea Fleet at
 Lushun, Qingdao and Xiapingdao. From 305 onwards,
 based in the South Sea Fleet. Some have moved to
 Xiachuandao. Fitted with Magnavox SATNAV. All
 onboard 361 (70 officers and men) killed in an accident
 in April 2003. The cause of the accident is believed to
 have been carbon monoxide poisoning. After repairs
 at Dalian, the submarine became operational again
 in 2004.

Programmes: Procurement of an aircraft carrier capability has been a high priority for the Chinese Navy since the 1990s. Ex-Varyag, the second of the Kuznetsov class (the first of class, Admiral Kuznetsov, remains in service in the Russian Navy) was between 70 and 80 per cent complete by early 1993 when building was terminated after an unsuccessful attempt by the Russian Navy to fund completion. Subsequently the ship was bought by China and, having been towed through the Bosphorus on 2 November 2001, arrived at Dalian in March 2002. Since then, there have been conflicting reports about Chinese plans for the ship but, following its emergence from dock in mid-2005 painted

SHI LANG

2/2008 / 1335660

in military colours, it is likely that it is intended to bring the ship into operational service. Work in 2006 included the apparent application of a non-skid surface to the flight deck and, by mid-2008, the exterior of the ship was looking relatively shipshape. However the overall project appears to be taking longer than expected. A further 2-3 months docking period is probably required to fit shafts and/or propellers. In November 2008, it was reported that Chinese negotiations to acquire an initial batch of 14 Su-33 for training were nearing completion. A further 36 modernised aircraft may be acquired at a later date.

Structure: The hangar is 183 x 29.4 x 7.5 m and can hold up to 18 Flanker aircraft. There are two starboard side lifts,

a ski jump of 14° and angled deck of 7°. There are four arrestor wires. The ship has some 16.5 m of freeboard. Operational: Initial sea trials could start in 2009 after which an extensive period of trials and training is likely to follow. It is unlikely that the ship will begin operational flying training until at the earliest 2010. The ship's (unconfirmed) pennant number suggests that her initial status will be as a training ship. The aircraft inventory is not yet known but is likely to comprise a mixture of Russian-built fixed-wing aircraft and helicopters. The ship's name has also not been confirmed, Admiral Shi Lang was commander-in-chief of the Manchu fleets which conquered Taiwan in 1681.

DESTROYERS

2 LUZHOU CLASS (TYPE 051C) (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
SHENYANG	115	Dalian Shipyard	2002	28 Dec 2004	Oct 2006
SHIJIAZHANG	116	Dalian Shipyard	2003	26 July 2005	Mar 2007

Displacement, tons: 7,000 full load
 Dimensions, feet (metres): 508.5 x 55.8 x 19.7
 (155.0 x 17.0 x 6.0)
 Main machinery: To be announced
 Speed, knots: To be announced
 Complement: To be announced

Missiles: SSM: 8 C-802 (YJ-83) 2 quad ●; active radar homing to 180 km (86 n miles) at 0.9 Mach; warhead 165 kg; sea skimmer.

SAM: 6 (2 forward, 4 aft) SA-N-20 Grumble (Rif-M) ● circular vertical launchers; 8 rounds per launcher; command guidance; semi-active radar homing to 150 km (81 n miles); warhead 90 kg; altitude 27,432 m (90,000 ft). 48 missiles

Guns: 1-3.9 in (100 mm) 56 ●. 25 rds/min to 22 km (12 n miles); weight of shell 15.6 kg.
 2 Type 730 ● 30 mm 7 barrels per mounting; 4,200 rds/min combined to 1.5 km.

A/S mortars: To be announced.

Countermeasures: Decoys: 2-18 tube launchers. 2-10 tube launchers.

Combat data systems: To be announced. SATCOM

Weapons control: Band Stand ●; I-band (datalink for C-802).
 Radars: Air search: Top Plate (Frogat MAE-3) ●, 3D; E-band.
 Air/surface search: Type 364 Seagull C ●; G-band.

SHENYANG

(Scale 1 : 1,200), Ian Sturton / 1164337

Fire control: Tomb Stone (Volna); I/J-band (for Rif-M) ●. Band Stand (Moral ME) ●. I-band (for C-802) Type 344 (MR 34), I-band (for 100 mm) Type 347G(2) (LR 66), I-band (for Type 730)
 Navigation: To be announced
 Sonars: Bow mounted, to be announced

Helicopters: Platform only.

Programmes: The requirement for these ships arose from a need to address AAW deficiencies. It may predate the Luyang programmes and could have been delayed by procurement of the SAM system.

Structure: Design appears to be based on the Type 051B/Luhai DDG but to be less stealthy than the Luyang classes, although the dimensions are similar. Two VLS launchers are installed in the platform in front of the bridge and four in the aft superstructure. The AAW system is controlled by a Tomb Stone (Flap Lid) phased-array radar installed on a structure behind the aft mast. The number of SSMs is limited to eight due to lack of space between the forward funnel and aft mast.

Operational: Both ships conducted sea trials in 2006. Based in the North Sea Fleet.

SHENYANG

1/2008, Ships of the World / 1335655

4 SOVREMENNY CLASS (PROJECT 956E/956EM) (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
HANGZHOU (ex-Vazhny, ex-Yekaterinburg)	136 (ex-698)	North Yard, St Petersburg	4 Nov 1988	23 May 1994	25 Dec 1999
FUZHOU (ex-Alexandr Nevsky)	137	North Yard, St Petersburg	22 Feb 1989	16 Apr 1999	16 Jan 2001
TAIZHOU	138	North Yard, St Petersburg	27 June 2002	27 Apr 2004	28 Dec 2005
NINGBO	139	North Yard, St Petersburg	2003	23 July 2004	28 Sep 2006

Displacement, tons: 7,940 full load
 Dimensions, feet (metres): 611.8 x 56.8 x 21.3
 (156 x 17.3 x 6.5)

Main machinery: 4 KVN boilers; 2 GTZA-874 turbines; 99,500 hp(m) (73.13 MW) sustained; 2 shafts, bow thruster
 Speed, knots: 32. Range, n miles: 2,400 at 32 kt; 4,000 at 14 kt
 Complement: 296 (25 officers) plus 60 spare

Missiles: SSM: 8 Raduga SS-N-22 Sunburn (Moskit 3M-80E) (2 quad) launchers; active/passive radar homing to 160 km (240 in 138, 139) (87 (130) n miles) at 2.5 (4.5 for attack) Mach; warhead 300 kg; sea-skimmer.
 SAM: 2 SA-N-7 Gadfly (Uragan) 9M38M1 Smerch: command/semi-active radar and IR homing to 25 km (13.5 n miles) at 3 Mach; warhead 70 kg; altitude 15-14,020 m (50-46,000 ft), 44 missiles. Multiple channels of fire
 2 CADS-N-1 (Kashtan) (138, 139); each has 30 mm galling combined with 8 SA-N-11 (Grisson) and Hot Flash/Hot Spot radar/optronic director. Laser beam guidance for missiles to 8 km (4.4 n miles); warhead 9 kg; 9,000 rds/min to 1.5 km for guns.

Guns: 4 (2 (138, 139)) 130 mm/56 (2 (1) twin) AK 130; 70 rds/min to 22 km (12 n miles); weight of shell 33.4 kg
 4-30 mm/65 AK 630 (136, 137); 6 barrels per mounting, 3,000 rds/min combined to 2 km.

Torpedoes: 4-21 in (533 mm) (2 twin) tubes.
 A/S mortars: 2 RBU 1000 6-barrelled; range 1,000 m; warhead 55 kg, 120 rockets carried Torpedo countermeasure.

Mines: Mine rails for up to 40.
 Countermeasures: Decoys: 8 PK 10 and 2 PK 2 chaff launchers

ESM/ECM: 4 Foot Ball, 6 Half Cup laser warner
 Weapons control: 1 China optronic director and laser rangefinder; Band Stand; I-band datalink for SS-N-22, Bell Nest, 2 Light Bulb and 2 Tee Pump datalinks.

Radars: Air search: Top Plate (Fregat MAE-31); 3D; E-band Surface search: 3 Palm Frond; I-band.
 Fire control: 6 Front Dome (MR-90); H/I-band (for SA-N-7), Band Stand (Mineral ME); I-band (for SS-N-22); Kite Screech; H/I/K-band (for 130 mm guns); 2 Bass Tilt; H/I-band (for 30 mm guns).

Sonars: Bull Horn (Platina) and Whale Tongue; hull-mounted, active search and attack; medium frequency.

Helicopters: 1 Harbin Zhi-9C Haitun or Kamov Ka-28 Helix.

Programmes: After prolonged negotiations, a contract was signed in September 1996 for two uncompleted Russian Sovremenny class destroyers. These were hulls 18 and 19. Progress was held up for a time because China wanted KA-28 helicopters included, and the Russians demanded extra payment for the aircraft. Delisted Russian units of the class may have been cannibalised

HANGZHOU

(Scale 1 : 1,200), Ian Sturton / 1164870

TAIZHOU

(Scale 1 : 1,200), Ian Sturton / 1164871

FUZHOU

12/2005, Ships of the World / 1163060

for some equipment. A contract for the procurement of two more ships was signed on 3 January 2002. The keel of the first modified Sovremenny class was laid down on 27 June 2002. An option for two further ships is unlikely to be taken up.

Structure: These are the first Chinese warships to have a data system link. The optronic director is probably a Chinese version of Squeeze Box. The second two ships (Project 956EM) are to a modified design which include variations in weapon fit including replacement of the AK 630 system with 'Kashtan' (with associated Cross Dome target indication radar) CWS and a reduction

to one forward AK 130 turret. The flight deck has been extended. Two single-armed launchers for SA-N-7 are retained. An updated SS-N-22 system with 240 km range is also fitted.

Operational: 138 arrived in China on 16 February 2000 and 137 in February 2001. SS-N-22 test fired on 15 September 2001. 138 was delivered on 28 December 2005 and 139 in late 2006. All four ships are based in the East Sea Fleet.

Opinion: The main role of these ships is anti-surface warfare although they also possess a good AAW capability. Together with the new AAW destroyers, they represent a step-change in Chinese naval capabilities.

SOVREMENNY 139

12/2006, Ships of the World / 1166770

SOVREMENNY 139

Displacement, tons: 7,000 full load
Dimensions, feet (metres): 508.5 x 55.8 x 19.7 (165 x 17 x 6)
Main machinery: CODOG; 2 Ukraine DA80 gas turbines, 48,600 hp(m) (35.7 MW); 2 diesels; 8,840 hp(m) (6.5 MW); 2 shafts; cp props
Speed, knots: 29
Range, n miles: 4,500 at 15 kt
Complement: 280 (40 officers)

Missiles: SSM: 16 C-802 (YJ-83/CSS-N-8 Saccade) 4 quad ●; mid-course guidance and active radar homing to 150 km (81 n miles) at 0.9 Mach; warhead 165 kg; sea skimmer.
SAM: SA-N-12 Grizzly (Shtil-1) 9M38M2 ●; command/semi-active radar and IR homing to 35 km (18.9 n miles) at 3 Mach; warhead 70 kg; 2 magazines (forward and aft) 48 missiles.

Guns: 1—3.9 in (100 mm)/56 ●; 25 rds/min to 22 km (12 n miles); weight of shell 15.6 kg.
 2—30 mm Type 730 ●; 7 barrels per mounting; 4,200 rds/min combined to 1.5 km.

Torpedoes: 6—324 mm B 515 (2 triple tubes ●; Yu-2/5/6, active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg

A/S mortars: 4 multiple rocket launchers (possibly multirole) ●

Countermeasures: Decoys: 4—18 tube 100 mm launchers ●. ESM SRW 210A.

ECM: Type 984 (I-band jammer), Type 985 (E/F-band jammer)

Combat data systems: To be announced SATCOM.

Weapons control: Band Stand (Mineral ME) ●; I-band; datalink (for C-803)

Radars: Air search: Top Plate (Fregat MAE-3); 3D, ●; E/F-band

Air/surface search: Type 364 Seagull C ●; G-band
Fire control: 4 Front Dome (Orekh) ●; H/I-band (for SA-N-12).

Band Stand (Mineral ME) ●; I-band (for C-802)

Type 344 (MR 34) ●; I-band (for 100 mm)

2 Type 347G(2) (LR 66); I-band (for Type 730).

Navigation: To be announced.

 Fire control: Type 344 (MR 34) ●; 1 band (for 100 mm). Band Stand ●; I-band (for YJ-62).
 2 Type 347G(2) (LR 66); I-band (for Type 730)
Navigation: To be announced
Sonars: Bow mounted. To be announced

Helicopters: 2 Harbin Zhi-9A Haitun or Kamov KA-28 Helix ●.

Programmes: The second phase of the destroyer construction programme which introduces the long-range HHQ-9 missile system into service.

Structure: Appears to share the same basic hull design as the Type 052B destroyers which in turn are based on the Luhai class. As well as incorporating stealth features, the design includes a taller forward superstructure in which the four phased array antennas are installed. The helicopter hangar is on the port side of the aft superstructure. Details are speculative and firm details of both the SAM and SSM systems are yet to be confirmed. The CIWS systems are on raised platforms forward and on top of the hangar

Operational: Based in the South Sea Fleet.

1 LUHAI CLASS (TYPE 051B) (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
SHENZHEN	167	Dalian Shipyard	July 1996	16 Oct 1997	4 Jan 1999

SHENZHEN

(Scale 1 : 1,200), Ian Sturton / 06/69749

SHENZHEN

12/2007, Hachiro Nakai / 1166774

Programmes: Follow-on from the Luhai class. Although the only ship of its class, it would appear to be the baseline design for the Type 051C destroyers.

Structure: Apart from the second funnel and octuple SSM launchers, there are broad similarities with the smaller

Luhai. Anti-aircraft guns are all mounted aft allowing more space in front of the bridge which seems to show a reloading hatch for HQ-7

Operational: Based at Zhanjiang in South Sea Fleet. Out of area deployment to Europe in 2001.

2 LUHU (TYPE 052) CLASS (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
HARBIN	112	Jiangnan Shipyard, Shanghai	Nov 1990	Oct 1991	July 1994
QINGDAO	113	Jiangnan Shipyard, Shanghai	Jan 1993	Oct 1993	Mar 1996

Displacement, tons: 4,600 full load
Dimensions, feet (metres): 472.4 x 52.5 x 16.7
 (144 x 16 x 5.1)

Main machinery: CODOG 2 GE LM 2500 gas turbines (112), 55,000 hp (41 MW) sustained or 2 Ukraine gas turbines (113) 48,600 hp(m) (35.7 MW), 2 MTU 12V 1163 TB83 diesels; 8,840 hp(m) (6.5 MW) sustained; 2 shafts; cp props

Speed, knots: 31
Range, n miles: 5,000 at 15 kt
Complement: 266 (38 officers)

Missiles: SSM. 16 C-802 (YJ 83/CSS-N-8) Saccade ●; mid-course guidance and active radar homing to 150 km (81 n miles) at 0.9 Mach, warhead 165 kg; sea-skimmer. SAM: 1 HQ-7 (Crotale) octuple launcher ●; CSA-4; line of sight guidance to 13 km (7 n miles) at 2.4 Mach, warhead 14 kg. 32 missiles.

Guns: 2-3.9 in (100 mm)/56 (twin) ●; 25 rds/min to 22 km (12 n miles); weight of shell 15.6 kg. 8-37 mm/63 Type 76A (4 twin) ●; 180 rds/min to 8.5 km (4.6 n miles) anti-aircraft, weight of shell 1.42 kg.

Torpedoes: 6-324 mm Whitehead B515 (2 triple) tubes ● Yu-2 (Mk 48 Mod 1); active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

A/S mortars: 2 FQF 2500 ● 12-tubed fixed launchers; range 1,200 m; warhead 34 kg. 120 rockets.

Countermeasures: Decoys. 2 Type 946; 15 barrelled 100 mm chaff launchers.

ESM Rapids.
 ECM Scimitar.

Combat data systems: Thomson-CSF Tevitic action data automation SATCOM. Link W

Weapons control: 2 GDG-775 optronic directors ●

Radars: Air search: Type 518 (navalised REL-2) ●; D-band. Air/surface search: Type 363S Sea Tiger ●; E/F-band.

Surface search: Type 362 (ESR 1) ●; I-band
 Fire control: Type 344 (MR 34) ●; I-band (for SSM and 100 mm)

2 Type 347G(1) Rice Bowl ●; I-band (for 37 mm).
 Type 345 (MR 35) ●; I/J-band (for HQ-7).

Navigation: Racal Decca 1290; I-band.

Sonars: DUBV-23; Hull-mounted, active search and attack, medium frequency.

DUBV-43 VDS; active attack; medium frequency.

Helicopters: 2 Harbin Zhi-9C Haitun ●

Programmes: Class of two ordered in 1985 but delayed by priority being given to export orders for Thailand

Modernisation: Harbin completed refit in early 2003. Qingdao completed similar refit in 2005. Both fitted with a new low radar profile 100 mm gun turret.

Structure: The most notable features are the SAM launcher, improved radar and fire-control systems and a modern 100 mm gun. Gas turbines for the second of class came from the Ukraine. The HQ-7 launcher is a Chinese copy of Crotale DCN Samaha 110N helo handling system. Harbin has a dome-shaped radome on the superstructure while Qingdao has cylindrical antennae in the same position.

Both are likely to be ECM systems.

Operational: Both based in North Sea Fleet

NANCHANG	163
GUILIN	164

Displacement, tons: 3,250 standard; 3,670 full load
Dimensions, feet (metres): 433.1 x 42 x 15.1
 (132 x 12.8 x 4.6)
Main machinery: 2 or 4 boilers; 2 turbines; 72,000 hp(m)
 (53 MW); 2 shafts
Speed, knots: 32
Range, n miles: 2,970 at 18 kt
Complement: 280 (45 officers)

Missiles: SSM: 6 HY-2 (C-201) (CSS-C-3A Seersucker) (2 triple) launchers ●; active radar or IR homing to 95 km (51 n miles) at 0.9 Mach; warhead 513 kg.
Guns: 4 USSR 5.1 in (130 mm)/58 (2 twin) ●; 20 rds/min to 28 km (15 n miles); weight of shell 33.4 kg.
 8 China 57 mm/70 (4 twin); 120 rds/min to 12 km (6.5 n miles); weight of shell 6.31 kg or 8 China 37 mm/63 (4 twin) ●; 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg.
 8 USSR 25 mm/60 (4 twin) ●; 270 rds/min to 3 km (1.6 n miles) anti-aircraft; weight of shell 0.34 kg
Torpedoes: 6-324 mm Whitehead B515 (2 triple tubes) (fitted in some); Yu-2 (Mk 46 Mod 1); active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg
A/S mortars: 2 FQF 2500 12-tubed fixed launchers ●; 120 rockets, range 1,200 m; warhead 34 kg. Similar in design to the RBU 1200
Depth charges: 2 or 4 BMB projectors; 2 or 4 racks.
Mines: 38
Combat data systems: ZKJ-1 (132)
Radars: Air search: Type 515 Bean Sticks ●; A-band. Type 381 Rice Shield ● (132); 3D, G-band. Similar to Hughes SPS 39A
 Surface search: Type 354 Eye Shield ●, G-band. Type 352 Square Tie (not in all); I-band.
 Navigation: Fin Curve or Racal Decca 1290, I-band.
 Fire control: Wasp Head (also known as Wok Won) or Type 343 Sun Visor B (series 2) ●; I-band. 2 Type 347G Rice Bowl ●; I-band
IFF: High Pole.
Sonars: Pegas 2M and Tamir 2, hull-mounted; active search and attack; high frequency.

Programmes: The first Chinese-designed destroyers of such a capability to be built. First of class completed in 1971. 107 to 108 built at Luda; 131 to 134 at Shanghai and 161 to 164 at Guangzhou. Similar to the doleated USSR Kotlin class. The programme was much retarded after 1971 by drastic cuts in the defence budget. In early 1977 building of series two of this class was put in hand and includes those after 108, with the latest 164 completed in April 1990. The order of completion was 160 (scrapped), 161, 107, 162, 131, 108, 132, 163, 133, 134 and 164.
Modernisation: Equipment varies considerably from ship to ship. The original Type 051 ships are 107, 131, 161 and 162. Type 051D ships are 108, 133, 134, 163 and 164. 132 is a command ship (Type 051Z) fitted with ZKJ-1 command system and Rice Screen (Type 381A) 3-D radar
Structure: Electronics vary in later ships. Some ships have 57 mm guns, others 37 mm. SAM is fitted in *Kaifeng* and *Dalian* in X gun position.
Operational: Capable of foreign deployment, although command and control is limited. Underway refuelling is practised. Basing: 107, 108 n North Sea Fleet, 161-164 in South Sea Fleet and 131-134 in East Sea Fleet. 160 was damaged by an explosion in 1978, and was scrapped. 106 decommissioned on 11 October 2007 and 105 in December 2007.

 Type 343G Sun Visor (109, 110) ●, I-band.
 Type 347G(1) Rice Bowl ●, I-band (for 57/37 mm).
 Type 345 (MR 35) ●, I/J-band (for HQ-7).
IFF: High Pole.
Sonars: DUBV 23 (165, 166); hull-mounted; active search and attack, medium frequency.

Programmes: Updated Luda designs sometimes known collectively as the Luda III class.

Modernisation: 109 redesignated Type 051DT after being fitted with Tavitac, Sea Tiger radar and HQ-7 (Crotale). In 1999, she was further modified to receive 16 C0801A missiles, Type 825 ESM, Type 981 ECM and Type 946 chaff launchers. 110 subsequently modernised with ZKJ-1 command system and an otherwise similar configuration as 109. 165 underwent extensive modernisation 2001-03. Principal enhancements include the replacement of YJ-1 by four quadruple YJ-81 missiles, the installation of an

ZHANJIANG

Displacement, tons: 3,500 standard, 3,900 full load
Dimensions, feet (metres): 433.2 x 52.5 x 16.4 (134.0 x 16.0 x 5.0)
Main machinery: CODAD, 4 SEMT Pielstick 16PA 6V 280 STC, 28,200 hp (20.7 MW); 2 shafts
Speed, knots: 27
Range, n miles: 3,800 at 18 kt
Complement: To be announced

Missiles: SSM: 8 C-802 (YJ-83/CSS-N-8 Saccade) ①; mid-course guidance and active radar homing to 150 km (81 n miles) at 0.9 Mach; warhead 165 kg; sea skimmer.
SAM: HHQ-16 ②. 1 (forward) 32 cell vertical launch system (possible cold launch)
Guns: 1-3 in (76 mm) ③.
 2-30 mm Type 730 ④; 7 barrels per mounting; 4,200 rde/min combined to 1.5 km.
Torpedoes: 6-324 mm B515 (2 triple) tubes, Yu-2/6/7; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg
Countermeasures: Decoys: 2-24 barrelled launchers.
Combat data systems: To be announced
Weapons control: Band Stand (Mineral ME) ⑤; I-band; datalink for C-803

JIANGKAI II

(Scale 1 : 1,200), Ian Sturton / 1335659

Radars: Air search: Top Plate (Fregat MAE-3) ⑥; 3D; E/F-band.
 Air/surface search: Type 364 Seagull C ⑦; G-band.
Fire control: 4 Front Dome (Orekh) ⑧; H/I-band for HHQ-16.
 Band Stand (Mineral ME) ⑤; I-band (for YJ-83).
 Type 344 (MR 34) ⑨; I-band (for 76 mm gun).
 2 Type 347G(2) (LR 66) ⑩; I-band for Type 730.
Navigation: RM 1290, I-band.
Sonars: To be announced.

Helicopters: 1 Harbin Zhi-9A Haitun ⑪.

Programmes: Follow-on ships to the two ships of the Jiangkai I class. The modified design includes a VLS launcher for the SAM system. Under construction at two shipyards, it is likely that this design will be built in sufficient numbers to replace the ageing Jianghu class frigates. The construction of hull 6 at Hudong Shipyard has been delayed by up to a year by the collapse of a crane in 2008.
Operational: Zhoushan and Xuzhou based in East Sea Fleet and Huangshan and ChaoHu in South Sea Fleet.

2/2008, *Ships of the World* / 1335655

4 JIANGWEI I (TYPE 053 H2G) CLASS (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned
ANQING	539	Hudong Shipyard, Shanghai	Nov 1990	July 1991	Dec 1991
HUAINAN	540	Hudong Shipyard, Shanghai	Jan 1991	Oct 1991	July 1992
HUAIBEI	541	Hudong Shipyard, Shanghai	July 1992	Apr 1993	Aug 1993
TONGLING	542	Hudong Shipyard, Shanghai	Dec 1992	Sep 1993	Apr 1994

Displacement, tons: 2,250 full load
Dimensions, feet (metres): 366.5 × 40.7 × 15.7
 (111.7 × 12.4 × 4.8)
Main machinery: 2 Type 18E 390 diesels; 24,000 hp(m)
 (17.65 MW) sustained; 2 shafts
Speed, knots: 27. **Range, n miles:** 4,000 at 18 kt
Complement: 170

Missiles: SSM: 6 YJ-1 (Eagle Strike) (C-801) (CSS-N-4 Sardine) or C-802 (YJ-83) (2 triple) launchers ●; active radar homing to 40 km (22 n miles) or 150 km (81 n miles) (C-802) at 0.9 Mach; warhead 165 kg; sea-skimmer.

SAM: 1 HQ-61 sextuple launcher ●; RF 61 (CSA-N-2); semi-active radar homing to 10 km (5.5 n miles) at 2 Mach. Similar to Sea Sparrow. May be replaced in due course.

Guns: 2 China 3.9 in (100 mm)/56 (twin) ●; 25 rds/min to 22 km (12 n miles); weight of shell 15.6 kg
 8 China 37 mm/63 Type 76A (4 twin) ●; 180 rds/min to 8.5 km (4.6 n miles) anti-aircraft; weight of shell 1.42 kg.

A/S mortars: 2 Type 87 ● 6-tubed launchers.

Countermeasures: Decoys: 2 China Typo 845 26-barrelled chaff launchers ●.

ESM: RWD8, intercept.

ECM: NJ81-3, jammer. Similar to Scimitar.

HUAIBEI

(Scale 1 : 900), Ian Sturton / 0130723

Radars: Air search: Type 517 Knife Rest ●; A-band.
 Air/surface search: Type 360 Seagull S ●; E/F-band.
 Fire control: Type 343 (Wok Won) (Waap Head) ●; I-band (for 100 mm)
 Type 342 (Fog Lamp) ●; I/J-band (for SAM)
 Type 347G(1) Rice Bow ●; I/J band (for 37 mm).
 Navigation: Racal Decca 1290, I-band

Sonars: Echo Type 5; hull-mounted; active search and attack; medium frequency.

Helicopters: 2 Harbin Z-9C (Dauphin) ●

Programmes: Programme started in 1988. First one conducted sea trials in late 1991. Four of the class built before the design moved on to the Jiangwei II

Modernisation: SAM system has been unsatisfactory and may be replaced in due course.

Structure: The sextuple launcher is a multiple launch SAM system using the CSA-N-2 missile.

Operational: All based in the East Sea Fleet at Dinghai

Displacement, tons: 2,250 full load
Dimensions, feet (metres): 366.5 × 40.7 × 15.7
 (111.7 × 12.4 × 4.8)
Main machinery: 2 Type 18E 390 diesels; 24,000 hp(m)
 (17.65 MW) sustained; 2 shafts
Speed, knots: 27
Range, n miles: 4,000 at 18 kt
Complement: 170

Missiles: SSM: 8 YJ-1 (Eagle Strike) (C-801) (CSS-N-4 Sardine) or C-802 (YJ-83) (2 quad) launchers ●; active radar homing to 40 km (22 n miles) or 150 km (81 n miles) (C-802) at 0.9 Mach; warhead 165 kg; sea-skimmer

SAM: 1 HQ-7 (Crotale) octuple launcher ●; CSA-N-4 line of sight guidance to 13 km (7 n miles) at 2.4 Mach; warhead 14 kg

Guns: 2 China 3.9 in (100 mm)/56 (twin) ●; 25 rds/min to 22 km (12 n miles); weight of shell 15.6 kg
 8 China 37 mm/63 Type 76A (4 twin) ●; 180 rds/min to 8.5 km (4.6 n miles) anti-aircraft; weight of shell 1.42 kg.

A/S mortars: 2 RBU 1200 ●; 5-tubed fixed launchers; range 1,200 m; warhead 34 kg.

Countermeasures: Decoys 2 SRBOC Mk 36 6-barrelled chaff launchers ●; 2 China 26-barrelled chaff launchers ●.

ESM: SR-210; intercept

ECM: 981-3 noise jammer. RWD-8 deception jammer.

JIANGWEI II

(Scale 1 : 900), Ian Sturton / 1335658

Combat data systems: ZKJ 3C, SATCOM.

Weapons control: JM 83H optronic director

Radars: Air search: Type 517 Knife Rest ●; A-band

Air/surface search: Type 360 Seagull S ●; E/F-band.

Fire control: Type 343G (Wok Won), Type 344 (MR 34) (527, 528) ●; I-band (for SSM and 100 mm).

Type 345 (MR 35) ●; I/J-band (for HQ-7).

Type 347G(1) Rice Bowl ●; I/J-band (for 37 mm).

Navigation: 2 RM-1290; I-band

Sonars: Echo Type 5; hull-mounted; active search and attack; medium frequency.

Helicopters: 2 Harbin Z-9C (Dauphin) ●

Programmes: Follow-on to the Jiangwei class, building some four years later. The building programme appeared to have been terminated after eight ships but reports indicate that two further ships are under construction. Further units are possible.

Structure: An improved SAM system, updated fire-control radars and a redistribution of the after anti-aircraft guns are the obvious differences from the original Jiangwei. New Type 99 turret fitted in 522 and to be retro-fitted to the remainder of the class.

Operational: Basing 521-524 and 527-528 in East Sea Fleet; 564-567 in South Sea Fleet

Sales: Four under construction for Pakistan

Displacement, tons: 1,425 standard; 1,702 full load

Dimensions, feet (metres): 338.5 × 35.4 × 10.2
(103.2 × 10.8 × 3.1)

Main machinery: 2 Type 12E 390V diesels; 14,400 hp (m) (10.6 MW) sustained; 2 shafts

Speed, knots: 26

Range, n miles: 4,000 at 15 kt; 2,700 at 18 kt

Complement: 200 (30 officers)

Missiles: SSM: 4 HY-2 (C-201) (CSSC-3 Seersucker) (2 twin launchers ●; active radar or IR homing to 80 km (43.2 n miles) at 0.9 Mach; warhead 513 kg.

Guns: 2 or 4 China 3.9 in (100 mm)/58 (2 single ● or 2 twin ●), 25 rds/min to 22 km (12 n miles); weight of shell 15.6 kg.

12 China 37 mm/63 (6 twin ●) (8 (4 twin), in some); 180 rds/min to 8.5 km (4.6 n miles) anti-aircraft; weight of shell 1.42 kg.

A/S mortars: 2 RBU 1200 5-tubed fixed launchers (4 in some) ●; range 1,200 m; warhead 34 kg.

Depth charges: 2 BMB-2 projectors; 2 racks (in some).

Mines: Can carry up to 60

Countermeasures: Decoys: 2 RBOC Mk 33 6-barrelled chaff launchers or 2 China 26-barrelled launchers.

ESM: Jug Pair or Watchdog; radar warning.

Weapons control: Wok Won director (in some) ●.

Radars: Air search Type 517 Knife Rest ●; A-band.

Air/surface search: Type 354 Eye Shield (MX 902) ●; G-band

Type (unknown) ●; I-band.

Surface search/fire control: Type 352 Square Tie ●, I band.

Navigation: Don 2 or Fin Curve or Rascal Decca, I band

Fire control: Type 347G Rice Bowl (in some) ●, I/J-band

Type 343 (Wok Won) (Wasp Head) (in some) ●, I-band.

IFF: High Pole A, Yard Reko or Square Head

Sonars: Echo Type 5; hull-mounted; active search and attack; medium frequency.

Programmes: Pennant numbers changed in 1979. All built in Shanghai starting in the mid-1970s at the Hudong, Jiangnan and Huangpu shipyards. Ships were completed in the following order: 515, 516, 517, 511, 512, 513, 514, 518, 519, 520, 551, 552, 533, 534, two for Egypt, 543, 553, 554, 555, 545, 556 (to Bangladesh), 557, 544, 558, 560, 561, 559, 562 and 563. The last of class 563 completed in February 1996. Reports that construction had restarted in 1997 were incorrect.

Modernisation: Equipment varies considerably from ship to ship. The Type 053H ships are 511-519 and 551 and 552. These are equipped with SY-1 or SY-2 SSM, single 100 mm guns and SJD-3 sonar. Type 053H1 ships are 533, 534, 543, 553, 554, 555 and 557. These are similar to Type 053H but are equipped with twin 100 mm guns and SJD-5 (Echo 5) sonar. Type 053H1G ships are 558-563. These are similar to Type 053H1 but are equipped with 37 mm enclosed gun mounts. A larger bridge structure suggests a possible CIC compartment. The designation of the Air/Surface search radar in Type 053H1G is not yet known but it bears similarities to the I-band MR-36A which has been promoted as a replacement for Type 352 'Square Tie'. 516 appears to have been modified for a shore bombardment role having been fitted with a new twin 100 mm mounting and seven 122 mm MLRs. 559 may also be similarly converted. 509 and 510 have been converted to a Coast Guard role.

Structure: All of the class have the same hull dimensions. Previously reported Type numbers have been superseded by the following designations:

Type I has at least five versions. Version 1 has an oval funnel and square bridge wings; version 2 a square funnel with bevelled bridge face; version 3 an octagonal

ZHENJIANG (TYPE 053H)

HUAYIN (TYPE 053H)

12/2007, Chris Sattler / 1170059

funnel; version 4 reverts back to the oval funnel and version 5 has a distinctive fluting arrangement with cowls on the funnel, as well as gunhouses on the 37 mm guns. Some have bow bulwarks.

Type II. See separate entry.

Types III and IV. See separate entry.

Operational: 520 paid off in 1993. Basing: 511-519, 543 and 545 in North Sea Fleet, 533-534 in East Sea Fleet and 551, 555 and 557-563 in the South Sea Fleet.

Sales: Two have been transferred to Egypt, one in September 1984, the other in March 1985, and one, *Xiangtan* 556, to Bangladesh in November 1985.

Radars: Air search: Type 517 Knife Rest ●; A-band.
 Air/surface search: Type 354 Eye Shield (MX 902) ●; G-band.

Surface search/fire control: Type 352 Square Tie ●; I-band.

Navigation: Fin Curve; I-band.

Fire control: Type 347G Rica Bowl ●; I/J-band.

Type 343G (Wok Won) (Wasp Head) ●; I-band.

IFF: High Pole A. Square Head.

Sonars: Echo Type 5; hull-mounted; active search and attack; medium frequency.

Programmes: These ships are Jianghu hulls 27, 28 and 30 and are referred to as New Missile Frigates.

Built at Hudong, Shanghai. *Huangshi* commissioned 14 December 1986, *Wuhu* in 1987, and *Cangzhou* completed in 1989. They were the first Chinese warships to be equipped with a computerised combat system.

Structure: The main deck is higher in the midships section and the lower part of the mast is solid. The arrangement of the launchers is side by side, as opposed to the staggered pairings in the first two ships. These were the first all-enclosed, air conditioned ships built in China.

Operational: Based in East Sea Fleet at Dinghai.

Sales: Four modified Type III to Thailand in 1991-92.

SIPING (Scale 1 : 900), Ian Sturton / 057239/

SIPING 6/2003 / 0569166

Programmes: Built as a standard Jianghu I and then converted, probably as a helicopter trials ship for the Luhu and Jiangwei classes, before being commissioned.
Structure: The after part of the ship has been rebuilt to take a hangar and flight deck for a single helicopter. Alcatel

'Safecooper' landing aid. This ship also has a French 100 mm gun and optronic director, and Italian triple torpedo tubes mounted on the quarterdeck.
Operational: Based in North Sea Fleet at Guzhou Bay. Acts as a training ship for Dalian Naval Academy

SHIPBORNE AIRCRAFT

Notes: It has been reported that negotiations are in progress to procure up to 50 Sukhoi Su-33 Flanker D naval fighters from Russia. A derivative of the Sukhoi Su-27, Su-33s can operate from aircraft carriers, using a ski-jump for launch, and are capable of in-flight refuelling. In November 2008, it was reported that acquisition of an initial batch of 14 aircraft, to be used in a training role, was nearing completion. A further 36 modernised aircraft are likely to follow

Numbers/Type: 15 Changhe Z-8 Super Frelon.
Operational speed: 134 kt (248 km/h).
Service ceiling: 10,000 ft (3,100 m).
Range: 440 n miles (815 km).
Role/Weapon systems: ASW helicopter; Eight SA 321G delivered from France in 1977 but supplemented by 12 locally built Zhi-8, of which the first operational aircraft was delivered in late 1991 Thomson Sintra HS-12 in four SA 321Gs for SSBN escort role
Sensors: HS-12 dipping sonar and processor, some have French-built search radar.
Weapons: ASW; Whitehead A244 or Yu-2 (Mk 46 Mod 1) torpedo. ASV; C-802K ASM

Z-8 9/2002, Paul Jackson / 0525833

Numbers/Type: 11 Hai Z-9C Hartun (Panther).
Operational speed: 140 kt (260 km/h).
Service ceiling: 15,000 ft (4,575 m).
Range: 410 n miles (758 km).
Role/Weapon systems: Eurocopter AS 365 Panther 2 aircraft built under licence. All delivered by about 2000. An anti-ship missile variant, Z-9D, was rolled out in mid-2008. The missile is believed to be the 4-15 km range TL-10, similar to the Iranian Kosar
Sensors: Thomson-CSF Agrion; HS-12 dipping sonar; Crouzet MAD. **Weapons:** ASV; Whitehead A244 torpedoes or Yu-2 (Mk 46 Mod 1).

Z-9C 12/2007, Hachiro Nakai / 1166/13

Numbers/Type: 6/4 Kamov Ka 28PL/28PS Helix A.
Operational speed: 135 kt (250 km/h).
Service ceiling: 19,685 ft (6,000 m).
Range: 432 n miles (800 km).
Role/Weapon systems: First pair are (Ka 28PL) ASW helicopters acquired in 1997 for evaluation. Four more ASW versions and four (Ka 28PS) for SAR delivered in late 1999. **Sensors:** Splash Drop radar; VGS-3 dipping sonar; MAD; ESM. **Weapons:** three torpedoes or depth bombs or mines

Ka-28 6/2004 / 1042165

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: In addition to those listed there are about 170 training and transport aircraft.

Numbers/Type: 2 KJ-2000 AWACS
Operational speed: 425 kt (785 km/h).
Service ceiling: 34,440 ft (10,500 m).
Range: 2,753 n miles (5,100 km).
Role/Weapon systems: Airborne Warning And Control System (AWACS) aircraft based on the Russian-made A-50 (Mainstay) airframe which itself is based on the Ilyushin Il-76 transport aircraft. The non-rotating radome houses three Chinese-made (ESA) phased array antennas in a triangular configuration. A SATCOM antenna may be installed inside a fairing on top of forward cabin. At least three further prototypes have been built since 2002 and are undergoing tests at China Flight Test Establishment (CFTE) in Yanliang, Shaanxi Province and Nanjing, Jiangsu Province where the main contractor for the radar system, Nanjing Research Institute of Electronic Technology (also known as 14 Institute), is based

KJ-2000 8/2005, Jane's / 1046316

Numbers/Type: 24 Sukhoi Su-30 MK 2 Flanker.
Operational speed: 1,345 kt (2,500 km/h).
Service ceiling: 59,000 ft (18,000 m).
Range: 2,160 n miles (4,000 km).
Role/Weapon systems: 24 delivered in 2004. The air force operates at least 150 of the similar Su-27 which also might be used for fleet air-defence. Sensors: Doppler radar
Weapons: One 30 mm cannon; 10 AAMs. Kh-35 anti-ship missiles may be fitted to some aircraft in due course

Su-27 5/2003 / D114638

Numbers/Type: 54 XAC JH-7.
Operational speed: 853 kt (1,210 km/h).
Service ceiling: 51,180 ft (15,600 m).
Range: 891 n miles (1,650 km).
Role/Weapon systems: All-weather dual seat 'Flounder' type attack fighter first delivered in 1998. A second batch of 18 JH-7A was delivered in 2004. Sensors: Letri JL-10A Shenyang pulse Doppler fire-control radar capable of tracking four targets to 29 n miles (54 km) in look-down mode simultaneously. **Weapons:** AAM; PL-5b, PL-7 and 23 mm gun. ASM, Two C-801 or C-802 anti-ship missiles, C-701 anti-ship missile and 500 kg LGBs. AS-17 (Kh-31) may be fitted in due course

JH-7 5/2003 / D114841

Numbers/Type: 4 Harbin SH-5.
Operational speed: 243 kt (450 km/h).
Service ceiling: 23,000 ft (7,000 m).
Range: 2,563 n miles (4,750 km).
Role/Weapon systems: Multipurpose amphibian introduced into service in 1986. Final total of about 20 planned with ASW and avionics upgrade. Sensors: Doppler radar; MAD; sonobuoys. **Weapons:** ASV; four C 101, two gun turret, bombs. ASW; Yu-2 (Mk 46 Mod 1) torpedoes, mines, depth bombs.

SH-5 9/2007 / 1335686

Numbers/Type: 4 SACY-8X (Cub).
Operational speed: 351 kt (650 km/h).
Service ceiling: 34,120 ft (10,400 m).
Range: 3,020 n miles (5,600 km).
Role/Weapon systems: Maritime patrol version of An-12 Cub transport; first flown 1985. There are reported to be two Y-8J variants equipped with Searchwater radar in a dropped nose radome. In addition there are two Y-8DZ Elint variants in service. Sensors: Litton APSQ-504(V)3 search radar in undernose radome. Two Litton LTN 72R INS and Omega/Loran. **Weapons:** No weapons carried.

Y-8X 7/1997 / D012195

Numbers/Type: 30 Harbin H-5 (Il-28 Boeagle).
Operational speed: 487 kt (902 km/h).
Service ceiling: 40,350 ft (12,300 m).
Range: 1,175 n miles (2,180 km).
Role/Weapon systems: Overwater strike aircraft with ASW/ASVW roles. Numbers are doubtful as some have been phased out and others moved into second line roles such as target towing and ECM training. **Weapons:** ASW; two torpedoes or four depth bombs. ASVW; one torpedo + mines. Standard; four 23 mm cannon.

H-5 (Romanian colours) 2002, Lindsay Peacock / 0524583

Numbers/Type: 70/20/20 SAC J-8-I Finback A/SAC J-8-II Finback B/SAC J-8-IV Finback D.
Operational speed: 701 kt (1,300 km/h).
Service ceiling: 65,620 ft (20,000 m).
Range: 1,187 n miles (2,200 km).
Role/Weapon systems: Dual role, all-weather fighter introduced into service in 1990 and production continues. There are at least 170 more in service with the Air Force. **Weapons:** 23 mm twin-barrel cannon; PL-27 AAM; ASM. PL-2 has some ASM capability.

Numbers/Type: 35 Nanchang Q-5 (Fantan-A).
Operational speed: 643 kt (1,190 km/h).
Service ceiling: 52,500 ft (16,000 m).
Range: 650 n miles (1,188 km).
Role/Weapon systems: Strike aircraft developed from Shenyang J-6; operated in the beachhead and coastal shipping attack role. A-5M version adapted to carry two torpedoes or C-801 ASM. **Weapons:** Two 23 mm cannon, two cluster bombs, one or two air-to-air missiles. Capable of carrying 1 ton warload.

FANTAN-A 6/2002, Ships of the World / 0554726

Numbers/Type: 30/11 XAC H-6D/XAC H-6X (Tu-16 Badger).
Operational speed: 535 kt (992 km/h).
Service ceiling: 40,350 ft (12,300 m).
Range: 2,605 n miles (4,800 km).
Role/Weapon systems: Three regiments of H-6D bomber and maritime reconnaissance aircraft. Some converted as tankers. H-6s now believed to be out of service and deliveries of new version H-6X, armed with ASM, have begun. Sensors: Search/attack radar; ECM. **Weapons:** ASV; two underwing anti-shiping missiles of local manufacture, including C-801. Up to five 23 mm cannon; bombs.

H-6X 6/2004 / 1042161

Numbers/Type: 69 CAC J-7.
Operational speed: 1,175 kt (2,175 km/h).
Service ceiling: 61,680 ft (18,800 m).
Range: 804 n miles (1,490 km).
Role/Weapon systems: Land-based Fleet air defence fighter with limited strike role against enemy shipping or beachhead. There are some 40 J-7B and 28 J-7E. Sensors: Search attack radar, some ECM. **Weapons:** ASV; 500 kg bombs or 36 rockets. Standard; two 30 mm cannon. AD; two 'Atoll' AAMs.

J-7E 6/2002, Ships of the World / 0554726

PATROL FORCES

Notes: (1) Many patrol craft carry the HN-5 shoulder-launched Chinese version of the SA-N-5 SAM
 (2) More Patrol Craft are listed under Paramilitary vessels at the end of the Chinese section.

**60 + 5 HOUBEI (TYPE 022) CLASS
 (FAST ATTACK CRAFT—MISSILE) (PGGF)**

2208-2211 +56

Displacement, tons: 220 full load
Dimensions, feet (metres): 139.7 x 40.0 x 4.9 (42.6 x 12.2 x 1.5)
Main machinery: 2 diesels; 6,865 hp (5.1 MW); 4 waterjet propulsors
Speed, knots: 36
Complement: 12

Missiles: 8 C-802 (YJ-83/CSS-N-8) Saccade; mid-course guidance and active radar homing to 150 km (81 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
Guns: 1—30 mm/65 AK 630; 6 barrels; 3,000 rds/min combined to 2 km; 12 missiles.
Weapons control: Optronic director
Radars: Surface search, Type 348 (LR 66); I-band.
Navigation: I-band

Comment: A new fast attack craft, the first of which was launched at Qiuxin Shipyard, Shanghai in April 2004. The design is believed to be based on a 42 m hull developed by AMD Marine Consulting, Sydney. This was further progressed by its joint venture company in Guangzhou, Sea Bus International (SBI), into a patrol boat configuration which was selected by the Chinese Navy after a five-year investigation into various platform contenders. The craft has a wave-piercing catamaran hull form and a centre bow. Likely to be of aluminium alloy construction, the design clearly incorporates RCS reduction measures. Following extensive first of class trials, full production was reported to have taken place in at least six shipyards. Although production slowed in 2008, up to 100 craft are required to replace the ageing patrol boat inventory. Dimensions are based on the original AMD design. The installation of C-802 missiles suggests that there may be a datalink to facilitate over-the-horizon targeting. The craft are based in all three fleets and are likely to use a sector-defence concept.

HOUBEI 1/2008* / 1335685

HOUBEI 12/2007, Chris Sattler / 1335684

HOUBEI CLASS 6/2007 / 1165856

**16 HOUXIN (TYPE 037/1G) CLASS
 (FAST ATTACK CRAFT—MISSILE) (PTG)**

751-760 764-769

Displacement, tons: 478 full load
Dimensions, feet (metres): 203.4 x 23.6 x 7.5 (62.8 x 7.2 x 2.4)
Main machinery: 4 China PR 230ZC diesels; 4,000 hp(m) (2.94 MW); 4 shafts
Speed, knots: 28
Range, n miles: 750 at 18 kt
Complement: 71

Missiles, SSM: 4YJ-1 (Eagle Strike) (C-801) (CSS-N-4 Sardine) (2 twin); active radar homing to 40 km (22 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer. C-802 in due course.
Guns: 4—37 mm/63 (Type 76A) (2 twin); 180 rds/min to 8.5 km (4.6 n miles) anti-aircraft; weight of shell 1.42 kg
 4—14.5 mm (Type 69) (2 twin); 600 rds/min to 7 km (3.8 n miles)
Countermeasures: ESM/ECM; Intercept and jammer.
Radars: Surface search, Type 352 (Square Tiel); I-band.
Fire control: Type 341 (Rice Lamp); I-band.
Navigation: Anritsu Type 723; I-band

Programmes: First seen in 1991 and built at the rate of up to three per year at Qiuxin and Huangpu Shipyards to replace the Houku class and for export. Building may have stopped in mid-1999.
Structure: This is a missile armed version of the Hainan class. There are some variations in the bridge superstructure in later ships of the class.
Operational: Split between the East and South Sea Fleets.
Sales: Two to Burma in December 1995, two in July 1996 and two in late 1997

HOUXIN 758 3/2003, Bob Flides / 0569154

HOUXIN 765 5/2004 / 1042140

3 HAIJIU (TYPE 037/1) CLASS (LARGE PATROL CRAFT) (PC)

688 689 697

Displacement, tons: 490 full load
Dimensions, feet (metres): 210 x 23.6 x 7.2 (64 x 7.2 x 2.2)
Main machinery: 4 diesels, 8,800 hp(m) (6.47 MW); 4 shafts
Speed, knots: 28
Range, n miles: 750 at 18 kt
Complement: 72

Guns: 4 China 57 mm/70 (2 twin); 120 rds/min to 12 km (6.5 n miles); weight of shell 6.31 kg
 2 USSR 30 mm/65 (1 twin); 500 rds/min to 5 km (2.7 n miles) anti-aircraft; weight of shell 0.54 kg
A/S mortars: 4 RBU 1200 5-tubed fixed launchers; range 1,200 m; warhead 34 kg
Depth charges: 2 rails.
Radars: Surface search; Pot Head, I-band.
Fire control: Round Ball; I-band.
Sonars: Stag Ear or Thomson Sintra SS 12 (688, 693)

Comment: A lengthened version of the Hainan class probably used as a prototype for the Houxin class. Based in East Sea Fleet. One other has been scrapped.

HAIJIU 688 6/2008* / 1335706

6 HOUJIAN (OR HUANG) (TYPE 037/2) CLASS (FAST ATTACK CRAFT—MISSILE) (PTG)

Name	No	Builders	Launched	Commissioned
YANGJIANG	770	Huangpu Shipyard	Jan 1991	May 1991
SHUNDE	771	Huangpu Shipyard	July 1994	Feb 1995
NANHAI	772	Huangpu Shipyard	Feb 1995	Apr 1995
PANYU	773	Huangpu Shipyard	May 1995	July 1995
LIANJIANG	774	Huangpu Shipyard	Sep 1998	Feb 1999
XINHUI	775	Huangpu Shipyard	Apr 1999	Nov 1999

Displacement, tons: 520 standard
Dimensions, feet (metres): 214.6 × 27.6 × 7.9 (65.4 × 8.4 × 2.4)
Main machinery: 3 SEMT-Pielstick 12 PA6 280 diesels, 15,840 hp(m) (11.7 MW) sustained, 3 shafts
Speed, knots: 32
Range, n miles: 1,800 at 18 kt
Complement: 75

Missiles: SSM. 6 YJ-1 (Eagle Strike) (C-801) (CSS-N-4 Sardine) (2 triple); inertial cruise; active radar homing to 40 km (22 n miles) at 0.9 Mach; warhead 185 kg or C-802 (CSS-N-8 Saccade); range 120 km (66 n miles).
Guns: 2—37 mm/63 (twin) Type 76A; 180 rds/min to 8.5 km (4.6 n miles) anti-aircraft; weight of shell 1.42 kg
 4—30 mm/65 (2 twin) Type 69, 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg
Countermeasures: Decoys: 2 Type 945G 26-barrelled launcher
ESM Type 928 intercept
Weapons control: Type JM-83 optronic director.
Radars: Surface search Type 348 (MR 36); I-band.
Fire control: Type 347G Rice Bowl; I-band.
Navigation: Type 765; I-band.

Programmes: First of class laid down in 1989 and built in a very short time. Sometimes called the Huang class.

Modernisation: Some may be fitted with Type 363 search radar and Type 344 (MR 34) fire-control radar rather than Type 347G.

Operational: Based in South Sea Fleet at Hong Kong from mid-1997. One possibly sunk in late 1997. *Lianjiang* severely damaged in a collision with a freighter on 26 June 2006 but was later repaired at Guangdong Shipyard in 2008.

SHUNDE

6/2007 / 1168848

93 HAINAN (TYPE 037) CLASS (FAST ATTACK CRAFT—PATROL) (PC)

275–285, 290, 302, 305, 609–610, 618–622, 626–629, 638–643, 646–650, 657–681, 683–687, 689–692, 695–699, 701, 707, 723–733, 740–742

Displacement, tons: 375 standard, 392 full load
Dimensions, feet (metres): 192.8 × 23.8 × 7.2 (58.8 × 7.2 × 2.2)
Main machinery: 4 PCR/Kolomna Type 9-D-8 diesels; 4,000 hp(m) (2.94 MW) sustained; 4 shafts
Speed, knots: 30.5
Range, n miles: 1,300 at 15 kt
Complement: 78

Missiles: Can be fitted with 4 YJ-1 launchers in lieu of the after 57 mm gun.
Guns: 4 China 57 mm/70 (2 twin); 120 rds/min to 12 km (6.5 n miles); weight of shell 6.31 kg.
 4 USSR 25 mm/60 (2 twin); 270 rds/min to 3 km (1.6 n miles) anti-aircraft; weight of shell 0.34 kg.
A/S mortars: 4 RBU 1200 5-tubed fixed launchers; range 1,200 m; warhead 34 kg.
Depth charges: 2 BMB-2 projectors; 2 racks 18 DCs.
Mines: Raas fitted for 12.
Radars: Surface search: Pot Head or Skin Head; E/F-band
IFF: High Pole.
Sonars: Stag Ear; hull-mounted, active search and attack; high frequency Thomson Sintra SS 12 (in some); VDS.

Programmes: A larger Chinese-built version of the former Soviet SO 1. Low freeboard. Programme started 1983–84 and continued with new hulls replacing the first ships of the class. There are at least six variants with minor differences.

Structure: Later ships have a tripod or solid foremast in place of a pole and a short stub mainmast. Two trials SS 12 sonars fitted in 1987.

Operational: Divided between the three Fleets
Sales: Two to Bangladesh, one in 1982 and one in 1985, eight to Egypt in 1983–84; six to North Korea 1975–78; four to Pakistan, two in 1976 and two in 1980; six to Burma in 1991 and four in 1993

HAINAN 686

10/2008*, Chris Settler / 1335982

HAINAN 686

10/2006, E & M Laursen / 1164869

11 HUANGFEN (TYPE 021) (OSA I TYPE) (FAST ATTACK CRAFT—MISSILE) (PTGF)

3113–3114 3130–3131 6106–6107 6119–6120 6122–6123 7119

Displacement, tons: 171 standard, 205 full load
Dimensions, feet (metres): 126.6 × 24.9 × 8.9 (38.6 × 7.6 × 2.7)
Main machinery: 3 Type 42-160 diesels; 12,000 hp(m) (8.8 MW) sustained; 3 shafts
Speed, knots: 35
Range, n miles: 800 at 30 kt
Complement: 28

Missiles: SSM: 4 HY-2 (CSS-N-3 Seersucker) (2 twin) launchers; active radar or IR homing to 80 km (43.2 n miles) at 0.9 Mach; warhead 513 kg.
Guns: 4 USSR 25 mm/60 (2 twin); 270 rds/min to 3 km (1.6 n miles) anti-aircraft.
 Replaced in some by 4 USSR 30 mm/65 (2 twin) AK 230.
Radars: Surface search: Square Tie; I-band.
Fire control: Round Ball or Rice Lamp, H/I-band.
IFF: 2 Square Head; High Pole A.

Programmes: First reported in 1985
Operational: China credits this class with a speed of 39 kt. Split between the Fleets. Numbers continue to be reduced.

Sales: Four to North Korea, 1980; four to Pakistan, 1984, four to Bangladesh, 1988, and one more in 1992. Three of a variant were transferred to Yemen in June 1995, delivery having been delayed by the Yemen civil war. A variant called the Houdong class has been built for Iran. Five delivered to Iran in September 1994, five more in March 1996.

HUANGFEN 6120

3/2002, Ships of the World / 0529118

25 HAIQING (TYPE 037/1S) CLASS (FAST ATTACK CRAFT—PATROL) (PC)

710–717 743–744 761–763 786–797

Displacement, tons: 478 full load
Dimensions, feet (metres): 206 × 23.8 × 7.9 (62.8 × 7.2 × 2.4)
Main machinery: 4 Chinese PR 230ZC diesels; 4,000 hp(m) (2.94 MW) sustained; 4 shafts
Speed, knots: 28
Range, n miles: 1,300 at 15 kt
Complement: 71
Guns: 4 China 37 mm/63 (2 twin) Type 76, 4 China 14.5 mm (2 twin) Type 69.
A/S mortars: 2 Type 87 6-tubed launchers.
Radars: Surface search Anritsu RA 723; I-band.
Sonars: Hull mounted; active search and attack; medium frequency Thomson Sintra SS 12; VDS

Programmes: Starting building at Qiuxin Shipyard in 1992 and replaced the Hainan class programme. First one completed in November 1993. Production continued at Qingdao, Chongqing and Huangpu as well as Qiuxin.

Structure: Based on the Hainan class, but the large A/S mortars suggest a predominantly ASW role, and this may explain the rapid building rate.

Operational: In service in all three Fleets. Some pennant numbers may have changed
Sales: One to Sri Lanka in December 1995.

HAIQING 743

6/2008* / 1335705

**25 HAIZHUI/SHANGHAI III (TYPE 062/1) CLASS
(COASTAL PATROL CRAFT) (PC)**

1201-1208 1236 1239-1240 2326-2329 4339-4348

Displacement, tons: 170 full load
Dimensions, feet (metres): 134.5 x 17.4 x 5.9 (41 x 5.3 x 1.8)
Main machinery: 4 Chinese L12-180A diesels; 4,400 hp(m) (3.22 MW) sustained; 4 shafts
Speed, knots: 26. **Range, n miles:** 750 at 17 kt
Complement: 43

Guns: 4 China 37 mm/63 (2 twin); 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg.
 4 China 14.5 mm (2 twin) Type 69 or 4 China 25 mm (2 twin).
Radars: Surface search Pot Head or Anritsu 726; I-band.
Sonars: Stag Ear; hull-mounted; active search; high frequency (in some)

Programmes: First seen in 1992 and built for Chinese use and for export. Sometimes referred to as Shanghai III class when not fitted with ASW equipment.
Structure: Lengthened Shanghai II hull. Inclined pole mast and a pronounced step at the back of the bridge superstructure are recognition features. Much reduced top speed. Some may be equipped with RBU 1200 launchers in place of other armament.
Operational: Based in the North and East Sea Fleets.
Sales: Three of a variant to Tunisia in 1994, three to Sri Lanka in August 1995, three more in May 1996 and three more in August 1998. One to Bangladesh in mid-1996. One to Sierra Leone in 1997

HAIZHUI 1208 10/2005, Flor Van Otterdyk / 1164395

HAIZHUI 1202 3/2007 / 1166862

**35 SHANGHAI II (TYPE 062) CLASS
(FAST ATTACK CRAFT—GUN) (PC)**

Displacement, tons: 113 standard; 134 full load
Dimensions, feet (metres): 127.3 x 17.7 x 5.6 (38.8 x 5.4 x 1.7)
Main machinery: 2 Type L-12V-180 diesels; 2,400 hp(m) (1.76 MW) (forward); 2 Type 12-D-5 diesels; 1,820 hp(m) (1.34 MW) (aft); 4 shafts
Speed, knots: 30. **Range, n miles:** 700 at 16.5 kt on 1 engine
Complement: 38

Guns: 4 China 37 mm/63 (2 twin); 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg.
 4 USSR 25 mm/60 (2 twin); 270 rds/min to 3 km (1.6 n miles) anti-aircraft; weight of shell 0.34 kg
 Some are fitted with a twin 57 mm/70, some have a twin 75 mm Type 56 recoilless rifle mounted forward and some have a twin 14.5 mm MG
Depth charges: 2 projectors; 8 weapons.
Mines. Mine rails can be fitted for 10 mines.
Radars: Surface search: Skin Head; E/F-band or Pot Head; I-band.
IFF: High Pole.
Sonars: Hull-mounted active sonar or VDS in some.

Programmes: Construction began in 1961 and continued at Shanghai and other yards at rate of about 10 a year for 30 years before being replaced by the Type 062/1G Haizhui class.
Structure: The five versions of this class vary slightly in the outline of their bridges. A few of the class have been reported as fitted with RBU 1200 anti-submarine mortars.
Operational: Evenly divided between the three Fleets. Reported but not confirmed that up to 20 have been converted to sweep mines. Numbers continue to decline
Sales: Eight to North Vietnam in May 1966, plus Romanian craft of indigenous construction. Seven to Tanzania in 1970-71, six to Guinea, 12 to North Korea, 12 to Pakistan, five to Sri Lanka in 1972, two to Tunisia in 1977, six to Albania, eight to Bangladesh in 1980-82, three to Congo, four to Egypt in 1984, three to Sri Lanka in 1991, two to Tanzania in 1992. Many of the earlier craft have since been deleted.

SHANGHAI II (Sri Lankan colours) 1992 / 0312772

4 HARBOUR PATROL CRAFT (PBI)

7358-7361

Displacement, tons: 80 full load
Dimensions, feet (metres): 82 x 13.3 x 4.5 (25 x 4.1 x 1.4)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 28
Guns: 2 - 14.5 mm (twin).
Radars: Surface search: I-band

Comment: Four new patrol craft arrived at Hong Kong on 1 July 1997. There may be more of the class, which are similar to some of the paramilitary patrol craft, but much faster

HARBOUR PATROL CRAFT 7360 6/1999, Ships of the World / 0056172

AMPHIBIOUS FORCES

Notes: (1) In addition to the ships listed below there are up to 500 minor LCM/LCVP types used to transport stores and personnel.

(2) Eight Yuchai class (USSRT 4 design) and ten T4 LCMs are still in reserve in the South Sea Fleet.

(3) A 20 m WIG (wing-in-ground effect) craft assembled at Shanghai and completed in late 1997. Resembles Russian Volga II passenger ferry and may enter naval service if it proves to be reliable.

1 YUDENG (TYPE 073) CLASS (LSM)

Name	No	Builders	Launched	Commissioned
WUDANGSHAN	990	Zhonghua Shipyard	Mar 1991	Aug 1994

Displacement, tons: 1,850 full load
Dimensions, feet (metres): 285.4 x 42.7 x 12.5 (87 x 13 x 3.8)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 14
Complement: 35
Military lift: 500 troops; 9 tanks
Guns: 2 China 57 mm/50 (twin). 4 - 25 mm (2 twin).
Radars: Navigation: China Type 753; I-band

Comment: The only one of the class. Based in the South Sea Fleet. Production may have been for export or the design was overtaken by the smaller Wuhu-A class.

WUDANGSHAN 4/2008 / 1335681

1 YUZHAO (TYPE 071) CLASS (ASSAULT SHIP) (LHD)

Name	No	Builders	Laid down	Launched	Commissioned
KUNLUNSHAN	998	Hudong Zhonghua Shipyard, Shanghai	June 2006	21 Dec 2006	2008

Displacement, tons: 17,600 approx
Dimensions, feet (metres): 689.0 x 91.9 x 23.0 (210.0 x 28.0 x 7.0)
Main machinery: CODAD; 4 SEMT Pielstick 16 PC2.6 V 400 diesels, 47,000 hp (35.2 MW); 2 shafts
Speed, knots: 20
Complement: 120
Military lift: Four air-cushion vehicles plus vehicles and troops
Guns: 1—76 mm ●
 4—30 mm/65 AK 630 ●
Countermeasures: Decoys: 2 launchers ●
Radars: Air search, Type 363 (Sea Tiger) ●; E/F-band.
Air/surface search: Type 364 Seagull C ●; G-band

Fire control: Type 347G(2) (LR 66) ●; J-band for 76 mm.
 Type 347G(1) (Rice Bowl) ●; J-band for AK 630
Navigation: Type NR 2000 ●; I-band.

Helicopters: 2 Z-8 Super Frelon.

Programmes: After several years' speculation, the existence of the programme was confirmed when construction of a ship was initiated in mid-2006. The programme constitutes a key component of the PLA(N)'s plan to improve its sealift and power projection capabilities. Further ships are expected once ovaluation trials have been completed.

Structure: The principal features of the ship include a large well deck area to accommodate four Air Cushion Vehicles (ACV) in the aft two-thirds of the ship. The ACVs are likely to access the ship through a stern gate. The ship may have to ballast down for operation. There is a large stern helicopter flight deck and a hangar. An internal garage deck for vehicles may be accessed via side ramps (port and starboard). There is space for the HQ7 launcher which may be fitted at a later date. Two LCVPs are carried

Opinion: This ship represents a major enhancement of amphibious capability. Based at Zhanjiang (South Sea Fleet)

PUTUOSHAN	939	Zhonghua Shipyard, Shanghai	Apr 2001	Aug 2001
TIANTAISHAN	940	Zhonghua Shipyard, Shanghai	Dec 2001	Apr 2002

Displacement, tons: 3,770 standard; 4,800 full load
 Dimensions, feet (metres): 393.7 x 52.5 x 10.5 (120 x 16 x 3.2)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: 17. Range, n miles: 3,000 at 14 kt
 Complement: 120
 Military lift: 250 troops; 10 tanks; 4 LCVP
 Guns: 6 China 37 mm/63 (3 twin); 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg.
 Radars: Navigation: 2 China Type 753; I-band.
 Helicopters: Platform for 2 medium.

Comment: To augment amphibious lift capabilities and provide helicopter lift. Bow and bridge structures are very similar to the Yukun class but there is a large helicopter deck. 934-937 and 939 based in South Sea Fleet. 908-910 and 939-940 based in East Sea Fleet.

HUANGGANGSHAN 1/2008*, A Sheldon-Duplatz / 1335683

Displacement, tons: 3,770 standard; 4,800 full load
 Dimensions, feet (metres): 393.7 x 53.8 x 10.5 (120 x 16.4 x 3.2)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: 17. Range, n miles: 3,000 at 14 kt
 Complement: 120
 Military lift: 250 troops; 10 tanks; 4 LCVP
 Guns: 2 57 mm.
 Radars: Navigation: 2 China Type 753; I-band
 Helicopters: Platform for 2 medium.

Comment: Details are speculative but reported to be an improved version of the Yuting I class with similar dimensions. Design differences include modifications to the stern, including the ramp and a taller funnel. A tunnel in the centre of the superstructure connects the main and after decks. With construction undertaken at three shipyards, a pause in the programme after 10 ships may be temporary. 992-996 based in the South Sea Fleet; 911 and 912 in the North and 913 and 918 in the East.

WUFENGSHAN 928	DONGTINGSHAN 931	LIUPANSHAN 933
ZJINSHAN 929		

Displacement, tons: 3,110 standard; 4,170 full load
 Dimensions, feet (metres): 393.6 x 50 x 9.5 (120 x 15.3 x 2.9)
 Main machinery: 2 Type 12E 390 diesels; 14,400 hp(m) (10.6 MW) sustained; 2 shafts
 Speed, knots: 18
 Range, n miles: 3,000 at 14 kt
 Complement: 109
 Military lift: 200 troops; 10 tanks; 2 LCVP; total of 500 tons
 Guns: 2 China 57 mm/50 (1 twin); 120 rds/min to 12 km (6.5 n miles); weight of shell 6.31 kg.
 4, 6 or 8—37 mm (2, 3 or 4 twin); 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg.
 4—25 mm/60 (2 twin) (some also have 4—25 mm (2 twin) mountings amidships above the tank deck); 270 rds/min to 3 km (1.6 n miles).
 Radars: Navigation: 2 China Type 753; I-band.

Comment: First completed in 1980 at Wuhan Shipyard. Building appeared to terminate in November 1995. Bow and stern ramps fitted. Carry two LCVPs. Bow ramp maximum load 50 tons, stern ramp 20 tons. Five based in the East and two in South Sea Fleets.

HELANSHAN 12/2007, Chris Sattler / 1170057

LINGYANSHAN 3/2001, Ships of the World / 0126363

32 YULIANG (TYPE 079) CLASS (LSM)

Displacement, tons: 1,100 full load
 Dimensions, feet (metres): 206.7 x 32.8 x 7.9 (68 x 10 x 2.4)
 Main machinery: 2 diesels; 2 shafts
 Speed, knots: 14
 Complement: 60
 Military lift: 3 tanks
 Guns: 4—25 mm/60 (2 twin); 270 rds/min to 3 km (1.6 n miles).
 2 BM 21 MRL rocket launchers; range about 9 km (5 n miles).
 Radars: Navigation: Fin Curve; I-band

Comment: Production started in 1980 in three or four smaller shipyards. Numbers have been overestimated in the past and production stopped in favour of Yuhai class. Four in the North Sea Fleet, remainder based in the South Sea Fleet.

YULIANG 986 6/2008* / 1335702

10 YUNSHU CLASS (LSM)

Name	No	Builders	Launched	Commissioned

Guns: 4-14.5 mm (2 twin).
Radars: To be announced

Comment: Built at Qingdao, Zhanjiang, Shanghai and Dinghai. Catamaran hull with superstructure on the starboard side. Basing: 3128 and 3129 in the North Sea Fleet; 3232-35 in the South Sea Fleet; 3315-3318 in the East Sea Fleet.

YUBEI 3315 8/2003 / 1047164

10 YUHA1 (TYPE 074) (WUHU-A) CLASS (LSM)

3111	3113	3115-3117	3229	3244	7593-7595
------	------	-----------	------	------	-----------

Displacement, tons: 799 full load
Dimensions, feet (metres): 191.6 x 34.1 x 8.9 (58.4 x 10.4 x 2.7)
Main machinery: 2 MAN-8L 20/27 diesels, 4,900 hp(m) (3.6 MW); 2 shafts
Speed, knots: 14
Complement: 56
Military lift: 2 tanks; 250 troops
Guns: 2-25 mm/80 (1 twin), 4-14.5 mm (2 twin).
Radars: Navigation: I-band

Comment: First one completed in Wuhu Shipyard in 1995. One sold to Sri Lanka in December 1995. Basing: 3111, 3113, 3115-3117 in the North Sea Fleet; 3229 and 3244 in the East Sea Fleet and 7593-7597 in the South Sea Fleet

YUHA1 CLASS 2/1999 / 0056780

120 YUNNAN CLASS (TYPE 067) (LCU)

Displacement, tons: 85 standard; 135 full load
Dimensions, feet (metres): 93.8 x 17.7 x 4.9 (28.6 x 5.4 x 1.5)
Main machinery: 2 diesels; 600 hp(m) (441 kW); 2 shafts
Speed, knots: 12
Range, n miles: 500 at 10 kt
Complement: 12
Military lift: 45 tons
Guns: 4-14.5 mm (2 twin) MGs.
Radars: Navigation: Fujii; I-band.

Comment: Built in China 1968-72 although a continuing programme was reported in 1982. Pennant numbers in 3000 series (3313, 3321, 3344 seen) 5000 series (5526 seen) and 7000 series (7566 and 7568 seen). The majority of the operational hulls are based in the South Sea Fleet. One to Sri Lanka in 1991 and a second in 1995. Estimation of numbers is difficult but most are believed to be in reserve or in non-naval service. Some may have 12.7 mm MGs. Twelve in the East Sea Fleet, remainder in the South.

YUNNAN 3221 6/2008* / 1335701

1 YUDAO CLASS (TYPE 073) (LSM)

965
Displacement, tons: 1,650 full load
Dimensions, feet (metres): 253.9 x 34.1 x 9.8 (77.4 x 10.4 x 3)
Speed, knots: 18
Range, n miles: 1,000 at 16 kt
Complement: 60
Guns: 4-25 mm/60 (2 twin), 270 rds/min to 3 km (1.6 n miles)
Radars: Navigation: Fin Curve, I-band.

Comment: First entered service in early 1980s. 965 is the only one left and is in the East Fleet.

YUDAO 965 6/1995 0056781

20 YUCH'IN (TYPE 068/069) CLASS (LCM)

Displacement, tons: 58 standard, 85 full load
Dimensions, feet (metres): 81.2 x 17.1 x 4.3 (24.8 x 5.2 x 1.3)
Main machinery: 2 Type 12V 150C diesels; 600 hp(m) (441 kW); 2 shafts
Speed, knots: 11.5. **Range, n miles:** 450 at 11.5 kt
Complement: 12
Military lift: Up to 150 troops
Guns: 4-14.5 mm (2 twin) MGs

Comment: Built in Shanghai 1962-72. Smaller version of Yunnan class with a shorter tank deck and longer poop deck. Primarily intended for personnel transport. Based in South Sea Fleet. Six sold to Bangladesh and two to Tanzania in 1995

YUCH'IN 3201 10/2008*, Chris Sattler / 1335670

10 JINGSAH II CLASS (HOVERCRAFT) (UCAC)

452 +9

Displacement, tons: 70 standard; 78 full load
Dimensions, feet (metres): 72.2 × 26.2 (22 × 8)
Main machinery: 2 propulsion motors; 2 lift motors
Speed, knots: 55
Military lift: 15 tons
Guns: 4–14.5 mm (2 twin) MGs.

Comment: The prototype was built at Dagu in 1979. This may now have been scrapped and been superseded by this improved version which has a bow door for disembarkation. Numbers are uncertain and may be conditional on progress with WIG craft.

JINGSAH II 1993, *Ships of the World* / 0058783**25 TYPE 271 (LANDING CRAFT) (LCU)**

Displacement, tons: 610 standard; 800 full load
Dimensions, feet (metres): 185.4 × 34.1 × 7.5 (56.5 × 10.4 × 2.3)
Main machinery: 2 diesels; 2,250 hp (1.7 MW); 2 shafts
Speed, knots: 13
Complement: 25
Military lift: 150 tons
Guns: 4–14.5 mm (2 twin)
Radars: Navigation: I-band

Comment: Utility landing craft widely used for the transport of troops, vehicles and stores. The first variant (Type 271-I) entered service in about 1970 and this was followed in the late 1970s by Type 270-II and in the late 1980s by Type 271-III. Building continued in the 1990s to replace decommissioned craft but current numbers are approximate. Details are based on the latest generation of craft.

TYPE 271 10/2008*, *Chris Sattler* / 1335678**1 + 3 YUYI CLASS (LANDING CRAFT—AIR CUSHION) (LCAC)**

Displacement, tons: To be announced
Dimensions, feet (metres): To be announced
Main machinery: 4 gas turbines for propulsion and lift
Speed, knots: To be announced **Range, n miles:** To be announced
Complement: To be announced
Military lift: Armoured Fighting Vehicle plus troops or 60–70 tons approx
Radars: To be announced

Comment: The first of a new class of air cushion landing craft design, probably intended for operation from the Yuzhao (Type 071) class LHD. The craft appears to be similar to but smaller than the US Navy LCAC. The vehicle is expected to be capable of transporting an armoured fighting vehicle and troops. In contrast to the US Navy LCAC, the driving/command module is located on the port side instead of the starboard side. The main cargo deck is about 6 m wide and there are bow and stern ramps. Propulsion is provided by two 4 m shrouded reversible-pitch propellers, probably powered by four gas turbines. Built at Qixun Shipyard, the first vessel was launched in January 2008.

LCAC 8/2008*, 1335703

MINE WARFARE FORCES

Notes: There are also some 50 auxiliary minesweepers of various types including trawlers and motor-driven junks. Up to 20 Shanghai II class, known as the Fushun class, may be used.

1 WOLEI CLASS (MINELAYER) (ML/MST)

LIAOYANG 814

Displacement, tons: 2,300 standard; 3,100 full load
Dimensions, feet (metres): 311.3 × 47.2 × 13.1 (94.9 × 14.4 × 4)
Main machinery: 2 diesels; 4,300 hp (3.2 MW); 2 shafts
Speed, knots: 18. **Range, n miles:** 7,000 at 14 kt
Complement: 180
Guns: 2 China 57 mm/50 (twin)
 6 China 37 mm/63 (3 twin); 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg
Mines: 300
Radars: Surface search. Fire control. Navigation.

Comment: Built at Dalian Shipyard and completed successful sea trials in 1988. Resembles the deleted Japanese Souya class and may be used as a support ship as well as a minelayer. Based in the North Sea Fleet.

WOLEI 814 6/2002 / 0529145

4 WOSAO (TYPE 082) CLASS (MINESWEEPERS—COASTAL) (MSC)

800–803

Displacement, tons: 290 standard; 320 full load
Dimensions, feet (metres): 147 × 22.3 × 7.5 (44.8 × 6.8 × 2.3)
Main machinery: 2 diesels; 2,000 hp (1.5 MW); 2 shafts
Speed, knots: 15. **Range, n miles:** 500 at 8 kt
Complement: 28
Guns: 4 China 25 mm/60 (2 twin); 270 rds/min to 3 km (1.6 n miles)
Mines: 6
Countermeasures: Acoustic, magnetic and mechanical sweeps.
Radars: Navigation: China Type 753; I-band.
Sonars: Hull-mounted; active minihunting.

Comment: Building started in 1986. First of class commissioned in 1988 but second, with modified bridge structure, not seen until 1997. There are further craft but numbers have not been confirmed. Steel hull with low magnetic properties. Equipped with mechanical (Type 316), magnetic (Type 317), acoustic (Type 318) and infrasonic (Type 319) sweeps. Based in the East Sea Fleet.

WOSAO 10/2008*, *Chris Sattler* / 1335675**6 WOCHI CLASS (MCMV)**

328–329 438 805 810 840

Displacement, tons: To be announced
Dimensions, feet (metres): 219.8 × 32.8 × ? (67.0 × 10.0 × ?)
Main machinery: To be announced
Speed, knots: To be announced
Complement: To be announced
Guns: 1–57 mm.
Countermeasures: To be announced
Combat data systems: To be announced.
Radars: To be announced.
Sonars: To be announced.

Comment: A new class of mine-countermeasures vessel which, although outwardly similar to the T43 class is approximately 5 m longer. Construction has taken place at Qixun Shipyard, Shanghai, and at Wuhan. Little is known about the details or capabilities of the vessel.

WOCHI 810 11/2007 / 1165860

1 WOZANG CLASS (MCMV)

Name	No	Builders	Launched	Commissioned
HUOQIU	804	Gauxin Shipyard, Shanghai	Apr 2004	July 2005

Displacement, tons: 575 full load
Dimensions, feet (metres): 180.4 x 30.5 x 8.5 (55.0 x 9.3 x 2.6)
Main machinery: 2 diesels; 2 shafts
Speed, knots: To be announced
Complement: To be announced
Guns: 2–25 mm (twin).
Countermeasures: To be announced.
Combat data systems: To be announced
Radars: To be announced
Sonars: To be announced.

Comment: A new class of mine-countermeasures vessel which was thought to be a successor to the T43 class before the appearance of the Wochi class. Little is known about the capabilities of the vessel. Based in the East Sea Fleet.

WOZANG 804 1/2008*, A Sheldon-Dupleix / 1335677

16 T 43 CLASS (TYPE 6610) (MINESWEEPERS—OCEAN) (MSO)

807–809 811–813 830–838 850

Displacement, tons: 520 standard; 590 full load
Dimensions, feet (metres): 196.8 x 27.6 x 6.9 (60 x 8.8 x 2.3)
Main machinery: 2 PCR/Kolomna Type 9-D-8 diesels, 2,000 hp(m) (1.47 MW); 2 shafts
Speed, knots: 14. **Range, n miles:** 3,000 at 10 kt
Complement: 70 (10 officers)

Guns: 2 or 4 China 37 mm/63 (1 or 2 twin) (3 of the class have a 65 mm/52 forward instead of one twin 37 mm/63), dual purpose; 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg.
 4 USSR 25 mm/60 (2 twin); 270 rds/min to 3 km (1.6 n miles)
 4 China 14.5 mm/93 (2 twin), 600 rds/min to 7 km (3.8 n miles).
 Some also carry 1–85 mm/52 Mk 90K, 18 rds/min to 15 km (8 n miles); weight of shell 9.6 kg

Depth charges: 2 BMB-2 projectors; 20 depth charges.
Mines: Can carry 12-16
Countermeasures: MCMV; MPT-1 paravanes, MPT-3 mechanical sweep; acoustic and magnetic gear.
Radars: Surface search. Fin Curve or Type 756, F-band.
IFF: High Pole or Yard Rake.
Sonars: Tamir II; hull-mounted; active search and attack; high frequency.

Programmes: Started building in 1956 and continued intermittently until about 1987 at Wuhan and at Guangzhou.
Structure: Based on the USSRT 43s, some of which transferred in the mid-1950s but have all now been deleted
Operational: Some are used as patrol ships with sweep gear removed. Three units reported as having a 65 mm/52 gun forward. Basing, 811-813 in the North Sea Fleet; 807, 808, 830-834 in the East Sea Fleet; 809, 835-838 and 850 in the South Sea Fleet
 There are approximately 22 of the class in reserve
Sales: One to Bangladesh in 1995.

T 43 832 10/2008*, Chris Sattler / 1335676

T 43 833 12/2005, Massimo Annati / 1153106

4 (+ 42 RESERVE) FUT1 CLASS (TYPE 312) (DRONE MINESWEEPERS) (MSD)

Displacement, tons: 47 standard
Dimensions, feet (metres): 68.6 x 12.8 x 6.9 (20.9 x 3.9 x 2.1)
Main machinery: Diesel-electric; 1 Type 12V 150C diesel generator; 300 hp(m) (220 kW); 1 motor; cp prop
Speed, knots: 12. **Range, n miles:** 144 at 12 kt
Complement: 3

Comment: A large number of these craft, similar to the German Troikas, has been built since the early 1970s. Fitted to carry out magnetic and acoustic sweeping under remote control up to 5 km (2.7 n miles) from shore control station. Most are kept in reserve.

DRONE Type 312 1988, CSSC / 0056775

SURVEY AND RESEARCH SHIPS

Notes: (1) In addition to the naval ships shown in this section there are large numbers of civilian marine survey ships. The majority belong to the **National Marine Bureau** and have funnel markings of a red star with light blue wave patterns on either side. There are about 37 ships with names *Zhong Guo Hai Jian* or *Xiang Yang Hong* followed by a pennant number. The **National Land Resources Department** has two Geological Survey Squadrons and these ships have a red star and light blue ring on a white or yellow background. The **State Education Department** Science section owns ships with funnel markings of yellow and blue lines either side of a circular blue design. Also there are a few nationalised companies such as the **China Marine Oil Company** which have a band of light blue round the top of the funnel.

(2) There is a large number of ocean surveillance fishing trawlers. These sometimes engage in fishing activities and are not easily distinguishable from civilian fishing vessels.

(3) There is a 130 m survey ship with pennant number 871

AGI 201 (converted trawler) 6/1997, A Sharma / 0017746

XIANG YANG HONG 14 (National Marine Bureau) 4/2004, Ships of the World 1042141

ZHONG GUO HAI JIAN 71 4/2008*, 1335674

FENDOU SHIHAO (National Land Resources) 6/1999, Ships of the World / 0056795

DONG FANG HONG 2 (State Education Department) 4/2004, Ships of the World / 1042130

HAIYING 12 HAO (China Marine Oil Company) 6/1997, A Sharma / 0006690

2 DAHUA CLASS (AGOR/AGE)**BI SHENG 891** (ex-970, ex-909) **HUA LUOGENG 892**

Displacement, tons: 6,000 full load
Dimensions, feet (metres): 426.5 × 57.4 × 23 (130.0 × 17.5 × 7)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 20
Complement: 80
Helicopters: Platform for one medium.

Comment: First ship launched on 9 March 1997 with pennant number 909 at Zhonghua, and completed in August 1997 with new pennant number which has also been superseded. There is a helicopter deck aft. This is a key unit which has been involved in a number of trials including those for the HQ-9 phased array radar. It is currently fitted with Top Plate air search radar and Front Dome missile fire-control radars. A second unit, also constructed by Hudong-Zhonghua Shipyard, was launched on 30 March 2006.

DAHUA 891 6/2007, *Ships of the World* / 1166771DAHUA 892 10/2006, *E & M Laursen* / 1164861**2 SPACE EVENT SHIPS (AGMH/AGI)****YUAN WANG 1** **YUAN WANG 2**

Displacement, tons: 17,100 standard; 21,000 full load
Dimensions, feet (metres): 810.2 × 74.1 × 24.6 (186 × 22.6 × 7.5)
Main machinery: 1 Sulzer diesel, 17,400 hp(m) (12.78 MW); 1 shaft
Speed, knots: 20
Range, n miles: 18,000 at 20 kt
Complement: 470

Comment: Built by Shanghai Jiangnan Yard and entered service in December 1979. Both equipped with helicopter decks but no hangar. Extensive communications, SATNAV and meteorological equipment were installed in 1986-87. In the late 1990s, both ships refitted to support manned spacecraft missions.

YUAN WANG 1 6/1995, 0056799**1 SPACE EVENT SHIP (AGM/AGI)****DONGDIAO 851** (ex-232)

Displacement, tons: 6,000 full load
Dimensions, feet (metres): 426.5 × 53.8 × 21.3 (130 × 16.4 × 6.5)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 20
Complement: 250
Guns: 1—37 mm, 2—14.5 mm.
Helicopters: Platform for one medium.

Comment: First seen fitting out in 1989. A larger version of Dadie class. Two radar (possibly missile tracking) arrays have been replaced by three radomes. In service in March 2000.

DONGDIAO 5/2008*, 1335689**1 DADIE CLASS (AGI)****BEIDIAO 900** (ex-841)

Displacement, tons: 2,550 full load
Dimensions, feet (metres): 308.4 × 37.1 × 13.1 (94 × 11.3 × 4)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 17
Complement: 170 (18 officers)
Guns: 4 × 14.5 mm (2 twin)
Radars: Navigation: 2 Type 753; I-band.

Comment: Built at Wuhan shipyard, Wuchang and commissioned in 1986. North Sea Fleet and seen regularly in Sea of Japan and East China Sea.

BEIDIAO 900 4/2008*, 1335671**2 KAN CLASS (AGOR)****101** **102**

Displacement, tons: 1,100 full load
Dimensions, feet (metres): 226 × 22.5 × 9 (68.6 × 6.9 × 2.7)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 18
Complement: 150
Radars: Navigation: Fin Curve; I-band.

Comment: Details given are for 102 which is believed built in 1985-87, possibly at Shanghai. Large open stern area. Aft main deck area covered and may have cable reel system. 101 is similar but slightly larger and may have been built in 1965 as an ASR. Operate in East China Sea and Sea of Japan.

KAN 101 5/2000, *van Ginderen Collection* / 0103684**1 SHUGUANG CLASS (ex-T 43) (AGOR/AGS)****203**

Displacement, tons: 500 standard; 570 full load
Dimensions, feet (metres): 190.3 × 28.9 × 11.5 (58 × 8.8 × 3.5)
Main machinery: 2 PRC/Kolomna Type 9-D-8 diesels; 2,000 hp(m) (1.47 MW) sustained; 2 shafts
Speed, knots: 15
Range, n miles: 5,300 at 8 kt
Complement: 55-60

Comment: Converted from ex-Soviet T 43 minesweeper in late 1960s. Painted white. This last survivor is based in the North Sea Fleet.

SHUGUANG 203 10/1997, *van Ginderen Collection* / 0012980

1 BIN HAI CLASS (AGOR)

HAI 521

Displacement, tons: 550 full load
Dimensions, feet (metres): 164 x 32.8 x 11.5 (50 x 10 x 3.5)
Main machinery: 2 Niigata Type 6M26KHHS diesels; 1,800 hp(m) (1.18 MW); 2 shafts; bow thruster
Speed, knots: 14. **Range, n miles:** 5,000 at 11 kt
Complement: 15 (7 officers) plus 25 scientists
Radars, Navigation: Japanese AR-M31; I-band.

Comment: A purpose-built research ship built by Niigata Engineering Co, Niigata (Japan) in 1974. Launched 10 March 1975. Commissioned July 1975. First operated by the China National Machinery Export-Import Corporation on oceanographic duties. Operates on East and South China research projects but based in North Sea Fleet. For small vessel, has cruiser stern with raked bow and small funnel well aft. Capability to operate single DSRV and the Chinese Navy has a number of Japanese-built KSWB-300 submarines. Painted white. This ship may belong to the China Marine Oil Company and further vessels may be in service.

1 GANZHU CLASS (AGS)

420

Displacement, tons: 1,000 full load
Dimensions, feet (metres): 213.2 x 29.5 x 9.7 (65 x 9 x 3)
Main machinery: 4 diesels; 4,400 hp(m) (3.23 MW); 2 shafts
Speed, knots: 20
Complement: 125
Guns: 4—37 mm/63 (2 twin); 8—14.5 mm (4 twin)

Comment: Built at Zhujiang in 1973–75. Long refit in 1996 for up to two years.

GANZHU 420

8/1998 / DT56807

5 YENLAI CLASS (AGS)

226–227 420 427 943

Displacement, tons: 1,040 full load
Dimensions, feet (metres): 241.8 x 32.1 x 9.7 (73.7 x 9.8 x 3)
Main machinery: 2 PRC/Kolomna Type 9-D-8 diesels; 2,000 hp(m) (1.47 MW) sustained; 2 shafts
Speed, knots: 16
Range, n miles: 4,000 at 14 kt
Complement: 25
Guns: 4 China 37 mm/63 (2 twin). 4—25 mm/80 (2 twin).
Radars, Navigation: Fin Curve; I-band

Comment: Built at Zhonghua Shipyard, Shanghai in early 1970s. Carries four survey motor boats.

YENLAI 226

6/2005, Hachiro Nakai / 1153052

1 SPACE EVENT SHIP (AGMH)

YUAN WANG 3

Displacement, tons: 16,790 full load
Dimensions, feet (metres): 590.5 x 72.8 x 26.2 (180 x 22.2 x 8.0)
Main machinery: 1 diesel; 1 shaft
Speed, knots: 20. **Range, n miles:** 18,000 at 12 kt
Complement: 470
Helicopters: Platform for 1 medium.

Comment: A second-generation space tracking ship launched in 1994 and commissioned in April 1995. Equipped with E/F-band tracking radar. The ship is normally positioned in the South Atlantic off the West African coast for ShenZhou flight missions.

YUAN WANG 3

6/2008* / 1335671

1 SPACE EVENT SHIP (AGMH)

YUAN WANG 4

Displacement, tons: 13,000 full load
Dimensions, feet (metres): 512.5 x 67.6 x 25.4 (156.2 x 20.6 x 7.75)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 20
Range, n miles: 18,000 at 12 kt
Complement: 200
Helicopters: 1 medium.

Comment: Ex-survey ship (*Xiangyanghong 10*) originally constructed in the late 1970s. Converted into a space tracking ship and renamed *Yuan Wang 4* in 1998 to support manned space flight missions, mainly for spacecraft tracking and communications relay roles. Normally positioned in the South Pacific for spacecraft missions.

YUAN WANG 4

6/2006* / 1335672

2 SPACE EVENT SHIPS (AGMH)

YUAN WANG 5

YUAN WANG 6

Measurement, tons: 24,966 dwt
Dimensions, feet (metres): 729.0 x 82.7 x 26.9 (222.2 x 25.2 x 8.2)
Main machinery: To be announced
Speed, knots: 20
Range, n miles: 20,000 at 12 kt
Complement: To be announced
Helicopters: 1 medium.

Comment: Two new third-generation space tracking ships built at Jiangnan Shipyard in Shanghai. *Yuan Wang 5* was launched on 15 September 2006 and started undergoing sea trials in early 2007. The ship entered service in early 2008. The second ship was originally named *Yuan Wang 6* but may be allocated another number to reflect replacement of earlier ships. *Yuan Wang 6* reportedly differs from *Yuan Wang 5* in that it includes a large mission control hall occupying two decks. This ship entered service in late 2008.

YUAN WANG 5

2/2008*, Ships of the World / 1335651

1 RESEARCH SHIP (AGE)

HAIYANG 20

Displacement, tons: To be announced
Dimensions, feet (metres): 426.5 x ? x ? (130.0 x ? x ?)
Main machinery: To be announced
Speed, knots: To be announced
Complement: To be announced
Radars: To be announced.
Helicopters: 1 medium.

Comment: Naval manned research ship first reported in 2005. The details and capabilities of the ship are not yet known.

HAIYANG 20

12/2005, Massimo Anelli / 1153098

1 SURVEY SHIP (AGS)

852

Displacement, tons: To be announced
Dimensions, feet (metres): 367.4 x 7 x 7 (112.0 x 7 x 7)
Main machinery: To be announced
Speed, knots: To be announced
Complement: To be announced
Radars: To be announced

Comment: Naval manned hydrographic ship first reported in 2005. The details and capabilities of the ship are not yet known.

SURVEY SHIP 852

8/2007 / 1166859

DEEP SUBMERGENCE VEHICLES

0 + 1 RESCUE SUBMERSIBLE

LR 7

Displacement, tons: 28.5
Dimensions, feet (metres): 31.5 x 10.5 x 11.1 (9.6 x 3.2 x 3.4)
Main machinery: 2 electric motors; 26.8 hp (20 kW); 4 titable side thrusters; 16 hp (12 kW)
Speed, knots: 3
Complement: 2 pilots and 1 rescue chamber operator

Comment: Powered by two external lead-acid battery pods, the Ferry Slingsby LR 7 is a development of the LR 5 rescue submersible, originally built for North Sea commercial operations and subsequently purchased by the Royal Navy for submarine rescue operations. Capable of operating down to 500 m depth, it can be deployed anywhere in the world and operated from the deck of any suitable mother ship. Its role is to rescue up to 18 survivors at a time from a disabled submarine on the seabed and bring them back to the surface. This can be done at normal atmospheric pressure and at increased pressure up to 5 bar. Mating with the disabled submarine can be achieved at up to 60° bow up. LR 7 is complemented by an ROV, Scorpio 45, which is attached to a 1,000 m umbilical. This is used to locate the disabled submarine, clear obstructions from the escape hatches and replenish life support stores. Following tests in Scotland, LR 7 is due to enter service in the Chinese Navy in 2009.

2 DSRV (SALVAGE SUBMARINES) (DSRV)

Displacement, tons: 35 full load
Dimensions, feet (metres): 48.9 x 8.5 x 8.5 (14.9 x 2.6 x 2.6)
Main machinery: 2 silver-zinc batteries; 1 mortar; 1 shaft
Speed, knots: 4. Range, n miles: 40 at 2 kt
Complement: 3

Comment: First tested in 1986 and can be carried on large salvage ships. Capable of 'wet' rescue at 200 m and of diving to 600 m. Capacity for six survivors. Underwater TV, high-frequency active sonar and a manipulator arm are all fitted. Life support duration is 1,728 man-hours. An upgrade of submarine rescue capabilities may be planned following attendance at international conferences in 2001 and talks with industry. Up to three modern DSRV may be required.

DSRV

1991, CSSC / 0056785

TRAINING SHIPS

1 DAXIN CLASS (AXH)

Name	No	Builders	Launched	Commissioned
ZHENGHE	81	Qixun, Shanghai	12 July 1986	27 Apr 1987

Displacement, tons: 5,470 full load
Dimensions, feet (metres): 426.5 x 52.5 x 15.7 (130.0 x 16.0 x 4.8)
Main machinery: 2 SEMT Pielstick 6PC-2-6L diesels, 7,800 hp(m) (5.73 MW); 2 shafts
Speed, knots: 15
Range, n miles: 5,000 at 15 kt
Complement: 170 plus 30 instructors plus 200 Midshipmen
Guns: 4 China 57 mm/70 (2 twin), 4—30 mm AK 230 (2 twin), 4—12.7 mm MGs.
A/S mortars: 2 FOF 2500 fixed 12-tubed launchers; range 1,200 m; warhead 34 kg.
Radars: Air/surface search: Eye Shield, E-band
Surface search: China Type 756; I-band.
Navigation: Racal Decca 1290; I-band
Fire control: Round Ball; I-band
Sonars: Echo Type 5; hull-mounted; active; high frequency.
Helicopters: Platform only

Comment: Resembles a small cruise liner. Subordinate to the Naval Academy and replaced *Huian*. Based in the North Sea Fleet. A similar ship sold to Algeria in 2005.

ZHENGHE

9/2000, B Lemachko / 0126258

1 SHICHANG CLASS (HSS/AHH)

Name	No	Builders	Launched	Commissioned
SHICHANG	82	Qixun, Shanghai	Apr 1996	27 Jan 1997

Displacement, tons: 10,000 full load
Dimensions, feet (metres): 393.7 x 59.1 x 23 (120 x 18 x 7)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 17.5
Range, n miles: 8,000 at 17 kt
Complement: 170 plus 200 trainees
Military lift: 300 containers
Helicopters: 2 Zhi-9A Haitun.

Comment: China's first air training ship described officially as a defence mobilisation vessel which can be used for civilian freight, for helicopter or navigation training, or as a hospital ship. The vessel looks like a scaled down version of the UK *Argus* with the bridge superstructure forward and an after funnel on the starboard side of the flightdeck. There are two landing spots. Based in the South Sea Fleet.

SHICHANG

5/1998, Sattler/Steele / 0017738

SHICHANG

5/1998, RAN / 0017739

AUXILIARIES

Notes: (1) There is a water-tanker with similar characteristics to the Fuzhou class with pennant number 1101.
 (2) There are two water tankers of unknown dimensions with pennant numbers 1102 and 1104.
 (3) There are two 70 m Kansha class salvage ships which carry French-supplied 7 m salvage submersibles capable of operating to depths of 300 m.
 (4) There are two tankers 637 and 960. Both of unknown type.

160 China/Auxiliaries

2 FUQING CLASS (REPLENISHMENT SHIPS) (AORH)

HONGZHU (ex-Taicang) 881 (ex-575) **FENGANG** (ex-Dongyun) 882 (ex-615)

Displacement, tons: 7,500 standard; 21,750 full load
Dimensions, feet (metres): 552 × 71.5 × 30.8 (168.2 × 21.8 × 9.4)
Main machinery: 1 Sulzer 8RL B66 diesel; 15,000 hp(m) (11 MW) sustained; 1 shaft
Speed, knots: 18
Range, n miles: 18,000 at 14 kt
Complement: 130 (24 officers)
Cargo capacity: 10,550 tons fuel; 1,000 tons diesel; 200 tons feed water; 200 tons drinking water; 4 small cranes
Guns: 8–37 mm (4 twin) (fitted for but not with).
Radars: Navigation: Fin Curve or Rascal Decca 1290; I-band.
Helicopters: Platform for 1 medium.

Comment: Operational in late 1979. This is the first class of ships built for underway replenishment in the Chinese Navy. Helicopter platform but no hangar. Both built at Dalian. Two liquid replenishment positions each side with one solid replenishment position each side by the funnel. A third of the class *Honggang* (X 950) was converted to merchant use in 1989 and renamed *Hai Lang*, registered at Dalian. A fourth (X 350) was sold to Pakistan in 1987. 882 based in the North and 881 in the East. *Fengang* appears to have a command role.

HONGZHU 10/2007, Chris Sattler / 1156841

FENGANG 3/2004, L-G Nilsson / 1042154

1 NANYUN CLASS (REPLENISHMENT SHIP) (AORH)

Name **No** **Builders** **Launched** **Commissioned**
QINGHAI HU (ex-Nancang, ex-Vladimir Peregodov) 885 (ex-953) Kherson/Dalian Apr 1992 2 June 1996

Displacement, tons: 37,000 full load
Measurement, tons: 28,750 dwt
Dimensions, feet (metres): 586.9 × 83 × 36.1 (178.9 × 25.3 × 11)
Main machinery: 1 B&W diesel; 11,600 hp(m) (8.53 MW); 1 shaft
Speed, knots: 16
Complement: 125
Cargo capacity: 9,630 tons fuel
Helicopters: 1 Super Frelon.

Comment: Sometimes referred to as Fusu class. One of a class of 11 built at Kherson Shipyard, Crimea. Laid down in January 1989. Sailed from Ukraine to Dalian Shipyard in 1993. Completed fitting out in China and joined the South Sea Fleet. RAS rigs on both sides and stern refuelling. Similar to Indian *Jyoti* but with better helicopter facilities.

QINGHAI HU (old number) 8/2000, Robert Pabst / 0109677

QINGHAI HU 6/2005, A Sheldon-Duplax / 1153101

2 FUCHI CLASS (REPLENISHMENT SHIPS) (AORH)

Name **No** **Builders** **Laid down** **Launched** **Commissioned**
QIANDAO HU (ex-Fuchi) 886 Hudong Shipyard, Shanghai 2002 29 Mar 2003 30 Apr 2004
WEISHAN HU (ex-Fuchi) 887 Guangzhou Shipyard — June 2003 2004

Displacement, tons: 23,000 full load
Dimensions, feet (metres): 585.6 × 81.4 × 28.5 (178.5 × 24.8 × 8.7)
Main machinery: 2 SEMT-Pielstick diesels; 24,000 hp (17.9 MW); 2 shafts
Speed, knots: 19
Range, n miles: 10,000 at 14 kt
Complement: 130
Cargo capacity: 10,500 tons fuel, 250 tons of water, 680 tons of ammunition and stores
Guns: 8–37 mm (4 twin)
Radars: To be announced
Helicopters: Platform for 1 medium.

Comment: Ships which bear a marked resemblance to Type R22T Similan class tanker built for Thailand in 1996. Fitted with two RAS stations (one liquids, one solids) on each side. Basing 886 in the East Sea Fleet and 887 in the South Sea Fleet.

QIANDAO HU 2/2006, Lemachko Collection / 1166766

WEISHAN HU 8/2007, R G Sharpe / 1166779

6 QIONGSHA CLASS (4 AP + 2 AH)

Y 830–Y 835

Displacement, tons: 2,150 full load
Dimensions, feet (metres): 282.1 × 44.3 × 13.1 (86 × 13.5 × 4)
Main machinery: 3 SKL 8 NVD 48 A-2U diesels; 3,960 hp(m) (2.91 MW) sustained, 3 shafts
Speed, knots: 16
Complement: 59
Military lift: 400 troops; 350 tons cargo
Guns: 8 China 14.5 mm/93 (4 twin); 600 rds/min to 7 km (3.8 n miles).
Radars: Navigation: Fin Curve; I-band.

Comment: Personnel attack transports begun about 1980. Previous numbers of this class were overestimated. All South Sea Fleet. Has four sets of davits, light cargo booms serving forward and aft. No helicopter pad. Twin funnels. Carries a number of LCAs. Y 832 and Y 833 converted to Hospital Ships (AH) and painted white.

QIONGSHA 832 6/2008, 1335698

2 DADONG (TYPE 946) CLASS (SALVAGE SHIPS) (ARS)

304

Displacement, tons: 1,500 full load
Dimensions, feet (metres): 269 × 38.1 × 8.9 (82 × 11 × 2.7)
Main machinery: 2 diesels; 7,400 hp(m) (5.44 MW); 2 shafts
Speed, knots: 18
Complement: 150
Guns: 4–25 mm/80 (2 twin).
Radars: Navigation: Type 756; F-band

Comment: Built at Hudong Shipyard, Shanghai. Has a large and conspicuous crane aft. Principal role is wreck location and salvage. Based in the East Sea Fleet.

3 DAJIANG (TYPE 925) CLASS (SUBMARINE SUPPORT SHIPS) (ASRH)

CHANGXINGDAO 861 (ex-J 121) YONGXINGDAO 863 (ex-J 506)
CHONGMINGDAO 862 (ex-J 302)

Displacement, tons: 11,975 full load
Dimensions, feet (metres): 512.5 × 67.6 × 22.3 (156.2 × 20.6 × 6.8)
Main machinery: 2 MAN K9Z60/105E diesels, 9,000 hp(m) (6.6 MW); 2 shafts
Speed, knots: 20
Complement: 308
Guns: Light MGs. Can carry 6–37 mm (3 twin).
Radars: Surface search: Eye Shield, E-band.
Navigation: 2 Fin Curve; I-band.
Helicopters: 2 Aerospatiale SA 321G Super Prolon.

Comment: Submarine support and salvage ships built at Shanghai. First launched in mid-1973, operational in 1976. *Yongxingdao* has a smoke deflector on funnel. Provision for DSRV on forward well-deck aft of launching crane. Foremast on *Yongxingdao* suggests long-range communications capability, possibly for submarine command. Basing: 861 in the North Sea Fleet, 862 in the East Sea Fleet, 863 in the South Sea Fleet

CHANGXINGDAO

6/2007 / 1166868

5 DALANG (TYPE 922 II/III) CLASS (SUBMARINE SUPPORT SHIPS) (ASL)

305 (ex-503) 122 332 138

Displacement, tons: 3,700 standard; 4,200 full load
Dimensions, feet (metres): 367 × 47.9 × 14.1 (111.9 × 14.6 × 4.3)
Main machinery: 2 diesels, 4,000 hp(m) (2.94 MW); 2 shafts
Speed, knots: 16
Range, n miles: 8,000 at 14 kt
Complement: 180
Guns: 2–25 mm/80 (1 twin) or 2–14.5 mm/93 (1 twin).
Radars: Navigation: Fin Curve; I-band.

Comment: Construction of the first Type 922-II class 305 (ex-503) began at Guangzhou Shipyard in September 1971. It was commissioned in November 1975. As a result of experience gained, development of an improved Type 922-III version began in 1978. Construction of the first of these ships (122) began in December 1982 at Wuchang Shipyard, Wuhan, and the ship later commissioned in 1986. Subsequently, three further modified ships were built: 332 (1989), 138 (1992) and 510 (1995). These modifications include changes to upper deck design and the possible incorporation of a decompression chamber.

DALANG 332

5/2000, M Declerck / 0103679

2 DAZHOU (TYPE 946) CLASS (SUBMARINE TENDERS) (ASL)

502 137 (ex-504)

Displacement, tons: 1,100 full load
Dimensions, feet (metres): 259.2 × 31.2 × 8.5 (79 × 9.5 × 2.6)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 18
Complement: 130
Guns: 2 China 37 mm/63 (twin) 4–14.5 mm (2 twin).
Radars: Navigation: Fin Curve; I-band

Comment: The first, 502, commissioned in 1977; the second in 1978. Both built at Guangzhou Shipyard. 502 based in the South Sea Fleet and 137 in the North Sea Fleet. Both have been used as AGIs.

DAZHOU 502

6/2008* / 1335097

3 YANTAI CLASS (SUPPLY SHIPS) (AK)

800 901 938

Displacement, tons: 3,330 full load
Dimensions, feet (metres): 255.9 × 37.7 × 9.8 (78.0 × 11.5 × 3.0)
Main machinery: 2 diesels; 9,600 hp(m) (7.06 MW); 2 shafts
Speed, knots: 17
Range, n miles: 3,000 at 16 kt
Complement: 100
Guns: 2 China 37 mm/63 (twin).
Radars: Navigation: Type 756; I-band.

Comment: First seen in 1992. Appears to be based on a landing ship design but without a bow door. Fitted with cargo-handling cranes fore and aft. A ship with pennant number 938 has also been reported unloading missile containers. It is not known whether this is an additional ship or a change of pennant number. Based in South Sea Fleet.

YANTAI 938

6/2007 / 116685b

2 DAYUN (TYPE 904) CLASS SUPPLY SHIPS (AKH)

883 (ex-951) 884 (ex-952)

Displacement, tons: 8,500 standard; 10,975 full load
Dimensions, feet (metres): 407.5 × 42 × 12.5 (124.2 × 12.8 × 3.8)
Main machinery: 2 diesels, 9,000 hp(m) (6.6 MW); 2 shafts
Speed, knots: 22
Complement: 240
Guns: 4–37 mm/63 (2 twin), 4–25 mm/80 (2 twin)
Radars: Navigation: 2 Type 756; I-band.
Helicopters: 2 SA 321 Super Prolon

Comment: First of class completed at Hudong Shipyard in March 1992, second in August 1992. Four landing craft are embarked. Both based in South Sea Fleet. A reported third of class was in fact the first of the larger Nanyun class. Pennant numbers may have changed.

DAYUN CLASS

6/2005, A Sheldon-Duplaix / 1153100

13 DANLIN CLASS SUPPLY SHIPS (AK/AOT)

531 592 794 834 972 -3
591 594 827 835 975

Displacement, tons: 1,290 full load
Dimensions, feet (metres): 198.5 × 29.5 × 13.1 (60.5 × 9 × 4)
Main machinery: 1 USSR/PRCType 6DRN 30/50 diesel, 750 hp(m) (551 kW); 1 shaft
Speed, knots: 15
Complement: 35
Cargo capacity: 750–800 tons
Guns: 4–25 mm/80 (2 twin) 4–14.5 mm (2 twin).
Radars: Navigation: Fin Curve or Skin Head; I-band

Comment: Built in China in early 1960–62. The six AKs have refrigerated stores capability and serve in the South Sea Fleet. The seven AOTs are split between the Fleets. Not all are armed.

DANLIN 794

5/1992, Henry Dodds / 0056790

162 China/Auxiliaries

13 DANDAO CLASS (AK/AOT)

201 485 599 767 758 802 841
484 529 629 758 791 803

Displacement, tons: 1,600 full load
Dimensions, feet (metres): 215.6 × 41 × 13 (65.7 × 12.5 × 4)
Main machinery: 1 diesel; 1 shaft
Speed, knots: 12
Complement: 40
Guns: 4 China 37 mm/63 (2 twin), 4 China 14.5 mm/93 (2 twin).
Radars, Navigation: Fin Curve; I-band.

Comment: Built in the late 1970s. Similar to the Danlin class. Two in the North and one in the East Sea Fleet.

DANDAO 529

9/2007, 1135667

6 HONGQI CLASS (AK)

443 528 755 766 771 836

Displacement, tons: 1,950 full load
Dimensions, feet (metres): 203.4 × 39.4 × 14.4 (62 × 12 × 4.4)
Main machinery: 1 diesel; 1 shaft
Speed, knots: 14. **Range, n miles:** 2,500 at 11 kt
Complement: 35
Guns: 4 China 25/80 (2 twin).

Comment: Used to support offshore military garrisons. A further ship, L 202, appears to be similar but carries no armament. Others of this type in civilian use. Three in the North, two in the East Sea Fleet.

HONGQI 755

3/2003, Bob Fildes / 0569175

4 SUPPLY TANKERS (AOL)

565 631 633 641

Displacement, tons: To be announced
Dimensions, feet (metres): To be announced
Main machinery: To be announced
Speed, knots: To be announced
Complement: To be announced
Radars: To be announced.

Comment: Two supply tankers of an unknown type.

AOL 641

10/2008, Chris Settler / 1335868

2 SHENGLI CLASS (AOT)

620 621

Displacement, tons: 3,300 standard, 4,950 full load
Dimensions, feet (metres): 331.4 × 45.3 × 18 (101 × 13.8 × 5.5)
Main machinery: 1 6 ESDZ 43/82B diesel; 2,600 hp(m) (1.91 MW); 1 shaft
Speed, knots: 14. **Range, n miles:** 2,400 at 11 kt
Complement: 48
Cargo capacity: 3,400 tons dieso
Guns: 2—37 mm/63 (twin), 4—25 mm/80 (2 twin).
Radars, Navigation: Fin Curve, I-band.

Comment: Built at Hudong SY, Shanghai in late 1970s. Others of the class in commercial service.

9 LEIZHOU CLASS (AWT/AOT)

412 555 558 736 755 792 793 823 828

Displacement, tons: 900 full load
Dimensions, feet (metres): 173.9 × 32.2 × 10.5 (53 × 9.8 × 3.2)
Main machinery: 1 diesel; 500 hp(m) (367 kW); 1 shaft
Speed, knots: 12
Range, n miles: 1,200 at 10 kt
Complement: 25–30
Cargo capacity: 450 tons
Guns: 4—14.5 mm/93 (2 twin).
Radars: 2 navigation; I-band.

Comment: Built in late 1960s at Qingdao and Wudong. Split between the Fleets. Some have been converted to carry water, others carry oil. Many deleted or in civilian use.

LEIZHOU 755

10/2006, E & M Laurson / 1154863

23 FULIN CLASS (REPLENISHMENT SHIPS) (AOT)

560 583 607 626 630 634 639 924
563 589 609 628 632 635 922 941
582 606 623 629 633 638 923

Displacement, tons: 2,300 standard
Dimensions, feet (metres): 215.5 × 42.6 × 13.1 (66 × 13 × 4)
Main machinery: 1 diesel; 600 hp(m) (441 kW); 1 shaft
Speed, knots: 10
Range, n miles: 1,500 at 8 kt
Complement: 30
Guns: 4—14.5 mm/93 (2 twin).
Radars, Navigation: Fin Curve; I-band.

Comment: A total of 20 of these ships built at Hudong, Shanghai, beginning in 1972. 630, 632, 633 and 635 are to a slightly modified design. Naval ships painted grey. Many others of the class are civilian but may carry pennant numbers.

FULIN 639

6/2007 / 1166853

1 + (1) ANWEI (TYPE 920) CLASS (HOSPITAL SHIP) (AHH)

Name	No	Builders	Laid down	Launched	Commissioned
—	866	Guangzhou Shipyard International	2006	29 Aug 2007	2008

Displacement, tons: 23,000 full load
Dimensions, feet (metres): 590.5 × 80.7 × 29.5 (180 × 24.6 × 9)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 19
Range, n miles: 10,000 at 14 kt
Complement: 130
Radars: To be announced
Helicopters: 1 medium.

Comment: The first purpose-built hospital ship for the Chinese Navy was launched in August 2007 and commissioned in 2008. The design seems to be based on the Fuchi class replenishment ships. Details of the ship's medical facilities have not yet been made available but the ship is fitted with a flight deck and hangar capable of operating a medium size helicopter. Based in the South Sea Fleet. A second ship is expected.

ANWEI CLASS

8/2007 / 1166856

3 JINYOU CLASS (AOT)

622 625 675

Displacement, tons: 4,800 full load
Dimensions, feet (metres): 324.8 x 104.3 x 187.0 (99.0 x 31.8 x 5.7)
Main machinery: 1 SEMT-Pielstick 8PC2.2L diesel; 3,000 hp (2.24 MW); 1 shaft
Speed, knots: 15. **Range, n miles:** 4,000 at 10 kt
Complement: 40
Radars: Navigation: I-band.

Comment: Built by Kanashashi Shipyard, Japan and entered service 1989-90.

27 FUZHOU CLASS (AOT/AWT)

570 608 903 909 920 933 939
 573 629 904 910 926 936 940
 580 637 906 912 927 937 945
 581 644 907 913 930 938

Displacement, tons: 2,100 full load
Dimensions, feet (metres): 208.3 x 41.3 x 12.5 (63.5 x 12.6 x 3.8)
Main machinery: 1 diesel, 600 hp(m) (441 kW); 1 shaft
Speed, knots: 11
Complement: 35
Cargo capacity: 600 tons
Guns: 4—25 mm/80 (2 twin) 4—14.5 mm/93 (2 twin).
Radars: Navigation: Fin Curve; I-band.

Comment: Built 1964-70. Transport ships for liquids, 18 for oil and nine for water

FUZHOU 629 6/2007, 1166852

23 GUANGZHOU CLASS (AOTL/AWTL)

555 558 590 593 924 645 646 647 +15

Displacement, tons: 530 full load
Dimensions, feet (metres): 160.8 x 24.6 x 9.8 (49 x 7.5 x 3)
Main machinery: 1 diesel; 1 shaft
Speed, knots: 10
Complement: 19
Guns: 4 14.5 mm/93 (2 twin)

Comment: Coastal tankers built in the 1970s and 1980s. At least 18 of the class are civilian but may carry pennant numbers.

GUANGZHOU 645 10/2008, Chris Sattler / 1335669

9 YANNAN CLASS (BUOY TENDERS) (ABU)

124 263 463 982 983 B-21 B-22 B-24 B-25

Displacement, tons: 1,750 standard
Dimensions, feet (metres): 237.2 x 38.7 x 13.1 (72.3 x 11.8 x 4)
Main machinery: 2 diesels; 2,640 hp(m) (1.94 MW); 2 shafts
Speed, knots: 12
Complement: 95
Radars: Navigation: Fin Curve; I-band.

Comment: Built 1978-79; commissioned 1980. Ships with 'B' pennant numbers are probably in Coast Guard service.

YANNAN B-25 3/2004, L-G Nilsson / 1042153

9 YEN PAI CLASS (ADG)

202 203 735 736 745 746 960 883 864

Displacement, tons: 746 standard
Dimensions, feet (metres): 213.3 x 29.5 x 8.5 (65 x 9 x 2.6)
Main machinery: Diesel-electric; 2 12VE 230ZC diesels; 2,200 hp(m) (1.62 MW); 2 ZDH-99/57 motors; 2 shafts
Speed, knots: 16
Range, n miles: 800 at 15 kt
Complement: 55
Guns: 4—37 mm/63 (2 twin), 4—25 mm/80 (2 twin).
Radars: Navigation: Type 756; I-band.

Comment: Enlarged version of T 43 MSF with larger bridge and funnel amidships. Reels on quarterdeck for degaussing function. Not all the guns are embarked

YEN PAI 864 10/2008, Chris Sattler / 1335668

1 DANYAO CLASS (SUPPORT SHIP) (AF)

FUXIAN HU 888

Displacement, tons: 15,000 full load
Dimensions, feet (metres): 498.7 x 62.3 x 7 (152 x 19 x 7)
Main machinery: 2 SEMT Pielstick 16PC V 400 diesels; 24,000 hp (17.9 MW); 2 shafts
Speed, knots: To be announced
Complement: To be announced
Guns: 2—37 mm (twin).
Helicopters: Platform for one medium.

Comment: Support ship under construction at Guangzhou, and launched on 28 December 2006. The ship is equipped with two pairs of davits, capable of handling small landing craft, and a flight deck for medium helicopters. Potential roles for the ship include resupply of the Spratly and Paracel Islands in the South China Sea. Following sea trials in 2007, the ship is reported to have been commissioned in late 2007. Based in the South Sea Fleet.

FUXIAN HU 6/2008, Ships of the World / 1335664

1 TYPE 648 SUBMARINE TENDER (ASL)

911

Displacement, tons: 3,500 standard; 4,000 full load
Dimensions, feet (metres): 282.1 x 45.9 x 13.1 (86.0 x 14.0 x 4.0)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 16
Guns: 8—25 mm (4 twin)
Radars: Navigation I-band
Helicopters: Platform for one medium.

Comment: The first and only hull of its class was commissioned in 1985. The role of the ship is to provide conventional submarines with repair and maintenance facilities in addition to fuel and water. Based in the East Sea Fleet.

TYPE 648 911 10/2008, Chris Sattler / 1335670

For details of the latest updates to *Jane's Fighting Ships* online and to discover the additional information available exclusively to online subscribers please visit jfs.janes.com

1 DACHOU CLASS (YPT)

Name	No	Builders	Commissioned
—	846	Wuzhou Shipyard	Nov 2006

Displacement, tons: To be announced
Dimensions, feet (metres): 219.8 x 32.8 x 7 (67.0 x 10.0 x 2)
Main machinery: To be announced
Speed, knots: To be announced
Complement: To be announced
Guns: To be announced
Countermeasures: To be announced
Combat data systems: To be announced
Radars: To be announced
Sonars: To be announced

Comment: A new class of torpedo recovery vessel which appears very similar in design to that of the Wochi class mine countermeasures vessels on which outline details are based. Based at Zhanjiang, South Sea Fleet.

DACHOU 846 6/2008, Ships of the World / 1335653

ICEBREAKERS

1 YANBING (MOD YANHA) CLASS (AGB/AGI)

723

Displacement, tons: 4,420 full load
Dimensions, feet (metres): 334.6 x 56 x 19.5 (102 x 17.1 x 5.9)
Main machinery: Diesel-electric; 2 diesel generators; 2 motors; 2 shafts
Speed, knots: 17
Complement: 95
Guns: 8—37 mm/63 Type 61/74 (4 twin).
Radars: Navigation: 2 Fin Curve, I-band

Comment: Enlarged version of Yanha class icebreaker, built in 1982, with greater displacement, longer and wider hull, added deck level and curved upper funnel. In October 1990, painted white while operating in Sea of Japan. Used as an AGI in the North Sea Fleet.

YANBING 723 12/2001, Ships of the World / 0529115

3 YANHA CLASS (AGB/AGI)

519 721 722

Displacement, tons: 3,200 full load
Dimensions, feet (metres): 290 x 53 x 17 (88.4 x 16.2 x 5.2)
Main machinery: Diesel-electric; 2 diesel generators; 1 motor; 1 shaft
Speed, knots: 17.5
Complement: 90
Guns: 8—37 mm/63 Type 61/74 (4 twin). 4—25 mm/80 Type 61.
Radars: Navigation: Fin Curve; I-band.

Comment: 721 and 722 built in 1969–70 519 commissioned in 1969. Used as AGIs in the North Sea Fleet.

519 10/1991, G Jacobs / 0506974

TUGS

Notes: (1) The vessels below represent a cross-section of the craft available. (2) There is a salvage ship of unknown type. The pennant number is 181.

SALVAGE VESSEL 12/2007, Chris Sattler / 1170056

4 TUZHONG CLASS (ATF)

184 710 830 890

Displacement, tons: 3,600 full load
Dimensions, feet (metres): 278.5 x 46 x 18 (84.9 x 14 x 5.5)
Main machinery: 2 10 ESDZ 43/82B diesels; 8,600 hp(m) (6.32 MW); 2 shafts
Speed, knots: 18.5
Complement: 120
Radars: Navigation: Fin Curve, I-band.

Comment: Built in late 1970s. Can be fitted with twin 37 mm AA armament and at least one of the class (710) has been fitted with a Square Tie radar. 36 ton towing winch. One in each Fleet and one in reserve.

TUZHONG 11/1996, A Sharma / 0012228

1 DAOZHA CLASS (ATF)

Displacement, tons: 4,000 full load
Dimensions, feet (metres): 275.6 x 41.3 x 17.7 (84 x 12.6 x 5.4)
Main machinery: 2 diesels; 8,600 hp(m) (6.32 MW); 2 shafts
Speed, knots: 18
Complement: 125

Comment: Built in 1993–94 probably as a follow-on to the Tuzhong class. Based in South Sea Fleet.

DAOZHA 09/1993, Hachiro Nakai / 0506142

10 HUJIU CLASS (ATF)

147 622 717 842 875
 155 711 837 843 877

Displacement, tons: 1,470 full load
Dimensions, feet (metres): 197.5 x 38.1 x 14.4 (60.2 x 11.6 x 4.4)
Main machinery: 2 LVP 24 diesels; 1,800 hp(m) (1.32 MW); 2 shafts
Speed, knots: 15
Range, n miles: 7,200 at 14 kt
Complement: 56
Radars: Navigation: Fin Curve or Type 756; I-band.

Comment: Built at Wuhu in 1980s. One sold to Bangladesh in 1984 and a second in 1995. Three based in the North and East, three in the South Sea Fleet

HUJIU 877 10/2006, E & M Laursen / 1164866

17 GROMOVOY CLASS (ATF)

149	167	684	809	814	824
156	680	716	811	817	827
166	683	802	813	822	

Displacement, tons: 795 standard, 890 full load
Dimensions, feet (metres): 149.9 x 31.2 x 15.1 (45.7 x 9.5 x 4.6)
Main machinery: 2 diesels, 1,300 hp(m) (956 kW); 2 shafts
Speed, knots: 11. **Range, n miles:** 7,000 at 7 kt
Complement: 25-30 (varies)
Guns: 4—14.5 mm (2 twin) or 12.7 mm (2 twin) MGs.
Radars: Navigation: Fin Curve or OKI X NE-12 (Japanese); I-band.

Comment: Built at Luda Shipyard and Shanghai International, 1958–62. Four in North Sea Fleet, nine in East Sea Fleet and four in South Sea Fleet.

GROMOVOY 716 9/2007 / 1335664

20 ROSLAVL CLASS (ATA/ARS)

153	168	613	704	853	863
159	518	618	707	854	867
161–164	604	646	852	862	

Displacement, tons: 670 full load
Dimensions, feet (metres): 149.9 x 31 x 15.1 (45.7 x 9.5 x 4.6)
Main machinery: Diesel-electric; 2 diesel generators; 1,200 hp(m) (882 kW); 1 motor; 1 shaft
Speed, knots: 12
Range, n miles: 6,000 at 11 kt
Complement: 28
Guns: 4—14.5 mm (2 twin) MGs.

Comment: Built in China in mid-1960s to the USSR design. One carries diving bell and submarine rescue gear on stern and is classified as ARS. Split evenly between the fleets.

ROSLAVL 852 10/2008*, Chris Sattler / 1335665

MARITIME MILITIA (MBDF)

Notes: (1) China has four regular paramilitary maritime Security Forces: the Customs Service (*Hai Guan*); the maritime section of the Public Security Bureau (*Hai Gong*); the maritime command (*Gong Bian*) of the Border Security Force (which is itself a part of the PLA-subordinated People's Armed Police); and the Border Defence Coast Guard (*Bian Jian*)

These four organisations patrol extensively with a variety of vessels. In recent years the better disciplined and centrally controlled *Hai Guan* has received a significant number of new vessels, many of them with offshore capabilities. A number of Haitun helicopters are also in service.

(2) Types of vessels vary from Huxins, Shanghai IIs and Huludaos to a number of other designs spread across all forces. For example Huxin and Huludao classes can show the markings of all four services.

(3) From December 1999 pennant numbers have been standardised to show the vessels' legitimate operating area. This is an attempt to crack down on illegal activities by making it easier for merchant ships to report violations to the Maritime Police (*Hai Gong*), who have taken overall responsibility

- a. 海关 HAI GUAN (HOI KWAN) – CUSTOMS
- b. 海公 HAI GONG (HOI KUNG) – MARITIME POLICE
- c. 公边 GONG BIAN (KUNG BIN) – BORDER SECURITY
- d. 边检 BIAN JIAN (PIN KAM) – BORDER DEFENCE

CUSTOMS (HAI GUAN)

Notes: A new class of 20-24 Qui-M class offshore patrol craft is reported to have entered service. Armed with twin 30 mm guns, a distinguishing feature is a stern ramp to facilitate the handling of high-speed interceptor craft. At 100 m length, they are substantially larger than previous Customs vessels and, despite appearances, there has been some speculation as to whether these craft are manned by naval personnel.

**HULUDAO CLASS (TYPE 206)
(FAST ATTACK CRAFT—PATROL) (PC)**

Displacement, tons: 180 full load
Dimensions, feet (metres): 147.6 x 21 x 5.6 (45 x 6.4 x 1.7)
Main machinery: 3 MWMTBD604BV12 diesels; 5,204 hp(m) (3.82 MW) sustained; 3 shafts
Speed, knots: 29. **Range, n miles:** 1,000 at 15 kt
Complement: 24 (6 officers)
Guns: 6 China 14.5 mm Type 82 (3 twin); 600 rds/min to 7 km (3.8 n miles); weight of shell 1.42 kg.

Comment: EEZ patrol craft first seen at Wuxi Shipyard in 1988. The craft is sometimes referred to as the Wuting class.

HAI GONG HULUDAO 6/1995, 0056810

7 TYPE P 58E (COMMAND SHIPS) (AGF)

901–907

Displacement, tons: 435 full load
Dimensions, feet (metres): 190.3 x 24.9 x 7.5 (58 x 7.6 x 2.3)
Main machinery: 4 MTU diesels; 8,720 hp(m) (6.4 MW) sustained; 4 shafts
Speed, knots: 27. **Range, n miles:** 1,500 at 12 kt
Complement: 50
Guns: 2 China 14.5 mm/93 (twin) MGs.
Radars: Surface search. I-band.

Comment: First one built at Guangzhou in 1990, last one in 1998. Less well armed but similar to those in service with Pakistan's MSA. Used as command ships.

HAI GUAN 901 1993, T Hollingsbee / 0056811

42 COASTAL PATROL CRAFT (NEW) (PB)

801–842

Displacement, tons: 98 full load
Dimensions, feet (metres): 101.7 x 15.4 x 4.6 (31 x 4.7 x 1.4)
Main machinery: 2 diesels, 2 shafts
Speed, knots: 32
Complement: 15
Guns: 2 China 14.5 mm/93 (twin).
Radars: Surface search: Racal Decca ARPA; I-band

Comment: Building in Shanghai at about six a year since 1992. More may follow.

HAI GUAN 812 1993, T Hollingsbee / 0506273

166 China/Customs (Hai Guan) — Coast guard (Gong Bian)

COASTAL PATROL CRAFT (OLD) (PB)

Comment: Shanghai type hull but with a different superstructure. Two twin 14.5 mm MGs. Being phased out and replaced by the 800 series of patrol craft.

HAI GUAN 82

6/1995 / 0056817

2 COMBATBOAT 90E (PBF)

Displacement, tons: 9 full load
Dimensions, feet (metres): 39 × 9.5 × 2.3 (11.9 × 2.9 × 0.7)
Main machinery: 1 Scania AB DSI 14 diesel; 398 hp(m) (293 kW); waterjet
Speed, knots: 40
Complement: 2

Comment: Two delivered to Hai Guan in April 1997. This is the transport version of the Swedish raiding craft and can lift two tons of stores or 8-10 troops.

COMBATBOAT 90E (Swedish colours)

5/1998, Per Körnefeldt / 0056813

COAST GUARD (GONG BIAN)

Notes: The 2006 Defence White Paper gave prominence to improvement to border and maritime security affairs and, in that context, the emergence of a Coast Guard as a distinct force is a logical result of that process. It is unclear whether the force is controlled by a national command structure or whether forces are commanded at the local (provincial) level. It is likely that the new organisation will have subsumed some, if not all, of the functions and seagoing units of the Gong Bian (Border Security Force) but this has not been confirmed. Neither is it clear to what extent other constituents of the Maritime Militia (Customs, Maritime Police and Border Defence) have been affected. While details of major units are given, there is reported also to be a large number of smaller inshore craft.

7/2007 / 1170053

1 OFFSHORE PATROL SHIP (PSO)

HAIJING 1001

Displacement, tons: 1,000 approx
Dimensions, feet (metres): To be announced
Main machinery: To be announced
Speed, knots: To be announced
Complement: To be announced
Guns: 1—37 mm
Radars: Surface search E/F-band
Navigation: I-band

Comment: Coastal patrol ship, possibly called *Pudong*, built for the China Coast Guard.

HAIJING 1001

6/2007 / 1166851

2 JIANGHU CLASS (PSOH)

HAIJING 1002 (ex-609)

HAIJING 1003 (ex-510)

Displacement, tons: 1,425 standard; 1,702 full load
Dimensions, feet (metres): 338.5 × 35.4 × 10.2 (103.2 × 10.8 × 3.1)
Main machinery: 2 Type 12E 390V diesels; 14,400 hp(m) (10.6 MW) sustained; 2 shafts
Speed, knots: 26
Range, n miles: 4,000 at 15 kt
Complement: To be announced
Guns: 1—37 mm, 4—14.5 (2 twin) MGs.
Radars: Surface search E/F-band
Navigation: I-band
Helicopters: 1 medium.

Comment: Two former Jianghu-class frigates transferred from the PLAN to the Coast Guard in March 2007 and recommissioned in July 2007. The ships were originally built in the 1970s. Modifications to the ships include removal of all the previous missile and gun armament and changes to the superstructure to include an upper deck at 01-deck level and two sets of davits aft for high-speed interception craft. The new armament includes a single-barrel 37 mm gun forward and two twin 14.5 mm machine guns aft of the funnel. There are also two water cannons forward.

HAIJING 1002

7/2007 / 1166850

HUXIN CLASS (PB)

Displacement, tons: 185 full load
Dimensions, feet (metres): 91.9 × 13.8 × 5.2 (28 × 4.2 × 1.6)
Main machinery: 2 diesels; 1,000 hp(m) (735 kW); 2 shafts
Speed, knots: 17
Range, n miles: 400 at 10 kt
Complement: 26
Guns: 2 China 14.5 mm/93 (twin).
Radars: Surface search Skin Head; I band.

Comment: This is a class of modified Huangpu design with a greater freeboard and a slightly larger displacement. First seen in 1989 and now in series production. Huxin 178 is a modified command vessel with a forward superstructure extension.

HUXIN 44091

6/2005 / 1164340

COASTAL PATROL CRAFT (NEW) (PB)

Displacement, tons: 58 full load
Dimensions, feet (metres): 73.8 × 15.7 × 5.2 (22.5 × 4.8 × 1.6)
Main machinery: 2 diesels; 1,600 hp(m) (1.18 MW); 2 shafts
Speed, knots: 22. **Range, n miles:** 850 at 11 kt
Complement: 13
Guns: 2 — 14.5 mm (twin).
Radars, Surface search: I-band.

Comment: Large numbers of this type in all Fleet areas. Armaments vary

GONG BIAN 4401 6/1999 0056807

GONG BIAN 4407 6/1997, 0017754

COASTAL PATROL CRAFT (OLD) (PB)

Displacement, tons: 82 full load
Dimensions, feet (metres): 82 × 13.5 × 4.6 (25 × 4.7 × 1.4)
Main machinery: 2 diesels; 900 hp(m) (662 kW); 2 shafts
Speed, knots: 14
Range, n miles: 900 at 11 kt
Complement: 12
Guns: 4 — 14.5 mm/93 2 (twin).
Radars, Surface search: Fin Curve; I-band.

Comment: Large numbers of this type still extensively used although numbers are declining in favour of Huxin and the newer CPC design.

GONG BIAN 1301 3/1995, van Ginderen Collection / 0056808

STEALTH CRAFT (PBF)

Comment: Since 1996 large numbers of low profile stealth craft have been active in the South Sea areas, and have been reported as far away as the Philippines. Sizes vary from 30 to 60 m in length and many are capable of speeds in excess of 30 kt. Most are paramilitary vessels but some may be privately owned.

STEALTH 8/1996 / 0012232

INSHORE PATROL CRAFT (PBI)

Displacement, tons: 32 full load
Dimensions, feet (metres): 82 × 13.1 × 3.6 (18.9 × 4 × 1.1)
Main machinery: 2 diesels; 900 hp(m) (662 kW); 2 shafts
Speed, knots: 15
Complement: 5
Guns: 1 — 12.7 mm MG.

Comment: Details given are for the standard small patrol craft. In addition there are a number of speedboats confiscated from smugglers and used for interception duties.

GONG BIAN 3110 4/1998, 0017765

GONG BIAN SPEEDBOAT 2/1995, T Hollingsbee / 0056809

MARITIME SAFETY ADMINISTRATION

Notes: The China Coast Guard (Maritime Safety Administration), part of the Ministry of Communications, was established in 1998 and is responsible for safety at sea, security and pollution control in Chinese offshore waters, ports and inland rivers. The agency reportedly operates some 150 vessels which are painted white with a large diagonal red stripe and four thin blue stripes.

MSA 1015 12/2007, Chris Sattler / 1335663

MSA 1005 10/2008*, Chris Sattler / 1335662

1 HAIXUN 21 CLASS (PBOH)**HAIXUN 21**

Displacement, tons: 1,500 full load
Dimensions, feet (metres): 305.8 × 40.0 × 17.7 (93.2 × 12.2 × 5.4)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 22
Radars, Navigation:
Helicopters: Platform for one medium.

Comment: Commissioned in 2003. Conducted joint exercises with the Japanese Coast Guard in May 2004.

HAIXUN 21 5/2004, Hachiro Nakai / 0589002

1 + 1 HAIXUN 31 CLASS (PBOH)**HAIXUN 31**

Displacement, tons: 3,000 full load
Dimensions, feet (metres): 367.4 × 45.9 × 16.4 (112.0 × 14.0 × 5.0)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 18
Radars, Navigation:
Helicopters: 1 medium.

Comment: Commissioned on 22 February 2005. The ship is equipped with a hangar and flight deck. A second ship is reported to be under construction

Colombia

ARMADA DE LA REPUBLICA

Country Overview

The Republic of Colombia is the only South American country that fronts both the Caribbean Sea and the Pacific Ocean with coastlines of 950 n miles and 782 n miles respectively. With an area of 440,831 square miles, it is bordered to the north by Panama, to the east by Venezuela and Brazil and to the south by Peru and Ecuador. The capital and largest city is Bogotá. Buenaventura and Tumaco are the main Pacific ports while Cartagena, Santa Marta and Barranquilla, which is near the mouth of the principal river and transport artery, the Magdalena, are on the Caribbean side. Territorial seas (12 n miles) are claimed but while it has claimed a 200 n mile EEZ, its limits have not been fully defined.

Headquarters Appointments

Commander of the Navy:
Admiral Guillermo Enrique Barrera Hurtado
Deputy Commander and Chief of Staff of the Navy:
Vice Admiral Carlos Humberto Pineda Gallo
Inspector General:
Vice Admiral Jaime Parra Cifuentes
Chief of Naval Operations:
Vice Admiral Guillermo Edgar Augusto Cely Nuñez
Chief of Naval Intelligence:
Rear Admiral Cesar Augusto Narvaez Arciniegas
Commander Caribbean Force:
Rear Admiral Roberto Garcia Marquez
Chief of Logistics:
Rear Admiral Hugo de Jesus Garcia Nursery
Commander Marine Corps:
Brigadier General Fernando Ortiz Poland
Commander Pacific Force:
Rear Admiral Flaminio Orlando Malaver Calderon
Commander South Force:
Colonel Luis Jesús Suarez Castillo

Personnel

(a) 2009: 12,000 (Navy); 9,000 (Marines); 200 (Coast Guard); 100 (Aircrew)
(b) 2 years' national service (few conscripts in the Navy)

Organisation

Caribbean Force Command: HQ at Cartagena
Pacific Force Command: HQ at Bahía Málaga.
Naval Force South: HQ at Puerto Leguizamo.
Riverine Brigade: HQ at Bogotá, DC.
Coast Guard: HQ at Bogotá.

Bases

ARC Bolívar, Cartagena, Main naval base (floating dock, 1 slipway), schools
ARC Bahía Málaga, Major Pacific base.
ARC Barranquilla: Naval training base.
ARC Puerto Leguizamo: Putumayo River base.
Turbo: Minor River base
Puerto López: Minor River base.
Puerto Carreño: Minor River base.
Inírida: Minor River base
San Andrés y Providencia: Specific Command

Marine Corps

Organisation: First Brigade (Corozal),
BAFIM 1 (San Andrés)
BAFIM 2 (Cartagena)
BAFIM 3 (Malagena)
BAFIM 4 (Corozal)
CFENIM Training Battalion (Coveñas)
Second Riverine Brigade (Bogotá)
BASFLIM 3 (Bahía Solano)
BASFLIM 4 (Bahía Málaga)
No. 70 Battalion (Tumaco)
No. 80 Battalion (Buenaventura)
No. 10 Battalion (Guapi)

Prefix to Ships' Names

ARC (Armada Republica de Colombia)

Dimar

Maritime authority in charge of hydrography and navigational aids.

Coast Guard and Customs (DIAN)

The Coast Guard was established in 1979 but then gave way to the Customs Service before being re-established in January 1992 under the control of the Navy. Headquarters at Bogotá. Main bases are Cartagena, Buenaventura y Turbo and Valle. Ships have a red and yellow diagonal stripe on the hull and patrol craft have a PM number. Customs craft were absorbed into the Coast Guard but by 1995 were again independent as part of the DIAN (Direccion de Impuestos y Aduanas Nacionales). Customs craft have Aduana written on the ship's side, a thick and two thin diagonal stripes and have AN numbers.

SUBMARINES

Notes: (1) Three Swimmer Delivery Vehicles were acquired in 1970: *Defensora* (LS 15), *Poderosa* (LS 16) and *Protectora* (LS 17)
 (2) Replacement of the Cosmos midget submarines is under consideration. Procurement of ex-German 206A class is a possibility.

2 PIJAO (TYPE 209/1200) CLASS (SS)

Name	No	Builders	Laid down	Launched	Commissioned
PIJAO	SO 28	Howaldtswerke, Kiel	1 Apr 1972	10 Apr 1974	18 Apr 1975
TAYRONA	SO 29	Howaldtswerke, Kiel	1 May 1972	16 July 1974	16 July 1975

Displacement, tons: 1,180 surfaced; 1,285 dived
Dimensions, feet (metres): 183.4 × 20.5 × 17.8 (55.9 × 6.3 × 5.4)
Main machinery: Diesel-electric; 4 MTU 12V 493 AZ80 diesels; 2,400 hp(m) (1.76 MW) sustained; 4 AEG alternators; 1.7 MW; 1 Siemens motor; 4,600 hp(m) (3.38 MW) sustained; 1 shaft
Speed, knots: 22 dived; 11 surfaced
Range, n miles: 8,000 at 8 kt surfaced; 4,000 at 4 kt dived
Complement: 34 (7 officers)

Torpedoes: 8–21 in (533 mm); bow tubes. 14 AEG SUT; dual purpose; wire-guided; active/passive homing to 12 km (6.5 n miles) at 35 kt; 28 km (15 n miles) at 23 kt; warhead 250 kg. Swim-out discharge.
Countermeasures: ESM Thomson-CSF DR 2000; intercept.
Weapons control: Signaal M8/24TFC5.
Radars: Surface search Thomson-CSF Calypso II; I-band.
Sonars: Krupp Atlas PSU 83-55; hull-mounted; active/passive search and attack; medium frequency Atlas Elektronik PRS 3-4; passive ranging; integral with CSU 3.

Programmes: Ordered in 1971.
Modernisation: Both boats were refitted by HDW at Kiel 1990–91; main batteries were replaced. Further refits were carried out at Cotecmar; *Pijao* 1999–2002 and *Tayrona* 2003–06. Further modernisation at Cotecmar is planned, possibly with ADW assistance.
Structure: Single-hulled. Diving depth, 820 ft (250 m).
Operational: Both boats employed on counter-drug operations.

PIJAO

4/2008*, Marco Ghigino / 1335712

2 MIDGET SUBMARINES (SSW)

Name	No	Builders	Launched	Commissioned
INTRÉPIDO	ST 20	Cosmos, Livorno	1 Jan 1972	17 Apr 1973
INDOMABLE	ST 21	Cosmos, Livorno	1 Jan 1972	17 Apr 1973

Displacement, tons: 58 surfaced, 70 dived
Dimensions, feet (metres): 75.5 × 13.1 (23 × 4)
Main machinery: Diesel-electric; 1 diesel; 1 motor; 300 hp(m) (221 kW); 1 shaft
Speed, knots: 11 surfaced; 6 dived

Range, n miles: 1,200 surfaced, 60 dived
Complement: 8
Mines: 6 Mk 21 with 300 kg warhead. 8 Mk 11 with 50 kg warhead.

Comment: They can carry eight swimmers with 2 tons of explosive as well as two swimmer delivery vehicles (SDVs). Built by Cosmos, Livorno and commissioned at 40 tons, but subsequently enlarged in the early 1980s. Listed by the Navy as 'Tactical Submarines'.

INTRÉPIDO

2000, Colombian Navy / 0103690

FRIGATES

Notes: Replacement of the Almirante Padilla class from about 2026 is under consideration.

4 ALMIRANTE PADILLA CLASS (TYPE FS 1500) (FLGHM)

INDEPENDIENTE	FL 54	Howaldtswerke, Kiel	22 June 1981	21 Jan 1983	24 July 1984

Displacement, tons: 1,500 standard; 2,100 full load
Dimensions, feet (metres): 325.1 x 37.1 x 12.1
 (99.1 x 11.3 x 3.7)
Main machinery: 4 MTU 20V 1163 TB92 diesels, 23,400 hp(m) (17.2 MW) sustained; 2 shafts; cp props
Speed, knots: 27; 18 on 2 diesels
Range, n miles: 7,000 at 14 kt; 5,000 at 18 kt
Complement: 94

Missiles: SSM: 4 Aerospatiale MM 40 Exocet ●; inertial cruise; active radar homing to 70 km (40 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
SAM: 2 Matra Simbad twin launchers ●; Mistral; IR homing to 4 km (2.2 n miles); warhead 3 kg; anti-sea-skimmer.
Guns: 1 OTO Melara 3 in (76 mm)/62 compact ●; 85 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.
 2 Breda 40 mm/70 (twin) ●; 300 rds/min to 12.5 km (6.8 n miles) anti-surface; weight of shell 0.96 kg.
 2—12.7 mm MGs.
Torpedoes: 6—324 mm ILAS 3 (2 triple) tubes ●; Whitehead A244S; anti-submarine; active/passive homing to 7 km (3.8 n miles); warhead 38 kg (shaped charge)
Countermeasures: Decoys: 1 CSEE Degaie double mounting; IR flares and chaff decoys (H- to J-band).
ESM: Argo AC672; radar warning.
ECM: Rascal Scimitar; jammer.

ALMIRANTE PADILLA

(Scale 1 : 900), Ian Sturton / 0056815

Combat data systems: Thomson-CSF TAVITAC action data automation. Possibly Link Y fitted.
Weapons control: 2 Canopus optronic directors. Thomson-CSF Vega II GFCS.
Radars: Air/surface search: Thomson-CSF Sea Tiger ●; E/F-band; range 110 km (60 n miles) for 2 m² target.
 Navigation: Furuno; I-band.
Fire control: Castor II B ●; I/J-band, range 15 km (8 n miles) for 1 m² target
 IFF: Mk 10
Sonars: Atlas Elektronik ASO 4-2; hull-mounted; active attack; medium frequency.

Helicopters: 1 MBB BO 105 CB ● or 1 Bell 412.
Programmes: Order for four Type FS 1500 placed late 1980. Reclassified as light frigates in 1999. Similar to Malaysian Kasturi class frigates.
Modernisation: Mistral SAM system fitted. Helicopter deck lengthened by 2 m to take Bell 412 aircraft. There have also been minor modifications to ship systems and superstructure. A major modernisation period began at Cotecmar in 2008. Antioquia is to receive new engines and new radars are also reported to be part of the package

SHIPBORNE AIRCRAFT

Numbers/Type: 2 MBB BO 105CB
Operational speed: 113 kt (210 km/h)
Service ceiling: 9,854 ft (3,000 m)
Range: 407 n miles (754 km)
Role/Weapon systems: Surface search and limited ASW helicopter. **Sensors:** Search/weather radar **Weapons:** ASW; provision to carry depth bombs. ASV; light attack role with machine gun pods.

BO 105 2000, Colombian Navy / 0103692

Numbers/Type: 2 Eurocopter AS 555 Fennec.
Operational speed: 121 kt (225 km/h)
Service ceiling: 13,125 ft (4,000 m)
Range: 389 n miles (722 km)
Role/Weapon systems: OTH capability for surface-to-surface role. Also used for logistic support. More are being acquired. **Sensors:** Bendix RDR 1500B radar. **Weapons:** Torpedoes may be fitted in due course.

AS 555 6/2000, Colombian Navy / 0103693

Numbers/Type: 4 Bell 412.
Operational speed: 122 kt (226 km/h)
Service ceiling: 10,000 ft (3,300 m)
Range: 500 n miles (744 km)
Role/Weapon systems: Multipurpose used mostly for surveillance, troop transport and logistic support. **Sensors:** Weather radar. **Weapons:** ASV 7.62 mm MG can be carried.

BELL 412 6/1999, Colombian Navy / 0056820

Numbers/Type: 1 Bell UH-1N Twin Huey.
Operational speed: 110 kt (204 km/h)
Service ceiling: 10,000 ft (3,048 m)
Range: 230 n miles (426 km)
Role/Weapon systems: Light Utility platform for all-weather assault, transport, airborne command and control, armed reconnaissance and SAR. Can carry eight manne. To enter service in 2009. **Sensors:** BRITE Star FLIR. **Weapons:** Can be armed with 12.7 mm or 7.62 mm machine guns and 2.75 in rockets.

UH-1N (US Navy colours) 5/1999, A Sharma / 0084120

LAND-BASED MARITIME AIRCRAFT

Notes: The Navy operates the following fixed-wing aircraft for maritime surveillance and transport: four RC690, six Navajo PA-31, six Cessna 206, one Cessna 150, two Cessna 208B, one Beech B-350, two Gavillian 358, one Gulfstream I and two PA-28 Cherokee. There are also two Bell 212 and one Eurocopter BK-117.

Numbers/Type: 4 Casa CN-235 200
Operational speed: 210 kt (384 km/h)
Service ceiling: 24,000 ft (7,315 m)
Range: 2,000 n miles (3,218 km)
Role/Weapon systems: EEZ surveillance. First two delivered in 2003. Two further aircraft ordered in 2007 for delivery in 2009. **Sensors:** Search radar Bendix APS 504(V)6; FLIR. **Weapons:** Unarmed.

CN-235 6/2003, CASA / 0587695

PATROL FORCES

Notes: (1) Three Orca class 12 m fast intercept craft, capable of 40 kt, entered service in 2003. (2) Two Bravo 36 patrol craft, capable of 35 kt, are based at Covenas.

VALLE DEL CAUCA (ex-Durable)	PO 44 (ex-WMEC 628)	Coast Guard Yard, Baltimore	8 Dec 1967

Displacement, tons: 1,129 full load
Dimensions, feet (metres): 210.5 x 34 x 10.5 (64.2 x 10.4 x 3.2)
Main machinery: 2 Alco 16V-251 diesels, 6,480 hp (4.83 MW) sustained; 2 shafts; LIPS cp props
Speed, knots: 18 **Range, n miles:** 6,100 at 14 kt; 2,700 at 18 kt
Complement: 75 (12 officers)
Guns: 1 Boeing 25 mm/87 Mk 38 Bushmaster; 200 rds/min to 6.8 km (3.4 n miles). 2 - 12.7 mm MGs
Radars: Surface search. Hughes/Furuno SPS-73, I-band.
Helicopters: Platform for one medium.

Comment: Transferred to Colombia on 4 September 2003. During 34 years in USCG service, underwent Major Maintenance Availability (MMA) in 1989. The exhausts for main engines, ship service generators and boilers were run in a vertical funnel which reduced flight deck size. Capable of towing ships up to 10,000 tons. Based in the Pacific.

VALLE DEL CAUCA 6/2008* / 1335710

2 LAZAGA CLASS (FAST ATTACK CRAFT—GUN) (PBO)

Name	No	Builders	Commissioned
CAPITÁN PABLO JOSÉ DE PORTO (ex-Recaide)	PO 42 (ex-PM 116, ex-P 06)	Bazán, La Carraca	17 Dec 1977
CAPITÁN JORGE ENRIQUE MARQUEZ DURAN (ex-Cadarso)	PO 43 (ex-PM 117, ex-P 03)	Bazán, La Carraca	10 July 1976

Displacement, tons: 393 full load
Dimensions, feet (metres): 190.6 x 24.9 x 8.5 (58.1 x 7.6 x 2.6)
Main machinery: 2 MTU/Bazán 18V 956 TB 91 diesels; 7,500 hp(m) (5.5 MW) sustained; 2 shafts
Speed, knots: 26 **Range, n miles:** 2,400 at 15 kt
Complement: 40 (4 officers)
Guns: 1 Breda 40 mm/70. 1 Oerlikon 20 mm L85. 1 - 12.7 mm MG.
Weapons control: CSEE optical director
Radars: Surface search: Furuno; E/F-band.
Navigation: Furuno; I-band.

Comment: Paid off from the Spanish Navy in 1993 and put into reserve. Acquired by Colombia in March 1997 for extensive refurbishment at Bazán, San Fernando. Recommissioned 25 April 1998 and 25 June 1998 respectively. Radars have been changed and the 76 mm gun replaced by a 20 mm cannon. These ships may be used to carry troops. Four more of the class are available and more may be acquired in due course.

CAPITÁN JORGE ENRIQUE MARQUEZ DURAN 6/2001, Maritime Photographic / 0114510

1 CORMORAN CLASS (FAST ATTACK CRAFT—GUN) (PBO)

Name	No	Builders	Commissioned
ESPARTANA (ex-Cormoran)	PO 41	Bazan, San Fernando	27 Oct 1989

Displacement, tons: 358 full load
 Dimensions, feet (metres): 185.7 x 24.7 x 6.5 (56.6 x 7.5 x 2)
 Main machinery: 3 MTU-Bazan 16V 956TB91 diesels; 11,250 hp(m) (8.27 MW) sustained; 3 shafts
 Speed, knots: 32. Range, n miles: 2,500 at 15 kt
 Complement: 31 (5 officers)
 Guns: 1 Bofors 40/70 SP 48. 1 Oerlikon 20 mm
 Weapons control: Alcor C optronic director.
 Radars: Surface search: Raytheon; I-band

Comment: Built with overseas sales in mind, this ship was launched in October 1985, but from 1989 served in the Spanish Navy until April 1994 when she was laid up at Cartagena. Transferred in September 1995, she was then refitted at Cadiz, before sailing for Colombia in mid-1996. Based at San Andres Island and belongs to the Coast Guard

ESPARTANA 6/2008* / 1335709

1 BALSAM CLASS (PSO)

Name	No	Builders	Commissioned
SAN ANDRES (ex-Gentian)	PO 45 (ex-WIX 290)	Zenith Dredge Corporation, Duluth	3 Nov 1942

Displacement, tons: 1,034 full load
 Dimensions, feet (metres): 180 x 37 x 12 (54.9 x 11.3 x 3.8)
 Main machinery: Diesel electric; 2 diesels; 1,402 hp (1.06 MW); 1 motor; 1,200 hp (895 kW); 1 shaft; bow thruster
 Speed, knots: 13. Range, n miles: 8,000 at 12 kt
 Complement: 53
 Guns: To be announced.
 Radars: Navigation: Raytheon SPS-64(V)1.

Comment: Following overhaul at Boston, transferred from the US Coast Guard on 15 October 2007

BALSAM CLASS (Estonian colours) 6/2003, Hartmut Ehlers / 0561497

4 POINT CLASS (PB)

Name	No	Builders	Commissioned
CABO CORRIENTES (ex-Point Warde)	PC 141 (ex-82368)	J M Martinac, Tacoma	14 Aug 1967
CABO MANGLARES (ex-Point Wells)	PC 142 (ex-82343)	USCG Yard, Curtis Bay	20 Nov 1963

CABO DE LA VELLA (ex-Point Sal)	PC 144 (ex-82352)	J M Martinac, Tacoma	5 Dec 1966

Displacement, tons: 66, 69 full load
 Dimensions, feet (metres): 83 x 17.2 x 5.8 (25.3 x 5.2 x 1.8)
 Main machinery: 2 Caterpillar 3412 diesels; 1,600 hp (1.19 MW); 2 shafts
 Speed, knots: 23.5. Range, n miles: 1,500 at 8 kt
 Complement: 10 (1 officer)
 Guns: 2—12.7 mm MGs.
 Radars: Surface search: Hughes/Furuno SPS-73; I-band.

Comment: Steel hulled craft with aluminium superstructure built in United States 1960-70. Cabo Corrientes transferred on 29 June 2000 followed by Cabo Manglares on 13 October 2000. Cabo Tiburon and Cabo de la Vella transferred on 8 February 2001 and 29 May 2001 respectively

CABO DE LA VELLA 6/2008* / 1335714

0 + 1 OFFSHORE PATROL VESSELS (PSO)

Displacement, tons: 1,790 full load
 Dimensions, feet (metres): 272.0 x 42.6 x 13.1 (82.9 x 13.0 x 4.0)
 Main machinery: 2 diesels, 10,940 hp (8.2 MW); 2 shafts
 Speed, knots: 20. Range, n miles: 7,500 at 12 kt
 Complement: 40
 Guns: 1—18 mm. 2—12.7 mm MGs.
 Radars: Surface search: Hughes/Furuno SPS-73; I-band.
 Helicopters: Platform for one medium.

Comment: Damen designed offshore patrol ship to be built at Cotecmar. Construction is to begin in 2009

3 ARAUCA CLASS (RIVER GUNBOATS) (PBR)

Name	No	Builders	Commissioned
RIOHACHA	PF 135 (ex-35)	Union Industrial de Barranquilla	6 Sep 1956
LETICIA	PF 136 (ex-36)	Union Industrial de Barranquilla	6 Sep 1956
ARAUCA	PF 137 (ex-37)	Union Industrial de Barranquilla	6 Sep 1956

Displacement, tons: 275 full load
 Dimensions, feet (metres): 163.5 x 27.2 x 8.9 (49.9 x 8.3 x 2.7)
 Main machinery: 2 Caterpillar diesels; 916 hp (683 kW); 2 shafts
 Speed, knots: 14. Range, n miles: 1,890 at 14 kt
 Complement: 43; 39 plus 6 orderlies
 Guns: 2 USN 3 in (76 mm)/50 Mk 26. 4 Oerlikon 20 mm (Riohacha and Arauca) 1—40 mm; 4—20 mm (Leticia).

Comment: Launched in 1955. Based in Naval Force South

ARAUCA 1991, Colombian Navy 0056821

6 + 1 (3) NORDRIZA CLASS (PATROL SUPPORT VESSELS) (PBR)

SSCIM SENEN ALBERTO ARANGO	TONY PASTRANA CONTRERAS
NF 607 (ex-NF 147)	NF 611 (ex-NF 149)
CPCIM GUILLERMO LONDOÑO	CTCIM JORGE MORENO SALAZAR
VARGAS NF 608 (ex-NF 146)	NF 612
MARIO VILLEGAS NF 610	JUAN RICARDO OYOLA VERA NF 613

Displacement, tons: 280
 Dimensions, feet (metres): 126.0 x 31.2 x 3.1 (38.4 x 9.5 x 0.95)
 Main machinery: Diesels
 Speed, knots: 9
 Complement: 18 plus 82 troops
 Guns: 8—12.7 mm MGs (4 twin). 1 Mk 19 grenade launcher
 Helicopters: Platform (NF 612, 613) for 1 small.

Comment: Powerfully armed river patrol vessels. Built to an innovative design by Cotecmar, Cartagena, in three batches: Batch I (NF 607, 608), Batch II (NF 610, 611) and Batch III (NF 612, 613). Batch III ships have a helicopter deck. A seventh and eighth ship were under construction in 2008 and two further ships are expected.

OYOLA VERA 6/2008* / 1336708

3 + 47 LPR-40 CLASS (RIVER PATROL CRAFT) (PB)

Displacement, tons: 13.7 full load
 Dimensions, feet (metres): 41.7 x 9.2 x 2.3 (12.72 x 2.8 x 0.7)
 Main machinery: 2 Caterpillar C9 diesels; 503 hp (375 kW); 2 waterjets
 Speed, knots: 29. Range, n miles: 513 at 25 kt
 Complement: 4
 Guns: 3—12.7 mm MGs.
 Radars: Surface search: Raytheon R70; I-band.

Comment: New class of inshore patrol craft designed by Cotecmar. Aluminium construction. Transportable on a C-130 aircraft. The construction programme at Cotecmar began in 2007 and the first three are to enter service in 2009. Some 50 of the class are expected

LPR 40 (artist's impression) 10/2008, COTECMAR / 1164347

2 JOSÉ MARIA PALAS (SWIFT 110) CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
JOSÉ MARIA PALAS	PM 103 (ex-GC 103)	Swiftships Inc, Berwick	Sep 1989
MEDARDO MONZON CORONADO	PM 104 (ex-GC 104)	Swiftships Inc, Berwick	July 1990

Displacement, tons: 99 full load
 Dimensions, feet (metres): 109.9 × 24.6 × 6.6 (33.5 × 7.5 × 2)
 Main machinery: 4 Detroit 12V-71T1 diesels; 2,400 hp (1.79 MW); 4 shafts
 Speed, knots: 25. Range, n miles: 2,250 at 15 kt
 Complement: 19 (3 officers)
 Guns: 1 Bofors 40 mm/70. 1—12.7 mm MG. 2—762 mm MGs.
 Radars: Surface search: Furuno FR 8100D; I-band.

Comment: Acquired under US FMS programme. These ships belong to the Coast Guard.

JOSÉ MARIA PALAS 1/1996, van Ginderen Collection / 0056824

1 ASHEVILLE CLASS (FAST ATTACK CRAFT—GUN) (PGF)

Name	No	Builders	Commissioned
QUITASUEÑO (ex-Tacoma)	PM 112	Tacoma Boat Building	14 July 1969

Displacement, tons: 225 standard; 245 full load
 Dimensions, feet (metres): 164.5 × 23.8 × 9.5 (50.1 × 7.3 × 2.9)
 Main machinery: CODOG; 2 Cummins VT12-875M diesels; 1,450 hp (1.08 MW); 1 GE LM 1500 gas turbine; 13,300 hp (9.92 MW); 2 shafts; cp props
 Speed, knots: 40
 Range, n miles: 1,700 at 16 kt on diesels; 325 at 37 kt
 Complement: 24
 Guns: 1 US 3 in (76 mm)/60 Mk 34, 60 rds/min to 12.8 km (7 n miles); weight of shell 6 kg.
 1 Bofors 40 mm/56; 160 rds/min to 11 km (5.9 n miles) anti-aircraft, weight of shell 0.96 kg.
 2—12.7 mm (twin) MGs
 Radars: Surface search: Raytheon 3100; I-band.

Comment: Transferred from US by lease 16 May 1983 and recommissioned 6 September 1983 and by sale August 1989. Fire-control system removed. Unreliable propulsion system prevented further transfers of this class and it is unlikely the gas turbine is operational, which reduces the top speed to 16 kt. Belongs to the Coast Guard.

QUITASUEÑO 2000, Colombian Navy / 0103696

2 TOLEDO CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
JOSÉ MARIA GARCIA Y TOLEDO	PM 113	Bender Marine, Mobile	15 July 1994
JUAN NEPOMUCENO ESLAVA	PM 114	Bender Marine, Mobile	25 May 1994

Displacement, tons: 142 full load
 Dimensions, feet (metres): 116 × 24.9 × 7 (35.4 × 7.6 × 2.1)
 Main machinery: 2 MTU 12V 396TE94 diesels; 8,240 hp (6.1 MW); 2 shafts
 Speed, knots: 25. Range, n miles: 1,200 at 15 kt
 Complement: 25 (5 officers)
 Guns: 1 Bushmaster 25 mm/87 Mk 96. 2—12.7 mm MGs.
 Radars: Surface search: Furuno FR 1510D; I-band.

Comment: Acquired under US FMS programme. These ships belong to the Coast Guard.

JUAN NEPOMUCENO ESLAVA 6/2001, Maritime Photographic / 0114511

2 RAFAEL DEL CASTILLO Y RADA (SWIFT 105) CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
RAFAEL DEL CASTILLO Y RADA	PM 102 (ex-GC 102, ex-AN 202)	Swiftships Inc, Berwick	28 Feb 1983
TECIM JAIME E CÁRDENAS GÓMEZ (ex-Olaya Herrera)	PM 115 (ex-AN 21, ex-AN 201)	Swiftships Inc, Berwick	16 Oct 1981

Displacement, tons: 115 full load
 Dimensions, feet (metres): 105 × 22 × 7 (31.5 × 6.7 × 2.1)
 Main machinery: 4 MTU 12V 331 TC92 diesels; 5,320 hp (3.97 MW) sustained; 4 shafts
 Speed, knots: 25. Range, n miles: 1,200 at 18 kt
 Complement: 19 (3 officers)
 Guns: 1 Bofors 40 mm/60 Mk 3 (PM 102). 2—12.7 mm MGs.
 Weapons control: 1 COAR optronic director.
 Radars: Surface search: Raytheon; I-band.

Comment: Delivered for the Customs service. PM 102 is part of the Coast Guard. PM 115 was paid off, but returned unarmed as part of the resurrected Customs service until being transferred back to the Coast Guard in 1997.

RAFAEL DEL CASTILLO Y RADA 6/1999, Colombian Navy / 0056826

2 JAIME GÓMEZ (MK III PB) CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
JAIME GÓMEZ CASTRO	PM 105 (ex-GC 105)	Peterson Builders	1975
JUAN NEPOMUCENO PEÑA	PM 106 (ex-GC 106)	Peterson Builders	1977

Displacement, tons: 34 full load
 Dimensions, feet (metres): 64.9 × 18 × 5.1 (19.8 × 5.5 × 1.6)
 Main machinery: 3 Detroit 8V-71 diesels; 690 hp (575 kW) sustained; 3 shafts
 Speed, knots: 28. Range, n miles: 450 at 26 kt
 Complement: 7 (1 officer)
 Guns: 2—12.7 mm MGs. 2—7.62 mm MGs. 1 Mk 19 grenade launcher.
 Radars: Surface search: 2 Furuno FR 1510D; I-band.

Comment: Acquired from the USA. Recommissioned in December 1989 and February 1990 respectively. Original 40 mm and 20 mm guns replaced by lighter armament. Both based at Leticia, Río Amazonas, under coast guard control.

JAIME GÓMEZ CASTRO 2000, Colombian Navy / 0103697

3 SWIFTSIPS CLASS (RIVER PATROL CRAFT) (PBR)

PRF 320–322

Displacement, tons: 17 full load
 Dimensions, feet (metres): 45.5 × 11.8 × 1.8 (13.9 × 3.6 × 0.6)
 Main machinery: 2 Detroit 6V-92TA diesels; 900 hp (671 kW); 2 Hamilton water-jets
 Speed, knots: 22. Range, n miles: 600 at 22 kt
 Complement: 4
 Guns: 2 M2HB 12.7 mm MGs; 2 M60D 7.62 mm MGs
 Radars: Surface search: Raytheon 40; I-band.

Comment: Acquired in 2000. Hard chine modified V hull form. Can carry up to eight troops.

SWIFTSIPS CLASS 6/2001, Ecuador Coast Guard / 0114516

2 ROTORK 412 CRAFT (RIVER PATROL CRAFT) (PBR)

CAPITÁN JAIME ROOK PF 129 (ex-PM 107)
MANUELA SAENZ PF 130 (ex-PM 108)

Displacement, tons: 9 full load
Dimensions, feet (metres): 41.7 x 10.5 x 2.3 (12.7 x 3.2 x 0.7)
Main machinery: 2 Caterpillar diesels; 240 hp (179 kW); 2 shafts
Speed, knots: 25
Complement: 4
Military lift: 4 tons or 8 marines
Guns: 1—12.7 mm MG. 2—7.62 mm MGs.
Radars: Surface search. Raytheon; I-band.

Comment: Acquired in 1989-90. Capable of transporting eight fully equipped marines but used as river patrol craft.

CAPITÁN JAIME ROOK 1990, Colombian Navy / 0056828

9 TENERIFE CLASS (RIVER PATROL CRAFT) (PBR)

PF 305-313

Displacement, tons: 12 full load
Dimensions, feet (metres): 40.7 x 8.5 x 2 (12.4 x 2.9 x 0.6)
Main machinery: 2 Caterpillar 3208TA diesels; 850 hp (634 kW) sustained; 2 shafts
Speed, knots: 29
Range, n miles: 530 at 15 kt
Complement: 5 plus 12 troops
Guns: 3—12.7 mm MGs (1 twin, 1 single). 1 Mk 19 grenade launcher. 1—7.62 mm MGs.
Radars: Surface search: Raytheon 1900; I-band

Comment: Built by Bender Marine, Mobile, Alabama. Acquired in October 1993 for anti-narcotics patrols. Aluminium hulls. Can be transported by aircraft. Names were dropped and new pennants numbers assigned in 2006.

MITÚ 2000, Colombian Navy / 0103688

15 INSHORE PATROL CRAFT

BP 401 BP 430 BP 433 BP 443 BP 445 BP 462-471

Comment: Miscellaneous patrol craft capable of about 10 kt. BP 401 is a former US LCPL acquired in 1993. Names were dropped and new BP pennant numbers assigned in 2006.

BP 401 6/1999, Colombian Navy / 0056830

11 ANDRÓMEDA CLASS (INSHORE PATROL CRAFT) (PBI)

BP 451-461

Comment: Names were dropped and BP pennant numbers assigned in 2006.

ANDROMEDA 2000, Colombian Navy / 0103699

10 RIO CLASS (RIVER PATROL CRAFT) (PBR)

PRF 301-304

PRF 314-319

Displacement, tons: 7 full load
Dimensions, feet (metres): 31 x 11.1 x 2 (9.6 x 3.5 x 0.6)
Main machinery: 2 Detroit 6V-53 diesels; 298 hp (221 kW) sustained; 2 water-jets
Speed, knots: 24. **Range, n miles:** 150 at 22 kt
Complement: 4
Guns: 2—12.7 mm (twin) MGs 1—7.62 mm MG. 1—60 mm mortar
Radars: Surface search: Raytheon 1900; I-band

Comment: Acquired in 1989-90. Ex-US PBR Mk II built by Unflite in 1970. All recommissioned in September 1990 GRP hulls. Names were dropped and new pennant numbers assigned in 2006.

PRF 301 (old number) 2000, Colombian Navy / 0103700

7 RIVER PATROL CRAFT (PBR)

DILIGENTE PF 121 (ex-LR 121)
JUAN LUCIO PF 122
ALFONSO VARGAS PF 123
FRITZ HAGAILE PF 124

VENGADORA PF 125 (ex-LR 125)
HUMBERTO CORTEZ PF 126
CARLOS GALINDO PF 128

Comment: All between 31 and 40 tons. Various designs and ages, but all are armed with two 12.7 mm MGs and most have 7.62 mm MGs as well.

VENGADORA (old number) 2000, Colombian Navy / 0103701

20 DELFIN CLASS (INSHORE PATROL CRAFT) (PBI)

BP 421-429 BP 431 BP 434-442 BP 446

Displacement, tons: 5.4 full load
Dimensions, feet (metres): 25.9 x 8.5 x 3.1 (7.9 x 2.6 x 0.9)
Main machinery: 2 Evinrude outboards, 400 hp (294 kW)
Speed, knots: 40
Complement: 4
Guns: 1—12.7 mm MG 2—7.62 mm MGs.
Radars: Surface search: Raytheon; I-band.

Comment: First two built by Mako Marine, Miami and delivered in December 1992. Remainder acquired locally from 1993-94. Names were dropped and BP pennant numbers assigned in 2006.

DELFIN CLASS 6/2001, Maritime Photographic / 0114512

0 + 4 DAMEN STAN PATROL 4207 (PB)

Name	No	Builders	Commissioned
—	—	Cotecmar, Cartagena	2011
—	—	Cotecmar, Cartagena	2012
—	—	Cotecmar, Cartagena	2013
—	—	Cotecmar, Cartagena	2014

Displacement, tons: 205

Dimensions, feet (metres): 140.4 × 23.3 × 8.3 (42.8 × 7.11 × 2.52)

Main machinery: 2 Caterpillar 3516B DI-TA; 5,600 hp (4.17 MW); 2 cp props

Speed, knots: 26

Complement: 14

Guns: To be announced.

Comment: Contract expected to be signed with Damen Shipyards, Gorinchem for construction of four Damen Stan Patrol 4207 offshore patrol craft. Likely to be built under licence by Cotecmar, Cartagena. Steel hull with aluminium superstructure. Capable of carrying a 7 m RIB. Similar craft in service in Barbados and Jamaica Coast Guards.

STAN PATROL 4207 (Jamaica colours)

11/2006, Martyn Westers / 1164414

4 + 10 MIDNIGHT EXPRESS INTERCEPT CRAFT (PBF)

Displacement, tons: 6 full load

Dimensions, feet (metres): 39.2 × 9.5 × 1.7 (11.9 × 2.9 × 0.5)

Main machinery: 3 outboard motors; 1,050 hp (782 kW)

Speed, knots: 55

Complement: 4

Guns: 1—7.62 mm MG.

Comment: Glass-fibre construction. First four ordered from Midnight Express, Fort Lauderdale, on 20 December 2006. A further 10 likely to be ordered in 2009. The detailed configuration has not been confirmed; propulsion may be inboard diesel engines with surface drives.

AMPHIBIOUS FORCES

Notes: Procurement of a new class of LCUs to replace the current inventory is under consideration.

169 RIVER ASSAULT BOATS (RAB) (PBR)

Comment: There are about 250 river assault craft. These include some 100 Eduardoño 7.8 m E26A and E23B class, an unknown number of 6.8 m Boston Whaler craft and approximately 125 Pirañas 7.5 m craft. Typical armament includes 1—12.7 mm MG and 2—7.62 mm MGs.

ASSAULT BOAT

2000, Colombian Navy / 0103703

1 LCM 8

BAHÍA ZAPZURRO LD 240

Displacement, tons: 125 full load

Dimensions, feet (metres): 71.9 × 20.7 × 9.9 (21.9 × 6.3 × 3)

Main machinery: 1 diesel; 285 hp (213 kW); 1 shaft

Speed, knots: 12

Complement: 5

Military lift: 60 tons or 150 troops

Comment: Transferred in 1993.

BAHÍA ZAPZURRO

6/1999, Colombian Navy / 0056832

7 MORROSQUILLO (LCU 1466A) CLASS (LCU)

MORROSQUILLO LD 246

BAHÍA HONDA LD 248

BAHÍA PORTETE LD 249

BAHÍA SOLANO LD 251

BAHÍA CUPICA LD 252

BAHÍA UTRIA LD 253

BAHÍA MALAGA LD 254

Displacement, tons: 347 full load

Dimensions, feet (metres): 119 × 34 × 6 (36.3 × 10.4 × 1.8)

Main machinery: 3 Detroit 6-71 diesels; 522 hp (389 kW) sustained, 3 shafts

Speed, knots: 7. Range, n miles: 700 at 7 kt

Complement: 14

Cargo capacity: 167 tons or 300 troops

Guns: 2—12.7 mm MGs.

Radars: Navigation: Raytheon, I-band.

Comment: Former US Army craft built in 1954 and transferred in 1991 and 1992 with new engines. Used as inshore transports. Speed quoted is fully laden. Numbers split between each coast.

MORROSQUILLO

1/1993 / 0056833

SURVEY SHIPS

Notes: There are also three small buoy tenders: *Abadía Médez* BB 33, *Ciénaga de Mayorquín* BB 34, and *Isla Palma* BB 35.

Name	No	Builders	Commissioned
PROVIDENCIA	BO 155	Martin Jansen SY, Leer	24 July 1981
MALPELO	BO 156	Martin Jansen SY, Leer	24 July 1981

Displacement, tons: 1,157 full load

Dimensions, feet (metres): 164.3 × 32.8 × 13.1 (50.3 × 10 × 4)

Main machinery: 2 MAN-Augsburg diesels; 1,570 hp(m) (1.15 MW); 1 Kort nozzle prop; bow thruster

Speed, knots: 13. Range, n miles: 15,000 at 12 kt

Complement: 48 (5 officers) plus 6 scientists

Radars: Navigation: Raytheon; I-band.

Comment: Both launched in January 1981. *Malpelo* employed on fishery research and *Providencia* on geophysical research. Both are operated by DIMAR, the naval authority in charge of hydrographic, pilotage, navigational and ports services. Painted white.

MALPELO

2000, Colombian Navy / 0103704

176 Colombia/Survey ships — Auxiliaries

1 BUOY TENDER

Name	No	Builders	Commissioned
QUINDIO (ex-YFR 443)	BH 153	Niagara SB Corporation	11 Nov 1943

Displacement, tons: 600 full load
 Dimensions, feet (metres): 131 × 29.8 × 9 (40 × 9.1 × 2.7)
 Main machinery: 2 Union diesels, 600 hp (448 kW); 2 shafts
 Speed, knots: 10
 Complement: 17 (2 officers)

Comment: Transport ship transferred by lease from the US in July 1964 and by sale on 31 March 1979. Used as a buoy tender

QUINDIO 2000, Colombian Navy / 0103705

1 SURVEY SHIP (AGSC)

Name	No	Builders	Commissioned
GORGONA	BB 31 (ex-BO 154, ex-BO 161, ex-FB 161)	Lidingoverken, Sweden	28 May 1954

Displacement, tons: 574 full load
 Dimensions, feet (metres): 135 × 29.5 × 9.3 (41.2 × 9 × 2.8)
 Main machinery: 2 Wärtsilä Nonah diesels; 910 hp(m) (669 kW); 2 shafts
 Speed, knots: 13
 Complement: 45 (2 officers)

Comment: Paid off in 1982 but after a complete overhaul at Cartagena naval base was back in service in late 1992. A further major refit took place 2005–06. This included work on the hull and possible changes to the superstructure.

GORGONA (old number) 1993, Colombian Navy / 0056835

TRAINING SHIPS

Notes: There are also five sail training yachts *Comodoro YT 230*, *Tridente YT 231* and *Cristina YT 232*, *Albatros YT 233*, *Poseidon YT 234*.

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Launched	Commissioned
GLORIA	BE 160	AT Celaya, Bilbao	6 Sep 1966	16 May 1969

Displacement, tons: 1,250 full load
 Dimensions, feet (metres): 249.3 oa; 211.9 wl; × 34.8 × 21.7 (76; 64.6 × 10.6 × 6.6)
 Main machinery: 1 auxiliary diesel; 530 hp(m) (389 kW); 1 shaft
 Speed, knots: 10.5
 Complement: 51 (10 officers) plus 88 trainees

Comment: Sail training ship. Barque rigged. Hull is entirely welded. Sail area, 1,675 sq yds (1,400 sq m). Endurance, 60 days. Similar to Ecuador, Mexico and Venezuelan vessels

GLORIA 9/2006, Camil Busquets | Vilanova / 1164399

AUXILIARIES

Notes: (1) There are nine ex-US 11 m armoured troop carriers TNT 381–389
 (2) Eleven craft are employed on general administrative duties: *Orca* BA 03, *Halcan* BA 04, *Ara* BA 05, *Almirante Ill* BA 06, *Cano del Oro* BA 07, BA 08, *Escafandra* BA 11, BA 12–15.

2 LUNEBURG CLASS (TYPE 701) (SUPPORT SHIPS) (AGP)

Name	No	Builders	Commissioned
CARTAGENA DE INDIAS (ex-Lunenburg)	BL 161 (ex-A 1411)	Flensburger	31 Jan 1966
BUENAVENTURA (ex-Nienburg)	BL 162 (ex-A 1416)	Bremer Vulcan	1 Aug 1968

Displacement, tons: 3,483 full load
 Dimensions, feet (metres): 341.2 × 43.3 × 13.8 (104 × 13.2 × 4.2)
 Main machinery: 2 MTU MD 16V 538 TB90 diesels; 6,000 hp(m) (4.1 MW) sustained; 2 shafts, cp props, bow thruster
 Speed, knots: 16. Range, n miles: 3,200 at 14 kt
 Complement: 70 (9 officers)
 Cargo capacity: 1,100 tons
 Guns: 4 Bofors 40 mm/70 (2 twin).
 Radars: Navigation: I-band.

Comment: BL 161 paid off from the German Navy in 1994. Taken in hand for refit by HDW, Kiel in August 1997. Recommissioned on 2 November 1997. Guns were cocooned in German service. The ship acts as a depot ship for patrol craft. BL 162 paid off and was transferred the same day on 27 March 1998. She is now based at Málaga. Both ships are to be refitted with helicopter decks in order to operate Bell 412 helicopters.

BUENAVENTURA 9/2007, US Navy / 1335713

8 TRANSPORTS

BOCACCHICA TM 501	SIRIUS TM 504 (ex-TM 62)	MÓVIL I TM 509

Comoros

Country Overview

A former French Overseas Territory, the Union of the Comoros declared independence on 6 July 1975. The islands are situated at the northern entrance to the Mozambique Channel, between the African mainland and the island of Madagascar. There are three islands: Njazidja (formerly known as Grande Comore), Mwali (Mohéli),

and Nzwani (Anjouan). A fourth island in the archipelago, Mayotte (Mahoré), is formally claimed by Comoros but chose to remain a French dependency. The nation has been beset by instability during most of its life and, despite broad acceptance in 2002 of a new constitution, which proposed a degree of autonomy for the three islands and resolution of political differences with Anjouan, re-unification remains fragile. The largest town, capital

and principal port is Moroni on south-western Njazidja. An archipelagic state, territorial seas (12 n miles) are claimed. A 200 n mile EEZ has been claimed but the limits are not fully defined

■ ■ ■ ■ ■
 Moroni.

PATROL FORCES

2 YAMAYURI CLASS (PBI)

Name	No	Builders	Commissioned
KARTHALA	—	Ishihara Dockyard Co Ltd	Oct 1981
NTRINGUI	—	Ishihara Dockyard Co Ltd	Oct 1981

Displacement, tons: 28.5 standard; 41 full load
Dimensions, feet (metres): 59 x 14.1 x 3.6 (18 x 4.3 x 1.1)
Main machinery: 2 Nissan RD10TA06 diesels; 900 hp(m) (661 kW) maximum; 2 shafts
Speed, knots: 20
Complement: 20
Guns: 2—12.7 mm (twin) MGs.
Radars: Surface search: FRA 10; I-band

Comment: These two patrol vessels of the Coast Guard type (steel-hulled), supplied under Japanese government co-operation plan. Used for fishery protection services. Operational status doubtful.

KARTHALA

10/1981, Ishihara DY / 0058842

Democratic Republic of Congo

Country Overview

Formerly known as the Belgian Congo until it became independent in 1960, the Democratic Republic of the Congo was known as Zaire from 1971–97. With an area of 905,568 square miles, it has borders to the north with the Republic of the Congo. A 22 n mile coastline with the Atlantic Ocean separates Angola, to the south, from its Cabinda province. The capital and largest city is Kinshasa (formerly Léopoldville) while the principal ports are Matadi and Boma, on the lower Congo, and Banana, at its mouth. Territorial seas (12 n miles) are claimed. An EEZ has reportedly been claimed but the details have not been published. A cease fire in the civil war was declared in September 1999 although some fighting continued

until January 2001. In July 2003, the Transitional National Government was established as part of the evolving peace process.

Headquarters Appointments

Chief of the Navy:
 Vice Admiral Didier Etumba Longila

Personnel

(a) 2009: 6,700 (1,000 officers)
 (b) Voluntary service

Organisation and Bases

There are five regional commands and 19 naval bases as follows:

- 1 Region (Lakes Tanganyika and Mweru): Kalemie (11 NB) (HQ), Moloro (12 NB), Pweto (13 NB), Uvira (14 NB)
- 2 Region (Middle Congo and tributaries): Kinshasha (21 NB) (HQ), Bolobo (22 NB), Bandundu (23 NB), Ilebo (24 NB)
- 3 Region (Lower Congo): Banana (31 NB) (HQ), Boma (32 NB), Matadi (33 NB)
- 4 Region (Higher Congo and tributaries): Mbandaka (41 NB) (HQ), Zongo (42 NB), Bumba (43 NB), Kisangani (44 NB)
- 5 Region (Lakes Kivu, Edward and Albert): Goma (51 NB) (HQ), Bukavu (52 NB), Vitshumbi (53 NB), Mahagi (54 NB)

PATROL FORCES

Notes: Some barges and small patrol craft have been mounted with guns.

1 SHANGHAI II (TYPE 062) CLASS (FAST ATTACK CRAFT–GUN) (PC)

102

Displacement, tons: 113 standard; 134 full load

Dimensions, feet (metres): 127.3 × 17.7 × 5.6
(38.8 × 5.4 × 1.7)

Main machinery: 2 Type L-12V-180 diesels; 2,400 hp (m)
(1.76 MW) (forward); 2 Type 12-D-6 diesels, 1,820 hp (m)
(1.34 MW) (aft); 4 shafts

Speed, knots: 30. **Range, n miles:** 700 at 16.5 kt on 1 engine

Complement: 38

Guns: 4 China 37 mm/63 (2 twin); 180 rds/min to 8.5 km
(4.8 n miles); weight of shell 1.42 kg.

4 USSR 25 mm/60 (2 twin); 270 rds/min to 3 km (1.6 n miles)
anti-aircraft; weight of shell 0.34 kg.

Radars: Surface search: Furuno, I-band

Comment: Four craft were originally delivered from China 1976–78. Two of these were replaced in 1987. All craft were reported derelict after the civil war but, following the refurbishment of 102, more may be restored to operational use.

SHANGHAI II 102

3/2005, M Declerck / 1151082

Country Overview

Formerly known as the Middle Congo, part of a French colony, the Republic of Congo gained independence in 1960. An unstable political period followed, culminating in civil war between 1997 and 2000 when a Transitional Council was created. A new constitution was approved by referendum in 2002. With an area of 132,000 square miles, it is situated in west-central Africa and has borders to the north

with Cameroon and the Central African Republic, to the south-west with Angola (Cabinda enclave) and to the west with Gabon. The River Congo, a major transport artery, provides the southern and much of the eastern border with the Democratic Republic of Congo (formerly Zaire). It has a 91 n mile coastline with the Atlantic Ocean. Brazzaville is the capital and largest city while Pointe Noire is the principal port and centre of the offshore oil industry. Congo has not claimed an EEZ but is one of a few

coastal states which claims a 200 n mile territorial sea. The navy consists mainly of riverine craft but acquisition of offshore patrol vessels to protect offshore resources is a possibility.

Organisation

There are two commands: Brazzaville (riverine) and Pointe Noire (coastal).

Bases

Pointe Noire, Brazzaville, Impfondo.

Headquarters Appointments

Chief of the Navy:
Capitaine de Vaisseau Andre
Bouagnabea Moundanza

Congo-Brazzaville

Country Overview

The Cook Islands are a South Pacific island group which became self-governing in 1965; defence and external affairs remain the responsibility of the New Zealand government. Situated some 2,430 n miles south of Hawaii, they comprise

two groups of widely scattered islands. The Southern Group includes Rarotonga, Aitutaki, Atiu, Mangaia, Mauke, Mitiaro, Manuae and Takoua. The Northern Group is composed of low-lying coral islands and includes Pukapuka, Tongareva (also called Penrhyn), Manihiki, Palmerston, Rakahanga, Suvarrow and Nassau.

The port of Avarua on the island of Rarotonga is the administrative centre. Territorial seas (12 n miles) are claimed. An Exclusive Economic Zone (EEZ) (200 n miles) is claimed but limits have not been fully defined by boundary agreements.

Headquarters Appointments

Maritime Commander:
Superintendent Taivero Isamaela

Bases

Avatiu Wharf, Rarotonga

Cook Islands

PATROL FORCES

1 PACIFIC CLASS (LARGE PATROL CRAFT) (PB)

Name	Builders	Commissioned
TE KUKUPA	Australian Shipbuilding Industries	1 Sep 1989

Displacement, tons: 162 full load

Dimensions, feet (metres): 103.3 × 26.6 × 6.9 (31.6 × 8.1 × 2.1)

Main machinery: 2 Caterpillar 3516TA diesels, 2,820 hp (2.1 MW) sustained; 2 shafts

Speed, knots: 20

Range, n miles: 2,500 at 12 kt

Complement: 17 (3 officers)

Radars: Surface search: Furuno 1011; I-band.

Comment: Laid down 16 May 1988 and launched 27 January 1989. Cost, training and support provided by Australia under defence co-operation. Acceptance date was 9 March 1989 but the handover was deferred another six months because of the change in local government. Has Furuno D/F equipment, SATNAV and a Stress seaboot with a 40 hp outboard engine. A half-life refit was conducted in 1997 and, following the announcement by the Australian government to extend the Pacific Patrol Boat programme to a 30 year ship life, *Te Kukupa* undertook a life extension refit at Townsville in 2006.

TE KUKUPA

8/2007, John Mortimer / 1165718

Costa Rica

SERVICIO NACIONAL GUARDACOSTAS

Country Overview

The Republic of Costa Rica is an independent Central American State which lies between Nicaragua to the north and Panama to the south-east. With an area of 19,652 square miles, it has a 584 n mile coastline with the North Pacific Ocean and of 112 n

miles with the Caribbean. The uninhabited Cocos Island, about 290 n miles southwest of Burrica Point, is also under Costa Rican sovereignty. The country's capital is San José while other important cities are the Caribbean port of Limón and the Pacific port of Puntarenas. Territorial seas (12 n miles) are claimed. While a 200 n mile

EEZ has been claimed, the limits have only been partly defined by boundary agreements.

Personnel

(a) 2009: 350 officers and men
(b) Voluntary service

Bases

Pacific: Golfito, Punta Arenas, Cusajiquil, Quepos.
Atlantic: Limón, Moín

PATROL FORCES

Notes: Three Boston Whalers, *Tauro* (20-1), *Villa Mar* (20-2) and *Cocori* (22-1) are operational. The first of six Costa Rican-built Apex RIBs, *Escorpion* (24-1), entered service in 2001.

Cote d'Ivoire

MARINE CÔTE D'IVOIRE

Country Overview

Formerly a French colony, The Republic of Côte d'Ivoire gained full independence in 1960. Located in west Africa, the country has an area of 133,425 square miles and a 281 n mile coastline with the Gulf of Guinea. It is bordered to the east by Ghana and to the west by Liberia and Guinea. The capital is Yamoussoukro while the former

capital, Abidjan, is the largest city, principal port and commercial centre. A further port at San Pedro is linked to Mali by rail. Territorial seas (12 n miles) are claimed. A 200 n mile EEZ has been claimed but the limits have not been defined by boundary agreements.

Following the rebellion of September 2002, a Government of National Conciliation has restored a level of stability

although internal tensions continue. While the navy remains unchanged, operational effectiveness is likely to have suffered.

AUXILIARIES

Notes: (1) There are also some Rotork 412 craft supplied in 1980. Some are naval, some civilian.

(2) Two French harbour tugs *Merisier* and *Meronnier* were acquired in September 1998.

(3) A Yunnan class LCM *Atchan* may still be in limited service.

2 CTM (LCM)

ABY (ex-CTM 15) TIAGHA (ex-CTM 16)

Displacement, tons: 150 full load

Dimensions, feet (metres): 78 x 21 x 4.2 (23.8 x 6.4 x 1.3)

Main machinery: 2 Poyaud 520 V8 diesels; 225 hp(m) (165 kW); 2 shafts

Speed, knots: 9.5. Range, n miles: 350 at 8 kt

Complement: 6

Military lift: 48 tons

Comment: Transferred from France in March 1999. Built in about 1968. Bow ramps are fitted. Probably not operational.

Croatia

HRVATSKA RATNA MORNARICA

Country Overview

Formerly a constituent republic of the Federal Republic of Yugoslavia, Croatia declared its independence in 1991. With an area of 21,829 square miles, it is situated in south-east Europe in the Balkan Peninsula and bordered to the north by Slovenia and Hungary, to the east and south by Bosnia and Herzegovina and to the east by Montenegro. There are some 1,100 offshore islands and there is an overall coastline of 3,127 n miles with the Adriatic Sea on which Dubrovnik, Split, Ploče and Rijeka are the principal ports. The capital and largest city is Zagreb. Territorial waters (12 n miles) are claimed and an Ecological and Fishery Zone was declared in 2004.

2009: 1,850 (620 officers)

General

The Navy was established on 12 September 1991. The law to establish a Coast Guard, as a component of the navy, was passed on 3 October 2007. Its roles are to include fishery protection, counter-drugs and smuggling operations and environmental protection. Some naval units will almost certainly be transferred to the new force.

Bases and Organisation

Headquarters: Lora-Split
Main base: Split
Minor bases: Sibenik, Pula, Ploče, Lastovo, Mljet.

River Patrol Flotillas: Osijek (Drava) and Sisak (Sava)

The future organisation of the Croatian Navy is to include the naval flotilla, a coastguard and a battalion of marine infantry.

Coast Defence

Three mobile R6S 15 batteries on trucks are likely to be decommissioned. Total of 10 coastal artillery batteries. Jadran command system for coastal defence using Italian (Gem) built and US (More) radars installed in 2003. Sites include the islands of Vis, Lastovo, Dugi Otok and Mljet.

Naval Infantry

Headquarters in Split. A move to Dubrovnik is under consideration.

SUBMARINES

2 R-2 MALA CLASS
(TWO-MAN SWIMMER DELIVERY VEHICLES) (LDW)

Displacement, tons: 1.4
Dimensions, feet (metres): 16.1 × 4.6 × 4.3 (4.9 × 1.4 × 1.3)
Main machinery: 1 motor; 4.7 hp(m) (3.5 kW); 1 shaft
Speed, knots: 4.4
Range, n miles: 18 at 4.4 kt, 23 at 3.7 kt
Complement: 2
Mines: 250 kg of limpet mines.

Comment: Free-flood craft with the main motor, battery, navigation pod and electronic equipment housed in separate watertight cylinders. Instrumentation includes aircraft type gyrocompass, magnetic compass, depth gauge (with 0 to 100 m scale), echosounder, sonar and two searchlights. Constructed of light aluminium and plexiglass, it is fitted with fore and after hydroplanes, the tail being a conventional cruciform with a single rudder abaft the screw. Large perspex windows give a good all-round view. Operating depth, 60 m (196.9 ft), maximum. Two reported sold to Syria and one to Sweden.

Notes: There is also an R-1 craft which is 3.7 m long and capable of 2.8 kt down to 50 m. It has a range of 4 n miles. There may also be some locally built SDVs.

R-2 2/2002, RH-Alan / 0528428

R-1 2/2002, RH-Alan / 0528427

LAND-BASED MARITIME AIRCRAFT

Notes: Six Pilatus aircraft, four Mi-8 helicopters and one unmanned aircraft are used for fishery protection and counter-pollution tasks.

PATROL FORCES

Notes: (1) Procurement of four new offshore patrol vessels remains under consideration. The broad requirement is for a 78 m, 1,000 ton vessel capable of 25 kt.
 (2) Two RHIBs were acquired in 2008 for special forces. Their names are *Bijosek* and *Oluja*.

1 RIVER PATROL CRAFT (PBR)

OB 93

Displacement, tons: 48 full load
Dimensions, feet (metres): 63.6 × 14.4 × 3.3 (19.4 × 4.4 × 1.0)
Main machinery: 2 Torpeda B 536RM diesels; 280 hp (206 kW); 2 shafts
Speed, knots: 12
Complement: 9
Guns: 1—20 mm
Radars: Surface search/navigation, Furuno M 1942 Mk 2; I-band.

Comment: Former minesweeper launched in 1971 at Mačvanska Mitrovnica. Used as a river patrol vessel. Based in Osijek on River Drava.

OB 93 10/2007, Croatian Navy / 1170102

1 KONČAR (TYPE R-02) CLASS
(FAST ATTACK CRAFT—MISSILE) (PTGF)

Name	No	Builders	Launched	Commissioned
SIBENIK (ex-Vlado Četković)	RTOP 21 (ex-402)	Tito SY, Kraljevica	20 Aug 1977	Mar 1978

Displacement, tons: 264 full load
Dimensions, feet (metres): 150.3 × 27.6 × 9.8 (45.8 × 8.4 × 3.0)
Main machinery: CODAG; 2 RR Proteus 52-M558 gas turbines, 7,200 hp (5.37 MW) sustained; 2 MTU 16V 538 TB91 diesels; 7,200 hp(m) (5.29 MW) sustained; 4 shafts; cp props
Speed, knots: 38, 23 (diesels)
Range, n miles: 500 at 35 kt; 880 at 23 kt (diesels)
Complement: 31 (5 officers)

Missiles: SSM. 4 Saab RBS 15B; active radar homing to 70 km (37.8 n miles) at 0.8 Mach; warhead 83 kg
Guns: 1 Bofors 57 mm/70; 200 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg
 1—30 mm/65 AK 630M, 6 barrels, 3,000 rds/min to 4 km
Countermeasures: Decoys: 2 Wallop Barricade double layer chaff launchers.
Weapons control: PEAB 9LV 202 GFCS.
Radars: Surface search: Decca 1226; I-band.
Fire control: PhilipsTAB; I/J-band.

Programmes: Type name, *Raketna Topovnjaca*. Recommissioned into the Croatian Navy on 28 September 1991. Others of the class serve with the Yugoslav Navy.
Modernisation: The original Styx missiles have been replaced by RBS 15 and the after 57 mm gun by a 30 mm AK 630. Fire-control radar was updated in 1994 and a new surface search radar is to be acquired in 2008.
Structure: Aluminium superstructure. Designed by the Naval Shipping Institute in Zagreb based on Swedish Spica class with bridge amidships like Malaysian boats.
Operational: Based at Split. Reported operational.

SIBENIK 10/2004, Croatian Navy / 1170103

4 MIRNA (TYPE 140) CLASS
(FAST ATTACK CRAFT—PATROL) (PCM)

Name	No	Builders	Launched
NOVIGRAD (ex-Bioakovo)	OB 61 (ex-171)	Kraljevica Shipyard	18 Dec 1980
ŠOLTA (ex-Mukas)	OB 62 (ex-176)	Kraljevica Shipyard	11 Nov 1982
CAVTAT (ex-Vrlika, ex-Cer)	OB 63 (ex-180)	Kraljevica Shipyard	27 Sep 1984
HRVATSKA KOSTAJNICA (ex-Durmitor)	OB 64 (ex-181)	Kraljevica Shipyard	10 Jan 1985

Displacement, tons: 142 full load
Dimensions, feet (metres): 106.9 × 22 × 7.5 (32.6 × 6.7 × 2.3)
Main machinery: 2 SEMT-Pielstick 12 PA4 200 VGDS diesels; 5,292 hp(m) (3.89 MW) sustained; 2 shafts
Speed, knots: 25
Range, n miles: 600 at 24 kt
Complement: 19 (3 officers)

Missiles: SAM: 1 SA-N-5 Grail quad mounting; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg.
Guns: 1 Bofors 40 mm/70. 4 Hispano 20 mm (quad) Type M75. 2—128 mm illuminant launchers.
Depth charges: 8 DCs.
Countermeasures: Decoys: chaff launcher (PB 62).
Radars: Surface search. Racal Decca 1216C; I-band.
Sonars: Simrad SQS-3D/SF, active high frequency.

Comment: An electric outboard motor has been removed. Two were captured after sustaining heavy damage, one by a missile and the other by a torpedo fired from the island of Brač. Both fully repaired and all four are operational and display coast guard markings.

SOLTA 5/2007, Marco Ghigino / 1167916

2 HELSINKI CLASS (FAST ATTACK CRAFT—MISSILE) (PTGM)

Name	No	Builders	Commissioned
VUKOVAR (ex-Dulu)	RTOP 41 (ex-62)	Wärtsilä, Helsinki	1 Oct 1985
DUBROVNIK (ex-Kotika)	RTOP 42 (ex-63)	Wärtsilä, Helsinki	16 June 1986

Displacement, tons: 280 standard; 300 full load
Dimensions, feet (metres): 147.6 × 29.2 × 9.9 (45 × 8.9 × 3)
Main machinery: 3 MTU 16V 538 TB92 diesels; 10,230 hp(m) (7.52 MW) sustained; 3 shafts
Speed, knots: 30
Complement: 30

Missiles: SSM. 8 Saab RBS 15 (inertial guidance; active radar homing to 70 km (37.8 n miles) at 0.8 Mach; warhead 150 kg, sea-skimmer.
Guns: 1 Bofors 57 mm/70 (200 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg. 6 103 mm rails for rocket illuminants. 2 Sako 23 mm/87 (twin).
Depth charges: 2 rails.
Countermeasures: Decoys: Phalax chaff and IR flare launcher
ESM: Argo, radar intercept
Weapons control: Saab EOS 400 optronic director.
Radars: Surface search. 9GR 600 (I-band).
Fire control: Philips 9LV 225 (J-band).
Navigation: Raytheon ARPA; I-band.
Sonars: Simrad Marine SS 304; high-resolution active scanning. Finnyards Sonac/PTA towed array; low frequency

Programmes: Both ordered for the Finnish Navy on 13 January 1983. Decommissioned in 2007 and sold to Croatia in 2008. Details are as for ships in Finnish service and may be different.

Modernisation: A Sako barbette can take either twin 23 mm guns or a Sadral SAM launcher. The Sako mounting has replaced the original ZU version.

Structure: The light armament can be altered to suit the planned role. Missile racks can also be replaced by mine rails. Hull and superstructure of light alloy.

VUKOVAR (Scale 1 : 600), Ian Sturton / 1385453

VUKOVAR 6/2008, Croatian Navy / 1294947

2 KRALJ (TYPE R-03) CLASS (FSG)

Name	No	Builders	Launched	Commissioned
KRALJ PETAR KRESIMIR IV	RTOP 11	Kraljevic Shipyard	21 Mar 1992	7 July 1992
KRALJ DIMITAR ZVONIMIR	RTOP 12	Kraljevic Shipyard	30 Mar 2001	16 Sep 2001

Displacement, tons: 382 (11), 390 (12) full load
Dimensions, feet (metres): 177.8 × 28.2 × 11.8 (54.2 × 8.6 × 3.6)
Main machinery: 3 M 504B-2 diesels; 12,500 hp(m) (9.2 MW) sustained; 3 shafts
Speed, knots: 32 **Range, n miles:** 1,700 at 18 kt
Complement: 32 (5 officers)

Missiles: SSM. 4 or 8 Saab RBS 15B (2 or 4 twin); active radar homing to 70 km (37.8 n miles) at 0.8 Mach; warhead 83 kg.
Guns: 1 Bofors 57 mm/70 (200 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg. Launchers for illuminants on side of mounting. 1–30 mm/65 AK 630M (6 barrels; 3,000 rds/min combined to 4 km).
Mines: 4 AIM-70 magnetic or 6 SAG-1 acoustic in lieu of SSMs.
Countermeasures: Decoys: 2 Wallop Barracade chaff/IR launchers.
Weapons control: PEAB 9LV 249 Mk 2 director. Kolonka for AK 630M
Radars: Surface search: Racal BT 502 (E/F-band).
Fire control: PEAB 9LV 249 Mk 2 (I/J-band).
Navigation: Racal 1290A; I-band.
Sonars: RIZ PP10M; hull-mounted, active search, high frequency.

Programmes: The building of this class (formerly called Kobra by NATO) was officially announced as 'suspended' in 1989 but was restarted in 1991. Designated as a missile Gunboat.

Modernisation: Both ships are to be modernised with new diesel engines, probably of German origin. The RBS 15 missiles are to be overhauled.

Structure: Derived from the Koncar class with a stretched hull and a new superstructure. Either missiles or mines may be carried. The second of class is 0.6 m longer than the first ship and incorporates modifications to the bridge structure.

Operational: Based at Split. The future of RTOP 12 is under consideration.

KRALJ DIMITAR ZVONIMIR (Scale 1 : 600), Ian Sturton / 1044094

KRALJ PETAR KRESIMIR IV 2/2002, Hrvatski Vojnik / 0528126

KRALJ PETAR KRESIMIR IV 10/2007, Croatian Navy / 1170104

AMPHIBIOUS FORCES

Notes: The former landing craft DSM 110, decommissioned in 2004, is reported to be undergoing refit at Marina Puna. It is likely to be re-activated as a transport ship although it is unclear whether this is to be under naval or civilian ownership.

2 CETINA (SILBA) CLASS (LCT/ML)

Name	No	Builders	Launched	Commissioned
CETINA	DBM 81	Brodosplit, Split	18 July 1982	19 Feb 1993
KRKA	DBV 82	Brodosplit, Split	17 Sep 1994	9 Mar 1995

Displacement, tons: 880 full load
Dimensions, feet (metres): 163.1 oa; 144 wl × 33.5 × 10.5 (49.7, 43.9 × 10.2 × 3.2)
Main machinery: 2 Alpha 10V23L-VO diesels; 3,100 hp(m) (2.28 MW) sustained; 2 shafts, cp props
Speed, knots: 12. **Range, n miles:** 1,200 at 12 kt
Complement: 27 (15 officers)
Military lift: 460 tons or 6 medium tanks or 7 APCs or 4–130 mm guns plus towing vehicles or 300 troops with equipment
Missiles: SAM. 1 SA-N-6 Grail quad mounting (Cetina).
Guns: 4–30 mm/65 (2 twin) AK 230 (Cetina). 2 (Krka) Hispano 20 mm M71.
Mines: SAG-2 (152 DBM 81, 114 DBM 82); MNS 90 (124 DBM 81, 92 DBM 82); AIM M70 (172 DBM 81, 52 DBM 82)
Radars: Surface search: Racal Decca 1290A; I-band

Comment: Ro-ro design with bow and stern ramps. Cetina's two 30 mm guns are either side of the bridge. Can be used for minelaying, transporting weapons or equipment and personnel. Krka is being used as a water carrier. Both are operational and based at Split.

CETINA 9/2005, Croatian Navy / 1170106

KRKA 6/2007, Freivogel Collection / 1167948

3 TYPE 21 (LCVP)

DJB 103 DJB 104 DJB 107

Displacement, tons: 38 full load
Dimensions, feet (metres): 69.9 x 14.1 x 5.2 (21.3 x 4.3 x 1.7)
Main machinery: 1 (2 in 103) MTU 12V 331 TCB1 diesel; 1,450 hp(m) (1.07 MW); 1 shaft (2 waterjets in 103)
Speed, knots: 21
Range, n miles: 320 at 18 kt
Complement: 6
Military lift: 6 tons or 40 troops
Guns: 1—20 mm M71, 1—30 mm grenade launcher.
Radars: Navigation: Decca 1213; I-band.

Comment: Built at Greben Shipyard 1987–88. DJB 103 upgraded with new main machinery in 1991

DJB 103 5/1997, Dario Vutjanic 00122/6

1 TYPE 22 (LCVPF)

DJC 106 (ex-624)

Displacement, tons: 42 full load
Dimensions, feet (metres): 73.2 x 15.7 x 3.3 (22.3 x 4.8 x 1)
Main machinery: 2 MTU MWM 604TDV8 diesels; 1,740 hp(m) (1.28 MW); 2 waterjets
Speed, knots: 35 **Range, n miles:** 320 at 22 kt
Complement: 8
Military lift: 40 troops or 15 tons cargo
Guns: 2 Hispano 20 mm, 1—30 mm grenade launcher.
Radars: Navigation: Decca 150; I-band.

Comment: Built at Greben Shipyard in 1987 of polyester and glass fibre

DJC 106 8/1998, N A Sifferlinger / 0036/489

MINE WARFARE FORCES

1 MPMB CLASS (MINEHUNTER—INSHORE) (MHI)

Name	No	Builders	Launched	Commissioned
KORCULA	LM 51	Greben, Vela Luka	22 Apr 2006	20 Apr 2007

Displacement, tons: 173 full load
Dimensions, feet (metres): 84.3 x 22.3 x 8.5 (25.7 x 6.8 x 2.6)
Main machinery: 2 MTU 8V 183TE62 diesels; 993 hp(m) (730 kW), 2 Holland Roerpropeller stern azimuth thrusters; bow thruster; 190 hp(m) (140 kW)
Speed, knots: 11 **Range, n miles:** 1,000 at 9 kt
Complement: 14 (3 officers)
Missiles: SAM: SA-N-10 (Iglia).
Guns: 1—20 mm M71
Countermeasures: Minehunting: 1 Super Sea Rover (Benthos), Minesweeping, MDL3 mechanical sweep.
Radars: Navigation: Kelvin Hughes 5000 ARPA, NINAS Mod.
Sonars: Reson mine avoidance, active, high frequency, Klein 2000 side scan; active for route survey; high frequency

Comment: Ordered in 1995 The ship has a trawler appearance with a gun on the forecastle and a hydraulic crane on the sweep deck. GRP hull. Due to a shortage of funds, building had stopped by late 1999 but was later revived. Became fully operational in mid-2008. Further ships, possibly to a modified design, are under consideration.

KORCULA 9/2007, Croatian Navy / 1170101

TRAINING SHIPS

Notes: A sail training ship is under construction at Greben Shipyard. Of GRP construction, the vessel is to replace *Jadran* (in Montenegro) and is to be available for both naval and maritime schools. The name is likely to be *Vila Velebita*.

1 MOMA (PROJECT 861) CLASS (AX)

Name	No	Builders	Commissioned
ANDRIJA MOHOROVIČIĆ	BS 72 (ex-PH 33)	Northern Shipyard, Gdansk	1972

Displacement, tons: 1,514 full load
Dimensions, feet (metres): 240.5 x 36.7 x 12.8 (73.3 x 11.2 x 3.9)
Main machinery: 2 Zgoda-Sulzer 6TD48 diesels, 3,300 hp(m) (2.4 MW) sustained; 2 shafts; cp props
Speed, knots: 17
Range, n miles: 9,000 at 11 kt
Complement: 27 (4 officers)
Radars: Navigation: Racal Decca BT 502; I-band

Comment: Built in 1971 for the Yugoslav Navy as a survey vessel. Based at Split. Has a 5-ton crane and carries a launch. Used as the Naval Academy training ship.

ANDRIJA MOHOROVIČIĆ 1/2007, Croatian Navy / 1170160

AUXILIARIES

Notes: In addition there are two harbour tugs LR-71 and LR-73, two diving tenders BRM-81 and BRM-83, auxiliary transport ship PDS-713, five harbour transport boats BMT-1/5, and two yachts Učka (ex-Fodgorika) and Jadranka (ex-civilian Smile). *Jadranka* was involved in a grounding incident in April 2006.

LR 71 12/2006, Croatian Navy / 1170099

BRM 83 2/2007, Croatian Navy / 133531/4

1 SPASILAC CLASS (ASR)

Name *FAUST VRANČIĆ* **No** BS 73 (ex-PS 12) **Builders** Tito Shipyard, Belgrade **Commissioned** 10 Sep 1976
(*ex-Spasilac*)

Displacement, tons: 1,590 full load
Dimensions, feet (metres): 182 x 39.4 x 12.5 (55.5 x 12 x 3.8)
Main machinery: 2 diesels; 4,340 hp(m) (3.19 MW); 2 shafts; Kort nozzle props; bow thruster
Speed, knots: 13
Range, n miles, 4,000 at 12 kt
Complement: 28 (4 officers)
Cargo capacity: 350 tons fuel; 300 tons deck cargo
Guns: 2—20 mm M 71.
Radars: Navigation: Kelvin Hughes Nucleus 5000R; I-band.

Comment: Former salvage ship now employed as a training and command unit. All salvage equipment has been removed. Underwent refit during 2005. Based at Split.

FAUST VRANČIĆ 12/2006, Croatian Navy / 1170098

1 PT 71 TYPE (TRANSPORT) (AKL)

PT 71 (*ex-Meduja*)

Displacement, tons: 710 full load
Dimensions, feet (metres): 152.2 x 23.6 x 12.1 (46.4 x 7.2 x 5.2)
Main machinery: 1 Burmeister & Wain diesel; 930 hp(m) (684 kW); 1 shaft
Speed, knots: 10
Complement: 16 (2 officers)
Guns: 1 Bofors 40 mm/60. 2 Hispano 20 mm M71 can be carried.
Radars: Navigation. Racal Decca 1216A; I-band.

Comment: Built in 1953. Underwent refit at Merina Puntat in 2007. Water capacity 320 tons.

PT 71 2/2007, Croatian Navy / 1170097

MINISTRY OF INTERIOR

Notes: (1) A Ministry of Interior maritime force polices inshore waters. These vessels are in five types:

Type 1: 3—24 m craft capable of 30 kt; P-1 (*Srd*), P-2 (*Marino*), P-101 (*Sveti Mihovic*)

Type 2: 6—13 m craft capable of 23 kt; P-11 to P-16

Type 3: 6—11 m craft capable of 23 kt; P-111 to P-116

Type 4: 4—14 m craft capable of 30 kt; P-201, P-202, P-203 and P-207

Type 5: Numerous small craft under 10 m; RIB or inflatable construction

(2) In addition there are civilian registered base port craft with PU (Pula), SB (Sibenik), ST (Split) and so on markings.

P 207 9/2008*, Per Körnefeldt / 1335357

SVETI MIHOVIC 9/2008*, Per Körnefeldt / 1335353

P 114 9/2008*, Per Körnefeldt / 1335351

Cuba

MARINA DE GUERRA REVOLUCIONARIA

Country Overview

The Republic of Cuba is an independent republic located in the Caribbean Sea with which it has a 2,020 n mile coastline. The most westerly of the Greater Antilles group, the country comprises two main islands, Cuba (40,519 square miles) and Isla de la Juventud (849 square miles), and more than 1,600 small coral cays and islets. To the west, Cuba commands the approaches to the Gulf of Mexico; the Straits of Florida and the Yucatán Channel separate the country from Florida and Mexico respectively. To the east, the Windward Passage separates the island from Hispaniola (Haiti and the Dominican Republic). Jamaica lies to the south and the Bahamas to the north-east. Havana is the capital, largest city and principal port. Territorial seas (6 n miles) are claimed. A 200 n mile EEZ has been claimed but the limits have not been defined.

The Navy is in a parlous state and has no capability to sustain operations beyond territorial waters.

Headquarters Appointments

Chief of Naval Staff:
Vice Admiral Pedro Perez Miguel Betancourt

Personnel

2009: 2,000 (approximately) (including 500 marines)

Command Organisation

Western Naval District (HQ Cabanas);
Eastern Naval District (HQ Holguin).

Naval Aviation

Four Kamov Ka-28 and 14 Mi 14PL Haze A have been reported but operational status is not known.

Coast Defence

Truck mounted SS-N-2B Styx.

Bases

Cabanas, Nicaro, Cienfuegos, Havana, Santiago de Cuba, Banes
The Naval Academy is at Punta Santa Ana.

DELETIONS

Notes: Some vessels have been disposed of. Others are decaying alongside in harbour.

CORVETTES

1 PAUK II CLASS (PROJECT 1241PE) (FSM)

321

Displacement, tons: 440 full load
Dimensions, feet (metres): 191.9 × 33.5 × 11.2
 (58.5 × 10.2 × 3.4)
Main machinery: 2 Type M 521 diesels; 16,184 hp(m)
 (11.9 MW) sustained; 2 shafts
Speed, knots: 32. **Range, n miles:** 2,400 at 14 kt
Complement: 32
Missiles: SAM. SA-N-5 quad launcher; manual aiming, IR
 homing to 10 km (5.4 n miles) at 1.5 Mach; warhead 1.1 kg.

Guns: 1 USSR 76 mm/59 AK 176; 120 rds/min to 15 km
 (8 n miles); weight of shell 5.9 kg.
 1—30 mm/65, 6 barrels, 3,000 rds/min combined to 2 km
 4—25 mm (2 twin).
A/S mortars: 2 RBU 1200 6-tubed fixed; range 1,200 m;
 warhead 34 kg.
Countermessures: 2 PK 16 chaff launchers.
Radars: Air/surface search: Positive E; E/F-band.
Navigation: Pechora; I-band.

Fire control: Bass Tilt, H/I-band.
Sonars: Rat Tail; VDS (on transom); attack; high frequency.
Comment: Built at Yeroslav Shipyard in the USSR and
 transferred in May 1980. Similar to the ships built for
 India. Has a longer superstructure than the Pauk I and
 electronics with a radome similar to the Parchim II class.
 Torpedo tubes removed. Two twin 25 mm guns fitted on
 the stern. Based at Havana. Operational status doubtful.

PAUK II

2/2001, Michael Nitz / 0534082

PATROL FORCES

6 OSA II CLASS (PROJECT 205)
(FAST ATTACK CRAFT—MISSILE) (PTGF)

261 262 267 268 271 274

Displacement, tons: 171 standard; 245 full load
Dimensions, feet (metres): 126.6 × 24.9 × 8.8 (38.6 × 7.6 × 2.7)
Main machinery: 3 Type M 504 diesels, 10,800 hp(m) (7.94 MW) sustained; 3 shafts
Speed, knots: 37
Range, n miles: 500 at 35 kt
Complement: 30
Missiles: SSM: 4 SS-N-2B Styx; active radar or IR homing to 46 km (25 n miles) at
 0.9 Mach; warhead 513 kg.
Guns: 4—30 mm/65 (2 twin); 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg
Radars: Surface search: Square Tie; I-band.
Fire control: Drum Tilt; H/I-band.
IFF: Square Head, High Pole B

Comment: One Osa II delivered in mid-1976, one in January 1977 and one in March 1978.
 Further two delivered in December 1978, one in April 1979, one in October 1979, two
 from Black Sea November 1981, four in February 1982. While a few may be seagoing,
 most have been cannibalised for spares and all have had their missiles disembarked
 for use in shore batteries. One was sunk as a tourist attraction in 1998. Based at Nicara
 and Cabanas.

OSA II (Bulgarian colours)

MINE WARFARE FORCES

2 SONYA CLASS (PROJECT 1265)
(MINESWEEPERS/HUNTERS) (MSC/MH)

570 578

Displacement, tons: 450 full load
Dimensions, feet (metres): 157.4 × 28.9 × 6.6 (48 × 8.8 × 2)
Main machinery: 2 Kolonna Type 9-D-8 diesels, 2,000 hp(m) (1.47 MW) sustained;
 2 shafts
Speed, knots: 15
Range, n miles: 3,000 at 10 kt
Complement: 43
Guns: 2—30 mm/65 (twin); 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg
 2—25 mm/80 (twin); 270 rds/min to 3 km (1.6 n miles)
Mines: Can carry 8.
Radars: Navigation: Don 2; I-band.
IFF: 2 Square Head, High Pole B.
Sonars: MG 69/79; hull-mounted; active minehunting; high frequency.

Comment: Transferred from USSR in January and December 1985. Two others are non-
 operational and these two have not been reported at sea since 1999

SONYA (Russian colours)

5/1990 / 0056851

3 YEVGENYA CLASS (PROJECT 1258) (MINEHUNTERS) (MHC)

501 510 511

Displacement, tons: 77 standard; 90 full load
Dimensions, feet (metres): 80.7 x 18 x 4.9 (24.6 x 5.5 x 1.5)
Main machinery: 2 Type 3-D-12 diesels; 600 hp(m) (440 kW) sustained; 2 shafts
Speed, knots: 11. **Range, n miles:** 300 at 10 kt
Complement: 10
Guns: 2–14.5 mm (twin) MGs.
Countermeasures: Minehunting gear is lowered on a crane at the stern.
Radars: Navigation: Don 2; I-band.
Sonars: MG 7 lifted over the stern.

Comment: First pair transferred from USSR in November 1977, one in September 1978, two in November 1979, two in December 1980, two from the Baltic on 10 December 1981, one in October 1982 and four on 1 September 1984. There are two squadrons, based at Cabanas and Nicaro although these last three are the only seaworthy units.

YEVGENYA (Ukraine colours) 6/2003, *Ships of the World* / 057265Z

BIYA CLASS (Russian colours) 10/1993, *van Ginderen Collection* / 0506283

AUXILIARIES

Notes: In addition there are two other vessels: *Siboney* H 101 of 535 tons and used for cadet training, and a buoy tender *Taino* H 102 of 1,123 tons. Neither are active.

1 PELYM (PROJECT 1799) CLASS (AXT)

CARLOS MANUEL DE CESPEDES 40

Displacement, tons: 1,050 full load
Dimensions, feet (metres): 210.3 x 38.4 x 11.5 (64.1 x 11.7 x 3.5)
Main machinery: 1 diesel; 1,540 hp (1.1 MW); 1 shaft
Speed, knots: 13.5. **Range, n miles:** 1,000 at 13 kt
Complement: 40
Radars: Navigation: Don; I-band.

Comment: Transferred from the USSR in 1982 equipped as deperring vessel. Deperring gear deleted and converted to use as a training ship since about 1999. Based at Havana.

PELYM 4/2006, *Göran Olsson* / 1164744

1 BIYA (PROJECT 871) CLASS (ABU)

GUAMA H 103

Displacement, tons: 766 full load
Dimensions, feet (metres): 180.4 x 32.1 x 8.5 (55 x 9.8 x 2.6)
Main machinery: 2 diesels; 1,200 hp(m) (882 kW); 2 shafts; cp props
Speed, knots: 13. **Range, n miles:** 4,700+ at 11 kt
Complement: 29 (7 officers)
Radars: Navigation: Don 2; I-band.

Comment: Has laboratory facilities, one survey launch and a 5 ton crane. Built in Poland and acquired from USSR in November 1980. Subordinate to Institute of Hydrography. Last deployed in 1993, but is used locally as a buoy tender and is based at Havana.

BORDER GUARD

Notes: (1) A 5,000 strong force which operates under the Ministry of the Interior at a higher state of readiness than the Navy. Pennant numbers painted in red.
 (2) A 17 m patrol craft *Flecha* and an auxiliary craft 040 have been reported

2 STENKA (TARANTUL) CLASS (PROJECT 205P) (FAST ATTACK CRAFT – PATROL) (PB)

801 816

Displacement, tons: 211 standard; 253 full load
Dimensions, feet (metres): 129.3 x 25.9 x 8.2 (39.4 x 7.9 x 2.5)
Main machinery: 3 M 583A diesels; 12,172 hp(m) (8.95 MW); 3 shafts
Speed, knots: 34. **Range, n miles:** 2,250 at 14 kt
Complement: 25 (5 officers)
Guns: 4–30 mm/65 (2 twin) AK 230; 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.
Radars: Surface search: Pot Drum; H/I-band
Fire control: Mufi Cob; G/H band
IFF: High Pole. Square Head.

Comment: Similar to class operated by Russian border guard with torpedo tubes and sonar removed. Transferred from USSR in February 1985 (two) and August 1985 (one). These two reported to be operational.

STENKA 1990 / 007685/

18 ZHUK (GRIF) CLASS (PROJECT 1400M) (COASTAL PATROL CRAFT) (PB)

589 117

Displacement, tons: 39 full load
Dimensions, feet (metres): 78.7 x 16.4 x 3.9 (24 x 5 x 1.2)
Main machinery: 2 Type M 401B diesels, 2,200 hp(m) (1.6 MW) sustained, 2 shafts
Speed, knots: 30. **Range, n miles:** 1,100 at 15 kt
Complement: 11 (3 officers)
Guns: 4–14.5 mm (2 twin) MGs
Radars: Surface search: Spin Trough; I-band

Comment: A total of 40 acquired since 1971. Last batch of two arrived December 1989. Some transferred to Nicaragua. The total has been reduced to allow for wastage. In some of the class the after gun has been removed. Most of the remaining vessels are still active.

ZHUK 589 4/2006, *Göran Olsson* / 1164743

Cyprus

Country Overview

Formerly a British colony, the Republic of Cyprus gained independence in 1960. The United Kingdom retained sovereignty over two military bases on the south coast. The total area of the country is 3,572 square miles but, since 1974, the northern third of the country has been occupied by Turkish troops and has formed, de facto, a separate (not UN recognised) state called the Turkish Republic of Northern Cyprus. Situated in the eastern Mediterranean Sea, with which it has a 361 n mile coastline, the island lies west of Syria and south of Turkey. Nicosia is the capital and largest city while Limassol and Larnaca are the principal

ports. Territorial seas (12 n miles) are claimed. A 200 n mile EEZ was claimed in 2004.

Headquarters Appointments

Commander Navy Command of the National Guard
 Captain Andreas Ioannides

General

Rail Donkias KKTCSSG 101, two 40 m craft (KKTCSSG 01-02), two *Kaon* 15 (KKTCSSG 11-12), two 14 m craft (KKTCSSG 102 103) and a converted cabin cruiser KKTCSSG 104 are patrol

craft permanently based at Kyrenia (Girne) in northern Cyprus. For details of these vessels see Turkey Coast Guard section

Bases

Limassol
 Mani

Coast Defence

Twenty-four Exocet MM 40 Block 2 Truck-mounted in batteries of four.

PATROL FORCES

Notes: There are also three launches and a number of RIBs in use by the Underwater Diving section of the Navy.

1 MODIFIED PATRA CLASS (PBM)

Name	No	Builders	Commissioned
SALAMIS	P 01	Chantiers de l'Estrel	24 May 1983

Displacement, tons: 92 full load
Dimensions, feet (metres): 105.3 × 21.3 × 5.9 (32.1 × 6.5 × 1.8)
Main machinery: 2 SACM 195 CZSHRY12 diesels, 4,680 hp(m) (3.44 MW); sustained; 2 shafts
Speed, knots: 30 **Range, n miles:** 1,200 at 15 kt
Complement: 22
Missiles: SAM: 1 Matra Simbad twin launcher; Mistral; IR homing to 4 km (2.2 n miles); warhead 3 kg
Guns: 1 Otobreda 40 mm/70. 1 Rheinmetall Wegmann 20 mm
Radars: Surface search. Decca 1226, I-band.

Comment: Laid down in December 1981 for Naval Command of National Guard.

SALAMIS 10/1999, E & M Laurssen / ON164814

1 DILOS CLASS (COASTAL PATROL CRAFT) (PBM)

Name	No	Builders	Commissioned
KYRENIA (ex-Knassos)	P 02 (ex-P 268)	Hellenic Shipyards, Skaramanga	1979

Displacement, tons: 92 full load
Dimensions, feet (metres): 95.1 × 16.2 × 5.6 (29 × 5 × 1.7)
Main machinery: 2 MTU 12V 331TC81 diesels, 2,700 hp(m) (1.97 MW) sustained; 2 shafts
Speed, knots: 26
Range, n miles: 1,600 at 24 kt
Complement: 17 (4 officers)
Missiles: 1 Matra Simbad twin launcher; Mistral; IR homing to 4 km (2.2 n miles); warhead 3 kg
Guns: 1 Rheinmetall Wegmann 20 mm.
Radars: Surface search: Racal Decca 914C, I-band

Comment: Ordered in May 1976 to a design by Abeking & Rasmussen. Transferred from Greece in March 2000 and used mainly for SAR. Others of the class are in service in Georgia, and with the Hellenic Coast Guard and Customs services.

KYRENIA (Greek colours) 61/1998, E M Cornish / 0052296

2 RODMAN 55HJ CLASS (PBF)

PANAGOS AGATHOS

Displacement, tons: 15.7 full load
Dimensions, feet (metres): 57.1 × 12.5 × 2.3 (17.4 × 3.8 × 0.7)
Main machinery: 2 MAN diesels, 2 waterjets
Speed, knots: 48
Range, n miles: 300 at 35 kt
Complement: 7
Guns: 1—12.7 mm MG. 2—7.62 mm MGs.
Radars: Surface search. Furuno, I-band.

Comment: GRP hulls built by Rodman, Vigo and commissioned on 8 June 2002.

PANAGOS 9/2002, van Ginderen Collection / 1044096

2 VITTORIA CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
COMMANDER TSO MAKIS	P 03	Cantiere Navale Vittoria, Adria	Aug 2004
COMMANDER GEORGIU	P 04	Cantiere Navale Vittoria, Adria	Aug 2004

Displacement, tons: 95 full load
Dimensions, feet (metres): 88.6 × 21.0 × 4.3 (27.0 × 6.4 × 1.3)
Main machinery: 2 MTU diesels, 5,440 hp (4.05 MW); 2 waterjets
Speed, knots: 46 **Range, n miles:** 800 at 35 kt
Complement: 12
Guns: 1 Breda 25 mm. 2—12.7 mm MGs.

Comment: Built by Cantiere Navale Vittoria, Italy. Two similar craft are in service with the Police Force.

LAND-BASED MARITIME AIRCRAFT

Notes: There are also three Bell 206 utility helicopters.

Numbers/Type: 1 Pilatus Britten-Norman Maritime Defender BN 2A
Operational speed: 150 kt (280 km/h).
Service ceiling: 18,900 ft (5,760 m).
Range: 1,500 n miles (2,775 km).
Role/Weapon systems: Operated around southern coastline of Cyprus to prevent smuggling and terrorist activity. Sensors: Search radar, searchlight mounted on wings. Weapons: ASV; various machine gun pods and rockets.

POLICE

Notes: (1) In addition there are six speed boats, *Astrapi* 30–35, of 5.3 m with 280 hp engines built in Cyprus in 1999–2000.
 (2) Personnel numbers are approximately 330 Maritime Police.

2 VITTORIA CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
THEXAS	PV 23	Cantiere Navale Vittoria, Adria	2004
ONISILOS	PV 24	Cantiere Navale Vittoria, Adria	2004

Displacement, tons: 95 full load
Dimensions, feet (metres): 88.9 × 13.4 × 1.0 (27.6 × 4.1 × 0.3)
Main machinery: 2 MTU diesels, 5,440 hp (4.05 MW); 2 waterjets
Speed, knots: 45. **Range, n miles:** 600 at 35 kt
Complement: 12
Guns: 2—12.7 mm MGs.

Comment: Built by Cantiero Navale Vittoria, Italy and delivered in 2004. *Thexas* based at Limassol, *Onisilos* at Larnaca.

THEXAS 4/2006, Paolo Marsan / 1166781

5 SAB 12 TYPE (PB)

DIONYSOS PL 11 (ex-G 55/GS 12)	KARPASIA PL 14 (ex-G 50/GS 10)
KOURION PL 12 (ex-G 54/GS 27)	AKAMAS PL 15 (ex-G 57/GS 28)
ILARION PL 13 (ex-G 52/GS 25)	

Displacement, tons: 14 full load
Dimensions, feet (metres): 41.3 × 13.1 × 3.6 (12.6 × 4 × 1.1)
Main machinery: 2 Volvo Penta diesels; 700 hp(m) (520 kW); 2 shafts
Speed, knots: 16
Range, n miles: 300 at 15 kt
Complement: 5
Guns: 1 7.62 mm MG
Radars: Surface search Raytheon; I-band.

Comment: Built in 1979 by Veb Yachwerf, Berlin. Harbour patrol craft of the former GDR MAB 12 class transferred in December 1992. New radars fitted. *Dionysos* based at Latsi, *Kourion* at Larnaca, *Ilarion* at Napa, *Karpasia* at Limassol and *Akamas* at Paphos.

DIONYSOS 8/2006, Marco Ghiglino / 1166745

FRIGATES

4 THETIS CLASS (FFHM)

Name	No	Builders	Laid down	Launched	Commissioned
THETIS	F 357	Svenborg Vaerft	10 Oct 1988	14 July 1989	1 July 1991
TRITON	F 358	Svenborg Vaerft	27 June 1989	16 Mar 1990	2 Dec 1991
VAEDDEREN	F 359	Svenborg Vaerft	19 Mar 1990	21 Dec 1990	9 June 1992
HVIDBJØRNEN	F 360	Svenborg Vaerft	2 Jan 1991	11 Oct 1991	30 Nov 1992

Displacement, tons: 2,600 standard; 3,500 full load
Dimensions, feet (metres): 369.1 oa; 327.4 wl × 47.2 × 19.7
 (112.5; 99.8 × 14.4 × 6.0)

Main machinery: 3 MAN/Burmeister & Wain Alpha 12V 28/32A diesels; 10,800 hp (m) (7.94 MW) sustained; 1 shaft; Kamewa cp prop; bow and azimuth thrusters; 880 hp (m) (647 kW), 1,100 hp (m) (800 kW)

Speed, knots: 20; 8 on thrusters
Range, n miles: 8,500 at 15.5 kt
Complement: 60 (12 officers) plus 30 spare berths

Missiles: SAM: 4 Stinger mountings (2 twin) on hangar roof near mast

Guns: 1 OTO Melara 3 in (76 mm)/62; Super Rapid 2; dual purpose; 120 rds/min to 16 km (8.7 n miles); SAPOMER round weight 12.7 kg.
 2—12.7 mm MGs.

Depth charges: 1 rail (door in stern).

Countermeasures: Decoys: 2 Sea Gnat DL-12T 12-barrelled launchers for chaff and IR flares

ESM: Racal Sabre; intercept.

Combat data systems: Terma TDS, SATCOM 2

Weapons control: Bofors 9LV 200 Mk 3 director. FSI Safire surveillance director 2

Radars: Air/surface search: Plessey AWS 6 2; G-band.

Surface search: Furuno 2135; E/F-band.

Navigation: Furuno 2115; I-band.

Fire control: CelsiusTech 9LV Mk 3 2; I/J-band.

Sonars: Thomson Sintra TSM 2640 Salmon; VDS; active search and attack; medium frequency.
 C-Teck, hull-mounted; active search; medium frequency.

Helicopters: 1 Westland Lynx Mk 90B 2

Programmes: Preliminary study by YARD in 1986 led to Dwingen Marine Consultants being awarded a contract for a detailed design completed in mid-1987. All four ordered in October 1987.

Modernisation: There are plans for a new air search radar and SAM in due course.

Structure: The hull is some 30 m longer than the decommissioned Hvidbjørnen class to improve sea-keeping qualities and allow considerable extra space for additional armament. The design allows the use of containerised equipment to be shipped depending on role and there is some commonality with the Flex 300 ships. The hull is ice strengthened to enable penetration of 1 m thick ice and efforts have been made to incorporate stealth technology, for instance by putting anchor equipment, bollards and winches below the upper deck. There is a double skin up to 2 m below the waterline. A rigid inflatable boarding craft plumb by a hydraulic crane is fitted alongside the fixed hangar. The bridge and ops room are combined. *Thetis* was modified in the stern for seismological survey. Since these operations have terminated, the stern has been remodified to facilitate the ability to act as a command ship and to conduct training. Modifications to *Vaedderen* for Galathea III have been removed.

Operational: Primary role is sovereignty patrol and fishery protection in the North Atlantic. *Vaedderen* supported the Galathea III oceanographic project in 2006-07.

3 NIELS JUEL CLASS (FFGM)

Name	No	Builders	Laid down	Launched	Commissioned
NIELS JUEL	F 354	Aalborg Vaerft	20 Oct 1976	17 Feb 1978	26 Aug 1980
OLFERT FISCHER	F 355	Aalborg Vaerft	6 Dec 1978	10 May 1979	16 Oct 1981
PETER TORDENSKIOLD	F 356	Aalborg Vaerft	3 Dec 1979	30 Apr 1980	2 Apr 1982

Displacement, tons: 1,320 full load
Dimensions, feet (metres): 275.5 × 33.8 × 10.2
 (84 × 10.3 × 3.1)

Main machinery: CODOG; 1 GE LM 2500 gas turbine; 24,600 hp (18.35 MW) sustained; 1 MTU 20 V 956 TB82 diesel; 5,210 hp(m) (3.83 MW) sustained; 2 shafts

Speed, knots: 28, gas; 20, diesel

Range, n miles: 2,500 at 18 kt

Complement: 94 (15 officers)

Missiles: SSM: 8 McDonnell Douglas Harpoon (2 quad launchers); active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg

SAM: 12 (2 sextuple) Raytheon Sea Sparrow Mk 48 Mod 3 VLS (12 missiles) or Mk 56 Mod 0 VLS (24 missiles) modular launchers; semi-active radar homing to 14.6 km (8 n miles) at 2.5 Mach; warhead 39 kg; 12 missiles.

4 Stinger mountings (2 twin)

Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.6 n miles) anti-aircraft, SAPOMER round weight 12.7 kg.

4 × 12.7 mm MGs

Depth charges: 1 rack.

Countermeasures: Decoys: 2 DL-12T Sea Gnat 12-barrelled chaff launchers

PETER TORDENSKIOLD

(Scale 1 : 900), Ian Sturton / 1047859

Combat data systems: CelciusTech 9LV Mk 3, Link 11, SATCOMs (can be fitted forward or aft of the funnel).

Weapons control: Philips 9LV 200 Mk 3 GFCS with TV tracker, Raytheon Mk 91 Mod 1 MFCS with two directors, Harpoon to 1A(V) standard.

Radars: Air search: DASATRS-3D, G/H-band.

Surface search: Philips 9GR 600, I-band.

Fire control: 2 Mk 95, I/J-band (for SAM).

Philips 9LV 200 Mk 1 Rakel 203C, J-band (for guns and SSM).

Navigation: Terma Scantier Mil; I-band.

Sonars: Plessey PMS 26; hull-mounted; active search and attack; 10 kHz.

Programmes: YARD Glasgow designed the class to Danish order

Modernisation: Mid-life update from 1996, including a NATO Sea Sparrow VLS, and new communications. Air search radar replaced by TST TRS-3D. Improved combat data system fitted. F 356 completed in May 1998, F 364 in April 1999, F 355 in December 2001. Stinger SAM mounted each side of the funnel

Operational: Normally only one sextuple SAM launcher is carried, but the second set can be embarked in a few hours. To be replaced by new frigates from 2011.

(Scale 1 : 1,200), Ian Sturton / 1335/54

Radars: Air/surface search: Thales Smart-L; 3D ●; D-band. Fire control (SAM): Thales APAR phased array ●; I/J-band. Fire control (guns): Saab Cerros 200 ●; J/K-band. Navigation: Furuno; E/F/I-bands.
Sonars: Atlas ASO 94 hull mounted. VDS/DTAS/ATAS to be decided.

Helicopters: 1 medium or 2 Lynx ●

Programmes: Construction of three frigates was approved in the 2004 Defence Agreement. The contract for construction was signed with Odense Shipyard on 20 December 2006. The blocks of the ships are under construction at Klaipeda, Lithuania, and at Loksä, Estonia. The first four blocks were delivered to Odense on 20 May 2008.

Structure: Built to DNV standards. The design is based on the Absalon class Flexible Support Ships and utilises the same hull (with one fewer deck) and the majority of equipment. There are to be dedicated staff facilities for national or NATO task group commanders. Four Stanflex container positions are to be located on the weapons deck and one at 8-position. There is to be cargo space for four 20 ft TEU containers. The flight deck is to be capable of operating 20 ton helicopters and prepared to operate UAVs. 'A' gun position is suitable for upgrade to a 127 mm gun if and when required.
Operational: The ships are to have a global, expeditionary role and to be capable of providing area air-defence and support of land forces.

SHIPBORNE AIRCRAFT

Notes: The Defence Agreement of 10 June 2004 (covering 2005–09) provided for the procurement of four maritime helicopters and a project to update Lynx helicopters. These projects have been superseded by a study to acquire a new maritime helicopter capability to replace Lynx. The new aircraft are to operate from the Ivar Huitfeldt-class frigates, and the Thetis, Absalon and Knud Rasmussen classes.

Numbers/Type: 8 Westland Lynx Mk 90B.
Operational speed: 125 kt (232 km/h)
Service ceiling: 12,500 ft (3,810 m).
Range: 320 n miles (593 km).

Role/Weapon systems: Shipborne helicopter for EEZ and surface search tasks. All upgraded to Super Lynx standard with first delivered November 2000. Sensors: Ferranti Seaspray; Racal Kestrel ESM; FLIR 2000. Weapons: Unarmed.

LYNX

9/2006, M Declercq / 1184767

Numbers/Type: 4 Sikorsky S-61A-1 Sea King.
Operational speed: 118 kt (219 km/h).
Service ceiling: 14,700 ft (4,480 m).
Range: 542 n miles (1,005 km)

Role/Weapon systems: Land-based SAR helicopter for combat rescue and surface search. To be replaced by EH 101 in 2009. Sensors: Bendix weather radar; GEC Avionics FLIR. Weapons: unarmed.

SEA KING

5/1999, H M Steele 0056851

Numbers/Type: 8 AgustaWestland EH 101 Mk 512.
Operational speed: 160 kt (296 km/h)
Service ceiling: 15,000 ft (4,572 m).
Range: 550 n miles (1,019 km)

Role/Weapon systems: Contract on 7 December 2001 for a total of 14 utility variants of the EH 101. Eight are configured for SAR duties and six for troop-carrying although the aircraft are designed for rapid role-change. By agreement with the UK, the delivery of six aircraft has been delayed in order to meet a high-priority UK operational requirement. Military lift is 28 troops and up to four tonnes underslung. Sensors: Telephonics RDR 1600 SAR Weather Avoidance Radar

EH 101

7/2006, Jane's/Patrick Allen / 1184189

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 3 Challenger 604.
Operational speed: 470 kt (870 km/h).
Service ceiling: 41,000 ft (12,497 m).
Range: 3,769 n miles (6,980 km).

Role/Weapon systems: Maritime reconnaissance for EEZ patrol in the Baltic and off Greenland. Sensors: Terna SLAR radar; IR/UV scanner. Weapons: unarmed.

CHALLENGER 604

6/2005, Massimo Anneti / 1153495

PATROL FORCES

10 FLYVEFISKEN CLASS (LARGE PATROL/ATTACK CRAFT AND MINEHUNTERS/LAYERS) (PGGM/MHCD/MLC/AGSC)

Name	No	Builders	Commissioned
HAVKATTEN	P 552	Danyard A/S, Aalborg	1 Nov 1990
LAXEN	P 553	Danyard A/S, Aalborg	22 Mar 1991
MAKRELEN	P 554	Danyard A/S, Aalborg	1 Oct 1991
STØREN	P 555	Danyard A/S, Aalborg	24 Apr 1992
GLENTEN	P 557	Danyard A/S, Aalborg	29 Apr 1993
GRIBBEN	P 558	Danyard A/S, Aalborg	1 July 1993
RAVNEN	P 560	Danyard A/S, Aalborg	17 Oct 1994
SKADEN	P 561	Danyard A/S, Aalborg	10 Apr 1995
VIBEN	P 562	Danyard A/S, Aalborg	15 Jan 1996
SØLØVEN	P 563	Danyard A/S, Aalborg	28 May 1996

Displacement, tons: 480 full load

Dimensions, feet (metres): 177.2 x 29.5 x 8.2 (54 x 9 x 2.5)

Main machinery: CODAG; 1 GE LM 500 gas turbine (centre shaft) (P 557, 560, 561 and 562); 5,450 hp (4.1 MW) sustained; 2 MTU 16V 396 TB94 diesels (outer shafts); 5,800 hp(m) (4.26 MW) sustained; 3 shafts, cp props on outer shafts; bow thruster. Auxiliary propulsion by hydraulic motors on outer gearboxes; hydraulic pumps driven by 1 GM 12V-71 diesel; 500 hp (375 kW)

Speed, knots: 30; 20 on diesels; 10 on hydraulic propulsion

Range, n miles: 2,400 at 18 kt

Complement: 19-29 (depending on role) (4 officers)

Missiles: SSM: 8 McDonnell Douglas Harpoon; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg. Attack role only. Block II from 2004 gives land attack option.

SAM: Raytheon Sea Sparrow RIM 7P; Mk 48 Mod 3 VLS (6 missiles); semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg. Fitted for Attack, MCM and Minelaying roles. In MCM role one Stinger twin launcher can be fitted instead of Sea Sparrow.

Guns: 1 OTO Melara 3 in (76 mm)/62 Super Rapid, dual purpose; 120 rds/min to 16 km (8.7 n miles); SAPOMER round weight 12.7 kg. 2-12.7 mm MGs.

Torpedoes: 4-324 mm tubes; Eurotorp MU 90 impact.

Depth charges: 4.

Mines: 80. Minelaying role only.

Countermeasures: MCMV: Ibis 43 minehunting system with Thomson Sintra 2061 tactical system and 2054 side scan sonar towed by MSF class drones (see *Mine Warfare Forces* section). Bofors Double Eagle ROV Mk II. Minehunting role only.

Decoys: 2 Sea Gnat 130 mm DL-6T 6-barrelled launcher for chaff and IR flares.

ESM: Rascal Sabre; radar warning.

Combat data systems: Terma/CelsiusTech TDS. Link 11

Weapons control: CelsiusTech 9LV Mk 3 optronic director Harpoon to 1A(V) standard or AHWCS with Block II

Radars: Air/surface search: Plessey AWS 6 (552-555); G-band; or EADSTRS-3D (557-563); G/H-band.

Surface search: Terma Scanter MII; I-band.

Navigation: Furuno; I-band

Fire control: CelsiusTech 9LV 200 Mk 3; J-band

Sonars: CelsiusTech CTS-36/39; hull-mounted; active search; high frequency.

Thomson Sintra TSM 2640 Salmon; VDS; medium frequency. For ASW only

Programmes: Standard Flex 300 replaced Daphne class (seaward defence craft), Sølvøen class (fast attack craft torpedo), and Sund (MCM) class. First batch of seven with option on a further nine contracted with Danyard on 27 July 1985. Second batch of six ordered 14 June 1990 and last one authorised in 1993 to a total of 14, two less than originally planned.

Modernisation: Mk 48 Mod 3 SAM launchers replaced by Mk 56 launchers. Harpoon launchers upgraded to AHWCS version 2 capable of firing Block II missiles. Link 11 fitted. The combat data system is to be replaced by Terma C-Flex.

Structure: GRP sandwich hulls. Four positions prepared to plug in armament and equipment containers in combinations meeting the requirements of the various roles. Torpedo tubes and mineraisils detachable. Combat data system modular with standard consoles of which three to six are embarked depending on the role. SAV control aeriels are mounted on the bridge TRS-3D radar fitted in last seven.

Operational: Following an operational review of the class, the original concept, to be able to re-role by the interchange of mission-specific containers for different taskings (ASUW, ASW, MCM and Patrol) has been abandoned. Under a revised concept of employment, the class is to be reduced to ten ships. Of these, four ships are to be permanently roled for MCM (Laxen, Makrelen, Havkatten, Støren), four for a combat role (ASW or ASUW) (Glenten, Skaden, Viben, Ravnem) and two (Gribben and Sølvøen) for Patrol duties. Of the four ships decommissioned Svaerdfisken has been scrapped and Flyvefisken and Hajen have been sold to Lithuania. Lommen having served as a test platform for the Terma C-Flex combat system, is to be decommissioned in 2008 and is also to be sold to Lithuania. Gas turbines are not fitted in MCM and patrol ships.

2 KNUD RASMUSSEN CLASS (ARCTIC PATROL SHIPS) (PGBH)

Name	No	Builders	Laid down	Launched	Commissioned
KNUD RASMUSSEN	P 570	Karstensens, Skibsværft, Skagen	21 Nov 2005	19 Oct 2006	18 Feb 2008
EJNAR MIKKELSEN	P 571	Karstensens, Skibsværft, Skagen	2006	1 July 2007	16 Jan 2009

Displacement, tons: 1,720

Dimensions, feet (metres): 235.8 x 47.9 x 16.2 (71.8 x 14.6 x 4.95)

Main machinery: 2 MAN B&W ALPHA 8L 27/38 diesels; 7,300 hp (5.4 MW); 1 shaft; cp prop

Speed, knots: 17

Complement: 18 (accommodation for 43)

Guns: 2-12.7 mm MGs.

Countermeasures: To be announced.

Combat data systems: Terma C-Flex

Radars: Surface/air search, Terma Scanter 4100, I-band.

Navigation: Furuno; E/F/I-bands.

Sonars: Reson; hull mounted (retractable).

Helicopters: Platform for 1 medium.

Programmes: Contract for the construction of two ships let in December 2004. Production started in September 2005. The hulls and propulsion were manufactured/installed by the Stocznia Północna (Northern) Shipyard in Gdansk and the ships subsequently completed at Skagen. Installation of military equipment was undertaken by Naval Materiel Command

Structure: Built to DNV Navy ICE 1A standards. A high-speed long-range rescue craft, an ice-strengthened version of the Combat Boat 90E, can be launched from a bay in the stern. Fitted with four Stanflex container positions for equipment and weapons, the design has the flexibility to operate in its (lightly armed) primary role or in a more heavily armed secondary role. The ships are to be equipped with SeaFLIR infrared imaging system.

Operational: Have replaced Agdek class. The principal role is sovereignty patrol in the arctic waters off Greenland while secondary roles, such as command and control of a small force, might be exercised globally. Contained weapons including a 76 mm gun, a Mk 56 launcher with evolved Sea Sparrow missiles and MU 90 torpedoes may be fitted

KNUD RASMUSSEN

7/2008, MOD Denmark / 1294598

2 VTS CLASS (COASTAL PATROL CRAFT) (PB)

VTS 3 VTS 4

Displacement, tons: 34 full load
 Dimensions, feet (metres): 55.8 x 16.1 x 6.9 (17 x 4.9 x 2.1)
 Main machinery: 2 MWM TBD 616 V12 diesels; 979 hp(m) (720 kW); 2 waterjets
 Speed, knots: 33. Range, n miles: 300 at 30 kt
 Complement: 3
 Guns: 1 – 7.62 mm MG can be carried.
 Radars: Surface search: Furuno FR-1831; I-band.
 Navigation: Furuno M1831; I-band.

Comment: Built by Mulder & Rijke, Netherlands. Completed in 1997 and 1998 to replace Botved type.

VTS 3 6/1999, Royal Danish Navy / 0056874

1 AGDLEK CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
TULUGAQ	Y 388	Svendborg Værft	26 June 1979

Displacement, tons: 394 full load
 Dimensions, feet (metres): 103 x 25.3 x 11.2 (31.4 x 7.7 x 3.4)
 Main machinery: 1 Burmeister & Wain Alpha A08-26 VO diesel; 800 hp(m) (588 kW); 1 shaft
 Speed, knots: 12
 Complement: 14 (3 officers)
 Guns: 2 – 12.7 mm MGs.
 Radars: Surface search: Furuno 2135; E/F-band.
 Navigation: Furuno 1510; I-band.

Comment: Ice strengthened. SATCOM fitted. *Agdlek* decommissioned in 2008 and replaced by *Knud Rasmussen*. *Agps* decommissioned in 2009. Last remaining craft, *Tulugaq*, stationed in Greenland.

TULUGAQ 10/2004, Per Körnerfeldt / 1044108

4 + 2 DIANA (SF MK II) CLASS (LARGE PATROL CRAFT) (PB)

DIANA P 520 FREJA P 521 HAVFRUEN P 522 NAJADEN P 523 — P 524 — P 525

Displacement, tons: 276 full load
 Dimensions, feet (metres): 141.1 x 26.9 x 7.2 (43.0 x 8.2 x 2.2)
 Main machinery: 2 MTU 396 16V TB94 diesels; 2,700 hp (2 MW); 2 shafts; cp props
 Speed, knots: 26
 Complement: 9 (accommodation for 15)
 Guns: 2 – 12.7 mm MGs.
 Radars: Navigation: Furuno FR-2117; I-band.

Comment: GRP vessels to replace the Ø class. Ordered on 3 December 2004 from Faaborg Værft, Denmark, the hull, superstructure and machinery are to be built by Kockums, Karlskrona. Fitted with one Stanflex container position. The first delivered on 12 December 2007, the second on 4 April 2008, the third on 25 September 2008 and the fourth on 11 December 2008.

FREJA 9/2008*, L-G Nilsson / 1335361

6 LCP CLASS (COASTAL PATROL CRAFT) (PB)

LCP 1-4 SAR 1-2

Displacement, tons: 6.5 full load
 Dimensions, feet (metres): 39.0 x 9.5 x 2.3 (11.9 x 2.9 x 0.7)
 Main machinery: 1 Scania DSI 14 V8 diesel; 625 hp (465 kW); 1 Kamewa water-jet
 Speed, knots: 38
 Complement: 3
 Guns: 1—12.7 mm or 7.62 mm MG.

Comment: Based on the Swedish Combatboat 90E, these craft were developed as a joint venture between Forsvarvarets Materielverk and Storebro by whom LCP 1-4 were constructed and completed in 2004. Used as fast landing craft from the Absalon class support ships, they can carry 10 fully equipped soldiers or four stretchers. Two ice-strengthened variants are to be operated by the Arctic Patrol Ships. Painted orange, they were delivered in 2006.

LCP 1 4/2005, Martin Mokrus / 1133403

1 MHV 90 CLASS (COASTAL PATROL CRAFT) (PB)

HOLGER DANSKE MHV 92

Displacement, tons: 85 full load
 Dimensions, feet (metres): 64.9 x 18.7 x 8.2 (19.8 x 5.7 x 2.5)
 Main machinery: 1 Burmeister & Wein diesel; 400 hp(m) (294 kW); 1 shaft
 Speed, knots: 11
 Complement: 12
 Guns: 2—7.62 mm MGs.
 Radars: Navigation: Furuno 1505; I-band.

Comment: Built between 1973 and 1975. New radars fitted. MHV 90 class being progressively replaced by MHV 900 class. This last one expected to decommission in 2009. Operated by Naval Home Guard.

MHV 90 CLASS 6/2006, Martin Mokrus / 1159964

MINE WARFARE FORCES

Notes: See also Flyvefisken class under Patrol Forces.

4 MSF CLASS (MRD)

MSF 1-4

Displacement, tons: 125 full load
 Dimensions, feet (metres): 86.9 x 23 x 6.9 (26.5 x 7 x 2.1)
 Main machinery: 2 Scania DSI 14 diesels; 1,000 hp(m) (736 kW); 2 Schottel waterjets or 2 Schottel azimuth thrusters
 Speed, knots: 12
 Complement: 4
 Combat data systems: IN-SNEC/INFOCOM
 Radars: Navigation: Raytheon 40 or Terma; I-band.
 Sonars: Thomson Marconi STS 2054 side scan active; high frequency.

Comment: MSF (Minor Standard Vessel). Ordered in January 1997 from Danyard, Aalborg, and five delivered June 1998 to January 1999. Used primarily as MCM drones although built as multipurpose platform (with one Stanflex container position). Fitted with containerised MCM gear for working in conjunction with Flyvefisken class minehunters. GRP hulls. IN-SNEC is a high data rate sonar/TV link. INFOCOM is a low data rate command link. Plans for further craft are under consideration. One transferred to Sweden in 2001.

MSF 3 6/2008, M Declercq / 1335359

6 SAV CLASS (MINEHUNTER—DRONES) (MSD)

MRD 1 (ex-MRF 1) MRD 2 (ex-MRF 2) MRD 3-6

Displacement, tons: 32 full load
Dimensions, feet (metres): 59.7 × 15.6 × 3.9 (18.2 × 4.8 × 1.2)
Main machinery: 2 Detroit diesels; 350 hp(m) (257 kW); 2 Schottel waterjet propulsors
Speed, knots: 12
Complement: 4
Combat data systems: Terma link to Flyvefisken class (in MCMV configuration).
Radars: Navigation: Furuno, I-band
Sonars: Thomson Sintra; TSM 2054 side scan; active minehunting; high frequency

Comment: Built by Danyard with GRP hulls. First one completed in March 1991, second in December 1991. Four more ordered in mid-1994 and delivered in 1996. The vessels are robot drones (or Surface Auxiliary Vessels (SAV)) operated in pairs by the Flyvefisken class in MCMV configuration. Hull is based on the Hugin class TRVs with low noise propulsion. The towfish with side scan sonar is lowered and raised from the stern-mounted gantry. The first two craft have slightly different funnel designs. MRD 4 is used as a station vessel at Korsør and the remainder are laid-up.

MRD 4 5/2008*, E & M Laursen / 1335367

1 RESEARCH SHIP (AGE)

DANA

Displacement, tons: 3,700 full load
Dimensions, feet (metres): 257.5 × 48.6 × 19.7 (78.5 × 14.8 × 6)
Main machinery: 2 Burmeister and Wain Alpha 16V23-LU diesels; 4,980 hp(m) (3.65 MW); 1 shaft cp prop; bow and stern thrusters
Speed, knots: 15
Range, n miles: 8,000 at 14 kt
Complement: 27 plus 12 scientists

Comment: Built by Dannebrog, Aarhus in 1982. Used mostly for Fisheries survey and research. Has an ice-strengthened hull and three 6 ton cranes

DANA 6/2002, Royal Danish Navy / 0533223

SURVEY SHIPS

4 SURVEY LAUNCHES (YGS)

SKA 12-14 SKA 16

Displacement, tons: 52 full load
Dimensions, feet (metres): 65.6 × 17.1 × 6.9 (20 × 5.2 × 2.1)
Main machinery: 1 GM diesel; 540 hp (403 kW); 1 shaft
Speed, knots: 12
Complement: 6 (1 officer)
Radars: Navigation: Furuno, I-band.

Comment: GRP hulls. Built 1981-84 by Rantsausminde. SKA 12 has strengthened hull and is permanently deployed to Naval Station Grønødal (Greenland) for surveying of Greenland waters. SKA 11 was lost off Greenland on 3 May 2006. Multibeam echo sounders are fitted. SKA 13 and 14 have been modified for other tasks at the Naval Bases. SKA 11 and 15 were replaced by two Holm class. The survey launches can work alone, in pairs or in conjunction with Flyvefisken class vessels. All have red hulls and white superstructures.

SKA 16 9/2006, E & M Laursen / 1159935

TRAINING SHIPS

Notes: There are two small Sail Training Ships, *Svanen* Y 101 and *Thyra* Y 102. Of 32 tons they have a sail area of 480 m² and an auxiliary diesel of 72 hp(m) (53 kW). Built in 1960 by Molich yacht builders, Hundested. Used to train midshipmen before attending the naval academy.

THYRA 6/2008*, Frank Findler / 1335457

AUXILIARIES

Notes: (1) The OPLOG organisation consists of the former Mobile Logistic Unit and parts of the maintenance and supply facilities of the naval bases at FredericksHAVN and Korsør. The mobile capability includes containerised workshops, stores, accommodation and helicopter refuelling facilities carried on approximately 40 trucks and trailers.

(2) Sealift: The ARK project, to secure availability of strategic sealift to NATO, was launched by Denmark in 2003. Germany became a full partner in 2006. Full time charter of the 171 m *Tor Anglia* (2,450 lane-metres + 627 TEU) was arranged in 2003, of the 183 m *Tor Futura* (2,308 lane-metres + 644 TEU) in 2004, of the 182 m *Ark Forwarder*

(2,715 lane-metres) in 2006 and of the 193 m *Tor Dania* (2,240 lane-metres) in 2007. The ships are on call for the NATO Response Force and also for Danish and German national operations.

2 ABSALON CLASS (COMBAT SUPPORT SHIPS) (AGF/AKR/AH)

ESBERN SNARE	L 17	Odense Shipyard, Linds	2004	21 June 2004	18 Apr 2005

Displacement, tons: 6,300 full load
 Dimensions, feet (metres): 449.6 × 64.0 × 20.7
 (137.0 × 19.5 × 6.3)
 Main machinery: CODAD. 2 MTU 8000 M 70 diesels;
 22,300 hp (16.63 MW); 2 shafts; CP propellers; bow thruster
 Speed, knots: 23
 Range, n miles: 11,500 at 14 kt
 Complement: 99 + 70 staff

Missiles: SSM: 16 Boeing Harpoon Block II (2 octuple
 AHWCS VLS launchers); active radar homing to 124 km
 (67 n miles) at 0.9 Mach; warhead 227 kg.
 SAM: 36 Evolved Sea Sparrow RIM 162B (semi-active
 radar homing to 18 km (9.7 n miles) at 3.6 Mach; warhead
 38 kg. 3 Raytheon Mk 56 VLS (3 × 12 cells).
 4 twin Sea Stinger launchers.
 Guns: United Defense 5 in (127 mm)/62 Mk 45 Mod 4 (20
 rds/min to 23 km (12.6 n miles); weight of shell 32 kg.
 Prepared for extended range capable munitions.
 2 Oerlikon Contraves 35 mm GDM08 Millennium guns.
 4 × 12.7 mm MGs
 Torpedoes: 6–324 mm (2 triple) launchers (Eurotorp
 Mu 90 Impact; active/passive homing to 15 km (8 n miles)
 at 29/50 kt.
 Countermeasures: Decoys: Terma 130 mm Decoy Launching
 System 2 DL-12T and 2 DL-6T launchers (36 barrels)
 ESM. EDO ES 3701

ABSALON

(Scale 1 : 1,200), Ian Sturton / 1166532

Combat data systems: Terma C-Flex.
 Electro-optic systems: FLIR Systems Sea Star Safire III (E/F-band).
 Radars: Air/surface search: Thales SMART-S 3D (E/F-band).
 Surface search/navigation: Terma Scantec 2001 (I-band).
 Fire control: 2 Saab Tech Ceros 200 Mk 3 (J/K-band).
 Navigation: 2 FR-2135 (E/F/I-band).
 Sonars: Atlas ASO 94 hull mounted. VDS/DTAS/ATAS to be
 decided
 Helicopter: 2 EH 101

ships. Construction of first of class started on 30 April
 2003.

Structure: Built to DNV Navy standards with five Stanflex
 container positions. Ro-Ro ramp aft gives access to 900 m²
 of multipurpose deck (vehicles (including 62 ton MBT),
 logistics, ammunition, up to 34 TEU containers). 2 Combat
 Boat 90E high-speed insertion craft carried on cargo deck.
 Flight deck capable of operating 20 ton helicopters.

Operational: To be capable of acting as a command platform,
 transporting up to 200 personnel and equipment,
 provision of joint logistic support, and as a hospital ship.
 Absalon achieved full operational capability in 2007 and
 Esbern Snare in mid-2008.

Programmes: Contract on 16 October 2001 for detailed
 design and construction of two multirole support

1 TRANSPORT SHIP (AKS)

Name	No	Builders	Commissioned
SLEIPNER	A 559	Åbenrå Værft og A/S	18 July 1986

Displacement, tons: 465 full load
 Dimensions, feet (metres): 119.8 × 24.9 × 8.8 (36.5 × 7.6 × 2.7)
 Main machinery: 1 Callesen diesel; 575 hp(m) (423 kW); 1 shaft
 Speed, knots: 11
 Range, n miles: 2,400 at 11 kt
 Complement: 7 (1 officer)
 Cargo capacity: 150 tons
 Radars: Navigation; Furuno FR 2115, I-band.

SLEIPNER 4/2007, E & M Laurson / 1335455

4 RESCUE VESSELS (PBO)

NORDSØEN	VESTKYSTEN	HAVØRNEN	VIBEN
----------	------------	----------	-------

Measurement, tons: 594 gwt (Nordsøen); 667 gwt (Vestkysten); 188 gwt (Havørnen); 23 gwt (Viben)
 Dimensions, feet (metres): 174.6 × 33.8 × 10.8 (53.2 × 10.3 × 3.3) (Nordsøen)
 163.7 × 32.8 × 13.8 (49.9 × 10 × 4.2) (Vestkysten)
 101.4 × 21.6 × 7 (30.9 × 6.6 × 2) (Havørnen)
 56.4 × 11.8 × 5.2 (17.2 × 3.6 × 1.6) (Viben)

Comment: Non-naval ships operated by the Ministry of Food and Fisheries. Nordsøen and Vestkysten operate primarily in the North Sea and Kattegat area, Havørnen in the Baltic Sea around Bornholm and Viben in shallow waters. Capable of 14–18 kt

1 ROYAL YACHT (YAC)

Name	No	Builders	Commissioned
DANNEBROG	A 540	R Dockyard, Copenhagen	20 May 1932

Displacement, tons: 1,130 full load
 Dimensions, feet (metres): 246 × 34 × 12.1 (75 × 10.4 × 3.7)
 Main machinery: 2 Burmeister & Wain Alpha T23L-KVO diesels; 1,800 hp(m) (1.32 MW); 2 shafts; cp props
 Speed, knots: 14
 Complement: 54 (12 officers)
 Guns: 2–40 mm saluting guns.
 Radars: Navigation. Furuno FR-2115; I-band.

Comment: Laid down 2 January 1931, launched on 10 October 1931. Major refit 1980 included new engines and electrical gear. Marisat fitted in 1992

DANNEBROG 4/2008*, E & M Laurson / 1335365

2 OIL POLLUTION CRAFT (YPC/ABU)

GUNNARTHORSON A 560	GUNNAR SEIDENFADEN A 561
---------------------	--------------------------

Displacement, tons: 750 full load
 Dimensions, feet (metres): 183.7 × 40.3 × 12.8 (56 × 12.3 × 3.9)
 Main machinery: 2 Burmeister and Wain Alpha 8V23L-VO diesels, 2,320 hp(m) (1.7 MW); 2 shafts; cp props; bow thruster
 Speed, knots: 12.5
 Complement: 16 (7 officers)

Comment: Built by Ørnskov Stålskibsværft, Frederikshavn. Delivered 8 May and 2 July 1981 respectively. G Thorson at Copenhagen, G Seidenfaden at Korsør. Carry firefighting equipment. Large hydraulic crane fitted in 1988 for the secondary task of buoy tending. Orange painted hulls.

GUNNARTHORSON 8/2007, Michael Nitz / 1165510

2 POLLUTION CONTROL CRAFT (YPC)

MILJØ 101-102

Displacement, tons: 16 full load
 Dimensions, feet (metres): 53.8 × 14.4 × 7.1 (16.2 × 4.2 × 2.2)
 Main machinery: 1 MWM TBD232V12 diesel; 454 hp(m) (334 kW); sustained; 1 shaft
 Speed, knots: 15
 Range, n miles: 350 at 8 kt
 Complement: 3 (1 officer)

Comment: Built by Ejvind's Plastikbodeværft, Svendborg. Carry derricks and booms for framing oil slicks and dispersant fluids. Naval manned. Delivered 1 November and 1 December 1977

MILJØ 102 7/2008* / 1335356

GUNNAR SEIDENFADEN 5/2002, L-G Nilsson / 0526823

Djibouti**MARINE NATIONALE DJIBOUTIENNE****Country Overview**

Formerly the French territory of French Somaliland and later the Afars and the Issas, Djibouti became independent in 1977. With an area of 8,957 square miles and a coastline of 170 n miles, the country is situated in a strategic position on the Bab el Mandeb, the strait that links the Red Sea with the Gulf of Aden. It is bordered to the north by Eritrea, to the west by Ethiopia and to the south by Somalia. The largest town and capital is also called Djibouti whose port serves as an international transshipment and refueling centre. It also provides Ethiopia with its only rail link to the

sea. Territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits are not fully defined.

Headquarters Appointments

Commander of Navy:
 Colonel Abdourahman Aden Cher

Personnel

2009. 380

Bases

Djibouti

French Navy

The permanent French naval contingent usually includes up to three frigates and a repair ship.

PATROL FORCES

Notes: (1) Up to six RIBs are in use. Zodiac and Avon types.
 (2) One LCM (ex-CTM 14) transferred from France in 1999.
 (3) There is a small patrol craft P 02.
 (4) Two Cantieri del Golfo 500L class were acquired in 2006. The 10 m craft are capable of 37 kt.

1 PLASCOA CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
MONT ARREH	P 11	Plascoa, Cannes	16 Feb 1986

Displacement, tons: 35 full load
Dimensions, feet (metres): 75.5 × 18 × 4.9 (23 × 5.5 × 1.5)
Main machinery: 2 SACM Poyaud V12-520 M25 diesels; 1,700 hp (m) (1.25 MW); 2 shafts
Speed, knots: 25
Range, n miles: 750 at 12 kt
Complement: 15
Guns: 1 Giat 20 mm. 1—12.7 mm MG.
Radars: Navigation: Decca 36; I-band.

Comment: Ordered in October 1984 and transferred as a gift from France. GRP hulls. Refitted in 1988 and 1994. *Moussa Ali* decommissioned in 2001

MONT ARREH

1986, Plascoa / 0056896

1 SWARI CLASS (INSHORE PATROL CRAFT) (PBR)

P 13

Comment: 21 m craft acquired from Iraq in 1989. Can be armed with MGs and rocket launchers. Outboard engines give speeds up to 25 kt in calm conditions. Four further craft are no longer operational.

2 BATTALION 17 (PBF)

P 16 P 17

Displacement, tons: 35.5 full load
Dimensions, feet (metres): 55.9 × 17 × 5.2 (17.05 × 5.2 × 1.6)
Main machinery: 2 MTU 12V 183 TE 92 diesels
Speed, knots: 35.2
Range, n miles: 680 at 30 kt
Complement: 9
Guns: 2—14.5 mm MGs (1 twin).
Radars: Surface search: Raytheon; I-band.

Comment: Australian design craft built by Herens Boat Yard at Assab, Eritrea and delivered in 2001. Five similar craft in service in Eritrea.

BATTALION 17 (Eritrean colours)

8/2000, Eritrean Navy / 0103788

4 PATROL CRAFT (PC)

Displacement, tons: 177 full load
Dimensions, feet (metres): 44.0 × 12.5 × 3.9 (13.4 × 3.8 × 1.2)
Main machinery: 2 General Motors Detroit 6V53 diesels; 2 shafts
Speed, knots: 13
Range, n miles: 200 at 11 kt
Complement: 4

Comment: Former US Coast Guard lifeboats constructed in the 1960s. Four were delivered in June 2006 under FMS funding arrangements. A further craft was transferred as spares.

Dominica

Country Overview

Formerly a British colony, the Commonwealth of Dominica became an independent republic in 1978. With an area of 290 sq miles and coastline of 80 n miles, it is the largest and most northerly of the Windward Islands in the Lesser Antilles chain and is situated in the Caribbean Sea between the French possessions of Guadeloupe to the north and Martinique to the south. The capital, major town, and port

is Roseau. Territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits are not fully defined.

Personnel

2009: 35

Headquarters Appointments

Head of Police Coast Guard:
 Inspector Eric Elizee

Bases

Roseau

COAST GUARD

1 SWIFT 65 FT CLASS (PB)

Name	No	Builders	Commissioned
MELVILLE	D 4	Swiftships, Morgan City	1 May 1984

Displacement, tons: 33 full load
Dimensions, feet (metres): 64.9 × 18.4 × 6.6 (19.8 × 5.6 × 2)
Main machinery: 2 Detroit 12V-71TA diesels; 840 hp (616 kW) sustained; 2 shafts
Speed, knots: 23. **Range, n miles:** 250 at 18 kt
Complement: 10
Guns: 1—7.62 mm MG.
Radars: Furuno; I/J-band

Comment: Donated by US government. Similar craft supplied to Antigua and St Lucia. Aluminium construction.

MELVILLE

11/1993, Maritime Photographic / 0506143

Dominican Republic

MARINA DE GUERRA

**Country Overview**

The Dominican Republic is an independent state whose constitution was promulgated in 1966. With an area of 18,816 square miles, it occupies the eastern two thirds of the island of Hispaniola, which it shares with Haiti to the west. There are also a number of adjacent islands, notably Beata and Saona. It has a 697 n mile coastline and is bordered to the north by the Atlantic Ocean, to the east by the Mona Passage, which separates it from Puerto Rico, and to the south by the Caribbean Sea. Santo Domingo is the capital, largest city and principal port. Territorial seas (8 n miles) are claimed. A 200 n mile EEZ has been claimed but the limits have not been defined by boundary agreements.

Headquarters Appointments

Chief of Naval Staff:
 Vice Admiral Julio C Ventura Bayonet

Personnel

- (a) 2009: 3,800 officers and men (including naval infantry)
 (b) Selective military service

Bases

27 de Febrero, Santo Domingo. HQ of CNS, Naval School
 Supply base
 Las Calderas, Las Calderas, Bani: Naval dockyard, 700 ton
 synchrolift Training centre. Supply base
 Haina. Dockyard facility. Supply base.
 Puerto Plata. Small naval base.

Organisation

There are three naval zones:
 North: Haitian border east to the Mona passage.

South: Mona passage west to the Haitian border.

Santo Domingo: Naval establishments in the capital and its environs

DELETIONS

Notes: *Melia* still flies an ensign as a museum ship.

Auxiliaries

2006 *Capitán Boatguit*

PATROL FORCES**2 BALSAM CLASS (PBO/WMEC)**

Name	No	Builders	Commissioned
ALMIRANTE JUAN ALEXANDRO ACOSTA (ex-Citrus)	PA 302 (ex-C 456, ex-WMEC 300)	Marine Iron, Duluth	30 May 1943

Complement: 6
Guns: 1—7.62 mm MG (fitted for).

Comment: Damen Stan Patrol 1505 design craft constructed in the Dominican Republic. Aluminium construction. Employed as patrol craft on counter-drugs and illegal immigration duties.

VEGA 6/2006, Damen Shipyards / 1164479

4 INTERCEPTOR CRAFT (PBF)

POLLUX LR 155 CASTOR LR 156 SHAULA LR 157 ATRIA LR 158

Displacement, tons: To be announced
Dimensions, feet (metres): 44.0 x 9.0 x 3.0 (13.4 x 2.75 x 0.9)
Main machinery: 3 Yanmar DE 315 diesels, 945 hp (704 kW); Bravo X drives
Speed, knots: 60
Range, n miles: 600 at 25 kt
Complement: 6

Comment: Manufactured by Nor-Tech, Fort Myers, Florida. Composite and glass fibre V-bottomed hull. The first two donated by the US Southern Command on 13 July 2007 and the second two on 6 September 2007. Employed on counter drugs, arms trafficking and illegal immigration duties.

INTERCEPTOR CRAFT 6/2007, US Southern Command / 1167968

LAND-BASED MARITIME AIRCRAFT

Numbers/Type: 2 Bell OH-58 Kiowa.
Operational speed: 102 kt (188 km/h)
Service ceiling: 14,000 ft (4,267 m)
Range: 260 n miles (481 km)

Role/Weapon systems: Light observation helicopters. The first was acquired in November 2003 and two further were received from the US in 2006. Two remain in service. Fitted for 7.62 mm MG

OH-58 (Australian colours) 6/1996, Rockwell Australia / 1164548

AUXILIARIES

Notes: (1) There are also two dredgers manned by the Navy. Puerto Plata BD 11, San Pedro BD 12.
 (2) There are eight auxiliary craft. Nizao LA 1, Soco LA 2, Chavon LA 3, Yuma LA 4, Cayo Arena LA 5, Rio Ozama LA 7, Beata LA 8, Cayo Levantado LA 9.

DREDGER 10/1996, A Sheldon-Duplax / 0056902

1 FLOATING DOCK (YFD)

ENDEAVOR DF 1 (ex-AFDL 1)

Comment: Lift, 1,000 tons. Commissioned in 1943. Transferred from US on loan 8 March 1986 and approved for transfer 10 June 1997. DF 2 (ex-AFDM 2), previously reported, was not acquired.

1 LCU 1600 CLASS (UTILITY LANDING CRAFT) (LCU)

NEYBA (ex-Commando) LD 31 (ex-LDM 4, ex-LCU 1675)

Displacement, tons: 200 light; 375 full load
Dimensions, feet (metres): 134.9 x 29 x 6.1 (41.1 x 8.8 x 1.9)
Main machinery: 4 Detroit 6-71 diesels; 696 hp (519 kW) sustained; 2 shafts; Kort nozzles
 2 Detroit 12V-71 diesels (LCU 1680-1681); 680 hp (508 kW) sustained; 2 shafts; Kort nozzles
Speed, knots: 11
Range, n miles: 1,200 at 8 kt
Complement: 14 (2 officers)
Military lift: 134 tons or 400 troops
Guns: 2 12.7 mm MGs.
Radars. Navigation: Furuno; I-band.

Comment: Steel hulled construction. Built by General Ship and Engineering Works in 1978. Formerly operated by the US Army and transferred in 2004.

LCU 1600 CLASS (US colours) 8/2004, Hachiro Nakai / 1043687

1 SOTOYOMO CLASS (ATA)

Name	No	Builders	Commissioned
ENRIQUILLO	RM 3 (ex-RM 22)	Levington SB Co, Orange TX	26 Feb 1945

Displacement, tons: 534 standard, 860 full load
Dimensions, feet (metres): 143 x 33.9 x 13 (43.6 x 10.3 x 4.0)
Main machinery: Diesel-electric; 2 GM 12-278A diesels; 2,200 hp (1.64 MW); 2 generators, 1 motor; 1,500 hp (1.12 MW); 1 shaft
Speed, knots: 13
Range, n miles: 8,000 at 10 kt
Complement: 45
Radars. Surface search: Raytheon SPS-5D; G/H-band

Comment: Leased from the US on 30 October 1980 and transferred on 10 June 1997. Reported decommissioned in 2005 but returned to service in 2007. Employed as afloat support ship.

ENRIQUILLO (old number) 8/2002, A Sheldon-Duplax / 0534084

TUGS

4 COASTAL/HARBOUR TUGS (YTM/YTL)

GUAROCUYA RM 1	GUAROA RM 3
GUARIONEX RM 2	MAGUA RM 4

Displacement, tons: 265 full load
Dimensions, feet (metres): 85.6 x 28.0 x 13.3 (26.1 x 7.9 x 4.05)
Main machinery: 2 Caterpillar 3512B diesels; 3,500 hp (2.6 MW); 2 shafts
Speed, knots: 12.7
Complement: 6

Comment: Details given are for RM 1 and RM 2, Damen Stantug 2608, built at Astilleros Navales de la Bahía de las Calderas and commissioned in April 2004 and June 2005 respectively. The details of RM 3 and RM 4 are not known.

East Timor

Country Overview

The Democratic Republic of Timor-Leste (also known as East Timor) has an area of 7,400 square miles and lies in the eastern part of Timor Island, the largest and easternmost of the Lesser Sunda Islands in the Malay Archipelago. Originally settled in the early 16th century, the Portuguese and Dutch competed for influence until boundaries became established. Dutch Timor, in the west, later became part of the Republic of Indonesia in 1960. Portuguese Timor, comprising the region of Dili, in the east, and the small area of Oecussi in the north-west, was annexed by Indonesia in 1975. Following an armed conflict and two and a half years of UN administration

(UNTAET), East Timor gained independence on 20 May 2002 and became a UN member on 27 September 2002. There has been a succession of further UN missions. UNMISSET was withdrawn on 20 May 2005 and was succeeded by a political mission, UNOTIL. Following internal security problems, an expanded mission, UNMIT, was established on 25 August 2006. This includes police personnel and military advisers. The capital, principal city and port is Dili. Maritime claims are not known.

The role of the Naval Component of The East Timor Defence Force is to conduct Fishery Protection duties in the East Timorese EEZ and to safeguard the only direct access to the enclave of Oecussi which is by sea.

Headquarters Appointments

Commander in Chief Defence Forces: Brigadier General Taur Matan Ruak

Personnel

2009: 150 (under training)

Bases

Hera Harbour

PATROL FORCES

Ecuador

ARMADA DEL ECUADOR

Country Overview

The Republic of Ecuador is situated in northwestern South America. With an area of 105,037 square miles it straddles the equator and has borders to the north with Colombia and to the south with Peru. It has a coastline of 1,210 n miles with the Pacific Ocean. The country also includes the Galápagos Islands about 520 n miles west of the mainland. The capital is Quito while Guayaquil is the principal port and commercial centre. Ecuador has not claimed an EEZ but is one of a few coastal states which claims a 200 n mile territorial sea.

Headquarters Appointments

Commander-in-Chief of the Navy:
Rear Admiral Livio Espinoza
Chief of Naval Staff:
Rear Admiral Aland Molestina
Chief of Naval Operations:
Rear Admiral Milton Lalama

Headquarters Appointments—continued

Flag Officer Fleet:
Captain Oswaldo Zambrano

Diplomatic Representation

Naval Attaché in Rome:
Captain Renan Ruiz
Naval Attaché in London and Paris:
Captain Carlos Rivera
Naval Attaché in Washington:
Captain Javier Ricaurte
Naval Attaché in Santiago:
Captain Manolo Alava
Naval Attaché in Bogota:
Captain Francisco Recaurte
Naval Attaché in Caracas:
Captain Miguel Quelal
Naval Attaché in Lima:
Captain Alejandro Vela
Naval Attaché in Brasilia:
Captain Ronald Munoz

Personnel

- (a) 2009: 7,283 (including naval aviation, marines and Coast Guard)
(b) 1 year's selective national service

Organisation

1st Naval Zone: HQ at Guayaquil Provinces of El Oro, Guayas and Manabi.
2nd Naval Zone: HQ at San Cristobal, Provinces of Galapagos Islands.
3rd Naval Zone: HQ at Esmeraldas Provinces of Esmeraldas and Amazonas

Prefix to Ships' Names

BAE (Buque de Armada de Ecuador)

Bases

Guayaquil (Fleet HQ and main naval base), Jaramijo, San Cristobal, Esmeraldas

Guayaquil (rotary wing) and Manta (fixed wing) air bases.

Establishments

The Naval Academy and Merchant Navy Academy in Salinas; Naval War College in Guayaquil.

Naval Infantry

There are four battalions each comprising amphibious warfare, coastal defence, local security and special forces elements. They are based at: Guayaquil (HQ), Esmeraldas (1st Battalion), Jaramijo (2nd Battalion), San Eduardo (3rd Battalion) and Jambeli (4th Battalion).

Coast Guard

Small force formed in 1980. Hull markings include diagonal thick and thin red stripes on the hull.

SUBMARINES

2 SHYRI (TYPE 209/1300) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
SHYRI	S 101 (ex-S 11)	Howaldtswerke, Kiel	5 Aug 1974	5 Oct 1976	5 Nov 1977
HUANCAVILCA	S 102 (ex-S 12)	Howaldtswerke, Kiel	2 Jan 1975	15 Mar 1977	16 Mar 1978

Displacement, tons: 1,285 surfaced; 1,390 dived
Dimensions, feet (metres): 195.1 × 20.5 × 17.9 (59.5 × 6.3 × 5.4)

Main machinery: Diesel-electric; 4 MTU 12V 493 AZ80 GA31L diesels; 2,400 hp(m) (1.76 MW) sustained; 4 Siemens alternators; 1.7 MW; 1 Siemens motor; 4,600 hp(m) (3.38 MW) sustained; 1 shaft

Speed, knots: 10 surfaced/snorting; 20 dived
Complement: 45 (10 officers)

Torpedoes. 8–21 in (533 mm) bow tubes. Whitehead A 184 Mod 3; dual purpose; wire-guided; active/passive homing to 25 km (13.7 n miles) at 24 kt; 17 km (9.2 n miles) at 38 kt, warhead 250 kg. AEG SST 4; anti-surface; wire-guided; active/passive homing to 12.7 km (6.8 n miles) at 33 kt; 28 km (15.0 n miles) at 23 kt; warhead 260 kg. Total of 14 weapons.

Countermasures: ESM Thomson-CSF DR 2000U; intercept

Weapons control: Signaal M8 Mod 24.

Radars: Surface search: Furuno 1832, I-band.

Sonars: Atlas Elektronik CSU 3; hull-mounted; active/passive search and attack; medium frequency. Thomson Sintra DUUX 2; passive ranging

Programmes. Ordered in March 1974.

Modernisation: *Shyri* underwent major refit in West Germany in 1983; *Huancavilca* in 1984. Second refits by Astinave, Ecuador; *Shyri* in 1994 and *Huancavilca* in 1996. Batteries were changed in both boats 2006–07, the contract for modernisation of both submarines was signed with ASMAR, Talcahuano, on 10 January 2008. DCNS subsequently sub-contracted to modernise the combat systems and technical assistance. The upgrade is to include replacement of the combat system with SUBTICS, replacement of the sonar system with Thales S-Cube multimission suite (including passive bow cylindrical array, passive flank array), Velox M8 intercept array, and a self-noise monitoring system), replacement of the batteries and improvements to the periscopes, machinery control and navigation systems. Work on *Shyri* began on 5 September 2008 and is to be completed in 2010. *Huancavilca* is to be refitted 2010–12. The refits are to extend service lives until about 2030.

Operational: Based at Guayaquil

MORAN VALVERDE (ex- <i>Almirante Lynch</i>)	FM 02(ex-07)	Yarrow & Co, Scotstoun	5 Dec 1971	6 Dec 1972	25 May 1974

Displacement, tons: 2,500 standard, 3,200 full load
Dimensions, feet (metres): 372 oa; 360 wl × 43 × 18 (screws)
 (113.4; 109.7 × 13.1 × 5.5)

Main machinery: 2 Babcock & Wilcox boilers, 550 psi
 (38.7 kg/cm²); 850°F (450°C); 2 White/English Electric
 turbines; 30,000 hp (22.4 MW); 2 shafts

Speed, knots: 27
Range, n miles: 4,500 at 12 kt
Complement: 248 (20 officers)

Missiles: SSM: 2 Aerospatiale MM 38 Exocet; inertial cruise;
 active radar homing to 42 km (23 n miles) at 0.9 Mach;
 warhead 165 kg

SAM 3 twin Matra Simbad launchers for Mistral (may
 be fitted), IR homing to 4 km (2.2 n miles); warhead
 3 kg

Guns: 2 Vickers 4.5 in (115 mm)/45 Mk 6 (twin) semi-
 automatic; 20 rds/min to 19 km (10 n miles) anti-
 surface; 6 km (3.2 n miles) anti-aircraft; weight of shell
 25 kg

4 Oerlikon 20 mm Mk 9 (2 twin); 800 rds/min to 2 km
Torpedoes: 6–324 mm Mk 32 (2 triple) tubes; Whitehead
 A 244, anti-submarine; pattern running to 7 km (3.8 n
 miles) at 33 kt; warhead 34 kg.

Countermeasures: Decoys 2 Corvus 8-barrelled trainable
 chaff rocket launchers; distraction or centroid
 patterns to 1 km. Wa/lop Barricade double layer chaff
 launchers.

ESM/ECM Elta EW system; intercept and jammer.

Combat data systems: Sisdef Imagan SP 100 includes
 datalink, Link 11 receive.

Weapons control: Maiten-1/CH for gunnery

Radars: Air search Marconi Type 965/966; A-band
 Surface search: Marconi Type 992 Q; E/F-band.

Navigation: Liton Type 1008; I-band

Fire control: Selenia; I-band (for guns).

Sonars: Graseby Type 184 M/P; hull-mounted, active search
 and attack; medium frequency (6/9 kHz)

Helicopters: 1 Bell 230.

Programmes: Following service in the Chilean Navy, both
 ships were decommissioned in 2007 and subsequently
 acquired by the Ecuador Navy. Following overhaul and
 modification in Chilean yards, they were transferred
 on 18 April 2008 (FM 01) and 15 October 2008 (FM 02)
 They replaced two ex-British Leanders (*Penslope* and
Danae) originally built in the 1960s and acquired in 1991.

The acquisition of a third ship (ex-*Ministro Zenteno*
 (ex-*Achilles*)) is also under consideration.

Modernisation: While in Chilean service, *Lynch* (1989)
 and *Condell* (1993) were both modernised by ASMAR,
 Talcahuano. Upgrades included enlargement of the
 hangar and flight deck, the fitting of the Indal Assist
 helicopter recovery system, mounting of two twin
 MM 40 Exocet launchers on each side of the hangar
 and moving the torpedo tubes down one deck. Other
 modifications included a new combat data system,
 improvements to the fire-control radars and the
 installation of Israeli EW systems. *Lynch* was further
 modernised in 2002. Upgrades included complete
 overhaul of propulsion and machinery systems. Phalanx
 close-in weapon systems have been removed and it
 is assumed that SSM, SAM and torpedoes have been
 transferred from the decommissioned ships.

Countermeasures: ESM: ELISRA NS-9010; intercept

Weapons control: Thomson-CSF Vega system.

Radars: Air/surface search: Thomson-CSF Triton; G-band; range 33 km (18 n miles) for 2 m² target.

Fire control: Thomson-CSF Pollux; IJ-band; range 31 km (17 n miles) for 2 m² target.

Navigation: Furuno 2115; I-band

Modernisation. New engines fitted during refits in 1994-95 at Guayaquil. A further modernisation programme was initiated in 2005. Upgrades are to include replacement of the Oerlikon 35 mm gun with a new Breda 40 mm/70 twin turret and a new combat data system.

Operational: Quito may be laid up.

CUENCA

2/2000 / 0103/32

SURVEY AND RESEARCH SHIPS

1 SURVEY CRAFT (YFS)

Name	No	Builders	Commissioned
RIGEL	LH 94 (ex-LH 92)	Halter Marine	1975

Displacement, tons: 50 full load

Dimensions, feet (metres): 64.5 × 17.1 × 3.6 (19.7 × 5.2 × 1.1)

Main machinery: 2 diesels; 2 shafts

Speed, knots: 10

Complement: 10 (2 officers)

Comment: Used for inshore oceanographic work.

RIGEL (old number)

6/2005, Ecuador Navy / 1151078

1 SURVEY SHIP (YGS)

Name	No	Builders	Commissioned
ORION (ex-Dameter)	BI 91 (ex-HI 91, ex-HI 92)	Ishikawajima, Tokyo	10 Nov 1982

Measurement, tons: 1,105 gross

Dimensions, feet (metres): 210.6 pp × 35.1 × 11.8 (64.2 × 10.7 × 3.6)

Main machinery: Diesel-electric; 3 Caterpillar 3412 diesel generators; 2,380 hp (1.77 MW) sustained; 2 motors; 1,900 hp (1.42 MW); 1 shaft

Speed, knots: 12.6. Range, n miles: 6,000 at 12 kt

Complement: 45 (6 officers) plus 14 civilians

Radars: Surface search/Navigation: Furuno 2837, E/F-band

Navigation: Sperry Marine Bridgmaster; I-band.

Comment: Research vessel for oceanographic, hydrographic and meteorological work. A refit 2007-08 included installation of a flight deck and new engines.

ORION

6/2008*, Ecuador Navy / 1335373

TRAINING SHIPS

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Commissioned
GUAYAS	BE 91 (ex-BE 01)	Ast Celaya, Spain	23 July 1977

Measurement, tons: 234 dwt; 934 gross

Dimensions, feet (metres): 264 × 33.5 × 13.4 (80 × 10.2 × 4.2)

Main machinery: 1 GM 12V-149T diesel; 875 hp (652 kW) sustained; 1 shaft

Speed, knots: 11.3

Complement: 50 plus 80 trainees

Comment: Three masted. Launched 23 September 1976. Has accommodation for 180. Similar to ships in service with Colombia, Mexico and Venezuela. Modernised 2006-07.

GUAYAS

7/2008*, Kazumasa Watanabe / 1335460

AUXILIARIES

Notes: A new dredger, *Francisco de Orellana*, was commissioned in July 2008.

1 YW CLASS (WATER TANKER) (AWT)

Name	No	Builders	Commissioned
ATAHUALPA (ex-YW 131)	TR 63	Leatham D Smith SB Co	17 Sep 1945

Displacement, tons: 460 light; 1,481 full load
 Dimensions, feet (metres): 174 x 32 x 15 (53.1 x 9.8 x 4.6)
 Main machinery: 1 GM 8V-278A diesel; 640 hp (477 kW); 2 shafts
 Speed, knots: 8
 Complement: 25 (5 officers)
 Cargo capacity: 930 tons

Comment: Acquired from the US on 2 May 1963. Purchased on 1 December 1977. Paid off in 1988 but back in service in 1990 to provide water for the Galapagos Islands.

ATAHUALPA 6/2005, Ecuador Navy / 11510/7

1 OIL TANKER (AOTL)

Name	No	Builders	Commissioned
TAURUS	TR 65 (ex-T 68)	Astinave, Guayaquil	1985

Measurement, tons: 1,175 dwt; 1,110 gross
 Dimensions, feet (metres): 174.2 x 36 x 14.4 (53.1 x 11 x 4.4)
 Main machinery: 2 GM diesels; 1,050 hp (783 kW); 1 shaft
 Speed, knots: 11
 Complement: 20

Comment: Acquired for the Navy in 1987.

TAURUS 6/2003, Ecuador Navy / 0568887

1 ARMAMENT STORES CARRIER (AETL)

Name	No	Builders	Commissioned
CALICUCHIMA (ex-Throsk)	TR 62 (ex-A 379)	Cleland SB Co, Wallsend	20 Sep 1977

Displacement, tons: 2,184 full load
 Dimensions, feet (metres): 231.2 x 39 x 15 (70.5 x 11.9 x 4.6)
 Main machinery: 2 General Motors diesels; 2,100 hp (1.56 MW); 1 shaft
 Speed, knots: 11
 Range, n miles: 4,000 at 11 kt
 Complement: 29 (5 officers)
 Cargo capacity: 785 tons
 Radars: Navigation: Decca 926; I-band.

Comment: Acquired from the UK in November 1991. Recommissioned 24 March 1992.

CALICUCHIMA 11/2004, Globke Collection / 1129955

1 WATER CLASS (WATER TANKER) (AWT)

Name	No	Builders	Commissioned
QUISQUIS (ex-Waterside)	TR 64 (ex-Y 20)	Drypool Engineering, Hull	1968

Measurement, tons: 519 gross
 Dimensions, feet (metres): 131.5 x 25.7 x 11.7 (40.1 x 7.7 x 3.5)
 Main machinery: 1 Lister-Blackstone ERS-8-MCR diesel, 660 hp (492 kW); 1 shaft
 Speed, knots: 10
 Range, n miles: 1,585 at 9 kt
 Complement: 20 (4 officers)
 Cargo capacity: 150 tons
 Radars: Navigation: Furuno; I-band.

Comment: Acquired from the UK in November 1991.

QUISQUIS 2/1992, A J Moorey / 0056909

2 ARD 12 CLASS (FLOATING DOCKS) (YFD)

Name	No	Builders	Commissioned
RIO NAPO (ex-ARD 24)	DF 82	USA	1944
CENEPA (ex-ARD 26)		USA	1944

Dimensions, feet (metres): 492 x 81 x 17.7 (150 x 24.7 x 5.4)

Comment: *Napo* bought from the US in 1988. Suitable for docking ships up to 3,200 tons. *Cenepe* is 48 ft longer and was transferred from US service in 2000.

1 SUPPLY SHIP (AKL)

Name	No	Builders	Commissioned
GALAPAGOS (ex-Arca Foz, ex-Riveira)		Astilleros de Huelva, Spain	1982

Measurement, tons: 2,617 grt
 Dimensions, feet (metres): 245 x 47.6 x 15.1 (74.7 x 14.2 x 4.6)
 Main machinery: 1 diesel, 2,100 hp (1.56 MW); 1 cp prop
 Speed, knots: 12
 Complement: To be announced

Comment: Spanish-built refrigerated cargo ship acquired in July 2008. The ship is used to supply the Galapagos Islands.

TUGS

5 HARBOUR TUGS (YTM/YTL)

SANGAY RB 72	ILINIZA RB 75	QUILOTOA RB 78
COTOPAXI RB 73	ALTAR RB 76	

Comment: Mostly built in the 1950s and 1960s.

1 CHEROKEE CLASS (ATF)

Name	No	Builders	Commissioned
CHIMBORAZO (ex-Chowanoc ATF 100)	RA 70 (ex-R 710, ex-R 71, ex-R 105)	Charleston SB & DD Co	21 Feb 1945

Displacement, tons: 1,235 standard; 1,640 full load
 Dimensions, feet (metres): 205 x 38.5 x 17 (62.5 x 11.7 x 5.2)
 Main machinery: Diesel-electric; 4 Caterpillar D 399 diesels; 4 generators; 1 motor; 3,000 hp (2.24 MW); 1 shaft
 Speed, knots: 12
 Range, n miles: 7,000 at 15 kt
 Complement: 67 (5 officers)
 Guns: 1—40 mm. 2—12.7 mm MGs.
 Radars: Navigation: Simrad; I-band

Comment: Launched 20 August 1943 and transferred 1 October 1977.

CHIMBORAZO 6/2001, Maritime Photographic / 0114524

COAST GUARD

Notes: In addition to the vessels listed below, there are up to 40 river patrol launches operated by both the Coast Guard and the Army.

3 ISLA FERNANDINA (VIGILANTE) CLASS (OFFSHORE PATROL CRAFT) (PBO)

Name	No	Builders	Commissioned
ISLA FERNANDINA (ex-6 de Diciembre)	LG 39	Astilleros de Murueta, Spain	Jan 2006
ISLA ESPAÑOLA (ex-11 de Noviembre)	LG 40	Astilleros de Murueta, Spain	Jan 2006
ISLA SAN SALVADOR (ex-11 de Abril)	LG 41	Astilleros de Murueta, Spain	Jan 2006

Displacement, tons: 320
Dimensions, feet (metres): 147.7 × 32.1 × 8.0 (45.0 × 9.8 × 2.5)
Main machinery: 2 MTU 16V 4000 M90; 1 MTU 12V 4000 M80; 3 shafts
Speed, knots: 25
Range, n miles: 3,000 at 12 kt
Complement: 27 (4 officers)
Guns: 1—12.7 mm MG. 2—7.62 mm MGs
Radars: Navigation: I-band.

Comment: Contract for three craft for the coast Guard let to FBM Babcock Marine in partnership with Astilleros de Murueta, Spain, on 4 March 2004. The steel-hulled craft, to be built in Spain, is based on the FBM Marine Protector 45 class. Propulsion arrangements allow for the use of two main engines or a smaller central engine for loiter. A 5 m interception craft is carried on the aft work deck. LG 39 based at Esmeraldas, LG 40 at Manta and LG 41 in the Galapagos Islands.

ISLA ESPAÑOLA 1/2006, Ecuador Coast Guard / 1158715

2 MANTA CLASS (LARGE PATROL CRAFT) (WPBF)

Name	No	Builders	Commissioned
ISLA DE LA PLATA (ex-9 de Octubre, ex-Manta)	LG 37 (ex-LM 25)	Lürssen, Vegesack	11 June 1971
ISLA SANTA CLARA (ex-27 de Octubre, ex-Nuevo Rocafuerte)	LG 38 (ex-LM 27)	Lürssen, Vegesack	23 June 1971

Displacement, tons: 119 standard; 134 full load
Dimensions, feet (metres): 119.4 × 19.1 × 6 (36.4 × 5.8 × 1.8)
Main machinery: 2 MTU 392 TE 94 diesels; 4,370 hp (m) (3.26 MW); 2 shafts
Speed, knots: 30
Range, n miles: 700 at 30 kt; 1,500 at 15 kt
Complement: 19 (3 officers)
Guns: 1—20 mm, 1—12.7 mm MG
Radars: Navigation: I-band.

Structure: Similar design to the Chilean Guacolda class with an extra diesel, 3 kt faster.
Operational: A third of class sank in September 1998 after a collision with a tug. Transferred from the Navy in 2000. Refitted and modernised in 2003–04 at Astinane, Guayaquil.

ISLA DE LA PLATA 6/2001, Ecuador Coast Guard / 0114527

2 ESPADA CLASS (LARGE PATROL CRAFT) (WPB)

Name	No	Builders	Commissioned
ISLA SANTA ROSA (ex-5 de Agosto)	LG 35	Moss Point Marine, Escatawpa	May 1991
ISLA PUNA (ex-27 de Febrero)	LG 36	Moss Point Marine, Escatawpa	Nov 1991

Displacement, tons: 190 standard; 220 full load
Dimensions, feet (metres): 119.4 × 19.0 × 5.9 (36.4 × 5.8 × 1.8)
Main machinery: 2 Detroit 16V-1497I diesels; 2,322 hp (1.73 MW) sustained; 1 Detroit 16V-92TA; 690 hp (514 kW) sustained; 3 shafts
Speed, knots: 18
Range, n miles: 1,500 at 14 kt
Complement: 19 (3 officers)
Guns: 1—20 mm GAM 801, 2—12.7 mm MGs
Radars: Surface search: Furuno Marine; I-band.

Comment: Built under FMS programme. Steel hulls and aluminium superstructure. Accommodation is air conditioned. Carry a 10-man RIB and launching crane on the stern. Both modernised 2007–08.

ISLA SANTA ROSA 6/2002, Ecuador Coast Guard / 0533896

2 SWIFTSIPS CLASS (RIVER PATROL CRAFT) (WPBR)

Name	No	Builders	Commissioned
RIO ESMERALDAS (ex-9 de Octubre)	LG 121 (ex-LG 47, ex-LG 37)	Swiftships, Morgan City	1 Oct 1992
RIO SANTIAGO (ex-27 de Octubre)	LG 122 (ex-LG 48, ex-LG 38)	Swiftships, Morgan City	1 Oct 1992

Displacement, tons: 17 full load
Dimensions, feet (metres): 45.5 × 11.8 × 1.8 (13.9 × 3.6 × 0.6)
Main machinery: 2 Detroit 6V-92TA diesels; 900 hp (671 kW); 2 Hamilton water-jets
Speed, knots: 20
Range, n miles: 600 at 22 kt
Complement: 4 (1 officer)
Guns: 2 M2HB 12.7 mm MGs; 2 M60D 7.62 mm MGs
Radars: Surface search: Raytheon 40; I-band.

Comment: Transferred from US under MAP to the Navy and thence to the Coast Guard. Hard chine modified V hull form. Can carry up to eight troops. Used as command craft for river flotillas.

RIO SANTIAGO 6/2005, Ecuador Coast Guard / 1151076

1 POINT CLASS (COASTAL PATROL CRAFT) (WPB)

Name	No	Builders	Commissioned
ISLA SEYMOUR (ex-24 de Mayo, ex-Point Richmond)	LG 32 (ex-82370)	CG Yard, Curtis Bay	25 Aug 1967

Displacement, tons: 54 standard, 66 full load
Dimensions, feet (metres): 83 × 17.2 × 5.8 (25.3 × 5.2 × 1.8)
Main machinery: 2 Caterpillar 3412 diesels; 1,600 hp (1.19 MW); 2 shafts
Speed, knots: 18
Range, n miles: 1,500 at 8 kt
Complement: 10 (2 officers)
Guns: 2—12.7 mm MGs
Radars: Navigation: Raytheon SPS 64(V)1; I-band.

Comment: Transferred from US Coast Guard on 22 August 1997

ISLA SEYMOUR 6/2001, Ecuador Coast Guard / 0114515

4 PIRAÑA CLASS (RIVER PATROL CRAFT) (WPBR)

LG 131 (ex-LG 51) LG 132 (ex-LG 52) LG 133 (ex-LG 53) LG 134 (ex-LG 54)

Main machinery: 2 outboard motors; 300 hp (224 kW)

Speed, knots: 35

Complement: 6

Guns: 1 Ametralladora MAG 7.62 mm.

Comment: Built by Astinave and commissioned 1994–95.

LG 134 (old number)

6/2001, Ecuador Coast Guard / 0114517

1 PGM-71 CLASS (LARGE PATROL CRAFT) (WPB)

Name	No	Builders	Commissioned
ISLA ISABELA (ex-25 de Julio, ex-Quito)	LG 31 (ex-LGC 31, ex-LC 71)	Peterson, USA	30 Nov 1965

Displacement, tons: 150 standard; 180 full load

Dimensions, feet (metres): 101.5 x 21 x 5 (30.9 x 6.4 x 1.5)

Main machinery: 2 Detroit diesels; 1,500 hp (1.1 MW); 2 shafts

Speed, knots: 15. **Range, n miles:** 1,000 at 12 kt

Complement: 21 (3 officers)

Guns: 1 Oerlikon 20 mm. 2—12.7 mm MGs.

Radars: Surface search: Furuno Marine; I-band

Comment: Transferred from US to the Navy under MAP on 30 November 1965 and then to the Coast Guard in 1980. Paid off into reserve in 1983 and deleted from the order of battle. Refitted with new engines in 1988–89. Second of class deleted in 1997.

ISLA ISABELA

6/2005, Ecuador Coast Guard / 1151075

2 10 DE AGOSTO CLASS (LARGE PATROL CRAFT) (WPB)

Name	No	Builders	Commissioned
ISLA SANTA CRUZ (ex-10 de Agosto)	LG-33 (ex-LGC-33)	Bremen, Germany	1954
ISLA SAN CRISTÓBAL (ex-3 de Noviembre)	LG-34 (ex-LGC-34)	Bremen, Germany	1955

Displacement, tons: 35 standard; 46 full load

Dimensions, feet (metres): 76.75 x 15.7 x 4.8 (23.4 x 4.8 x 1.4)

Main machinery: 2 Detroit diesels

Speed, knots: 10. **Range, n miles:** 450 at 12 kt

Complement: 11 (1 officer)

Radars: Surface search: Raytheon; I-band

Guns: 2 Ametralladora 30

Comment: Transferred from Coopno-Coopin to the coast guard on 12 January 1992 and 4 June 1992. Were to have been replaced by the Vigilante class but remain in service.

ISLA SAN CRISTÓBAL

11/2004, Globke Collection / 1129994

6 RIO PUYANGO CLASS (RIVER PATROL CRAFT) (WPBR)

Name	No	Builders	Commissioned
RIO PUYANGO	LG 111 (ex-LG 41, ex-LGC 40)	Halter Marine, New Orleans	15 June 1986
RIO MATAJE	LG 112 (ex-LG 42, ex-LGC 41)	Halter Marine, New Orleans	15 June 1986
RIO ZARUMILLA	LG 113 (ex-LG 43, ex-LGC 42)	Astinave, Guayaquil	11 Mar 1988
RIO CHONE	LG 114 (ex-LG 44, ex-LGC 43)	Astinave, Guayaquil	11 Mar 1988
RIO DAULE	LG 115 (ex-LG 45, ex-LGC 44)	Astinave, Guayaquil	17 June 1988
RIO BABAHOYO	LG 116 (ex-LG 46, ex-LGC 45)	Astinave, Guayaquil	17 June 1988

Displacement, tons: 17

Dimensions, feet (metres): 44 x 13.5 x 3.5 (13.4 x 4.1 x 1.1)

Main machinery: 2 Detroit 8V-71 diesels; 460 hp (343 kW) sustained; 2 shafts

Speed, knots: 26. **Range, n miles:** 500 at 18 kt

Complement: 5 (1 officer)

Guns: 1—12.7 mm MG. 2—7.62 mm MGs.

Radars: Surface search: Furuno 2400; I-band.

Comment: Two delivered by Halter Marine in June 1986. Four more ordered in February 1987; assembled under licence at Astinave shipyard, Guayaquil. Used mainly for drug interdiction.

RIO BABAHOYO (old number)

6/2002, Ecuador Coast Guard / 0533895

3 NAPO CLASS (PBF)

LG 151 (ex-LG 59) LG 152 (ex-LG 60) LG 153 (ex-LG 61)

Main machinery: 2 inboard motors; 300 hp (224 kW)

Speed, knots: 40

Complement: 6

Guns: 1 Ametralladora MAG 7.62 mm MG

Comment: Built by Astinave, Guayaquil. Entered service in 2002

LG 151 (old number)

6/2003, Ecuador Coast Guard / 0568805

2 RINKER CLASS (PBF)

LG 191 (ex-LG 57) LG 192 (ex-LG 58)

Main machinery: 2 outboard motors, 300 hp (224 kW)

Speed, knots: 40

Complement: 5

Guns: 1 Ametralladora MAG 7.62 mm MG.

Comment: Built in US. Entered service in 2002

RINKER CLASS

6/2003, Ecuador Coast Guard / 0568804

212 Ecuador/Coast guard

2 ALBATROS CLASS (WPBR)

LG 63-64

Main machinery: 1 outboard motor; 115 hp (85 kW)
Speed, knots: 40
Complement: 5
Guns: 1 Ametralladora MAG 7.62 mm MG

Comment: Built in Chile. Entered service in 2004.

ALBATROS CLASS 6/2005, Ecuador Coast Guard / 1151074

8 FAST INTERCEPT CRAFT (WPBF)

Name	No	Builders	Commissioned
RIO VERDE	LG 611	FB Design shipyard, Italy	Jan 2008
RIO BULU BULU	LG 612	FB Design shipyard, Italy	Jan 2008
RIO MACARA	LG 613	FB Design shipyard, Italy	Jan 2008

Displacement, tons: 2,750 light, 3,638 full load
Dimensions, feet (metres): 445 x 45 x 14.8, 24.5 (sonar)
 (135.6 x 13.7 x 4.5; 7.5)
Main machinery: 2 GE LM 2500 gas turbines; 41,000 hp
 (30.59 MW) sustained; 1 shaft; cp prop
 2 auxiliary retractable props; 650 hp (484 kW)
Speed, knots: 29. **Range, n miles:** 4,500 at 20 kt
Complement: 206 (13 officers) including 19 aircrew

Missiles: SSM: 4 McDonnell Douglas Harpoon Block 1B; active radar homing to 92 km (50 n miles) at 0.9 Mach; warhead 227 kg.

SAM: 36 GDC Standard SM-1MR Block VI; command guidance; semi-active radar homing to 38 km (20.5 n miles) at 2 Mach. 1 Mk 13 Mod 4 launcher for both SSM and SAM missiles.

Guns: 1 OTO Melara 3 in (76 mm)/62 Mk 75; 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.6 n miles) anti-aircraft, weight of shell 6 kg

1 General Electric/General Dynamics 20 mm/76 6-barrelled Mk 15 Vulcan Phalanx; 3,000 rds/min combined to 1.5 km. 4-12.7 mm MGs.

Torpedoes: 6-324 mm Mk 32 (2 triple tubes); 24 Alliant Mk 46 Mod 5, anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys: 2 Loral Hycor SRBOC 6-barrelled fixed Mk 36; IR flares and chaff to 4 km (2.2 n miles). T-Mk-6 Fanfare/SLQ-25 Nixie; torpedo decoy.

ESM/ECM: Raytheon SLQ-32; radar warning.

Combat data systems: NTDS with Link Y.

Weapons control: SWG-1 Harpoon LCS. Mk 92 (Mod 4) Mk 13 weapon direction system. 2 Mk 24 optical directors.

Radars: Air search: Raytheon SPS-49(V)4; C/D-band.

Surface search: ISC Cardion SPS-55; I-band.

Fire control: Lockheed STIR (modified SPG-60); I/J-band, range 110 km (60 n miles).

Sperry Mk 92 (Signal WM28); I/J-band.

Navigation Furuno; I-band; JRC; I-band.

Tacan: URN 25. IFF Mk XII AIMS UPX-29.

Sonars: Raytheon SQS-56; hull-mounted, active search and attack; medium frequency.

Helicopters: 2 Kaman SH-2G Seasprite.

Programmes: First one acquired from US on 18 September 1996, second on 28 September 1996, third on 31 March 1998, and fourth on 30 September 1998.

Modernisation: JRC radar fitted on hangar roof.

Operational: First pair arrived in Egypt in mid-1997 after working up, third in late 1998 and fourth in 1999. All reported active, at least one in the Red Sea.

2 KNOX CLASS (FFGH)

Name	No	Builders	Laid down	Launched	Commissioned	Recommissioned
DAMYAT (ex-Jesse L Brown)	961 (ex-FF 1089)	Avondale Shipyard	8 Apr 1971	18 Mar 1972	17 Feb 1973	1 Oct 1994
RASHEED (ex-Mainester)	966 (ex-FF 1097)	Avondale Shipyard	25 Aug 1972	12 May 1973	2 Nov 1974	1 Oct 1994

Displacement, tons: 3,011 standard; 4,260 full load
Dimensions, feet (metres): 439.6 × 46.8 × 15; 24.8 (sonar) (134 × 14.3 × 4.6, 7.8)
Main machinery: 2 Combustion Engineering/Babcock & Wilcox boilers; 1,200 psi (84.4 kg/cm²); 950 F (510° C); 1 turbine, 35,000 hp (26 MW); 1 shaft
Speed, knots: 27
Range, n miles: 4,000 at 22 kt on 1 boiler
Complement: 288 (17 officers)

Missiles: SSM: 8 McDonnell Douglas Harpoon, active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

A/S: Honeywell ASROC Mk 16 octuple launcher with reload system (has 2 cells modified to fire Harpoon) ●; inertial guidance to 1.6–10 km (1–5.4 n miles); payload Mk 46

Guns: 1 FMC 5 in (127 mm)/54 Mk 42 Mod 9 ●; 20–40 rds/min to 24 km (13 n miles) anti-surface, 14 km (7.7 n miles) anti-aircraft; weight of shell 32 kg.

1 General Electric/General Dynamics 20 mm/76 6-barrelled Mk 15 Vulcan Phalanx ●; 3,000 rds/min combined to 1.5 km.

Torpedoes: 4–324 mm Mk 32 (2 twin) fixed tubes ●, 22 Alliant Mk 46 Mod 5; anti-submarine, active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures: Decoys, 2 Loral Hyco SRBOC 6-barrelled fixed Mk 38 ●; IR flares and chaff to 4 km (2.2 n miles) T Mk 6 Fanfare/SLQ-25 Nixie; torpedo decoy, Prairie Masker hull and blade rate noise suppression.

ESM/ECM Electronics: ● intercept and jammer.

Combat data systems: FFISTS mini NTDS with Link Y.

Weapons control: SWG-1A Harpoon LCS Mk 68 GFCS Mk 114 ASW FCS Mk 1 target designation system.

Radars: Air search, Lockheed SPS-40B ●; B-band; range 320 km (175 n miles).

Surface search, Raytheon SPS-10 or Norden SPS-67 ●; G-band.

Navigation: Marconi LN66; I-band.

Fire control: Western Electric SPG-53A/D/F ●; I/J-band

Tacan: SRN 15.

Sonars: EDO/General Electric SQS-26 CX, bow-mounted, active search and attack; medium frequency.

Helicopters: 1 Kaman SH 2G Seasprite ●.

Programmes: Lease agreed from USA in mid-1993 and signed 27 July 1994 when both ships sailed for Egypt. Two others were transferred for spares in 1996. Ships of this class have been transferred to Greece, Taiwan, Turkey and Thailand.

Modernisation: Vulcan Phalanx fitted in the mid-1980s. There are plans to fit quadruple Harpoon launchers

DAMYAT

(Scale 1 : 1,200), Ian Sturton / 0506185

RASHEED

3/2007, Marco Ghigino / 1166535

and possibly to remove the ASROC launcher. EW suite replaced.

Structure: Four torpedo tubes are fixed in the midship superstructure, two to a side, angled out at 45°. A lightweight anchor is fitted on the port side and an

8,000 lb anchor fits in to the aft section of the sonar dome.

Operational: These ships have had boiler problems in Egyptian service. Refits may be undertaken with US assistance if and when funds become available.

Dimensions, feet (metres): 338.5 × 35.4 × 10.2
 (103.2 × 10.8 × 3.1)
Main machinery: 2 Type 12 E 390V diesels; 14,400 hp(m)
 (10.6 MW) sustained; 2 shafts
Speed, knots: 26
Range, n miles: 4,000 at 15 kt
Complement: 195

Missiles: SSM: 4 HY-2 (C-201) (2 twin) ●; active radar or passive IR homing to 80 km (43.2 n miles) at 0.9 Mach, warhead 513 kg.
Guns: 4 China 57 mm/70 (2 twin) ●; 120 rds/min to 12 km (6.5 n miles); weight of shell 6.31 kg.
 12 China 37 mm/63 (6 twin) ●; 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg
A/S mortars: 4 RBU 1200 5-tubed fixed launchers ●; range 1,200 m; warhead 34 kg
Depth charges: 4 projectors.
Mines: Up to 60.
Countemeasures: ESM/ECM: Elettronica SpA Beta or Litton Triton; intercept and jammer.
Radars: Air search: Type 765 ●; A-band
 Surface search: Eye Shield ●; G-band.

NAJIM AL ZAFFER

(Scale 1 : 900), Ian Sturton / 0056914

Surface search/gun direction: Square Tie; I-band.
Fire control: Fog Lamp.

Navigation: Decca RM 1290A; I-band.

Sonars: China Type E5; hull-mounted; active search and attack; high frequency.

Programmes: Ordered from China in 1982. This is a Jianghu I class modified with 57 mm guns vice the standard 100 mm. These were the 17th and 18th hulls of the class.

Modernisation: Combat data system to be fitted together with CSEE Naja optronic fire-control directors. There are also plans, confirmed in October 1994, to remove the after superstructure and guns and build a flight deck for an SH-2G Seasprite helicopter. Although a refit programme is reported to have been proposed by China, there is still no sign yet of work being done.

Structure: The funnel is the rounded version of the Jianghu class.

Operational: Both ships are active.

NAJIM AL ZAFFER

5/2007, Camil Busquets i Vilanova / 1166549

SHIPBORNE AIRCRAFT

Numbers/Type: 10 Kaman SH-2G(E) Seasprite.
Operational speed: 130 kt (241 km/h).
Service ceiling: 22,500 ft (6,860 m).
Range: 367 n miles (679 km).

Role/Weapon systems: Total of 10 upgraded SH-2F aircraft transferred under FMS by September 1998. New engines and avionics. A further avionics upgrade was reportedly under consideration in 2004. Sensors: LN66/HP radar; ALR-66 ESM; ALE-39 ECM; ARN-118 Tacan; Ocean Systems AQS-18A dipping sonar. Possible mine detection optronic sensor. Weapons: 2 x Mk 46 torpedoes or a depth bomb.

SEASPRITE 1/2004, Kaman / 0568188

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: There are also 2/4 Westland Commando Mk 2B/2E helicopters. Some refitted in 1997/98.

Numbers/Type: 9 Aerospatiale SA 342L Gazelle
Operational speed: 142 kt (264 km/h).
Service ceiling: 14,105 ft (4,300 m).
Range: 407 n miles (755 km).

Role/Weapon systems: Air Force helicopter for coastal anti-shiping strike, particularly against FAC and insurgents. Sensors: SFIM sight. Weapons: ASV; 2 x AS-12 wire-guided missiles

Numbers/Type: 6 Grumman E-2C Hawkeye 2000
Operational speed: 323 kt (598 km/h).
Service ceiling: 37,000 ft (11,278 m).
Range: 1,540 n miles (2,852 km).

Role/Weapon systems: Air Force airborne early warning and control tasks; capable of handling up to 30 tracks over water or land. A sixth Hawkeye 2000 aircraft ordered in June 2001. Sensors: APS-138 search/warning radar being replaced by APS-145 from October 2002 as part of major upgrade programme. The first upgraded aircraft delivered in February 2003, second in early 2004, third in August 2004, fourth in May 2005 and fifth in December 2006. A request for an additional two aircraft was made in October 2007. Various ESM/ECM systems. Weapons: Unarmed.

HAWKEYE 2000 3/2003, Northrop Grumman / 0530203

Numbers/Type: 2 Westland Sea King Mk 47.
Operational speed: 112 kt (208 km/h).
Service ceiling: 14,700 ft (4,480 m).
Range: 664 n miles (1,230 km).

Role/Weapon systems: Air Force helicopter for ASW and surface search; secondary role as SAR helicopter. Airframe and engine refurbishment in 1990. Seven more are in reserve and out of service. Sensors: MEL search radar. Weapons: ASW; 4 x Mk 46 or Stingray torpedoes or depth bombs. ASV; Otomat.

Numbers/Type: 2 Beechcraft 1900C.
Operational speed: 267 kt (495 km/h).
Service ceiling: 25,000 ft (7,620 m).
Range: 1,569 n miles (2,907 km).

Role/Weapon systems: Two (of six) Air Force aircraft acquired in 1988 and used for maritime surveillance. Sensors: Litton search radar; Motorola multimode SLAMMR radar; Singer S-3075 ESM; Datalink Y. Weapons: Unarmed.

Displacement, tons: 234 standard; 265 full load
Dimensions, feet (metres): 154.2 x 23 x 8.9 (47 x 7 x 2.7)
Main machinery: 4 MTU MD 16V 538 TB90 diesels; 12,000 hp(m) (8.82 MW) sustained; 4 shafts
Speed, knots: 36
Range, n miles: 570 at 30 kt; 1,600 at 15 kt
Complement: 30 (4 officers)

Missiles: SSM: 4 Aerospatiale MM 38 Exocet (2 twin) launchers, inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.
 1 Bofors 40 mm/70, 330 rds/min to 12 km (6.5 n miles) anti-surface; 4 km (2.2 n miles) anti-aircraft; weight of shell 0.96 kg; fitted with GRP dome (1984) (see *Modernisation*).

Mines: Laying capability.
Countermeasures: Decoys: Wolke chaff launcher. Hot Dog IR launcher.
Combat data systems: PALIS and Link 11.
Weapons control: CSEE Panda optical director. Thomson-CSF Vega PCET system, controlling missiles and guns.
Radars: Air/surface search: Thomson-CSF Triton; G-band; range 33 km (18 n miles) for 2 m² target.
Navigation: SMA 3 RM 20; I-band; range 73 km (40 n miles).
Fire control: Thomson-CSF Castor; VJ-band

Programmes: 601 transferred from Germany in July 2002 and the remainder in March 2003. Weapons and sensors have also been transferred with the possible exception of EW equipment.
Modernisation: Triton search and Castor fire-control radars fitted to the whole class.
Structure: Steel-hulled craft. Similar to *Combatante II* craft.

ECM: To be announced.
Combat data systems: To be announced.
Weapons control: Thales STING optronic director
Radars: Air/surface search: EADS TRS-3D; C-band.
Fire control: Thales STING, I band
Navigation: Thales Scout, I band

Comment: Following responses to an ITT issued in 1999, the Egyptian Navy placed an order in January 2001 for four Fast Attack Craft (Missile). These craft were to have been built by Halter Marine. However, following suspension of the project in 2002 and the subsequent purchase of the shipbuilder by Singapore Technologies, the project was revived in 2004 and a contract for the design of a new craft was then let to VT Halter Marine in late 2005. This was followed on 22 November 2006 by a contract (modified in September 2008) for the construction of three craft. The vessels are to be sold to Egypt under US FMS funding arrangements. Delivery of the first craft is expected in 2012.

AMBASSADOR III (artist's impression) 6/2001, Halter Marine / 0073895

6 RAMADAN CLASS (FAST ATTACK CRAFT—MISSILE) (PGGF)

Name	No	Builders	Launched	Commissioned
RAMADAN	670	Vosper Thornycroft	6 Sep 1979	20 July 1981
KHYBER	672	Vosper Thornycroft	31 Jan 1980	16 Sep 1981
EL KADESSAYA	674	Vosper Thornycroft	19 Feb 1980	6 Apr 1982
EL YARMOUK	676	Vosper Thornycroft	12 June 1980	18 May 1982
BADR	678	Vosper Thornycroft	17 June 1981	17 June 1982
HETTEIN	680	Vosper Thornycroft	25 Nov 1980	28 Oct 1982

Displacement, tons: 307 full load
Dimensions, feet (metres): 170.6 × 25 × 7.5 (52 × 7.6 × 2.3)
Main machinery: 4 MTU 20V 536 TB91 diesels; 15,360 hp(m) (11.29 MW) sustained; 4 shafts
Speed, knots: 40 **Range, n miles:** 1,600 at 18 kt
Complement: 30 (4 officers)

Missiles: SSM: 4 OTO Melara/Matra Otomat Mk 2, active radar homing to 160 km (86.4 n miles) at 0.9 Mach; warhead 210 kg
Guns: 1 OTO Melara 3 in (76 mm) compact; 85 rds/min to 18 km (8.7 n miles); weight of shell 6 kg
 2 Breda 40 mm/70 (twin); 300 rds/min to 12.5 km (6.8 n miles) anti-surface; weight of shell 0.96 kg.
Countermeasures: Decoys: 4 Protean fixed launchers each with 4 magazines containing 36 chaff decoy and IR flare grenades.
ESM: Raca Cutlass, radar intercept
ECM: Raca Cygnus, jammer
Combat data systems: AMS Nautis 3.
Weapons control: Marconi Sapphire System with 2 radar/TV and 2 optical directors.
Radars: Air/surface search: Marconi sS 820; E/F-band; range 73 km (40 n miles).
Navigation: Marconi S 810; I-band
Fire control: 2 Marconi ST 802, I-band

Programmes: The contract was carried out at the Porchester yard of Vosper Thornycroft Ltd with some hulls built at Portsmouth Old Yard, being towed to Porchester for fitting out.
Modernisation: Contracts for the modernisation of these craft was let in 2001 Alenia Marconi Systems upgraded the Otomat missiles to Mk 2, renovated the S 820 and ST 802 radars and replaced the CAAS combat system by NAUTIS 3. Work carried out 2002–2007.
Operational: Portable SAM SA-N-5 sometimes carried.

EL YARMOUK 3/2006, M Declerck / 1161109

12 OSA I (PROJECT 205) CLASS (FAST ATTACK CRAFT—MISSILE) (PTFG)

631	643	651 (ex-306)	— (ex-304)	— (ex-11)	— (ex-14)
633	649 (ex-305)	653 (ex-307)	— (ex-308)	— (ex-12)	— (ex-15)

Displacement, tons: 171 standard; 210 full load
Dimensions, feet (metres): 126.6 × 24.9 × 8.9 (38.6 × 7.6 × 2.7)
Main machinery: 3 MTU diesels; 12,000 hp(m) (8.82 MW); 3 shafts
Speed, knots: 35
Range, n miles: 400 at 34 kt
Complement: 30

Missiles: SSM: 4 SS-N-2A Styx; active radar or IR homing to 46 km (25 n miles) at 0.9 Mach; altitude preset up to 300 m (984.3 ft); warhead 513 kg.
SAM: SA-N-5 Grail; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg.
Guns: 4 USSR 30 mm/65 (2 twin); 500 rds/min to 5 km (2.7 n miles) anti-aircraft; weight of shell 0.54 kg.
 2—12.7 mm MGs.
Countermeasures: ESM: Thomson-CSF DR 875; radar warning
ECM: Raca; jammer.
Radars: Air/surface search: Kelvin Hughes; I-band
Navigation: Raca, Decca 916, band.
Fire control: Drum T II, H/I-band.
IFF: High Pole, Square Head

Programmes: Of the 13 reported to have been delivered to Egypt by the Soviet Navy in 1966–68, three remained in service in 2003. Acquisition of additional craft has been reported from two sources. Five Osa I class, originally acquired by the Yugoslav Navy in the 1960s, were delivered by May 2007. 651 and 653 were reported commissioned on 28 October 2007. Also, four Osa II were transferred from Finland in late 2006. These were originally acquired from the then Soviet Union by Finland in 1974; subsequently converted in 1993 to a minelaying role and decommissioned in 2000.

Modernisation: Refitted with MTU diesels, two machine guns, improved radars and EW equipment.

Operational: Three more 637 and 639 and 641 are laid up. The operational status of 631, 633 and 643 is doubtful. It is unclear whether the ex-Yugoslav and Finnish craft are to have an operational role or to be used as spares.

OSA 643 3/2007, Marco Ghiglino / 1166520

OSA 649 5/2007, Freivogel Collection / 1166529

OSA 653 5/2007, Freivogel Collection / 1166530

4 OCTOBER CLASS (FAST ATTACK CRAFT—MISSILE) (PTFG)

781 783 787 789

Displacement, tons: 82 full load
Dimensions, feet (metres): 84 × 20 × 5 (25.5 × 6.1 × 1.3)
Main machinery: 4 CRM 12 D/SS diesels, 5,000 hp(m) (3.67 MW) sustained; 4 shafts
Speed, knots: 38. **Range, n miles:** 400 at 30 kt
Complement: 20

Missiles: SSM: 2 OTO Melara/Matra Otomat Mk 2; active radar homing to 160 km (86.4 n miles) at 0.9 Mach; warhead 210 kg, can be carried
Guns: 4 BMARC/Oerlikon 30 mm/75 (2 twin); 650 rds/min to 10 km (5.5 n miles) anti-surface; 3 km (1.6 n miles) anti-aircraft; weight of shell 1 kg and 0.36 kg mixed.
Countermeasures: Decoys: 2 Protean fixed launchers each with 4 magazines containing 36 chaff decoy and IR flare grenades.
ESM: Raca, Cutlass; radar warning
Weapons control: Marconi Sapphire radar/TV system.
Radars: Air/surface search: Marconi S 810; range 48 km (25 n miles).
Fire control: Marconi/ST 802, I-band

Programmes: Built in Alexandria 1975–76. Hull of same design as USSR Komar class. Refitted by Vosper Thornycroft, completed 1979–81 791 was washed overboard on return trip, recovered and returned to Portsmouth for refit. Left UK after repairs on 12 August 1982. Probably Link fitted.

Modernisation: Alenia Marconi systems to upgrade Otomat missiles to Mk 2 between 2002–2007

Operational: 791 reported non-operational and 785 is laid up.

OCTOBER 783

2/2004 / 1044173

5 SHERSHEN CLASS (FAST ATTACK CRAFT—GUN) (PTFM)

753 755 757 759 761

Displacement, tons: 145 standard; 170 full load
Dimensions, feet (metres): 113.8 × 22 × 4.9 (34.7 × 6.7 × 1.5)
Main machinery: 3 Type M 503A diesels; 8,025 hp(m) (5.9 MW) sustained; 3 shafts
Speed, knots: 45. **Range, n miles:** 850 at 30 kt
Complement: 23

Missiles: SAM: SA-N-5 Grail (755–761); manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; warhead 1.5 kg

Guns: 4 USSR 30 mm/65 (2 twin); 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg. 2 USSR 122 mm rocket launchers (755–761 in lieu of torpedo tubes); 20 barrels per launcher; range 9 km (5 n miles).

Depth charges: 12.

Countermeasures: ESM: Thomson-CSF DR 875, radar warning.

Radars: Surface search: Pot Drum; H/I-band.

Fire control: Drum Tilt, H/I-band (in some).

IFF: High Pole

Programmes: Five delivered from USSR in 1957 and two more in 1968. One deleted. 753 completed an extensive refit at Ismailia in 1987; 751 in 1988.

Structure: The last four have had their torpedo tubes removed to make way for multiple BM21 rocket launchers and one SA-N-5 Grail, which are not always carried. Some have Drum Tilt radars removed. 753 has also had its torpedo tubes removed but these may be replaced.

Operational: Based at Alexandria, Port Said and Mersa Matru. 751 reported non-operational

SHERSHEN 757

3/2007, Marco Ghiglino / 1166522

4 HEGU CLASS (FAST ATTACK CRAFT—MISSILE) (PTFG)

609 611 613 615

Displacement, tons: 68 standard; 79.2 full load
Dimensions, feet (metres): 88.6 × 20.7 × 4.3 (27 × 6.3 × 1.3)
Main machinery: 4 Type L12V-180 diesels; 4,800 hp(m) (3.53 MW); 4 shafts
Speed, knots: 37.5. **Range, n miles:** 400 at 30 kt
Complement: 17 (2 officers)

Missiles: SSM: 2 SY-1; active radar or passive IR homing to 40 km (22 n miles) at 0.9 Mach; warhead 513 kg

Guns: 2–23 mm (1 twin); locally constructed to fit 25 mm mounting.

Countermeasures: ESM: Litton Triton; radar intercept.

Radars: Surface search/fire control: Square Tie; I-band or Decca; I-band.

IFF: High Pole A.

Programmes: Acquired from China and commissioned in Egypt on 27 October 1984.

The Hegu is the Chinese version of the deleted Komar.

Modernisation: ESM fitted in 1995–96.

Operational: 619 and 617 are reported laid up.

HEGU 609

3/2000, J103/40

HEGU 609 and 611

3/2007, Marco Ghiglino / 1166521

8 HAINAN CLASS (FAST ATTACK CRAFT—PATROL) (PC)AL NOUR 430 AL HADI 433 AL HAKIM 436 AL WAKIL 439
AL QATAR 442 AL GABBAR 445 AL SALAM 448 AL RAFA 451

Displacement, tons: 375 standard; 392 full load
Dimensions, feet (metres): 192.8 × 23.6 × 7.2 (58.8 × 7.2 × 2.2)
Main machinery: 4 PRC/Kolomna Type 9-D-8 diesels; 4,000 hp (2.94 MW) sustained; 4 shafts
Speed, knots: 30.5
Range, n miles: 1,300 at 15 kt
Complement: 69

Guns: 4 China 57 mm/70 (2 twin); 120 rds/min to 12 km (6.5 n miles); weight of shell 6.31 kg. 4–23 mm (2 twin); locally constructed to fit the 25 mm mountings.

Torpedoes: 6–324 mm (2 triple) tubes (in two of the class). Mk 44 or MUSL Stingray.

A/S mortars: 4 RBU 1200 fixed 5-tube launchers; range 1,200 m; warhead 34 kg.

Depth charges: 2 projectors; 2 racks. 18 DCs.

Mines: Rails fitted. 12 mines.

Radars: Surface search: Pot Head or Skin Head; I-band.

Navigation: Decca, I-band

IFF: High Pole.

Sonars: Stag Ear, hull-mounted; active search and attack; high frequency.

Programmes: First pair transferred from China in October 1983, next three in February 1984 (commissioned 21 May 1984) and last three late 1984.

Modernisation: Two fitted with torpedo tubes and with Singer Librescope fire control. No sign of the remainder being similarly equipped. New sonar reported being fitted.

Operational: Based at Alexandria.

AL WAKIL

4/2007, Marco Ghiglino / 1166523

4 SHANGHAI II CLASS (FAST ATTACK CRAFT—GUN) (PB)

793 795 797 799

Displacement, tons: 113 standard; 131 full load
Dimensions, feet (metres): 127.3 × 17.7 × 5.6 (38.8 × 5.4 × 1.7)
Main machinery: 2 Type L12-180 diesels; 2,400 hp(m) (1.76 MW) (forward); 2 Type L12-180 diesels; 1,820 hp(m) (1.34 MW) (aft); 4 shafts
Speed, knots: 30. **Range, n miles:** 700 at 16.5 kt
Complement: 34

Guns: 4 China 37 mm/63 (2 twin); 180 rds/min to 8.5 km (4.6 n miles); weight of shell 1.42 kg.

2–23 mm (1 twin); locally constructed to fit the 25 mm mountings.

Mines: Rails can be fitted for 10 mines.

Countermeasures: ESM: Thomson-CSF; radar warning.

Radars: Surface search, Decca, I-band

IFF: High Pole

Programmes: Transferred from China in 1984.

Operational: Three based at Suez and one (799) at Mersa Matru. 795 refitted in 1998.

SHANGHAI 797

6/1997, J W Currie / 0012295

AMPHIBIOUS FORCES

Notes: (1) Acquisition of LSTs is a high priority.
 (2) Ro-Ro ferries are chartered for amphibious exercises.
 (3) Rigid Raiders with Johnson outboards are also in service.
 (4) Three small hovercraft similar to Slingsby SAH 2200 reported to be in service.

3 POLNOCHNY A (PROJECT 770) CLASS (LSM)

301 303 305

Displacement, tons: 800 full load
 Dimensions, feet (metres): 239.5 x 27.9 x 5.8 (73 x 8.5 x 1.8)
 Main machinery: 2 Kolomna Type 40-D diesels; 4,400 hp(m) (3.2 MW) sustained; 2 shafts
 Speed, knots: 19
 Range, n miles: 1,000 at 18 kt
 Complement: 40
 Military lift: 6 tanks, 350 tons
 Guns: 2 USSR 30 mm/85 (twin); 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.
 2—140 mm rocket launchers; 18 barrels to 9 km (4.9 n miles)
 Radars: Surface search: Decca; I-band.
 Fire control: Drum Tilt, H/I-band.

Comment: Built at Northern Shipyard, Gdansk and transferred from USSR 1973-74. All used for Gulf logistic support in 1990-91. SA-N-5 may be carried. Radar updated. All are active.

POLNOCHNY 303 10/2000, F Sadek / D103/42

5 SEAFOX TYPE (SWIMMER DELIVERY CRAFT) (LDW)

21 23 25 27 28

Displacement, tons: 11.3 full load
 Dimensions, feet (metres): 36.1 x 9.8 x 2.6 (11 x 3 x 0.8)
 Main machinery: 2 GM 6V-92TA diesels; 520 hp (388 kW) sustained; 2 shafts
 Speed, knots: 30
 Range, n miles: 200 at 20 kt
 Complement: 3
 Guns: 2—12.7 mm MGs. 2—7.62 mm MGs.
 Radars: Surface search: LN66; I-band.

Comment: Ordered from Unifite, Washington in 1982. GRP construction painted black. There is a strong underwater team in the Egyptian Navy which is also known to use commercial two-man underwater chariots. Based at Abu Qir. 26 and 28 are not fully operational and others of the class are in various states of repair. RIBs are also in service.

SEAFOX 1999 / 0056917

9 VYDRA CLASS (LCU)

330 332 334 336 338 340 342 344 346

Displacement, tons: 425 standard; 600 full load
 Dimensions, feet (metres): 179.7 x 25.3 x 6.6 (54.8 x 7.7 x 2)
 Main machinery: 2 Type 3-D-12 diesels, 600 hp(m) (440 kW) sustained; 2 shafts
 Speed, knots: 11
 Range, n miles: 2,500 at 10 kt
 Complement: 20
 Military lift: 200 troops, 250 tons.
 Guns: 2 or 4—37 mm/63 (1 or 2 twin) (may be fitted).
 Radars: Navigation: Decca; I-band.

Comment: Built in late 1960s, transferred from USSR 1968-69. For a period after the Israeli war of October 1973 several were fitted with rocket launchers and two 37 or 40 mm guns, some of which have now been removed. All still in service.

VYDRA 332 3/2007, Marco Ghigilino / 1166524

MINE WARFARE FORCES

2 OSPREY CLASS (MINEHUNTERS—COASTAL) (MHC)

Name	No	Builders	Launched	Commissioned
AL SIDDIQ (ex-Cardinal)	521 (ex-MHC 60)	Intermarine, Savannah	9 Mar 1996	18 Oct 1997
AL FAROUK (ex-Raven)	524 (ex-MHC 61)	Intermarine, Savannah	28 Sep 1996	5 Sep 1998

Displacement, tons: 930 full load
 Dimensions, feet (metres): 187.8 x 35.9 x 9.5 (57.2 x 11 x 2.9)
 Main machinery: 2 Isotta Fraschini ID 36 SS 8V AM diesels; 1,600 hp(m) (1.18 MW) sustained; 2 Voith-Schneider props, 3 Isotta Fraschini ID 36 diesel generators; 984 kW
 Speed, knots: 13
 Range, n miles: 1,500 at 10 kt
 Complement: 51 (5 officers)

Guns: 2—12.7 mm MGs
 Countermeasures: MCM Alliant SLQ-48 mine neutralisation system ROV (with 1,070 m cable) Degaussing DGM-4.
 Combat data systems: Unisys SYQ 13 and SYQ 109; integrated combat and machinery control system. USQ-119E(V), UHF Dama, and OTCIXS provide GCCS connectivity.
 Radars: Surface search: Raytheon SPS-64(V)9; I-band.
 Navigation: R41XX; I-band.
 Sonars: Raytheon/Thomson Sintra SQQ-32(V)3; VDS, active minehunting; high frequency.

Programmes: Original design contract for Lerici-class minehunters was awarded in August 1996 to Intermarine USA which built eight of the 12 ships of the class for the US Navy Transferred to Egypt on 7 January 2007 and recommissioned on 28 October 2007.

Structure: Construction is of monocoque GRP throughout hull, with frames eliminated. Main machinery is mounted on GRP cradles and provided with acoustic enclosures. SQQ-32 is deployed from a central well forward. Fitted with Voith cycloidal propellers which eliminate need for forward thrusters during station keeping.

AL SIDDIQ and AL FAROUK 3/2007, Paul Daly / 1167/35

4 YURKA CLASS (MINESWEEPERS—OCEAN) (MSO)

GIZA 530 ASWAN 533 QINA 536 SOHAG 539

Displacement, tons: 540 full load
 Dimensions, feet (metres): 171.9 x 30.8 x 8.5 (52.4 x 9.4 x 2.6)
 Main machinery: 2 Type M 503 diesels; 5,350 hp(m) (3.91 MW) sustained; 2 shafts
 Speed, knots: 17
 Range, n miles: 1,500 at 12 kt
 Complement: 45
 Guns: 4 USSR 30 mm/65 (2 twin); 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.
 Mines: Can ay 10.
 Radars: Navigation: Don; I-band
 Sonars: Stag Ear; hull-mounted; active search; high frequency.

Comment: Steel-hulled minesweepers transferred from the USSR in 1969. Built 1963-69. Egyptian Yurka class do not carry Drum Tilt radar and have a number of ship's-side scuttles. The plan to equip them with VDS sonar has been shelved. At least one operates an ROV

SOHAG 3/2007, Marco Ghigilino / 1166525

2 SWIFTSHIPSTYPE (ROUTE SURVEY VESSELS) (MSI)

Name	No	Builders	Commissioned
SAFAGA	RSV 1 (ex-610)	Swiftships	1 Oct 1994
ABU EL GHOSON	RSV 2 (ex-613)	Swiftships	1 Oct 1994

Displacement, tons: 165 full load
 Dimensions, feet (metres): 90 x 24.8 x 8 (27.4 x 7.6 x 2.4)
 Main machinery: 2 MTU 12V 183TA61 diesels; 928 hp(m) (682 kW); 2 shafts, bow thruster; 60 hp(m) (44 kW)
 Speed, knots: 12
 Range, n miles: 1,500 at 10 kt
 Complement: 16 (2 officers)
 Guns: 1—12.7 mm MG
 Radars, Navigation: Furuno 2020; I-band
 Sonars: EG & G side scan; active; high frequency.

Comment: Route survey vessels ordered from Swiftships in November 1990 and delivered in September 1993. Two more are planned to be built in Egyptian yards in due course. Unisys improved SYQ-12 command system. Provision for both shallow and deep towed bodies. The names have been taken from the obsolete K 8 class.

ABU EL GHOSON 3/2006, M Declerck / 1167106

3 SWIFTSHIPS TYPE (COASTAL MINEHUNTERS) (MHC)

Name	No	Builders	Launched	Commissioned
DAT ASSAWARI	542 (ex-CMH 1)	Swiftships, Morgan City	4 Oct 1993	13 July 1997
NAVARIN	545 (ex-CMH 2)	Swiftships, Morgan City	13 Nov 1993	13 July 1997
BURULLUS	548 (ex-CMH 3)	Swiftships, Morgan City	4 Dec 1993	13 July 1997

Displacement, tons: 203 full load
 Dimensions, feet (metres): 111 x 27 x 8 (33.8 x 8.2 x 2.3)
 Main machinery: 2 MTU 12V 183TE61 diesels, 1,068 hp(m) (785 kW); 2 Schottel steerable props; 1 White Gill thruster; 300 hp (224 kW)
 Speed, knots: 12.4
 Range, n miles: 2,000 at 10 kt
 Complement: 25 (5 officers)
 Guns: 2—12.7 mm MGs
 Radars: Navigation: Sperry; I-band
 Sonars: Thoray/Thomson Sintra TSM 2022; hull-mounted; active minehunting; high frequency.

Comment: MCM vessels with GRP hulls ordered from Swiftships in December 1990 with FMS funding. First one acceptance trials in June 1994 and completion in August. Fitted with a Unisys command data handling system which is an improved version of SYQ-12. GPS and line of sight navigation system. Dynamic positioning. A side scan sonar body and Gaymarine Pluto ROV can be streamed from a deck crane. Portable decompression chamber carried. Two delivered 29 November 1995 and the third in April 1996. All were finally commissioned after delays caused by problems with the minehunting equipment.

DAT ASSAWARI 3/2006, M Declerck / 1167107

3T 43 CLASS (MINESWEEPERS—OCEAN) (MSO)

DAQHLIYA 507	SINAI 513	ASSIYUT 518
--------------	-----------	-------------

Displacement, tons: 580 full load
 Dimensions, feet (metres): 190.2 x 27.6 x 8.9 (58 x 8.4 x 2.7)
 Main machinery: 2 Kolomna Type 9-D-8 diesels; 2,000 hp(m) (1.47 MW) sustained; 2 shafts
 Speed, knots: 15
 Range, n miles: 3,000 at 10 kt
 Complement: 65
 Guns: 4—37 mm/63 (2 twin); 160 rds/min to 9 km (5 n miles); weight of shell 0.7 kg.
 8—12.7 mm (4 twin) MGs
 Mines: Can carry 20.
 Radars: Navigation: Don 2; I-band.
 Sonars: Stag Ear; hull-mounted; active search; high frequency.

Comment: Delivered in the early 1970s from the USSR. Others of the class have been sunk or used as targets or cannibalised for spares. The plan to fit them with VDS sonars and ROVs has been shelved.

DAQHLIYA 3/2000, 0103745

TRAINING SHIPS

Notes. (1) *Al Kousser* P 91 is a 1,000 ton vessel belonging to the Naval Academy. *Intishat* is a 500 ton training ship. Pennant number 180 is a USSR *Sekstan* class used as a cadet training ship. Two YSB training craft acquired from the US in 1989. A 3,300 ton training ship *Aida IV* presented by Japan in 1988 for delivery in March 1992 belongs to the Arab Maritime Transport Academy.
 (2) The campaign to transfer the Black Swan-class sloop *Tariq*, formerly *HMS Whimbrel*, to Liverpool, to become a floating memorial to the Battle of the Atlantic, faltered in 2008 due to a disagreement over price.

1 PRESIDENTIAL YACHT (YAC/AX)

Name	Builders	Commissioned
EL HORRIYA (ex-Mehroussa)	Samuda, Poplar	1865

Displacement, tons: 4,560 full load
 Dimensions, feet (metres): 479 x 42.6 x 17.4 (146 x 13 x 5.3)
 Main machinery: 3 boilers; 3 turbines; 5,500 hp (4.1 MW); 3 shafts
 Speed, knots: 16
 Complement: 160

Comment: Became a museum in 1987 but was reactivated in 1992. Used as a training ship as well as a Presidential Yacht.

EL HORRIYA 3/2007, Marco Ghigliino / 1166526

1 Z CLASS (AXT)

Name	No	Builders	Laid down	Launched	Commissioned
EL FATEH (ex-Zenith, ex-Wessex)	921	Wm Denny & Bros, Dumbarton	19 May 1942	5 June 1944	22 Dec 1944

Displacement, tons: 1,730 standard; 2,575 full load
 Dimensions, feet (metres): 362.8 x 35.7 x 16 (110.6 x 10.9 x 4.9)
 Main machinery: 2 Admiralty boilers; 2 Parsons turbines; 40,000 hp (30 MW); 2 shafts
 Speed, knots: 24
 Range, n miles: 2,800 at 20 kt
 Complement: 186
 Radars: Air/surface search: Marconi SNW 10; D-band.
 Navigation: Racal Decca 916; I-band.
 Fire control: Marconi Type 275; F-band.

Programmes: Purchased from the UK in 1955
Operational: Used primarily for harbour training, and the intention is to keep the ship in service. Last seen at sea in 1994. The last survivor of its class, the ship may be preserved as a museum. The ship has been disarmed.

EL FATEH 3/2006, M Declerck / 1167102

AUXILIARIES

Notes: (1) There are also two survey launches *Misaha 1* and *2* with a crew of 14. Both were commissioned in 1991
 (2) A small barge *Amira Rama* was donated to the Navy in 1987 and is used as lighthouse tender
 (3) *Al Hurreya 1*, a 6,000 ton 139 m transport ship, was launched at Alexandria on 27 January 2004 and delivered on 7 April 2005. A second ship *Al Hurreya 2* was launched on 24 June 2006. This is being followed by a larger 10,000 ton 173 m vessel which is expected to be launched in 2009.

AL HURREYA 2 6/2006, F Sadek / 1040/40

7 TOPLIVO 2 CLASS (TANKERS) (AOTL/AWTL)

AYEDA 4 210	MARYUT 218	AL NIL 220	AL FURAT 224
ATABARAH 212	AKDU 214	AYEDA 3 216	

Displacement, tons: 1,029 full load
Dimensions, feet (metres): 176.2 × 31.8 × 10.5 (53.7 × 9.7 × 3.2)
Main machinery: 1 BDR 30/50-5 diesel; 600 hp(m) (441 kW); 1 shaft
Speed, knots: 10
Range, n miles: 400 at 7 kt
Complement: 16
Cargo capacity: 500 tons diesel or water (211–216)
Radars: Navigation: Spin Trough; I-band

Comment: Built in Alexandria in 1972–77 to a USSR design. Another of the class 217 is laid up.

AYEDA 4 3/2006, M Declercq / 1167105

1 LÜNEBURG CLASS (TYPE 701) (SUPPORT SHIP) (ARL)

Name	No	Builders	Commissioned
SHALADEIN (ex-Glücksburg)	230 (ex-A 1414)	Bremer Vulkan/ Flensburger Schiffbau	8 July 1968

Displacement, tons: 3,709 full load
Dimensions, feet (metres): 374.9 × 43.3 × 13.8 (114.3 × 13.2 × 4.2)
Main machinery: 2 MTU MD 16V 538 TB90 diesels; 6,000 hp(m) (4.1 MW) sustained;
 2 shafts; cp props, bow thruster
Speed, knots: 17
Range, n miles: 3,200 at 14 kt
Complement: 71 (9 officers)
Cargo capacity: 1,100 tons
Guns: 4 Bofors 40 mm/70 (2 twin).
Countermeasures: Decoys: 2 Breda 105 mm SCLAR chaff launchers.

Comment: Transferred from Germany in early 2003 to act as support ship, including missile maintenance, of Type 148 patrol craft

SHALADEIN 4/2003, Frank Findler / 0562/46

1 WESTERWALD CLASS (TYPE 760)
(AMMUNITION TRANSPORT) (AEL)

Name	No	Builders	Commissioned
HALAIB (ex-Odenwald)	231 (ex-A 1436)	Orenstein and Koppel, Lübeck	23 Mar 1967

Displacement, tons: 3,460 standard; 4,042 full load
Dimensions, feet (metres): 344.4 × 46 × 15.1 (105 × 14 × 4.6)
Main machinery: 2 MTU MD 16V 538 TB90 diesels, 6,000 hp(m) (4.1 MW) sustained;
 2 shafts; cp props, bow thruster
Speed, knots: 17. **Range, n miles:** 3,500 at 17 kt
Complement: 31
Cargo capacity: 1,080 tons ammunition
Guns: 2 Bofors 40 mm.
Radars: Navigation: Kelvin Hughes; I-band

Comment: Transferred from Germany in early 2003

HALAIB 4/2003, Frank Findler / 0567/45

2 POLUCHAT 1 CLASS (YPT)

936	937
-----	-----

Displacement, tons: 100 full load
Dimensions, feet (metres): 97.1 × 19 × 4.8 (29.6 × 5.8 × 1.5)
Main machinery: 2 Type M 50 diesels; 2,200 hp(m) (1.6 MW) sustained; 2 shafts
Speed, knots: 20. **Range, n miles:** 1,500 at 10 kt
Complement: 15
Radars: Surface search: Spin Trough; I-band

Comment: Used as Torpedo Recovery Vessels. Unarmed

POLUCHAT 3/2000 / 0103779

2 NYRYAT I (PROJECT 522) CLASS (DIVING TENDERS) (YDT)

P 001	P 002
-------	-------

Displacement, tons: 116 full load
Dimensions, feet (metres): 93.8 × 17.1 × 5.6 (28.6 × 5.2 × 1.7)
Main machinery: 1 diesel; 450 hp(m) (331 kW) sustained; 1 shaft
Speed, knots: 12.5
Range, n miles: 1,500 at 10 kt
Complement: 15
Radars: Surface search: Spin Trough; I-band.

Comment: Transferred in 1964.

TUGS

Notes: (1) There are also four Coast Guard harbour tugs built by Damen in 1982. Names *Khoulou*, *Khalra*, *Ramses* and *Kreir*. Two other harbour tugs were delivered in 1998. Names *Ajmi* and *Jihad*.
 (2) Two former oilfield supply vessels 113 and 115 are probably employed as tugs. They are also fitted with firefighting equipment.
 (3) A large Chinese built tug *El Alamein* is reported to be in service.

115 3/2007, Marco Ghigino / 1166572

5 OKHTENSKY CLASS (ATA)

AL MAKS 103 AL ANTAR 107 AL ISKANDARANI 111
AL AGAMI 105 AL DEKHEILA 109

Displacement, tons: 930 full load
Dimensions, feet (metres): 156.1 × 34 × 13.4 (47.6 × 10.4 × 4.1)
Main machinery: Diesel-electric, 2 BM diesel generators; 1 motor; 1,500 hp(m) (1.1 MW); 1 shaft
Speed, knots: 13
Range, n miles: 6,000 at 13 kt
Complement: 38

Comment: Two transferred from USSR in 1966, others assembled at Alexandria. Replacements are needed.

AL AGAMI 3/2007, Marco Ghigino / 1186528

COAST GUARD

Notes: (1) The Coast Guard is controlled by the Navy.
(2) There are four obsolete P 6 craft, pennant numbers 222, 246, 253 and 201
(3) There is also a minimum of four ex-USN Bollinger type harbour security craft of 3.9 tons capable of 22 kt. Twin diesel engines. Carry a 7.62 mm MG.
(4) There is an unknown number of RIBs for inshore patrols.
(5) A fast patrol craft, donated by Italy in 2007, is operated by the Ports Police for counter-smuggling and illegal immigration operations.

3 TYPE 83 CLASS (LARGE PATROL CRAFT) (WPB)

46 47 54

Displacement, tons: 85 full load
Dimensions, feet (metres): 83.7 × 21.3 × 5.6 (25.5 × 6.5 × 1.7)
Main machinery: 2 diesels; 2 shafts
Speed, knots: 24
Complement: 12
Guns: 4—23 mm (2 twin); 1 Oerlikon 20 mm.
Radars: Surface search; Furuno; I-band.

Comment: Two of this class commissioned 13 July 1997. Built locally, these craft are similar to the Swiftships 93 ft class. Three are operational.

TYPE 83 CLASS 10/1995, 0056923

6 CRESTITALIA MV 70 CLASS (COASTAL PATROL CRAFT) (WPBF)

Displacement, tons: 36 full load
Dimensions, feet (metres): 68.9 × 17.4 × 3 (21 × 5.3 × 0.9)
Main machinery: 2 MTU 12V 331TC92 diesels, 2,660 hp(m) (1.96 MW) sustained; 2 shafts
Speed, knots: 35
Range, n miles: 500 at 32 kt
Complement: 10 (1 officer)
Guns: 2 Oerlikon 30 mm A32 (twin); 1 Oerlikon 20 mm.
Radars: Surface search; Racal Decca; I-band.

Comment: Ordered 1980-GRP hulls. Naval manned but still employed on Coast Guard duties.

CRESTITALIA 70 R 1980, Crestitalia, 0505986

21 TIMSAH CLASS (LARGE PATROL CRAFT) (WPB)

01-02 04-22

Displacement, tons: 106 full load
Dimensions, feet (metres): 101.8 × 17 × 4.8 (30.5 × 5.2 × 1.5)
Main machinery: 2 MTU 8V 331TC92 diesels; 1,770 hp (1.3 MW) sustained; 2 shafts (01-06); 2 MTU 12V 331TC92 diesels; 2,660 hp(m) (1.96 MW) sustained; 2 shafts (07-19)
Speed, knots: 25
Range, n miles: 600 at 18 kt
Complement: 13
Guns: 2 Oerlikon 30 mm (twin) or 2 14.5 mm MGs.
Radars: Surface search; Racal Decca; I-band.

Comment: First three Timsah I completed December 1981, second three Timsah I December 1982 at Timsah SY, Ismailia. These all have funnels but there appear to be minor structural differences. 03 sunk in late 1993. Further six Timsah II ordered in January 1985 and completed in 1988-89 with a different type of engine and with waterline exhaust vice a funnel. Last of this batch in service in 1992, followed by ten more by 1999.

TIMSAH 17 4/2002, A Shamsa, 0528333

TIMSAH 16 7/2006, Marco Ghigino, 1164998

TIMSAH 19 4/2005, Queun/Marsan, 1151174

9 SWIFTSIPS 93 ft CLASS (LARGE PATROL CRAFT) (WPB)

35-43

Displacement, tons: 102 full load
Dimensions, feet (metres): 93.2 × 18.7 × 4.9 (28.4 × 5.7 × 1.5)
Main machinery: 2 MTU 12V 331TC92 diesels, 2,660 hp(m) (1.96 MW) sustained; 2 shafts
Speed, knots: 27
Range, n miles: 900 at 12 kt
Complement: 14 (2 officers)
Guns: 4—23 mm (2 twin); 1 Oerlikon 20 mm or 2—14.5 mm MG.
Radars: Surface search; Furuno; I-band.

Comment: Ordered November 1983. First three built in US, remainder assembled by Osman Shipyard, Ismailia. First four commissioned 16 April 1985, five more in 1986. Armament upgraded with 23 mm guns fitted forward in some of the class.

SWIFTSIPS 42 3/2006, M Declerck, 1161997

**12 SEA SPECTRE PB MK III CLASS
(COASTAL PATROL CRAFT) (WPB)**

Displacement, tons: 37 full load
Dimensions, feet (metres): 64.9 × 18 × 5.9 (19.8 × 5.5 × 1.8)
Main machinery: 3 GM 8V-71TI diesels; 1,800 hp (1.3 MW); 3 shafts
Speed, knots: 29. **Range, n miles:** 450 at 25 kt
Complement: 9 (1 officer)
Guns: 2–12.7 mm MGs.
Radars: Surface search: Raytheon; I-band.

Comment: PB Mk III type built by Peterson, Sturgeon Bay and delivered in 1980–81. Used for Customs duties.

SPECTRE 1981, Peterson Builders / 0056924

9 PETERSON TYPE (COASTAL PATROL CRAFT) (WPB)

71–79

Displacement, tons: 18 full load
Dimensions, feet (metres): 45.6 × 13 × 3 (13.9 × 4 × 0.9)
Main machinery: 2 MTU 8V 183 TE92 diesels; 1,314 hp(m) (966 kW) sustained; Hamilton 352 water-jets
Speed, knots: 34. **Range, n miles:** 200 at 30 kt
Complement: 4
Guns: 2–12.7 mm MGs.
Radars: Surface search: Raytheon; I-band.

Comment: Built by Peterson Shipbuilders, Sturgeon Bay and delivered between June and October 1994 under FMS. Replaced Bertram type and used as pilot boats.

PETERSON 72 (US colours) 6/1994, PBI / 0056925

5 NISR CLASS (LARGE PATROL CRAFT) (WPB)

THAR 701 NUR 703 NISR 713 NIMR 719 AL BAHR

Displacement, tons: 110 full load
Dimensions, feet (metres): 102 × 18 × 4.9 (31 × 5.2 × 1.5)
Main machinery: 2 Maybach diesels; 3,000 hp(m) (2.2 MW); 2 shafts
Speed, knots: 24
Complement: 15
Guns: 2 or 4–23 mm (twin). 1 BM 21 122 mm 8-barrelled rocket launcher
Radars: Surface search: Racal Decca 1230; I-band.

Comment: Built by Castro, Port Said on P6 hulls. First three launched in May 1983. Two more completed 1983. The rocket launcher and after 23 mm guns are interchangeable. 701 and 703 were refitted in 1998. Naval manned but employed on Coast Guard duties.

3 PETERSON TYPE (COASTAL PATROL CRAFT) (WPBF)

80–82

Displacement, tons: 20 full load
Dimensions, feet (metres): 51 × 12 × 3 (15.5 × 3.7 × 0.9)
Main machinery: 2 MTU diesels; 2,266 hp(m) (1.66 MW); Hamilton 391 water-jets
Speed, knots: 45. **Range, n miles:** 320 at 30 kt
Complement: 5
Guns: 2–12.7 mm MGs.
Radars: Surface search: Raytheon; I-band

Comment: Built by Peterson Shipbuilders, Sturgeon Bay and delivered between October and December 1996 under FMS. Aluminium construction. Used mostly as pilot boats.

PETERSON 81 3/2000 / 0103781

29 DC 35 TYPE (YFL)

Displacement, tons: 4 full load
Dimensions, feet (metres): 35.1 × 11.5 × 2.6 (10.7 × 3.5 × 0.8)
Main machinery: 2 Perkins T6-354 diesels; 390 hp (287 kW); 2 shafts
Speed, knots: 25
Complement: 4

Comment: Built by Dawncraft, Wroxham, UK, from 1977. Harbour launches. One destroyed in September 1994. About half are laid up at Port Said.

DC 35 8/1994, F Sadek / 0056927

**6 + (12) SWIFTSHIPS PROTECTOR CLASS
(LARGE PATROL CRAFT) (WPB)**

90 +95

Displacement, tons: 116 full load
Dimensions, feet (metres): 85.0 × 20.0 × 4.9 (26.1 × 6.1 × 1.5)
Main machinery: 2 Caterpillar 3512B diesels, 2 Hamilton HM651 waterjets
Speed, knots: 40
Complement: 12
Radars: Navigation: I-band.

Comment: Contract awarded 24 September 2004 to Swiftships, Morgan City, LA, for the construction of six patrol craft under the US government's Foreign Military Sales programme. The contract includes a training package. With an aluminium hull and superstructure and a high-speed RIB launching well, the craft are designed for SAR, law enforcement, and local patrol operations. Details of weapons and sensors have not been confirmed but up to a 30 mm gun with associated fire-control system may be fitted. A FLIR system may also be installed. Delivery of the first craft was made in June 2006 and completed in February 2007. A further 12 craft may be procured.

PROTECTOR 90 1/2006 / 1041657

El Salvador

FUERZA NAVAL DE EL SALVADOR

Country Overview

The Republic of El Salvador is an independent Central American State whose current constitution was established in 1983. With an area of 8,124 square miles, it has a 166 n mile coastline with the Pacific Ocean and is bounded to the north by Honduras and to the west by Guatemala. The country's capital is San Salvador while Acajutla, La Libertad and La Unión are the principal ports. El Salvador has not claimed an Exclusive Economic Zone (EEZ) but is one of a few coastal states which claims a 200 n mile territorial sea.

Senior Officer

Commander of the Navy
 Captain Walter Ricardo Rivero Alemán

Personnel

(a) 2009: 1,077 (including 160 naval infantry)
 (b) Voluntary service

Bases

Acajutla, La Libertad, El Trunfo y La Unión

Air Bases

El Tamarindo Air Station is reported to have been improved to enable the Third Air Brigade to provide air support to naval patrols. The US may donate fixed-wing aircraft and helicopters to assist in this task.

PATROL FORCES

Notes: (1) There are two high-speed RHIBs donated by Taiwan and US.
 (2) Three Boston Whaler craft were acquired in February 2007
 (3) There are plans to replace the Camcraft with similar vessels.

3 CAMCRAFT TYPE (COASTAL PATROL CRAFT) (PB)

PM 6 (ex-CG 6) PM 7 (ex-CG 7) PM 8 (ex-CG 8)

Displacement, tons: 100 full load
 Dimensions, feet (metres): 100 x 21 x 4.9 (30.5 x 6.4 x 1.5)
 Main machinery: 3 Detroit 12V-71TA diesels; 1,260 hp (939 kW) sustained; 3 shafts
 Speed, knots: 25. Range, n miles: 780 at 24 kt
 Complement: 10
 Guns: 1—20 mm Oerlikon or 1—12.7 mm MG. 2—7.62 mm MGs. 1—81 mm mortar.
 Radars: Surface search: Furuno; I-band

Comment: Aluminium hulled. Delivered 24 October, 8 November and 3 December 1975. Refitted in 1986 at Lantana Boatyard. Sometimes carry a combined 12.7 mm MG/81 mm mortar mounting in the stern. New radars fitted in 1995.

PM 7 10/2003, Julio Montes / 1166/74

1 POINT CLASS (PB)

No	Builders	Commissioned
PM 12 (ex-GC 12, ex-82358)	J Martinac, Tacoma	17 Mar 1967

Displacement, tons: 67 full load
 Dimensions, feet (metres): 83 x 17.2 x 5.8 (25.3 x 5.2 x 1.8)
 Main machinery: 2 Caterpillar diesels; 1,600 hp (1.19 MW); 2 shafts
 Speed, knots: 22. Range, n miles: 1,200 at 8 kt
 Complement: 10
 Guns: 2—12.7 mm MGs.
 Radars: Surface search: Hughes/Furuno SPS-73, I-band.

Comment: Ex-Point Stuart transferred from US Coast Guard on 27 April 2001.

PM 12 11/2001, Julio Montes / 0130481

1 SWIFTSHIPS 77 ft CLASS (COASTAL PATROL CRAFT) (PB)

PM 11 (ex-GC 11)

Displacement, tons: 48 full load
 Dimensions, feet (metres): 77.1 x 20 x 4.9 (23.5 x 6.1 x 1.5)
 Main machinery: 3 Detroit 12V-71TA diesels; 1,260 hp (939 kW) sustained; 3 shafts
 Speed, knots: 28
 Complement: 7
 Guns: 2—12.7 mm MGs. Aft MG combined with 81 mm mortar.
 Radars: Surface search: Furuno; I-band.

Comment: Aluminium hull. Delivered by Swiftships, Morgan City 6 May 1985.

PM 11 10/2003, Julio Montes / 1166/73

1 SWIFTSHIPS 65 ft CLASS (COASTAL PATROL CRAFT) (PB)

PM 10 (ex-GC 10)

Displacement, tons: 36 full load
 Dimensions, feet (metres): 65.6 x 18.3 x 5 (20 x 6 x 1.5)
 Main machinery: 2 Detroit 12V-71TA diesels; 840 hp (626 kW) sustained; 2 shafts
 Speed, knots: 23
 Range, n miles: 600 at 18 kt
 Complement: 6
 Guns: 1 Oerlikon 20 mm. 1 or 2—12.7 mm MGs. 1—81 mm mortar.
 Radars: Surface search. Furuno; I-band

Comment: Aluminium hull. Delivered by Swiftships, Morgan City 14 June 1984. Was laid up for a time in 1989–90 but became operational again in 1991. Refitted in 1996.

PM 10 6/2003, El Salvador Navy / 0568340

4 TYPE 44 CLASS (PBI)

PRM 01–04

Displacement, tons: 18 full load
 Dimensions, feet (metres): 44 x 12.8 x 3.6 (13.5 x 3.9 x 1.1)
 Main machinery: 2 Detroit 6V-38 diesels; 185 hp (136 kW); 2 shafts
 Speed, knots: 14
 Range, n miles: 215 at 10 kt
 Complement: 3

Comment: Ex-USCG craft similar to those transferred to Uruguay.

PRM 04 11/2001, Julio Montes / 0130482

6 PIRANHA CLASS (RIVER PATROL CRAFT) (PBR)

PF 01-06 (ex-LOF 021-026)

Displacement, tons: 8.2 full load
Dimensions, feet (metres): 36 × 10.1 × 1.6 (11 × 3.1 × 0.5)
Main machinery: 2 Caterpillar 3208TA diesels, 680 hp (507 kW) sustained; 2 shafts
Speed, knots: 26
Complement: 5
Guns: 2 – 12.7 mm (twin) MGs. 2 – 7.62 mm (twin) MGs.
Radars: Surface search, Furuno 3600; I-band.

Comment: Riverine craft with Kevlar hulls used by the Naval Infantry. Completed in March 1987 by Lantana Boatyard, Florida. Same type supplied to Honduras. Five craft reported operational.

PF 05 4/2005, Julio Montes / 1166722

9 PROTECTOR CLASS (RIVER PATROL CRAFT) (PBR)

PC 01-09

Displacement, tons: 9 full load
Dimensions, feet (metres): 40.4 × 13.4 × 1.4 (12.3 × 4 × 0.4)
Main machinery: 2 Caterpillar 3208TA diesels, 680 hp (507 kW) sustained; 2 shafts
Speed, knots: 28. Range, n miles: 350 at 20 kt
Complement: 4
Guns: 2 – 12.7 mm MGs. 2 – 7.62 mm MGs.
Radars: Surface search Furuno 3600; I-band.

Comment: Ordered in December 1987 from SeaArk Marine (ex-MonArk). Four delivered in December 1988 and four in February and March 1989. Seven reported operational, one in maintenance and one non-operational.

PC 03 3/2006, Julio Montes / 1166721

8 AIR PATROL BOATS (PBI)

PFR 1-8

Comment: Purchased in Miami for SAR on inland waters.

PFR 04 4/2005, Julio Montes / 1166720

2 MERCOUGAR INTERCEPT CRAFT (PBR)

PA 01 PA 02

Comment: Two remaining of five 40 ft craft delivered by Mercougar in 1988. Powered by two Ford Merlin diesels, 800 hp (448 kW) giving speeds of up to 40 kt and range of 556 km (300 n miles). Radar fitted

PA 02 5/2001, Julio Montes / 0109938

1 BALSAM CLASS (AGP)

Name	No	Builders	Commissioned
MANUEL JOSÉ ARCE (ex-Medrana)	BL 01 (ex-WLB 302)	Zenith Dredge, Duluth, MN	30 May 1943

Displacement, tons: 1,034 full load
Dimensions, feet (metres): 180 × 37 × 12 (54.9 × 11.3 × 3.8)
Main machinery: Diesel electric, 2 diesels; 1,402 hp (1 06 MW); 1 motor; 1,200 hp (895 kW); 1 shaft; bow thruster
Speed, knots: 13 Range, n miles. 8,000 at 12 kt
Complement: 53
Guns: 2 – 12.7 mm MGs.
Radars: Navigation: Raytheon SPS-64(V)1.

Comment: Transferred from the US Coast Guard on 14 June 2002. Used as a mother ship for coastal patrol craft.

ARCE 5/2003, Julio Montes / 1166719

AUXILIARIES

3 LCM 8 CLASS

BD 02 (ex-LD 02) BD 04 (ex-LD 04) BD 05 (ex-LD 05)

Displacement, tons: 45 full load
Dimensions, feet (metres): 64.7 × 14 × 5 (21.5 × 4.6 × 1.6)
Main machinery: 2 Detroit 12V 71TA diesels, 840 hp (626 kW) sustained; 2 shafts
Speed, knots: 15
Complement: 6
Guns: 2 – 12.7 mm MGs. 2 – 7.62 mm MGs.
Radars: Navigation: Furuno; I-band.

Comment: First one delivered by SeaArk Marine in January 1987, second pair in May 1996.

BD 04 6/2003, El Salvador Navy / 0568336

POLICE

Notes: Ten jet-skis are reported to have been delivered in 2002 for SAR

20 RODMAN 890 (PBR)

L-01-01-L-01-20

Displacement, tons: 3.1 full load
Dimensions, feet (metres): 29.2 × 9.8 × 3.6 (8.9 × 3 × 0.8)
Main machinery: 2 Volvo diesels; 300 hp(m) (220 kW); 2 shafts
Speed, knots: 28. Range, n miles. 150 at 25 kt
Complement: 3
Guns: 1 – 7.62 mm MG.
Radars: Surface search; I-band

Comment: Eleven craft delivered by Rodman in 1998. Operational availability is reported to be constrained by lack of spares.

RODMAN L-01-07 6/1998, Rodman / 0576109

Equatorial Guinea

Country Overview

The Republic of Equatorial Guinea became independent in 1968 as a federation of the two former Spanish provinces of Fernando Po and Rio Muni. It became a unitary state in 1973. Located in west Africa, the country has an overall area of 10,831 square miles and includes a mainland section which is bordered to the north by Cameroon and to the east and south by Gabon

It has a 160 n mile coastline with the Gulf of Guinea in which lie the islands of Bioko (formerly Fernando Po), Annobón, Corisco, Elobey Grande and Elobey Chico. The administrative capital on the mainland is Bata while Malabo, on the north coast of Bioko, is capital of the republic, largest city and principal port. Territorial waters (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the boundaries have not been agreed

Personnel

2009: 120 officers and men

Bases

Malabo, Bata.

PATROL FORCES

Notes: (1) The Lantana 68 class *Isia de Bioko* and 20 m patrol craft *Riowele* are believed to be non-operational
(2) Two Shaldag II patrol craft were delivered from Israel in August 2006. They are named *Isia de Corisco* and *Isia de Annobon*.
(3) There is a patrol craft *Estuario de Muni*. Of possible Ukrainian origin, the 75 m craft is armed with a twin 30 m AK 230 gun forward and two twin 14.5 mm aft.

ESTUARIO DE MUNI

6/2008* / 1335440

1 DAPHNE CLASS (PB)

Name	No	Builders	Commissioned
URECA (ex-Nymfen)	P 31 (ex-P 535)	Royal Dockyard, Copenhagen	4 Oct 1963

Displacement, tons: 170 full load
Dimensions, feet (metres): 121 × 20 × 6.5 (36.9 × 6.1 × 2.0)
Main machinery: 3 diesels; 3 shafts
Speed, knots: 20
Complement: 23
Guns: 2—14.5 mm
Radars: Navigation: Furuno; I-band.

Comment: Acquired in 1999.

2 ZHUK (GRIF) CLASS (PROJECT 1400M) (PB)

MIGUEL ELA EDJODJOMO LP 039 HIPOLITO MICHA LP 041

Displacement, tons: 39 full load
Dimensions, feet (metres): 78.7 × 16.4 × 3.9 (24 × 5 × 1.2)
Main machinery: 2 diesels, 2 shafts
Speed, knots: 30. **Range, n miles:** 1,100 at 15 kt
Complement: 13 (1 officer)
Guns: 2—14.5 mm (twin, fwd) MGs. 1—12.7 mm (aft) MG
Radars: Surface search: Furuno; I-band.

Comment: Reported to have been transferred from Ukraine in 2000

2 KALKAN (PROJECT 50030) M CLASS (INSHORE PATROL CRAFT) (PBR)

GASPAR OBIANG ESONO 43 FERNANDO NUARA ENGONDA 54

Displacement, tons: 8.5 full load
Dimensions, feet (metres): 38.1 × 10.8 × 2.0 (11.6 × 3.3 × 0.6)
Main machinery: 1 Type 475K diesel; 496 hp (370 kW); 1 waterjet
Speed, knots: 34
Complement: 2

Comment: Built by Morye Feodosiya and reportedly acquired in 2001

Eritrea

Country Overview

A British protectorate from 1941, The State of Eritrea was federated with Ethiopia in 1952 and incorporated as a province in 1962. The following war of liberation culminated in independence in 1993. The country is situated on the southwest shore of the Red Sea with which it has a 621 n mile coastline with an area of 46,842 square miles, it is bordered to the north by Sudan, to the west by Ethiopia and to the south by Djibouti. The largest town and capital is Asmara and the principal port is Massawa. There are no claims to maritime jurisdiction

over territorial seas or Exclusive Economic Zone (EEZ)

All vessels of the former Ethiopian Navy were put up for sale at Djibouti from 16 September 1996. All were either taken over by Eritrea, sold to civilian firms or scrapped

Headquarters Appointments

Commander Eritrean Navy:
Major General Hummed Mohammed Karikare
Chief of Staff:
Brigadier General Fitsum Gebrehiwet

Personnel

2009: 1,100 including 500 conscripts

Bases

Assab, Massawa, Dehlek

PATROL FORCES

Notes: (1) There are also about 50 rigid raiding craft.
(2) The Osa II class FMB 181 is reported non-operational.

4 SUPER DVORA CLASS (FAST ATTACK CRAFT—GUN) (PTF)

P 101–104

Displacement, tons: 58 full load
Dimensions, feet (metres): 82 × 18.7 × 3 (25 × 5.7 × 0.9)
Main machinery: 2 MTU 8V 396 TE 94 diesels; 3,046 hp (2.24 MW); 2 shafts; ASD 14 surface drives
Speed, knots: 40 **Range, n miles:** 1,200 at 17 kt
Complement: 10 (1 officer)
Guns: 2—23 mm (twin), 2—12 mm MGs.
Depth charges: 1 rail
Weapons control: Optronic sight
Radars: Surface search: Raytheon; I-band.

Comment: Built by Israel Aircraft Industries and delivered from July 1993 to a modified Super Dvora design. The original order may have been for six of the class. All are based at Massawa and all are active

SUPER DVORA P 104

6/2000, Eritrean Navy / 0103787

5 BATTALION 17 (PBF)

P 084-088

Displacement, tons: 35.5 full load
Dimensions, feet (metres): 55.9 × 17 × 5.2 (17.05 × 5.2 × 1.6)
Main machinery: 2 MTU 12V 183TE 92 diesels
Speed, knots: 35.2
Range, n miles: 680 at 30 kt
Complement: 9
Guns: 2 – 14.5 mm MGs (1 twin).
Radars: Surface search: Raytheon; I-band.

Comment: Australian design craft built by Harena Boat Yard at Assab, Eritrea. Five craft delivered in 2000 with possible further orders since then.

P 086

8/2000, Eritrean Navy / 0103788

3 SWIFTSHIPS 105 ft CLASS (LARGE PATROL CRAFT) (PB)

P 151-153

Displacement, tons: 118 full load
Dimensions, feet (metres): 105 × 23.6 × 6.5 (32 × 7.2 × 2)
Main machinery: 2 MTU MD 16V 538 TB90 diesels; 6,000 hp(m) (4.41 MW) sustained; 2 shafts
Speed, knots: 30. **Range, n miles:** 1,200 at 18 kt
Complement: 21
Guns: 4 Emerlec 30 mm (2 twin) (P 151); 600 rds/min to 6 km (3.3 n miles); weight of shell 0.35 kg.
 4 – 23 mm/60 (2 twin) (P 152/153). 2 – 12.7 mm (twin).
Radars: Surface search: Decca RM 916; I-band.

Comment: Six ordered in 1976 of which four were delivered in April 1977 before the cessation of US arms sales to Ethiopia. Built by Swiftships, Louisiana. One deserted to Somalia and served in that Navy for a time. Based at Massawa and in reasonable condition. All are active.

P 153

1/1998 0017825

AMPHIBIOUS FORCES

Notes: (1) Two obsolete ex-USSR T4 LCU's (LST-63 and 64) are in harbour service at Massawa.

(2) The passenger vessel *Harat* arrived at Massawa on 10 February 2006. The 118 m vessel has a helicopter landing deck and accommodation for 2,800. Inspected by the commander of the navy on arrival, the ship may have a military role.

1 CHAMO CLASS (LST)

DENDEN 301

Displacement, tons: 884 full load
Dimensions, feet (metres): 197.5 × 39.3 × 4.7 (60.2 × 12 × 1.44)
Main machinery: 2 MTU 6V 396TB 63; 1,350 hp(m) (1 MW); 2 shafts
Speed, knots: 10
Complement: 23
Guns: 2 – 23 mm (1 twin); 2 – 12.7 mm MGs.

Comment: German built former Ethiopian commercial LST taken over by Eritrea in 1997 and subsequently transferred to the Navy. Reported operational

1 ASHDOD CLASS (LST)

P 63 (ex-302)

Displacement, tons: 400 standard; 730 full load
Dimensions, feet (metres): 205.5 × 32.8 × 5.8 (62.7 × 10 × 1.8)
Main machinery: 3 MWM diesels; 1,900 hp(m) (1.4 MW); 3 shafts
Speed, knots: 10.5
Complement: 20
Guns: 2 – 23 mm (1 twin). 2 – 12.7 mm MGs.

Comment: Former Ethiopian commercial LST acquired from Israel in 1993, taken over by Eritrea in 1997 and subsequently transferred to the Navy. Reported operational.

P 63 (Israel pennant number)

1995, Eritrean Navy / 0103789

Estonia

EESTI MEREVÄGI

Country Overview

The Republic of Estonia regained independence in 1991 after 51 years as a Soviet republic. Situated in northeastern Europe, the country includes more than 1,500 islands, the largest of which are Saaremaa and Hiiumaa. With an area of 17,462 square miles it has borders to the east with Russia and to the south with Latvia. It has a 750 n mile coastline with the Baltic Sea and Gulf of Finland. Tallinn is the capital, largest city and principal port. Territorial seas (12 n miles) are claimed but while it has claimed a 200 n mile Exclusive

Economic Zone (EEZ), its limits have not been fully defined by boundary agreements.

The Navy was founded in 1918 and re-established on 22 April 1994. The Border Guard comes under the Ministry of Internal Affairs and is responsible for SAR and Pollution Prevention.

Headquarters Appointments

Commander of the Navy and Chief of Staff:
 Captain Igor Schveda

Personnel

(a) 2009: 644 (70 officers)
 (b) 8-11 months' national service
 (c) Border Guard: 300

Bases

Major: Miinisadam (Tallinn)
 Minor: Kopli (Tallinn) (Border Guard)

FRIGATES

1 MODIFIED HVIDBJØRNER CLASS (FFLH/AGFH/AGE)

Name	No	Builders	Laid down	Launched	Commissioned
ADMIRAL PITKA (ex-Beskytteren)	A 230 (ex-F 340)	Aalborg Vaerft	11 Dec 1974	29 May 1975	27 Feb 1976

Displacement, tons: 1,970 full load
Dimensions, feet (metres): 245 × 40 × 17.4 (74.7 × 12.2 × 5.3)
Main machinery: 3 MAN/Burmeister & Wain Alpha diesels; 7,440 hp(m) (5.47 MW); 1 shaft; cp prop
Speed, knots: 18. **Range, n miles:** 4,500 at 16 kt on 2 engines, 8,000 at 13 kt on 1 engine
Complement: 43 (9 officers)
Guns: 1 USN 3 in (76 mm)/50, Mk 22.
Countermeasures: ESM; Rascal Cutlass; radar warning.
Radars: Navigation: 2 Litton Decca E; I-band.
Helicopters: Platform for 1 Lynx type.

Programmes: Transferred by gift from Denmark in July 2000 and formally recommissioned on 21 November 2000

Structure: Strengthened for ice operations.

Operational: Flagship of the Estonian Navy, its primary role is as a Command and Support ship and its secondary role is as a research ship. The vessel was refitted prior to being transferred. Modifications included the replacement of the military radars with Litton Marine radars, and the removal of PMS 26 sonar

ADMIRAL PITKA

5/2007, Per Körnefeldt / 1170107

MINE WARFARE FORCES

2 FRAUENLOB (TYPE 394) CLASS (MSI)

Name	No	Builders	Commissioned
OLEV (ex-Diana)	M 415 (ex-M 2664)	Krogerwerft, Rendsburg	21 Sep 1967
VAINDLO (ex-Undine)	M 416 (ex-M 2662)	Krogerwerft, Rendsburg	20 Mar 1967

Displacement, tons: 246 full load
Dimensions, feet (metres): 124.6 x 26.9 x 6.6 (38 x 8.2 x 2)
Main machinery: 2 MTU MB 12V 493 TY70 diesels; 2,200 hp(m) (1.62 MW) sustained; 2 shafts
Speed, knots: 14. **Range, n miles:** 400 at 12 kt
Complement: 23 (5 officers)
Guns: 1 Bofors 40 mm/70
Mines: Laying capability.
Radars: Navigation: Atlas Elektronik, I-band.

Comment: Olev transferred in June 1997 and Vaindlo, which replaced Kalev, on 8 October 2002 having paid off from the German Navy in 1995. Capable of influence and mechanical minesweeping.

VAINDLO 9/2005, Guy Toremans / 1129987

OLEV 6/2000, Fidler & Winter / 0183792

3 SANDOWN CLASS (MINEHUNTERS) (MHC)

Name	No	Builders	Launched	Commissioned
ADMIRAL COWAN (ex-Sandown)	M 313 (ex-M 101)	Vosper Thornycroft, Woolston	16 Apr 1968	9 June 1989
SAKALA (ex-Inverness)	M 314 (ex-M 102)	Vosper Thornycroft, Woolston	27 Feb 1990	24 Jan 1991
UGANDI (ex-Bridport)	M 315 (ex-M 106)	Vosper Thornycroft, Woolston	20 July 1992	6 Nov 1993

Displacement, tons: 450 standard; 484 full load
Dimensions, feet (metres): 172.2 x 34.4 x 7.5 (52.5 x 10.5 x 2.3)
Main machinery: 2 Paxman-Valenta 6RP200E/M diesels; 1,523 hp (1.14 MW) sustained, Vorth-Schneider propulsion; 2 Schottel bow thrusters
Speed, knots: 13 diesels, 6.5 electric drive. **Range, n miles:** 2,500 at 12 kt
Complement: 34 (5 officers) plus 6 spare berths

Guns: 1 DES/MSI DS 308 30 mm/75; 650 rds/min to 10 km (5.4 n miles); anti-surface; 3 km (1.8 n miles) anti-aircraft, weight of shell 0.36 kg. Dillon Aero M 134 7.62 mm Minigun; 6 barrels; 3,000 rds/min.
Countermeasures: MCM: Seafox C expendable mine-disposal system.
Combat data systems: BAE Insyte Nautis 3.
Radars: Navigation: Kelvin Hughes Type 1007; I-band
Sonars: Marconi Type 2093; VDS; VLF-VHF multifunction with 5 arrays; mine search and classification.

Programmes: Single-role minehunter originally designed for deep water operations and built by Vosper Thornycroft for the UK Royal Navy. All three ships withdrawn from RN service following force-level reductions announced in 2004. Preliminary agreement for the regeneration and transfer of the three ships made between the UK and Estonian governments in late 2005. Following a letter of intent on 11 April 2006, a final agreement was signed on 14 September 2006. Admiral Cowan handed over on 26 April 2007 and Sakala on 28 January 2008. Ugandi was handed over in January 2009 and is to undertake navigation and training roles.

Modernisation: The modernisation package is expected to upgrade the two operational ships to the similar equipment standards as those in service in the RN. Principal components include Sonar Type 2093, Seafox C submersibles, Drumgrange Precise Fixing System and Nautis 3 combat data system. Armament options include 30 mm guns and M 134 Minigun CIWS.

Structure: GRP hull. Combines vectored thrust units with bow thrusters and remote-control submersibles. The sonar is deployed from a wolf in the hull.

Operational: The ships are expected to replace the two Landau class MHC.

ADMIRAL COWAN 11/2008*, Michael Nitz / 1335716

AUXILIARIES

1 MAAGEN CLASS (YDT)

Name	No	Builders	Commissioned
AHTI (ex-Mallemukken)	A 431 (ex-Y 385)	Helsingor Dockyard	19 May 1960

Displacement, tons: 190 full load
Dimensions, feet (metres): 88.6 x 23.8 x 9.5 (27 x 7.2 x 2.9)
Main machinery: 1 diesel; 385 hp(m) (283 kW); 1 shaft
Speed, knots: 10
Complement: 11
Guns: 2—12.7 mm MGs.
Radars: Surface search: Pechora; I-band.
Navigation: Skanter 009, I-band.
Sonars: Sidescan.

Comment: Handed over at Tallinn on 29 March 1994, having decommissioned from the Danish Navy in 1992. Serves as a diving tender and for route surveillance.

AHTI 6/2003, Hartmut Ehlers / 0561497

1 LINDORMEN CLASS (COASTAL MINELAYER) (MLC)

Name	No	Builders	Launched	Commissioned
TASUJA (ex-Lindormen)	A 432 (ex-N 43)	Svendborg Værft	7 June 1977	16 Feb 1978

Displacement, tons: 570 full load
Dimensions, feet (metres): 146 x 29.5 x 8.0 (44.5 x 9.0 x 2.6)
Main machinery: 2 Frichs diesels; 1,600 hp (1.2 MW); 2 shafts
Speed, knots: 14
Complement: 27 (4 officers)
Guns: 2—12.7 mm MGs.
Radars: Navigation: I-band.

Comment: Former Danish minelayer handed over on 12 April 2006. Ex-Lossen was also procured as a civilian training ship for the Estonian Maritime Academy.

TASUJA 6/2006, Frank Fidler / 1305005

BORDER GUARD (EESTI PIIRIVALVE)

Notes: (1) *Director General:* Colonel Harry Hein
 (2) The letters PV are visible on the national flag which is defaced with green and yellow markings
 (3) Three vessels are used for anti-pollution duties. *Triin* (PVL-200) (ex-*Bester*) and *Reet* (PVL-201) (ex-*EVA-200*) are both 34 m vessels which entered Border Guard service in May 2001. *Kati* (PVL-202) (ex-*KBV-003*) is a 40 m vessel transferred from Sweden in May 2002.
 (4) PVL-110 is a Slavynka class LCM acquired in 1997 and used as a harbour utility craft.
 (5) *Tiir* (PVL-104) is an ex-Russian Serna class 26 m LCM used as a utility craft.
 (6) The Border Guard Aviation Group was formed in February 1993 and includes two L-410 maritime patrol aircraft and two Mi-8 helicopters

REET 6/2003, Hartmut Ehlers / 0561495

PVL-110 6/2003, Hartmut Ehlers / 0561495

L-410 7/2004, Paul Jackson / 0589739

1 BALSAM CLASS (AGF)

Name	No	Builders	Commissioned
VALVAS (ex- <i>Bittersweet</i>)	PVL 109 (ex-WLB 389)	Duluth Shipyard, Minnesota	11 May 1944

Displacement, tons: 1,034 full load
Dimensions, feet (metres): 180 x 37 x 12 (54.9 x 11.3 x 3.8)
Main machinery: Diesel electric; 2 diesels; 1,402 hp (1.06 MW); 1 motor; 1,200 hp (895 kW); 1 shaft, bow thruster
Speed, knots: 13
Range, n miles: 8,000 at 12 kt
Complement: 53
Guns: 2 – 25 mm/L80 (1 twin), 2 – 12.7 mm MGs.
Radars: Navigation: Raytheon SPS 64(V)1.

Comment: Transferred from the US Coast Guard and recommissioned as a Border Guard Headquarters ship on 5 September 1997.

VALVAS 6/2003, Hartmut Ehlers / 0561497

1 SILMÄ CLASS (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Commissioned
KOU (ex- <i>Silmä</i>)	PPVL 107	Laivateollisuus, Turku	19 Aug 1963

Displacement, tons: 530 full load
Dimensions, feet (metres): 158.5 x 27.2 x 14.1 (48.3 x 8.3 x 4.3)
Main machinery: 1 Warkspoor diesel; 1,800 hp(m) (1.32 MW); 1 shaft
Speed, knots: 15
Complement: 10
Guns: 2 – 25 mm/80 (twin)
Radars: Surface search: I-band.
Sonars: Simrad SS105, active scanning; 14 kHz

Comment: Transferred from Finland Frontier Guard in January 1995.

KOU 4/2007, E & M Laursen / 1305004

1 VIIMA CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
MARU (ex- <i>Viima</i>)	PVL 106	Laivateollisuus, Turku	12 Oct 1964

Displacement, tons: 134 full load
Dimensions, feet (metres): 117.1 x 21.7 x 7.5 (35.7 x 6.6 x 2.3)
Main machinery: 3 MTU MB diesels; 4,050 hp(m) (2.98 MW); 3 shafts, cp props
Speed, knots: 23
Complement: 9
Guns: 2 – 25 mm/L 80 (1 twin), 2 – 14.5 mm MGs (twin), 1 – 7.62 mm MG.
Radars: Surface search: I-band.

Comment: Acquired from Finland Frontier Guard in January 1995.

MARU 6/2003, Hartmut Ehlers / 0589736

1 PIKKER CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Launched	Commissioned
PIKKER	PVL 103	Tahmi	23 Dec 1995	Apr 1996

Displacement, tons: 90 full load
Dimensions, feet (metres): 91.9 x 19 x 4.9 (28.0 x 5.8 x 1.5)
Main machinery: 2 12YH 18/20 diesels; 2,700 hp(m) (1.98 MW) sustained; 2 shafts
Speed, knots: 23
Complement: 5
Guns: 1 – 14.5 mm MG
Radars: Surface search: Kelvin Hughes nucleus; I-band.

Comment: Steel hull and superstructure. Carries a RIB with a hydraulic launch crane aft.

PIKKER 6/2003, Hartmut Ehlers / 0561494

1 VAPPER CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
VAPPER	PVL 111	Baltic Ship Repairers, Tallinn	1 June 2000

Displacement, tons: 117 full load
 Dimensions, feet (metres): 103 x 19.7 x 5.9 (31.4 x 6.0 x 1.8)
 Main machinery: 2 Deutz TBD 620 V12 diesels; 4,087 hp(m) (3.1 MW); 2 shafts
 Speed, knots: 27
 Complement: 7
 Guns: 2 25 mm (1 twin), 1—14.5 mm.
 Radars. Navigation. Furuno; I-band.

Comment: Launched in April 2000. Steel hull and aluminium superstructure. Carries one R.B. for SAR and inspection.

VAPPER 8/2000 / 0114351

1 STORM CLASS (PB)

Name	No	Builders	Launched
TORM (ex-Arg)	PVL 105 (ex-P968)	Bergens Mek, Verksteder	24 May 1966

Displacement, tons: 100 standard; 135 full load
 Dimensions, feet (metres): 120 x 20 x 5 (36.5 x 6.1 x 1.5)
 Main machinery: 2 MTU MB 16V 538 TB90 diesels; 6,000 hp(m) (4.41 MW) sustained; 2 shafts
 Speed, knots: 32
 Range, n miles: 800 at 25 kt
 Complement: 8
 Guns: 2—25 mm/80 (twin), 2—14.5 mm MGs (twin).
 Radars. Surface search: Racal Decca TM 1226; I-band.

Comment: Built in 1966 and paid off from the Norwegian Navy in 1991. Transferred 16 December 1994 stripped of all weapons and associated sensors. Rearmed in 1995 with light guns. No further transfers are expected.

TORM 6/1999, Estonian Border Guard / 0056948

3 KBV 236 CLASS (PB)

PVK 001 (ex-KBV 257)	PVK 002 (ex-KBV 259)	PVK 003 (ex-KBV 246)
----------------------	----------------------	----------------------

Displacement, tons: 17 full load
 Dimensions, feet (metres): 63 x 13.1 x 4.3 (19.2 x 4 x 1.3)
 Main machinery: 2 Volvo Penta TAMD120A diesels; 700 hp(m) (515 kW); 2 shafts
 Speed, knots: 22
 Complement: 5
 Guns: 1—7.62 mm MG.

Comment: Transferred on 4 April 1992, 20 October 1993 and 6 December 1993. Former Swedish Coast Guard vessel built in 1970. Similar craft to Latvia and Lithuania.

PVK 003 8/1995, Erki Holm / 0056949

11 INSHORE PATROL CRAFT (PBI)

PVK 006	PVK 008	PVK 010-013	PVK 016-017	PVK 020-021	PVK 025
---------	---------	-------------	-------------	-------------	---------

Comment: PVK 010 is a 15 m patrol craft built in 1997, PVK 011 was commissioned in 1999, PVK 017 (ex-EVA 203) is a 44 ton MFV type of vessel built in Finland in 1963. PVK 018 (ex-EVA 204) is a 22 kt craft built in Finland in 1993 and PVK 008 and 013 are 13.7 ton icebreaking launches acquired from Finland and based on Lake Peipus. There is also a Jet Combi 10 power boat based on Lake Peipus. Further craft under 12 m have numbers PVK 004, 006, 012, 016, 020-021. PVK 025 is an ex-Swedish craft (KBV 275) acquired in January 1997.

PVK 010 6/2002, Baltic Ship Repairers / 0526817

1 GRIFFON 2000 TDX MK II (HOVERCRAFT) (UCAC)

PVH 1

Displacement, tons: 6.8 full load
 Dimensions, feet (metres): 36.1 x 15.1 (11 x 4.6)
 Main machinery: 1 Deutz BF8L 513 diesel; 320 hp (293 kW) sustained
 Speed, knots: 33
 Range, n miles: 300 at 25 kt
 Complement: 2
 Military lift: 16 troops or 2 tons
 Guns: 1—7.62 mm MG

Comment: Similar to craft supplied to Finland. Acquired in 1999.

PVH 1 9/1999, Nick Hall / 0103794

MARITIME ADMINISTRATION (EESTI VEETEDE AMET (EVA))

Notes: The Maritime Administration (EVA) was re-established in 1990 and is responsible for hydrographic work, aids to navigation, ice-breaking and control of shipping. The main base is at Tallin. Ships are painted with a blue hull and white superstructure and are as follows

Tarmo, icebreaker built in 1963 and acquired from Finland in 1992. Fleet flagship.
 EVA 010, port control launch built in Finland in 1991
 EVA 017, port control launch built in Finland in 1995
 EVA 019, port control launch built in Estonia in 1997
 EVA 300 (ex-*Tormilind*), hydrographic ship built in Russia in 1983
 EVA 303 (ex-*Kaater*), buoy ship built in Poland in 1988
 EVA 305, hydrographic launch built in Russia in 1979
 EVA 308 (ex-GS-108-93), buoy ship built in Poland in 1968
 EVA 309 (ex-BGK-117-93), buoy ship built in Russia in 1967
 EVA 316 (ex-*Lonne*), buoy ship built in Finland in 1980
 EVA 317-318, buoy ships built in Finland in 1994
 EVA 319, buoy ship built in Finland in 1996
 EVA 320, hydrographic ship built in Finland in 1997
 EVA 321, buoy ship built in Estonia in 1999
 EVA 322, launch built in Finland in 1997
 EVA 323, launch built in Finland in 1994
 EVA 324, workboat built in Japan in 1996
 EVA 325, hydrographic ship built in Finland in 2002

TARMO

Country Overview

The Falkland Islands are a self-governing British dependency administered by a Governor and a legislative council. Situated in the south Atlantic Ocean 323 n miles northeast of Cape Horn, approximately 200 islands are

Falkland Islands

divided into two main groups on the east and west by the narrow Falkland Sound. The two largest islands are West Falkland Island (2,090 square miles) and East Falkland Island (2,610 square miles) on which the capital, largest town and principal port, Stanley, is situated. Territorial waters (12 n miles) are claimed as is a 200 n mile fishery zone.

Maritime Aircraft

There are two Pilatus Britten-Norman Defender unarmed maritime surveillance aircraft.

PATROL FORCES

Notes: (1) The ex-Northern Lighthouse Board vessel *Pharos*, renamed *Pharos SG* has been on charter since November 2006, to the Government of South Georgia and the South Sandwich Islands as a fishery patrol and logistics support vessel. The Falkland Islands government continues to provide the fishery officer and support facilities.
 (2) The Fisheries Patrol Vessel *Dorada* was temporarily replaced by *Protegat* in May 2008. A permanent replacement is expected to enter service in 2009.

1 FISHERY PATROL SHIP (PSO)

PROTEGAT (ex-*Sumiyoshi Maru 35*, ex-*Chokyo Moru 35*)

Measurement, tons: 1,174 grt
Dimensions, feet (metres): 230.2 × 34.8 × 18.4 (70.17 × 10.6 × 5.6)
Main machinery: 1 Niigata NHP30AH diesel; 1,800 hp (1.3 MW); 1 shaft; 1 Kamome bow thruster; 200 hp (150 kW)
Speed, knots: 13.5
Range, n miles: 19,000 at 10 kt
Complement: 16 plus accommodation for 5 augmentees
Guns: 1–20 mm Oerlikon (to be fitted if charter extended)
Radars: Surface search/navigation: 1 JRC JMA 527; 1 Furuno FR 2135; 1 Furuno FR 1525; E/F/I bands.

Comment: Former fishing vessel built by Miho Zosenko KK-Shimizu in 1987. Converted for fishery protection duties and first chartered in May 2008. The current charter will expire in January 2014. Steel construction with bulbous bow.

PROTEGAT

6/2008*, Falkland Island Fisheries 1335206

Country Overview

The Faroe Islands are a self-governing island group that is an integral part of Denmark which retains control of foreign relations. Located in the North Atlantic Ocean, about midway between the Shetland Islands and Iceland, there are 18 islands, of which the most important are Østerø, Suderø, Sandø, Vagø, Borðø and Strømø, on which the capital and principal port, Tórshavn, is situated. Territorial waters (12 n miles) are claimed. A 200 n mile fishery zone

Faroe Islands

has also been claimed although the limits have only been partly defined by boundary agreements.

The Coast Guard and Fisheries come under the Landsstyri which is the islands' local government. Vessels work closely with the Danish Navy.

Headquarters Appointments

Head of Coast Guard:
 Captain Elmar Hojgaard

Personnel

2009: 60

Bases

Tórshavn (Isle of Streymoy)

COAST GUARD

Notes: There is also an inshore patrol vessel *Spogsvin*.

1 PATROL SHIP (PBO)

TJALDRID

Displacement, tons: 650 full load
 Dimensions, feet (metres): 146 × 33.1 × 10.5 (44.5 × 10.1 × 3.2)
 Main machinery: 2 MWM diesels, 2,400 hp (m) (1.76 MW); 2 shafts
 Speed, knots: 14.5
 Complement: 18 plus 4 divers
 Guns: 1 Oerlikon 20 mm can be carried
 Radars: Surface search: Raytheon TM/TCPA; I-band.

Comment: Originally a commercial tug built in 1976 by Svolvær, Verksted and acquired by the local government in 1987. The old 57 mm gun has been replaced. A decompression chamber can be carried.

TJALDRID 12/1999, Faroes Coast Guard / 0080652

1 PATROL SHIP (PSO)

BRIMIL

Displacement, tons: 2,000 full load
 Dimensions, feet (metres): 208.71 × 41.3 × 14.1 (63.6 × 12.6 × 4.3)
 Main machinery: 2 Bergen diesels; 5,452 hp (4.06 MW)
 Speed, knots: 17
 Complement: 12 with accommodation for 30 including 3 divers
 Radars: Surface search: 2 Furuno.

Comment: Built for Faroese government as a patrol vessel by Myklebust Mek. Verksted, Norway. Entered service in April 2001.

BRIMIL 7/2008*, Marco Ghiglino / 1353022

Fiji

Country Overview

A former British colony, the Republic of Fiji gained independence in 1970. Part of Melanesia, it is situated in the south Pacific Ocean some 972 n miles north of New Zealand and comprises more than 300 islands and islets, 100 of which are inhabited. The largest and most important of these are Viti Levu and Vanua Levu, which together contain more than 85 per cent of the total land area. To the southeast lie Taveuni, Kandavu, Koro and the Lau group while to the northwest lie Rotuma and the Yasawa group. The capital, largest town and principal port is Suva. An archipelagic state, territorial seas (12 n miles) are claimed.

An Exclusive Economic Zone (EEZ) (200 n miles) is also claimed but limits have yet to be fully defined by boundary agreements.

Headquarters Appointments

Commander, Navy:
 To be announced

Personnel

2009: 300

Bases

RFNS Viti, at Togalevu (Training).
 RFNS Stanley Brown.
 Operation base at Walu Bay, Suva.
 Forward base at Lautoka.

Prefix to Ships' Names

RFNS (Republic of Fiji naval ship)

PATROL FORCES

3 PACIFIC CLASS (LARGE PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
KULA	201	Transfield Shipbuilding	28 May 1994
KIKAU	202	Transfield Shipbuilding	27 May 1995
KIRO	203	Transfield Shipbuilding	14 Oct 1995

Displacement, tons: 162 full load
 Dimensions, feet (metres): 103.3 × 26.6 × 6.9 (31.5 × 8.1 × 2.1)
 Main machinery: 2 Caterpillar 3516TA diesels; 2,820 hp (2.09 MW) sustained; 2 shafts
 Speed, knots: 20. Range, n miles: 2,500 at 12 kt
 Complement: 17 (4 officers)
 Guns: 1—20 mm Oerlikon. 2—12.7 mm MGs.
 Radars: Surface search: Furuno; I-band

Comment: Ordered in December 1992. These are hulls 17, 19 and 20 of the class offered by the Australian government under Defence Co-operation Programme. *Kikau* underwent a half-life refit at Gladstone in 2001 followed by *Kula* and *Kiro* in 2002. Following the decision by the Australian government to extend the Pacific Patrol Boat project until 2025, life extension refits will be required for *Kikau* in 2011 and for *Kula* and *Kiro* in 2012.

KIRO 8/1998, van Ginderen Collection / 0017831

2 VAI (DABUR) CLASS (COASTAL PATROL CRAFT) (PB)

SAKU 303 SAQA 304

Displacement, tons: 39 full load
 Dimensions, feet (metres): 64.9 × 18 × 5.8 (19.8 × 5.5 × 1.8)
 Main machinery: 4 GM 12V-71TA diesels; 1,680 hp (1.25 MW) sustained; 2 shafts
 Speed, knots: 19
 Range, n miles: 450 at 13 kt
 Complement: 9 (2 officers)
 Guns: 2—20 mm Oerlikon. 2—12.7 mm MGs.
 Radars: Surface search: Racal Decca Super 101 Mk 3; I-band.

Comment: Built in mid-1970s by Israel Aircraft Industries and transferred from Israel 22 November 1991. ASW equipment is not fitted. Reported as being no longer required by the Navy and may be used by other government departments.

SAQA 6/1995 / 0056954

2 COASTAL PATROL CRAFT (PB)

Name	No	Builders	Recommissioned
LEVUKA	101	Beaux's Bay Craft, Louisiana	22 Oct 1987
LAUTOKA	102	Beaux's Bay Craft, Louisiana	28 Oct 1987

Displacement, tons: 97 full load
Dimensions, feet (metres): 110 × 24 × 5 (33.8 × 7.4 × 1.5)
Main machinery: 4 GM 12V-71TA diesels; 1,680 hp (1.25 MW) sustained; 4 shafts
Speed, knots: 12
Complement: 12 (2 officers)
Guns: 1—12.7 mm MG
Radars: Surface search: Racal Decca; I-band

Comment: Built in 1979–80 as oil rig support craft. Purchased in September 1987. All aluminium construction

Finland

SUOMEN MERIVOIMAT

Country Overview

The Republic of Finland is situated in northern Europe. Nearly one third of the country lies north of the Arctic Circle. With an area of 130,559 square miles, which includes some 60,000 lakes, it has borders to the north with Norway and to the east with Russia. It has a 675 n mile coastline with the Baltic Sea and Gulf of Finland. The Åhvenanmaa archipelago (Åland Islands), consisting of some 6,500 islands, lies southwest of the mainland. Helsinki is the capital, largest city and principal port. Territorial Seas and a Fishing Zone, both of 12 n miles, have been claimed but not an EEZ.

Headquarters Appointments

Commander-in-Chief Finnish Navy:
 Vice Admiral Hans Holström
Chief of Staff FNHQ:
 Captain Veli-Jukka Pennala

Diplomatic Representation

Defence Attaché in London:
 Captain K Varsio

Personnel

(a) 2009: 2,200 regulars
 (b) 3,650 conscripts (6–12 months' national service)

Fleet Organisation

Naval Headquarters: Turku
 Gulf of Finland Naval Command; main base Uppinniemi, Helsinki
 Archipelago Sea Naval Command; main base at Pansio, near Turku.
 Kotka Coastal Command at Kotka.
 Uusimaa Jaeger Brigade at Dragsvik.
 Not all ships are fully manned all the time but all are rotated on a regular basis.

Coast Defence

Coastal Artillery and naval infantry troops. RBS 15 truck-mounted quadruple SSM launchers. 155 mm, 130 mm and 100 mm fixed and mobile guns.

Frontier Guard

All Frontier Guard vessels come under the Ministry of the Interior. The ships have dark green hulls with a thick red diagonal stripe superimposed by a thin white stripe. Superstructure is painted grey. Personnel numbers: 600.

PATROL FORCES

2 KIISLA CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
KIISLA	50	Holmning, Rauma	25 May 1987
KURKI	51	Holmning, Rauma	Nov 1990

Displacement, tons: 270 full load
Dimensions, feet (metres): 158.5 × 28.9 × 7.2 (48.3 × 8.8 × 2.2)
Main machinery: 2 MTU 16V 538TB93 diesels; 7,510 hp(m) (5.9 MW) sustained; 2 Kamewa 90 waterjets
Speed, knots: 25
Complement: 10
Guns: 2 USSR 23 mm/60 (twin) or 1 Madsen 20 mm.
Weapons control: Radamec 2100 optronic director.
Sonars: Simrad SS304 hull-mounted and VDS; active search; high frequency

Comment: First ordered on 23 November 1984 and second on 22 November 1988. Plans for two further craft were cancelled. The design allows for rapid conversion to attack craft, ASW craft, minesweeper or minehunter. A central telescopic crane over the engine room casing is used to launch a 5.7 m rigid inflatable sea boat. A fire monitor is mounted in the bows. The Kamewa steerable water-jets extend the overall hull length by 2 m. Transferred from the Frontier Guard in 2004.

KIISLA

6/2004, Finnish Navy / 0587710

4 RAUMA CLASS (FAST ATTACK CRAFT—MISSILE) (PTGM)

Name	No	Builders	Commissioned
RAUMA	70	Hollming, Rauma	18 Oct 1990
RAAHE	71	Hollming, Rauma	20 Aug 1991
PORVOO	72	Finnyards, Rauma	27 Apr 1992
NAANTALI	73	Finnyards, Rauma	23 June 1992

Displacement, tons: 215 standard; 248 full load
Dimensions, feet (metres): 157.5 x 26.2 x 4.5 (48 x 8 x 1.5)
Main machinery: 2 MTU 16V 538 TB93 diesels; 7,510 hp(m) (5.52 MW) sustained; 2 Riva Calzoni IRC 115 water-jets
Speed, knots: 30
Complement: 19 (5 officers)

Missiles: SSM: 6 Saab RBS 15SF (could embark 8); active radar homing to 150 km (80 n miles) at 0.8 Mach; warhead 200 kg.
SAM: 1 sextuple launcher; Matra Mistral; IR homing to 4 km (2.2 n miles); warhead 3 kg
Guns: 1 Bofors 40 mm/70; 300 rds/min to 12 km (6.6 n miles); weight of shell 0.96 kg
 6—103 mm rails for rocket illuminants. 2—12.7 mm MGs.
 2 Sako 23 mm/87 (twin); can be fitted instead of Mistral launcher.
A/S mortars: 4 Saab Elma LLS-920 9-tubed launchers; range 300 m; warhead 4.2 kg shaped charge.
Depth charges: 1 rail
Countermeasures: Decoys: Philax chaff and IR flares.
ESM/ECM: Thales SIEWIS
Weapons control: Bofors Electronic 9LV Mk 3 optronic director with TV camera; infra-red and laser telemetry
Radars: Surface search: 9GA 208; I-band
Fire control: Bofors Electronic 9LV 225; J-band
Navigation: Raytheon ARPA, I-band.
Sonars: Simrad Subsea Toadfish sonar; search and attack; active high frequency.
 Finnyards Sonac/PTA towed array; low frequency.

Programmes: Ordered 27 August 1987.

Structure: Developed from Helsinki class. Hull and superstructure of light alloy. SAM and 23 mm guns are interchangeable within the same Sako barbette which has replaced the ZU mounting.

Operational. Primary function is the anti-ship role but there is some ASW capability. Mine rails can be fitted in place of the missile launchers. Towed array cable is 78 m with 24 hydrophones and can be used at speeds between 3 and 12 kt.

NAANTALI 10/2007, Michael Nitz / 1170110

4 HAMINA CLASS (FAST ATTACK CRAFT—MISSILE) (PTGM)

Name	No	Builders	Commissioned
HAMINA	80 (ex-74)	Aker Finnyards, Rauma	24 Aug 1998
TORNIO	81	Aker Finnyards, Rauma	12 May 2003
HANKO	82	Aker Finnyards, Rauma	22 June 2005
PORI	83	Aker Finnyards, Rauma	18 June 2006

Displacement, tons: 270 full load
Dimensions, feet (metres): 164 x 26.2 x 6.2 (50.8 x 8.3 x 2)
Main machinery: 2 MTU 16V 538 TB93 diesels; 7,510 hp(m) (5.52 MW) sustained; 2 Kamewa 90SII waterjets
Speed, knots: 32
Range, n miles: 500 at 30 kt
Complement: 29 (5 officers)

Missiles: SSM: 4 Saab RBS 15SF; active radar homing to 100 km (54 n miles) at 0.8 Mach; warhead 200 kg.
SAM: Denel Umkhonto 8 cell VLS; inertial guidance with mid-course guidance and IR homing to 12 km (6.5 n miles) at 2.4 Mach; warhead 23 kg.
Guns: Bofors 57 mm/L 70 Mk 3; 220 rds/min to 17 km (9.2 n miles); weight of shell 2.6 kg
 2—12.7 mm MGs.
Depth charges: 1 rail
Mines: 1 rail for 10 mines.
Countermeasures: Decoys: 2 Rheinmetall MASS-2L; decoy launchers.
ESM/ECM: Thales SIEWIS; radar intercept
Combat data systems: EADS Advanced Naval Combat System (ANCS SQ 2000).
Weapons control: Saab Ceros electro-optic director. Sagem EOMS IR scanner.
Radars: Air/surface search: EADSTRS-3D; G-band
Fire control: SAAB Ceros 200; J-band
Navigation: Furuno; I-band.
Sonars: Simrad Subsea Toadfish sonar; search and attack; active high frequency.
 Finnyards Sonac/PTA towed array; low frequency.

Programmes: First ordered on 31 December 1996, second in February 2000, third on 3 December 2003 and a fourth on 15 February 2005 for delivery in 2006.

Structure: A continuation of the Rauma design with aluminium hull, composite superstructure and RAM coating. Signature reduction is aided by RAM coatings on the superstructure, submerged engine exhausts, upper deck pro-wotting, resilient mountings for all machinery, waterjet propulsion and conductive sealings on doors and hatches to prevent electromagnetic leakage.

Operational: Umkhonto missile fired from Hanko on 26 May 2006. The squadron is based at Upinniemi and became operational in 2008.

TORNIO 10/2007, Frank Findler / 1305907

TORNIO 10/2007, Michael Nitz / 1170109

MINE WARFARE FORCES**0 + 3 MCMV 2010 CLASS (MINEHUNTERS) (MHSC)**

Name	Builders	Laid down	Launched	Commissioned
—	Intermarine, Sarzana	July 2007	2009	2010
—	Intermarine, Sarzana	Mar 2008	2009	2011
—	Aker Finnyards, Rauma	2008	2011	2012

Displacement, tons: 697 full load
Dimensions, feet (metres): 172.1 x 32.5 x 10.2 (52.5 x 9.9 x 3.1)
Main machinery: 2 MTU 8V 396 TE74K diesels (for transit); 2,680 hp (2 MW); 2 motors (for minehunting); 2 Voith Schneider cycloidal propellers
Speed, knots: 13 diesel
Range, n miles: 1,500 at 12 kt
Complement: 36 (6 officers)

Guns: 1 Bofors 40 mm/70
Countermeasures: MCM: Atlas Sea Fox C MIDS
Combat data systems: Atlas Integrated mine countermeasure system (IMCMS).
Radars: Navigation: I-band
Sonars: Atlas Elektronik SQS-12M hull-mounted; LF/HF/VHF minehunting sonar; Double Eagle Mk 3 dual-frequency UDS

Programmes: Contract signed with Intermarine SPA on 23 November 2006 for the construction of three MCMVs. The first two ships are to be built at Sarzana; the third ship is to be built by Intermarine and completed at Aker Shipyards, Rauma. The contract includes training and logistic support. The principal components of the minehunting combat system are: a command system, a hull-mounted sonar and self-propelled variable depth sonar (installed in Saab Double Eagle Mk III ROV), a Mine Identification and Disposal System (MIDS) based on the Atlas Sea Fox; both Hydroid Remus and Kongsberg Hugin 1000 AUVs are used for seabed survey and reconnaissance.

Structure: Monocoque GRP construction. The design is similar to the Gaeta class built for the Italian and Australian navies. A new superstructure accommodates the command-and-control suite in the forward-central superstructure and mine-detection and hunting housing and recovery equipment in the central and stern sections.

Operational. The three vessels are expected to become operational by 2014.

MCMV 2010 7/2008, INTERMARINE / 1794517

2 HÄMEENMAA CLASS (MINELAYERS) (ML)

Name	No	Builders	Laid down	Launched	Commissioned
HÄMEENMAA	02	Finnyards, Rauma	2 Apr 1991	11 Nov 1991	15 Apr 1992
UUSIMAA	05	Finnyards, Rauma	12 Nov 1991	June 1992	2 Dec 1992

Displacement, tons: 1,450 full load
Dimensions, feet (metres): 255.2 oa; 228.3 wl × 38.1 × 10.5 (778, 89.6 × 11.6 × 3.2)
Main machinery: 2 Wärtsilä 16V22 diesels; 6,300 hp(m) (4.64 MW) sustained; 2 Kamewa cp props; bow thruster; 247 hp(m) (184 kW)
Speed, knots: 20
Complement: 66

Missiles: SAM Denel Umkhonto 8 cell VLS; inertial guidance with mid-course guidance and IR homing to 12 km (6.6 n miles) at 2.4 Mach; warhead 23 kg.
Guns: 1 Bofors 57 mm/70 Mk 1; 220 rds/min to 17 km (9.2 n miles); weight of shell 2.6 kg. 2—40 mm grenade launchers, 2—12.7 mm MGs.
A/S mortars: 2 RBU 1200 fixed 5-tubed launchers; range 1,200 m; warhead 34 kg.
Depth charges: 2 racks for 8 DCs
Mines: 4 rails for 200 contact (S 43-55, 541, 558) or influence (Seamine 2004 and PM 90) mines
Countermeasures: Decoys: 2 Rheinmetall MASS-2L; decoy launchers.
ESM/ECM: Thales SIEW
Combat data systems: EADS ANCS 2000
Weapons control: Saab Ceros electro-optic director. Sagem EOMS IR scanner
Radars: Air/surface search: EADS TRS-3D; G-band
Surface search and Navigation: 3 Furuno 2827/2837S, E/F/I-bands.
Sonars: Simrad; hull-mounted; active mine detection; high frequency.

Helicopters: Platform for 1 light.

Programmes: First one ordered 29 December 1989 after the original order in July from Wärtsilä had been cancelled. Second ordered 13 February 1991.

Modernisation: A contract for the mid-life upgrade of both vessels was awarded to EADS Defence and Security Division in April 2006. Modernisation, undertaken by Aker Shipyards, included EADS ANCS 2000 combat data system, EADS TRS 3D radar, Sagem EOMS and Umkhonto point defence missile system. Hämeenmaa completed upgrade on 13 April 2007 and Uusimaa in September 2007. Both vessels became fully operational in 2008.

Structure: Steel hull and alloy superstructure. Ice strengthened (Ice class 1A) and capable of breaking up to 40 mm ice. During the modernisation period (2006-07), a new fixed bow, stabilisers, two new masts and a new combat information system were added. The flight deck can operate light helicopters.

Operational: Dual role as a transport and support ship.

UUSIMAA

6/2008, M Declercq / 1335718

1 MINELAYER (ML)

Name	No	Builders	Laid down	Launched	Commissioned
POHJANMAA	01	Wärtsilä, Helsinki	4 May 1978	28 Aug 1978	8 June 1979

Displacement, tons: 1,000 standard; 1,100 full load
Dimensions, feet (metres): 255.8 × 37.7 × 9.8 (78.2 × 11.6 × 3)
Main machinery: 2 Wärtsilä Vasa 16V22 diesels; 6,300 hp(m) (4.64 MW) sustained; 2 shafts; cp props, bow thruster
Speed, knots: 19
Range, n miles: 3,500 at 15 kt
Complement: 90

Missiles: SAM: 2 sextuple launchers; Matra Mistral, IR homing to 4 km (2.2 n miles); warhead 3 kg.
Guns: 1 Bofors 57 mm/70, 200 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg. 6—103 mm launchers for illuminants fitted to the mounting.
 2 Bofors 40 mm/70; 300 rds/min to 12 km (6.6 n miles); weight of shell 0.96 kg.
 4 Sako 23 mm/87 (2 twin). 2—12.7 mm MGs
A/S mortars: 2 RBU 1200 fixed 5-tubed launchers; range 1,200 m; warhead 34 kg
Depth charges: 2 rails.
Mines: 120 including UK Stonefish
Countermeasures: Decoys: Philax chaff and IR flare launcher
ESM: Argo, radar intercept
Radars: Air search: Signaal DA05; E/F-band.
Surface search: Philips 9GR 600; I-band.
Fire control: Philips 9LV 220; J-band.
Navigation: I-band
Sonars: Simrad; hull-mounted; active search and attack; high frequency.
Bottom classification, search, high frequency.

Programmes: Design completed 1976. Ordered late 1977

Modernisation: In 1992 the forward 23 mm guns were replaced by 12.7 mm MGs. Major refit in 1996-98 to replace the main gun, improve air defences and minelaying capability. The SAM mounting is interchangeable with 23 mm guns.

Operational: Also serves as training ship. Carries 70 trainees accommodated in Portakabins on the mine deck. Helicopter area on quarterdeck but no hangar.

POHJANMAA

5/2008, Michael Nitz / 1335717

3 PANSIO CLASS (MINELAYERS—LCUTYPE) (MLI)

Name	No	Builders	Commissioned
PANSIO	876 (ex-576)	Otkiluoto Shipyard	25 Sep 1991
PYHÄRANTA	875 (ex-575, ex-475)	Otkiluoto Shipyard	26 May 1992
PORKKALA	777	Otkiluoto Shipyard	29 Oct 1992

Displacement, tons: 450 standard
Dimensions, feet (metres): 144.3 oa; 128.6 wl × 32.8 × 6.6 (44; 39.2 × 10 × 2)
Main machinery: 2 MTU 12V 183 TE62 diesels; 1,500 hp(m) (1.1 MW); 2 shafts; bow thruster
Speed, knots: 10
Complement: 12
Guns: 2 ZU 23 mm/87 (twin). 1—12.7 mm MG
Mines: 50
Radars: Navigation: Raytheon ARPA; I-band.

Comment: Ordered in May 1990. Used for inshore minelaying and transport with a capacity of 100 tons. Ice strengthened with ramps in bow and stern. Has a 15 ton crane fitted aft.

PYHÄRANTA

4/2007, Guy Toremans / 1170108

6 KUHA CLASS (MINESWEEPERS—INSHORE) (MSI)

Name	No	Builders	Commissioned
KUHA 21	21	Laivateollisuus, Turku	1974-75
KUHA 22	22	Laivateollisuus, Turku	1974-75
KUHA 23	23	Laivateollisuus, Turku	1974-75

 Range: 354 n miles (656 km)
 Role/Weapon systems: Operated by Coast Guard/Frontier force for patrol and SAR. Sensors: Radar and FLIR. Weapons: Unarmed at present but mountings for machine guns.

AB 412 6/2005, Finnish Navy / 1133422

Numbers/Type: 3 Eurocopter AS 332L1 Super Puma
 Operational speed: 130 kt (240 km/h)
 Service ceiling: 15,090 ft (4,600 m)
 Range: 672 n miles (1,245 km)
 Role/Weapon systems: Coastal patrol, surveillance and SAR helicopters. Sensors: Surveillance radar, FLIR, tactical navigation systems and SAR equipment. Weapons: Unarmed

AS 332 6/2005, Finnish Navy / 1133423

Numbers/Type: 2 Agusta AB 206B JetRanger.
 Operational speed: 116 kt (215 km/h)
 Service ceiling: 13,500 ft (4,120 m)
 Range: 364 n miles (674 km)
 Role/Weapon systems: Coastal patrol and inshore surveillance helicopters. Sensors: Visual means only. FLIR may be fitted in due course. Weapons: Unarmed

AB 206 (Swedish colours) 6/2000, Andreas Karlsson, Swedish Defence Image / 0106563

Numbers/Type: 2 Dornier Do 228-212.
 Operational speed: 223 kt (413 km/h)
 Service ceiling: 29,600 ft (9,020 m)
 Range: 939 n miles (1,740 km)
 Role/Weapon systems: Maritime surveillance, SAR and pollution control. Acquired in 1995. Sensors: GEC-Marconi Seaspray radar; Terma Side scan radar; FLIR/TV, SLAR and IR/UV scanner. Weapons: Unarmed.

DORNIER 228 (German colours) 8/2002, Frank Findler / 0528878

TRAINING SHIPS

2 LOKKI CLASS (AX)

Name	No	Builders	Commissioned
LOKKI	57	Valmet/Lavateollisuus	28 Aug 1986
KAJAVA	56	Valmet/Lavateollisuus	3 Oct 1981

Displacement, tons: 58 (Lokki); 64
 Dimensions, feet (metres): 87.9 x 18 x 6.2 (26.8 x 5.5 x 1.9)
 87.9 x 17.1 x 8.5 (26.8 x 5.2 x 2.1) (Lokki)
 Main machinery: 2 MTU 8V 396 TB82 diesels; 1,740 hp(m) (1.28 MW), sustained (Lokki)
 2 MTU 8V 396 TB84 diesels; 2,100 hp(m) (1.54 MW) sustained; 2 shafts
 Speed, knots: 25
 Complement: 6
 Guns: 2 ZU 23 mm/60 can be carried
 Sonars: Simrad SS 242, hull-mounted; active search; high frequency.

Comment: Transferred from the Frontier Guard to the Navy in 1999 and used as training vessels. Built in light metal alloy. Lokki has a V-shaped hull. A third of class to Lithuania in 1997 and a fourth to Latvia in 2001.

LOKKI 6/2001, Finnish Navy / 0114723

3 FABIAN WREDE CLASS (AX)

Name	No	Builders	Commissioned
FABIAN WREDE	690	UKI Workboat, Usikaupunki	15 Aug 2006
WILHELM CARPELAN	691	UKI Workboat, Usikaupunki	14 June 2007
AXEL VON FERSEN	692	UKI Workboat, Usikaupunki	30 June 2008

Displacement, tons: 65 full load
 Dimensions, feet (metres): 64.9 × 19.0 × 6.2 (19.8 × 5.8 × 1.9)
 Main machinery: 1 Caterpillar C 18 diesel; 670 hp (500 kW); 1 shaft
 Speed, knots: 12
 Complement: 2 plus 8 trainees
 Radars: Navigation: I-band.

Comment: Naval Academy training ships.

FABIAN WREDE

6/2008* / 1335719

KAMPELA 2 (old number)

6/2000, Finnish Navy / 0103800

2 KALA CLASS (LCU TRANSPORTS) (LCU/AKSL)

KALA 4 874 KALA 6 176

Displacement, tons: 60 light; 200 full load
 Dimensions, feet (metres): 88.6 × 26.2 × 6 (27 × 8 × 1.8)
 Main machinery: 2 Valmet diesels; 360 hp(m) (265 kW); 2 shafts
 Speed, knots: 8
 Complement: 10
 Guns: 2 Oerlikon 20 mm (not in all)
 Mines: 34.
 Radars: Navigation: Decca 1226; I-band

Comment: Completed between 1956 and 4 December 1959 (Kala 6). Can be used as coastal transports, amphibious craft, minelayers or for shore support. Armament can be changed to suit role.

KALA 6

6/2001, Finnish Navy / 0114729

AUXILIARIES

5 VALAS CLASS (GP TRANSPORTS) (AKSL)

VALAS 879 MURSU 98 VAHAKARI 121 VAARLAHTI 722 VÄNÖ 723

Displacement, tons: 285 full load
 Dimensions, feet (metres): 100.4 × 26.5 × 10.4 (30.6 × 8.1 × 3.2)
 Main machinery: 1 Wärtsilä Vasa 8V22 diesel, 1,576 hp(m) (1.16 MW) sustained; 1 shaft
 Speed, knots: 12
 Complement: 11
 Military lift: 35 tons or 150 troops
 Guns: 2 – 23 mm/60 (twin), 1 – 12.7 mm MG.
 Mines: 28 can be carried
 Radars: Navigation: Decca 1226; I-band

Comment: Completed 1979–80. Mursu acts as a diving tender. Funnel is offset to starboard. Can be used as minelayers or transport/cargo carriers and are capable of breaking thin ice.

VALAS (old number)

7/1996, van Ginderen Collection / 0069878

3 KAMPELA CLASS (LCU TRANSPORTS) (LCU/AKSL)

Name	No	Builders	Commissioned
KAMPELA 1	771	Enso Gutzeit	29 July 1976
KAMPELA 2	772	Enso Gutzeit	21 Oct 1976
KAMPELA 3	877	Finnmekano	23 Oct 1979

Displacement, tons: 90 light; 260 full load
 Dimensions, feet (metres): 106.6 × 26.2 × 4.9 (32.5 × 8 × 1.5)
 Main machinery: 2 Scania diesels; 460 hp(m) (338 kW); 2 shafts
 Speed, knots: 9
 Complement: 10
 Guns: 2 or 4 ZU 23 mm/60 (1 or 2 twin)
 Mines: About 20 can be carried.

Comment: Can be used as amphibious craft, transports, minelayers or for shore support. Armament can be changed to suit role.

HOUTSKÄR (old number)

8/1997, Finnish Navy / 0587703

6 HAUKI CLASS (TRANSPORTS) (AKSL)

HAVOURI 133 HIRSALA 235 HAKUNI 731
HAUKI 232 HANKONIEMI 334 HOUTSKÄR 836

Displacement, tons: 45 full load
 Dimensions, feet (metres): 47.6 × 15.1 × 7.2 (14.5 × 4.6 × 2.2)
 Main machinery: 2 Valmet 611 CSM diesels, 586 hp(m) (431 kW); 1 shaft
 Speed, knots: 12
 Complement: 4
 Cargo capacity: 6 tons or 40 passengers
 Radars: Navigation: I-band

Comment: Completed 1979. Ice strengthened; two serve isolated island defences. Four converted in 1988 as tenders to the Marine War College, but from 1990 back in service as light transports.

4 HILA CLASS (TRANSPORTS) (AKSL)

HILA 237 HARUNA 238 HÄSTÖ 739 HÖGSÄRA 830

Displacement, tons: 50 full load
 Dimensions, feet (metres): 49.2 × 13.1 × 5.9 (15 × 4 × 1.8)
 Main machinery: 2 diesels; 416 hp(m) (306 kW); 2 shafts
 Speed, knots: 12
 Complement: 4

Comment: Ordered from Kotkan Telakka in August 1990. Second pair completed in 1994. Ice strengthened.

HILA 6/2000, Finnish Navy / 0103801

1 TRIALS SHIP (MLI)

Name	No	Builders	Launched	Commissioned
ISKU	826 (ex-829, ex-16)	Roposaaron Konepaja	4 Dec 1969	1970

Displacement, tons: 180 full load
 Dimensions, feet (metres): 108.5 × 28.5 × 5.9 (33 × 8.7 × 1.8)
 Main machinery: 4 Type M 50 diesels; 4,400 hp(m) (3.3 MW) sustained; 4 shafts
 Speed, knots: 18
 Complement: 25
 Radars: Navigation: Raytheon ARPA, I-band.

Comment: Formerly a missile experimental craft, now used for various equipment trials. Modernised in 1989–90 by Uusikaupunki Shipyard and lengthened by 7 m. Can quickly be converted to a minelayer.

ISKU 6/2000, Finnish Navy / 0103798

2 LOHI CLASS (LCU TRANSPORTS) (LCU)

LOHI 751 (ex-351) LOHM 752

Displacement, tons: 38 full load
 Dimensions, feet (metres): 65.6 × 19.7 × 3 (20 × 6 × 0.9)
 Main machinery: 2 WMB diesels; 1,200 hp(m) (882 kW); 2 water-jets
 Speed, knots: 20
 Range, n miles: 240 at 20 kt
 Complement: 4
 Guns: 2 ZU 23 mm/60 (twin), 1—14.5 mm MG.

Comment: Commissioned September 1984. Used as troop carriers and for light cargo. Guns not always carried.

LOHI (old number) 6/2000, Finnish Navy / 0103802

1 TRANSPORT AND COMMAND LAUNCH (YFB)

ASKERI 241

Displacement, tons: 25 full load
 Dimensions, feet (metres): 52.6 × 14.5 × 4.5 (16 × 4.4 × 1.4)
 Main machinery: 2 Volvo Penta diesels; 1,100 hp(m) (808 kW); 2 shafts
 Speed, knots: 22
 Complement: 6
 Radars: Surface search, I-band
 Navigation: Raytheon; I-band

Comment: Completed in 1992. Closely resembles Spanish PVC II class.

COMMAND LAUNCH 6/2000, Finnish Navy / 0103804

7 VIHURI CLASS (COMMAND LAUNCHES) (YFB)

JYMY 511	SYÖKSY 531	TRÄSKÖ 792	ALSKÄR 894
RAJU 512	VINHA 541	TORSÖ 993	

Displacement, tons: 13 full load
 Dimensions, feet (metres): 42.7 × 13.1 × 3 (13 × 4 × 0.9)
 Main machinery: 2 diesels; 772 hp(m) (567 kW); 2 water-jets
 Speed, knots: 30
 Complement: 6
 Radars: Surface search, I-band

Comment: First of class *Vihuri* delivered in 1988, the next five in 1991 and the last pair in 1993. *Träskö*, *Torsö* and *Alskär* act as fast transports. The remainder are command launches for Navy squadrons. *Vihuri* was destroyed by fire in late 1991.

VINHA 6/1993, van Ginderen Collection / 0069883

30 MERIUISKO CLASS (LCP)

U 201-211 U 301-312 U 400 series

Displacement, tons: 10 full load
 Dimensions, feet (metres): 36 × 11.5 × 1.6 (11 × 3.5 × 0.5)
 Main machinery: 2 Volvo TAMD70E diesels; 418 hp(m) (307 kW) sustained; 2 Hamilton waterjets
 Speed, knots: 38; 30 full load
 Complement: 3
 Military lift: 25 troops or 2.5 tons equipment
 Radars: Navigation (U 401 series): I-band

Comment: First batch of 11 completed by Alumina Varvet from 1983 to 1986. A further four ordered in 1989. Constructed of light alloy. Fitted with small bow ramp. Two of the class equipped with cable handling system for boom defence work. Batch one has smaller cabins.

U 304 6/2000, Finnish Army / 0103805

36 JURMO CLASS (LCP)

U 601 636

Displacement, tons: 10 full load
 Dimensions, feet (metres): 46.9 × 12.1 × 2.5 (14.3 × 3.7 × 0.75)
 Main machinery: 2 Caterpillar diesels; 2 FF-jet 375 waterjets
 Speed, knots: 30+
 Complement: 2
 Military lift: 21 troops with equipment or 2.5 tons cargo
 Guns: 2 – 12.7 mm MGs.
 Redars: Navigation. I-band.

Comment: Developed from Merusko class for troop carrying role. Prototype built by Alutech Ltd and delivered in 1999. Delivered by 2005. Cargo hatch of composite material to provide armoured protection. Trials with the German AFS *Berlin* were carried out in July 2007. Trials of the Kongsberg Sea Protector 12.7 mm remotely controlled gun conducted in U 634 in 2008.

U 603

8/2002, E & M Laurson / 0534066

23 RAIDING CRAFT (LCVP)

G 100 series

Displacement, tons: 3 full load
 Dimensions, feet (metres): 26.2 × 6.9 × 1 (8 × 2.1 × 0.3)
 Main machinery: 1 Yanmar 4LHA-STE diesel, 240 hp (179 kW); 1 RR FF-jet 240 waterjet
 Speed, knots: 30
 Complement: 1
 Military lift: 9 troops with equipment

Comment: First batch of 23 units ordered in February 2001. Based on Swedish Gruppbat and built by Alutech Ltd. Delivered late 2001.

RAIDING CRAFT

6/2001, Finnish Navy / 0114721

1 CABLE SHIP (ANL)

PUTSAARI 92

Displacement, tons: 430 full load
 Dimensions, feet (metres): 149.5 × 28.6 × 8.2 (45.6 × 8.7 × 2.5)
 Main machinery: 1 Wärtsilä diesel; 510 hp(m) (375 kW); 1 shaft; active rudder; bow thruster
 Speed, knots: 10
 Complement: 20

Comment: Built by Rauma-Repola, Rauma, launched on 15 December 1965 and commissioned in 1966. Modernised by Wärtsilä in 1987. Fitted with two 10 ton cable winches. Strengthened for ice operations.

PUTSAARI

6/2001, Finnish Navy / 0114720

1 SUPPORT CRAFT (YFB)

PIKKALA (ex-Fenno) 96

Displacement, tons: 66 full load
 Dimensions, feet (metres): 75.5 × 14.4 × 6.6 (23 × 4.4 × 2)
 Main machinery: 1 Valmet diesel; 177 hp(m) (130 kW); 1 shaft
 Speed, knots: 10
 Complement: 5

Comment: Used for utility and transport roles at Helsinki. Commissioned in June 1946 at Turku.

PIKKALA

6/2000, Finnish Navy / 0103806

2 POLLUTION CONTROL VESSELS (YPC)

HYLJE 799

HALLI 899

Displacement, tons: 1,600 (Hylje); 1,600 (Halli) full load
 Dimensions, feet (metres): 164; 198.5 (Halli) × 41 × 9.8 (50; 60.5 × 12.5 × 3)
 Main machinery: 2 Saab diesels; 680 hp(m) (500 kW); 2 shafts; active rudders; bow thruster (Hylje)
 2 Wärtsilä diesels; 2,650 hp(m) (19.47 MW); 2 shafts; active rudders (Halli)
 Speed, knots: 7 (Hylje); 13 (Halli)

Comment: Painted grey. Strengthened for ice. Owned by Ministry of Environment, civilian-manned but operated by Navy from Turku. *Hylje* commissioned 3 June 1981, *Halli* in January 1987. Capacity is about 550 m³ (Hylje) and 1,400 m³ (Halli) of contaminated seawater. The ships have slightly different superstructure lines aft.

HYLJE

10/2006, J Cizlak / 1164956

TUGS

2 HARBOUR TUGS (YTM)

HAUKIPÄÄ 730

KALLANPÄÄ 831

Displacement, tons: 38 full load
 Dimensions, feet (metres): 45.9 × 16.4 × 7.5 (14 × 5 × 2.3)
 Main machinery: 2 diesels; 360 hp(m) (265 kW); 2 shafts
 Speed, knots: 9
 Complement: 2

Comment: Delivered by Teijon Telakka Oy in December 1985. Similar to Hauki class. Also used as utility craft.

HAUKIPÄÄ (old number)

6/2000, Finnish Navy / 0103813

FRONTIER GUARD

1 IMPROVED TURSAS CLASS
(OFFSHORE PATROL VESSEL) (WPBO)

MERIKARHU

Displacement, tons: 1,100 full load
Dimensions, feet (metres): 189.6 × 36.1 × 15.1 (57.8 × 11 × 4.6)
Main machinery: 2 Wärtsilä Vasa 8R26 diesels; 3,808 hp(m) (2.8 MW) sustained; 1 shaft; cp prop; bow and stern thrusters
Speed, knots: 15 **Range, n miles:** 2,000 at 15 kt
Complement: 30
Guns: 2—23 mm/87 (twin) can be carried.
Radars: Surface search. Navigation.

Comment: Ordered 17 June 1993 from Finnyards, and completed 28 October 1994. Capable of 5 kt in 50 cm of ice. Used as an all-weather patrol ship in the Baltic, capable of Command, SAR, tug work with 30 ton bollard pull, and environmental pollution cleaning up. Carries an RIB launched from a hydraulic crane.

MERIKARHU 6/2005, Finnish Navy / 1133421

2 TURSAS CLASS (OFFSHORE PATROL VESSELS) (WPBO)

TURSAS UISKO

Displacement, tons: 1,250 full load
Dimensions, feet (metres): 201.6 × 33.5 × 15.9 (61.45 × 10.2 × 4.85)
Main machinery: Diesel electric; 2 Rolls-Royce azimuth thrusters; 4,360 hp (3.2 MW)
Speed, knots: 14
Complement: 32
Guns: 2 Sako 23 mm/60 (twin).
Sonars: Simrad SS105; active scanning; 14 kHz.

Comment: First ordered from Rauma-Repola on 21 December 1984, launched 31 January 1986 and delivered 6 June 1986. Second ordered 20 March 1986, launched 19 June 1986 and delivered 27 January 1987. Both ships underwent conversion at Uusikaupunki Workboat Ltd 2004–06. The ships were lengthened by 12 m and modified to conduct anti-pollution operations.

UISKO (before conversion) 6/2005, Finnish Navy / 1133420

3 TELKKÄ CLASS (WPBO)

TELKKÄ TAVI TIIRA

Displacement, tons: 400 full load
Dimensions, feet (metres): 160.8 × 24.6 × 11.8 (49 × 7.5 × 3.6)
Main machinery: 2 diesels; 6,120 hp(m) (4.5 MW); 2 shafts
Speed, knots: 20
Complement: 17
Guns: 1—20 mm
Sonars: Sonac PTA; towed array; low frequency.

Comment: *Telkkä* entered service in July 1999, *Tavi* in 2003 and *Tiira* on 27 May 2004

TAVI 6/2005, Finnish Navy / 1133419

4 SLINGSBY SAH 2200 (HOVERCRAFT) (UCAC)

Displacement, tons: 5.5 full load
Dimensions, feet (metres): 34.8 × 13.8 (10.6 × 4.2)
Main machinery: 1 Cummins 6CTA-8-3M-1 diesel; 300 hp (224 kW)
Speed, knots: 40
Range, n miles: 400 at 30 kt
Complement: 2
Military lift: 2.2 tons or 12 troops
Guns: 1—12.7 mm MG
Radars: Navigation: Raytheon R41; I-band.

Comment: First one acquired from Slingsby Amphibious Hovercraft Company in March 1993. Three more ordered in February 1998 and delivered in late 1999.

SLINGSBY 2200 6/1993, Slingsby / 0069892

3 GRIFFON 2000 TDX(M) (HOVERCRAFT) (UCAC)

Displacement, tons: 6.8 full load
Dimensions, feet (metres): 36.1 × 15.1 (11 × 4.6)
Main machinery: 1 Deutz BF8L513 diesel; 320 hp (239 kW) sustained
Speed, knots: 33
Range, n miles: 300 at 25 kt
Complement: 2
Military lift: 16 troops or 2 tons
Guns: 1—7.62 mm MG
Radars: Navigation. I-band.

Comment: First two acquired from Griffon, UK and commissioned 1 December 1994; third one bought in June 1995. Can be embarked in an LCU. Speed indicated is at Sea State 3 with a full load. Similar to those in service with the UK Navy.

GRIFFON 2000 6/1994, P Falstead / 0060653

39 INSHORE PATROL CRAFT AND TENDERS (PB)

Class	Total	Tonnage	Speed	Commissioned
RV-37	7	20	12	1978–85
RV-150	10	25	12	1992–96

France

MARINE NATIONALE

Country Overview

The French Republic, which includes the island of Corsica, is situated in western Europe. With an area of 210,026 square miles, the mainland is bordered to the north by Belgium, Luxembourg and Germany, to the south-east by Switzerland and Italy and to the south-west by Spain. It has a 1,852 n mile coastline with the Atlantic Ocean, Mediterranean Sea, North Sea and English Channel. Overseas departments are French Guiana, Martinique, Guadeloupe and Réunion. Dependencies include St Pierre and Miquelon, Mayotte, New Caledonia, French Polynesia, the French Southern and Antarctic Territories, and Wallis and Futuna Islands. The capital and largest city is Paris while the principal ports are Marseilles, Le Havre, Dunkirk, St Nazaire and Rouen. Strasbourg is a port on the Rhine. Territorial seas (12 n miles) are claimed. An EEZ (200 n miles) has also been claimed but not all the large number of boundaries have been defined by agreements.

Headquarters Appointments

Chief of the Naval Staff:
Amiral Pierre-François Forissier
Inspector General of the Armies:
Amiral Christian Penillard
Director of Personnel:
Vice-Amiral Benoît Chomel de Jamieau
Major General of the Navy:
Vice-Amiral d'Escadre Alain Launay
Inspector General of the Navy:
Commissaire Général Jean Fillon

Senior Appointments

C-in-C Atlantic Theatre (CECLANT):
Vice-Amiral d'Escadre Anne-François de Bourdoncle de Saint Salvy
C-in-C Mediterranean Theatre (CECMED):
Vice-Amiral d'Escadre Jean Tandonnet
Flag Officer, French Forces Polynesia (ALPACI):
Contre-Amiral Jean-Louis Vichot
Flag Officer, Naval Forces Indian Ocean (ALINDIEN):
Vice-Amiral Gérard Valin
Flag Officer, Antilles:
Contre-Amiral Philippe Arnould
Flag Officer, Cherbourg:
Vice-Amiral Philippe Périsset
Flag Officer, Submarines (ALFOST):
Vice-Amiral d'Escadre Jean François Baud
Flag Officer, Naval Action Force (ALFAN):
Vice-Amiral d'Escadre Bertrand Ambriot
Deputy Flag Officer, Naval Action Force (TOULON):
Contre-Amiral Alain Hinden
Deputy Flag Officer, Naval Action Force (BREST):
Contre-Amiral Pierre Labonne
Flag Officer Naval Aviation (ALAVIA):
Vice-Amiral Olivier de Rostolan
Flag Officer Lorient and Commandant Mannes (Alfusca):
Contre-Amiral Marin Gillier

Notes: (1) In addition to the following squadrons, there are three other squadrons operating with mixed Air Force and Navy crews on behalf of both services
• Helicopter Squadron EH-1/67 "Pyrénées", based at Cazaux AFB, for the combat SAR (CSAR) role, operating eight specialised Aerospatiale SA-330 Puma helicopters and four Eurocopter EC 725 R2 Cougar Mk 2 Plus Resco delivered in 2005-06. These helicopters regularly embark on *Charles de Gaulle*.

Embarked Squadrons

Base/Squadron No	Aircraft	Task
Lann Bihoué/4F	E-2C Hawkeye	AEW
Landivisiau/11F	Super Etendard	Assault, Recce
Landivisiau/12F	Rafale M	Air Defence

Diplomatic Representation

Defence Attaché in London:
Vice-Amiral Yann Tainguy
Naval Attaché in London:
Capitaine de Vaisseau Henri-François Piot
Naval Attaché in Washington:
Capitaine de Vaisseau Bruno Demeocq
Defence and Naval Attaché in Riyadh:
Capitaine de Vaisseau Bruno Thorne
Head of French Military Delegation to the European Union:
to be announced
Head of French Military Mission to HQ SACT:
Contre-Amiral Christian Canova
Head of French Military Mission to Joint Force Command Naples:
to be announced
Naval Attaché in Washington:
Capitaine de Vaisseau Philippe Atquier

Personnel

(a) 2009 38,713 (4,508 officers)
(b) 2009: civilians in direct support: 7,368

Bases

Brest: Main Atlantic base. SSBN base
Toulon: Mediterranean Command base
Cherbourg: Channel base
Bayonne: Landes firing range
Small bases at Papeete (Tahiti), Fort-de-France (Martinique), Nouméa (New Caledonia), Degrad-des-Cannes (French Guiana), Port-des-Garets (La Réunion), Dekar-Cap Vert (Senegal) and Abu Dhabi

Shipyards (Naval)

All former naval shipbuilding facilities are privatised and are operated by DCNS. Main facilities are at: Cherbourg. Submarines and Fast Attack Craft (private shipyard)
Brest: Major warships and refitting
Lorient: Destroyers and Frigates, MCMVs, Patrol Craft
Toulon: Major refits.

Dates

Armement pour essais: After launching when the ship is sufficiently advanced to allow a crew to live on board, and the commanding officer has joined. From this date the ship hoists the French flag and is ready to undertake her first harbour trials.
Armement définitif: On this date the ship has received her full complement and is able to undergo sea trials.
Clôture d'armement: Trials are completed and the ship is now able to undertake her first endurance cruise.
Croisière de longue durée et traversée de longue durée: The endurance cruise follows the *clôture d'armement*

Fleet Air Arm Bases

• Army special operations helicopter flight EOS 3 based at Pau, equipped with Aerospatiale AS 532 Cougar helicopters to be replaced from 2006 by eight new Eurocopter EC 725 R2 Cougar Mk 2 Plus HUS. Roles include counter-terrorism and they can embark on *Charles de Gaulle*, LSDs and eventually on La Fayette and Florée-class frigates
• Training Squadron EAT-319, based at Avord AFB, with Embraer 121 Xingu light transport (some coming from the Navy) for pilot basic training.

and lasts until the ship is accepted with all systems fully operational.

Admission au service actif: Commissioning date

Reserve

A ship in 'Reserve Normale' has no complement but is available at short notice. 'Reserve Speciale' means that a refit will be required before the ship can go to sea again. 'Condemnation' is the state before being broken up or sold, at this stage a Q number is allocated.

Prefix to Ships' Names

FS is used in NATO communications but is not official

FAN = Force d'Action Navale (HQ at Toulon). All surface ships based at Toulon, Brest or overseas.
FOST = Force Océanique Stratégique (HQ at Brest). SSBNs based at l'Île Longue near Brest. All SSNs based at Toulon.
GM = Gendarmerie Maritime

*Plus one or two DDG/DDH/FFG regularly deployed from Toulon

**Patrol forces include vessels manned by the Navy and major craft from the Gendarmerie Maritime

6 RUBIS AMÉTHYSTE CLASS (SSN/SNA)

Name	No	Builders	Laid down	Launched	Commissioned
RUBIS	S 601	Cherbourg Naval Dockyard	11 Dec 1976	7 July 1979	23 Feb 1983
SAPHIR	S 602	Cherbourg Naval Dockyard	1 Sep 1979	1 Sep 1981	6 July 1984
CASABIANCA	S 603	Cherbourg Naval Dockyard	19 Sep 1981	22 Dec 1984	21 Apr 1987
ÉMERAUDE	S 604	Cherbourg Naval Dockyard	4 Mar 1983	12 Apr 1986	15 Sep 1988
AMÉTHYSTE	S 605	Cherbourg Naval Dockyard	31 Oct 1984	14 May 1988	3 Mar 1992
PERLE	S 606	Cherbourg Naval Dockyard	27 Mar 1987	22 Sep 1990	7 July 1993

Displacement, tons: 2,410 surfaced, 2,670 dived

Dimensions, feet (metres): 241.5 x 24.9 x 21
(73.5 x 7.6 x 6.4)

Main machinery: Nuclear; turbo-electric; 1 PWR CAS 48, 48 MW; 2 turbo-alternators; 1 motor; 9,500 hp(m) (7 MW); SEMT-Pielstick/Juermont Schneider 8 PA4 V 185 SM diesel-electric auxiliary propulsion; 450 kW; 1 emergency motor; 1 pump jet propulsor

Speed, knots: 25

Complement: 68 (8 officers) (2 crews)

Missiles: SSM. Aerospatiale SM 39 Exocet; launched from 21 in (533 mm) torpedo tubes; inertial cruise, active radar homing to 50 km (27 n miles) at 0.9 Mach; warhead 165 kg.

Torpedoes: 4—21 in (533 mm) tubes. ECAN F17 Mod 2; wire-guided; active/passive homing to 20 km (10.8 n miles) at 40 kt; warhead 250 kg; depth 600 m (1,970 ft). Total of 14 torpedoes and missiles carried in a mixed load.

Mines: Up to 32 FG 29 in lieu of torpedoes.

Countermeasures. ESM Thomson-CSF ARUR 13/DR 3000U, intercept.

Combat data systems: TIT (Traitement des Informations Tactiques) data system (to be replaced by TITLAT); OPSMER command support system; Syracuse 2 SATCOM. Link 11 (receive only).

Weapons control: LAT (Lancement des Armes Tactiques) system (to be combined with TIT as TITLAT).

Radars: Navigation: 1 Thomson-CSF DRUA-33A; I-band; 1 Kelvin Hughes 1007, I-band.

Sonars: Thomson Sintra DMUX 20 multifunction; passive search; low frequency.

DSUV 62C; towed passive array; very low frequency.

DSUV 22 (Saphir); listening suite.

DUUG 7A sonar intercept.

Programmes: The programme was terminated early by defence economies with the seventh of class *Turquoise* and eighth of class *Diamant* being cancelled.

Modernisation: Between 1989 and 1995 the first four of this class converted under operation Amethyste (AMÉlioration

RUBIS

8/2008*, B Prézélin / 1335766

Tactique HYdrodynamique Silence Transmission Ecoute) to bring them to the same standard of ASW (included new sonars) efficiency as *Amethyste* and *Perle* rather than that required for the original anti-surface ship role. Two F17 torpedoes can be guided simultaneously against separate targets. *Saphir* recommissioned 1 July 1991, *Rubis* in February 1993; *Casabianca* in June 1994 and *Émeraude* in March 1996. A new radar added on a telescopic mast. A modernisation programme began in 2004. Upgrades include improvements to the tactical system (TITLAT programme) installation of a pump jet propulsor and a new ESM suite. The installation of new reactor cores in two boats, to extend life, is under consideration.

Structure: Diving depth, greater than 300 m (984 ft). There has been a marked reduction in the size of the reactor compared with the *L'Inflexible* class. On completion of

the modernisation programme, all six of the class are virtually identical.

Operational: All operational SSNs are assigned to Escadrille des Sous-Marins nucléaires d'attaque (ESNA) based at Toulon but frequently deploy to the Atlantic or overseas. Endurance rated at 45 days, limited by amount of food carried. *Rubis* had an underwater collision on 30 March 2007. Repairs at Brest were completed in July 2008. *Émeraude* had a bad steam leak on 30 March 1994 which caused casualties amongst the crew. *Saphir* undertook a refit/refuel in September 2000 following reactor problems. The submarine returned to service in late 2001. Modernisation refits completed for *Amethyste* (January 2006). *Saphir* was refitted 2006–07. Service life of all boats extended to 35 years. To be replaced by the Suffren class from 2017.

Strategic Missile Submarines

3 + 1 LETRIOMPHANT CLASS (SSBN/SNLE-NG)

Name	No	Builders	Laid down	Launched	Commissioned
LE TRIOMPHANT	S 616	DCN, Cherbourg	9 June 1989	13 July 1993	21 Mar 1997
LE TÉMÉRAIRE	S 617	DCN, Cherbourg	18 Dec 1993	8 Aug 1997	23 Dec 1999
LE VIGILANT	S 618	DCN, Cherbourg	1997	12 Apr 2003	26 Nov 2004
LE TERRIBLE	S 619	DCN, Cherbourg	Nov 2002	21 Mar 2008	July 2010

Displacement, tons: 12,640 surfaced; 14,335 dived
Dimensions, feet (metres): 453 x 41; 55.8 (aft planes) x 41 (138 x 12.5; 17 x 12.5)

Main machinery: Nuclear; turbo-electric; 1 PWR Type K15 (enlarged CAS 48); 150 MW; 2 turbo-alternators; 1 motor; 41,500 hp (m) (30.5 MW); diesel-electric auxiliary propulsion; 2 SEMT-Pielstick 8 PA4 V 200 SM diesels, 300 kW; 1 emergency motor; 1 shaft; pump jet propulsor

Speed, knots: 25 dived

Complement: 111 (15 officers) (2 crews)

Missiles: SLBM: 16 Aerospatiale M45/TN 75; 3-stage solid fuel rockets; inertial guidance to 6,000 km (3,240 n miles); thermonuclear warhead with 6 MRV each of 100 KT. To be replaced by M51.1/TN 75 which has a planned range of 9,000 km (4,860 n miles) and 6 MRVs (to be fitted first in S 619 in 2010) and from 2015 by M51.2 (to be fitted first in S 618) with the new TNO (Tête Nucléaire Oceanique) warhead

SSM: Aerospatiale SM 39 Exocet; launched from 21 in (533 mm) torpedo tubes; inertial cruise; active radar homing to 50 km (27 n miles) at 0.9 Mach; warhead 165 kg.

Torpedoes: 4–21 in (533 mm) tubes, ECAN L5 Mod 3, dual purpose; active/passive homing to 9.5 km (5.1 n miles) at 35 kt; warhead 150 kg; depth to 550 m (1,800 ft); total of 18 torpedoes and SSM carried in a mixed load

Countermeasures: ESM: Thomson-CSF ARUR 13/DR 3000U; intercept.

Weapons control: SAD (Système d'Armes de Dissuasion) strategic data system (for SLBMs) SAD M51 will be fitted in S 619; SAT (Système d'Armes Tactique) tactical data system and DLA 4A weapon control system (for SSM and torpedoes) SYCOBS to be fitted in S 619

Raders: Search; Dassault, I-band.

Sonars: Thomson Sintra DMUX 80 'multifunction' passive bow and flank arrays (S 616-618). Thales UMS 300 (S 619) comprising bow, flank and towed arrays. DUUX 5; passive ranging and intercept; low frequency. DSUV 61 (S 616-618), towed array; very low frequency.

Programmes: *Le Triomphant* ordered 10 March 1986. *Le Téméraire* ordered 18 October 1989. *Le Vigilant* ordered 27 May 1993. *Le Terrible* ordered 28 July 2000. Class of six originally planned, but reduced to four

LE VIGILANT

7/2008*, B Prézélin / 1335768

after the end of the Cold War *Sous-marins Nucléaires Lanceurs d'Engins-Nouvelle Génération* (SNLE-NG).

Modernisation: Development of the M5 missile discontinued in favour of the less expensive M51 which is planned to equip S 619 (M 51.1) in 2010 and the first three submarines between 2010 and 2015. *Le Vigilant* first to be fitted 2010–11. Three batches of M 51 missiles ordered by 2008. Warhead TN O on (M 51.2) is to replace TN 75 (on M 51.1) by 2015.

Structure: Built of HLES 100 steel capable of withstanding pressures of more than 100 kg/mm². Diving depth 500 m (1,640 ft). Height from keel to top of fin is 21.3 m (69.9 ft). Plans to lengthen the hull in later ships of the class have been shelved

Operational: First sea cruise of *Le Triomphant* 16 July to 22 August 1995. First submerged M45 launch on

14 February 1995, second on 19 September 1996. *Le Triomphant* completed 30 month refit in April 2005 and conducted test launch of M45 missile on 2 February 2005. *Le Triomphant* is to undergo her second refit, including conversion to fire the M 51 missile, in 2012. *Le Téméraire* official trials started April 1998, first submerged M 45 launch 4 May 1999. *Le Téméraire* completed 22-month refit in October 2007. *Le Vigilant* is to be refitted, including M 51 conversion, in 2010 following the commissioning of *Le Terrible*. The first underwater test launch of the M 51.1 missile is to be conducted from *Le Terrible* in 2009, following ten land-based tests the first of which was made on 9 November 2008. An underwater launch from a submerged caisson was conducted on 13 November 2008. All submarines based at Ile Longue, Brest.

LE TRIOMPHANT

AIRCRAFT CARRIERS

0 + (1) FUTURE AIRCRAFT CARRIER CLASS (CV)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	Aker Shipyards, St Nazaire	2013	2015	2018

Displacement, tons: 70,000 full load
Dimensions, feet (metres): 928.5 × 127.8 × 37.7
 (283.0 × 39.0 × 11.5)
Flight deck, feet (metres): 928.5 × 256.9 (283.0 × 78.0)
Main machinery: Integrated Full Electric Propulsion; 2 Rolls Royce MT 30 gas turbine alternators; 4 electric motors
Speed, knots: 26
Range, n miles: 10,000 at 25 kt
Complement: 900 approx plus 620 aircrew plus further 100

Missiles: SAM: ASTER 15.
Guns: To be announced
Countermeasures: To be announced
Combat data systems: Link 11, Link 16, Link 22 and JSAT datalinks; Syracuse 3 SATCOM
Electro-optic systems: To be announced.
Radars: Air search: To be announced
 Surface search: To be announced
 Navigation: To be announced.
 Fire control: To be announced
 Tacan: To be announced.

Fixed-wing aircraft: Up to 40. A typical mix might include 32 Rafale M, three E-2C Hawkeye and 5 NH-90 helicopters.
Helicopters: Up to five NH 90.

Programmes: A second aircraft carrier (PA2) was planned under the 2003-08 Defence Programming Law but, according to the 2009-14 Defence Programming Law,

PA 2

8/2006, MO-PA2 / 1167147

a decision to proceed with construction is not expected until 2011-2012. It was announced on 13 February 2004 that the ship was to be built in co-operation with the UK carrier programme and DCN and Thales established a joint venture company, MO PA2 to manage the project at industry level. Studies in 2005 concluded that the British CVF design could be adapted and a contract for a preliminary definition study, based on CVF, was awarded to MO PA2 on 12 December 2005. Chantiers de l'Atlantique and EADS also took part in the work. Formal agreement to share design costs reached between

French and UK governments on 24 January 2006 and an MoU was signed on 6 March 2006. The construction timetable is speculative.

Structure: The CVF-FR, has been adapted from the UK CVF design. The main differences between UK CVF and CVF-FR are the requirement to install two 90 m C-13 steam catapults and a four-wire arrestor system, the installation of national combat and data and weapons systems and facilities for the storage of nuclear weapons. A potential requirement to incorporate nuclear propulsion is also being studied.

PA 2

8/2006, MO-PA2 / 1167148

PA 2

8/2006, MO-PA2 / 1167146

1 CHARLES DE GAULLE CLASS (CVNM/PAN)

Name	No	Builders	Laid down	Launched	Commissioned
CHARLES DE GAULLE	R 91	DCN, Brest	14 Apr 1989	7 May 1994	18 May 2001

Displacement, tons: 37,085 standard; 42,500 full load
Dimensions, feet (metres): 857.7 oa; 780.8 wl x 211.3 oa;
 103.3 wl x 30.9 (261.5; 238 x 64.4; 31.5 x 9.4)
Flight deck, feet (metres): 857.7 x 211.3 (261.5 x 64.4)
Main machinery: Nuclear; 2 PWR Type K15, 300 MW; 2 GEC
 Alsthom turbines; 83,000 hp(m) (81 MW) sustained;
 2 shafts
Speed, knots: 27
Complement: 1,256 ship's company (94 officers) plus 610
 aircrew plus 42 flag staff (accommodation for 1,950)
 (plus temporary 800 menmes)

Missiles: SAM: EUROSAM SAAM/F system with 4 (2 port,
 2 starboard) DCN Sylver A43 octuple VLS launchers ●;
 MBDA ASTER 15; inertial guidance and mid-course update;
 active radar homing at 3 Mach to 30 km (16.2 n miles);
 warhead 13 kg, 32 weapons.
 2 Matra Sadral PDMS sextuple launchers ●; Mistral; IR
 homing to 4 km (2.2 n miles); warhead 3 kg; anti-sea-skimmer;
 able to engage targets down to 10 ft above sea level.

Guns: 4 Giat 20F2 20 mm; 720 rds/min to 8 km (4.3 n miles);
 weight of shell, 0.25 kg
Countermeasures: Decoys: 4 CSEE Sagale AMBL-2A
 10-barrelled trainable launchers ●; medium range; chaff to
 8 km (4.3 n miles); IR flares to 3 km (1.6 n miles). Dassault
 LAD offboard decoys. SLAT torpedo decoys from 2006.

ESM: Thomson-CSF ARBR 21; intercept. 1 DIBV 2A Vampir
 MB; (IRST) ●
ECM: 2 ARBB 33B ●, jammers.

Combat data systems: SENIT 8; Links 11, 14 and 16.
 Syracuse 3 and FLEETSATCOM ●. AIDCOMER and
 MCCIS command support systems.

Electro-optic systems: 2 DIBC 2A (Sagem VIGY-105)
 optronic directors.

Radars: Air search: Thomson-CSF DRBJ 11B ●; 3D; E/F-
 band; range 366 km (200 n miles) for aircraft.
 Thales DRBV 26D Jupiter ●; D-band; range 183 km
 (100 n miles) for 2 m² target.

Air/surface search: Thomson-CSF DRBV 15C Sea Tiger
 Mk 2 ●; E/F-band; range 110 km (60 n miles) for 2 m²
 target

Navigation: 2 Racal 1229 (DRBN 34A) ● I-band
Fire control: Thomson-CSF Arabel 3D ●; I/J-band (for
 SAAM); range 70 km (38 n miles) for 2 m² target
Tacan: NRBP 20A ●

Sonars: SLAT torpedo attack warning.
Fixed-wing aircraft: 20 Super Étendard, 2 E-2C Hawkeye.
 12 Rafale F2 and F3

Helicopters: 2 AS 565 Panther or 2 AS 322 Cougar (AF) or
 2 Super Frelon plus 2 Dauphin SAR.

Programmes: On 23 September 1980 the Defence Council
 decided to build two nuclear-propelled carriers to
 replace *Clemenceau* in 1996 and *Foch* some years later.
 First of class ordered 4 February 1986, first metal cut
 24 November 1987. Hull floated for technical trials on
 19 December 1992, and back in dock on 8 January 1993.
 A 19.8 m (65 ft) long one-twelfth scale model was used
 for hydrodynamic trials. Building programme delayed
 three years due to defence budget cuts.

Modernisation: From October 1999 to March 2000
 modifications included additional radiation shielding,
 and lengthening of angled flight deck by 4.4 m. A 43
 launchers to be replaced by A 50 (for ASTER 15 and
 ASTER 30) in due course. During her IPER 2007-08,
 she was fitted with new propellers, Syracuse 3 Satcom,
 and modifications to operate Rafale F2 and F3. The next
 IPER is planned 2016-17.

CHARLES DE GAULLE

6/2005, Per Körnefeldt / 1153174

CHARLES DE GAULLE

6/2005, B Sullivan / 1153175

Structure: Two lifts 62.3 x 41 ft (19 x 12.5 m) of 36 tons
 capacity. Hangar for 20-25 aircraft; dimensions
 454.4 x 96.5 x 20 ft (138.5 x 29.4 x 6.1 m). Angled deck
 8.5° and 655.7 ft (200 m) overall length. Catapults: 2 USN
 Type C13-3; length 246 ft (75 m) for Super Étendards
 and up to 23 tonne aircraft. Enhanced weight capability
 of flight deck to allow operation of AEW aircraft. Island
 placed well forward so that both lifts can be protected
 from the weather. CSEE Dallas (Deck Approach and
 Landing Laser System) fitted, later to be replaced by
 MLS system. Active fin stabilisers. Bunkerage of 3,000
 cum of avgas and 1,500 cum diesel.

Operational: Seven years continuous steaming at
 26 kt available before refueling (same steaming as
Le Triomphant). Both reactors self sustaining by 10 June
 1998. Sea trials started 26 January 1999 and continued
 until 9 November 2000 when a large section of the port
 propeller was lost while steaming at high speed. Trials
 resumed on 26 March 2001 with spare propellers from
 decommissioned *Clemenceau*. A 15-month refuel/refit
 (IPER) at Toulon was completed in November 2008.
 Based at Toulon.

HELICOPTER CARRIERS

1 JEANNE D'ARC CLASS (CVHG)

Name	No	Builders	Laid down	Launched	Commissioned
JEANNE D'ARC (ex-La Résolue)	R 97	Brest Naval Dockyard	7 July 1960	30 Sep 1961	16 July 1964

Displacement, tons: 10,575 standard; 13,270 full load
Dimensions, feet (metres): 597.1 × 78.7 hull × 24.6 (182 × 24 × 7.5)
Flight deck, feet (metres): 203.4 × 68.9 (62 × 21)
Main machinery: 4 boilers; 640 psi (45 kg/cm²); 840°F (450°C); 2 Ratcau-Bretagne turbines; 40,000 hp(m) (29.4 MW); 2 shafts
Speed, knots: 26.5
Range, n miles: 6,500 at 16 kt
Complement: 506 (33 officers) plus 13 instructors and 150 cadets

Missiles: SSM: 8 Aerospatiale MM 38 Exocet (2 triple) ●, inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
Guns: 2 DCN 3.9 in (100 mm)/55 Mod 53 CADAM automatic ●; 60 rds/min to 17 km (9 n miles) anti-surface; 8 km (4.4 n miles) anti-aircraft; weight of shell 13.5 kg, 4–12.7 mm MGs.

Countermeasures: Decoys: 2 CSEE/VSEL Syllex 8-barrelled trainable launchers for chaff (may not be fitted), 1 AN/SQJ-25A Nixie torpedo decoy.
ESM: Thomson-CSF ARBR 16/ARBX 10; Intercept.
Combat data systems: ACOM/OPSMER command support system; Link 11 (receive only); SATCOM, INMARSAT
Weapons control: 2 CT Analogical; 2 Sagem DMAe optical sights SATCOM ●.

Radars: Air search: Thomson-CSF DRBV 22D ●; D-band; range 366 km (200 n miles).
 Air/surface search, DRBV 51 ●; G-band.
 Navigation 2 DRBN 34A (Racal-Decca); I-band.
 Fire control: 2 (+1 unused) Thomson-CSF DRBC 32A; I band

Tacan, SRN 6.
Sonars: Thomson Sintra DUBV 24C; hull-mounted; active search; medium frequency; 5 kHz.

Helicopters: 2 Pumas and 2 Gazelles from the Army and 3 Navy Alouette III for annual training cruises. Up to 8 Super Frelon or 10 mixed heavy/light aircraft in war time.

Modernisation: Refits during 1989–90 extended ship life by about 20 years. SENIT 2 combat data system was to have been fitted but this was cancelled as a cost-saving measure. Extensive propulsion machinery repairs were conducted 1997–98. Two 100 mm guns were removed from quarterdeck in 2000. A life-extension refit was undertaken in 2006. A new SATCOM radome was installed in a radome aft of the funnel.

Structure: Flight deck lift has a capacity of 12 tons. Some of the hanger space is used to accommodate officers under training. The ship is almost entirely air conditioned. Carries two LCVPs. Topmast can be removed for passing under bridges or other obstructions.

Operational: Based at Brest and used for training officer cadets. After rapid modification, she could be used as a commando ship, helicopter carrier or troop transport

JEANNE D'ARC

(Scale 1 : 1,500), Ian Sturton / 116/436

JEANNE D'ARC

11/2007, B Prézelin / 1305055

with commando equipment and a battalion of 700 men. Flagship of the Training Squadron for an Autumn/Spring cruise with Summer refit. Army helicopters Super Puma/Cougar and Gazelle are embarked during training cruises. Service life has been extended to at

least 2010. She is not likely to be replaced in her training role by a new or chartered ship and, in future, a training squadron, based on an LHD/BPC, may occasionally be constituted

DESTROYERS

1 + 1 FORBIN (HORIZON) CLASS (DDGGM)

Name	No	Builders	Laid down	Launched	Commissioned
FORBIN	D 620	DCN, Lorient	16 Jan 2004	10 Mar 2005	June 2009
CHEVALIER PAUL	D 621	DCN, Lorient	13 Jan 2005	12 July 2006	Dec 2009

Displacement, tons: 5,700 standard; 7,050 full load
Dimensions, feet (metres): 501.6 oa; 464.9 wl x 66.6 x 26.2 (152.9; 141.7 x 20.3 x 8.0)
Main machinery: CODOG: 2 Fiat/GE LM 2500 gas turbines; 63,030 hp (47 MW); 2 SEMT-Pielstick 12PA 6STC; 11,700 hp(m) (9.4MW); 2 shafts; cp props, bow thruster (550 kW)
Speed, knots: 31 (18 on diesels)
Range, n miles: 7,000 at 18 kt
Complement: 195 (27 officers)

Missiles: SSM: 8 MBDA Exocet MM 40 Block 3; inertial cruise; active radar homing to 180 km (97 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
SAM: EUROPAAMS PAAMS with DCN Sylver A50 VLS for Acrospatiale Matra Aster 15 (16 missiles) and Aster 30 (32 missiles); 48 cells (six octuple launcher modules); inertial guidance, mid-course update and active homing; range (Aster 15) 30 km (16.2 n miles) at 3 Mach; (Aster 30) 100 km (54 n miles) at 4.5 Mach
 1 MBDA Tetra quadruple launcher (fitted for but not with) for Mistral SR SAMs, IR homing to 6 km; warhead 3 kg; anti-sea-skimmer; able to engage targets down to 10 ft above sea level

Guns: 2 OTO Melara 76 mm/62 Super Rapid; 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg. 2 Giat 20F2 20 mm; 720 rds/min to 2 km.
Torpedoes: 2 EURTORP TLS 324 mm fixed launchers. Up to 24 Eurotorp Mu 90 Impact torpedoes; active/passive homing to 25 km (13.5 n miles) at 29 kt or 12 km (6.5 n miles) at 50 kt; warhead 32 kg.

Countermeasures: SIGEN EW suite comprising 2 EADS NGDS multifunction decoy launchers, radar warning equipment, a high-power jammer and an ESM/ECM support aid SLAT torpedo defence system.

Combat data systems: EUROSYSNAV; 2 Link 11 (Link 22 in the future) and Link 16; OPSMER or SIC 21 follow-on command support system; Syracuse 3 SATCOM

Electro-optic systems: Sagem Vampir optronic director
Radars: Air/surface search: Thales/Marconi DRBV 27 (S 1850M) Astral; D-band.
 Surveillance/fire control: Alenia Marconi EMPAR; G-band; multifunction
 Surface search: 2 SPN 753 I-band
 Fire control: Alenia Marconi NA 25; J-band.

Sonars: Thales TUS-WASS 4110CL, hull-mounted; active search and attack; medium frequency.

Helicopters: 1 NH1 NH90

FORBIN

(Scale 1 : 1,200), Ian Sturton / 16743/

FORBIN

6/2007, B Prézelin / 130505/

Programmes: Classified as 'Frigates de défense aérienne' (FDA). Initially a three-nation project with Italy and UK. Joint project office established in 1993. After UK withdraw in April 1999, an agreement was signed on 7 September 1999 between France and Italy to continue. Following a French/Italian MoU on 22 September 2000 to build four destroyers, the French government ordered two ships to be built by DCN Lorient and delivered in December 2006 and April 2008. They are planned to replace *Suffren* and *Duquesne*. Plans to build a second

pair of ships, to replace *Cassard* and *Jean Bart*, have been shelved in favour of two AAW variants of the FREMM design.

Structure: Details given are subject to change. Space available for two additional missile launcher modules, possibly with Sylver A70 VLS.

Operational: Sea trials for *Forbin* started in July 2006 and for *Chevalier Paul* on 15 October 2007. Commissioning has been delayed by integration of the combat management system and PAAMS. Both based at Toulon.

CHEVALIER PAUL

6/2008, B Prézelin / 1335763

6/2008, Cor Van Nierkerken / 1335175

2 CASSARD CLASS (TYPE F 70 (A/A)) (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
CASSARD	D 614	Lorient Naval Dockyard	3 Sep 1982	6 Feb 1985	28 July 1988
JEAN BART	D 615	Lorient Naval Dockyard	12 Mar 1986	19 Mar 1988	21 Sep 1991

Displacement, tons: 4,230 standard; 5,000 full load
 Dimensions, feet (metres): 455.9 x 45.9 x 21.3 (sonar)
 (139 x 14.0 x 6.5)
 Main machinery: 4 SEMT-Pielstick 18 PA6V 280 BTC diesels,
 43,200 hp(m) (31.75 MW) sustained; 2 shafts
 Speed, knots: 29.5
 Range, n miles: 8,000 at 17 kt.
 Complement: 250 (25 officers) accommodation for 253

Missiles: SSM: 8 (4 carried in peacetime) Aerospatiale
 MM 40 Exocet Block 2 ●; inertial cruise; active radar
 homing to 70 km (40 n miles) at 0.9 Mach; warhead
 165 kg; sea-skimmer.
 SAM: 40 GDC Pomona Standard SM-1MR Block VI; semi-
 active radar homing to 38 km (20.5 n miles) at 2 Mach;
 height envelope 45-18,288 m (150-60,000 ft). Mk 13 Mod 5
 launchers ● taken from T 47 (DDG) ships
 2 Matra Sadral PDMS sextuple launchers ●; 39 Mistral;
 IR homing to 4 km (2.2 n miles); warhead 3 kg; anti-sea-
 skimmer; able to engage targets down to 10 ft above sea
 level.
 Guns: 1 DCN/Creusot-Loire 3.9 in (100 mm)/55 Mod 68
 CADAM automatic ●; 78 rds/min to 17 km (9 n miles)
 anti-surface; 8 km (4.4 n miles) anti-aircraft; weight of
 shell 13.5 kg.
 2 Giat 20F2 20 mm ●; 720 rds/min to 2 km (1.1 n miles).
 4-12.7 mm MGs.
 Torpedoes: 2 fixed launchers model KD 59E ●. 10 ECAN L5
 Mod 4; anti-submarine; active/passive homing to 9.5 km
 (5.1 n miles) at 35 kt; warhead 150 kg; depth to 550 m
 (1,800 ft).
 Countermeasures: Decoys: 2 CSEE AMBL 1B Dageis ● and
 2 AMBL 2A (D 614) or 2B (D 615) Sageis 10-barrelled
 trainable launchers ●; fires a combination of chaff and IR
 flares. Dassault LAD offboard decoys.
 ESM: Thomson-CSF ARBR 17B (DR 4000) ●; radar intercept.
 DIBV 1A Vampire ●; IR detector (integrated with search
 radar for active/passive tracking in all weathers). ARBG-1A
 (Saigon) comms intercept at masthead.

CASSARD

(Scale 1 : 1,200), Ian Sturton / 0569909

ECM: 2 Dassault Electronique ARBB 33; jammers; H-, I- and
 J-bands.
 Torpedo defence: SLQ-25A Nixie
 Combat data systems: SENIT 0/8; Links 11, 14 and 16.
 Syracuse 2 SATCOM ●. OPSMER command support
 system
 Electro-optic systems: DCN CTMS optronic/radar system
 with DIBC 1A Piranha II IR/TV tracker; CSEE Najir optronic
 secondary director.
 Radars: Air search: Thomson-CSF DRBJ 11B ●; 3D;
 E/F-band; range 366 km (200 n miles)
 Air/surface search Thomson-CSF DRBV 26C ●; D-band
 Navigation 2 Racal DRBN 34A, I-band (1 for close-range
 helicopter control ●)
 Fire control: Thomson-CSF DRBC 33A ●; I-band (for guns).
 2 Raytheon SPG-51C ●; G/I-band (for missiles).
 Sonars: Thomson Sintra DUBA 25A (13 kHz) (D 614); DUBA
 24C (5 kHz) (D 615); hull-mounted; active search and
 attack; medium frequency.
 Helicopters: 1 AS 565SA Panther ●

Programmes: The building programme was considerably
 slowed down by finance problems and doubts about
 the increasingly obsolescent Standard SM 1 missile
 system and was curtailed at two units. Re-rated F 70
 (ex-C 70) on 6 June 1988, officially 'frégates anti-aériennes
 (FAA)'.
 Modernisation: DRBJ 15 radar initially fitted in Cassard but
 this was replaced in 1992 by DRBJ 11. Panther has replaced
 Lynx helicopter. Cassard refitted 2000-2001. Upgrade
 included hull strengthening, fitting of new propellers
 and SENIT 08 combat direction system (SENIT 8
 core augmented by SENIT 8 data-link processing
 component (for Link 16 and data forwarding). Jean Bart
 similarly refitted October 2002 to September 2003. Plans
 to fit ASTER 30 have been abandoned.
 Structure: Samaha 210 helicopter handling system.
 Operational: Helicopter used for third party targeting for
 the SSM. Both ships are based at Toulon. Service lives:
 Cassard, 2018; Jean Bart, 2021. To be replaced by FRED A
 (AAW variants of FREMM) rather than by a second batch
 of Forbin class.

MONTCALM	D 642	Brest Naval Dockyard	5 Dec 1975	31 May 1980	28 May 1982
JEAN DE VIENNE	D 643	Brest Naval Dockyard	26 Oct 1979	17 Nov 1981	25 May 1984

Displacement, tons: 3,880 standard; 4,830 full load
 Dimensions, feet (metres): 455.9 x 45.9 x 19.35
 (139 x 14 x 5.9)

Main machinery: CODOG; 2 RR Olympus TM3B gas turbines; 52,000 hp (38.2 MW) sustained; 2 SEMT-Pielstick 16 PA6 V280 diesels; 11,200 hp(m) (8.3 MW) sustained; 2 shafts; LIPS cp props

Speed, knots: 30; 20 on diesels

Range, n miles: 8,000 at 15 kt on diesels, 2,500 at 28 kt

Complement: 235 (22 officers) (D 641-643), 183 (18 officers) plus 36 cadets (D 640)

Missiles: SSM 4 MBDA Exocet MM 38 (D 640 and D 641) or 8 Exocet MM 40 (D 642 and D 643) ●; inertial cruise, active radar homing to 42 km (23 n miles) (MM 38) or 70 km (40 n miles) (MM 40) at 0.9 Mach; warhead 165 kg, sea-skimmer. 4 additional Exocet MM 40 missiles can be carried as a warload (D 642 and D 643)

SAM Thomson-CSF Crotale Naval EDIR octuple launcher ●; command line of sight guidance; radar/IR homing to 13 km (7 n miles) at 2.4 Mach; warhead 14 kg; 26 missiles. 2 Matra Sadral sextuple launchers (D 641-643) or 2 MBDA Simbad twin launchers (D 640) for Mistral SR SAMs, IR homing to 6 km (3.2 n miles); warhead 3 kg

Guns: 1 DCN/Creusot-Loire 3.9 in (100 mm)/55 Mod 68 CADAM automatic ●; dual purpose; 78 rds/min to 17 km (9 n miles) anti-surfaces; 8 km (4.4 n miles) anti-aircraft; weight of shell 13.5 kg. 2 Breda/Mauser 30 mm (D 641-643) ●. 800 rds/min to 3 km; weight of shell 0.37 kg. 2 (D 641-643) or 4 (D 640) M2HB 12.7 mm MGs.

Torpedoes: 2 DCN KD-59E fixed tubes for 533 mm (21 in) DCN LS Mod 4 torpedoes; active/passive homing to 7 km (3.8 n miles); 8 to 10 torpedoes. Honeywell Mk 46 mod 2 or EuroTorp MU 90 Impact lightweight torpedoes for helicopters (D 641-643)

Countermeasures: Decoys: CSEE/VSEL Syllex (D 640); two 8-barrel trainable launchers. EADS AMBL-1C (Dagale Mk 2) (D 641-643) ●; 2 10-barrel trainable launchers; chaff and IR flares. 4 AMBL-3A (Replica) (D 641-643), offboard decoys.

ESM: Thomson-CSF ARBR-10X and ARBR-168 (DR 2000) or (D 643) ARBR-17 (DR 4000) ● radar intercept; Sagem DIBV-2A (Vampir MB) IRST (D 641-643)

ECM Dassault Electronique ARBB-32B (D 640) or Thales ARBB-36A (D 641-643) jammer. Torpedo defence: AN/SLQ-25A Nixie (2 towed decoys); Prairie-Masker noise suppression system.

Combat data systems: DCN SENT 4 CDS and (D 641-643) STDAV/SENT 8-01 added for anti-air/anti-missile defence; Link 11. ACOM/Opmsm command support system. Syracuse ● and Inmarsat satcomms

DUPLEIX (Scale 1 : 1,200), Ian Sturton / 0581/95

Electro-optic systems: Thomson-CSF CTH (Vega) radar/optronic FCS and CSEE DM-Ab (Panda) optical director for 100 mm guns; 2 Sagem DIBC-2A (VIGY 105) optronic FCSs for 30 mm guns (D 641-643)

Radars: Air search: Thomson-CSF DRBV 26A (Jupiter) ●; D-band.

Air/surface search: Thomson-CSF DRBV-51C (D 640); G-band; Thales DRBV-15A or -16B (Sea Tiger) ● (D 641-643); E/F-band.

Navigation: 1 DRBN-34A (RM 1290) (D 641) or Kelvin Hughes DRBN 37 (KH 1007 Nucleus) (D 640, D 642, D 643); I-band; one for helo control

Fire control Thomson-CSF Castor 2J ● for Crotale Naval SAM; J-band. Thomson-CSF DRBC-32E ● (Castor 2B) for gun FCS; I band

Sonars: Thomson-Sintra DUBV-23D (D 641) bow mounted, active search and attack, 5 kHz. 1 UMS 4110 CL (D 640, D 642, D 643).

Thomson-Sintra DUBV-43B (D 640-642) or -43C (D 643) VDS ●; active search and attack; 5 kHz; paired with DUBV-23D; tows at up to 24 kt down to 300 m (985 ft) for DUBV-43B or 700 m (2,300 ft) for -43C

TUS DSBV-62C (D 641) (Lamproie) passive linear towed array with URDT-1A torpedo warning equipment (D 641-643); very low frequency.

Helicopters: 2 Westland WG 13 Lynx Mk 4 (FN) ● (D 641-643); one normally carried in peacetime; 1 Aerospatiale Alouette III (D 640).

Programmes: Design of a new ASW escort vessel approved in December 1971 under the designation of 'Corvette anti-sous-marine type 1970 (C 70)'. Re-rated 'Frégate

anti-sous-marintype 1970 (FASM70 or F70)' on 6 June 1988. First four ships on the 1970-75 Defence Programming Law. To be replaced by FREMM/ASM 2012-13.

Modernisation: Ships of this class, except Georges Leygues, have received regular upgrades. Most important was the Opération programmée amélioration autodéfense antimissiles (OP3A, air defence upgrade programme) completed in March 1996 for Jean de Vienne, April 1999 for Dupleix and April 2000 for Montcalm; large command structure fitted above the bridge, SENT 8-01 CDS package added to current CDS to command and control air-defence weapons and systems, 2 MBDA Sadral SAM launchers and 2 OTO Melara/Mauser 30 mm gun mounts (controlled by Sagem VIGY 105 optronic directors) added; new ESM suite, new ECM equipment and Replicas offboard decoys. Plans to fit MBDA Mias ASW missiles have been shelved. Due to her new role (see below), Georges Leygues has had only limited upgrades and will not be modernised further. All four ships modified (or being modified) to receive female crew.

Structure: Hull and main deck have been strengthened to cope with fatigue problems; to restore seaworthiness, 235 tonnes of ballast have been embarked and two fuel tanks turned into water-ballasts; completed 2002-03 on all four ships. DCN SPHEX helicopter handling system.

Operational. From June 1999 Georges Leygues has been assigned to a training role as a tender to Jeanne d'Arc; accommodation for 36 cadets and classrooms (partially in the helicopter hangar); based at Brest. Exocet not routinely carried by Georges Leygues. The three other ships are based at Toulon. Endurance 45 days. Service lives: Georges Leygues 2017; Dupleix 2015; Montcalm 2016 and Jean de Vienne 2018. Camcopter S-100 UAV recovered to Montcalm on 10 October 2008.

DUPLEIX 2/2008, B Prézélin / 1335762

JEAN DE VIENNE 6/2008, B Prézélin / 1335759

3 MODIFIED GEORGES LEYGUES CLASS (TYPE F 70 (ASW)) (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned

Dimensions, feet (metres): 455.9 x 49.2 x 18.7
(139 x 15.0 x 5.7)

Main machinery: CODOG; 2 RR Olympus TM3B gas turbines; 52,000 hp (38.2 MW) sustained; 2 SEMT-Protekt 16 PA6 V280 diesels; 11,200 hp(m) (8.3 MW) sustained; 2 shafts, LIPS cp props

Speed, knots: 30; 21 on diesels

Range, n miles: 8,000 at 15 kt on diesels; 2,500 at 28 kt

Complement: 233 (21 officers)

Missiles: SSM: 8 MBDA Exocet MM 40 (only 4 in peacetime) ●; inertial cruise and active radar homing to 72 km (39 n miles) at 0.93 Mach; warhead 165 kg.

SAM: Thomson-CSF Crotale Naval EDIR system ●; octuple launcher; radar/IR command to line-of-sight to 13 km (7 n miles) at 2.4 Mach; warhead 14 kg; total of 26 V5S missiles carried

2 MBDA Simbad twin launchers for Mistral SR SAMs; IR homing to 6 km (3.2 n miles); warhead 3 kg

Guns: 1 DCN 100 mm/55 (3.9 in/55) Modèle 68 CADAM automatic ●; dual purpose; 78 rds/min to 17 km (9 n miles) anti-surface; 6 km (3.2 n miles) anti-aircraft; weight of shell 13.5 kg.

2 Gat 20F2 20 mm ●; 720 rds/min to 2 km; 4—12.7 mm MGs.

Torpedoes: Two 324 mm EuroTorp B515/1H/F fixed torpedo tubes for EuroTorp MU 90 Impact lightweight ASW torpedoes; active/passive homing to 25 km (13.5 n miles) at 28 kt or 12 km (6.5 n miles) at 60 kt; warhead 32 kg of TATB explosive (shaped charge); depth to 1,000 m; same torpedoes for the helicopters.

Countermeasures: EADS AMBL-1C (Dagala Mk 2); two 10-barrel trainable launchers ●; chaff and IR flares Four AMBL-3A (Roptica) (D 645); offboard decoys.

ESM: Thales ARBR-17 ● (DR 4000) radar intercept; ARBG-1A (Sargon) comms intercept; Sagom DIBV-2A (Vampir MB) IRST.

ECM: Thales ARBV 36A jammer

Torpedo defence: AN/SLO-25A Nixie (two torpedo decoys), Prairie-Masker noise suppression system.

Combat data systems: DCN SENT 4 CDS; Link 11 (Link 22 in due course). ACOM/Opmer command support system; Syva ASW decision aid. Syracuse ● and Inmarsat satcomms.

Electro-optic systems: DCN CTMS radar/optronic FCS (with DRBC-33A radar, DIBC-1A Pirana IR tracker, TV tracker) and CSEE DM Ab (Panda) optical director for 100 mm gun Alcatel DLT-L5 for torpedoes.

Radars: Air/surface search: Thomson-CSF DRBV-15A (D 645) or -15B (Sea Tiger) (D 644, D 646) ●; E/F-band.

Navigation: 2 DRBN 34A (D 646); 2 DRBN 37 (D 644, D 645); I-band.

Fire control: Thomson CSF Castor 2J ● for Crotale Naval SAM, J-band.

Thomson-CSF DRBC-33A (Castor 2C) ● for gun FCS; I-band

Sonars: Thomson-Sintra DUBV-24C bow-mounted; active search and attack; 5 kHz Thomson-Sintra DUBV-43CVDS ●; active search and attack, 5 kHz; paired with DUBV-24C; tows up to 24 kt down to 700 m (2,300 ft).

TUS DSBV-61B passive linear towed array with URDT-1A torpedo warning equipment; very low frequency. PAF sonobuoy data processing system.

LA MOTTE-PICQUET

(Scale 1 : 1,200, Ian Sturton / 05R1/95)

LA MOTTE-PICQUET

5/2008*, B Prézelin / 1335760

Helicopters: 2 Westland WG 13 Lynx Mk 4 (FN) ● (one normally carried in peacetime).

Programmes: 'Frégates anti-sous-marines type 1970' (FASM 70 or F 70). Authorised on the 1975-80 Defence Programming Law. Fourth unit cancelled before construction had started. *La Motte Picquet* and *Latouche-Tréville* started building at Brest and towed to Lorient for outfitting. To be replaced by FREMM/ASM in the late 2010s.

Modernisation: The ships have been upgraded by the OP3A (Operation programmée amélioration autodefense antimissiles) air defence upgrade programme, limited to the upgrade of sensors and ESM equipment and the installation of two MBDA Simbad twin launchers for Mistral SR SAMs; completed 1997-99. In 2004-06,

further modernisation include the replacement of the two KD-59E launchers for 533 mm (21 in) L 5 torpedoes by two 324 mm B 515 fixed tubes for EuroTorp MU 90 Impact lightweight torpedoes. Plans to fit MBDA Milas ASW missiles have been shelved. All vessels modified to receive female crew. Might receive the LFTASS (ATBF 2) very low frequency towed active sonar.

Structure: Bridge raised one deck as compared to first four ships of the class. Hull and main deck have been strengthened to cope with fatigue problems, to restore seaworthiness, 235 tonnes of ballast have been embarked and two fuel tanks turned into water-ballasts; completed 2002-03 on all ships. DCN SPHEX helicopter handling system.

Operational. All based at Brest. Service lives: 2021-23.

LATOUCHE-TRÉVILLE

2/2008*, France / 1335758

Missiles: SSM- 6 Aerospatiale MM 38 Exocet ●; inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 185 kg; sea-skimmer.
SAM Thomson-CSF Crotale Naval EDIR octuple launcher ●; command line of sight guidance; radar/IR homing to 13 km (7 n miles) at 2.4 Mach; warhead 14 kg, 26 missiles

Guns: 2 DCN/Creusot-Loire 3.9 in (100 mm)/55 Mod 68 CADAM automatic ●; dual purpose; 78 rds/min to 17 km (9 n miles) anti-surface; 8 km (4.4 n miles) anti-aircraft; weight of shell 13.5 kg
 2 Oerlikon Mk 10 20 mm ●
 4-12.7 mm MGS.

Torpedoes: 2 DCN KD-59E 533 mm fixed launchers ●; for DCN L5; anti-submarine; active/passive homing to 9.5 km (5.1 n miles) at 36 kt; warhead 150 kg; depth to 550 m (1,800 ft). Honeywell Mk 46 or Eurotop Mu 90 impact torpedoes for helicopters.

Countermeasures: Decoys: 2 CSEE/VSEL Syllex 8-barrelled trainable launcher (to be replaced by 2 Dageis systems) ●; chaff to 1 km in centroid and distraction patterns.

RESM: ARBR 16; radar intercept
CESM: Thomson-CSF Aitesse (D 610); comms intercept
ECM: ARBB 32B; jammer.

Torpedo defence: Prairie Masker noise suppression system.

Combat data systems: SENIT 3 action data automation; Links 11 and 14. Syracuse 2 SATCOM ●. OPSMER command support system. Inmarsat and Syracuse SATCOM.

TOURVILLE

(Scale 1 : 1,200), Ian Sturton / 0569912

Electro-optic systems: SENIT 3 radar/TV tracker (possibly SAT Murène in due course). 2 Sagem DMAa optical directors.

Radars: Air search: Thomson-CSF DRBV 26A ●; D-band; range 182 km (100 n miles) for 2 m² target.
 Air/surface search: Thomson-CSF DRBV 51B ●; G-band; range 29 km (16 n miles).

Navigation: 2 DRBN 34 ●; (Racal Decca Type 1226); I-band (1 for helicopter control).

Fire control: Thomson-CSF DRBC 32D (Castor 2B) ●; I-band. Crotale ●; J-band (for SAM).

Sonars: Thomson Sintra DUBV 23D; bow-mounted; active search and attack; medium frequency.
 Thomson Sintra DSBX 1A (ATBF) VDS (SLASM) (D 610) ●; active 1 kHz transmitter and 5 kHz transceiver in same 10 tonne towed body
 Thomson Sintra DSBV 62C, passive linear towed array; very low frequency.

Helicopters: 2 Westland Lynx Mk 4 ●

Programmes: Originally rated as corvettes but reclassified as 'frégates anti-sous-marins (FASM)' on 8 July 1971 and given D pennant numbers.

Modernisation: Major communications and combat data systems updates. The SLASM ASW combat suite installed in *Tourville* from March 1994 to April 1995, *De Grasse* from May 1995 to September 1996. This included new signal processing for the bow sonar, plus LF and MF towed active sonar with separate towed passive array including torpedo warning. Acoustic processor for helo borne sonobuoys. Milas ASW missile cancelled. Passive towed arrays fitted in 1990. Malafon removed from *Tourville* in 1994 and *De Grasse* in 1996. *De Grasse* refitted at Brest in 2003

Structure: Hulls have been strengthened with side support beams.

Operational: Assigned to ALFAN Brest. Helicopters are now used primarily in the ASW role with sonar or sonobuoy dispenser, and ASW weapons. Service lives: *Tourville* 2012, *De Grasse* 2014. To be replaced by first two FREMM

COURBET	F 712	DCN, Lorient	15 Sep 1993	12 Mar 1994	1 Apr 1997
ACONIT (ex-Jauréguiberry)	F 713	DCN, Lorient	1 Aug 1996	8 June 1997	3 June 1999
GUÉPRATTE	F 714	DCN, Lorient	1 Oct 1998	3 Mar 1999	27 Oct 2001

Displacement, tons: 3,300 standard; 3,750 full load
Dimensions, feet (metres): 407.5 oa; 377.3 pp × 50.5 × 19.0 (screws) (124.2; 115 × 15.4 × 5.8)
Main machinery: CODAD; 4 SEMT-Pielstick 12 PA6 V 280 STC diesels; 21,107 hp(m) (15.52 MW) sustained; 2 shafts; LIPS cp props; bow thruster
Speed, knots: 25
Range, n miles: 7,000 at 15 kt; 9,000 at 12 kt
Complement: 153 (15 officers) plus 25 marines

Missiles, SSM: 8 Aerospatiale MM 40 Block 2 Exocet ●; inertial cruise; active radar homing to 70 km (40 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
SAM Thomson-CSF Crotale Naval CN 2 octuple launcher ●, command line of sight guidance; radar/IR homing to 13 km (7 n miles) at 3.5 Mach; warhead 14 kg. 26 missiles. Space for 2 × 8 cell VLS ●

Guns: 1 DCN 3.9 in (100 mm) 55 TR ●; 78 rds/min to 17 km (9 n miles); weight of shell 13.5 kg.
 2 Giat 20F2 20 mm ●; 720 rds/min to 10 km (5.5 n miles).

Countermeasures: Decoys: 2 CSEE AMBL-1C (Dagaie Mk 2) ●; 10-barrelled trainable launchers; chaff and IR flares.

ESM: Thomson-CSF ARBR 21A (DR 3000-S) ●; radar intercept. ARBG-1 (Saigon) (F 710-712) or ARBG 2A (F 713-714) (Maigret), comms intercept.
 DIBV 10 Vampir ●, IR detector (can be fitted).

ECM: Dassault ARBB 33; jammer (can be fitted).
 Torpedo defence: SLO-25A Nixie.

Combat data systems: Thomson-CSFTAVITAC 2000. Link 11. Syracuse 2 SATCOM ●. OPSMER command support system INMARSAT

Electro-optic systems: Sagem TDS 90 VIGY optronic system

Radars: Air/surface search: Thales DRBV-15C (Sea Tiger 2) ●; E/F-band; range 110 km (60 n miles) for 2 m² target
 Navigation: 2 Racal Decca 1229 (DRBN 34B) ●; L-band. One set for helicopter control.

Fire control: Thomson-CSF Castor 2/JC ●, J-band; range 17 km (9.2 n miles) for 1 m² target
 Crotale ●, J-band (for SAM).

Helicopters: 1 Aerospatiale AS 565MA Panther ●, or platform for 1 Super Frelon. NH90 in due course.

Programmes: Originally described as 'Frigates Légères' but this was changed in 1992 to 'Frigates type La Fayette'. First three ordered 25 July 1988; three more 24 September 1992 but the last of these was cancelled in May 1996. The construction timetable was delayed by several months because of funding problems.

Modernisation: Exocet MM40 Block 3 missiles may be fitted

Structure: Constructed from high-tensile steel with a double skin from waterline to upperdeck. 10 mm plating protects vital spaces. External equipment and upper deck fittings are concealed or placed in low positions. Superstructure inclined at 10° to vertical to reduce REA. Extensive use of radar absorbent paint. DCN Semahe helicopter handling system. RHIB assault craft fitted—these are launched and recovered from a stern access. The design includes potential to install new and/or replace old weapon systems in the future. This includes the SAAM/F system to replace Crotale (space is available forward of the bridge to install Sylver A43 octuple VLS launchers for Aster 15 missiles). This upgrade is not believed to be funded.

Operational: La Fayette started sea trials 27 September 1993, Surcouf 4 July 1994, Courbet 14 September 1995, Aconit 14 April 1998 and Guepratte on 16 January 2001. These frigates are designed for out of area operations

on overseas stations. Super Frelon helicopters can land on the flight deck. NH 90 prototype trials in Courbet in 1998. The ship can launch inflatable boats from a hatch in the stern which hinges upwards. The Vampir IR detector

and ARBB 33 jammer are fitted 'for but not with'. Courbet refitted 2005. All based at Toulon
Sales. Three of an improved design to Saudi Arabia, six for Taiwan, and six for Singapore.

Displacement, tons: 1,175 standard; 1,250 (F 789-791), 1,290 (F 792-793), 1,330 (F 794-797) full load

Dimensions, feet (metres): 264.1 x 33.8 x 18 (sonar) (80.5 x 10.3 x 5.5)

Main machinery: 2 SEMT-Pielstick 12 PC2 V 400 diesels; 12,000 hp(m) (8.82 MW); 2 shafts; LIPS cp props
2 SEMT-Pielstick 12 PA6 V 280 BTC diesels; 14,400 hp(m) (10.6 MW) sustained; 2 shafts; LIPS cp props (Commandant L'Herminier)

Speed, knots: 24; 25 (F 791). **Range, n miles:** 4,500 at 15 kt

Complement: 90 (7 officers) plus 18 marines (in some)

Missiles: SSM: 4 Aerospatiale MM 40 (MM 38 in F 789-791) Exocet ●; inertial cruise; active radar homing to 70 km (40 n miles) (or 42 km (23 n miles) at 0.9 Mach (MM 40), warhead 165 kg; sea-skimmer; active radar homing to 42 km (23 n miles) at 0.9 Mach (MM 38).

SAM: Metra Simbad twin launcher for Mistral ●; IR homing to 4 km (2.2 n miles); warhead 3 kg.

Guns: 1 DCN/Creusot-Loire 3.9 in (100 mm)/55 Mod 68 CADAM automatic ●; 80 rds/min to 17 km (9 n miles) anti-surface; 8 km (4.4 n miles) anti-aircraft; weight of shell 13.5 kg
2 Gat 20 mm ●; 720 rds/min to 10 km (5.5 n miles).
4-12.7 mm MGs

Torpedoes: 4 fixed tubes ● ECAN L5; dual purpose; active/passive homing to 9.5 km (5.1 n miles) at 35 kt; warhead 150 kg; depth to 550 m (1,800 ft).

A/S mortars: 1 Creusot-Loire 375 mm Mk 54 6-tubed trainable launcher (F 789, F 790, F 791), range 1,600 m; warhead 107 kg. Removed from others.

Countermeasures: Decoys: 2 CSEE AMBL-1A (Dagaie) 10-barrelled trainable launchers ●; chaff and IR flares; H- to J-band

SLO-25 Nixie torpedo decoy

ESM: ARBR 16; radar warning.

Combat data systems: Syracuse 2 SATCOM (F 792, F 793, F 794, F 795, F 796, F 797) ●. OPSMER command support system with Link 11 (receive only) in MM 40 ships. INMARSAT.

Weapons control: Thomson-CSF Vega system; CSEE DM-Ab (Panda) optical secondary director.

Radars: Air/surface search: Thomson-CSF DRBV 51A ●; G-band

Navigation: Kelvin Hughes 1007; I-band.

Fire control: Thomson-CSF DRBC 32E ●; I-band.

Sonars: Thomson Sintra DUBA 25; hull-mounted; search and attack, medium frequency

Programmes: Classified as 'Avisos'.

Modernisation: In 1985 *Commandant L'Herminier*, F 791, fitted with 12PA6 BTC Diesels Rapides as trial for Type F 70. Most have dual MM 38/MM 40 ITL (Installation de Tir Légère) capability. Weapon fit depends on deployment and operational requirement. Those without ITL are fitted with ITS (Installation de Tir Standard) Syracuse 2 SATCOM fitted in F 792-797, vice the A/S mortar, and accommodation provided for commandos. Metra Simbad launchers have been fitted aft of the A/S mortar/Syracuse SATCOM for operations. Fast raiding craft fitted to *Commandant Birot* and to others in due course.

Operational: Endurance, 30 days and primarily intended for coastal A/S operations. Also available for overseas patrols. All assigned to FAN with F 794, F 795, F 796 and F 797 based at Toulon; the remainder at Brest. Decommissioning plans are under review. It is likely that the Toulon-based ships will be reduced to a patrol ship role following the removal of ASW systems (sonar, torpedoes, mortars) and remain in service until 2017-20. The Brest-based ships are to retain their ASW capability and are likely to be decommissioned 2014-18.

Sales: The original *Lieutenant de Vaisseau Le Hénaff* and *Commandant L'Herminier* sold to South Africa in 1976 while under construction. As a result of the UN embargo

PREMIER MAÎTRE L'HER

ESM: Thomson-CSF ARBR 16A (F 735) ●, radar intercept ARBG 1A (Saigon); comms intercept (F 730 and F 733)

Combat data systems: ACOM/OPSMER command support system (F 735) Syracuse (F 730 and F 733) and INMARSAT ● SATCOM

Electro-optic systems: CSEE Najir optronic director ●.

Radars: Air/surface search Thomson-CSF Mars DRBV 21C ●; D-band.

PRAIRIAL

(Scale 1 : 900), Ian Sturton / 0529161

Navigation: 2 Racal Decca 1229 (DRBN 34A), I-band (1 for helicopter control ●).

Helicopters: 1 AS 565MA Panther or platform for 1 AS 332F Super Puma ●

Programmes: Officially described as 'Frégates de Surveillance' or 'Ocean capable patrol vessel' and designed to operate in the offshore zone in low-intensity operations. First two ordered on 20 January 1989, built at Chantiers de l'Atlantique, St Nazaire, with weapon systems fitted by DCAN Lorient. Second pair ordered 9 January 1990; third pair in January 1991. Named after the months of the Revolutionary calendar

Structure: Built to merchant passenger marine standards with stabilisers and air conditioning. New funnel design improves air flow over the flight deck. Has one freight bunker aft for about 100 tons cargo. Second-hand Exocet MM 38 has been fitted instead of planned MM 40.

Operational: Endurance, 50 days. Able to operate a helicopter up to Sea State 5. Stations as follows: Ventose in Antilles, Germinal at Toulon, Prairial in Tahiti, Floréal and Nivôse at La Réunion and Vendémiaire at Noumea (New Caledonia). Floréal refitted in floating dry-dock at Papeete in 2003. Service life 2022-24.

Sales: Two delivered to Morocco in 2002 and 2003.

PRAIRIAL

LORRAINE	DCN, Lorient	2015	2017	2019

Displacement, tons: 5,135 standard; 6,000 full load (approx)
Dimensions, feet (metres): 466.5 oa, 449.8 wl × 64.6 × 17.7 (142.2; 137.1 × 19.7 × 5.4)
Main machinery: CODLOG; 1 Fiat/GE LM 2500+ G4 gas turbine; 47,370 hp(m) (34.8 MW); 2 Jeumont motors, 2 shafts
Speed, knots: 27.5 (16 on motors)
Range, n miles: 6,000 at 15 kt
Complement: 108 (22 officers) (accommodation for 145)

Missiles: SLCM: 16 (2 octuple) cell Sylver A70 VLS ● for MBDA Scalp-Naval; inertial/terrain following navigation with GPS and high precision IIR terminal guidance to 1,000 km (540 n miles); warhead 300 kg.
SAM: 16 (2 octuple) cell Sylver A43 VLS for MBDA Aster 15 ●; inertial guidance, mid-course update and final active homing to 30 km (16.2 n miles) at 3 Mach
SSM: 8 MBDA Exocet MM 40 Block 3 ●; inertial cruise; active radar homing to 180 km (100 n miles) at 0.9 Mach, warhead 165 kg
Guns: 1 OTO Melara 76 mm/62SR ● 2–20 mm
Torpedoes: 2 twin 324 mm Eurotorp B 515/2H/F fixed launchers for Eurotorp MU 90, active/passive homing to 25 km (13.5 n miles) at 29 kt or 12 km (6.5 n miles) at 50 kt; warhead 32 kg, 19 weapons (F-ASM); 4 weapons (F-AVT).
Countermeasures: Decoys: 2 EADS NGDS 12-barrelled chaff, IR and anti-torpedo decoy launchers.
ESM/ECM: Sigyn CEM and RESM suite
Torpedo defence: SLAT (Thales TUS WASSB 525/12) and Alto torpedo warning system
Combat data systems: DCN/Thales SETIS CMS, Links 11 and 16, 22 and JSAT.
Electro-optic systems: 1 optronic FCS, Thales Artemis IRST.
Radars: Air/surface search: Thales Herakles 3-D multifunction ●; E/F-band.

FREMM

(Scale 1 : 1,200), Ian Sturton / 1170136

Fire control: Alenia Marconi NA-25XP ●, J-band.
Navigation: 2 to be decided.
Sonars: Thales TUS 4110CL; hull mounted (bow dome); active search and attack, Thales Captas UMS-4249 active/passive towed array (F-ASM)

Helicopters: 1 NH-90 ●, ASW aircraft in ASW variant. Transport aircraft and tactical UAV in land attack variant.

Programmes: Agreement reached on 7 November 2002 for a 27-ship collaborative programme with Italy. The original French requirement was for 17 FREMM of which there would be eight ASW (F-ASM) variants and nine land-attack (F-AVT). This plan was later modified by the 2009-14 Defence Programming Law in which the total number of ships was reduced to 11, the F-AVT variants were dropped and two AAW variants (FREDAs) were included. Contract for the first phase awarded on 16 November 2005 to Armaris (DCN/Thales joint venture) for the construction of a first batch of eight ships. This comprises six F-ASM and two FREDA (formerly F-AVT)

(Auvergne and Alsace). A second batch of three ships is to be funded by the 2009 budget.
Structure: FREMM has a conventional hull design. The main engine room contains the gas turbine and two diesel generators while the aft machinery space contains the motors. Particular attention has been paid to signature reduction. The radar signature is expected to be comparable to that of the La Fayette class while exhaust cooling measures are expected to achieve a comparatively low IR signature. Acoustic quietening is to be achieved by the rafting of engines and motors and the use of electric propulsion. The original design for a single integrated mast has been abandoned in favour of a two mast configuration. The Herakles radar is housed in the foremast and communications and IFF in the after mast. F-AVT will have accommodation for 30 marines and will be able to launch/recover 9.5 m raiding craft through a stern access. FREDA are to include 2 16 cell launchers for Aster 15 and 30.
Operational: Sea trials for Aquitaine are planned to start in 2010.

SHIPBORNE AIRCRAFT

Notes: The naval drone concepts for the French Navy have moved to a common navy/army project for a VTOL drone that could perform both tactical and long-range missions. It should be able to operate from the flight deck of a frigate. Contenders contracted on 10 November 2006 are Thales, Boeing Little Bird, Sagem/Bell/Rheinmetall with an Eagle Eye derivative and EADS/Vertivision with Orka 2000. Following a feasibility study, a demonstration phase will test a UAV operationally. Up to 50 UAV may be required in due course. On 1 December 2005, a contract was awarded to DCN to study and develop the integration of UAVs on board naval ships (with the objective of deck trials at sea on a frigate in 2009)

Numbers/Type: 26 Dassault Aviation ACM Rafale M.
Operational speed: Mach 2.
Service ceiling: 50,000 ft (15,240 m).
Range: 2,000 n miles (3,700 km).
Role/Weapon systems: Total procurement of 58 Rafale M single-seaters (air superiority and ground/surface attack). First of two Rafale M naval prototypes (single-seaters) flown 12 December 1992. First deck trials in Foch in 1993. First production Rafale M flown 7 July 1999 and assigned to development trials. Second aircraft delivered to the Navy 19 July 2000 and 14 more delivered by 2007 to form Flotille 12F. All aircraft at standard F1 (air superiority role; crash programme carried out to enable tanker role). Further aircraft at standard F2 with limited air-to-ground capabilities. Prototype M2 brought to this standard for carrier trials in December 2005; first production aircraft delivered in March 2006, seven more delivered in 2007, and last seven in 2008 to replace Super Etendards in Flotille 11F. Standard F3 true multirole variant to enter service from 2009 (with full air superiority, air-to-ground, air-to-surface, nuclear strike and reconnaissance capabilities). All 15 Rafale F2 being converted to F3 standard by September 2009. This is to be followed by nine F1 by 2015. Sensors: Thales/Dassault Electronique RBE2 multirole radar; Thales/Dassault Electronique/MBDA SPECTRA integrated EW/IR countermeasure suite; Thales/Sagem OSF optronic surveillance and target acquisition equipment (from standard F2); MIDSCO MIDS-LVT terminal for Link 16 (from standard F2); Thales Reco NG optronic reconnaissance pod (for eight specially wired standard F3 Rafales). Weapons: Gist M791 30 mm cannon; up to eight AAMs (air defence role), including MBDA Magic 2 short range and MBDA Mica EM medium range AAMs (standard F1); MBDA Mica IR replacing Magic 2 from standard F2 (later, MBDA Meteor to replace Mica EM); MBDA SCALP-EG stand-off precision guided ASM (from standard F2); Sagem AASM general purpose precision ammunition (from standard F2); MBDA Exocet AM 39 Block 2 Mod 2 ASM (one carried) and ASMP-A nuclear strike missile (standard F3); nacelle for air-to-air refuelling. Up to 8 tons of military load on 13 hardpoints.

RAFALE M 6/2008, Ships of the World / 1335/49

Numbers/Type: 43 Dassault-Breguet Super Etendard.
Operational speed: Mach 1.
Service ceiling: 45,000 ft (13,700 m).
Range: 1,460 n miles (2,700 km).
Role/Weapon systems: Carrierborne all-weather strike fighter with nuclear strike capabilities and limited air defence role; tactical recon role to be added. All aircraft still in inventory modernised 1994–1999 to Standard F3. Standard F4 for all the fleet from mid-2000 to early 2005; tactical recon role added; standard 5 upgrade for a total of 35 aircraft by 2008. Service life extended to 2015. Sensors: Dassault Electronique Anémone radar, DRAX (standard 3) or Thales-Detexis Sherlock-F ESM (standard 4), SAGEM UAT 90 computer, Thomson-CSF Barracuda jammer, Phimat chaff dispenser, Alkan IR decoy dispenser; Thales Optrosys photo/optronic chassis (with Omera 40 panoramic camera and SDS-250 digital camera) in a ventral bay (Standard F4); Thales Improved Damocles day/night FLIR/designator (Standard F4 and F5). Weapons: air defence and self protection two Matra BAe Dynamic Magic 2 short range AAMs and two DEFA 30 mm cannon; nuclear strike: one Aerospatiale ASMP nuclear ASM; air-to-surface: one Aerospatiale AM 39 Exocet anti-ship missile, air-to-ground: bombs and MBDA CEMB/BANG 125 or 250 bombs with Raytheon Enhanced Paveway 2 precision guidance (Standard 4 and 5) or one Aerospatiale AS 30L laser guided missile. 7 hardpoints (from standard 4).

SUPER ÉTENDARD 6/2005, Paul Jackson / 1153141

Numbers/Type: 3 Grumman E-2C Hawkeye Group 2.
Operational speed: 320 kt (593 km/h)
Service ceiling: 37,000 ft (11,278 m).
Range: 1,540 n miles (2,852 km).
Role/Weapon systems: Used for AEW, and direction of AD and strike operations. First pair ordered in May 1995 and delivered in April and December 1998 respectively. Third delivered in December 2003. First two aircraft completed upgrade programme (including eight-bladed propellers) in 2006. Procurement of a fourth aircraft was discontinued in December 2007. Sensors: APS-145 radar, ESM, ALR-73 PDS, ALO-108 airborne tactical data system with Links 11 and 16. Weapons: Unarmed

E-2C 1/2007, B Prézalin / 1305021

260 France/Shipborne aircraft

Numbers/Type: 4/10 Eurocopter EC 725 R2 Cougar Mk 2 Plus Resco/EC 725 HUS

Operational speed: 154 kt (285 km/h).

Service ceiling: 13,120 ft (4,000 m).

Range: 421 n miles (780 km).

Role/Weapon systems: Cougar Resco perform the Combat SAR (C-SAR) mission with AF Squadron EH 1/67 'Pyrenées' (with mixed Air Force/Navy crews). One or two to embark in *Charles de Gaulle* for every deployment. A total of 14 such aircraft is expected. Cougar HUS (Hélicoptère Unite Speciale) are operated by Army Aviation Flight no 3 for special operations, including maritime counter-terrorism, and could be embarked in *Charles de Gaulle*, LHDs, LSDs, FREMM/AVT, La Fayette and Floreal class frigates. Sensors: Bendix 1400C radar; Thales Chlio FLIR; Thales Sherlock radar warning; Thales MWS 20 Damien missile warning; Marconi laser detector, Alkan Ellips chaff dispenser; Link 16 in duo course (Resco helicopters). Weapons: 2 FN 7.62 mm MGs (possibly 12.7 mm MGs or 20 mm cannons on HUS variant). Capable of carrying 29 passengers or 11 stretchers.

EC 725 HUS

1/2007, B Prézélin / 1305077

EC 725 RESCO

1/2007, B Prézélin / 1305024

Numbers/Type: 3/6/15 Eurocopter (Aerospatiale) SA 365F Dauphin 2/SA 365N Dauphin 2/AS 565MA Panther

Operational speed: 165 kt (305 km/h)

Service ceiling: 16,700 ft (5,100 m)

Range: 486 n miles (900 km).

Role/Weapon systems: New-built SA 365F Dauphin 2s acquired to replace Alouette IIIs for carrierborne SAR. They feature the same ORB-32 radars as Panthers. SA 365Ns are second-hand helicopters purchased for SAR, general surveillance and public service roles from various locations in metropolitan France. They do not have any radar. Fifteen AS 565 Panthers purchased in several batches to operate from Cassard class DDGs, La Fayette and Floreal class frigates. 16th aircraft acquired from the Armée de l'Air (French Air Force). All Panthers to be modernised to Standard 2 2008-2012 with new avionics, comprehensive countermeasures suite (laser, radar and missile warning systems, decoy dispenser), FLIR and datalink. Follow-on Standard 3 are to feature a new surveillance radar and lightweight anti-ship missiles. Service life to 2025 (AS 565MA). Sensors: (AS 565MA and SA 365F) Thales ORB-32 radar and (AS 565MA) Thales Chlio FLIR on some helicopters (all fitted for); Titus tactical situation management aid (with encrypted data link). Weapons: (AS 565MA) provision for internally mounted 7.62 mm MG.

SA 365F DAUPHIN 2

2/2008*, B Prézélin / 1335752

AS 565 PANTHER

2/2008*, B Prézélin / 1335753

Numbers/Type: 1 NH Industries NH 90 NFH.

Operational speed: 162 kt (300 km/h).

Service ceiling: 13,940 ft (4,250 m).

Range: 621 n miles (1,150 km).

Role/Weapon systems: Total of 27 NH-90 ordered 30 June 2000 for the French Navy in two variants: 13 NHS support helicopters with secondary ASuW role; 14 NHC combat helicopters for ASW and ASuW. First production aircraft flown on 12 May 2006. Delivery programme: Two NHS by November 2009, all NHC by 2013. Sensors: both variants: Thales ENR surveillance radar; Sagem OLOSP tactical FLIR; MBDA Saphir decoy dispenser; Link 11; NHC: TUS FLASH dipping sonar, and UMS 2000-TSM 8203 sonobuoy processing system. Weapons: ASM (NHC and NHS); 2 MU 90 Impact torpedoes (NHC)

NH 90

3/2004, NH / 0062373

Numbers/Type: 100 Aerospatiale SA 330Ba Puma.

Operational speed: 139 kt (257 km/h).

Service ceiling: 15,750 ft (4,800 m).

Range: 297 n miles (550 km).

Role/Weapon systems: Troop carrying helicopter owned by French Army and operable from amphibious ships.

SA 330

6/2005, FAP / 0589661

Numbers/Type: 7 Aerospatiale SA 321G Super Frelon.

Operational speed: 135 kt (250 km/h).

Service ceiling: 10,170 ft (3,100 m).

Range: 420 n miles (778 km) 594 n miles (1,100 km) with auxiliary tank.

Role/Weapon systems: Formerly ASW helicopter; used for assault and support tasks embarked on carriers and LSDs; radar updated, provision for 27 passengers. Service life extended to 2012 to allow replacement by NH 90. Ass gnd to Flotille 32F. Sensors: Omara ORB search radar, Thales Chlio FLIR fitted to one aircraft. Weapons: Provision for 20 mm gun.

SUPER FRELON

7/2008*, B Prézélin / 1335751

Numbers/Type: 27 Westland Lynx Mk 4 (FNI)

Operational speed: 125 kt (232 km/h).

Service ceiling: 12,500 ft (3,810 m).

Range: 320 n miles (593 km).

Role/Weapon systems: Sole French ASW helicopter, all now of the Mk 4 variant; embarked in destroyers and deployed on training tasks. Service life to 2015. To be replaced by NH 90. A limited modernisation (Link 11 and Thales Chlio FLIR) programme will be applied to a small number of aircraft. Sensors: Omara 31 search radar, Alcatel (DUAV 4) dipping sonar, sonobuoys, Sextant Avionique MAD. Weapons: ASW; two Mk 46 Mod 1 (all aircraft being modified to launch EuroTorp Mu 90 Impact) torpedoes, or depth charges. ASV: 1-7.62 mm MG.

LYNX

2/2008*, B Prézélin / 1335750

Numbers/Type: 27 Aerospatiale SA 319B Alouette II.

Operational speed: 113 kt (210 km/h).

Service ceiling: 10,500 ft (3,200 m).

Range: 327 n miles (605 km).

Role/Weapon systems: General purpose helicopter SA 316B with Turboméca Artouste engine; SA 319B with Astazou engine; replaced by Lynx for ASW; now used for trials, surveillance and training tasks. Sensors: Some radar Weapons: Unarmed.

ALOUETTE II

6/2008*, Chris Sattler / 1335771

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Notes: In addition to frontline aircraft, the naval inventory includes 11 Embraer EMB-121 Xingu executive aircraft used for communications (Flotilles 24F and 28F) and eight CAP 10 and nine Morane-Saulnier (SOCATA) Rallye for initial in-flight training with EIP/escadronne 50S.

Numbers/Type: 4 Dassault Falcon 50M
Operational speed: 475 kt (880 km/h)
Service ceiling: 49,000 ft (14,930 m)
Range: 3,500 n miles (6,480 km)

Role/Weapon systems: Maritime reconnaissance and SAR roles in the Atlantic and overseas stations (replaced deleted Atlantic Mk 1). First aircraft delivered in December 1999 (for Opeval), second in March 2000, third in March 2001; fourth and last one late 2002. Being fitted with a Spationav VI terminal to share common picture with maritime surveillance assets. A Standard 2 modernisation programme is to be implemented from 2007. Allocated to Flotille 24F (Lann-Bihoué). Sensors: Thales/DASA Ocean Master 100(V) search radar, Thales Chilo FLIR, Inmarsat C. Weapons: Unarmed (two SAR chains). Endurance: six hours 30 minutes at 100 n miles (185 km) from base, four hours at 500 n miles (926 km) or one hour at 1,200 n miles (2,222 km).

FALCON 50M

1/2007, B Prézélin / 1305025

Numbers/Type: 4 Boeing E-3F Sentry AWACS.
Operational speed: 460 kt (853 km/h)
Service ceiling: 30,000 ft (9,145 m)
Range: 870 n miles (1,610 km)

Role/Weapon systems: Air defence early warning aircraft with secondary role to provide coastal AEW for the Fleet; 6 hours endurance at the range given above. Modernised 2003-06 under the Radar System Improvement Programme (RSIP). Sensors: Westinghouse APY-2 surveillance radar, Bendix weather radar, Mk XII IFF, Yellow Gate, ESM, ECM. Weapons: Unarmed. Operated by the Air Force.

E-3F

6/2002, Armée de l'Air / 0118289

Numbers/Type: 27 Dassault Aviation Atlantique Mk 2
Operational speed: 355 kt (658 km/h)
Service ceiling: 32,800 ft (10,000 m)

Range: 11 hours patrol at 600 n miles from base; 8 hours patrol at 1,000 n miles from base; 4 hours patrol at 1,500 n miles from base.

Role/Weapon systems: Maritime reconnaissance. ASW, ASV, COMINT/ELINT roles. Last one delivered in January 1998. Assigned to Flotilles 21F and 23F. Six aircraft are in long-term storage. Sensors: Thomson-CSF Iguane radar, ARAR 13 ESM, ECM, FLIR, MAD, sonobuoys (with DSAX-1 Thomson-CSF Sadang processing equipment). Link 11 (being fitted in all). COMINT/ELINT equipment optional. Integrated sensor/weapon system built around a CIMS A 15/125X computer. Weapons: Two AM 39 Exocet ASMs in ventral bay, or up to eight lightweight torpedoes (Mk 46 and later Mu 90), or depth charges, mines or bombs. Limited modernisation programme planned to adapt aircraft to Mu 90 torpedoes. More extensive modernisation planned for 18 aircraft 2008-2015. Four other aircraft are likely to be limited to a reconnaissance role. One withdrawn from service in 2007. Aircraft deployed to Dakar, Djibouti and (occasionally) Chad.

ATLANTIQUE II

3/2006, M Declercq / 1157138

Numbers/Type: 10 Aerospatiale N262E
Operational speed: 226 kt (420 km/h)
Service ceiling: 26,900 ft (8,200 m)

Role/Weapon systems: Crew training and EEZ surveillance role. All allocated to Flotilla 28F for surveillance, SAR and Flying School. Modified N262A aircraft. Service life 2014. Partial replacement by further Falcon 50M is under consideration. Sensors: Omera ORB 32 radar; photo pod. Weapons: Unarmed. Target towing capability.

Numbers/Type: 6 Dassault Aviation Falcon 10MER.
Operational speed: 492 kt (912 km/h)
Service ceiling: 35,500 ft (10,870 m)
Range: 1,920 n miles (3,560 km)

Role/Weapon systems: Primary aircrew/ECM training role but also has overwater surveillance role. Avionics upgrade (Standard 2) programme started in 2006. Sensors: Search radar. Weapons: Unarmed. Allocated to Flotille 57S (Landivisiau).

FALCON 10MER

7/2003, Paul Jackson / 0569995

Numbers/Type: 5 Dassault Aviation Falcon 200/Gardian.
Operational speed: 470 kt (870 km/h)
Service ceiling: 45,000 ft (13,715 m)
Range: 2,425 n miles (4,490 km)

Role/Weapon systems: Assigned to Flotilla 25F based at Tahiti with permanent detachments at Tontouta (New Caledonia) and Martinique. Maritime reconnaissance role. Service life 2015; modernisation/replacement is under consideration. Sensors: Thomson-CSF Varan radar, Omega navigation, ECM/ESM pods. Weapons: Unarmed.

PATROL FORCES

Notes: (1) 'Sauvegarde Maritime' is the organisation that encompasses the surveillance and traffic control of all maritime approaches around continental France and overseas territories. It also includes pollution control. Although all naval ships could participate in surveillance tasks, specialised vessels include the OPVs manned by the navy, patrol vessels and patrol craft of the 'Gendarmerie Maritime', French Customs and 'Affaires Maritimes'. In addition there are merchant support vessels on long-term charter (see *Government Maritime Forces*). All these ships, including specialised naval ships, display blue/white/red stripes on hull sides.

(2) Naval patrol ships (OPVs) are referred to as 'Patrouilleurs de Service Public' (PSP; Public Service Special Patrol Vessel). All PSPs and other government service craft are to be fitted with Spationav VI terminals to share a common maritime picture.

(3) The potential use of Unmanned Surface Vehicles (USV) is under investigation.

(4) There are some 60 RHIBs in service for harbour and ship protection.

1 LAPÉROUSE CLASS (PBO)

Name	No	Builders	Launched	Commissioned
ARAGO	P 675 (ex-A 795)	Lorient Naval Dockyard	9 Sep 1990	9 July 1991

Displacement, tons: 830 standard; 980 full load
Dimensions, feet (metres): 193.5 × 35.8 × 11.9 (59 × 10.9 × 3.6)
Main machinery: 2 Wärtsilä UD 30 V12 M6D diesels; 2,500 hp(m) (1.84 MW); 2 cp props, bow thruster; 160 hp(m) (120 kW)
Speed, knots: 15. **Range, n miles:** 5,200 at 12 kt
Complement: 30 (3 officers)
Guns: 2 — 12.7 mm MGs.
Radars: Navigation: 1 Decca E 250 (DRBN 38A); 1 Furuno; I-band.

Comment: Ex-survey ship converted in 2002 for patrol duties. Based at Toulon. Equipped with raiding craft.

ARAGO

1/2008, B Prézélin / 1335748

1 STERNE CLASS (PBO)

Name	No	Builders	Commissioned
STERNE	P 680	La Perrière, Lorient	20 Oct 1980

Displacement, tons: 250 standard; 380 full load
Dimensions, feet (metres): 160.7 × 24.6 × 9.2 (49 × 7.5 × 2.8)
Main machinery: 2 SACM-Wärtsilä UD33V 12M5 diesels; 3,600 hp(m) (2.65 MW) sustained; electrohydraulic auxiliary propulsion on starboard shaft; 150 hp(m) (110 kW); 2 shafts
Speed, knots: 20; 6 on auxiliary propulsion. **Range, n miles:** 4,900 at 12 kt; 1,500 at 20 kt
Complement: 20 (3 officers); 2 crews
Guns: 2 — 12.7 mm MGs.
Radars: Navigation: 1 Racal Decca; 1 Furuno; I-band.

Comment: Sterne was the first ship for the FSMC. Has active tank stabilisation. Launched 31 October 1979 and completed 18 July 1980 for the 'Affaires Maritimes' but then transferred and is now manned and operated by the Navy from Brest. Service life 2009.

STERNE

11/2004, B Prézélin / 1042296

10 P 400 CLASS (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Commissioned
LAUDACIEUSE	P 682	CMN, Cherbourg	18 Sep 1986
LA BOUDEUSE	P 683	CMN, Cherbourg	15 Jan 1987
LA CAPRICIEUSE	P 684	CMN, Cherbourg	13 Mar 1987
LA FOUQUEUSE	P 685	CMN, Cherbourg	13 Mar 1987
LA GLORIEUSE	P 686	CMN, Cherbourg	18 Apr 1987
LA GRACIEUSE	P 687	CMN, Cherbourg	17 July 1987
LA MOQUEUSE	P 688	CMN, Cherbourg	18 Apr 1987
LA RAILLEUSE	P 689	CMN, Cherbourg	16 May 1987
LA RIEUSE	P 690	CMN, Cherbourg	13 June 1987
LA TAPAGEUSE	P 691	CMN, Cherbourg	11 Feb 1988

Displacement, tons: 406 standard; 480 full load
Dimensions, feet (metres): 179.8 × 26.2 × 8.5 (54.8 × 8 × 2.5)
Main machinery: 2 SEMT-Pielstick 16 PA4 200 VGDS diesels; 8,000 hp(m) (5.88 MW) sustained; 2 shafts
Speed, knots: 23. **Range, n miles:** 4,200 at 15 kt
Complement: 26 (3 officers) plus 20 passengers
Guns: 1 Bofors 40 mm/60; 1 Giat 20F2 20 mm; 2—7.62 mm MGs.
Radars: Surface search: 1 Racal Decca DRBN-38A (Bridgemaster E 250); I-band

Programmes: First six ordered in May 1982, with further four in March 1984. The original propulsion system was unsatisfactory. Modifications were ordered and construction slowed. This class relieved the Patra fast patrol craft which have all transferred to the Gendarmerie.
Structure: Steel hull and superstructure protected by an upper deck bulwark. Design modified from original missile craft configuration. Now capable of transporting personnel with appropriate store rooms. Of more robust construction than previously planned and used as overseas transports. Can be converted for missile armament (MM 38) with dockyard assistance and Simbad PDMS is under consideration. *Laudacieuse* has done trials with a VDS-12 sonar. Twin funnels replaced the unsatisfactory submerged diesel exhausts in 1990-91. P 682 fitted with new propellers in 2003. If successful the rest of the class will be fitted.
Modernisation: A modernisation programme started in 2002. P 682, 683, 689, 690 and 691 have been refitted. The remainder completed by 2005.
Operational: Deployments: Antilles; P 685, French Guiana; P 682, 684, Nourma; P 686, 688, La Réunion; P 683 and 690 Tahiti; P 689 and P 691. P 687 completed refit at Lorient in 2006 and subsequently based at Brest. Endurance, 15 days with 45 people aboard. Replacement is under consideration. P 685 to be deleted in 2009.
Sales: To Gabon and Oman

LA GRACIEUSE 9/2008*, J Brodie / 1335747

LA GRACIEUSE 6/2006, B Prézeln / 1040716

1 TRAWLER TYPE (PSO)

Name	No	Builders	Commissioned
ALBATROS (ex-Névé)	P 681	Ch de la Seine Maritime	1967

Displacement, tons: 1,940 standard; 2,800 full load
Dimensions, feet (metres): 278.9 × 44.3 × 19.7 (85.0 × 13.5 × 6.0)
Main machinery: Diesel-electric; 2 SACM UD 33 V12 S4 diesel generators; 3,050 hp(m) (2.24 MW) sustained; 2 motors; 2,200 hp(m) (1.62 MW); 1 shaft
Speed, knots: 15. **Range, n miles:** 14,700 at 14 kt
Complement: 50 (8 officers) plus 15 passengers
Guns: 1 Bofors 40 mm/60. 2—12.7 mm MGs.
Countermeasures: ESM ARBR 16 radar detector
Radars: Surface search: 2 DRBN 38A; I-band

Comment: Former trawler bought in April 1993 from Compagnie Nav. Caennaise for conversion into a patrol ship. Commissioned 19 May 1984. Conducts patrols from Réunion to Kerguelen, Crozet, St Paul and Amsterdam Islands with occasional deployments to South Pacific Vertrep facilities. Can carry 200 tons cargo, and has 4 tonne telescopic crane. Hospital with six berths and operating room. Major refit in Lorient from June 1990 to March 1991 included new diesel-electric propulsion. A further major overhaul was undertaken in France August 2001-April 2002. Maintenance now carried out in Indian Ocean Shipyards. Service life 2015

ALBATROS 4/2002, B Prézeln / 0528841

1 GRÈBE CLASS (PBO)

Name	No	Builders	Commissioned
GRÈBE	P 679	SFCN, Villeneuve La Garenne	6 Apr 1991

Displacement, tons: 300 standard; 410 full load
Dimensions, feet (metres): 170.6 × 32.2 × 9 (52 × 9.8 × 2.8)
Main machinery: 2 Wärtsilä UD 33 V12 M6D diesels; 4,800 hp(m) (3.53 MW); diesel-electric auxiliary propulsion; 245 hp(m) (180 kW); 2 shafts; cp props
Speed, knots: 18, 7.5 on auxiliary propulsion
Range, n miles: 4,500 at 12 kt
Complement: 19 (4 officers), accommodation for 24
Guns: 2—12.7 mm MGs.
Radars: Navigation: Racal Decca; I-band

Comment: Type Espadon 50 ordered 17 July 1988 and launched 16 November 1989. Senter 'Deep V' hull, stern ramp for craft storage and handling. Large deck area (8 × 8 m) for Vertrep operations. Pollution control equipment and remotely operated water-jet gun for firefighting. Based at Toulon from November 1997. Service life 2016

GRÈBE 6/2007, Per Körnefeldt / 1170123

3 FLAMANT (OPV 54) CLASS (PBO)

Name	No	Builders	Launched	Commissioned
FLAMANT	P 676	CMN, Cherbourg	24 Apr 1995	18 Dec 1997
CORMORAN	P 677	Laroux & Lotz, Lorient	15 May 1995	29 Oct 1997
FLUVIER	P 678	CMN, Cherbourg	2 Dec 1996	18 Dec 1997

Displacement, tons: 314 standard, 390 full load
Dimensions, feet (metres): 179.8 × 32.8 × 9.2 (54.8 × 10 × 2.8)
Main machinery: CODAD; 2 Deutz/MWM 16V TBD 620 diesels and 2 MWM 12V TBD 234 diesels; 7,230 hp(m) (5.32 MW) sustained; 2 shafts; LIPS cp props
Speed, knots: 22 (7 idling)
Range, n miles: 4,500 at 14 kt
Complement: 20 (3 officers)
Guns: 2—12.7 mm MGs.
Radars: Surface search: 1 Racal Decca Bridgemaster 250 (DRBN 38A); I-band
Navigation: Racal Decca 20V90 (DRBN 34B); I-band. Racal Decca DRBN 34A (Bridgemaster E 250), I-band

Comment: Authorised in July 1992 and ordered in August 1993 to a Senter Deep V design. Has a stern door for a 7 m EDL 700 fast assault craft or a Zodiac Hurricane RIB, capable of 30 kt. Two passive stabilisation tanks are fitted, and a remotely operated water-jet gun for firefighting. Deck area of 12 × 9 m for Vertrep. Similar to craft built for Mauritania in 1994. Hulls of all three ships strengthened by DCN Brest by late 2004. Service life: 2022. All based at Cherbourg.

FLAMANT 7/2008*, Maritime Photographic / 1335770

AMPHIBIOUS FORCES

Notes: (1) There are plans to acquire new EDA (Engins de Débarquement Amphibie) landing craft to replace CTMs and operate with Mistral class LHDs and Foudre class LSDs. They will be faster than current CTMs and LCMs. L-Cat from CNIM is a candidate.
(2) About 25 LCVPs are still in service (from 59 built). Most are used on board LSDs (Foudre class), Batral LCTs and AGRs.
(3) Replacement of the Batral class LSTs is under consideration. Options include new Ro-Ro vessels.
(4) Evaluation of a new 30 m landing craft began in October 2008. The L-Cat demonstrator was built by the Gémefin Shipyard at La Rochelle and has the potential to act as a ship-to-shore connector, combining the attributes of a catamaran for transit and, by deploying a movable pontoon deck, a landing craft in beaching mode

L-Cat demonstrator 11/2008*, CNIM / 1294/96

TONNERRE	L 9014	DCN Brest	26 Aug 2003	26 July 2005	1 Aug 2007

Displacement, tons: 16,529 standard; 21,600 full load; 22,300 flooded

Dimensions, feet (metres): 653 × 105 × 20.3 (199 × 32 × 6.2)

Flight deck, feet (metres): 653 × 105 (199 × 32)

Main machinery: Electric propulsion: 4 (3 Wärtsilä 16V32 and 1 Wärtsilä 18V200) diesel generators provide total of 20.8 MW for propulsion and services. 2 Alstom Mermaid podded propulsors trainable through 360°; 19,040 hp(m) (14 MW) sustained; 1 bow thruster; 2,040 hp(m) (1.5 MW)

Speed, knots: 19

Range, n miles: 11,000 at 15 kt; 6,000 at 18 kt

Complement: 177 (20 officers)

Military lift: 450 (up to 900 in austerity conditions) troops and 60 armoured vehicles (13 MBTs) (approx 1,200 tons of cargo) 4 CTM (LCU) or 2 LCACs.

Missiles: SAM 2 MBDA Simbad twin PDMS launchers for Matra BAE Dynamics Mistral; IR homing to 6 km (3.2 n miles); warhead 3 kg; anti-sea-skimmer.

Guns: 2 Breda Mauser 30 mm/70; 800 rds/min to 3 km; weight of shell 0.38 kg. 4—12.7 mm MGs.

Countermeasures: ESM: ARBR 21; intercept.

Torpedo defence: SLAT system.

Combat data systems: SENIT 9 combat data system, SIC 21 command support system for joint operations; space available for afloat CJTF command; Syracuse III, Fleetsatcom and Inmarsat. Link 11, Link 16.

Weapons control: 2 Segem VIGY-20 optronic systems.

Raders: Air/surface search. Thales MRR; 3-D; G-band.

Navigation: 2 Racal-Decca Bridgemaster E 250 (DRBN 38A); I-band

Helicopters: Up to 16 NH90 or SA 330 Puma or AS 532U2 Cougar or AS 665 Tigre attack helicopters.

Programmes: Designated BPC (Bâtiment de Projection et de Commandement, support and command ship for force projection), ex-NTCD (new LHDMs); which have replaced *Duragan* and *Oraga*. Design and definition phase launched 12 November 1999; building contract notified 22 December 2000; ordered from DCN (prime contractor) and Alstom Marine-Chantiers de l'Atlantique. Forward sections built at St Nazaire, and middle and aft blocks at Brest where final construction and outfitting took place. Sixty per cent of the aft section subcontracted to Stocznia Remontowa, Gdansk, and shipped to Brest by barge. Two further ships are planned to replace the

MISTRAL

10/2008, Peter Ford / 1335787

Foudre-class LSDs: While delivery was not expected until about 2020, the order for the third ship is now expected in 2009.

Modernisation: Measures to improve self-defence capabilities are under consideration.

Structure: Built to merchant marine standards. Flight deck has 6 spots, one of which calibrated for CH-53 or MV-22 operations. One 1,800 m² hangar for helicopters or vehicles (2 lifts), one 2,650 m² hangar for vehicles only (1 lift); up to 1,200 tons load on vehicle deck. Well dock

885 m². Hospital: 69 beds; additional modular field hospital may be embarked for humanitarian missions. Other modular facilities could also be embarked according to missions.

Operational: Roles: forward presence, force projection, logistic support for deployed force (ashore or at sea), humanitarian aid, disaster relief, command ship for combined operations. Endurance: 45 days. Sea trials of *Mistral* began 7 March 2005 and of *Tonnerre* on 13 December 2005. Both base at Toulon.

2 Foudre Class (Landing Ships Dock) (LSDH/TCD 90)

Name	No	Builders	Laid down	Launched	Commissioned
FOUDRE	L 9011	DCN, Brest	26 Mar 1986	19 Nov 1988	7 Dec 1990
SIROCO	L 9012	DCN, Brest	9 Oct 1994	14 Dec 1996	21 Dec 1998

Displacement, tons: 8,190 (*Foudre*), 8,230 (*Siroco*) light, 12,400 full load; 17,200 flooded

Dimensions, feet (metres): 651 × 77.1 × 17 (30 2 flooded) (168 × 23.5 × 5.2; 9.2)

Main machinery: 2 SEMT-Pielstick 16 PC2.5 V 400 diesels, 20,800 hp(m) (15.3 MW) sustained, 2 shafts; LIPS cp props; bow thruster; 1,000 hp(m) (735 kW)

Speed, knots: 21. **Range, n miles:** 11,000 at 15 kt

Complement: 218 (18 officers)

Military lift: 470 (up to 2,000 for 3 days) troops plus 1,880 tons load; 1 EDIC/CDIC plus 4 CTMs (typical) or 2 CDIC or 10 CTMs or 20 LARC XV amphibious vehicles; 150 vehicles

Missiles, SAM: 2 (*Siroco*) or 3 (*Foudre*) MBDA Matra Simbad twin launchers ●; Mistral; IR homing to 4 km (2.2 n miles); warhead 3 kg.

Guns: 3 Breda/Mausser 30 mm/70 ●. 800 rds/min to 3 km (1.6 n miles); weight of shell 0.36 kg. 4–12 7 mm MGs.

Countermeasures: ECM: 2 Thales ARBB 36A jammers. SLO-25 Nixie towed torpedo decoy.

Combat data systems: STIDAV/SENIT 8-01 for close range air defence; Syracuse SATCOM ●. OPSMER command support system. Link 11 (receive only). INMARSAT

Weapons control: 2 Sagem DIBC-2A VIGY-105 optronic systems (for 30 mm guns).

Radars: Air/surface search: Thomson-CSF DRBV 21A Mars ●; D-band.

Surface search: Racal Decca 2459 (*Foudre*); I-band

Navigation: 2 Racal-Decca DRBN 34A (*Siroco*) or Racal-Decca 1229 (*Foudre*); I-band (1 for helo control) ●

SIROCO

(Scale 1 : 1,500), Ian Sturton / 0529157

Helicopters: 4 AS 532UL Cougar or SA 330B Puma ● or 2 Super Frelon.

Programmes: First ordered 5 November 1984, second 11 April 1994. Transports de Chalands de Debarquement (TCD)

Modernisation: Sadral SAM replaced by two lightweight Simbad SAMs either side of bridge. New air search radar 30 mm guns to replace 40 mm and 20 mm in *Foudre* and fitted on build in *Siroco*. Sagem optronic fire control fitted in 1992.

Structure: Designed to take a mechanised regiment of the Rapid Action Force and act as a logistic support ship. Extensive command (OPSMER and other systems) and hospital facilities (500 m²) include two operating suites and 47 beds. Modular field hospital may be embarked on *Siroco*.

Well dock of 122 × 14.2 m (1,732 m²) which can be used to dock a 400 tons ship. Crane of 37 tons and lift of 52 tons (*Foudre*) or 38 tons (*Siroco*). Flight deck of *Foudre* 1,450 m² with two landing spots (the landing grid and SAMAHE helo handling system have been removed). Additional landing spot on the (removable) well rolling cover. *Siroco* landing deck extended aft up to the lift to give a 1,740 m² area. Flume stabilisation fitted in 1993 to *Foudre*.

Operational: Two landing spots on flight deck plus one on deck well rolling cover. Can operate Super Frelons or Super Pumas. Could carry up to 1,800 troops in emergency. Endurance, 30 days (with 700 persons aboard). Assigned to FAN and based at Toulon. Typical loads, one CDIC, four CTM, 10 AMX 10RC armoured cars and 50 vehicles or total of 180 to 200 vehicles (without landing craft).

4 BATRAL TYPE (LIGHT TRANSPORTS AND LANDING SHIPS) (LSTH)

Name	No	Builders	Commissioned
FRANCIS GARNIER	L 9031	Brest Naval Dockyard	21 June 1974
DUMONT D'URVILLE	L 9032	Français de l'Ouest	5 Feb 1983
JACQUES CARTIER	L 9033	Français de l'Ouest	28 Sep 1983
LA GRANDIÈRE	L 9034	Français de l'Ouest	20 Jan 1987

Displacement, tons: 750 standard; 1,580 full load
Dimensions, feet (metres): 262.4 × 42.6 × 7.9 (86 × 13 × 2.4)
Main machinery: 2 SACM AGO 195V12 diesels; 3,600 hp(m) (2.65 MW) sustained, 2 shafts; cp props
Speed, knots: 14.5 **Range, n miles:** 4,500 at 12 kt
Complement: 52 (5 officers)
Military lift: 180 troops; 12 vehicles; 350 tons load; 10 ton crane
Missiles: SAM: 2 Matra Simbad twin launchers (may be fitted).
Guns: 2 Bofors 40 mm/60 (L 9031). 2 Giat 20F2 20 mm (L 9032-L 9034). 2—12.7 mm MGs.
Radars: Navigation: DRBN 32; I-band.

Helicopters: Platform for Lynx or Panther.

Programmes: Classified as Batral 3F Bâtiments d'Assaut et de TRANSPORT Légers (BATRAL). First two launched 17 November 1973. *Dumont D'Urville* floated out 27 November 1981. *Jacques Cartier* launched 28 April 1982 and *La Grandière* 15 December 1985. *FGarnier* refitted at Brest 2000

Structure: 40 ton bow ramp; stowage for vehicles above and below decks. One LCVP and one LCPS carried. Helicopter landing platform. Last three of class have bridge one deck higher, a larger helicopter platform and a crane replaces the boom on the cargo deck.

Operational: Deployment: *F Garnier*, Martinique; *D D'Urville*, Papeete; *J Cartier*, New Caledonia; *La Grandière*, Indian Ocean. Service lives of *F Garnier* (2011), *Dumont D'Urville* (2012), *J Cartier* (2013) and *La Grandière* (2014) extended. *Champlain* placed in reserve in Martinique 2004 and later sunk as a target. Deletion of *F Garnier* in 2009 is expected.

Sales: Ships of this class built for Chile, Gabon, Ivory Coast and Morocco. *La Grandière* was also built for Gabon under Clause 29 arrangements but funds were not available

2 CDIC CLASS (LCT)

Name	No	Builders	Commissioned
RAPIÈRE	L 9061	SFCN, Villeneuve la Garenne	28 July 1988
HALLEBARDE	L 9062	SFCN, Villeneuve la Garenne	2 Mar 1989

Displacement, tons: 380 standard; 750 full load
Dimensions, feet (metres): 194.9 × 39 × 5.9 (59.4 × 11.9 × 1.8)
Main machinery: 2 SACM Uni Diesel UD 30 V12 M1 diesels; 1,200 hp(m) (882 kW) sustained; 2 shafts
Speed, knots: 10.5 **Range, n miles:** 1,000 at 10 kt
Complement: 18 (1 officer) plus 230 passengers
Military lift: 340 tons
Guns: 2 Giat 20F2 20 mm. 2—12.7 mm MGs.
Radars: Navigation: Recal Decca 1229; I-band

Comment: CDIC (Chaland de Débarquement d'Infanterie et de Chars) built to work with Foudre class. The wheelhouse can be lowered to facilitate docking manoeuvres in the LPDs. Assigned to FAN at Toulon. Given names on 21 July 1997. Replacement of these ships is under consideration. Service lives: 2012

HALLEBARDE

1/2007, B Prézeln / 1305028

2 EDIC 700 CLASS (LCT)

Name	No	Builders	Commissioned
SABRE	L 9051	SFCN, Villeneuve la Garenne	13 June 1987
DAGUE	L 9052	SFCN, Villeneuve la Garenne	19 Dec 1987

Displacement, tons: 365 (L 9051), 325 (L 9052) standard; 736 full load
Dimensions, feet (metres): 193.6 × 38.1 × 5.8 (59 × 11.6 × 1.7)
Main machinery: 2 SACM Uni Diesel UD 30V12 M3 diesels; 1,400 hp(m) (1 MW) sustained, 2 shafts
Speed, knots: 12 **Range, n miles:** 1,800 at 12 kt
Complement: 10 plus 180 passengers
Military lift: 200 tons, 11 trucks or 5 AMX 30
Guns: 2 Giat 20F2 20 mm. 2—12.7 mm MGs.
Radars: Navigation: Recal Decca 1229; I-band.

Comment: Ordered 10 March 1986. Given names on 29 April 1999. Rated as Engins de Débarquement d'Infanterie et Chars (EDIC III). Based at Dakar-Cap Vert (L 9051) and Djibouti (L 9052). L 9051 refitted in 2004. Similar craft to Lebanon and Senegal. Service lives: 2011

SABRE

6/2008*, Cor Van Nierkerken / 1335786

15 CTMS (LCM)

CTM 17-31

Displacement, tons: 59 standard; 150 full load
Dimensions, feet (metres): 78 × 21 × 4.2 (23.8 × 6.4 × 1.3)
Main machinery: 2 Poyaud V8520NS diesels; 450 hp(m) (331 kW); 2 shafts
Speed, knots: 9.5
Range, n miles: 380 at 8 kt
Complement: 4 + 200 passengers
Military lift: 90 tons (maximum), 48 tons (normal)
Guns: 2—12.7 mm MGs
Radars: Navigation I-band.

Comment: First series of 16 built 1966-70 and all have been deleted. Second series CTM 17-18 built by Auroux, Arzon; CTM 19-31 built at CMN, Cherbourg 1982-92. All have a bow ramp. Chaland de Transport de Matériel (CTM). CTM 17 based at Lorient, CTM 18 at Mayotte, CTM 24, 25 at Djibouti, CTM 26 at Dakar and 10 at Toulon. Six others of the class, CTM 12-16, are based at La Rochelle and operated by the French Army Transport Corps (BTI). The Army CTM 17 is based at Dakar-Cap Vert.

CTM 27

MINE WARFARE FORCES

Notes: Replacement of the capabilities of the current mine-countermeasures force is under consideration. The new system, to be introduced from about 2018, is likely to be based on unmanned underwater vehicles.

3 ANTARÈS (BRS) CLASS (ROUTE SURVEY VESSELS) (MHI)

Name	No	Builders	Commissioned
ANTARÈS	M 770	Socarenam, Boulogne	15 Dec 1993
ALTAÏR	M 771	Socarenam, Boulogne	8 July 1994
ALDÉBARAN	M 772	Socarenam, Boulogne	10 Mar 1995

Displacement, tons: 250 standard; 340 full load
Dimensions, feet (metres): 92.6 × 25.3 × 13.1 (28.3 × 7.7 × 4)
Main machinery: 1 Baudouin 12P15-2SR diesel; 800 hp(m) (590 kW); 1 shaft; cp prop; bow thruster
Speed, knots: 12 **Range, n miles:** 3,600 at 10 kt
Complement: 25 (1 officer)
Guns: 1—12.7 mm MG.
Radars: Navigation: 1 Recal-Decca Bridgmaster C 180; I-band
Sonars: 1 TUS DUBM-44 towed sidescan.

Comment: The vessels' role is to conduct surveillance operations in the approaches to Brest in support of the SSBN fleet. BRS Bâtiments Remorqueurs de Sonars. Trawler type similar to Glycine class (see *Training Ships* section). The DUBM 418 towed bodies have been replaced by TUS DUBM-44 Synthetic Aperture Sonar. A mechanical sweep is also carried. There are two 4.5 ton hydraulic cranes. Original dual navigation training role has been lost.

CAPRICORNE (ex-Dianthus)	M 653	17 Apr 1985	26 Feb 1987	14 Aug 1987

Displacement, tons: 562 standard; 615 full load
Dimensions, feet (metres): 168.9 x 29.2 x 12.5 (51.5 x 8.9 x 3.8)
Main machinery: 1 Stork Wärtsilä A-RUB 215V-12 diesel; 1,860 hp(m) (1.37 MW) sustained, 1 shaft; LIPS cp prop
Auxiliary propulsion: 2 motors; 240 hp(m) (179 kW); 2 active rudders; 120 hp (90 kW); 1 bow thruster
Speed, knots: 18; 7 on auxiliary propulsion
Range, n miles: 3,000 at 12 kt
Complement: 49 (5 officers)

Guns: 1 Giat 20F2 20 mm; 720 rds/min to 2 km; 1 12.7 mm MG. 2—7.62 mm MGs.
Countermeasures: MCM: 2 ECA PAP 104 Mod 4 ROVs, Bofors Double Eagle Mk 2 ROV.
Combat data systems: TSM 2061
Radars: Navigation: Racal Decca DRBN 38A (Bridgemaster E 250); I-band.
Sonars: 1 DUBM 21E (TUS 2022 Mk III) sonar (hull-mounted) and one SPIV PVDS on Bofors Double Eagle Mk 2 ROV; dual frequency.

Programmes: All French ships built in Lorient. Belgium, France and the Netherlands each agreed to build 15 (10 in Belgium with option on five more). Subsequently the French programme was cut to 10. Belgium provided all the electrical installations, France all the minehunting gear and some electronics and the Netherlands the propulsion systems. Replacement for the last of class (sold to Pakistan) was ordered in January 1992. Three Belgian ships of the class acquired between March and August 1997 after being in reserve since 1990.

Modernisation: A modernisation programme started in 2001 and was completed in December 2005. Modernisation included replacement of sonar by TUS 2022 Mk III, fitting of a Bofors Double Eagle Mk 2 ROV, a new tactical data system and upgrade of radar and comms.

Structure: GRP hull. Equipment includes: autopilot and hovering; automatic radar navigation; navigation aids by Loran and Syledis.

Operational: Minehunting, minesweeping, patrol, training, directing ship for unmanned mine-sweeping, HQ ship for diving operations and pollution control. Prepacked 5 ton modules of equipment embarked for separate tasks. M 645, 651 and 653 based at Toulon, remainder at Brest. M 651 and M 649 to be deleted in 2009.

Sales: The original tenth ship of the class, completed in 1989, was transferred to Pakistan 24 September 1992 as part of an order for three; the second built in Lorient, the third in Karachi.

ÉRIDAN 6/2008*, Martin Mokrus / 1335743

CÉPHÉE 5/2008*, Michael Nitz / 1335785

4 MCM DIVING TENDERS (MCD)

Name	No	Builders	Launched	Commissioned
VULCAIN	M 611	La Perrière, Lorient	17 Jan 1986	11 Oct 1986
PLUTON	M 622	La Perrière, Lorient	13 May 1986	12 Dec 1986
ACHERON	A 613	CMN, Cherbourg	19 Nov 1986	21 Apr 1987
STYX	M 614	CMN, Cherbourg	3 Mar 1987	22 July 1987

Displacement, tons: 409 standard; 505 full load
Dimensions, feet (metres): 136.5 x 24.6 x 12.5 (41.6 x 7.5 x 3.8)
Main machinery: 2 SACM MGO 175 V16 ASHR diesels; 2,200 hp(m) (1.62 MW); 2 shafts, bow thruster; 70 hp(m) (51 kW)
Speed, knots: 13.7
Range, n miles: 2,800 at 13 kt, 7,400 at 9 kt
Complement: 14 (1 officer) plus 12 divers
Guns: 1—12.7 mm MG. 2—7.62 mm MGs.
Radars: Navigation: Decca DRBN 38; I-band.

Comment: First pair ordered in December 1984. Second pair ordered July 1985. Designed to act as support ships for clearance divers. (Bâtiments Bases pour Plongeurs Démouleurs - BBPD). Vulcain based at Cherbourg, Pluton at Toulon, Achéron at Toulon as a diving school tender and Styx at Brest. Modified Chamols (BSR) class design. 5 ton hydraulic crane.

VULCAIN 4/2008*, Derek Fox / 1335742

SURVEY AND RESEARCH SHIPS

Notes: (1) These ships are painted white. A total of about 100 officers and technicians with oceanographic and hydrographic training is employed in addition to the ships' companies listed here. They occupy the extra billets marked as 'scientists'.
 (2) In addition to the ships listed below there is a civilian-manned 25 m trawler *L'Aventurière II* (launched July 1986) operated by GESMA, Brest for underwater research which comes under DCN.
 (3) Two 9 m survey launches, *Matthaw* and *Hunter* were built in 1980.
 (4) In New Caledonia, there is a 30 m buoy-tender *Louis Hémin* and a 7 m survey launch *Chambeyran*.
 (5) There are three ROVs used for research and salvage. *Ereto* can operate to a depth of 1,200 m; *Achille* to 400 m; *Ulisse* to 1,000 m.

1 BEAUTEMPS-BEAUPRÉ CLASS (BHO HYDROGRAPHIC AND OCEANOGRAPHIC SURVEY SHIP) (AGOR)

Name	No	Builders	Laid down	Launched	Commissioned
BEAUTEMPS-BEAUPRÉ	A 758	Alstom Marine, Lorient	17 July 2001	26 Apr 2002	13 Dec 2003

Displacement, tons: 2,125 standard; 3,330 full load
Dimensions, feet (metres): 264.5 x 48.9 x 23.0 (80.6 x 14.9 x 7)
Main machinery: Diesel-electric; four 1,500 hp(m) (1.1 MW) Mitsubishi diesels; 2 Alstom electric motors; 2,950 hp (2.2 MW); 1 shaft; 3,000 hp(m) (2.2 MW).
 2 active rudders 300 hp(m) (220 kW) each; bow thruster 600 hp(m) (440 kW).

Speed, knots: 14
Range, n miles: 8,300 at 12 kt
Complement: 26 (5 officers) (two crews) plus 25 to 30 scientists
Guns: 2—7.62 mm MGs
Radars: Navigation: 2 Kongsberg; I-band
Sonars: EG & G side looking towed sonar; Kongsberg/Simrad EM 120 deep multipath echo sounder (12 kHz); Kongsberg/Simrad EA 600 deep echo sounder (12 kHz); Kongsberg/Simrad EM 1002S shallow waters multipath echo-sounder (95 kHz); Kongsberg/Simrad EA 400-210 shallow waters echo sounder (33 kHz); Kongsberg/Simrad SBP 120 (3 to 7 kHz) narrow beam and SHOM 9TR 109 (3.5 kHz) wide beam sediment echo sounders. Bodenseewerk KSS31 gravimeter; Thales SMM II magnetometer; acoustic current profiler. Most sensor transducers mounted on a removable chassis fixed underneath the hull. Oceanographic buoys; Sippican Mk 21

Comment: Contracted to Alstom-Leroux Naval 13 March 2001. Derived from the civilian research ship *Thalassa* built in 1995 by Leroux & Lotz (now part of Alstom Marine) for the French government civilian agency IFREMER 95 per cent funded by the MoD and 5 per cent by the Ministry of civilian research on behalf of IFREMER that will use the ship 10 days per year. First steel cut 17 July 2001. Started builder sea trials 17 October 2002 and official acceptance trials late December. Two VH 8 survey launches, 10 tonne stern gantry and 10 tonne crane; up to 5 shelters can be shipped and bolted on the deck to increase lab surfaces; up to 4 vehicles can be stored in the hold. Endurance 45 days. Bâtiment hydrographique et océanographique (BHO, hydrographic and oceanographic survey ship)

BEAUTEMPS-BEAUPRÉ 8/2008*, B Prézilin / 1335741

 Main machinery: 2 MaK 9M25 diesels; 7,965 hp (5.94 MW); 2 shafts; 2 bow thrusters
 Speed, knots: 16 Range, n miles: 3,400 at 16 kt
 Complement: 32 + 78 specialists
 Guns: 2—12.7 mm MGs
 Radars: Navigation: 2 Racal-Decca DRBN 38A; 1 band.

Programmes: Programme initiated 29 October 2001. Contract awarded 14 January 2002 to Thales Naval France (for the mission system) and Compagnie Nationale de Navigation to procure and maintain the vessel for initial five year period. Installation of the MINREM mission system started at Toulon in January 2005. After trials, the ship was delivered to the navy on 15 December 2005 and replaced *Bougainville* in April 2006.

Structure: The ship has a design life of 30 years and is fitted with a flight deck and underway replenishment facilities.

Operational: Fitted with both COMINT and ELINT equipment. The ship is to be available for 350 days a year and active for 240 days. There are two complements. Based at Brest.

DUPUY DE LÔME 8/2008, *Ships of the World* / 1335/170

1 POURQUOI PAS? CLASS (OCEANOGRAPHIC SURVEY SHIP) (AGOR)

Name	No	Builders	Laid down	Launched	Commissioned
POURQUOI PAS?	—	Alstom Marine, St Nazaire	20 Jan 2004	14 Oct 2004	27 Sep 2005

Displacement, tons: 5,000 standard; 6,600 full load
 Dimensions, feet (metres): 353.0 × 65.6 × 22.6 (1076 × 20 × 6.9)
 Main machinery: Diesel-electric; four Wärtsilä 8L 20C diesel generators 7,725 hp (5.8 MW); two Alstom electric motors; 4,500 hp(m) (3.3 MW); 2 shafts; LIPS cp props
 Speed, knots: 14.5 Range, n miles: 16,000 at 11 kt
 Complement: 33 + 40 scientists
 Radars: Navigation: 2 Kongsberg; 1-band.

Sonars: Reason Seabat 7111 (100 kHz) and Seabat 7150 (12/24 kHz) multipath echo sounders; Simrad EA 600 (12/38/200 kHz) deep echo sounder; RDI Ocean Surveyor current profiler (38/150 kHz); Eramer/Triton Elica sediment echo sounder (2-8 kHz); most sensor transducers mounted on a removable chassis fixed underneath the hull; also optional towed sonars.

Comment: Contract awarded 17 December 2002 to Alstom Marine. Funded 55 per cent by the Ministry of Research and Education, and 45 per cent by the MoD which will use the ship 150 days per year; civilian manned (operated by Genevir on behalf of IFREMER research agency — see Government Maritime Forces), with navy specialists when operating for military campaigns. First steel cut 1 September 2003. Trials in February 2005 and delivery in March 2005. Optional additional labs in containers; helo dock. Able to operate the *Nautilus* mini sub, the *Victor 6000* ROV or the future NATO Submarine Rescue System (NSRS); can embark up to three navy VH 8 survey launches (two under davits), stern gantry to handle equipments up to 22 tonnes. Space allocated to embark up to 20 20 ft containers. Endurance 60 days. *Pourquoi Pas?* (Why not?) is the name given by the famous explorer and oceanographer Jean-Baptiste Charcot (1867-1936) to several of his research vessels.

POURQUOI PAS? 9/2005, *B Prézellin* / 1153176

3 LAPÉROUSE (BH2) CLASS (AGS)

Name	No	Builders	Launched	Commissioned
LAPÉROUSE	A 791	Lorient Naval Dockyard	14 Nov 1986	20 Apr 1988
BORDA	A 792	Lorient Naval Dockyard	14 Nov 1986	16 June 1988
LAPLACE	A 793	Lorient Naval Dockyard	9 Nov 1988	5 Oct 1989

Displacement, tons: 850 standard, 980 full load
 Dimensions, feet (metres): 193.5 × 35.8 × 13.8 (59 × 10.9 × 4.2)
 Main machinery: 2 Unidiesel UD 30 175V12RVR diesels; 2,500 hp(m) (1.84 MW); 2 cp props; auxiliary propulsion; electric motor and 160 hp(m) (120 kW); bow thruster
 Speed, knots: 15 Range, n miles: 6,000 at 12 kt
 Complement: 31 (3 officers) plus 11-18 scientists
 Guns: 2—7.62 mm MGs
 Radars: Navigation: Decca Bridgemaster (DRBN 38A) (A 791, 792); Furuno (A 793); 1-band.

Sonars: Thomson Sintra DUBM 42 (A 792, A 793), active search; high frequency. DUBM 21C (A 791); active search; high frequency. EG & G towed sidescan sonar. Kongsberg/Simrad EM 1002 S shallow water multipath echo sounder (95 kHz); Thales SMM II magnetometer; sediment echo sounder. Atlas DESO 20 echo sounder (A 791) (100 kHz).

Comment: Ordered under 1982 and 1986 estimates, first two on 24 July 1984, third 22 January 1986 and fourth (*Arago* — converted in 2002 to patrol craft) on 12 April 1988. BH2 (Bâtiments Hydrographiques de 2e classe). Carry 2-3 VH 8 survey launches. Based at Brest.

BORDA 6/2007, *B Prézellin* / 1305032

1 RESEARCH SHIP (AGMH)

Name	No	Builders	Launched	Commissioned
MONGE	A 601	Chantiers de l'Atlantique, St Nazaire	6 Oct 1990	5 Nov 1992

Displacement, tons: 17,760 standard; 21,040 full load
 Dimensions, feet (metres): 740.1 × 81.4 × 25.3 (225.6 × 24.8 × 7.7)
 Main machinery: 2 SEMT-Pielstick 8 PC2.5 L 400 diesels; 10,400 hp(m) (7.65 MW) sustained; 1 shaft; LIPS cp props; bow thruster; 1,360 hp(m) (1 MW)
 Speed, knots: 16 Range, n miles: 15,000 at 15 kt
 Complement: 115 (9 officers) plus 90 military and civilian technicians
 Guns: 2—20 mm 2—12.7 mm MGs
 Combat data systems: Tavitac 2000 for trials.

Radars: Air search: Thomson-CSF DRBV 15C (Sea Tiger Mk 2); E/F-band. Missile tracking: 1 Gascogne; C-band. 2 Amor; C-band. 1 Savoie; C-band. 1 Stratus (for trajectory); L-band. 6 Antares (telemetry); E/F-band. Navigation: Two Racal Decca (DRBN 34A) (one for helo control); 1-band. Helicopters: 1 Alouette III.

Comment: Ordered 25 November 1988. Rated as a BEM (Bâtiment d'Essais et de Mesures). Laid down 26 March 1990, and launched 6 October 1990. She has 14 telemetry antennas, optronic tracking unit; LIDAR; Syracuse SATCOM and Inmarsat. Flume tank stabilisation restricts the ship to a maximum of 9° roll at slow speed in Sea State 6. Flagship of the Trials Squadron. Used for space surveillance by the French Space Agency (CNES) and for M 45 and M 51 ballistic missile tests. Hangar space for two Super Frelon or NH 90. To be equipped a single Stratus with two aeriels, to replace Savoie and Stratus, by 2009. Based at Brest.

MONGE 5/2008, *B Prézellin* / 1335739

1 LAPÉROUSE CLASS (MCD/BEGM)

Name	No	Builders	Launched	Commissioned
THÉTIS (ex-Nerèide)	A 785	Lorient Naval Dockyard	14 Dec 1986	9 Nov 1988

Displacement, tons: 900 standard; 1,050 full load
 Dimensions, feet (metres): 193.5 × 35.8 × 12.5 (59.0 × 10.9 × 3.8)
 Main machinery: 2 Uni Diesel UD 30 V16 M4 diesels; 2,710 hp(m) (1.99 MW) sustained; 1 shaft; cp prop
 Speed, knots: 15 Range, n miles: 6,000 at 12 kt
 Complement: 38 (2 officers) plus 7 passengers
 Guns: 2—12.7 mm MGs
 Radars: Navigation: Racal Decca Bridgemaster (DRBN 38A); 1 band.

Sonars: VDS; Thomson Sintra DUBM 42 and DUBM 60A; active search; high frequency TUS TSM 2022 Mk 3 PVDS (fitted to Double Eagle ROV); active search and classification.

Comment: Same hull as Lapérouse class. Classified as Bâtiment Experimental Guerre de Mines (BEGM). Operated by the Centre d'Études, d'Instruction et d'Entraînement de la Guerre des Mines (CETIEGM) in Brest. Launched 19 March 1988. Renamed to avoid confusion with Y 700. Equipped to conduct trials on all underwater weapons and sensors for mine warfare. Can lay mines. Can support six divers.

THÉTIS 7/2008, *B Prézellin* / 1335739

7 TYPE VH 8 FASSMER SURVEY LAUNCHES (YGS)

Displacement, tons: 4.5
 Dimensions, feet (metres): 25.9 × 7.9 × 1.6 (7.9 × 2.4 × 0.5)
 Main machinery: 1 Volvo Penta Aquamatic Duotop (41 TD) diesel; 2-drive; 1 shaft; 237 hp(m) (174 kW)
 Speed, knots: 17 Range, n miles: 109
 Complement: 6

Comment: Built by Fr. Fassmer GmbH & Co (Germany); first craft delivered October 2002 and based at Toulon since July 2003. Last craft delivered October 2003. Carried by *Beautemps-Beaupré* and Lapérouse-class survey vessels. Vedette hydrographique de 8m (VH 8). Fitted with two echo sounders, one multipath echo sounder (Simrad EM 3200), side-scan towed sonar and towed magnetometer. Unofficial names: *Albatros*, *Cormoran*, *Gaëland*, *Guillemot*, *Mscareux*, *Pelican*, *Phaeton*.

1 RESEARCH SHIP (AETL)

Name	No	Builders	Launched	Commissioned
DENTI	A 743	DCANToulon	7 Oct 1975	15 July 1976

Displacement, tons: 190 full load
 Dimensions, feet (metres): 113.8 × 21.6 × 7.5 (34.7 × 6.6 × 2.3)
 Main machinery: 2 Baudouin DP8 diesels; 960 hp(m) (706 kW); 2 shafts; cp props
 Speed, knots: 12. Range, n miles: 800 at 12 kt
 Complement: 6 (2 officers) plus 6 scientists
 Radars: Navigation: Decca; I-band.

Comment: Employed on ammunition trials for DCN off Toulon. Service life extended to 2010.

DENTI 6/2007, B Prézellin / 1305035

TRAINING SHIPS

Notes: The incomplete hull of *Narvik*, the first type BAMO catamaran minehunter (project cancelled), has been adapted to act as a training hulk for marines to conduct ship assault operations. Laid up at Lorient.

2 CHIMERE CLASS (TRAINING SHIPS) (AXL)

CHIMÈRE Y 706 FARFADET Y 711

Displacement, tons: 100 full load
 Dimensions, feet (metres): 100.1 × 17.1 × 5.7 (30.5 × 5.2 × 1.75)
 Main machinery: 2 Baudouin DK4 M diesels; 400 hp (300 kW); 1 shaft
 Speed, knots: 11
 Complement: 7
 Radars: Navigation: Decca 1226; I-band.

Comment: Naval school tenders built at Bayonne and which entered service in 1970 (Y 706) and 1971 (Y 711). Due to be decommissioned in 2010.

CHIMÈRE 11/2006, B Prézellin / 1040701

TIGRE	A 754	La Perrière, Lorient	1 July 1983
LION	A 755	La Perrière, Lorient	10 Sep 1983

Displacement, tons: 335 standard; 470 full load
 Dimensions, feet (metres): 141 × 27.1 × 10.5 (43 × 8.3 × 3.2)
 Main machinery: 2 SACM MGO 175 V16 ASHR diesels; 2,200 hp(m) (1.62 MW); 2 shafts; cp props
 Speed, knots: 15. Range, n miles: 4,800 at 12 kt
 Complement: 15 plus 22 trainees
 Guns: 2—12.7 mm MGs.
 Radars: Navigation: Racal Decca DRBN-38A (Bridgemaster E 250), I-band.

Comment: First four ordered May 1980. Further four ordered April 1981. Form 20ème Divec (Training division) for shiphandling training and occasional EEZ patrols. Based at Brest. To be decommissioned 2010–14.

PANTHÈRE 6/2008, Michael Nitz / 1335703

2 GLYCINE CLASS (AXL)

Name	No	Builders	Commissioned
GLYCINE	A 770	Socarenam, Boulogne	11 Apr 1992
EGLANTINE	A 771	Socarenam, Boulogne	9 Sep 1992

Displacement, tons: 250 standard; 295 full load
 Dimensions, feet (metres): 92.8 × 25.3 × 12.5 (28.3 × 7.7 × 3.8)
 Main machinery: 1 Baudouin 12P15-2SR diesel, 800 hp(m) (588 kW); 1 shaft; cp prop
 Speed, knots: 10. Range, n miles: 3,800 at 10 kt
 Complement: 10 + 18 trainees
 Radars: Navigation: 4 Furuno, I-band.

Comment: Trawler type training ships. Three more built in 1995–96 as route survey craft (included under *Mine Warfare Forces* section). Based at Brest.

EGLANTINE 8/2007, B Prézellin / 1305037

2 LA BELLE POULE CLASS (AXS)

L'ÉTOILE A 649 LA BELLE POULE A 650

Displacement, tons: 275 full load
 Dimensions, feet (metres): 127 × 24.3 × 12.1 (37.5 × 7.4 × 3.7)
 Main machinery: 1 Baudouin DNP 8 diesel, 245 hp(m) (180 kW); 1 shaft
 Speed, knots: 9 (diesel)
 Complement: 20 (1 officer) plus 20 trainees

Comment: Auxiliary sail vessels. Built by Chantiers de Normandie (Fécamp) and launched 7 July 1932 and 8 February 1932 respectively. Accommodation for three officers, 30 cadets, five petty officers, 12 men. Sail area 450 m². Attached to Naval School. A 650 refitted in 2006.

LA BELLE POULE 6/2008, B Prézellin / 1335737

1 SAIL TRAINING SHIP (AXS)

LA GRAND HERMINE (ex-*La Route est Belle*, ex-*Ménestrel*) A 653

Displacement, tons: 13 full load
 Dimensions, feet (metres): 45.9 × 13.5 × 6.6 (14.0 × 4.1 × 2.0)
 Main machinery: 1 MWM D 225A diesel, 55 hp (41 kW); 1 shaft
 Speed, knots: 7
 Complement: 7
 Radars: Navigation: 1 Furuno DRBN 39; I-band.

Comment: Training yawl built in Marseille in 1932. Procured by the French Navy in 1963 and based at Brest.

LA GRAND HERMINE 2/2005, B Prézellin / 1153158

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Launched
MUTIN	A 652	Florimond-Guignardeau, Les Sables d'Olonne	18 Mar 1927

Displacement, tons: 57 full load
Dimensions, feet (metres): 108.3 × 21 × 11.2 (33 × 6.4 × 3.4)
Main machinery: 1 diesel; 112 hp(m) (82 kW); 1 auxiliary prop
Speed, knots: 6 (diesel)
Range, n miles: 860 at 6 kt
Complement: 12 + 8 trainees
Radars: Navigation: Furuno; I-band.

Comment: Attached to the Navigation School. Has a sail area of 312 m². This is the oldest ship in the French Navy. Used by the SOE during the Second World War.

MUTIN 7/2005, B Prézélin / 1153159

AUXILIARIES

Notes. (1) The programme to procure up to eight 'Bâtiments de Soutien et d'assistance hauturiers' (BSAH) has been delayed due to funding difficulties and may have been overtaken by plans (announced in July 2008) to charter two 'Bâtiments de Soutien, d'assistance et de dépollution' (BSAP) from Bourbon Offshore.

(2) 30–40 harbour service craft are to be procured to replace older series of harbour tenders and service craft. With the same basic hull and machinery, the class should comprise pilot boats, diving support tenders and fire-fighting craft. Entry into service is planned by 2010.

(3) Inshore transport duties at Brest and Toulon have been chartered to civilian companies. At Brest, Société Morbihannaise de Navigation (SMN) awarded a five-year contract from 1 July 2004 to transport 2,300 daily passengers from Brest to and from Lanvéoc-Poulmic and l'Île Longue. The company has progressively introduced five purposely-built light transports; *Bindy*, *Tibidy*, *Trebéron*, *Arun* and *Térenex* built 2004–05 by Gamelin, La Rochelle (aluminium hull and superstructure, 35.4 × 9 × 1.7 m, 20 kt, 400 passengers).

(4) There are plans to acquire four new AOR to replace the Durance class from about 2017

4 CHAMOIS CLASS (SUPPLY TENDERS) (AG/ATS/YDT/YPC/YPT)

Name	No	Builders	Commissioned
TAAPE	A 633	La Perrière, Lorient	2 Nov 1983
ÉLAN	A 768	La Perrière, Lorient	7 Apr 1978
CHEVREUIL	A 774	La Perrière, Lorient	7 Oct 1977
GAZELLE	A 775	La Perrière, Lorient	13 Jan 1978

Displacement, tons: 315 (375 A 633) light, 505 full load
Dimensions, feet (metres): 136.1 × 24.6 × 10.5 (41.5 × 7.5 × 3.2)
Main machinery: 2 SACM AGO 175 V16 diesels; 2,850 hp(m) (2.06 MW); 2 shafts; cp props; bow thruster
Speed, knots: 14.5
Range, n miles: 7,200 (6,000 A 633) at 12 kt
Complement: 20 plus 12 spare berths
Radars: Navigation: Racal Decca 1226; I-band.

Comment: Similar to the standard fish oil rig support ships. Can act as tugs, oil pollution vessels, salvage craft (two 30 ton and two 5 ton winches), coastal and harbour controlled minelaying, torpedo recovery, diving tenders and a variety of other tasks. Bollard pull 25 tons. Can carry 100 tons of stores on deck or 125 tons of fuel and 40 tons of water or 65 tons of fuel and 120 tons of water. *Taape* ordered in March 1982 from La Perrière of improved design but basically similar with bridge one deck higher. *Élan* based at Cherbourg, remainder at Toulon. Three paid off so far, one of which (ex-*Chamois*) transferred to Madagascar in May 1996. *Élan*, *Chevreuil* and *Gazelle* to be decommissioned in late 2009 and *Taape* in 2013.

CHEVREUIL 4/2008*, B Prézélin / 1335736

4 DURANCE CLASS
(UNDERWAY REPLENISHMENT TANKERS) (AORHM)

Name	No	Builders	Laid down	Launched	Commissioned

VAR	A 608	Brest Naval Dockyard	8 May 1979	1 June 1981	29 Jan 1983
MARNE	A 630	Brest Naval Dockyard	4 Aug 1982	2 Feb 1985	16 Jan 1987
SOMME	A 631	Normed, la Seyne	3 May 1985	3 Oct 1987	7 Mar 1990

Displacement, tons: 7,600 (A 607); 7,800 (others) standard; 17,900 (A 607); 18,500 (others) full load
Dimensions, feet (metres): 515.9 × 69.5 × 38.5 (157.3 × 21.2 × 10.8)
Main machinery: 2 SEMT-Pielstick 16 PC2.5 V 400 diesels, 20,800 hp(m) (15.3 MW) sustained; 2 shafts; LIPS cp props
Speed, knots: 19
Range, n miles: 9,000 at 15 kt
Complement: 162 (11 officers) plus 29 spare
Cargo capacity: 1,300 tons FFO; 5,200 diesel; 3,000 TR5 Avcat; 130 distilled water; 170 victuals; 150 munitions, 50 naval stores (*Meuse*) 1,300 tons FFO; 8,400 diesel; 1,090 TR5 Avcat; 260 distilled water; 170 munitions; 250 tons spare parts (*Var*, *Somme* and *Marne*)

Missiles: SAM: 3 (1 in A 607) Matra Simbad twin launchers, Mistral; IR homing to 4 km (2.2 n miles); warhead 3 kg.
Guns: 1 Bofors 40 mm/L 60
 2 Oerlikon Mk 10 20 mm.
 4—12.7 mm MGs
Countermeasures: ESM/ECM
Combat data systems: AIDCOMER command support system (fitted for BCR ships). Syracuse and INMARSAT SATCOM
Radars: Navigation: 2 Racal Decca Bridgemaster (DRBN 38A); I-band.

Helicopters: 1 SA 319B Atouette III.

Programmes: One classed as Pétrolier Ravitailleur d'Escadres (PRE). Other three classed as Bâtiments de Commandement et de Ravitaillement (BCR; Command and Replenishment Ships)

Modernisation: EW equipment fitted to improve air defences under the 3A programme in 1996–99. Simbad SAM may be carried at bridge deck level. Oerlikon 20 mm to be replaced by 12.7 mm MGs.

Structure: Four beam transfer positions and two stern, two of the beam positions having heavy transfer capability. *Var*, *Marne* and *Somme* differ from *Meuse* in several respects. The bridge extends further aft, boats are located either side of the funnel and a crane is located between the gantries. Also fitted with Syracuse 3 SATCOM

Operational: *Var*, *Marne* and *Somme* are designed to carry a Maritime Zone staff or Commander of a Logistic Formation and a commando unit of up to 45 men. Capable of accommodating 250 men. Assigned to FAN with one of the three BCR ships deployed to the Indian Ocean as a Flagship. *Somme* replaced *Var* in that role for two years from August 2009. To be replaced after 2015 by new ships

Sales: One to Australia built locally; two of similar but smaller design to Saudi Arabia. One to Argentina in July 1999.

MEUSE 2/2008*, B Prézélin / 1335735

MARNE 3/2007, Paul Daly / 1170125

REVI	A 635	Breheret, Couéron	9 Mar 1985

Displacement, tons: 1,035 light, 1,577 full load
Dimensions, feet (metres): 167.3 x 41.3 x 13.1 (51 x 12.6 x 4)
Main machinery: 2 SACM-Wärtsilä AGO 195 V12 M6 diesels; 4,410 hp(m) (3.24 MW); 2 shafts; cp props; 2 bow thrusters; 400 hp (300 kW)
Speed, knots: 14.5
Range, n miles: 5,800 at 12 kt
Complement: 26 (2 officers) plus 8 passengers
Radars: Navigation, Racal Decca Bridgemaster (DRBN 38A); I-band.

Comment: 'Remorqueurs ravitailleurs' built for le Centre d'Expérimentation du Pacifique. Can carry 400 tons of cargo or six 20 ft containers, 50 ton gantry and 18 ton cranes. Two water cannons on deck. Boilard pull 47 tons. Based at Papeete.

RR 4000 CLASS

4/2007, B Prézélin / 1305040

1 TRANSPORT LANDING SHIP (LSL)

Name	No	Builders	Commissioned
GAPEAU	L 9090	Chantier Serra, la Seyne	2 Oct 1987

Displacement, tons: 563 standard; 1,090 full load
Dimensions, feet (metres): 216.5 x 41.0 x 11.2 (66 x 12.5 x 3.4)
Main machinery: 2 diesels; 550 hp(m) (404 kW); 2 shafts
Speed, knots: 11
Range, n miles: 1,900 at 10 kt
Complement: 6 + 30 scientists
Cargo capacity: 460 tons
Radars: Navigation: Racal Decca 1226 and Furuno FRS 1000; I-band.

Comment: Supply ship with bow doors. Operates for Centre d'Essais de la Méditerranée. Conducts transfers between Toulon or Port Pothuau and Levant Island (missile range).

GAPEAU

5/2003, Per Körnefeldt / 0309982

1 MOORING VESSEL (ABU)

TELENN MOR Y 692

Displacement, tons: 392 standard; 520 full load
Dimensions, feet (metres): 135.8 x 29.9 x 6.2 (41.4 x 9.1 x 1.9)
Main machinery: 2 Baudouin diesels, 900 hp(m) (670 kW)
Speed, knots: 8
Radars: 1 Racal Decca; I-band

Comment: Commissioned on 16 January 1986 and based at Brest. Equipped with 18 ton hydraulic crane.

TELENN MOR

8/2006, B Prézélin / 1040706

2 RANGE SUPPORT VESSELS (YFRT)

Athos A 712	Aramis A 713
-------------	--------------

Displacement, tons: 89 standard; 108 full load
Dimensions, feet (metres): 105.3 x 21.3 x 6.2 (32.1 x 6.5 x 1.9)
Main machinery: 2 SACM UD 33V12 M5 diesels; 3,950 hp(m) (2.94 MW); 2 shafts
Speed, knots: 28
Range, n miles: 1,200 at 15 kt
Complement: 13 plus 6 passengers
Guns: 1—12.7 mm MG
Radars: Navigation, Racal Decca 1226 (A 712); Furuno (A 713); I-band.

Comment: Built by Chantiers Navals de l'Estérel for Missile Trials Centre of des Landes (CELM). Based at Bayonne, forming Groupe des Vedettes de l'Adour. A 712 commissioned 20 November 1979 and A 713 on 9 September 1980. Classified as Range Safety Craft from July 1995. Athos completed refit at Cherbourg in April 2003. Service life extended to 2010.

9 VIP 21 DIVING TENDERS (YDT)

Dionée Y 790	Liseron Y 793	Genéty Y 796
Myosotis Y 791	Magnolia Y 794	Giroflée Y 797
Gardénia Y 792	Ajoncy Y 795	Acanthe Y 798

Displacement, tons: 35 standard; 49 full load
Dimensions, feet (metres): 71.2 x 16.1 x 5.2 (21.7 x 4.9 x 1.6)
Main machinery: 2 Baudouin 12F11M or V6TI 330 diesels; 530 hp(m) (390 kW); 3 shafts (1 for loitering)
Speed, knots: 13. **Range, n miles:** 500 at 12 kt
Complement: 4 plus 14 divers
Radars: Navigation, Racal Decca RD 170

Comment: Diving tenders built at Lorient. First one delivered in February 1990. Y 794 and Y 798 based at Cherbourg. Y 790, Y 791, Y 792, Y 795 and Y 797 based at Toulon. Y 793 and Y 796 based at Brest. Rated as 'Vedettes d'Instruction Plongée de 21 m (VIP 21)', divers training craft, and 'Vedettes d'Intervention Plongeurs-Démineurs (VIPD 21)', clearance diving team support craft.

2 VTP CLASS (TRANSPORTS) (YFB)

KERMEUR Y 758	KERNALEGUEN Y 759
---------------	-------------------

Displacement, tons: 15 standard, 21 full load
 Dimensions, feet (metres): 45.9 x 7 x 7 (14.0 x 7 x 7)
 Main machinery: 2 MAN diesels; 800 hp (600 kW); 2 shafts
 Speed, knots: 8
 Complement: 3 + 45 passengers
 Radars: Navigation; Furuno; I-band.

Comment: Built by Raidco Marine and delivered 19 September 2006. GRP hull and superstructure. Used as transport craft at l'île Longue.

KERMEUR 8/2007, B Prézelin / 1305044

6 FLOATING REPAIR FACILITIES

Comment: There is one 150 x 33 m floating dock of 3,800 tons capacity, built at Brest in 1975. Based at Papeete. There are five floating cranes: three 15 ton cranes at Toulon (GFA 1, 3 and 4), one at Brest (GFA 6 *Alpaga*) and one 60 ton crane at Cherbourg.

2 PHAÉTON CLASS (TOWED ARRAY TENDERS) (YAG)

PHAÉTON Y 656	MACHAON Y 657
---------------	---------------

Displacement, tons: 69 standard; 75 full load
 Dimensions, feet (metres): 63.0 x 22.3 x 3.9 (19.2 x 6.8 x 1.2)
 Main machinery: 2 SACM diesel; 720 hp (530 kW); waterjet
 Speed, knots: 8. Range, n miles: 300 at 8 kt
 Complement: 4

Comment: 18.6 m catamarans built in 1993-94 at Brest. Water-jet propulsion, speed 8 kt. Hydraulic crane and winch to handle submarine towed arrays. *Phaéton* based at Toulon. *Machaon* at Brest.

MACHAON 6/2008*, B Prézelin / 1335732

42 + 5 HARBOUR SUPPORT CRAFT

Comment: There are 11 oil barges (CICGH), one of which is of 1,200 tonnes and the rest between 100 and 800 tonnes, eight 400 tonne oily bilge barges (CIEM), three anti-pollution barges (800 tonne BAPM, and two 400 tonne CIEP), and seven water barges (CIE, 120 to 400 tonnes). Some self-propelled. Also 10 self-propelled YFLUs (CHA 27-30, 32, 34-38), and one 15 m Saa Truck craft (*Anthies*)

CHA 30 10/1999, van Ginderen Collection / 0069961

1 RADIOLOGICAL MONITORING CRAFT (AGE)

CORALLINE A 790

Displacement, tons: 41 standard; 49 full load
 Dimensions, feet (metres): 71.2 x 16.1 x 5.2 (21.7 x 4.9 x 1.6)
 Main machinery: 2 Baudouin 12F11M diesels, 530 hp (390 kW); 2 shafts
 Speed, knots: 13. Range, n miles: 500 at 12 kt
 Complement: 7
 Radars: Navigation. Furuno 1832, I-band

Comment: Built by DCN Lorient and delivered 1 December 1990. Similar to VIP 21 diving tenders but with different superstructure. Employed on radiation monitoring tasks at Cherbourg.

3 VIR FIREFIGHTING CRAFT (YTR)

AVEL ABER (ex- <i>Eloarn</i>) Y 783	LA LOUDE Y 784	LA DIVETTE Y 785
--------------------------------------	----------------	------------------

Displacement, tons: 14 standard; 23 full load
 Dimensions, feet (metres): 47.9 x 15.1 x 6.2 (14.6 x 4.6 x 1.9)
 Main machinery: 2 Baudouin V6 T1450 diesels; 750 hp (550 kW); 2 shafts
 Speed, knots: 17. Range, n miles: 110 at 12 kt
 Complement: 4
 Radars: Navigation. Furuno 1832; I-band

Comment: Firefighting craft built by Alan Sibiri, Carantec, and delivered in 1993-94. Similar to V 14 craft. Equipped with two water cannons.

AVEL ABER 8/2008*, B Prézelin / 1335731

5 COUACH-PLASCOA 980 (SERVICE CRAFT) (YFL)

NYMPHEA Y 603 (ex-P706) **PIVOINE** Y 705 (ex-P705)
FUCHSIA Y 604 (ex-P712) **GENERAL DELFOSSE** Y 710 (ex-P 710)
GENDARME PEREZ Y 605 (ex-P 708)

Displacement, tons: 6 standard; 7 full load
Dimensions, feet (metres): 32.5 x 12.2 x 3.3 (9.9 x 3.73 x 1.0)
Main machinery: 2 Volvo Penta TAMD 61 diesels; 500 hp (370 kW); 2 shafts
Speed, knots: 28. **Range, n miles:** 200 at 15 kt
Complement: 4
Radars: Navigation: Furuno 2400; I-band.

Comment: Former Gendarmerie Maritime craft built in 1985 and transferred in 2004-05. Based at Brest (*Nymphée, General Delfosse*), Toulon (*Pivoine*), Saint Mandrier (*Fuchsia, Gendarme Perez*).

PIVOINE 10/2006, B Prézélin / 1040/11

6 ARCOR 34 (SERVICE CRAFT) (YFL)

LAVANDE Y 606 (ex-P 717) **GENTIANE** - (ex-P 711) **STERDEN**
LILAS Y 703 (ex-P 703) **BEGONIA** - (ex-P 704) **AN HEOL**

Displacement, tons: 7 standard, 8 full load
Dimensions, feet (metres): 33.8 x 12.3 x 3.34 (10.3 x 3.7 x 1.0)
Main machinery: 2 Volvo Penta TAMD 61 diesels; 500 hp (370 kW); 2 shafts
Speed, knots: 26. **Range, n miles:** 200 at 20 kt
Complement: 3
Radars: Navigation: Furuno 1830, I-band.

Comment: Built in 1989-90 by CN d'Aquitaine. *Sterden* and *An Heol* are used as transport craft in the submarine base at l'Île Longue. The others are former Gendarmerie Maritime craft transferred in 2004-05. Based at Brest (*Begonia*), l'Ecole Navale (*Lilas*), Saint Mandrier (*Lavande*) and Hyères (*Gentiane*).

5 SELF-PROPELLED FLOATING CRANES (YD)

Y 675-679

Displacement, tons: To be announced
Dimensions, feet (metres): 70.2 x 37.7 x 5.6 (21.4 x 9.9 x 1.7)
Main machinery: 2 diesels; 300 hp (220 kW); 2 shafts
Speed, knots: 6
Complement: 3

Comment: Ordered from Socarenam, Boulogne-sur-Mer on 16 January 2007 and delivered in March 2008. Equipped with a crane with a capacity of 8.3 tonnes to 8.5 metres and a winch with a capacity of 12 tonnes. Capable of carrying 24 tonnes of cargo. One based at Cherbourg and two each at Brest and Toulon.

Y 677 5/2008, B Prézélin / 1335/30

TUGS

2 ESTEREL (TYPE RPC 50) CLASS (COASTAL/HARBOUR TUGS) (YTM)

ESTEREL A 641 (ex-Y 601) **LUBÉRON** A 642 (ex-Y 602)

Displacement, tons: 510 standard; 670 full load
Dimensions, feet (metres): 119.1 oa; 116.5 wl x 38.1 x 16.4 (36.3; 35.5 x 11.6 x 5)
Main machinery: 2 ABC 8 DZ 1000, 179 diesels; 2 Voith-Schneider 28 GII propulsors; 5,120 hp(m) (3,812 kW)
Speed, knots: 14. **Range, n miles:** 1,500 at 12 kt
Complement: 8
Radars: Navigation: Furuno DRBN 39; I-band

Comment: Ordered 15 December 2000; built by SOCARENAM, Boulogne. *Estérel* delivered 27 March 2002 and *Lubéron* 4 July 2002. Based at Toulon to assist *Charles de Gaulle* in harbour. Bollard pull 52 tonnes; 1,350 kN towing winch, fire fighting equipment, 20 cubic metre tank for pollution control dispersal agent. Classified as 'Remorqueurs portuaires et côtiers de 50 tonnes de traction' (RPC 50, 50 tonne bollard pull harbour tugs).

ESTEREL 6/2008, B Prézélin / 1335/29

2 OCEAN TUGS (ATA)

MALABAR A 664 **TENACE** A 669

Displacement, tons: 1,080 light; 1,454 full load
Dimensions, feet (metres): 167.3 x 37.8 x 18.6 (51 x 11.5 x 5.7)
Main machinery: 2 Krupp MaK 9 M 452 AK diesels, 4,600 hp(m) (3.38 MW); 1 shaft; Kort nozzle
Speed, knots: 15
Range, n miles: 9,500 at 13 kt
Complement: 56 (2 officers)
Radars: Navigation: Racal Decca RM 1226 (A 669); Racal Decca 060 (A 664); I-band. Racal Decca 080; I-band.

Comment: *Malabar* and *Tenace* built by J. Oelkers, Hamburg. *Tenace* commissioned 15 November 1973, and *Malabar* on 3 February 1976. Based at Brest. Can carry firefighting and oil-pollution control equipment. Bollard pull, 60 tons. One of the class to Turkey in 1999. To be decommissioned in 2011.

MALABAR 7/2006, B Prézélin / 1040/12

3 BÉLIER CLASS (YTB)

BÉLIER A 695 **BUFFLE** A 696 **BISON** A 697

Displacement, tons: 356 light; 500 full load
Dimensions, feet (metres): 104.3 x 30.2 x 13.8 (31.8 x 9.2 x 4.2)
Main machinery: 2 SACM-Wärtsilä UD 33V12 M4 diesels; 2,600 hp(m) (1.91 MW); 2 Voith-Schneider props
Speed, knots: 11
Complement: 12
Radars: Navigation: Racal-Decca C 810; I-band.

Comment: Built by DCN at Cherbourg. *Bélier* commissioned 10 July 1980, *Buffle* on 19 July 1980, *Bison* on 16 April 1981. A 695 and 697 based at Toulon and A 696 at Brest. Bollard pull, 25 tons. Service life: 2015

BISON 6/2008, Cor Van Nierkerken / 1335/82

3 MAÏTO CLASS (YTM)

MAÏTO A 636 **MAROA A 637** **MANINI A 638**

Displacement, tons: 228 standard, 280 full load
Dimensions, feet (metres): 90.5 × 27.2 × 11.5 (27.6 × 8.3 × 3.5)
Main machinery: 2 SACM Wärtsilä UD 30 L6 M6 diesels; 1,280 hp(m) (940 kW); 2 Voith-Schneider propulsors
Speed, knots: 11
Range, n miles: 1,200 at 11 kt
Complement: 6 + 4 passengers
Radar: Navigation: Racal-Decca 1226, I-band.

Comment: Built by SFCN, Villeneuve-La-Garonne, and formerly used at the CEP Nuclear Test Range. *Maïto* commissioned 25 July 1984 and is based at Martinique. *Maroa* (commissioned 28 July 1984) and *Manini* (commissioned 12 September 1985) are both based at Papeete, Tahiti. Bollard pull, 12 tons. Fire-fighting water cannon

MAÏTO 11/2006, *M Declerck* / 1167128

16 FRÉHEL CLASS (COASTAL TUGS) (YTM)

LARDIER Y 638 **TAILLAT Y 642** **FREHEL A 675** **KÉREON (ex-Sicie) A 679**

MORSE Y 770 **OTARIE Y 771** **LOUTRE Y 772** **PHOQUE Y 773**

Displacement, tons: 83 standard; 97 full load
Dimensions, feet (metres): 47.2 × 21.0 × 6.9 (14.4 × 6.4 × 2.1)
Main machinery: 2 Baudouin 6R123S diesels; 800 hp (588 kW); 2 shafts
Speed, knots: 8
Range, n miles: 160 at 7 kt
Complement: 4
Radars: Navigation: Furuno M 1832; I-band.

Comment: Ordered on 21 November 2003. All entered service on 5 October 2005. Built by SOCARENAM, Boulogne. Bollard pull 10 tons. *Morse* based at Mayotte and the remainder at Toulon

OTARIE 4/2008*, *B Prézelin* / 1335728

1 ACTIF CLASS (YTM)

ACHARNÉ A 693

Displacement, tons: 218 standard; 293 full load
Dimensions, feet (metres): 89.9 × 24.6 × 14.8 (27.4 × 7.5 × 4.5)
Main machinery: 1 SACM MGO V16 diesel, 1,050 hp(m) (773 kW); 1 shaft; prop in Kort nozzle
Speed, knots: 11 **Range, n miles:** 4,100 at 10 kt
Complement: 15
Radars: Navigation: 1 Decca; I band.

Comment: Last of 12 coastal tugs commissioned 5 July 1974. Bollard pull 13 tons. Based at Cherbourg. To be decommissioned in 2010

ACHARNÉ 6/2003, *Schaeffer/Marsen* / 0569968

2 BONITE (TYPE RP 380) CLASS (HARBOUR TUGS) (YTL)

BONITE Y 630 **ROUGET Y 634**

Displacement, tons: 95 full load
Dimensions, feet (metres): 68.2 × 20.3 × 8.5 (20.8 × 6.2 × 2.6)
Main machinery: 1 Poyaud UD 1215 diesel; 380 hp (280 kW); 1 shaft
Speed, knots: 10
Complement: 7

Comment: Both built by Schneider, Châlons-sur-Saône, and commissioned in 1975. Attached to the Naval Academy and Training Centre. Based at Lanvéoc-Poulmic, near Brest. Service life 2010.

4 TYPE PSS 10 PUSHER TUGS (YTL)

P 101-104

Displacement, tons: 44 standard; 69 full load
Dimensions, feet (metres): 57.4 × 21.0 × 6.6 (17.5 × 6.4 × 2.0)
Main machinery: 2 Poyaud UD 25 L06 M4D diesels; 800 hp (588 kW); 2 shafts in Kort nozzles
Speed, knots: 10. **Range, n miles:** 480 at 6 kt
Complement: 3

Comment: Built by Leroux Naval Industrie, Lorient, and commissioned in 1993. Designed to handle Le Triomphant class SSBNs. *P 101* and *P 102* based at Brest and *P 103* and *P 104* at Cherbourg.

ARGONAUTE (ex-Island Patriot)

Displacement, tons: 2,371 standard; 4,420 full load
Dimensions, feet (metres): 226.0 × 50.8 × 23.0 (68.9 × 15.5 × 7)
Main machinery: 2 Rolls Royce Bergen BRM-9 diesels; 10,800 hp(m) (8.1 MW); 2 shafts; 2 cp props with Kort nozzles; 2 bow and 1 stern thrusters
Speed, knots: 16
Range, n miles: 19,000 at 10 kt
Complement: 9 plus 22 passengers
Radars: Navigation: 2 Raytheon; I-band

Comment: Built by Aker-Brevik Construction AS, Norway, the ship was launched on 7 July 2003 and entered service with Island Offshore on 12 December 2003. Chartered by the French government from 1 January 2004 and modified in June 2004 to meet naval requirements. Based at Brest. Fitted for pollution control and with fire-fighting equipment. Capable of operating an ROV.

ARGONAUTE

6/2008*, Richard Scott / 1335780

GOVERNMENT MARITIME FORCES

Notes: (1) 'Action de l'Etat en Mer (AEM)' encompasses all activities regarding maritime surveillance and sea traffic control, fishery protection and policing, SAR, safety of navigation, pollution control and so on. It involves the Marine Nationale (navy), the Gendarmerie Maritime, the Affaires Maritimes, the Douanes françaises (customs), the Administration des Phares et Balises (lighthouses and navigation aids management organisation) and some local police forces. The organisation is for French mainland as well as for overseas territories. In homeland waters, it is under the direct control of the flag officers (C-in-Cs) at Cherbourg, Brest and Toulon. All ships and craft involved in AEM tasks display 'AEM markings' (inclined blue/white/red stripes on their hull sides). This also applies to naval manned patrol vessels (patrouilleurs de service public, PSP) and to the Eurocopter SA 365N Dauphin 2 helicopters acquired by the naval air arm for SAR duties. (2) For the 'Sauvegarde maritime' (maritime approaches surveillance organisation), most AEM tasked vessels (including naval OPVs) and coastal VTS are connected, through a dedicated datalink, to the Spationav common maritime picture network. Spationav display terminals are also being fitted to the Dassault Falcon 50M land-based maritime surveillance aircraft.

AUXILIARIES

Notes: (1) Permanently chartered vessels for AEM tasks include four salvage and rescue tugs, and four support and pollution fighting vessels. They perform civilian tasks such as safety of navigation, SAR, pollution control, and military missions in support of the fleet: torpedo recovery, diving operation support, submarine crew rescue, experiments, and so on. (2) In addition, the UK tug *Anglian Monarch* is chartered from Klyne Tugs Ltd, under a share agreement with the UK Maritime and Coast Guard Agency. Based at Dover. (3) A contract was renewed with Abeilles International in July 2002 for emergency use of a large fleet of harbour tugs. Similar contracts are concluded with local fishing associations. (4) The DGA (Directorate General for Armament) charters the 67 m *Langevin* for submarine associated trials. (5) On 29 November 2005, the European Maritime Safety Agency (EMSA) contracted Louis Dreyfus Armateurs (LDA) for the standby charter of the cable repair vessel *He de Bréhat* (built 2001, 14,960 UMS, 140 m, 15 kt) for oil recovery during emergencies. Currently chartered for the maintenance and repairs of transatlantic submarine cables, this ship is based at Brest. It will receive some modifications to be classified as '(standby) oil recovery vessel'; it will be capable of recovering and storing up to 4,000 m³ of polluted water and of deploying a ROV.

2 ULSTEIN UT 515 (SALVAGE AND RESCUE TUGS) (ARS)

ABEILLE BOURBON ABEILLE LIBERTÉ

Displacement, tons: 3,200 standard; 4,000 full load
Dimensions, feet (metres): 262.5 × 54.1 × 21.3 (80.0 × 16.5 × 6.5)
Main machinery: 4 MaK 8M32C diesels; 21,700 hp(m) (16 MW); 2 shafts; 2 cp props; 2 bow and 2 stern thrusters
Speed, knots: 19.5
Complement: 12
Radars: Navigation: 2 Furuno; I-band.

Comment: Contract awarded in November 2003 to Abeilles International for the procurement and operation (over eight years) of two Ulstein 515 salvage tugs, classified as Remorques d'Intervention, d'Assistance et de Sauvetage (RIAS). Equipped with a 500 ton towing winch and with extensive fire-fighting and pollution control equipment. Vessels built by Maritim, Gdansk and outfitted by Myklebust, Norway. The first ship, *Abeille Bourbon*, entered service on 21 May 2005 and is based at Brest. She was fitted with a reinforced bow in November 2007. *Abeille Liberté* entered service on 25 October 2005 and is based at Cherbourg. There are two crews of 12 per ship.

2 ULSTEIN UT 507 CLASS (SALVAGE TUGS) (ARS)

ABEILLE FLANDRE (ex-Neptun Suecia)

ABEILLE LANGUEDOC (ex-Neptun Gothia)

Displacement, tons: 3,000 standard; 3,500 full load
Dimensions, feet (metres): 207.7 × 47.2 × 23.9 (63.4 × 14.4 × 7.3)
Main machinery: 4 MaK 8M453AK diesels; 23,000 hp (16.9 MW); 2 cp props; 2 Ulstein bow thrusters
Speed, knots: 17
Range, n miles: 36,000 at 10 kt
Complement: 12
Radars: Navigation: 1 Racal Decca Bridgemaster; 1 Racal Decca Bright Track 90, E/F-band

Comment: Built by Ulstein Hatho A/S, Norway and entered service in 1978 and 1979. On long-term charter from Abeilles International since 14 December 1979. Bollard pull 180 tons. *Abeille Flandre* based at Toulon since 30 May 2005 and *Abeille Languedoc* at La Pallice, near La Rochelle, since 25 October 2005. Both ships refitted in 2005.

2 ULSTEIN UT 711 CLASS (BUOY TENDERS) (ABU)

ALCYON (ex-Bahram) **AILETTE** (ex-Cyrus)

Displacement, tons: 1,210 standard; 1,900 full load
Dimensions, feet (metres): 173.9 x 43.6 x 22.3 (53.0 x 13.3 x 6.8)
Main machinery: 2 Bergens-Normo KVMB-12 diesels; 6,200 hp (3.9 MW); 2 cp props, 1 Ulstein 90 bow thruster; 500 hp (370 kW); 1 Rolls Royce bow thruster (Ailette only), 400 hp (300 kW)
Speed, knots: 14.5. **Range, n miles:** 5,400 at 14 kt
Complement: 7 plus 15 passengers
Radars: Navigation: Racal-Decca Bridgemaster 252C and Furuno FR 2120; I-band.

Comment: Built by A & C de la Manche, Dieppe and entered service in 1981 and 1982. On long-term charter from SURF (Groupe Bourbon). Former oil-field supply vessels both modernised in 2002-03 by Chantiers Pirou, Concarneau, for limited oil-pollution control activities: TRANSREC 250 sea skimming system and polluted water storage capacity of 500 m³. New 23 ton hydraulic deck crane fitted; dynamic positioning system fitted to *Ailette*. Deck capacity 480 tons and bollard pull of 64 tons. *Alcyon* based at Brest and *Ailette* at Toulon.

AILETTE 2/2008, B Prézélin / 1336/23

1 ULSTEIN UT 704 CLASS (SALVAGE AND RESCUE TUG) (ARS)

CARANGUE (ex-Pilot Fish, ex-Smit Lloyd 119, ex-Maersk Handler)

Displacement, tons: 1,300 standard; 2,000 full load
Dimensions, feet (metres): 212.3 x 45.3 x 19.7 (64.7 x 13.8 x 6.0)
Main machinery: 2 Nohars-Nohab F2 16V-D diesels; 7,050 hp (5.2 MW); 2 cp props; bow thruster
Speed, knots: 16. **Range, n miles:** 21,000 at 10 kt
Complement: 8
Radars: Navigation: 2 Furuno; I-band.

Comment: Built by Samsung SB, Kojin, South Korea and entered service in 1980. On long-term charter from Abeilles International since 1994. Equipped with two fire-pumps, two water cannons, anti-pollution equipment and a hydraulic crane. Based at Toulon.

CARANGUE 2/2008, B Prézélin / 1335/72

1 AQUITAINE EXPLORER CLASS (SALVAGE VESSEL) (ARS)

AQUITAINE EXPLORER (ex-Abeille Supporter, ex-Seaway Hawk, ex-Seaway Devon)

Displacement, tons: 2,600 full load
Dimensions, feet (metres): 208.7 x 44.0 x 18.9 (63.6 x 13.4 x 5.75)
Main machinery: 2 MaK 12M453AK diesels; 8,800 hp (6.9 MW); 2 cp props; bow and stern lateral thrusters
Speed, knots: 14
Complement: 11 + 27
Radars: Navigation: I-band.

Comment: Built by Aukra Bruk, Norway and entered service in 1975. Acquired in 1982 by DGA (Armaments Directorate) for support of undersea activities in conjunction with CEL (Landes Launch Centre) (Abyssub ROV operates to 5,000 m). Operated by Abeilles International until 30 June 2000 and thereafter by NTA/ABC Maritime. Bollard pull 100 tons. Also used in support of pollution control. Based at Bayonne.

AQUITAINE EXPLORER 1/2005, B Prézélin / 1153165

RESEARCH SHIPS

Note: Several government agencies use research vessels for various purposes. Most of them are operated by GENAVIR on their behalf. Main agency is IFREMER (Institut Français de Recherche pour l'Exploitation de la Mer) that operates four large ocean-going vessels; *Pourquoi Pas?* (2005, 6,600 tons), *Thalassa* (1996, 3,022 tons), *L'Atalante* (1989, 3,550 tons), *Le Suroît* (1975, modernised 1999, 1,132 tons); and three coastal operations vessels: *L'Europe* (1993, 264 tons catamaran), *Thalia* (1978, 135 grt, trawler type) and *Gwen Drez* (1978, 249 tons, trawler type) IRD (Institut de Recherche pour le Développement, ex-ORSTOM) operates in the Pacific two research vessels: *Antée* (1995, 421 grt, catamaran) and *Alis* (1987, 198 grt UMS, trawler type), and two smaller craft. INSU (Institut National des Sciences de l'Univers) operates five coastal vessels (12.5 to 24.9 m) along the French coasts. TAAF (Administration des Terres Australes et Antarctiques Françaises) uses *Marion Dufresne* (1995, 9,403 GRT UMS, 120 m long), a large support ship for Antarctic operations also fitted for scientific research work, *L'Astrolabe*, (ex-*Austral Fish*, 1986, 1,370 grt) and *La Curieuse* (1989, 150 grt UMS, trawler type).

POLICE (GENDARMERIE MARITIME)

Note: The Gendarmerie Maritime is a force of 1,050 officers and men belonging to the Gendarmerie Nationale but acting under the operational control of the Marine Nationale. The Force is tasked to safeguard, supervise and control shipping traffic.

MDLC RICHARD (old number) 6/2007, B Prézélin / 1305017

CUSTOMS (DOUANES FRANÇAISES)

Notes: The French customs service has a number of tasks not normally associated with such an organisation. In addition to the usual duties of dealing with ships entering either its coastal area or ports it also has certain responsibilities for rescue at sea, control of navigation, fishery protection and pollution protection. Operated by about 650 personnel, the fleet comprises 12 large patrol vessels (28 to 35 m), 16 patrol boats (15 to 27 m) and 27 smaller craft. The larger vessels include DF 48 *Arafenue* (105 tons), DF 41 *Aval Gwalarn* (67 tons), DF 42 *Suroit* (67 tons), DF 31 *Alizé* (64 tons), DF 37 *Vent d'Aval* (64 tons), DF 43 *Haize Hegoa* (64 tons), DF 44 *Mervent* (64 tons), DF 45 *Vent d'Auten* (64 tons), DF 46 *Aval Sterenn* (64 tons), DF 47 *Lissoro* (64 tons), DF 36 *Kan Avel* (64 tons) and DF 40 *Vent d'Aront* (61 tons). In addition, two 400 ton patrol ships *Jacques Oudart Fourmentin* and *Kermovan* (ex-*Tevennek*), entered service in 2007 and 2008 respectively. All vessels have DF numbers painted on the bow and 'AEM markings' (blue/white/red inclined stripes). There are also 13 Reims-Cessna F406 lightweight patrol aircraft, including three equipped for pollution control and six Eurocopter AS 350B1 Ecureuil helicopters. On 20 December 2005, the Customs ordered, through the Directorate General for Armament (DGA), five Eurocopter EC 135 helicopters specially equipped for the maritime surveillance role (FLIR) and SAR. They will be delivered in 2007 to replace some of the Ecureuils.

KERMOVAN 8/2008, B Prézeln / 1335720

AFFAIRES MARITIMES

Notes: The Affaires Maritimes is a force administered and funded by the Ministry of Transport to enforce safety of navigation, SAR, fishery protection and pollution control. The force also contributes to surveillance against terrorist activities. Operational control is vested locally in Préfet Maritimes who are naval flag officers. SAR is coordinated through a network of Maritime Rescue Coordination Centres (MRCC) at Gris Nez (Dover Strait), Jobourg (Western Channel), Corsen (Brittany), Etel (Bay of Biscay), La Garde (Mediterranean, Gulf of Lion), Aspretto (Corsica), Port des Galets (La Réunion), Fort-de-France (Caribbean). CROSS Etel is responsible for monitoring all fishing activity in French waters. Vessels operated by Affaires Maritimes are usually unarmed and manned by civilians. They are painted with grey/blue hulls, grey superstructure and display the AEM blue/white/red stripes, PM pennant numbers and 'Affaires Maritimes' written on the superstructure. The fleet comprises:

- Five large patrol vessels (30–52 m): PM 41 *Themis* (400 tons), PM 40 *Iris* (230 tons), PM 32 *Armoise* (91 tons), PM 30 *Gabian* (76 tons), PM 29 *Mauve* (65 tons); *Osiris*, a seized fishing trawler, is based at La Réunion.
- 19 patrol launches (8–17 m). Most recent are four Callisto class 16 m FPB 50 Mk II patrol boats built 2000–01 by OCEA, Les Sables d'Olonne.
- Service craft which may be identified by 'Phares & Balises' written on the superstructure. Larger vessels include: *Armorique* (500 tons), *Hauts de France* (450 tons), *Gascogne*, *Provence* (326 tons), *Chef de Caux* (128 tons), *Louis Henin* (73 tons) and *Le Kahouanne* (73 tons).

THEMIS 7/2007, B Prézeln / 1305048

Gabon

MARINE GABONAISE

Country Overview

A former French colony, the Gabonese Republic achieved independence in 1960. Located astride the Equator, the country has an area of 103,347 square miles and has borders to the north with Cameroon and Equatorial Guinea and to the

east and south with Congo. It has a 480 n mile coastline with the Atlantic Ocean. The capital, largest city and principal port is Libreville and there is a further port at Port-Gentil. Territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits are not defined; jurisdiction is complicated

by the offshore islands of Iles de Annobon (Equatorial Guinea) and São Tomé and Príncipe.

Headquarters Appointments

Chief of Naval Staff

Gambia

Country Overview

The Republic of Gambia was a British protectorate until 1965 when it gained independence. With an area of 4,361 square miles, it has a short 43 n mile coastline with the Atlantic Ocean but is otherwise completely surrounded by Senegal. The two

countries united in 1981 to form the confederation of Senegambia but this collapsed in 1989 when the countries reverted to being separate states. The capital, largest city and principal port is Banjul (formerly Bathurst). Territorial seas (12 n miles) and a 200 n mile fishing zone are claimed. The patrol craft came under 3 Marine Company

of the National Army until 1996 when a navy was established.

Headquarters Appointments

Commander, Navy:
 Lieutenant Commander Sarjo Fofana

Personnel

(a) 2009: 150
 (b) Voluntary service

Bases

Banjul

PATROL FORCES

Notes: Two ex-Guardia Civil 16 m Rodman 55M craft were reported transferred by Spain on 9 July 2007.

2 PATROL CRAFT (PB)

FATIMAH I PT 01	SULAYMAN JUN-KUNG PT 02
-----------------	-------------------------

Displacement, tons: 25
Dimensions, feet (metres): 52.8 × 14.8 × 5.3 (16.1 × 4.5 × 1.6)
Main machinery: Caterpillar diesel; 800 hp (596 kW)
Speed, knots: 40
Guns: 3 – 762 mm MGs
Radars: Surface search: Furuno, I-band.

Comment: Procured from Taiwan in 1999

FATIMAH 6/2000, Gambian Navy / 0104493

1 PETERSON MK 4 CLASS (PB)

Name	No	Builders	Commissioned
BOLONG KANTA	P 14	Peterson Builders, Sturgeon Bay	15 Oct 1993

Displacement, tons: 24 full load
Dimensions, feet (metres): 50.9 × 14.8 × 4.3 (15.5 × 4.5 × 1.3)
Main machinery: 2 Detroit 6V-92A diesels; 520 hp (388 kW) sustained; 2 shafts
Speed, knots: 24. **Range, n miles:** 500 at 20 kt
Complement: 6
Guns: 2 – 12.7 mm MGs.
Radars: Raytheon R41X; I-band.

Comment: Reported seaworthy. Agreement with US government in September 2005 to assist with maintenance and spares. Similar craft in service in Egypt, Cape Verde and Senegal.

PETERSON Mk 4 (Senegal colours) 1/1998 / 0050096

Georgia

Country Overview

Formerly part of the USSR, the Republic of Georgia declared independence in 1991. Situated in the Transcaucasia region of western Asia, the country has an area of 26,900 square miles and is bordered to the north by Russia and to the south by Turkey, Armenia and Azerbaijan. It has a coastline of 167 n miles with the Black Sea on which Poti and Batumi are the principal ports. Tbilisi is the capital and largest city. The country includes two autonomous republics, Abkhazia and Ajaria, and one autonomous region, South Ossetia. USSR legislation appears still to apply to maritime claims. Territorial waters (12 n miles) are claimed, as is an EEZ (200 n miles) although the limits of the latter are not

defined. Naval and Coast Guard Forces (part of the Border Guard) formed 7 July 1993. While merger of the two forces has been considered, they are likely to remain different commands.

Much of the Georgian Navy and Coast Guard was destroyed during the Georgia-Russia conflict in August 2008. It is likely that remaining units will be merged into a single Coast Guard force.

Headquarters Appointments

Commander of the Navy:
Captain Besik Shengelia

Personnel

2008: 710 (184 officers)

Bases

Poti (HQ), Batumi

PATROL FORCES

Notes: In addition to the vessels listed below, the following vessels are on the Navy List:
(1) A former fishing vessel *Gantadi* (016) is used as a patrol craft and tender. It is armed with two 23 mm guns and 2—12.7 mm MGs.
(2) Three 'Aist' (Project 1398) class patrol launches (10, 12, 14). 14 is active with the Hydrographic Service and has a blue hull.
(3) A 'Nyryat' (DHK-81) and 'Flemingo' (DHK-82) are active with the Hydrographic service and are civilian manned.
(4) A Project 371U patrol launch *Gshi* (04).
(5) There are ten 9 m 'Black Shark' RHIBs built by Batumi Shipyard in 2006-07. Powered by two Mercury 250 hp outboard engines, they are capable of 48 kt and of carrying about 10 troops.
(6) There are two 7.5 m RHIBs A 24 and A 28. They are capable of 38 kt.

1 POLUCHAT 1 CLASS (PB)

AKHMETA 102

Displacement, tons: 86 standard; 100 full load
Dimensions, feet (metres): 97.1 × 19 × 4.8 (29.6 × 5.8 × 1.5)
Main machinery: 2 Type M 50 diesels; 2,200 hp(m) (1.6 MW) sustained; 2 shafts
Speed, knots: 20
Range, n miles: 1,500 at 10 kt
Complement: 15
Guns: 2—37 mm/L 68. 1—140 mm 17 round rocket launcher.
Radars: Surface search. Spin Trough; I-band.

Comment: Acquired in a disarmed state from commercial sources in Ukraine. Refitted at Metallist Ship Repair Yard, Bakhkava 2000-02.

P 102

8/2000, Hartmut Ehlers / 0104494

2 DILOS CLASS (PB)

Name	No	Builders	Commissioned
IVERIA (ex-Lindos)	201 (ex-P 269)	Hellenic Shipyard, Skaramanga	1978
MESTIA (ex-Dilos)	203 (ex-P 267)	Hellenic Shipyard, Skaramanga	1978

Displacement, tons: 74.5 standard; 86 full load
Dimensions, feet (metres): 95.1 × 16.2 × 5.6 (29 × 5 × 1.7)
Main machinery: 2 MTU 12V 331 TC92 diesels; 2,660 hp(m) (1.96 MW) sustained; 2 shafts
Speed, knots: 27
Range, n miles: 1,600 at 24 kt
Complement: 15
Guns: 4—23 mm ZSU (2 twin). 2—12.7 mm MGs.
Radars: Surface search: Racal Decca 1226C, I-band.

Comment: First one transferred from the Greek Navy in February 1998, second in September 1999. Reported to have been refitted in Greece in 2004.

IVERIA and MESTIA

10/2002, Hartmut Ehlers / 0652757

1 KAN 33 (FAST ATTACK CRAFT) (PBF)

SOKHUMI P 24

Displacement, tons: 120 full load
Dimensions, feet (metres): 116.8 × 22.0 × 4.7 (35.6 × 6.7 × 1.4)
Main machinery: 2 MTU 12V 4000 M90 diesels; 7,396 hp(m) (5.44 MW); 2MJP 753 DD waterjets
Speed, knots: 47
Range, n miles: 970 at 15 kt
Complement: 18 (2 officers)
Guns: 1—12.7 mm MG (stabilised).

Comment: With advanced composites structure, the craft are modified versions of those in service in the Turkish Coast Guard. The craft are suitable for use as the patrol of littoral waters, maritime interdiction and special forces operations. The vessel was delivered in mid 2008.

SOKHUMI

6/2008, Yonca-Onuk / 1335376

LAND-BASED MARITIME AIRCRAFT

Notes: While there is no naval air arm, two Mi-14 helicopters were reported delivered in April 2004 after five years undergoing refitting in Ukraine. They are believed to be for patrol and SAR duties and to be unarmed.

AMPHIBIOUS FORCES

1 VYDRA (PROJECT 106K) CLASS (LCU)

GURIA 001

Displacement, tons: 425 standard, 560 full load
Dimensions, feet (metres): 179.7 × 26.6 × 6.6 (54.8 × 8.1 × 2)
Main machinery: 2 Type 3-D-12 diesels; 600 hp(m) (440 kW) sustained; 2 shafts
Speed, knots: 12
Range, n miles: 2,500 at 10 kt
Complement: 20
Military lift: 200 tons or 100 troops or 3 MBTs
Guns: 4—23 mm ZSU (2 twin).
Radars: Navigation: Don 2; I-band.
IFF: High Pole

Comment: Built at Burges Shipyard 1974-75. Transferred to Georgia on 6 July 2001.

VYDRA CLASS

10/2002, Hartmut Ehlers / 0552747

COAST GUARD

Notes: In addition to the vessels listed below, the following vessels are on the Coast Guard list:
 (1) A former fishing vessel P 101.
 (2) Three Aust (Project 1398) class patrol launches (P 0212, 702, 703).
 (3) One Strzh (Project 1390) class launch P 0116.
 (4) One 44 m tug *Poti* (ex-Zorro) acquired from Ukraine in 1999 for salvage purposes.
 (5) Six patrol craft (P 0112-0116, P 105). P 0111 reported destroyed in August 2008.

1 LINDAU (TYPE 331) CLASS (WPBO)

Name	No	Builders	Commissioned
AYETY (ex-Minden)	P 22 (ex-M1085)	Burmester, Bremen	22 Jan 1960

Displacement, tons: 463 full load
Dimensions, feet (metres): 154.5 × 27.2 × 9.8 (47.1 × 8.3 × 2.8)
Main machinery: 2 MTU MD diesels; 4,000 hp (m) (2.94 MW); 2 shafts
Speed, knots: 16. **Range, n miles:** 850 at 16 kt
Complement: 43
Guns: 1 Bofors 40 mm/70. 2—12.7 mm MGs
Radars: Surface search: Atlas Elektronik TRS; I-band.

Comment: Paid off from German Navy in 1997 and transferred 15 November 1998 to the Coast Guard. Former minehunter refitted as a patrol craft in Germany before transfer. Reported destroyed in August 2008.

AYETY

10/2002, Hartmut Ehlers / 0562193

2 DAUNTLESS CLASS (WPB)

P 106 (ex-P 208)	P 209
------------------	-------

Displacement, tons: 11 full load
Dimensions, feet (metres): 40 × 14 × 4.3 (12.2 × 4.3 × 1.3)
Main machinery: 2 Caterpillar 3208TA diesels, 870 hp (650 kW); 2 shafts
Speed, knots: 27
Range, n miles: 600 at 18 kt
Complement: 5
Guns: 1—12.7 mm MG
Radars: Surface search: Raytheon; I-band

Comment: Aluminium construction. Acquired in July 1999 from SeaArk Marine.

P 209

10/2002, Hartmut Ehlers / 0552751

2 POINT CLASS (WPB)

Name	No	Builders	Commissioned
TSOTNE DADIANI (ex-Point Countess)	P 210 (ex-82335)	USCG Yard, Curtis Bay	8 Aug 1962
GENERAL MAZNIASHVILI (ex-Point Baker)	P 211 (ex-82342)	USCG Yard, Curtis Bay	30 Oct 1963

Displacement, tons: 66; 69 full load
Dimensions, feet (metres): 83.0 × 17.2 × 6.8 (25.3 × 5.3 × 1.8)
Main machinery: 2 Caterpillar 3412 diesels, 1,600 hp (1.19 MW); 2 shafts
Speed, knots: 23.5 **Range, n miles:** 1,500 at 8 kt
Complement: 10 (1 officer)
Guns: 2—12.7 mm MGs
Radars: Surface search: Hughes/Furuno SPS-73, I-band.

Comment: Steel hulled craft with aluminium superstructure. First transferred from United States in June 2000 and second on 12 February 2002.

GENERAL MAZNIASHVILI

10/2002, Hartmut Ehlers / 0589740

8 ZHUK CLASS (WPB)

P 102-104	P 203-207
-----------	-----------

Displacement, tons: 25 full load
Dimensions, feet (metres): 49 × 14.8 × 2.4 (14.9 × 4.5 × 0.7)
Main machinery: 2 GM diesels, 450 hp (335 kW); 2 shafts
Speed, knots: 12
Range, n miles: 200 at 12 kt
Complement: 7
Guns: 2—23 mm (1 twin) (P 204, P 205)
 2—12.7 mm MGs (P 203).

Comment: P 102-104 constructed at Batumi 1997-99. P 203 transferred from Ukraine in April 1997. P 204-205 acquired from Ukraine and P 206-207 transferred from Georgian Navy in 1998. Two craft had been modernised under the 'Orbi' programme by late 2007.

P 203

10/2002, Hartmut Ehlers / 0552753

Germany

DEUTSCHE MARINE

Country Overview

The Federal Republic of Germany (FRG) is situated in central Europe. The country was re-unified in 1990 when the German Democratic Republic became part of the FRG. With an area of 137,823 square miles, it is bordered to the north by Denmark, to the east by Poland and the Czech Republic, to the south by Austria and Switzerland and to the west by France, Luxembourg, Belgium and the Netherlands. It has a 1,290 n mile coastline with the North and Baltic Seas which are linked by the Kiel Canal. The capital and largest city is Berlin. North Sea ports include Hamburg, Wilhelmshaven, Bremen, Nordenham and Emden, while the main Baltic ports are Lübeck, Wismar, Rostock and Stralsund. The Rhine is the principal inland waterway on which Duisburg is the largest port. Territorial seas (12 n miles) are claimed. An EEZ (200 n miles) has also been claimed.

Headquarters Appointments

Chief of Naval Staff:
 Vice Admiral Wolfgang Nolting
Chief of Staff:
 Rear Admiral Hans-Jochen Witthauer

Commander-in-Chief

Commander-in-Chief, Fleet:
 Vice Admiral Hans-Joachim Stricker

Diplomatic Representation

Defence Attaché in Paris:
 Rear Admiral George Von Maltzan
Defence Attaché in Rome:

SUBMARINES

4 + 2 TYPE 212A (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
U 31	S 181	HDW, Kiel	Feb 2000	20 Mar 2002	19 Oct 2005
U 32	S 182	TNSW, Emden	Jan 2002	4 Dec 2003	19 Oct 2005
U 33	S 183	HDW, Kiel	Oct 2002	13 Sep 2004	13 June 2006
U 34	S 184	TNSW, Emden	June 2003	1 July 2005	3 May 2007
U 35	S 185	HDW, Kiel	Aug 2007	2009	2013
U 36	S 186	HDW, Kiel	Aug 2008	2010	2013

Displacement, tons: 1,450 surfaced; 1,830 dived
Dimensions, feet (metres): 183.4; (187.3 Batch 2) × 23 × 19.7
 (56.9; (57.1) × 7 × 6)

Main machinery: Diesel-electric; 1 MTU 16V 396 diesel, 4,243 hp(m) (3.12 MW); 1 alternator; 1 Siemens Permasyn motor; 3,875 hp(m) (2.85 MW); 1 shaft, 9 Siemens/HDW PEM fuel cell (AIP) modules; 306 kW; sodium sulphide high-energy batteries

Speed, knots: 20 dived, 12 surfaced
Range, n miles: 8,000 at 8 kt surfaced
Complement: 28 (8 officers)

Torpedoes: 6–21 in (533 mm) bow tubes; water ram discharge; Atlas Elektronik DM 2 A4 torpedoes; wire guided active/passive homing to 50 km (27 n miles) at 50 kt; warhead 250 kg Total 12 weapons.

Countermeasures: DASA FL 1800U or EADS MRBR 800 (Batch 2); radar warning.

Weapons control: Kongsberg MSI-90U (Batch 1), Atlas Elektronik ISUS (Batch 2).

Radars: Navigation, Kelvin Hughes 1007; I-band

Sonars: STN Atlas Elektronik DBQS-40; passive ranging and intercept; FAS-3 flank and passive towed array, STN Atlas Elektronik MOA 3070 or Allied Signal ELAK; mine detection; active; high frequency.

Programmes: Design phase first completed in 1992 by ARGE 212 (HDW/TNSW) in conjunction with IKL. Authorisation for the first four of the class was given on 8 July 1994, but the first steel cut was delayed to 1 July 1998 because of modifications needed to achieve commonality with the Italian Navy. The order for Batch 2 of two modified boats was made on 22 September 2006 and steel for U 35 was cut on 21 August 2007. The submarines are to enter service in 2012 and 2013.

Modernisation: The fifth and sixth boats are to include EFAS flank array sonar, Carl Zeiss SERO 400 periscope and OMS 100 non-penetrating optronic mast. There will be a lock-in lock-out system for special forces and the PEM fuel-cell system is to be brought to the latest standard. IDAS, a missile system under evaluation, was fired from U 33 on 29 May 2008. The system has both

an anti-aircraft and land-attack capability and may be deployed from about 2014.

Structure: Equipped with a hybrid fuel cell/battery propulsion based on the Siemens PEM fuel cell technology. The submarine is designed with a partial double hull which has a larger diameter forward. This is joined to the after end by a short conical section which houses the fuel cell plant. Two LOX tanks and hydrogen stored in metal cylinders are carried around the circumference of the smaller hull section. Zeiss search and attack periscopes.

Operational: Maximum speed on AIP is 8 kt without use of main battery. U 32 conducted a submerged transit from the German Bight to the Bay of Cadiz 11–25 April 2006. The entire passage was conducted using air-independent propulsion and without snorkelling, a speed of advance of 4–5 kt. Based at Eckernförde as part of the First Submarine Squadron.

Sales: Two identical submarines have been built in Italy and two further are under contract.

Dimensions, feet (metres): 159.4 x 15.1 x 14.8
 (48.6 x 4.6 x 4.5)

Main machinery: Diesel-electric; 2 MTU 12V 493 AZ90 GA 31L diesels; 1,200 hp(m) (882 kW) sustained; 2 alternators; 810 kW; 1 Siemens motor; 1,800 hp(m) (1.32 MW) sustained; 1 shaft

Speed, knots: 10 surfaced; 17 dived
Range, n miles: 4,500 at 5 kt surfaced
Complement: 22 (4 officers)

Torpedoes: 8 21 in (533 mm) bow tubes. STN Atlas DM 2A3; wire-guided, active homing to 13 km (7 n miles) at 35 kt, passive homing to 28 km (15 n miles) at 23 kt; warhead 260 kg.

Mines: GRP container secured outside hull each side. Each container holds 12 mines, carried in addition to the normal torpedo or mine armament (16 in place of torpedoes).

Countermeasures: ESM. Thomson-CSF DR 2000U with THORN EM Serie 2; intercept.

Weapons control: SLW 83 (TFCS).

Radars: Surface search. Thomson-CSF Calypso II; I-band.

Sonars: Atlas Elektronik DBQS-21D; passive/active search and attack; medium frequency Thomson Sintra DUUX 2; passive ranging.

Programmes: Authorised on 7 June 1969

Modernisation: Mid-life conversion of the class was a very extensive one, including the installation of new

sensors (sonar DBQS-21D with training simulator STU-5), periscopes, weapon control system (LEWA), ESM, weapons (torpedo Seeal), GPS navigation, and a comprehensive refitting of the propulsion system, as well as habitability improvements. Conversion work was shared between Thyssen Nordseewerke (U 23, 24, 15) at Emden and HDW (U 16, 17, 18) at Kiel. The work started in mid-1987 and completed in February 1992

Structure: Hulls are built of high-tensile non-magnetic steel

Operational: First squadron based at Eckornforde

Sales: Two unmodernised (Type 206) were to have been acquired by Indonesia but the sale was cancelled in late 1998.

4 BRANDENBURG CLASS (TYPE 123) (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned
BRANDENBURG	F 215	Blohm + Voss, Hamburg	11 Feb 1992	28 Aug 1992	14 Oct 1994
SCHLESWIG-HOLSTEIN	F 216	Howaldtswerke, Kiel	1 July 1993	8 June 1994	2 Nov 1995
BAYERN	F 217	Thyssen Nordseewerke, Emden	16 Dec 1993	30 June 1994	15 June 1996
MECKLENBURG-VORPOMMERN	F 218	Bremer Vulkan/Thyssen Nordseewerke	23 Nov 1993	8 July 1995	6 Dec 1996

Displacement, tons: 5,400 full load
Dimensions, feet (metres): 455.7 oa, 416.3 wl × 54.8 × 22.3
 (138.9; 126.9 × 16.7 × 6.8)
Main machinery: CODOG: 2 GE 7LM2500SA-ML gas turbines, 51,000 hp (38 MW) sustained; 2 MTU 20V 956 TB92 diesels; 11,070 hplm (8.14 MW) sustained; 2 shafts, Escher Wyss; cp props
Speed, knots: 29; 21 on diesels
Range, n miles: 4,000 at 18 kt
Complement: 229 (31 officers) plus 14

Missiles: SSM: 4 Aerospatiale MM 38 Exocet (2 twin) (from Type 101A); inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.
SAM: Martin Manetta VLS Mk 41 Mod 3 for 16 NATO Sea Sparrow RIM-7P; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg
 2 Raytheon RAM RIM-116 21 cell Mk 49 launchers; passive IR/anti-radiation homing to 9.6 km (5.2 n miles) at 2.5 Mach; warhead 9.1 kg; 42 missiles.

Guns: 1 OTO Melara 3 in (76 mm) Mk 75; 105 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg.
 2 Rheinmetall 20 mm Rh 202 to be replaced by Mauser 27 mm.

Torpedoes: 4—324 mm Mk 32 Mod 9 (2 twin) tubes; anti-submarine. Honeywell Mk 46 Mod 2; anti-submarine; active/passive homing to 11 km (5.9 n miles); at 40 kt; warhead 44 kg. To be replaced by Eurotorp MU 90 Impact in due course

Countermeasures: Decoys: 4 Rheinmetall MASS-4L decoy launchers
ESM/ECM: EADS FL 1800S Stage II; intercept and jammers.
Combat data systems: Atlas Elektronik/Paramax SATIR action data automation with Unisys UYK 43 computer; Link 11. Link 16. SATCOM

Weapons control: Thales MWCS. 2 optical sights. STN Atlas Elektronik WBA optronic sensor.

Radars: Air search. Thales LW08; D-band. Air/surface search. Thales SMART; 3D; F-band. Fire control. 2 Thales STIR 180 trackers
Navigation: 2 Sperry Bridgemaster E; I-band.

Sonars: Atlas Elektronik DSQS-23BZ; hull-mounted; active search and attack; medium frequency
 Towed array (provision only); active; low frequency

Helicopters: 2 Westland Sea Lynx Mk 88A

Programmes: Four ordered 28 June 1989. Developed by Blohm + Voss whose design was selected in October 1988. Replaced deleted Hamburg class.

Modernisation: SCOT 3 SATCOM and STN optronic sensor fitted from 1988. All four ships are to undergo a major modernisation programme to extend service life to at least 2025. A contract was signed on 21 September 2005 for Phase 1 (2007-11), the replacement of the combat data system by the Thales SABRINA 21 system, which

BRANDENBURG

(Scale 1 : 1,200), Ian Sturton / 115348/

MECKLENBURG-VORPOMMERN

10/2004, B Sullivan / 0587753

incorporates Tacicos-NC and Sowsco-DDS technology. In Phase 2 (2008-14), ASW capabilities are to be upgraded with the installation of the Eurotorp MU 90 lightweight torpedo. Low Frequency Towed Active Sonar (LFTAS) is being trialled in Bayern from 2008-2009. Phase 2 is also likely to include upgrade of the IFF system. Phase 3 (2012-16) will improve AAW and ASUW capabilities by installation and integration of RIM-162 Evolved Sea Sparrow (ESSM) and a new surface-to-surface missile.

In a separate contract the DSQS-23BZ bow sonar is to be upgraded 2005-09.

Structure: The design is a mixture of MEKO and improved servicesability Type 122 having the same propulsion as the Type 122. Contemporary stealth features. All steel. Fin stabilisers. Space allocated for a Task Group Commander and Staff

Operational: 2nd Frigate Squadron based at Wilhelmshaven. One RIB is carried for boarding operations.

Dimensions, feet (metres) 426.4 x 47.6 x 21.3
(138 x 14.5 x 6.5)

Main machinery: CODOG; 2 GE LM 2500 gas turbines; 51,000 hp (38 MW) sustained; 2 MTU 20V 956TB92 diesels; 11,070 hp (8.14 MW) sustained; 2 shafts; cp props

Speed, knots: 30; 20 on diesels

Range, n miles: 4,000 at 18 kt

Complement: 219 (26 officers)

Missiles: SSM: 8 McDonnell Douglas Harpoon (2 quad) launchers ●, active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

SAM 8 Raytheon NATO Sea Sparrow RIM-7P; Mk 29 octuple launcher ●; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg.

2 Raytheon RAM RIM-116 21 cell Mk 49 launchers ●; passive IR/anti-radiation homing to 9.6 km (5.2 n miles) at 2.5 Mach; warhead 9.1 kg

Guns: 1 OTO Melara 3 in (76 mm)/62 Compact ●; 108 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft, weight of shell 6 kg
2 Mäuser 27 mm
4—12.7 mm MGs.

Torpedoes: 4—324 mm Mk 32 (2 twin) tubes ●. 8 Honeywell Mk 46 Mod 2; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg. To be replaced by Eurotorp MU 90.

Countermeasures: Decoys: 4 Loral Hyco SRBOC ● 6-barrelled fixed Mk 36; chaff and IR flares to 4 km (2.2 n miles). SLQ-25 Nixie, towed torpedo decoy. Prairie bubble noise reduction.

ESM/ECM: EADS FL 1800 Stage II ●; intercept and jammer.

Combat data systems: SATIR action data automation, Link 11; Link 16; Matra Marconi SCOT 1A SATCOM ● (3 sets for the class)

Weapons control: Thales WM25/STIR. STN Atlas Elektronik WBA optronic sensor

Radars: Air/surface search: DASA TRS-3D/32 ●; C-band.

Navigation: Kelvin Hughes Nucleus 2 5000A; I-band

Fire control: Thales WM25 ●; I/J-band
Thales STIR ●; I/J/K-band; range 140 km (76 n miles) for 1 m² target.

Sonars: Atlas Elektronik DSQS-21BZ (BO); hull-mounted; active search and attack; medium frequency.

Helicopters: 2 Westland Sea Lynx Mk 88A ●.

Programmes: Approval given in early 1976 for first six of this class, a modification of the Netherlands Kortonaer class. Replaced the deleted Fletcher and Köln classes.

EMDEN

(Scale 1 : 1,200), Ian Sturton / 0017400

KÖLN

3/2008*, Guy Toremans / 1353057

Equipment ordered February 1986 after order placed 6 December 1985 for last pair. Hulls and some engines provided in the five building yards. Ships were then towed to the prime contractor Bremer Vulkan where weapon systems and electronics were fitted and trials conducted. The three names for F 210-212 were changed from the names of Lander to take the well known town names of the Köln class as they were paid off

Modernisation: RAM fitted from 1993-1996. Updated EW fit from 1994. 20 mm guns, taken from Type 520 LCUs, fitted aft of the bridge on each side TRS-3D/32 radar has replaced DA 08 in all ships. STN optronic sensor fitted from 1998. 27 mm guns to replace 20 mm in due course. All eight ships are to undergo a modernisation programme to extend service life to at least 2015. A contract was

signed on 21 September 2005 for the replacement of the combat data system by the Thales SABRINA 21 system, which incorporates Tacticos-NC and Sewaco-DDS technology. The work is to include integration of Link 16 which is currently being fitted throughout the class. The modernisation is also likely to include upgrade of the IFF system and installation of the Rheinmetall MSP 500 optronic director. The first ship to be refitted was Bremen, which completed in 2008. The programme will be completed when Köln returns to the fleet in 2011

Operational: Form 4th Frigate Squadron based at Wilhelmshaven. Three containerised SCOT 1A terminals acquired in 1988 and when fitted are mounted on the hangar roof.

Helicopters: 2 MH 90 ●

BADEN-WÜRTTEMBERG CLASS

(Scale 1 : 1,200), Ian Sturton / 1166826

Programmes: The contract for the design and construction of four F 125 frigates was signed on 26 June 2007. The building consortium includes ThyssenKrupp Marine Systems and Lürssen Werft. The principal role of the ship is to conduct long-endurance crisis-management operations, particularly tactical naval gunfire support and support of special forces. The details of the ship are based on current planning assumptions and could change.
Structure: The ships are to be equipped with an 'innovative damage control concept'. There is to be accommodation

for up to 50 special forces for whom there will be a dedicated operations room. The ship is to carry four high speed 10 m craft. A VLS launcher may also be incorporated. A water cannon is to be fitted.
Operational: The ships will be designed to be able to deploy for up to two years without return to home-base. This will include a 50 per cent reduced manning concept featuring two crews of about 160 each (plus 20 for the aviation detachment). These would relieve each other on a regular, four-month, rotating schedule.

CORVETTES

Notes: The K 131 programme is for a medium-size surface combatant, to replace the Type 122 frigates and the Type 143A fast attack craft. Up to eight ships, built to a modular design, are likely to be required to enter service from about 2017.

5 BRAUNSCHWEIG (K130) CLASS (FSGHM)

Navigation: 2 Raymarine Pathfinder/ST 34 ●; E/F/I-bands.
Fire control: EADS TRS-3D; C-band.

BRAUNSCHWEIG

(Scale 1 : 800), Ian Sturton / 1166827

Helicopters: Platform for 1 medium and for UAV (possibly Schiebel Camcopter).

Programmes: Invitations to tender accepted at the end of 1998. Blohm + Voss selected as consortium leader 18 July 2000. Consortium includes Thyssen Nordseewerke and Lürssen. Batch of five ships ordered on 14 December 2001 and first steel cut for the first of class on 19 July 2004. The bow section of the first ship was launched on 6 September 2005. All bow sections are being

constructed at Emden, the aft sections at Lürssen and the superstructure at Blohm+Voss. There will be no further ships of this class.
Modernisation: All five ships are to be fitted with bow thrusters.
Structure: Measures to reduce radar, IR (water-cooled surface exhaust system) and noise signatures have been included in the design.
Operational: The ships form the 1st Corvette Squadron based at Rostock-Warnemünde

Range: 667 n miles (1,235 km).

Role/Weapon systems: Pollution control. Sensors: Weather radar, SLAR, IR/UR scanner, microwave radiometer, LLL TV camera and data downlink. Weapons: Unarmed.

DORNIER 228

3/2006, Frank Findler / 1158886

Numbers/Type: 2 Breguet Atlantic 1.

Operational speed: 355 kt (658 km/h).

Service ceiling: 32,800 ft (10,000 m).

Range: 4,850 n miles (8,990 km).

Role/Weapon systems: Long-range Sigint aircraft.

ATLANTIC

5/2006, Michael Nitz / 1164831

Numbers/Type: 50 Panavia Tornado IDS

Operational speed: Mach 2.2.

Service ceiling: 80,000 ft (24,385 m).

Range: 1,500 n miles (2,780 km).

Role/Weapon systems: Swing-wing strike and recon; shore-based for fleet tactical support (recc, ASUW, limited air defence). Former naval aircraft transferred to the German Air Force in 2005. Sensors: Texas Instruments nav/attack system, MBB/Alenia multisensor recon pod. Weapons: ASV; four Kormoran 2 missiles. Fleet AD: two 27 mm cannon, four AIM 9L Sidewinder.

TORNADO

9/2004, Frank Findler / 1044258

PATROL FORCES

Notes: Vessels in this section have an 'S' number as part of their name as well as a 'P' pennant number. The 'S' number is shown in the Pennant List at the front of this country.

10 GEPARD CLASS (TYPE 143 A) (FAST ATTACK CRAFT—MISSILE) (PGGFM)

Name	No	Builders	Launched	Commissioned
GEPARD	P 6121	AEG/Lürssen	25 Sep 1981	13 Dec 1982
PUMA	P 6122	AEG/Lürssen	8 Feb 1982	24 Feb 1983
HERMELIN	P 6123	AEG/Kröger	8 Dec 1981	5 May 1983
NERZ	P 6124	AEG/Lürssen	18 Aug 1982	14 July 1983
ZOBEL	P 6125	AEG/Kröger	30 June 1982	25 Sep 1983
FRETTCHEN	P 6126	AEG/Lürssen	26 Jan 1983	15 Dec 1983
DACHS	P 6127	AEG/Kröger	14 Dec 1982	22 Mar 1984
OZELOT	P 6128	AEG/Lürssen	7 June 1983	3 May 1984
WIESEL	P 6129	AEG/Lürssen	8 Aug 1983	12 July 1984
HYANE	P 6130	AEG/Lürssen	5 Oct 1983	13 Nov 1984

Displacement, tons: 391 full load

Dimensions, feet (metres): 190 x 25.6 x 8.5 (57.6 x 7.8 x 2.6)

Main machinery: 4 MTU MA 16V 956 SB80 diesels; 13,200 hp(m) (9.7 MW) sustained; 4 shafts

Speed, knots: 40. **Range, n miles:** 2,600 at 16 kt, 600 at 33 kt

Complement: 34 (4 officers)

Missiles: SSM: 4 Aerospatiale MM 38 Exocet; inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 185 kg, sea-skimmer.

SAM: 1 Raytheon RAM RIM-116 21 cell Mk 49 launcher; passive IR/anti-radiation homing to 9.6 km (5.2 n miles) at 2.5 Mach; warhead 9.1 kg.

Guns: 1 Otobreda 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg 2–12.7 mm MGs.

Mines: Can lay mines.

Countermeasures: Decoys: Buck-Wegmann Hot Dog/Silver Dog, IR/chaff dispenser.

ESM/ECM: Dasa FL 1800 Mk 2; radar intercept and jammer.

Combat data systems: AGIS with Signal update; Link 11.

Electro-optic systems: STN Atlas WBA optronic sensor

Radars: Surface search/fire control: Signal WM27, I/J-band; range 48 km (25 n miles).

Navigation: Sperry Bridgmaster; I-band.

Programmes: Ordered mid-1978 from AEG-Telefunken with subcontracting to Lürssen (P 6121, 6122, 6124–6128) and Kröger (P 6123, 6129, 6130).

Modernisation: Updated EW fit in 1994–95. RAM fitted in Puma in 1992, and to the rest from 1993–98. Combat data system update completed in 1999. Improved EW aerials fitted from 1999.

Structure: Wooden hulls on aluminium frames.

Operational: Form 7th Squadron based on the tender *Eiba* at Warnemünde. To remain in commission until 2015+.

PUMA

6/2008*, Michael Nitz / 1353063

HYANE

AMPHIBIOUS FORCES

Notes: Procurement of a Joint Support Ship, possibly using an LHD/LPD design, is under consideration. Up to three units may be acquired with entry into service from 2020.

2 TYPE 520 (LCU)

LACHS L 762 SCHLEI L 765

Displacement, tons: 430 full load
Dimensions, feet (metres): 131.2 × 28.9 × 7.2 (40 × 8.8 × 2.2)
Main machinery: 2 MWM 12-cyl diesels; 1,020 hp(m) (750 kW); 2 shafts
Speed, knots: 11
Complement: 17
Military lift: 150 tons
Radars: Navigation. Kelvin-Hughes, I-band.

Comment: Similar to the US LCU (Landing Craft Utility) type. Provided with bow and stern ramp. Built by Howaldtswerke, Hamburg, 1965–66. Two sold to Greece in November 1989 and six more in 1992. Based at Eckenforde. Guns have been removed.

SCHLEI 6/2008, Michael Nitz / 1353066

MINE WARFARE FORCES

9 FRANKENTHAL CLASS (TYPE 332)
(MINEHUNTERS—COASTAL) (MHC)

Name	No	Builders	Launched	Commissioned
BAD BEVENSEN	M 1063	Lürssenwerft	21 Jan 1993	9 Dec 1993
BAD RAPPENAU	M 1067	Abeking & Rasmussen	3 June 1993	19 Apr 1994
GRÖMITZ	M 1064	Krögerwerft	29 Apr 1993	23 Aug 1994
DATTELN	M 1068	Lürssenwerft	27 Jan 1994	8 Dec 1994
DILLINGEN	M 1065	Abeking & Rasmussen	26 May 1994	25 Apr 1995
HOMBURG	M 1069	Krögerwerft	21 Apr 1994	26 Sep 1995
SULZBACH-ROSENBERG	M 1062	Lürssenwerft	27 Apr 1995	23 Jan 1996
FULDA	M 1058	Abeking & Rasmussen	29 Sep 1987	16 June 1998
WEILHEIM	M 1059	Lürssenwerft	26 Feb 1988	3 Dec 1998

Displacement, tons: 650 full load
Dimensions, feet (metres): 178.8 × 30.2 × 8.5 (54.5 × 9.2 × 2.6)
Main machinery: 2 MTU 16V 396TB84 diesels; 5,550 hp(m) (4.08 MW) sustained; 2 shafts, cp props; 1 motor (minehunting)
Speed, knots: 18
Complement: 37 (5 officers)

Missiles: SAM: 2 Stinger quad launchers.
Guns: 1 Mauser 27 mm, 3—12.7 mm MGs.
Combat data systems: STN MWS 80-4.
Radars: Navigation. Raytheon SPS-64 or Sperry Bridgemaster; I-band.
Sonars: Atlas Elektronik DSQS-11M; hull-mounted; high frequency.

Programmes: First 10 ordered in September 1988 with STN Systemtechnik Nord as main contractor. M 1066 laid down at Lürssen 8 December 1989. Two ordered 18 October 1995.

Structure: Same hull, similar superstructure and high standardisation as Type 332 and 352. Built of amagnetic steel. Two STN Systemtechnik Nord Pinguin-B3 drones with sonar, TV cameras and two countermining charges, but not Troika control and minelaying capabilities.

Sales: Six of the class built for Turkey from late 1999. M 1060 and M 1066 decommissioned in 2006 and have been sold to the UAE. M 1061 converted to diving support role in 2007.

WEILHEIM 5/2008, Michael Nitz / 1353067

5 KULMBACH CLASS (TYPE 333)
(MINEHUNTERS—COASTAL) (MHC)

Name	No	Builders	Launched	Commissioned
ÜBERHERRN	M 1095	Abeking & Rasmussen	30 Aug 1988	19 Sep 1989
LABOE	M 1097	Krögerwerft	13 Sep 1988	7 Dec 1989
KULMBACH	M 1091	Abeking & Rasmussen	16 June 1989	24 Apr 1990
PASSAU	M 1096	Abeking & Rasmussen	1 Mar 1990	18 Dec 1990
HERTEN	M 1099	Krögerwerft	22 Dec 1989	26 Feb 1991

Displacement, tons: 635 full load
Dimensions, feet (metres): 178.5 × 30.2 × 8.2 (54.4 × 9.2 × 2.5)
Main machinery: 2 MTU 16V 538TB91 diesels; 6,140 hp(m) (4.5 MW) sustained; 2 shafts; cp props
Speed, knots: 18
Complement: 37 (4 officers)

Missiles: SAM: 2 Stinger quad launchers.
Guns: 1 Mauser 27 mm, 3—12.7 mm MGs
Mines: 60
Countermeasures: Decoys: 2 Silver Dog chaff rocket launchers (to be replaced by Rheinmetall MASS).
ESM: Thomson-CSF DR 2000 (to be replaced by SAAB Avitronic SME 100); radar warning.
Combat data systems: PALIS with Link 11.
Radars: Surface search/fire control: Signaal WM20/2; I/J-band.
Navigation: Raytheon SPS-64 or Sperry Bridgemaster; I-band.
Sonars: Atlas Elektronik DSQS-11M; hull-mounted; high frequency.

Programmes: On 3 January 1985 an STN Systemtechnik Nord-headed consortium was awarded the order. The German designation of 'Schnelles Minenkampfbboot' was changed in 1989 to 'Schnelles Minensuchboot'. After modernisation redesignated 'Minenjagdboote'.

Modernisation: Five ships of Hameln class converted to minehunters 1999–2001 and redesignated Kulmbach class (Type 333). Eight to ten disposable ROV Sea Fox I are carried for inspection and up to 30 Sea Fox C for mine disposal. It has a range of 500 m at 6 kt and uses a shaped charge.

Structure: Ships built of amagnetic steel adapted from submarine construction. Signaal M 20 System removed from the deleted Zobel class fast attack craft. PALIS active link.

LABOE 7/2008, B Präzelin / 1353044

5 ENSDORF CLASS (TYPE 352)
(MINESWEEPERS—COASTAL) (MHCD)

Name	No	Builders	Launched	Commissioned
HAMELN	M 1092	Lürssenwerft	15 Mar 1988	29 June 1989
PEGNITZ	M 1090	Lürssenwerft	13 Mar 1989	9 Mar 1990
SIEGBURG	M 1098	Krögerwerft	14 Apr 1989	17 July 1990
ENSDORF	M 1094	Lürssenwerft	8 Dec 1989	25 Sep 1990
AUERBACH	M 1093	Lürssenwerft	18 June 1990	7 May 1991

Displacement, tons: 635 full load
Dimensions, feet (metres): 178.5 × 30.2 × 8.2 (54.4 × 9.2 × 2.5)
Main machinery: 2 MTU 16V 538TB91 diesels; 6,140 hp(m) (4.5 MW) sustained; 2 shafts; cp props
Speed, knots: 18
Complement: 38 (4 officers)

Missiles: SAM: 2 Stinger quad launchers.
Guns: 1 Mauser 27 mm, 3—12.7 mm MGs.
Mines: 60
Countermeasures: Decoys: 2 Silver Dog chaff rocket launchers (to be replaced by Rheinmetall MASS).
ESM: Thomson-CSF DR 2000 (to be replaced by SAAB Avitronic SME 100); radar warning.
Combat data systems: PALIS with Link 11. STN C2 remote-control system for minesweeping drone Seehund.
Radars: Surface search/fire control: Signaal WM20/2; I/J-band.
Navigation: Raytheon SPS-64 or Sperry Bridgemaster; I-band.
Sonars: STN ADS DSQS 15A mine-avoidance; active high frequency.

Programmes: On 3 January 1985 an STN Systemtechnik Nord-headed consortium was awarded the order. The German designation of 'Schnelles Minenkampfbboot' was changed in 1989 to 'Schnelles Minensuchboot'. After modernisation redesignated 'Hohlstabenboote'.

Modernisation: Five minesweepers of Hameln class converted 2000–2001 to control up to four remotely controlled minesweeping drones (Seehund). ROV Sea Fox I carried for inspection. ROV Sea Fox C for mine disposal. Double ropesa system for mechanical sweeping.

Structure: Ships built of amagnetic steel adapted from submarine construction. Signaal M 20 System removed from the deleted Zobel class fast attack craft. PALIS active link.

ENSDORF 4/2008, Martin Mokrus / 1353045

18 SEEHUND (MINESWEEPERS—DRONES) (MSD)

SEEHUND 1–18

Displacement, tons: 95 full load
Dimensions, feet (metres): 78.1 × 15 × 6.9 (23.8 × 4.6 × 2.1)
Main machinery: 1 Deutz MWM D602 diesel; 446 hp(m) (328 kW); 1 shaft
Speed, knots: 9 **Range, n miles:** 520 at 8 kt
Complement: 3 (passage crew)

Comment: Built by MaK, Kiel and Blohm + Voss, Hamburg between August 1980 and May 1982. Modernised in conjunction with the Type 352 conversion programme 2000–2001.

SEEHUND 17 5/2008*, Michael Nitz / 1353068

1 DIVER SUPPORT SHIP (TYPE 332B) (MCD)

Name	No	Builders	Launched	Commissioned
ROTTWEIL	M 1081	Krögerwerft	12 Mar 1982	7 July 1993

Displacement, tons: 650 full load
Dimensions, feet (metres): 178.8 × 30.2 × 8.5 (54.5 × 9.2 × 2.6)
Main machinery: 2 MTU 16V 396 TB84 diesels; 5,550 hp(m) (4.08 MW) sustained; 2 shafts, cp props; 1 motor (minehunting)
Speed, knots: 18
Complement: 27 (5 officers)

Missiles: SAM: 2 Stinger quad launchers.
Guns: 1 Maser 27 mm
Combat data systems: STN MWS 80-4.
Radars: Navigation: Sperry Bridgemaster SPS-64; I-band.
Sonars: Atlas Elektronik DSQS-11M; hull-mounted; high frequency.

Comment: Built and operated as minehunter until 2007 when it was converted to a diving support role. Carries three diving teams. Capable of laying 24 mines. Amagnetic steel construction. Based at Eckernförde.

ROTTWEIL 4/2002, H M Steele / 0068085

SURVEY AND RESEARCH SHIPS

Notes: A 12 ton midget submarine *Narwal* was recommissioned in April 1996 for research. Originally built by Krupp Atlas as an SDV.

1 TYPE 751 (AGE)

Name	No	Builders	Commissioned
PLANET	A 1437	Thyssen Nordseewerke, Emden	31 May 2005

Displacement, tons: 3,500 full load
Dimensions, feet (metres): 239.5 × 89.26 × 22.3 (73 × 27.2 × 6.8)
Main machinery: Diesel electric; 2 permanent magnet motors; 6,034 hp(m) (4.5 MW); 2 shafts
Speed, knots: 15 **Range, n miles:** 5,000 at 15 kt
Complement: 25 plus 20 trials personnel

Comment: Ex-Type 752 SWATH design which replaced the old *Planet*. The roles of the ship include both research and trials. It is run by Wehrtechnische Dienststelle (WTD 71) in Eckernförde. It supports both WTD 71 and Forschungsanstalt für Wasserschall und Geophysik (FWG) in Kiel. First authorised in April 1998 and contract placed with TNSW, Emden. After a delay of over two years, firm order finally made in December 2000. Launched on 12 August 2003, the ship has a sonar well, torpedo tubes and can carry five 20 ft containers.

PLANET 3/2007, Michael Nitz / 1166735

3 SCHWEDENECK CLASS (TYPE 748) (MULTIPURPOSE) (AG)

Name	No	Builders	Commissioned
SCHWEDENECK	Y 860	Krögerwerft, Rendsburg	20 Oct 1987
KRONSORT	Y 861	Eisflether Werft	2 Dec 1987
HELMSAND	Y 862	Krögerwerft, Rendsburg	4 Mar 1988

Displacement, tons: 1,018 full load
Dimensions, feet (metres): 185.3 × 35.4 × 17 (56.5 × 10.8 × 5.2)
Main machinery: Diesel-electric; 3 MTU 6V 396 TB53 diesel generators; 1,485 kW 60 Hz sustained; 1 motor; 1 shaft
Speed, knots: 13
Range, n miles: 2,400 at 13 kt
Complement: 13 plus 10 trials parties
Radars: Navigation: 2 Raytheon; I-band

Comment: Order for first three placed in mid-1985. One more was planned after 1995 but was not funded. Based at Eckernförde.

HELMSAND 6/2007, Frank Findler / 1166806

3 STOLLERGRUND CLASS (TYPE 745) (MULTIPURPOSE) (AG)

Name	No	Builders	Commissioned
STOLLERGRUND	Y 863	Krögerwerft	31 May 1989
MITTELGRUND	Y 864	Eisflether Werft	21 Sep 1989
BREITGRUND	Y 865	Eisflether Werft	23 Feb 1990

Displacement, tons: 450 full load
Dimensions, feet (metres): 109.9 × 30.2 × 10.5 (33.5 × 9.2 × 3.2)
Main machinery: 1 Deutz-MWM SBV6M628 diesel; 1,690 hp(m) (1.24 MW) sustained; 1 shaft; bow thruster
Speed, knots: 12 **Range, n miles:** 1,000 at 12 kt
Complement: 7 plus 6 trials personnel

Comment: Five ordered from Lürssen in November 1987; two subcontracted to Eisflether. Equipment includes two I-band radars and an intercept sonar. Based at the Armed Forces Technical Centre, Eckernförde. *Bani* decommissioned in 2003 and *Kalkgrund* in 2004. Both ships transferred to Israel.

STOLLERGRUND 6/2006, A A de Kruff / 1164825

1 TRIALS SHIP (TYPE 741) (YAG)

Name	No	Builders	Commissioned
WILHELM PULLWER	A 1409 (ex-Y 838)	Schürenstadt, Bardenfleth	18 July 1967

Displacement, tons: 180 full load
Dimensions, feet (metres): 103.3 × 24.6 × 7.2 (31.5 × 7.5 × 2.2)
Main machinery: 2 MTU MB diesels; 700 hp(m) (514 kW); 2 Voith-Schneider props
Speed, knots: 12.5
Complement: 17

Comment: Wooden hulled trials ship for barrage systems. To be decommissioned in 2012.

WILHELM PULLWER 9/2004, Hartmut Ehlers / 1044760

1 TRIALS BOAT (TYPE 740) (YAG)

Name	No	Builders	Commissioned
BUMS	Y 1689	Howaldtswerke, Kiel	16 Feb 1970

Dimensions, feet (metres): 86.6 × 22.3 × 4.9 (26.4 × 6.8 × 1.5)

Comment: Single diesel engine. Has a 3 ton crane. Based at Eckornförde To be decommissioned in 2012

BUMS 8/1997, N Sifferlinger / 0012437

INTELLIGENCE VESSELS**3 OSTE CLASS (TYPE 423) (AGI)**

Name	No	Builders	Commissioned
ALSTER	A 50	Schiffsbaugesellschaft, Flensburg	5 Oct 1989
OSTE	A 52	Schiffsbaugesellschaft, Flensburg	30 June 1988
OKER	A 53	Schiffsbaugesellschaft, Flensburg	10 Nov 1988

Displacement, tons: 3,200 full load
 Dimensions, feet (metres): 273.9 × 47.9 × 13.8 (83.5 × 14.6 × 4.2)
 Main machinery: 2 Deutz-MWM BV16M628 diesels; 8,980 hp(m) (6.6 MW) sustained, 2 shafts; 2 motors (for slow speed)
 Speed, knots: 21 (diesels); 8 (motors)
 Complement: 36 plus 40 specialists or 51 plus 36 specialists
 Missiles: SAM: 2 Stinger launchers.
 Guns: 2—12.7 mm Mauser MGs.

Comment: Ordered in March 1985 and December 1986 and replaced the Radar Trials Ships of the same name (old Oker and Alster transferred to Greece and Turkey respectively) Oste launched 15 May 1987, Oker 24 September 1987, Alster 4 November 1988. Carry Atlas Elektronik passive sonar and optical ELAM and electronic surveillance equipment. Particular attention given to accommodation standards. Fitted for but not with light armaments.

ALSTER 6/2008*, Harald Carstens / 13030369

TRAINING SHIPS

Notes: In addition to the one listed below there are 54 other sail training vessels (Types 910-915)

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Commissioned
GORCH FOCK	A 60	Blohm + Voss, Hamburg	17 Dec 1958

Displacement, tons: 2,006 full load
 Dimensions, feet (metres): 293 × 39.2 × 16.1 (89.3 × 12 × 4.9)
 Main machinery: Auxiliary 1 Deutz MWM BV6M628 diesel; 1,690 hp(m) (1.24 MW) sustained, 1 shaft; Kamewa cp prop
 Speed, knots: 11 power; 15 sail. Range, n miles: 1,990 at 10 kt
 Complement: 206 (10 officers, 140 cadets)

Comment: Sail training ship of the improved Horst Wessel type Barque rig. Launched on 23 August 1958. Sail area, 21,141 sq ft. Major modernisation in 1985 at Howaldtswerke. Second major refit in 1991 at Motorenwerke, Bremerhaven included a new propulsion engine and three diesel generators, which increased displacement. Third major refit at Elsfleth-Werft in 2000-2001 included modernisation of electrical distribution system.

GORCH FOCK 5/2008*, Michael Nitz / 13530370

AUXILIARIES**2 + 1 BERLIN CLASS (TYPE 702) (AFSH)**

Name	No	Builders	Launched	Commissioned
BERLIN	A 1411	Flensburger	30 Apr 1999	11 Apr 2001
FRANKFURT AM MAIN	A 1412	Flensburger	5 Jan 2001	27 May 2002

Displacement, tons: 20,240 full load
 Dimensions, feet (metres): 570.8 oa; 527.6 wl × 79.7 × 24.3 (174.0; 160.8 × 24.3 × 7.4)
 Main machinery: 2 MAN 12V 32/40 diesels; 14,388 hp(m) (10.58 MW) sustained; 2 shafts; cp props, bow thruster; 1,000 hp(m) (735 kW)
 Speed, knots: 20
 Complement: 139 (12 officers) plus 94 for embarked staff
 Cargo capacity: 9,540 tons fuel, 450 tons water, 280 tons cargo; 160 tons ammunition
 Missiles: SAM. 2 RAM launchers fitted for but not with
 Guns: 4 Mauser 27 mm, 4—12.7 mm MGs.
 Radars: Navigation; and aircraft control: Sperry Bridgemaster; E/F/I-bands.
 Helicopters: 2 Sea King Mk 41.

Comment: First ship ordered 15 October 1997, and second 3 July 1998. Hulls built by FSG, superstructure by Kröger and electronics by Lürssen MBB-FHS helo handling system. Two RAS beam stations and stern refuelling. Two portable SAM launchers are carried. EW equipment may be fitted. These ships are designed to support UN type operations abroad. Trials with the Finnish 14 m Jurmo class landing craft were conducted in A 1412 during 2007. There can be 26 containers mounted in two layers on the upper deck. This could include a containerised hospital unit for 50. A 1411 based at Wilhelmshaven and A 1412 at Kiel. Approval for construction of a third ship, to enter service in 2012, was given on 3 December 2008. The ship will incorporate improvements based on experience of the first two ships. These include increased power and accommodation.

FRANKFURT AM MAIN 5/2008*, Michael Nitz / 13530371

FRANKFURT AM MAIN 3/2007, A A de Kruif / 1166749

6 ELBE CLASS (TYPE 404) (TENDERS) (ARLHM)

Name	No	Builders	Launched	Commissioned
ELBE	A 511	Bremer Vulkan	24 June 1992	28 Jan 1993

 Dimensions, feet (metres): 329.7 oa; 295.3 wl × 50.5 × 13.5 (100.5, 90.0 × 15.4 × 4.1)
 Main machinery: 1 Deutz MWM 8V 12M 628 diesel; 3,335 hp(m) (2.45 MW); 1 shaft; bow thruster
 Speed, knots: 15. Range, n miles: 2,000 at 15 kt
 Complement: 40 (4 officers) plus 12 squadron staff plus 38 maintainers
 Cargo capacity: 450 tons fuel, 150 tons water; 11 tons luboil; 130 tons ammunition
 Missiles: SAM: 2 Stinger (Fliegerfaust 2) quad launchers.
 Guns: 2 Mauser 27 mm, 4 12.7 mm MGs
 Radars: Navigation; I-band.
 Helicopters: Platform for 1 Sea King.

Comment: Funds released in November 1990 for the construction of six ships to replace the Rhein class. Containers for maintenance and repairs, spare parts and supplies for fast attack craft and minesweepers. Waste disposal capacity: 270 m³ liquids, 60 m³ solids. Allocated as follows: Elbe to 7th Squadron FFBs, Mosel to 5th Squadron MSC, Rhein and Werra to 3rd Squadron MSC, Donau to 1st Squadron corvettes. Main underwent conversion to submarine depot ship from November 2006 to November 2007. Mauser 27 mm guns are fitted at the break of the forecastle. Converted with helicopter refuelling facilities from July 1996 to July 1997.

DONAU 6/2008*, Frank Findler / 1353043

2 REPLENISHMENT TANKERS (TYPE 704) (AOL)

Name	No	Builders	Commissioned
SPESSART (ex-Okapi)	A 1442	Kroger, Rendsburg	1974
RHÖN (ex-Okene)	A 1443	Kröger, Rendsburg	1974

Displacement, tons: 14,169 full load
 Measurement, tons: 6,103 grt; 10,800 dwt
 Dimensions, feet (metres): 427.1 × 63.3 × 28.5 (139.2 × 19.3 × 8.7)
 Main machinery: 1 MaK 12-cyl diesel; 8,000 hp(m) (5.88 MW); 1 shaft; cp prop
 Speed, knots: 16
 Range, n miles: 3,250 at 12 kt
 Complement: 42
 Cargo capacity: 11,000 m³ fuel; 400 m³ water
 Radars: Navigation: Sperry Bridgemaster; E/F/I-bands.

Comment: Completed for Terkol Group as tankers. Acquired in 1976 for conversion (Spessart at Bremerhaven, Rhön at Kröger). The former commissioned for naval service on 5 September 1977 and the latter on 23 September 1977. Has two portable SAM positions. Civilian manned.

SPESSART

6/2008*, Michael Nitz / 1353072

2 WALCHENSEE CLASS (TYPE 703) (REPLENISHMENT TANKERS) (AOL)

Name	No	Builders	Commissioned
AMMERSEE	A 1425	Lindenu, Kiel	2 Mar 1967
TEGERNSEE	A 1426	Lindenu, Kiel	23 Mar 1967

Displacement, tons: 2,174 full load
 Dimensions, feet (metres): 235.9 × 36.7 × 13.8 (71.9 × 11.2 × 4.2)
 Main machinery: 2 MWM 12-cyl diesels; 1,370 hp(m) (1 MW); 1 Kamewa prop
 Speed, knots: 12
 Range, n miles: 3,250 at 12 kt
 Complement: 21
 Radars: Navigation: Sperry Bridgemaster; E/F/I-bands.

Comment: Civilian manned

TEGERNSEE

10/2007, Michael Nitz / 1166745

1 KNURRHAHN CLASS (TYPE 730) (APB)

Name	No	Builders	Commissioned
KNURRHAHN	Y 811	Sietas, Hamburg	Nov 1989

Displacement, tons: 1,424 full load
 Dimensions, feet (metres): 157.6 × 45.9 × 5.9 (48 × 14 × 1.8)

Comment: Accommodation for 200 people.

KNURRHAHN

4/2008*, Michael Nitz / 1353073

1 WESTERWALD CLASS (TYPE 760) (AMMUNITION TRANSPORT) (AEL)

Name	No	Builders	Commissioned
WESTERWALD	A 1435	Orenstein and Koppel, Lübeck	11 Feb 1967

Displacement, tons: 3,460 standard; 4,032 full load
 Dimensions, feet (metres): 344.4 × 48 × 15.5 (105 × 14 × 4.7)
 Main machinery: 2 MD 16V 872 TB90 diesels; 6,000 hp(m) (4.1 MW) sustained; 2 shafts; cp props; bow thruster
 Speed, knots: 16
 Range, n miles: 3,500 at 17 kt
 Complement: 63
 Cargo capacity: 1,080 tons ammunition
 Guns: 2 Bofors 40 mm (cocooned)
 Countermessures: Decoys: 2 Breda SCLAR 105 mm chaff launchers are carried in A 1438.
 Radars: Navigation: Sperry Bridgemaster; I-band.

Comment: Based at Wilhelmshaven. Civilian manned. Odenwald transferred to Egypt in 2003.

WESTERWALD

8/2003, Martin Mokrus / 0570617

2 OHRE CLASS (ACCOMMODATION SHIPS) (APB)

ALTMARK Y 891 (ex-H 11)	WISCHE (ex-Harz) Y 895 (ex-H 31)
-------------------------	----------------------------------

Displacement, tons: 1,320 full load
 Dimensions, feet (metres): 231 × 39.4 × 5 (70.4 × 12 × 1.6)

Comment: Ex-GDR Type 162 built by Peenewerft, Wolgast. One hydraulic 8 ton crane fitted. First commissioned 1985. Classified as 'Schwimmende Stuetzpunkte'. Propulsion and armament has been removed and they are used as non-self propelled accommodation ships for crews of vessels in refit. Civilian manned. Both modernised at Wilhelmshaven and to remain in service until further notice. Two others paid off in 2000 later than expected.

ALTMARK

9/2006, Frank Findler / 1159915

6 LAUNCHES (TYPE 946/945) (YFL)

AK 1 Y 1671	MA 3 Y 1677	ASCHAU Y 1685
MA 2 Y 1676	MA 1 Y 1678	BORBY Y 1687

Dimensions, feet (metres): 39.4 × 12.8 × 6.2 (12.0 × 3.9 × 1.9)
 Main machinery: 1 MAN D2540MTE diesel; 366 hp(m) (269 kW); 1 shaft

Comment: Built by Hans Boost, Trier. All completed in 1985 except MA 1 and Aschau which are larger at 16.2 m and completed in 1992. AK prefix indicates Kiel, and MA Wilhelmshaven and Neustadt.

AK 1

6/2008*, Frank Findler / 1353037

5 LAUNCHES (TYPES 743, 744, 744A, 1344) (YFL)

AM 7 Y 1679 AK 2 Y 1686 WARNOW A 41
 AM 8 Y 1675 AK 6 Y 1683

Dimensions, feet (metres): 62.3 x 13.1 x 3.9 (19 x 4 x 1.2) approx
 Main machinery: 1 or 2 diesels

Comment: For personnel transport and trials work. Types 744 (AK 6) and 744A (AK 2) are radio calibration craft. AM prefix indicates Eckernförde, and AK Kiel. Warnow A 41 is a former GDR tug (Type 1344) used as a diving boat at Warnemünde.

WARNOW 5/2007, Michael Nitz / 1165738

4 RANGE SAFETY CRAFT (TYPE 905) (YFRT)

Name	No	Builders	Commissioned
TODENDORF	Y 835	Lürssen, Vegesack	25 Nov 1993
PÜTLDS	Y 836	Lürssen, Vegesack	24 Feb 1994
BAUMHOLDER	Y 837	Lürssen, Vegesack	30 Mar 1994
MUNSTER	Y 838	Lürssen, Vegesack	14 July 1994

Displacement, tons: 126 full load
 Dimensions, feet (metres): 91.2 x 19.7 x 4.6 (278 x 6 x 1.4)
 Main machinery: 2 KHDTBD 234 diesels, 2,054 hp(m) (1.51 MW); 2 shafts
 Speed, knots: 16
 Complement: 6

Comment: Replaced previous Types 389 and 909 craft. Funded by the Army and civilian manned.

TODENDORF 3/2008*, Martin Mokrus / 1353039

2 OIL RECOVERY SHIPS (TYPE 738) (YPC)

Name	No	Builders	Commissioned
BOTTSAND	Y 1643	Lühring, Brake	24 Jan 1985
EVERSAND	Y 1644	Lühring, Brake	11 June 1988

Measurement, tons: 500 gross; 650 dwt
 Dimensions, feet (metres): 151.9 x 39.4 (137.8, bow opened) x 10.2 (46.3 x 12; 42 x 3.1)
 Main machinery: 1 Deutz BA12M816 diesel; 1,000 hp(m) (759 kW) sustained; 2 shafts
 Speed, knots: 10
 Complement: 6

Comment: Built with two hulls which are connected with a hinge in the stern. During pollution clearance the bow is opened. Ordered by Ministry of Transport but taken over by West German Navy. Normally used as tank cleaning vessels and harbour oilers. Civilian manned. Bottsand based at Warnemünde, Eversand at Wilhelmshaven. A third of class Thor belongs to the Ministry of Transport.

EVERSAND 6/2008*, Martin Mokrus / 1353040

21 PERSONNEL TENDERS (TYPES 934 AND GDR 407) (YFL)

V 3-8 V 10-20 B 11 B 33-34 B 83

Comment: V 3-20 built in 1987-88 by Hatecke. The B series are ex-GDR craft built by Yachtwerft, Berlin.

V 18 6/2008*, Michael Winter / 1353039

FLOATING REPAIR FACILITIES

5 FLOATING REPAIR FACILITIES

Schwimmdock 3 Y 842	DOCK A	GRIEP Y 876
DRUCKDOCK (DOCK C)	HIEV Y 875	

Comment: There are three floating docks: Schwimmdock 3 is 8,000 tons while Dock C is used for submarine pressure tests. Dock A is 1,000 tons and is to be replaced by a new Dock B in 2009. Y 875 and Y 876 are self-propelled floating cranes with a 100 ton crane.

DOCK 3 7/2008*, Frank Findler / 1353041

TUGS

1 HELGOLAND CLASS (TYPE 720B) (ATR)

Name	No	Builders	Commissioned
FEHMARN	A 1458	Unterweser, Bremerhaven	1 Feb 1967

Displacement, tons: 1,310 standard, 1,643 full load
 Dimensions, feet (metres): 223.1 x 41.7 x 14.4 (68 x 12.7 x 4.4)
 Main machinery: Diesel-electric; 4 MWM 12-cyl diesel generators; 2 motors; 3,300 hp(m) (2.43 MW); 2 shafts
 Speed, knots: 17
 Range, n miles: 6,400 at 16 kt
 Complement: 34
 Mines: Laying capacity.
 Radars: Navigation: Raytheon; I-band.
 Sonars: High definition, hull-mounted for wreck search.

Comment: Launched on 9 April 1965. Carry firefighting equipment and has an ice-strengthened hull. Employed as safety ship for the submarine training group. Twin 40 mm guns removed. One of the class to Uruguay in 1998.

FEHMARN 5/2008*, Michael Nitz / 1353075

8 HARBOUR TUGS (TYPES 725, 724, 660) (YTM)

Name	No	Builders	Commissioned
VOGELSAND	Y 816	Orenstein und Koppel, Lübeck	14 Apr 1987

5 WANGEROOGE CLASS (3 TYPE 722 AND 3 TYPE 754) (ATS/YDT)

Name	No	Builders	Commissioned
WANGEROOGE	A 1451	Schichau, Bremerhaven	9 Apr 1968
SPIEKEROOG	A 1452	Schichau, Bremerhaven	14 Aug 1968
BALTRUM	A 1439	Schichau, Bremerhaven	8 Oct 1968
JUIST	A 1440	Schichau, Bremerhaven	1 Oct 1971
LANGEBOG	A 1441	Schichau, Bremerhaven	14 Aug 1968

Displacement, tons: 854 standard; 1,024 full load
 Dimensions, feet (metres): 170.6 × 39.4 × 12.8 (52.1 × 12.1 × 3.9)
 Main machinery: Diesel-electric; 4 MWM 16-cyl diesel generators; 2 motors; 2,400 hp(m) (1.76 MW); 2 shafts
 Speed, knots: 14
 Range, n miles: 5,000 at 10 kt
 Complement: 24 plus 33 trainees (A 1439-1441)
 Guns: 1 Bofors 40 mm/70 (cocooned in some, not fitted in all).

Comment: First two are salvage tugs with firefighting equipment and ice-strengthened hulls. Wangerooge sometimes used for pilot training and Spiekeroog as submarine safety ship. The other three were converted 1974-78 to training ships with Baltrum and Juist being used as diving training vessels at Neustadt, with recompression chambers and civilian crews. A 1455 sold to Uruguay in 2002.

SPIEKEROOG

4/2007*, Frank Findler / 1168801

COAST GUARD (KÜSTENWACHE)

Notes: The Coast Guard was formed on 1 July 1974 and is a loose affiliation of the forces of several organisations including: seagoing units of the Border Guard (Bundespolizei), Fishery Protection (Fischereischutz); Maritime Police (Wasserschutzpolizei); Water and Navigation Board (Schiffahrtspolizei); Customs (Zoll). These organisations have responsibility for the operation and maintenance of their own craft but all have the inscription Küstenwache on the side.

BORDER GUARD (Bundespolizei)

Notes: (1) The force consists of about 600 men. Headquarters at Neustadt and bases at Warnemünde and Cuxhaven. There are three flotillas; one each at Neustadt, Cuxhaven and Warnemünde. The name of the force was changed from Bundesgrenzschutz-See to Bundespolizei on 1 July 2005.

(2) The force is augmented by a maritime section of the anti-terrorist force GSG 9.
 (3) Craft have dark blue hulls and white superstructures with a black, red and yellow diagonal stripe and the inscription Küstenwache painted on the ship's side and Bundespolizei insignia.

(4) There is a total of some 60 helicopters including 13 Eurocopter EC 155, 9 EC 135, 13 Bell UH-1D, 8 Bell 212, 17 BO-105 and a number of AS 330 Puma

(5) All 40 mm guns removed in 1997.

3 BAD BRAMSTEDT CLASS (WPSO)

Name	No	Builders	Commissioned
BAD BRAMSTEDT	BP 24 (ex-BG 24)	Abeking and Rasmussen, Lemwerder	8 Nov 2002
BAYREUTH	BP 25 (ex-BG 25)	Abeking and Rasmussen, Lemwerder	2 May 2003
ESCHWEGE	BP 26 (ex-BG 26)	Abeking and Rasmussen, Lemwerder	16 Dec 2003

Displacement, tons: 800 standard
 Dimensions, feet (metres): 216.3 × 34.8 × 10.5 (65.9 × 10.6 × 3.2)
 Main machinery: 1 MTU 16V 1163 diesel, 7,000 hp(m) (5.2 MW); 1 shaft; fixed propeller
 Speed, knots: 21.5
 Complement: 14 + 10 in temporary accommodation
 Radars: Surface search I-band.
 Navigation: I-band.
 Helicopters: Platform for 1 light.

Comment: Contract awarded in 2000 to Prime Contractor Abeking and Rasmussen for three craft to replace six ships of Neustadt class. Hulls constructed by Yantar, Kaliningrad and completed at Lemwerder. Steel hull with aluminium superstructure. The Russian Federal Border Guard Sprut class offshore patrol vessels is based on this design.

ESCHWEGE

7/2008*, Maritime Photographic / 1353076

1 BREDSTEDT CLASS (TYPE PB 60) (WPSO)

Name	No	Builders	Commissioned
BREDSTEDT	BP 21 (ex-BG 21)	Eisflether Werft	24 May 1989

Displacement, tons: 673 full load
 Dimensions, feet (metres): 214.6 × 30.2 × 10.5 (65.4 × 9.2 × 3.2)
 Main machinery: 1 MTU 20V 1163 TB93 diesel; 8,325 hp(m) (6.12 MW) sustained; 1 shaft; bow thruster; 1 auxiliary diesel generator; 1 motor
 Speed, knots: 25 (12 on motor). Range, n miles: 2,000 at 25 kt; 7,000 at 10 kt
 Complement: 17 plus 4 spare
 Guns: 1—40 mm MGs
 Radars: Surface search Racal AC 2690 BT; I-band.
 Navigation: 2 Racal ARPA; I-band.
 Helicopters: Platform for 1 light.

Comment: Ordered 27 November 1987, laid down 3 March 1988 and launched 18 December 1988. An Avon Searider rigid inflatable craft can be lowered by a stern ramp. A second RIB on the port side is launched by crane. Based at Cuxhaven.

BREDSTEDT

11/2008*, Michael Nitz / 1353011

3 EUROPA CLASS (WPBR)

EUROPA 1-3
 Displacement, tons: 10
 Dimensions, feet (metres): 47.2 × 12.5 × 3.1 (14.4 × 3.8 × 0.9)
 Main machinery: 2 MAN diesels; 240 hp(m) (180 kW)
 Speed, knots: 22
 Radars: Kelvin Hughes, I-band

Comment: River patrol craft built by Schless Werft in 1975.

2 SASSNITZ CLASS (TYPE PB 50 ex-TYPE 153) (WPBO)

Name	No	Builders	Commissioned
NEUSTRELITZ (ex-Sassnitz)	BP 22 (ex-BG 22, ex-P 6165, ex-591)	Peenewerft, Wolgast	31 July 1990
BAD DÜBEN (ex-Binz)	BP 23 (ex-BG 23, ex-593)	Peenewerft, Wolgast	23 Dec 1990

Displacement, tons: 369 full load
Dimensions, feet (metres): 160.4 oa, 147.6 wl x 28.5 x 7.2 (48.9; 45 x 8.7 x 2.2)
Main machinery: 2 MTU 12V 595 TE90 diesels; 8,800 hp(m) (6.48 MW) sustained; 2 shafts
Speed, knots: 26. Range, n miles: 2,400 at 20 kt
Complement: 33 (7 officers)
Guns: 2—7.62 mm MGs.
Radars: Surface search: Racal AC 2690 BT; I-band (BG 22 and 23)
Navigation: Racal ARPA; I-band (BG 22 and 23).

Comment: Ex-GDR designated Balcom 10 and seen for the first time in the Baltic in August 1988. The original intention was to build up to 50 for the USSR, Poland and the GDR. In 1991 the first three were transferred to the Border Guard, based at Neustadt. *Neustrelitz* fitted with German engines and electronics in 1992-93 and accommodation improved. *Bad Düben* similarly modified at Peenewerft in 1995-96. The original design had the SS-N-25 SSM and three engines. The third of class, *Sellin*, had been on loan to WTD 71 (weapons trials) at Eckernförde but was sold in 1999.

BAD DÜBEN (old number) 4/2003, Frank Findler / 05/0608

4 SCHWEDT CLASS (WPBR)

SCHWEDT BP 42 (ex-BG 42)	FRANKFURT/ODER BP 43 (ex-BG 43)
KUSTRIN-KIEZ BP 41 (ex-BG 41)	AURITH BP 44 (ex-BG 44)

Displacement, tons: 6 full load
Dimensions, feet (metres): 33.5 x 10.5 x 2.6 (10.2 x 3.2 x 0.8)
Main machinery: 2 Volvo Penta TAMD 42 VVJ; 462 hp(m) (340 kW); 2 Hamilton 211 waterjets
Speed, knots: 32 Range, n miles: 200 at 25 kt
Complement: 3
Guns: 1—7.62 mm MG
Radars: Navigation: I-band

Comment: River patrol craft which belong to the BGSAMT-Frankfurt/Oder since 1994.

FRANKFURT/ODER (old number) 12/1998, BGSAMT / 0056996

4 TYPE SAB 12 (WPB)

VOGTLAND BP 51 (ex-BG 51, ex-G 56, ex-GS 17)	SPREEWALD BP 53 (ex-BG 53, ex-G 51, ex-GS 16)

Displacement, tons: 14 full load
Dimensions, feet (metres): 41.3 x 13.1 x 3.6 (12.6 x 4 x 1.1)
Main machinery: 2 Volvo Penta diesels; 539 hp(m) (396 kW); 2 shafts
Speed, knots: 16
Complement: 5

Comment: Ex-GDR MAB 12 craft based at Karnin, Stralsund and Frankfurt/Oder. Five sold to Cyprus in 1992. Belong to BGSAMT-Rostock.

SPREEWALD 4/2007, Hartmut Ehlers / 1166788

5 PRIGNITZ CLASS (WPB)

PRIGNITZ BP 61	UCKERMARK BP 62	ALTMARK BP 63	BÖRDE BP 64	RHOEN BP 65
----------------	-----------------	---------------	-------------	-------------

Displacement, tons: 38 full load
Dimensions, feet (metres): 68.9 x 17.0 x 8.5 (21.0 x 5.2 x 2.6)
Main machinery: 2 diesels; 1,580 hp(m) (1.2 MW); 1 shaft; fixed propeller
Speed, knots: 23

Comment: Built by Schiffs-und-Entwicklungsgesellschaft 2006-08.

PRIGNITZ 11/2008*, Michael Nitz / 1353078

FISHERY PROTECTION SHIPS (Fischereischutz)

Notes: Operated by Ministry of Food and Agriculture.

3 PATROL SHIPS

MEERKATZE 77 m vessel of 2,250 tons and 15 kt. Completed December 1977
 SEEFALKE 83 m vessel of 2,400 tons and 20 kt. Completed August 1981
 SEEADLER 72 m vessel of 2,000 tons and 19 kt. Completed 2000

Comment: Fishery Protection Ships. Black hulls with grey superstructure and black, red and yellow diagonal stripes. An order for two 72 m vessels to replace *Seefalke* and *Meerkatze* was made in December 2006. Being built by Peenewerft, they are to be delivered in 2009.

SEEADLER 7/2008*, Maritime Photographic / 1353079

MARITIME POLICE (Wasserschutzpolizei)

Notes: (1) Under the control of regional governments. Most have Küstenwache markings but colours vary from region to region.
 (2) There are 14 seaward patrol craft: *WSP 1, 4, 5 and 7, Bremen 3 and 6, Helgoland, Sylt, Fehmarn, Birknack, Eider, Falshöft, Bürgermeister Brauer* and *Bürgermeister Weichmann*.
 (3) Harbour craft include *Stegnitz, Greif, Glucksburg, Stoltera, Schwansen, Vossbrook, Brunswick, Treve, Wagnien, Bussard, Habicht, Gernsheim, Hoben, Koblenz* and *Breitling*.

BÜRGERMEISTER BRAUER 5/2008*, Frank Findler / 1353035

BREMEN 3 8/2008*, Frank Findler / 1353038

CUSTOMS (Zoll)

Notes. (1) Operated by Ministry of Finance with a total of over 100 craft. Green hulls with grey superstructure and sometimes carry machine guns. Some have Küstenwache markings.
 (2) Seaward patrol craft include *Usedom, Hamburg, Bremerhaven, Schleswig-Holstein, Emden, Hohwacht, Glückstadt, Hiddensee, Rügen, Kalkgrund* and *Priwall*.

SCHLESWIG-HOLSTEIN

5/2008*, Michael Nitz / 1353080

WATER AND NAVIGATION BOARD (SCHIFFAHRTPOLIZEI)

Notes. (1) Comes under the Ministry of Transport. Most ships have black hulls with black/red/yellow stripes. Some have Küstenwache markings.
 (2) Eight buoy tenders: *Gustav Meyer, Bruno Illing, Norden, Baumrönne, Vilm, Knechtsand, Strelasund, Triton*.
 (3) Five oil recovery ships: *Scharhorn, Arkona, Nordsee, Mellum, Neuwerk*.
 (4) Two SKB 64 and 601 types (ex-GDR): *Vogelsand, Ranzow*.
 (5) One launch: *Friedrich Voss*.

NORDSEE

5/2008*, Frank Findler / 1353034

CIVILIAN SURVEY AND RESEARCH SHIPS

Notes: The following ships operate for the Bundesamt für Seeschifffahrt und Hydrographie (BSH), either under the Ministry of Transport or the Ministry of Research and Technology (*Polarstern, Meteor, Poseidon, Sonne* and *Alkor*).

KOMET (survey and research) 1,590 tons completed by Krögerwerft in October 1998
ATAIR (survey), **DENEK** (survey), **WEGA** (survey) 1,050 tons, diesel-electric, 11.5 kt. Complement 16 plus 6 scientists. Built by Krögerwerft and Peenewerft (*Deneb*), completed 3 August 1987, 24 November 1994 and 26 October 1990 respectively.
METEOR (research) 3,500 tons, diesel-electric, 14 kt, range 10,000 n miles. Complement 33 plus 29 research staff. Completed by Schlichting, Travemünde 15 March 1986.
WALTHER HERWIG III 2,400 tons. Completed 1993.
CAPELLA 455 tons. Completed by Fassmerwerft in 2003.
POLARSTERN (polar research) 10,878 grt. Completed 1982
SONNE (research) 1,200 grt. Completed by Rickmerswerft 1990.
ALKOR and **HEINKE** 1,200 tons. Completed 1990.
SOLEA 770 tons. Completed by Fassmer 2004.
MARIA S MERIAN 6,050 tons. Completed by Kröger in 2005.
POSEIDON 1,700 tons. Completed by Schichau in 1976.

WALTER HERWIG III

Ghana

Country Overview

Formerly a British colony known as the Gold Coast, Ghana gained independence in 1957. Located in west Africa, the country has an area of 92,100 square miles and a 292 n mile coastline with the Gulf of Guinea. It is bordered to the east by Togo and to the west by Ivory Coast. The capital and largest city is Accra which has links to a deep-water port at Tema. There is a second port at Sekondi-Takoradi. Territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits are not defined.

Headquarters Appointments

Commander, Navy: Rear Admiral A R S Nuno
Eastern Naval Command: Commodore M Quashie
Western Naval Command: Commodore F Daley

Personnel

(a) 2009: 2,100 (150 officers)
 (b) Voluntary service

Bases

Burma Camp, Accra (Headquarters)
 Sekondi (Western Naval Command)
 Tema (near Accra) (Eastern Naval Command)

Maritime Aircraft

Two Fokker F27 are operated for Coastal Surveillance, SAR and shipping control.

PATROL FORCES

2 BALSAM CLASS (PBO)

Name	No	Builders	Commissioned
ANZONE (ex-Woodrush)	P 30 (ex-WLB 407)	Duluth Shipyard, Minnesota	22 Sep 1944
BONSU (ex-Swoetbrier)	P 31 (ex-WLB 405)	Duluth Shipyard, Minnesota	26 July 1944

Displacement, tons: 935 standard; 1,025 full load
Dimensions, feet (metres): 190 x 37 x 12 (54.9 x 11.3 x 3.8)
Main machinery: Diesel electric; 2 diesels; 1,710 hp (1.28 MW); 1 motor; 1,200 hp (895 kW); 1 shaft; bow thruster
Speed, knots: 13. **Range, n miles:** 8,000 at 12 kt
Complement: 60 (5 officers)
Guns: 1—14.5 mm.
Radars: Navigation: Raytheon SPS-64(V)1.

Comment: Formed USCG buoy tenders. *Anzone* transferred from the US Coast Guard on 4 May 2001 and *Bonsu* on 27 August 2001. Both received new engines 1988–91. Employed on EEZ patrol, fishery protection and troop support duties.

BONSU 6/2007, Ghana Navy / 1335248

2 LÜRSSEN FPB 45 CLASS (FAST ATTACK CRAFT—GUN) (PBO)

Name	No	Builders	Commissioned
DZATA	P 26	Lürssen, Vegesack	4 Dec 1979
SEBO	P 27	Lürssen, Vegesack	2 May 1980

Displacement, tons: 269 full load
Dimensions, feet (metres): 147.3 x 23 x 8.9 (44.9 x 7 x 2.7)
Main machinery: 2 MTU 16V 538T891 diesels; 6,140 hp(m) (4.5 MW); sustained; 2 shafts
Speed, knots: 27. **Range, n miles:** 1,800 at 16 kt; 700 at 25 kt
Complement: 45 (5 officers)
Guns: 2 Breda 40 mm/70; 300 rds/min to 12.5 km (6.8 n miles); weight of shell 0.96 kg.
Radars: Surface search: Decca Type 978; I-band

Comment: Ordered in 1976. *Dzata* completed a major overhaul at Swan Hunter's Wallsend, Tyneside yard on 8 May 1989. *Sebo* started a similar refit at CMN Cherbourg in May 1991 which completed in August 1992. Employed in Fishery Protection role.

DZATA 5/2002 / 0533316

2 LÜRSSEN PB 57 CLASS (FAST ATTACK CRAFT—GUN) (PG)

Name	No	Builders	Commissioned
ACHIMOTA	P 28	Lürssen, Vegesack	27 Mar 1981
YOGAGA	P 29	Lürssen, Vegesack	27 Mar 1981

Displacement, tons: 389 full load
Dimensions, feet (metres): 190.6 x 25 x 9.2 (58.1 x 7.6 x 2.8)
Main machinery: 3 MTU 16V 538 T891 diesels; 9,210 hp(m) (6.78 MW) sustained; 3 shafts
Speed, knots: 30
Complement: 56 (5 officers)
Guns: 1 OTO Melara 3 in (76 mm) compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-air; weight of shell 6 kg, 250 rounds.
 1 Breda 40 mm/70; 300 rds/min to 12.5 km (6.8 n miles) anti-surface; weight of shell 0.96 kg
Weapons control: LIOD optronic director.
Radars: Surface search/fire control Thomson-CSF Canopus A, I/J-band.
Navigation: Decca TM 1226C; I-band.

Comment: Ordered in 1977. *Yogaga* completed a major overhaul at Swan Hunter's Wallsend, Tyneside yard 8 May 1989. *Achimota* started a similar refit at CMN Cherbourg in May 1991 and was joined by *Yogaga* for repairs in late 1991. Both completed by August 1992. Employed on Fishery Protection duties.

ACHIMOTA 6/2007, Ghana Navy / 1167861

1 INSHORE PATROL CRAFT (PBI)

DAVID HANSEN P 32

Displacement, tons: 315 (light); 41.25 full load
Dimensions, feet (metres): 64.9 x 18.0 x 5.9 (19.8 x 5.5 x 1.8)
Main machinery: 3 Detroit 8V 71 diesel; 690 hp (515 kW) sustained; 3 shafts
Speed, knots: 28. **Range, n miles:** 450 at 26 kt
Complement: 10 (1 officer)
Guns: 1—14.5 mm MG

Comment: Ex-US Navy PB Mk III Series built by Paterson Builders, Wisconsin in 1975–76. Aluminium construction. The design includes a pilot house offset to starboard to provide space to port for the installation of additional weapons. Transferred to the Ghana Navy in 2001 and employed on harbour and anchorage surveillance and security patrols.

DAVID HANSEN 6/2007, Ghana Navy / 1167890

Greece

HELLENIC NAVY

Country Overview

The Hellenic Republic is situated in south-eastern Europe and occupies the southernmost part of the Balkan Peninsula. It includes more than 3,000 islands, most of which are in the Aegean Sea. With an area of 50,949 square miles, it has borders to north-west with Albania, to the north with the Former Yugoslav Republic of Macedonia and with Bulgaria and to the north-east with Turkey. It has a 7,387 n mile coastline with the Aegean, Mediterranean and Ionian Seas. The capital and largest city is Athens whose seaport, Piraeus, is also the largest. Other major ports include Thessaloniki, Patras and Iraklion. Territorial seas (6 n miles) are claimed but an EEZ is not claimed.

Headquarters Appointments

Chief of the Hellenic Navy:
Vice Admiral G Karamaliks
Deputy Chief of Staff:
Rear Admiral N Vazaios
Commander, Navy Training Command:
Rear Admiral D Papagiannidis
Inspector General:
Rear Admiral E Mitrou

Fleet Command

Commander of the Fleet:
Vice Admiral K Karaiskos
Deputy Commander of the Fleet:
Rear Admiral G Dimitriadis

Personnel

(a) 2008: 20,200 (4,200 officers) including 3,800 conscripts
 (b) 12 months' national service

Bases

Salamis and Souda Bay

Naval Commands

Commander of the Fleet has under his flag all combatant ships. Navy Logistic Command is responsible for the bases at Salamis and Souda Bay, the Supply Centre and

all auxiliary ships. Navy Training Command is in charge of the Petty Officers' School, the naval staff and commanding officers course and two training centres.

Naval Districts

Aegean, Ionian and Northern Greece

Naval Aviation

Alouette III helicopters (Training)
 AB Z12ASW helicopters (No 1 Squadron).
 S-70B-6 Seahawk (No 2 Squadron).
 P-38 Onions are operated under naval command by mixed Air Force and Navy crews

SUBMARINES

8 + 2 GLAVKOS CLASS (TYPE 209/1100/1200) (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
GLAVKOS	S 110	Howaldtswerke, Kiel	1 Sep 1968	15 Sep 1970	6 Sep 1971
NEREUS	S 111	Howaldtswerke, Kiel	15 Jan 1969	7 June 1971	10 Feb 1972
TRITON	S 112	Howaldtswerke, Kiel	1 June 1969	14 Oct 1971	8 Aug 1972
PROTEUS	S 113	Howaldtswerke, Kiel	1 Oct 1969	1 Feb 1972	8 Aug 1972
POSEIDON	S 116	Howaldtswerke, Kiel	15 Jan 1976	21 Mar 1978	22 Mar 1979
AMPHITRITE	S 117	Howaldtswerke, Kiel	26 Apr 1976	14 June 1978	14 Sep 1979
OKEANOS	S 118	Howaldtswerke, Kiel	1 Oct 1976	16 Nov 1978	15 Nov 1979
PONTOS	S 119	Howaldtswerke, Kiel	25 Jan 1977	21 Mar 1979	29 Apr 1980

Displacement, tons: 1,125 surfaced; 1,235 dived (S 110-113); 1,200 surfaced; 1,285 dived (S 116, 117, 119); 1,430 (approx) (S 118)

Dimensions, feet (metres): 179.5 × 20.3 × 18.5 (54.4 × 6.2 × 5.6) (S 110-113)

183.4 × 20.3 × 18.8 (55.9 × 6.2 × 5.7) (S 116, 117, 119)

204.7 × 20.3 × 18.8 (62.4 × 6.2 × 5.7) (S 118)

Main machinery: Diesel-electric; 4 MTU 12V 493 A2B0 diesels, 2,400 hp(m) (1.76 MW) sustained; 4 Siemens alternators, 1.7 MW; 1 Siemens motor; 4,600 hp(m) (3.38 MW) sustained; 1 shaft; 2 HDW PEM fuel cells (S 118); 240 kW

Speed, knots: 11 surfaced; 21.5 dived

Complement: 38 (6 officers)

Missiles: McDonnell Douglas Sub Harpoon; active radar homing to 130 km (70 n miles) at 0.8 Mach; warhead 258 kg. Can be discharged from 4 tubes only (S 110-113).

Torpedoes: 8—21 in (533 mm) bow tubes. 14AEG SUT Mod 0, wire-guided; active/passive homing to 12 km (8.5 n miles) at 35 kt; warhead 250 kg. Swim-out discharge.

Countermeasures: ESM: Argos AR-700-S5; radar warning (S 110-113).

Thomson Ariel DR 2000; radar warning (S 116-119).

Weapons control: Signal Sinbads (S 116, 117, 119). Atlas Elektronik ISUS-90 (S 118). Unisys/Kanaris with UYK-44 computers (S 110-113).

Radars: Surface search: Thomson-CSF Calypso II (S 116-119) Thomson MILNAV (S 110-113); 1-band.

Sonars: Atlas Elektronik CSU 83-90 (DBQS-21); (S 110-113); Atlas Elektronik CSU 3-4 (S 116-119); hull-mounted, active/passive search and attack; medium frequency. Atlas Elektronik PRS-3-4; passive ranging. STN Atlas flank array (S 118); passive low frequency.

POSEIDON

11/2005, M Declerck / 1184522

Programmes: Designed by Ingenieurkontor, Lübeck for construction by Howaldtswerke, Kiel and sale by Ferrostaal, Essen all acting as a consortium.

Modernisation: Contract signed 5 May 1989 with HDW and Ferrostaal to implement a Neptune I update programme to bring first four up to an improved standard and along the same lines as the German S 206A class. Included Sub Harpoon, flank array sonar, Unisys FCS, Sperry Mk 29 Mod 3 inertial navigation system, GPS and Argos ESM. Triton completed refit at Kiel in May 1993, Proteus at Salamis in December 1995, Glavkos in November 1997, and Nereus in March 2000. A contract signed 31 May 2002 with Hellenic Shipyards (main sub-contractor HDW) for a Neptune II modernisation programme for S 117-119. S 116 is not to be modernised. Okeanos started refit in December 2004 and was completed in 2009.

A 'plug-in' extension of 6.5 m was required to incorporate AIP (Siemens PEM fuel cell system). In addition an STN Atlas ISUS-90 combat management system, flank array sonar, electro-optic mast, SATCOM, Link II and Sub Harpoon were fitted. Plans to upgrade Pontos and Amphitrite, have been superseded by plans to build two new Type 209/1400 class.

Structure: A single-hull design with two ballast tanks and forward and after trim tanks. Fitted with snort and remote machinery control. The single screw is slow revving. Very high-capacity batteries with GRP lead-acid cells and battery cooling by Wilh Hagen and VARTA. Diving depth, 250 m (820 ft). Fitted with two periscopes.

Operational: Endurance, 50 days. A mining capability is reported but not confirmed. The four Type 209/1100 boats are likely to be decommissioned as the new Type 214 boats enter service.

1 + 3 PAPANIKOLIS (TYPE 214) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
PAPANIKOLIS	S 120	Howaldtswerke, Kiel	27 Feb 2001	22 Apr 2004	2009
PIPINOS	S 121	Hellenic Shipyards, Skaramanga	15 Oct 2002	Apr 2007	2009
MATROZOS	S 122	Hellenic Shipyards, Skaramanga	1 Apr 2003	Mar 2008	2009
KATSONIS	S 123	Hellenic Shipyards, Skaramanga	1 Apr 2004	Dec 2008	2010

Displacement, tons: 1,700 (surfaced); 1,800 (dived)

Dimensions, feet (metres): 213.3 × 20.7 × 21.6
(65 × 6.3 × 6.6)

Main machinery: 2 MTU 16V 396 diesels; 5,600 hp(m)
(4.17 MW); 1 Siemens Permasyn motor; 1 shaft; 2 HDW
PEM fuel cells; 240 kW

Speed, knots: 20 dived; 11 surfaced

Complement: 40 (6 officers)

Missiles: SSM: Boeing Sub Harpoon.

Torpedoes: 8 21 in (533 mm) bow tubes (4 fitted for Sub
Harpoon discharge); Atlas Elektronik DM2A4 torpedoes.

wire-guided; active/passive homing to 50 km (27 n miles)

at 50 kt; warhead 250 kg. Total of 16 weapons.

Countermeasures: Decoys. CIRCE torpedo countermeasures.
ESM EIBitTIMNEX II.

Weapons control: STN Atlas ISUS-90.

Radars: Surface search: Thales Sphynx; I-band.

Sonars: Bow and flank arrays. To be fitted for but not with
towed array.

Programmes: Decision taken on 24 July 1998 and
announced on 9 October to order three HDW designed
submarines with an option for a fourth. The first of class

is being built at Kiel and subsequent hulls at Hellenic
Shipyards. Contracts to build signed 15 February 2000
and the fourth was ordered in 2002. Acceptance of
the first of class was declined in November 2006 due
to contractual disagreements. The implications for
the other three boats and the timescale of the overall
programme are not known.

Structure: Diving depth 400 m (1,300 ft). To be equipped
with Zeiss optronic mast and SATCOM.

Operational: Papanikolis started initial sea trials on
2 February 2005 and further trials were completed in
September 2008.

FRIGATES

Notes. Procurement of a class of up to six multipurpose frigates is a high priority and a decision on the way ahead is expected in 2009. The requirement is for an air-defence capable ship with additional ASW and ASUW roles. Competing designs are likely to include: FREMM (DCNS), MEKO D (Hellenic Shipyards), LCF (Royal Schelde), F-100 (Navantia)

4 HYDRA CLASS (MEKO 200 HN) (FFGH)

Name	No	Builders	Laid down	Launched	Commissioned
HYDRA	F 452	Blohm + Voss, Hamburg	17 Dec 1980	25 June 1991	15 Oct 1992
SPETSAI	F 453	Hellenic Shipyards, Skaramanga	11 Aug 1992	9 Dec 1993	24 Oct 1996
PSARA	F 454	Hellenic Shipyards, Skaramanga	12 Dec 1993	20 Dec 1994	30 Apr 1998
SALAMIS	F 455	Hellenic Shipyards, Skaramanga	20 Dec 1994	15 May 1997	16 Dec 1998

Displacement, tons: 2,710 light; 3,350 full load
Dimensions, feet (metres): 383.9; 357.8 (wl) × 48.6 × 19.7
 (117, 109 × 14.8 × 6)
Main machinery: CODOG; 2 GE LM 2500 gas turbines; 60,000 hp (44.76 MW) sustained; 2 MTU 20V 956 TB82 diesels, 10,420 hp(m) (7.66 MW) sustained; 2 shafts; cp props
Speed, knots: 31 gas; 20 diesel
Range, n miles: 4,100 at 16 kt
Complement: 199 (27 officers) plus 16 flag staff

HYDRA

(Scale 1 : 1,200), Ian Sturton / 0052/76

Missiles: SSM: 8 McDonnell Douglas Harpoon Block 1C; 2 quad launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach, warhead 227 kg.
SAM: Raytheon NATO Sea Sparrow RIM-7P (F 452, 453, 454) Mk 48 Mod 2 vertical launcher; 16 missiles; semi-active radar homing to 16 km (8.5 n miles) at 2.6 Mach; warhead 38 kg. Raytheon ESSM RIM-162 (F 455); Mk 38 Mod 5 launcher; 16 missiles; semi-active radar homing to 18.5 km (10 n miles) at 3.6 Mach, warhead 38 kg.
Guns: 1 FMC 5 in (127 mm)/54 Mk 45 Mod 2A; 20 rds/min to 24 km (13 n miles) anti-surface; 14 km (7.7 n miles) anti-aircraft, weight of shell 32 kg.
 2 GD/GE Vulcan Phalanx 20 mm Mk 15 Mod 12; 6 barrels per mounting, 3,000 rds/m combined to 1.5 km
Torpedoes: 6–324 mm Mk 32 Mod 5 (2 triple) tubes; Honeywell Mk 46 Mod 5, anti-submarine, active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.
Countermeasures: Decoys: 4 Mk 38 Mod 2 SRBOC chaff launchers; SLQ-25 Nixie; torpedo decoy
ESM: Argo AR 700; Telegon 10; intercept
ECM: Argo APECS II; jammer.
Combat data systems: Signaal STACOS Mod 2; Links 11 and 14.
Weapons control: 2 Signaal Mk 73 Mod 1 (for SAM) Vesta Helo transponder with datalink for OTH. SAR-8 IR search. SWG 1 A(V) Harpoon LCS
Radars: Air search: Signaal MW08; 3D, F/G band. Air/surface search: Signaal/Magnavox, DA08; G-band. Navigation: Racal Decca 2690 BT; ARPA, I-band
Fire Control: 2 Signaal STIR; I/J/K-band.
IFF: Mk XII Mod 4.
Sonars: Raytheon SQS-56/DE 1169; hull-mounted and VDS

PSARA

10/2008*, M Declerck / 1335/01

Helicopters: 1 Sikorsky S-70B-6 Aegean Hawk

Programmes: Decision to buy four Meko 200 HN announced on 18 April 1988. The first ship ordered 10 February 1989 built by Blohm + Voss, Hamburg and the remainder ordered 10 May 1989 at Hellenic Shipyards, Skaramanga. Programme was delayed by financial problems at Hellenic Shipyards in 1992 and some of the prefabrication of *Spetsai* was done in Hamburg.
Modernisation: A mid-life upgrade programme is planned 2010–14. Enhancements are to include upgrades and

replacement of sensors and trackers in addition to platform improvements. As a separate programme Mk 48 launcher systems are being upgraded to Mod 5 to accommodate ESSM. This programme is to be completed by late 2009.

Structure: The design follows the Portuguese Vasco da Gama class. All steel fin stabilisers

Operational: Aegean Hawk carried from 1995. *Hydra* and *Salamis* are part of the 1st Frigate Squadron and *Spetsai* and *Psara* part of the 2nd Frigate Squadron.

Displacement, tons: 3,050 standard; 3,630 full load
Dimensions, feet (metres): 428 × 47.9 × 20.3 (screws)
(130.5 × 14.6 × 6.2)

Main machinery: COGOG; 2 RR Olympus TM3B gas turbines; 50,880 hp (38.7 MW) sustained; 2 RR Tyne RM1C gas turbines, 9,900 hp (7.4 MW) sustained, 2 shafts; LIPS up props

Speed, knots: 30
Range, n miles: 4,700 at 16 kt
Complement: 172 (26 officers)

Missiles: SSM: 8 McDonnell Douglas Harpoon (2 quad) launchers; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

SAM: Raytheon NATO Sea Sparrow RIM-7P; Mk 29 octuple launcher; 8 missiles; semi-active radar homing to 16 km (8.5 n miles) at 2.5 Mach; warhead 38 kg. Portable Redeye; shoulder-launched, short range.

Guns: 1 (F 459-466) or 2 (F 450, 451) OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg
1 (F 459, 460, 461, 462) or 2 (F 450, 451) GE/GD Vulcan Phalanx 20 mm Mk 15 6-barrelled; 3,000 rds/min combined to 15 km.

Torpedoes: 4-324 mm Mk 32 (2 twin) tubes; 16 Honeywell Mk 46 Mod 5; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg. Can be fitted.

Countermeasures: Decoys: 2 Loral Hycoor Mk 36 SRBOC chaff launchers (Sippican ALEX in F 459, F 461, F 462)

ESM: Eletttronika Sphinx and MEL Scimitar; intercept. EDO CS-3701 (F 459, F 461, F 462), intercept.

ECM ELT 715; jammer.

Combat data systems: Signaal SEWACO II action data automation; Thales Tactics (F 459, F 461, F 462), Links 10, 11 and 14, SHF Satcom.

Electro-optic systems: Thales Mirador Trainable Electrical-Optical Observation System (TEOOS) (F 459, F 461, F 462)

Radars: Air search: Signaal LW08; D-band; range 264 km (145 n miles) for 2 m² target.

Surface search: Signaal ZW06; Thales Scout Mk 2 (F 459, F 461, F 462); I-band

Fire control: Signaal WM25; I/J-band; range 46 km (25 n miles).

Signaal STIR; V/J/K-band; range 39 km (21 n miles) for 1 m² target.

Sonars: Canadian Westinghouse SQS-505, hull-mounted, active search and attack; 7 kHz

Helicopters: 2 AB 212ASW

Programmes. A contract was signed with the Netherlands on 15 September 1980 for the purchase of *Elli*, a Kortenaer class, building for the Netherlands' Navy. An option for a second ship *Limnos* was exercised on 7 June 1981. On 9 November 1992, agreement was reached to transfer further ships of the class from the Netherlands Navy: *Aegeon* recommissioned on 14 May 1993. *Adrias* on 30 March 1994, *Navarinon* on 1 March 1995 and *Kountouriotis* on 15 December 1997. The first four ships are known as Batch I and the next two as Batch II. Four Batch III ships were later acquired on decommissioning from the Netherlands Navy: *Bouboulina* recommissioned on 14 December 2001, *Kanaris*, on 29 November 2002, *Themistocles* on 24 October 2003 and *Nikiforos Fokas* on 17 December 2003.

Modernisation: Mid-life modernisation programme (MLM) is planned for the six Batch I and II ships to extend life to 2020. The upgrade is being undertaken by Hellenic Shipyards with Thales Nederland acting as main subcontractor. The MLM includes replacement of the combat data system with Tactics, replacement of ZW06 surface search radar with Scout, improvements to the tracking performance of LW08 and WM25/STIR and installation of the Mirador optronic director. Upgrades to the EW capability are to include EDO CS-3701 ESM receiver and upgrade of SRBOC. Upgrade of the Sea Sparrow system

KANARIS

(Scale 1 : 1,200), Ian Sturton / 1044255

ELLI

(Scale 1 : 1,200), Ian Sturton / 0176346

KOUNTURIOTIS

(Scale 1 : 1,200), Ian Sturton / 1335461

ELLI

2/2007, Camil Busquets i Vilanova / 1170148

KOUNTURIOTIS

6/2008, Giorgio Ghigliano / 1335463

to RIM 162 ESSM has been postponed indefinitely. *Kountouriotis*, the first modernised frigate, was handed back to the Hellenic Navy on 12 September 2006 the second, *Adrias*, in February 2007 and the third *Navarinon* in late 2007. *Limnos* is to be completed in 2009 and *Elli* and *Aegeon* in 2010.

Structure: Hanger is 2 m longer than in the original Netherlands-designed ships to accommodate AB 212ASW helicopters.

Operational: Assignments; 1st FS (*Elli*, *Adrias*, *Kountouriotis*, *Bouboulina*, *Themistocles*), 2nd FS (*Limnos*, *Aegeon*, *Navarinon*, *Kanaris*, *Nikiforos Fokas*).

NIKIFOROS FOKAS

8/2007, Michael Nitz / 1170145

SHIPBORNE AIRCRAFT

Notes: There are also two Alouette IIIs used for SAR and training.

Numbers/Type: 11 Sikorsky S-70B-6 Aegean Hawk.
Operational speed: 135 kt (250 km/h).
Service ceiling: 10,000 ft (3,050 m).
Range: 600 n miles (1,110 km).

Role/Weapon systems: Five ordered 17 August 1991. First one delivered 14 October 1994, remainder in July 1995. The option was taken up on three more of which one was delivered in 1997, and two more in 1998. Three further more modern aircraft ordered June 2000, all of which have been delivered (differences are indicated in brackets). All of the original eight aircraft are to be similarly upgraded. Sensors: Telephonics APS 143(V)3 search radar and AAQ-22 (or AAS 44) FLIR, AlliedSignal AQS18(V)3 (or Ocean Systems HELRAS) dipping sonar, MAD, Litton ALR 606(V)2 (or LR 100) ESM, Litton ASN 150(V) tactical data system with CD22 or Link 11. Weapons: ASV; Kongsberg Penguin Mk 2 Mod 7, two AS 12 (or four AGM-114K Hellfire). ASW; two (or three) Mk 46 torpedoes.

AEGEAN HAWK

10/2001, Diego Quevedo / 0126292

Numbers/Type: 8 Agusta AB 212ASW
Operational speed: 106 kt (196 km/h).
Service ceiling: 14,200 ft (4,330 m).
Range: 230 n miles (425 km).

Role/Weapon systems: Shipborne ASW and surface search role from escorts. Sensors: Selenia APS-705 radar, AlliedSignal AQS-18 dipping sonar (ASW version). Weapons: ASV; two AS 12. ASW: two Mk 46 or two A244/S homing torpedoes.

AB 212ASW

6/2003, Adolfo Ortigueira GH / 0568865

LAND-BASED MARITIME AIRCRAFT

Notes: (1) A squadron of Air Force Mirage 2000 EG fighters is assigned to the naval strike role using Exocet AM 39 ASMs.
 (2) Replacement of the six P-3B Orions is under consideration. Options include the Embraer P-99, ATR 72/500, EADS CASA CN-235 and Beriev Be-200.

Numbers/Type: 6 Lockheed P-3B Orion.
Operational speed: 410 kt (760 km/h).
Service ceiling: 28,300 ft (8,625 m).
Range: 4,000 n miles (7,410 km).

Role/Weapon systems: Four P-3A transferred from the USN in 1992-93 as part of the Defence Co-operation. Four P-3B acquired in 1996 plus two more P-3A. Two more P-3B in 1997. The six P-3B are operational; two P-3A are used for ground training only and the remainder for spares. Sensors: APS 80 radar; sonobuoys; ESM. Weapons: ASW; Mk 46 torpedoes, depth bombs and mines.

ORION

6/1997, Hellenic Navy / 0012458

PATROL FORCES

Notes: Eight coastal patrol craft ordered on 24 September 2002 from Motomarine Shipyards. The first was planned to enter service in 2003. Eight further craft ordered by the Hellenic Coast Guard and delivered in 2004.

3 + 4 ROUSSEN (SUPERVITA) CLASS
(FAST ATTACK CRAFT—MISSILE) (PGG)

Name	No	Builders	Commissioned
YPOPLOIARCHOS ROUSSEN	P 67	Elefsis Shipyard	20 Dec 2005

Radars: Air/surface search: Thales MW-08 ●; G-band.
 Surface search: Thales Scout Mk 2 LPI; I-band.
Navigation: Litton Marine Bridgemaster, I band
Fire control: Thales Sting ●; I/J-band.
 IFF Mk XII.

Programmes: Design selected 21 September 1999 based on Vosper Thornycroft Vita corvettes in service in Qatar. Contract signed 7 January 2000 for the building of first three vessels which started in March 2000. *Rousсен* launched on 13 November 2002, *Daniolos* on 8 July 2003, *Kristallidis* on 5 April 2004. A contract for the construction of two further ships was signed on 23 August 2003. *Grigoropoulos* was launched on 20 December 2005 and *Ritsos* on 9 October 2006. The contract for the sixth and seventh vessels was signed on 25 September 2008

Structure: A rigid inflatable boat is carried amidships.

Displacement, tons: 359 standard; 425 full load (P 20-23)
329 standard; 429 full load (P 24-29)
Dimensions, feet (metres): 184 x 26.2 x 7 (56.2 x 8 x 2.1)
Main machinery: 4 MTU 20V 538TB92 diesels, 17,060 hp(m) (12.54 MW) sustained; 4 shafts (P 20-23)
4 MTU 20V 538TB91 diesels; 15,360 hp(m) (11.29 MW) sustained; 4 shafts (P 24-29)
Speed, knots: 36 (P 20-23); 32.5 (P 24-29)
Range, n miles: 700 at 32 kt; 2,700 at 15 kt
Complement: 43 (6 officers)

Missiles: SSM: 4 Aerospatiale MM 38 Exocet (P 20-P 23); inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 165 kg
6 Kongsberg Penguin Mk 2 Mod 3 (P 24-P 29); inertial/IR homing to 27 km (15 n miles) at 0.8 Mach; warhead 120 kg
Guns: 2 OTO Melara 3 in (76 mm)/62 compact, 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg
4 Emerson Electric 30 mm (2 twin); multipurpose; 1,200 rds/min combined to 6 km (3.2 n miles); weight of shell 0.35 kg.
Torpedoes: 2—21 in (533 mm) aft tubes. AEG SST-4; anti-surface; wire-guided; active homing to 12 km (6.5 n miles) at 35 kt; passive homing to 28 km (15 n miles) at 23 kt; warhead 250 kg.
Countermeasures: Decoys: Wegmann chaff launchers.
ESM: Thomson CSF DR 2000S (P 20-23); intercept.
Combat data systems: Taciticos (P 20-23); Link 11 (P 20-23).
Weapons control: 2 CSEE Panda optical directors for 30 mm guns. Mirador optronic director (P 20-P 23) NFT PFCS-2 (P 24-P 29)
Radars: Surface search: Thomson-CSF Triton (P 24-29); Thales Variant (P 20-23); G-band Thales Scout (P 20 23); I-band.
Navigation: Decca 1226C (P 24-29); I-band.
Sperry Bridgemaster (P 20-23); E/I/I-band.
Fire control: Thomson-CSF Castor II; I/J-band
Thomson-CSF Pollux; I/J-band

Programmes: First four ordered in September 1974. Second group of six ordered 1978.
Modernisation: P 24-29 upgraded to fire Penguin Mk 2 Mod 3 missiles. A contract for the upgrade of P 20-23 was signed on 31 October 2003. Modernisation began in 2005 and is to be completed in 2009. The programme includes installation of the Taciticos Combat Management System, the MIRADOR optronic director, SRBOC launchers, Thales DR 3000 ESM, Link 11 and Variant, Scout Mk 2 and Bridgemaster radars. P 20 was completed in April 2008 and P 22 in September 2008. P 21 and P 23 are to be completed in February 2009 and August 2009 respectively.
Structure: First four fitted with SSM Exocet; remainder have Penguin.
Operational: P 25 sunk after collision with a ferry in November 1996.

SIMEOFOROS SIMITZOPOULOS (with Penguin) 9/2000, A Sharma / 0126333

6 VOTSIS (LA COMBATTANTE IIA) (TYPE 148) CLASS
(FAST ATTACK CRAFT—MISSILE) (PGFG)

Name	No	Builders	Commissioned
YPOLOIARCHOS VOTSIS (ex-Itlis)	P 72 (ex-P 51)	CMN, Cherbourg	8 Jan 1973
ANTHYPOLOIARCHOS PEZOPOULOS (ex-Storch)	P 73 (ex-P 30)	CMN, Cherbourg	17 July 1974
PLOTARCHIS VLAHAVAS (ex-Marder)	P 74	CMN, Cherbourg	14 June 1973
PLOTARCHIS MARIDAKIS (ex-Häher)	P 75	CMN, Cherbourg	12 June 1974
YPOLOIARCHOS TOURNAS (ex-Leopard)	P 76	CMN, Cherbourg	21 Aug 1973
PLOTARCHIS SAKIPIS (ex-Jaguar)	P 77	CMN, Cherbourg	13 Nov 1973

Displacement, tons: 265 full load
Dimensions, feet (metres): 154.2 x 23 x 8.9 (47 x 7 x 2.7)
Main machinery: 4 MTU MD 16V 538TB90 diesels; 12,000 hp(m) (8.82 MW) sustained; 4 shafts
Speed, knots: 36
Range, n miles: 570 at 30 kt; 1,600 at 15 kt
Complement: 41 (6 officers)

Missiles: SSM: 4 Aerospatiale MM 38 Exocet (2 twin launchers (P 72-73 and P 76-77); inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 166 kg, sea-skimmer
4 McDonnell Douglas Harpoon (2 twin launchers (P 74-75); active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg
Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg
1 Bofors 40 mm/70, 330 rds/min to 12 km (6.5 n miles) anti-surface; 4 km (2.2 n miles) anti-aircraft; weight of shell 0.96 kg; fitted with GRP dome (1984).
Mines: Laying capability.
Countermeasures: Decoys; Wolke chaff launcher.
ESM Thomson-CSF DR 2000S; intercept
Combat data systems: PALIS and Link 11.
Weapons control: CSEE Panda optical director. Thomson-CSF Vega PCET system, controlling missiles and guns
Radars: Air/surface search: Thomson-CSF Triton; G-band; range 33 km (18 n miles) for 2 m² target.
Navigation: SMA 3 RM 20; I-band.
Fire control: Thomson-CSF Castor; I/J-band.

Programmes: First pair transferred from Germany in September 1993 and recommissioned 17 February 1994. Two more transferred 16 March 1995 and recommissioned 30 June 1995. Third pair transferred from Germany and recommissioned on 27 October 2000.
Modernisation: Mid-life updates in 1980s. P 74-75 fitted with Harpoon. New ESM fitted after transfer P 76-77 modernised at Lamda Shipyards in 2003-2004.
Structure: Steel hulls. Similar to Combattante II class. Spray rails have been fitted to improve hydrodynamic performance.

YPOLOIARCHOS TOURNAS 11/2004, M Declerck / 1133495

4 NASTY CLASS (PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
ANDROMEDA	P 196	Mandal, Norway	Nov 1966
KYKNOS	P 198	Mandal, Norway	Feb 1967
PIGASOS	P 199	Mandal, Norway	Apr 1967
TOXOTIS	P 228	Mandal, Norway	May 1967

Displacement, tons: 72 full load
Dimensions, feet (metres): 80.4 x 24.6 x 6.9 (24.5 x 7.5 x 2.1)
Main machinery: 2 MTU 12V 331 TC92 diesels; 2,660 hp(m) (1.96 MW) sustained; 2 shafts
Speed, knots: 25
Range, n miles: 676 at 17 kt
Complement: 20 (2 officers)
Guns: 1 Bofors 40 mm/70. 1 Rheinmetall 20 mm.
Radars: Surface search: Decca 1226; I-band.

Comment: Six of the class acquired from Norway in 1967 and paid off into reserve in the early 1980s. Four re-engined and brought back into service in 1988. These craft continue to be active although top speed has been markedly reduced. Torpedo tubes have been removed.

PIGASOS 7/2004, C D Ynyll / 0587756

2 ARMATOLOS (OSPREY 55) CLASS (LARGE PATROL CRAFT) (PG)

Name	No	Builders	Commissioned
ARMATOLOS	P 18	Hellenic Shipyards, Skaramanga	27 Mar 1990
NAVMACHOS	P 19	Hellenic Shipyards, Skaramanga	15 July 1990

Displacement, tons: 555 full load
Dimensions, feet (metres): 179.8; 166.7 (wl) × 34.4 × 8.5 (54.8; 50.8 × 10.5 × 2.6)
Main machinery: 2 MTU 16V 1163TB63 diesels; 10,000 hp(m) (7.3 MW) sustained; 2 shafts, Kamewa cp props
Speed, knots: 25
Range, n miles: 500 at 25 kt, 2,800 at 12 kt
Complement: 48 (7 officers)
Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.6 n miles) anti-aircraft; weight of shell 6 kg
 1 Bofors 40 mm/70.
Mines: Rails
Countermeasures: Decoys: 2 chaff launchers.
ESM Thomson-CSF DR 2000S, intercept
Weapons control: Selenia Eltag NA 21.
Radars: Surface search: Thomson-CSF Triton; G-band.
Fire control: Selenia RTNX; I/J-band.

Comment: Built in co-operation with Danyard A/S. Ordered in March 1988. First one laid down 8 May 1989 and launched 19 December 1989. Second laid down 9 November 1989 and launched 16 May 1990. Armament is of modular design and therefore can be changed. 76 mm guns replaced the forward Bofors 40 mm in 1995, after being taken from decommissioned Gearing-class destroyers. Options on more of the class were shelved in favour of the Hellenic 56 design.

NAVMACHOS

7/2002, Pital / 05258/1

2 KASOS (HELLENIC 56) CLASS (BATCH 1) (LARGE PATROL CRAFT) (PG)

Name	No	Builders	Commissioned
KASOS (ex-Pyrpolitis)	P 57	Hellenic Shipyard, Skaramanga	4 May 1993
POLEMISTIS	P 61	Hellenic Shipyard, Skaramanga	16 June 1994

Displacement, tons: 555 full load
Dimensions, feet (metres): 185.4 × 32.8 × 8.9 (56.5 × 10 × 2.7)
Main machinery: 2 Wärtsilä Nohab 16V25 diesels; 9,200 hp(m) (6.76 MW) sustained; 2 shafts
Speed, knots: 24
Range, n miles: 2,470 at 15 kt; 900 at 24 kt
Complement: 48 (7 officers)
Guns: 1 OTO Melara 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.6 n miles) anti-aircraft; weight of shell 6 kg.
 1 Bofors 40 mm/70. 2 Rheinmetall 20 mm
Mines: 2 rails
Countermeasures: ESM Thomson-CSF DR 2000S; intercept.
Weapons control: Selenia Eltag NA 21.
Radars: Surface search: Thomson-CSF Triton; I-band

Comment: First pair ordered 20 February 1990. This is a design by the Hellenic Navy which uses the modular concept so that weapons and sensors can be changed as required. Appearance is similar to Osprey 55 class. First of class *Pyrpolitis* (renamed *Kasos* in 2006) launched 16 September 1992, *Polemistis* 21 June 1993. Completion delayed by the shipyard's financial problems. Alternative guns and Harpoon SSM can be fitted. 25 fully equipped troops can be carried. Engines are resiliently mounted.

POLEMISTIS

5/2004, Martin Mokrus / 05117/5

POLEMISTIS

8/2000, van Ginderen Collection / 0104560

4 MACHITIS CLASS (LARGE PATROL CRAFT) (PG)

Name	No	Builders	Commissioned
MACHITIS	P 266	Hellenic Shipyards, Skaramanga	29 Oct 2003
NIKIFOROS	P 267	Hellenic Shipyards, Skaramanga	30 Mar 2004
AITTITOS	P 268	Hellenic Shipyards, Skaramanga	5 Aug 2004
KRATEOS	P 269	Hellenic Shipyards, Skaramanga	20 Oct 2005

Displacement, tons: 575 full load
Dimensions, feet (metres): 185.4 × 32.8 × 8.9 (56.5 × 10 × 2.7)
Main machinery: 2 Wärtsilä Nohab 16V25 diesels; 9,200 hp(m) (6.76 MW) sustained; 2 shafts
Speed, knots: 24. **Range, n miles:** 2,000 at 15 kt; 900 at 24 kt
Complement: 49 (8 officers)
Guns: 1 Otobreda 3 in (76 mm)/62 compact; 85 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.6 n miles) anti-aircraft; weight of shell 6 kg.
 1 Otobreda 40 mm/70-520R. 2 Rheinmetall 20 mm
Mines: 2 rails.
Countermeasures: ESM Thomson-CSF DR 3000
Combat data systems: TACTICOS with Link 11.
Weapons control: Thalios Lirod Mk 2.
Radars: Air/surface search: Signal Variant, E/F-band.
 Surface search: Thalios Scout Mk 2, I-band
Fire control: Thalios Lirod Mk 2; K-band
Navigation: Bridgmaster I-band

Comment: Contract to build four improved *Pyrpolitis* class given to Hellenic Shipyard on 21 December 1999. Building started in February 2000. *Machitis* launched in June 2002, *Nikiforos* on 13 December 2002, *Aittitos* on 26 February 2003 and *Krateos* on 30 October 2003. An option for a fifth vessel is unlikely to be exercised.

MACHITIS

12/2004, Marco Ghiglino / 1170145

2 TOLMI (ASHEVILLE) CLASS (LARGE PATROL CRAFT) (PG)

Name	No	Builders	Commissioned
TOLMI (ex-Green Bay)	P 229	Peterson, Wisconsin	5 Dec 1969
ORMI (ex-Beacon)	P 230	Peterson, Wisconsin	21 Nov 1969

Displacement, tons: 225 standard; 245 full load
Dimensions, feet (metres): 164.5 × 23.8 × 9.5 (50.7 × 7.3 × 2.9)
Main machinery: 2 MTU 12V 596TE94 diesels; 4,500 hp (3.3 MW); 2 shafts
Speed, knots: 20. **Range, n miles:** 1,700 at 16 kt
Complement: 32 (6 officers)
Guns: 2 Bofors 40 mm/70 Mk 10. 4–12.7 mm (2 twin) MGs.
Weapons control: Mk 63 GFCS
Radars: Surface search: Sperry SPS-53, I/J-band
Fire control: Western Electric SPG-50, I/J-band

Comment: Transferred from the USA in mid-1990 after a refit and recommissioned 18 June 1991. Both were in reserve from April 1977 having originally been built for the Cuban crisis. Similar craft in Turkish, Colombian and South Korean navies. Original gas-turbine propulsion engine was removed prior to transfer and both craft reported re-engined in 2004.

TOLMI

8/2006, Marco Ghiglino / 1184516

2 ANTONIOU CLASS (PB)

Name	No	Builders	Commissioned
DIOPOS ANTONIOU	P 286	Ch N de l'Esteral	4 Dec 1975
KELEFSTIS STAMOU	P 287	Ch N de l'Esteral	28 July 1975

Displacement, tons: 115 full load
Dimensions, feet (metres): 105 × 19 × 5.3 (32 × 5.8 × 1.6)
Main machinery: 2 MTU 12V 331 TC81 diesels; 2,610 hp(m) (1.92 MW) sustained; 2 shafts
Speed, knots: 30. **Range, n miles:** 1,500 at 15 kt
Complement: 20 (2 officers)
Guns: 1 Rheinmetall 20 mm, 1–12.7 mm MG
Radars: Surface search: Decca 1226, I-band

Comment: Originally ordered for Cyprus, later transferred to Greece. Wooden hulls. Fast RIB carried on the stern. Surface-to-surface missiles no longer carried

DIOPOS ANTONIOU

7/2007, A A de Kruijff / 1170144

11 SPECIAL WARFARE CRAFT (PBF)

SAP 1-11

Displacement, tons: 8.6 full load
 Dimensions, feet (metres): 44.3 x 11.6 x 2.3 (13.2 x 3.55 x 0.7)
 Main machinery: 2 Caterpillar; 840 hp (625 kW); surface-piercing propeller
 Speed, knots: 60+
 Complement: 4
 Guns: 1—12.7 mm MG. 2—7.62 mm MGs.

Comment: Details are for SAP 7-9, donated by Angelopoulos family to Hellenic Navy for use by special forces. RIB42SC rigid inflatable monohull with removable synthetic armour panels. Built by Italian shipyard Fabio Buzzì.

SPECIAL WARFARE CRAFT 6/2006 / 1164514

3 NIKI (THETIS) (TYPE 420) CLASS (PATROL SHIPS) (PG)

Name	No	Launched	Commissioned
NIKI (ex-Thetis)	P 62 (ex-P 6052)	1 July 1961	6 Sep 1991
DOXA (ex-Najade)	P 63 (ex-P 6054)	12 May 1962	6 Sep 1991
ELEFThERIA (ex-Triton)	P 64 (ex-P 6055)	10 Nov 1962	7 Sep 1992

Displacement, tons: 575 standard; 732 full load
 Dimensions, feet (metres): 229.7 x 26.9 x 8.6 (70 x 8.2 x 2.7)
 Main machinery: 2 MAN V84V diesels; 6,800 hp(m) (5 MW); 2 shafts
 Speed, knots: 19.5
 Range, n miles: 2,760 at 15 kt
 Complement: 65 (7 officers)

Guns: 4 Breda 40 mm/70 (2 twin), 300 rds/min to 12.5 km (6.7 n miles); weight of shell 0.96 kg. 2 Rheinmetall 20 mm.
 Torpedoes: 6—324 mm Mk 32 (2 triple) tubes; 6 Honeywell Mk 46 Mod 5; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.
 Depth charges: 2 rails
 Countermeasures: ESM: Thomson-CSF DR 2000S; intercept.
 Weapons control: Signaal Mk 9TFCS
 Radars: Surface search: Thomson-CSF TRS 3001 E/F-band
 Navigation: Decca BM-E; I-band
 Sonars: Atlas Elektronik ELAC 1 BV; hull-mounted; active search and attack; high frequency.

Programmes: All built by Rolandwerft, Bremen and transferred from Germany.
 Modernisation: The A/S mortars have been replaced by a second 40 mm gun and single torpedo tubes by triple mountings (to be confirmed). Upgrades started in 2000 and completed in 2002 included new diesel generators, two Rheinmetall 20 mm guns to replace the MGs and a new navigation suite.
 Structure: Doxa has a deckhouse before bridge for sick bay

ELEFThERIA 7/2006, Marco Ghiglino / 1164518

AMPHIBIOUS FORCES

Notes: (1) There is a number of paid off LSTs and LSMs in unmaintained reserve at Salamis.
 (2) Procurement of a landing platform dock is under consideration.

59 LANDING CRAFT

Displacement, tons: 56 full load
 Dimensions, feet (metres): 56 x 14.4 x 3.9 (17 x 4.4 x 1.2)
 Main machinery: 2 Gray Marine 64 HN9 diesels; 330 hp (264 kW); 2 shafts
 Speed, knots: 10
 Range, n miles: 130 at 10 kt
 Military lift: 30 tons

Comment: Details given are for the 11 LCMs transferred from the USA in 1956-58. Twenty-nine LCVPs were also transferred from the USA 1956-71 and the remainder (12 LCPs and 7 LCAs) were built in Greece from 1977.

5 CHIOS (JASON) CLASS (LSTH)

Name	No	Builders	Launched	Commissioned
CHIOS	L 173	Eleusis Shipyard	16 Dec 1988	30 May 1996
SAMOS	L 174	Eleusis Shipyard	6 Apr 1989	20 May 1994
LESBOS	L 176	Eleusis Shipyard	5 July 1990	25 Feb 1999
KARIA	L 175	Eleusis Shipyard	22 Oct 1988	6 Oct 1999
RODOS	L 177	Eleusis Shipyard	6 Oct 1989	30 May 2000

Displacement, tons: 4,400 full load
 Dimensions, feet (metres): 380.5 x 50.2 x 11.3 (116 x 15.3 x 3.4)
 Main machinery: 2 Wärtsilä Nohab 16V25 diesels, 9,200 hp(m) (6.76 MW) sustained, 2 shafts
 Speed, knots: 16
 Complement: 112 (12 officers)
 Military lift: 300 troops plus vehicles; 4 LCVPs
 Guns: 1 OTO Melara 76 mm/62 Mod 9 compact; 100 rds/min to 16 km (8.6 n miles) anti-surface; 12 km (6.5 n miles) anti-aircraft; weight of shell 6 kg. 2 Breda 40 mm/70, 300 rds/min to 12 km (6.5 n miles); weight of shell 0.96 kg. 4 Rheinmetall 20 mm (2 twin).
 Weapons control: 1 CSEE Panda optical director Thomson-CSF Canopus GFCS.
 Radars: Thomson-CSF Triton; G-band.
 Fire control: Thomson-CSF Pollux; I/J-band.
 Navigation: Kelvin Hughes Type 1007; I-band.
 Helicopters: Platform for one medium.

Comment: Contract for construction of five LSTs by Eleusis Shipyard signed 15 May 1986. Bow and stern ramps, drive through design. First laid down 18 April 1987, second in September 1987, third in May 1988, fourth April 1989 and fifth November 1989. Completion of all five and in particular the last three, severely delayed by shipyard financial problems which were later overcome, following privatisation. Combat data system is a refurbished German system.

SAMOS 9/2003, Schaeffer/Marsan / 0568865

LESBOS 11/2005, M Declerck / 1164513

4 KEFALLINIA (ZUBR) CLASS (PROJECT 1232) (HOVERCRAFT) (LCUJ)

Name	No	Builders	Commissioned
KEFALLINIA	L 180 (ex-717)	Almaz, St Petersburg	22 Jan 2001
ITHAKI	L 181 (ex-U 421)	Morye Shipyard, Ukraine	2 Mar 2001
ZAKYNTHOS	L 183	Almaz, St Petersburg	5 Oct 2001
KERKIRA	L 182	Almaz, St Petersburg	4 Jan 2005

Displacement, tons: 550 full load
 Dimensions, feet (metres): 189 x 84 (57.6 x 25.6)
 Main machinery: 5 Type DP-71L gas-turbines; 2 for lift, 20,000 hp(m) (14.7 MW) nominal; 3 for drive, 30,000 hp(m) (22.1 MW) nominal
 Speed, knots: 60
 Range, n miles: 300 at 55 kt
 Complement: 40 (5 officers)
 Military lift: 3 MBT or 10 APC plus 230 (troops (total 130 tons)
 Guns: 2—30 mm/65 AK 630; 6 barrels per mounting
 2 retractable 122 mm rocket launchers.
 Mines: 2 rails can be carried for 80
 Countermeasures: ESM, intercept.
 Weapons control: Optronic director.
 Radars: Air/surface search: Cross Dome; I-band.
 Fire control: BassTilt; H/I-band.

Comment: Two ordered from Russia and two from Ukraine on 24 January 2000. First delivered late December 2000, the remainder in 2001. L 180 was second-hand, L 181 was completion of a half-built vessel and L 183 was new build. The second Ukrainian ship was not accepted into service and a replacement (L 182) was ordered from Russia on 30 September 2002 and launched on 24 June 2004. There are no plans for further craft.

KEFALLINIA 1/2001, T L Valmes / 0034713

6 TYPE 520 (LCU)

NAXOS (ex-Renke) L 178 SERIFOS (ex-Rochen) L 195 IRAKLEIA (ex-Farella) L 169
PAROS (ex-Salm) L 179 IOS (ex-Barbel) L 167 FOLEGANDROS (ex-Delphin) L 170

Displacement, tons: 430 full load
Dimensions, feet (metres): 131.2 x 28.9 x 7.2 (40 x 8.8 x 2.2)
Main machinery: 2 MWM 12-cyl diesels, 1,020 hp(m) (750 kW); 2 shafts
Speed, knots: 11 Range, n miles: 1,200 at 11 kt
Complement: 17
Military lift: 150 tons
Guns: 2 Rheinmetall 20 mm (not all fitted).
Radars: Navigation: Kelvin Hughes; I-band.

Comment: First two transferred from Germany 16 November 1989, remainder on 31 January 1992. Built by HDW, Hamburg in 1966. Bow and stern ramps similar to US Type. One other (ex-Muranel) used for spares. Both L 178 and L 195 modified to act as auxiliary transport.

PAROS

7/2007, Bob Fildes / 1170143

FOLEGANDROS

11/2004, M Declerck / 1133499

MINE WARFARE FORCES**6 ALKYON (MSC 294) CLASS
(MINESWEEPERS—COASTAL) (MSC)**

Name	No	Builders	Commissioned
ALKYON (ex-MSK 319)	M 211	Peterson Builders	3 Dec 1968
AVRA (ex-MSK 318)	M 214	Peterson Builders	3 Oct 1968
AIDON (ex-MSK 314)	M 240	Peterson Builders	22 June 1967
KICHLI (ex-MSK 308)	M 241	Peterson Builders	14 July 1964
KISSA (ex-MSK 309)	M 242	Peterson Builders	1 Sep 1964
PLEIAS (ex-MSK 310)	M 248	Peterson Builders	13 Oct 1964

Displacement, tons: 320 standard; 370 full load
Dimensions, feet (metres): 144 x 28 x 8.2 (43.3 x 8.5 x 2.5)
Main machinery: 2 GM-268A diesels; 1,780 hp (1.3 MW); 2 shafts
Speed, knots: 13
Range, n miles: 2,500 at 10 kt
Complement: 37 (6 officers)
Guns: 2 Oerlikon 20 mm (twin).
Radars: Navigation: Decca; I-band.
Sonars: UQS-1D; active, high frequency.

Comment: Built in the USA for Greece, wooden hulls. Modernisation programme from 1990 to 1995 with replacement main engines and navigation radar. Two decommissioned in 2005 and 2008 respectively.

AVRA

7/2006, Marco Ghigliino / 1184512

**2 + (3) EVNIKI (OSPREY) CLASS
(MINEHUNTERS—COASTAL) (MHC)**

Name	No	Builders	Launched	Commissioned
EVNIKI (ex-Pelican)	M 61 (ex-MHC 53)	Avondale Industries	27 Feb 1993	18 Nov 1995
CALYPSO (ex-Heron)	M 64 (ex MHC 52)	Intermarine, Savannah	21 Mar 1992	6 Aug 1994

Displacement, tons: 930 full load
Dimensions, feet (metres): 187.8 x 35.9 x 9.5 (57.2 x 11 x 2.9)
Main machinery: 2 Isotta Fraschini ID 36 SS BV AM diesels; 1,600 hp(m) (1.18 MW) sustained; 2 Voith Schneider props; 3 Isotta Fraschini ID 36 diesel generators, 984 kW
Speed, knots: 10. Range, n miles: 1,500 at 10 kt
Complement: 49 (9 officers)

Guns: 2—12.7 mm MGs
Countermeasures: MCM: Alliant SLO-48 mine neutralisation system ROV (with 1,070 m cable). Degaussing DGM-4.
Combat data systems: Unisys SYQ 13 and SYQ 109; integrated combat and machinery control system. USQ-119E(V), UHF Dama, and OTC-XS provide GCCS connectivity
Radars: Surface search Raytheon SPS-64(V)9, I-band
Navigation: R41XX; I-band.
Sonars: Raytheon/Thomson Sintra SQQ-32(V)3; VDS; active minehunting, high frequency.

Programmes: Original design contract for Lerici class minehunters was awarded in August 1986 to Intermarine USA which built eight of the 12 ships of the class for the US Navy. Ex-Heron transferred free of charge and ex-Pelican acquired through FMS funding. Both recommissioned on 16 March 2007. The procurement of three further ships is under consideration.

Structure: Construction is of monocoque GRP throughout hull, with frames eliminated. Main machinery is mounted on GRP cradles and provided with acoustic enclosures. SQQ-32 is deployed from a central well forward. Fitted with Voith cycloidal propellers which eliminate need for forward thrusters during station keeping.

OSPREY CLASS (US colours)

4/2004, US Navy / 1043630

2 EVROPI (HUNT) CLASS (MHSC)

Name	No	Builders	Commissioned
EVROPI (ex-Bicester)	M 62 (ex-M 36)	Vosper Thornycroft	20 Mar 1986
KALLISTO (ex-Berkeley)	M 63 (ex-M 40)	Vosper Thornycroft	14 Jan 1988

Displacement, tons: 750 full load
Dimensions, feet (metres): 197 x 34.1 x 10.5 (60 x 10.4 x 3.2)
Main machinery: 2 MTU diesels; 1,900 hp (1.42 MW); 1 Deltic Type 9-55B diesel for pulse generator and auxiliary drive; 780 hp (582 kW); 2 shafts; bow thruster
Speed, knots: 15 diesels; 8 hydraulic drive
Range, n miles: 1,500 at 12 kt
Complement: 46 (9 officers)
Guns: 1 DES/MSI DS 30B 30 mm/75; 650 rds/min to 10 km (5.4 n miles) anti-surface; 3 km (11.6 n miles) anti-aircraft; weight of shell 0.36 kg
Countermeasures: MCM: 2 PAP 104 remotely controlled submersibles, MS 14 magnetic loop, Sperry MSSA Mk 1 Towed Acoustic Generator and conventional Mk 8 Oropesa sweeps.
ESM: MEL Matilda UAR 1.
Combat data systems: CAAIS DBA 4 action data automation.
Radars: Navigation: Kelvin Hughes Type 1006; I-band
Sonars: Plessey 193M Mod 1; hull-mounted; minehunting; 100/300 kHz. Mil Cross mine avoidance sonar; hull-mounted; active; high frequency Type 2059 to track PAP 104.

Comment: First one transferred from UK 31 July 2000, second one 28 February 2001. Main machinery replaced by MTU units between May 2004 and January 2005. There are no further plans for upgrades.

EVROPI

2/2007, Adolfo Ortigueira Gil / 1170142

SURVEY AND RESEARCH SHIPS

1 SURVEY SHIP (AGS)

Name	No	Builders	Commissioned
NAFTILOS	A 478	Annastadiades Tsortanides, Perama	3 Apr 1976

Displacement, tons: 1,470 full load
Dimensions, feet (metres): 207 × 36 × 13.8 (63.1 × 11.6 × 4.2)
Main machinery: 2 Burmeister & Wain SS28LM diesels; 2,640 hp(m) (1.94 MW); 2 shafts
Speed, knots: 15
Complement: 43 (6 officers)

Comment: Launched 19 November 1975. Of similar design to the two lighthouse tenders.

NAFTILOS 9/1999, van Ginderen Collection / 0079497

1 RESEARCH SHIP (AGOR)

Name	No	Builders	Commissioned
PYTHEAS	A 474	Annastadiades Tsortanides, Perama	15 Dec 1983

Displacement, tons: 670 standard, 840 full load
Dimensions, feet (metres): 164.7 × 31.5 × 21.6 (50.2 × 9.6 × 6.6)
Main machinery: 2 Detroit 12V-92TA diesels; 1,020 hp (760 kW) sustained; 2 shafts
Speed, knots: 14
Complement: 43 (6 officers)

Comment: *Pythess* ordered in May 1982. Launched 19 September 1983. A similar ship, *Aegeon*, was constructed to Navy specification in 1984 but now belongs to the Maritime Research Institute

PYTHEAS 7/2007, A A de Kruif / 1170141

1 HISTORIC SHIP (YXR)

OLYMPIAS
Dimensions, feet (metres): 121.4 × 17.1 × 4.9 (37 × 5.2 × 1.5)
Main machinery: 170 oars (85 each side in three rows)
Speed, knots: 8
Complement: 180

Comment: Construction started in 1985 and completed in 1987. Made of Oregon pine. Built for historic research and as a reminder of the naval hegemony of ancient Greeks. Part of the Hellenic Navy. Refit in 1992–93.

OLYMPIAS 6/1996, Hellenic Navy / 0079500

1 SURVEY SHIP (AGSC)

Name	No	Builders	Commissioned
STRABON	A 476	Emanuil-Mairis, Perama	27 Feb 1989

Displacement, tons: 252 full load
Dimensions, feet (metres): 107.3 × 20 × 8.2 (32.7 × 6.1 × 2.5)
Main machinery: 1 MAN D2842LE; 571 hp(m) (420 kW) sustained; 1 shaft
Speed, knots: 12.5
Complement: 27 (4 officers)

Comment: Ordered in 1987, launched September 1988. Used as coastal survey vessel.

STRABON 6/2000, Hellenic Navy / 0104567

TRAINING SHIPS

5 SAIL TRAINING SHIPS (AXS)

MAISTROS A 233	ZEFIROS A 238	GREGOS A 373
SOROKOS A 234	OSTRIA A 359	

Displacement, tons: 12 full load (A 233 and 234)
Dimensions, feet (metres): 48.6 × 12.8 × 6.9 (14.8 × 3.9 × 2.1)

Comment: Sail training ships acquired in 1983–84 (A 233–234) and 1989 (A 359). A 359 is slightly smaller at 12.1 × 3.6 m. There are two further craft A 238 and A 373.

AUXILIARIES

Notes: Procurement of a submarine rescue ship is under consideration.

7 FLOATING REPAIR FACILITIES

Comment: There are two floating docks. One is 45 m (1476 ft) in length and has a 6,000 ton lift. Built at Eleusis with Swedish assistance and launched 5 May 1988, delivered 1989. The second is the ex-US AFDM 2 transferred in 1999. This dock was built in 1942 and has a 12,000 ton lift. There are five floating cranes that were all built in Greece

1 PROMETHEUS (ETNA) CLASS (AORH/MCCS)

Name	No	Builders	Commissioned
PROMETHEUS	A 374	Elefsis Shipyard	4 July 2003

Displacement, tons: 13,400 full load
Dimensions, feet (metres): 480.6 × 68.9 × 24.3 (146.5 × 21 × 7.4)
Flight deck, feet (metres): 91.9 × 68.9 (28 × 21)
Main machinery: 2 Sulzer 12 ZAV 40S diesels; 22,400 hp(m) (16.46 MW) sustained; 2 shafts; cp props; bow thruster
Speed, knots: 21
Range, n miles: 7,600 at 18 kt
Complement: 140 (19 officers) plus 119 spare including flag staff

Cargo capacity: 6,360 tons gas oil; 1,200 tons JP6; 2,100 m³ ammunition and stores
Missiles: SAM; 2 Stinger mountings.
Guns: 1 GD/GE Vulcan Phalanx 20 mm; 6 barrels per mounting; 3,000 rds/min combined to 1 km.
 4–20 mm guns.
Countermeasures: SLO-25 Nixie; torpedo decoy.
Radars: Surface search: Raytheon SPS-10D, G-band.
Navigation: GEM LD-1825, I-band.
Helicopters: Aegean Hawk or AB 212

Comment: Ordered in August 1999 from Fincantieri and from Elefsis on 7 January 2000. First steel cut July 2000, launched 18 February 2002. Almost identical to the Italian Etna class. One Phalanx CIWS has been fitted. There is one RAS station on each side and one astern station. Has a secondary role as a mine countermeasures command and support ship.

PROMETHEUS 8/2007, Michael Nitz / 1170140

310 Greece/Auxiliaries

2 AXIOS (LÜNEBURG) (TYPE 701) CLASS (SUPPORT SHIPS) (ARL/AOR/MCCS)

Name	No	Builders	Commissioned	Recommissioned
AXIOS (ex-Coburg)	A 464 (ex-A 1412)	Bremer Vulcan	9 July 1968	30 Sep 1991
ALIAKMON (ex-Saarburg)	A 470 (ex-A 1415)	Blohm + Voss	30 July 1968	19 Oct 1994

Displacement, tons: 3,709 full load
Dimensions, feet (metres): 374.9 × 43.3 × 13.8 (114.3 × 13.2 × 4.2)
Main machinery: 2 MTU MD 18V 538 TB90 diesels; 6,000 hp(m) (4.41 MW) sustained;
 2 shafts; cp props; bow thruster
Speed, knots: 17. **Range, n miles:** 3,200 at 14 kt
Complement: 89 (12 officers)
Cargo capacity: 1,400 tons fuel, 200 tons ammunition; 130 tons water
Guns: 4 Bofors 40 mm/70 (2 twin); 300 rds/min to 12 km (6.5 n miles); weight of shell 0.96 kg.
Radars: Navigation, Decca, I-band.

Comment: Both ships converted to Fleet oilers by Hellenic Shipyards. Contract signed 21 December 1959. *Axios* completed September 2000 and *Aliakmon* in December 2002. Have secondary role as mine countermeasures and support ships.

AXIOS 4/2006, B Prézeln / 1104324

4 OURANOS CLASS (AOTL)

Name	No	Builders	Commissioned
OURANOS	A 416	Kinosoura Shipyard	27 Jan 1977
HYPERION	A 417	Kinosoura Shipyard	27 Apr 1977
ZEUS	A 375 (ex-A 490)	Hellenic Shipyards	21 Feb 1989
ORION	A 376	Hellenic Shipyards	5 May 1989

Displacement, tons: 2,100 full load
Dimensions, feet (metres): 219.8, 198.2 (wl) × 32.8 × 13.8 (67, 60.4 × 10 × 4.2)
Main machinery: 1 MAN-Burmeister & Wain 12V 20/27 diesel; 1,632 hp(m) (1.2 MW) sustained; 1 shaft
Speed, knots: 11
Complement: 33 (5 officers)
Cargo capacity: 1,300 tons oil or petrol
Guns: 2 Rheinmetall 20 mm

Comment: First two are oil tankers. The others were ordered from Hellenic Shipyards, Skaramanga in December 1986 and are used as petrol tankers. There are some minor superstructure differences between the first two and the last two which have a forward crane instead of kingposts.

OURANOS 7/2006, Marco Ghigino / 1164907

HYPERION 9/2001, A Sharma / 0126326

COAST GUARD (LIMENIKON SOMA)**Senior Officers**

Commander-in-Chief:
 Vice Admiral Theodoros Rentzopoulos
Deputy Commander-in-Chief:
 Rear Admiral Athanasios Bouskos
Inspector General:
 Rear Admiral Galanis Panagiotis

Personnel

2009: 4,000 (1,055 officers)

HQ: Piraeus
Main bases: Piraeus, Eieusis, Thessalonika, Volos, Patra, Corfu, Rhodes, Mytilene, Heraklion (Crete), Chios, Kavala, Chalcis, Igoumenitsa, Rafina
Minor bases: Every port and island of Greece

Ships and Craft

In general very similar in appearance to naval ships, being painted grey. Since 1990 pennant numbers have been

painted white and on both sides of the hull they carry a blue and white band with two crossed anchors. From 1993 ships have been given grey hulls and white superstructures.

General

This force consists of about 150 patrol craft and anti-pollution vessels including 24 inflatables for the 48 man Underwater Missions Squad and 12 anti-pollution vessels. Administration in peacetime is by the Ministry of Merchant Marine. In wartime it would be transferred to naval command.

Officers are trained at the Naval Academy and ratings at two special schools

The pennant numbers are all preceded as in the accompanying photographs by Greek 'Lambda Sigma' for Limenikon Soma.

Duties

The policing of all Greek harbours, coasts and territorial waters, navigational safety, SAR operations, anti-pollution

surveillance and operations, supervision of port authorities, merchant navy training, inspection of Greek merchant ships worldwide.

Coast Guard Air Service

In October 1981 the Coast Guard acquired two Casna Cutlass 172 RG aircraft and in July 1988 two Socata TB 20s. Maintenance and training by the Air Force. Based at Dekelia air base. Four Eurocopter Super Pumas AS 322C1 ordered in August 1998. First pair delivered in December 1999, second pair in May 2000. Being operated by mixed Air Force and Coast Guard crews. Bendix radar fitted. Three Reims Cassna Vigilant maritime patrol aircraft ordered in July 1999. First (F 406) delivered on 7 March 2001 and the other two in 2002. Six AS 365N3 Dauphin 2 helicopters were delivered in mid-2004.

Notes: (1) Three 8 m Boston Whalers were donated by the US government on 26 June 2004.

(2) A tender for an offshore patrol vessel was issued on 3 April 2007. The ship is to be of about 60 m and capable of operating a Dauphin 2 helicopter.

Grenada

Country Overview

Grenada gained independence in 1974; the British monarch, represented by a governor-general, is the head of state. The southernmost of the Windward

Islands in the Lesser Antilles chain, the country comprises the island of Grenada (311 square miles) and some of the southern Grenadines including Carriacou and Petit Martinique. The capital, largest town, and main port is St George's. Territorial seas

(12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits are not defined. The Coast Guard craft are operated under the direction of the Commissioner of Police.

Guatemala

Country Overview

The Republic of Guatemala is situated in Central America between Mexico to the north, Belize to the east and Honduras and El Salvador to the south-east. With an area of 42,042 square miles, it has an 83 n mile coastline with the Caribbean and a 133 n mile coastline with the Pacific Ocean. The capital city is Guatemala City while the principal Caribbean ports are Puerto Barrios and Santo Tomás de Castilla and Pacific ports are Puerto Quetzal, San José and Champerico. Territorial seas (12 n miles) are

claimed. A 200 n mile EEZ has been claimed but the limits are not defined.

Headquarters Appointments

Commander of the Navy:
Rear Admiral Carlos Roberto Campos Sanchez
Commander Caribbean Naval Region:
Captain Luis Alfredo Monterroso de la Mora
Commander Pacific Naval Region:
Captain Rafael Alfonso Renau Franco

Personnel

- (a) 2009: 1,250 (130 officers) including 500 Marines (2 battalions) (mostly volunteers)
(b) 2½ years' national service

Bases

Pacific: Puerto Quetzal (HQ), Puerto San José, Champerico
Atlantic: Santo Tomás de Castilla (HQ), Puerto Barrios, Livingston

PATROL FORCES

- Notes:** (1) There is also a naval manned Ferry *15 de Enero* (T 691) and a 69 ft launch *Orca* which was built locally in 1996/97
(2) Three sail training craft, *Mendieta*, *Margarita* and *Ostuncalco* are based at Santo Tomás de Castilla.
(3) Two launches were reported donated by the Guatemalan government and the US Embassy in 2005
(4) There are two 11 m personnel landing craft *Picuda* D 361 and *Barracuda* D 362
(5) The acquisition of 10 small patrol craft from Brazil was announced in April 2008.

Guns: 2 Oerlikon GAM/204 GK 20 mm. 2—7.62 mm MGs.
Radars: Surface search: Furuno; I-band.

Comment: As the flagship she used to rotate between Pacific and Atlantic bases every two years but has remained in the Pacific since 1989. Rearmed with 20 mm guns in 1989. These were replaced by GAM guns in 1990–91 when the ship received a new radar. Refitted again in 1996 with new engines.

12/2004, Julio Montes / 112955

2 SEWART CLASS (COASTAL PATROL CRAFT) (PB)

Name	No	Builders	Commissioned
UTATLAN	GC 851 (ex-P 851)	Sewart, Louisiana	May 1967
SUBTENIENTE OSORIO SARAVIA	GC 852 (ex-P 852)	Sewart, Louisiana	Nov 1972

Displacement, tons: 54 full load
Dimensions, feet (metres): 85 × 18.7 × 7.2 (26.9 × 5.7 × 2.2)
Main machinery: 2 Detroit 8V 92TA Model 91; 1,300 hp (970 kW); 2 shafts
Speed, knots: 22
Range, n miles: 400 at 12 kt
Complement: 17 (4 officers)
Guns: 1 Oerlikon GAM/204 GK 20 mm. 2—7.62 mm MGs.
Radars: Surface search: Furuno; I-band.

Comment: Aluminium superstructure. Both rearmed with 20 mm guns, and 75 mm recoilless removed in 1990. P 851 is based in the Atlantic; P 852 in the Pacific. Refitted in 1995–96 with new engines.

12/2004, Julio Montes / 112956

6 CUTLASS CLASS

(5 COASTAL PATROL CRAFT AND 1 SURVEY CRAFT) (PB)

Name	No	Builders	Commissioned
YECUN UMAN	GC 651 (ex-P 651)	Halter Marine	26 Nov 1971
KAIBIL BALAN	GC 652 (ex-P 652)	Halter Marine	8 Feb 1972
AZUMANCHE	GC 653 (ex-P 653)	Halter Marine	8 Feb 1972
TZACOL	GC 654 (ex-P 654)	Halter Marine	10 Mar 1976
BITOL	GC 655 (ex-P 655)	Halter Marine	4 Aug 1976
GUCUMAZ	BH 656 (ex-GC 656)	Halter Marine	15 May 1981

Displacement, tons: 45 full load
Dimensions, feet (metres): 64.5 × 17 × 3 (19.7 × 5.2 × 0.9)
Main machinery: 2 Detroit 8V 92TA Model 91 diesels; 1,300 hp (970 kW); 2 shafts
Speed, knots: 25. **Range, n miles:** 400 at 15 kt
Complement: 10 (2 officers)
Guns: 2 Oerlikon GAM/204 GK 20 mm. 2 or 3—12.7 mm MGs.
Radars: Surface search: Furuno; I-band.

Comment: First five rearmed with 20 mm guns in 1991. P 651, 654 and 655 are in the Atlantic, remainder in the Pacific. Aluminium hulls. *Gucumaz* was used as a survey craft but by 1996 was again serving as a patrol craft with three MGs. Reverted to survey craft in 2004. 654 and 656 refitted in 1994–95, remainder in 1995–87. New engines fitted.

12/2004, Julio Montes / 112958

12/2004, Julio Montes / 112957

1 DAUNTLESS CLASS (PB)

IXIMCHE

Displacement, tons: 11 full load
Dimensions, feet (metres): 40 × 12.66 × 2.3 (12.19 × 3.86 × 0.69)
Main machinery: 2 Caterpillar 3208TA diesels, 850 hp (635 kW); 2 shafts
Speed, knots: 28. **Range, n miles:** 400 at 22 kt
Complement: 5
Guns: 1—7.62 mm MG.
Radars: Surface search: Raytheon R40X; I-band.

Comment: Built by SeaArk, Monticello, of aluminium construction. Donated by US government as foreign aid in 1997.

6/2001, RCIS / 0121306

6 VIGILANTE CLASS (PBI)

GC 271-276

Displacement, tons: 3.5 full load
 Dimensions, feet (metres): 26.6 x 10 x 1.8 (8.1 x 3 x 0.5)
 Main machinery: 2 Evinrude outboards; 600 hp (448 kW)
 Speed, knots: 40+
 Complement: 4
 Guns: 1—12.7 mm MG
 Radars: Surface search: Furuno; I-band.

Comment: Ordered in 1993 from Boston Whaler. Delivered in 1994 and divided three to each coast

GC 275

12/1999 / 0104574

20 RIVER PATROL CRAFT (PBR)

Group A
 DENEZ
 SIRIUS
 PROCYON
 VEGA
 POLLUX
 SPICA
 STELLA MARIS

Group B
 LAGO DE ATITLAN
 MAZATENANGO
 RETALHULEU
 ESCUINTLA

Group C
 CHOCHAB
 ALIOTH
 MIRFA
 SCHEDAR
 COMAMEFA

Group D
 MERO
 SARDINA
 PAMPANA
 MAVRO-I

Comment: Group A are wooden hull craft with a speed of 19 kt. Group B have aluminum hulls and a speed of 28 kt. Group C are probably of Israeli design and Group D are commercial craft caught smuggling and confiscated. All can be armed with 7.62 mm MGs and are used by Marine battalions as well as the Navy.

CHOCHAB AND COMAMEFA

2/1996, Julio Montes / 0064886

Guinea

Country Overview

A former French colony, The Republic of Guinea became independent in 1958. Located in west Africa, the country has an area of 94,926 square miles, a 173 n mile coastline with the Atlantic Ocean and includes the Iles de Los. It is bordered to the north by Guinea-Bissau and Senegal and to the south by Liberia and Sierra Leone. The capital, largest city and principal port is Conakry. Territorial seas (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has been claimed but the limits have not been

formally agreed. Fishery Protection may be provided by civilian contractors.

Personnel

- (a) 2009: 400 officers and men
- (b) 2 years' conscript service

Bases

Conakry, Kakanda

Notes: (1) A number of craft, including two Zhuk, two Bogomol, two Stinger and two Swiftships (*Vigilante* P 300 and *Intrepide* P 328) are laid up alongside. Some of these might be resurrected to combat piracy problems in the region. A Damen 13 m patrol boat, *Matakang*, is reported to have been delivered in 1999 and there are two MonArk 8 m Stinger craft, P 30 and P 35, which were delivered in 1985.
 (2) Development of the port of Conakry is under consideration.

Guinea-Bissau

Country Overview

A former Portuguese colony, The Republic of Guinea-Bissau gained independence in 1974. Located in west Africa, the country has an area of 13,948 square miles, a 189 n mile coastline with the Atlantic Ocean and includes about 60 offshore islands, among them the Bijagos (Bissagos) Islands. It is bordered to the north by Senegal and to the south by Guinea. The capital, largest city and principal port is Bissau. Other ports include Cacheu and Bolama. Territorial seas (12 n miles) are claimed. A 200 n mile

Exclusive Economic Zone (EEZ) has been claimed and has been partially defined by boundary agreements.

Headquarters Appointments

Head of Navy: Commander Americo Bubo Na Tchute

Personnel

- (a) 2009: 310 officers and men
- (b) Voluntary service

Base

Bissau

Maritime Aircraft

A Cessna 337 patrol aircraft is used for offshore surveillance, when serviceable

PATROL FORCES

Notes: (1) One Rodman R 800 8.7 m patrol craft with a speed of 28 kt acquired in 1999.
 (2) One 15 m Peterson Mk 4 class, *Ilha de Caio*, is reported unserviceable.

2 ALFEITE TYPE (COASTAL PATROL CRAFT) (PC)

Name	No	Builders	Commissioned
CACINE	LF 01	Arsenal do Alfelte	9 Mar 1994
CACHEU	LF 02	Arsenal do Alfelte	9 Mar 1994

Displacement, tons: 55 full load
 Dimensions, feet (metres): 64.6 x 19 x 10.6 (19.7 x 5.8 x 3.2)
 Main machinery: 3 MTU 12V 183 TE92 diesels; 3,000 hp(m) (2.2 MW) maximum;
 3 Hamilton MH 521 water-jets
 Speed, knots: 28
 Complement: 9 (1 officer)
 Radars: Navigation: Furuno FR 2010; I-band.

Comment: Ordered from Portugal in 1991. GRP hulls. Used for fishery protection patrols and customs duties. Operational status doubtful.

CACHEU

3/1994, Arsenal do Alfelte / 0064688

Guyana

Country Overview

Formerly known as British Guiana, the Cooperative Republic of Guyana became an independent state in 1966. With an area of 83,000 square miles it has borders to the east with Suriname, to the west with Venezuela and to the south with Brazil, its 270 n mile coastline is on the Atlantic Ocean. The capital, largest city and chief port is Georgetown. Territorial seas (12 n miles) and a fisheries zone (200 n miles) are

claimed. A 200 n mile Exclusive Economic Zone (EEZ) has also been claimed but the limits are not defined. Rebuilding of the Coast Guard started in 2001

Personnel

- (a) 2009: 180
(b) Voluntary service

Headquarters Appointments

Commanding Officer, Coast Guard
Commander John Flores

Bases

Georgetown (HQ), Banab (Corentyne), Morawhanna

PATROL FORCES

Honduras

FUERZA NAVAL REPUBLICA

Country Overview

The Republic of Honduras is one of the largest Central American republics. With an area of 43,433 square miles, it is situated between El Salvador and Guatemala to the west and Nicaragua to the south and east. It has a 350 n mile coastline with the Caribbean and a 93 n mile coastline with the Pacific Ocean. The capital and largest city is Tegucigalpa while the principal Caribbean ports are

La Ceiba and Puerto Cortés and Pacific port is Amapala. Territorial seas (12 nmiles) are claimed. A 200 n mile EEZ is claimed and has been partly defined by boundary agreements

Personnel

2009: 1,100 including 450 marines

Headquarters Appointments

Commanding Officer, General HQ:
Capitan de Navio Don Juan Pablo Rodriguez Rodriguez

Bases

Tegucigalpa (General HQ)
Puerto Cortés, Puerto Castilla (Atlantic HQ), Amapala (Pacific HQ), La Ceiba, Puerto Trujillo

PATROL FORCES

- Notes:** (1) In addition there may be three Piranha river craft still in limited service.
(2) Five 23 m catamarans reported to have been ordered in 2004
(3) Two 11 m personnel landing craft are used for anti-drug operations.
(4) Four interceptor craft, capable of 60 kt, were donated by the United States in 2007.

Hong Kong

POLICE MARINE REGION

**Country Overview**

Formerly a British colony, the Hong Kong Special Administrative Region of China reverted to Chinese sovereignty on 30 June 1997. While China has assumed responsibility for foreign affairs and defence, the territory is to maintain its own legal, social, and economic systems until at least 2047. Hong Kong comprises three main regions, Hong Kong Island (29 sq miles), Kowloon Peninsula and Stonecutters Island (6 sq miles) and the New Territories (380 sq miles). As with the remainder of China, territorial seas (12 n miles) are claimed. An EEZ (200 n mile) is also claimed but the limits have not been

defined by boundary agreements. The role of the Marine Police is to maintain the integrity of the sea boundary and territorial waters of Hong Kong, enforce the laws of Hong Kong in territorial waters, prevent illegal immigration by sea, SAR in territorial and adjacent waters, and casualty evacuation.

Headquarters Appointments

Regional Commander (Marine):
 Chang Mo See
Deputy Regional Commander (Marine):
 J A Cox

Organisation

Marine Police Regional HQ, Sai Wan Ho
 Bases at Ma Liu Shui, Tui Min Hoi, Tai Lam Chung, Aberdeen, Sai Wan Ho

Complement: 4
Radars: Navigation: Koden; I-band.

Comment: Built by Seaspray Boats, Fremantle in 1992. Catamaran hulls capable of carrying 16 police officers.

PL 47 12/2007, Chris Sattler / 1170154

11 SEASPRAY CLASS (INSHORE PATROL CRAFT) (WPB)

PL 22-32

Displacement, tons: 8.7 full load
Dimensions, feet (metres): 32.5 × 13.8 × 3.9 (9.9 × 4.2 × 1.2)
Main machinery: 2 Caterpillar 3208TA diesels (Caterpillar C7 diesels PL 25 and 29); 700 hp (522 kW) (908 PL 25, 29) (522 kW) (677 PL 25, 29); 2 shafts
Speed, knots: 35
Complement: 4
Radars: Surface search: Koden, I-band.

Comment: Built by Seaspray Boats, Fremantle in 1992-93.

PL 28 12/2007, Chris Sattler / 1170152

9 INSHORE PATROL CRAFT (WPB)

PL 20-21 PL 90-96

Displacement, tons: 2.3
 Dimensions, feet (metres): 26.2 x 10.2 x 3.3 (8.1 x 3.1 x 1.0)
 Main machinery: 2 outboards; 540 hp (403 kW)
 Speed, knots: 42
 Complement: 3
 Radars: Surface search: Koden, I-band

Comment: Details given are for PL 20-21 which are Sharkcat class of catamaran construction, commissioned in October 1988. PL 90-92 are Boston Whaler Guardians with 2 Johnson 115 hp outboards, and PL 93-96 are Boston Whaler Vigilants with 2 Johnson 250 hp outboards. The Whalers were all delivered in 1997 and are capable of speeds in excess of 33 kt.

PL 93 12/2007, Chris Sattler / 1335252

6 CHEOY LEE CLASS (INSHORE PATROL CRAFT) (WPB)

PL 40-45

Displacement, tons: 19.4
 Dimensions, feet (metres): 42.9 x 13.2 x 2.6 (13.07 x 4.0 x 0.8)
 Main machinery: 2 MAN D2842LE403 diesels; 1,420 hp (1.06 MW) sustained; 2 Hamilton water-jets
 Speed, knots: 35
 Complement: 4
 Radars: Surface search: Bridgemaster E 180; I-band.

Comment: Based upon a design from Peterson Shipbuilders, these shallow draft vessels were constructed by Cheoy Lee Shipyards Ltd and delivered in 2000.

PL 42 12/2007, Chris Sattler / 1335251

8 HIGH SPEED INTERCEPTORS (HSIC)

PV 30-37

Displacement, tons: 2.7 full load
 Dimensions, feet (metres): 28.3 x 8.7 x 2.4 (8.5 x 2.6 x 0.7)
 Main machinery: 2 Mercury outboards; 500 hp (373 kW)
 Speed, knots: 51
 Complement: 3

Comment: Built by Queensland Ships in 1997. Used by the Small Boat Division.

PV 35 12/2007, Chris Sattler / 1170151

6 + 11 LUNG-TEH CLASS (PATROL CRAFT) (PBF)

PL 5-10

Displacement, tons: 39
 Dimensions, feet (metres): 62.3 x 16.4 x 3.3 (19.0 x 5.0 x 1.0)
 Main machinery: 3 Caterpillar C32 diesels; 3,345 hp (2.5 MW); 3 Hamilton waterjets
 Speed, knots: 45
 Complement: 8

Comment: Contract for the construction of 17 patrol craft signed with Lung-Teh Shipyard, Taiwan on 19 September 2006. Aluminium construction. The first six entered service in November 2007 with the remainder to follow by 2009.

jfs.janes.com

PL 5 12/2007, Chris Sattler / 1170153

6 HIGH-SPEED INTERCEPTORS (PBF)

PV 5-10

Displacement, tons: To be announced
 Dimensions, feet (metres): 32.4 x 8.4 x 2.0 (9.88 x 2.55 x 0.6)
 Main machinery: 2 Mercury Verado outboards; 550 hp (410 kW)
 Speed, knots: 50
 Complement: 3

Comment: Constructed by Brisbane Ship Constructions Ltd in 2007.

PV 6 6/2007, Hong Kong Police / 1335750

3 FB 55SC CLASS (INSHORE PATROL CRAFT) (PBF)

Displacement, tons: 10.2
 Dimensions, feet (metres): 53.9 x 9.3 x 2.75 (16.43 x 2.85 x 0.84)
 Main machinery: 3 Seatek diesels; 2,250 hp (1.7 MW); surface piercing propeller
 Speed, knots: 65 approx
 Complement: 8

Comment: Designed by FB design of Italy. Delivered in 2003. Kevlar monohull fast inshore patrol craft for maritime law enforcement tasks. Eight seats in forward compartment.

FB 55SC 12/2007, Chris Sattler / 1170150

1 FB RIB 42SC CLASS (INSHORE PATROL CRAFT) (PB)

Displacement, tons: 6 approx
 Dimensions, feet (metres): 43.3 x 11.6 x 2.3 (13.2 x 3.55 x 0.7)
 Main machinery: 2 Caterpillar diesels; 1,400 hp (1.04 MW); surface piercing propeller
 Speed, knots: 63
 Complement: 3

Comment: Designed by FB design, Italy. Rigid inflatable Kevlar monohull for maritime law enforcement tasks. Delivered 2004.

RIB 42SC 12/2007, Chris Sattler / 1170149

CUSTOMS

Headquarters Appointments

Senior Superintendent Ports and Marine Command:
Li Chun-fai

Notes: The Marine Enforcement Group is based at Stoncutters Island. There are five Sector Command launches of which there are Damen 26 m craft completed in 1986 by Chung Wah SB & Eng Co Ltd, Kowloon. In all essentials these craft are sisters of the 10 operated by the Hong Kong Police with the exception of the latter's slow speed waterjet. Names: *Sea Glory* (CE 6), *Sea Guardian* (CE 5), *Sea Leader* (CE 2). Two 32 m Challenger launches, *Sea Reliance* (CE 8) and *Sea Fidelity* (CE 9) were commissioned in October 2000. With a gross tonnage of 125 tonnes, the craft have a maximum speed of 28 kt. Equipped with a 'sea-rider' they are also fitted with night vision aids and narcotics and explosives scanning devices. There are also four 17 m FB design high-speed pursuit craft (CE 15-18), capable of 49 kt, and two Boston Whaler 10 m shallow-water launches (CE 12-13) capable of 39 kt.

CE 16 6/2007, Ports and Maritime Command / 1167810

CE 2 6/2007, Chris Sattler / 1335249

CE 13 6/2007, Ports and Maritime Command / 1167809

LAND-BASED MARITIME AIRCRAFT

Notes: All aircraft belong to the Government Flying Service based at Hong Kong International Airport.

Numbers/Type: 3 Eurocopter AS 332 L2 Super Puma.

Operational speed: 130 kt (240 km/h).

Service ceiling: 15,090 ft (4,600 m).

Range: 672 n miles (1,245 km).

Role/Weapon systems: SAR/coastal surveillance, Medevac and transport. Sensors: radar, Spectrolab searchlight. Weapons: Unarmed. Medical equipment and up to six stretchers. Ordered on 17 September 1999. The aircraft entered service in April 2002.

AS 332 6/2005, Government Flying Service / 1127927

Numbers/Type: 2 BAE Jetstream J 41.

Operational speed: 260 kt (482 km/h).

Service ceiling: 26,000 ft (7,925 m).

Range: 774 n miles (1,433 km).

Role/Weapon systems: SAR (command and control), airborne surveillance, survey and photography. Sensors: Radar, FLIR, survey camera, VHF/UHF/DF.

Jetstream 6/2005, Government Flying Service / 1127924

Numbers/Type: 4 Eurocopter EC 155B1

Operational speed: 140 kt (260 km/h).

Service ceiling: 16,760 ft (5,110 m).

Range: 432 n miles (800 km).

Role/Weapon systems: SAR, Medevac, VIP transport; enlarged variant of 'Dauphin'. Sensors: Radar, FLIR, searchlight, siren, loudspeaker. Weapons: Unarmed. Two stretchers. Ordered on 17 September 1999; aircraft delivered in late 2002.

EC 155 6/2005, Government Flying Service / 1127923

Hungary

Country Overview

A landlocked central European country, the Republic of Hungary has an area of 35,919 square miles and is bordered by Slovakia, Ukraine, Romania, Serbia, Croatia, Slovenia and Austria. Budapest

is the country's capital and largest city. The country is divided into two general regions by the principal river, the Danube, which flows for 145 miles north-south through the centre of the country and serves as a major artery of the transport system.

Diplomatic Representation

Defence Attaché in London:

Lieutenant Colonel Arpad Ibovics

MINE WARFARE FORCES

3 NESTIN CLASS (RIVER MINESWEEPERS) (MSR)

ÓBUDA AM 22

DUNAÚJVÁROS AM 31

DUNAFOLDVÁR AM 32

Displacement, tons: 72.3 full load

Dimensions, feet (metres), 87.1 x 21.3 x 3.9 (26.5 x 6.5 x 1.2)

Main machinery: 2 Torpedo 12-cyl diesels, 520 hp(m) (382 kW); 2 shafts

Speed, knots, 15. **Range, n miles:** 810 at 11 kt

Complement: 17 (11 officers)

Guns: 6 Hispano 20 mm (1 quad M75 fwd, 2 single M70 aft)

Mines: 24 ground mines.

Radars: Navigation: Decca 101; I-band.

Comment: Built by Brodotehnika, Belgrade in 1980-82. Full magnetic/acoustic and wire sweeping capabilities. Kram minesweeping system employs a towed sweep at 200 m. The ships form the first 'Honved' Ordnance Disposal and Warship Regiment.

ÓBUDA 10/1998, Hungary Maritime Wing / 0064703

2 AN-2 CLASS (RIVER PATROL VESSELS) (PBR)

ERCSI 542-051 BAJA 542-054

Displacement, tons: 10.5 full load
 Dimensions, feet (metres): 44.0 x 12.5 x 1.97 (13.4 x 3.8 x 0.6)
 Main machinery: 2 Volvo Penta diesels; 380 hp(m) (283 kW) sustained; 2 shafts
 Speed, knots: 19
 Complement: 7 (1 officer)

Comment: Last survivors of an original 45 units built at Duna Shipyard in 1953. Refitted 2005. Employed on river patrol, diving support and disaster relief duties.

AN-2 CLASS

6/2007, Hungary Maritime Wing / 11/0159

Iceland

LANDHELGISGAESLAN

Country Overview

An island republic, the Republic of Iceland lies just south of the Arctic Circle in the North Atlantic Ocean about 162 n miles southeast of Greenland and 432 n miles northwest of Scotland. With an area of 39,769 square miles, the country has a 2,695 n mile coastline. Reykjavik is the capital, largest city and principal port. Territorial waters (12 n miles) are claimed. A 200 n mile Exclusive Economic Zone (EEZ) has also been claimed although the limits are not fully defined by boundary agreements. The Coast Guard Service deals with fishery protection, salvage, rescue, security, pollution control, hydrographic research, lighthouse duties and bomb disposal.

Headquarters Appointments

Director General of Coast Guard:
 Commodore Georg K Lörusson

Personnel

2009: 145 officers and men

Colours

Since 1990 vessels have been marked with red, white and blue diagonal stripes on the ships' side and the Coast Guard name (Landhelgisgaeslan).

Research Ships

Reykjavik
 A number of government Research Ships bearing RE pennant numbers operate off Iceland.

Maritime Patrol Aircraft

Maritime aircraft include a Fokker Friendship plus two AS 332 Super Puma and one SA 365 Dauphin. The Fokker Friendship is to be replaced in mid-2009 by a Bombardier Dash-8 maritime surveillance aircraft

COAST GUARD

2 AEGIR CLASS (PSOH)

Name	No	Builders	Commissioned
AEGIR	—	Aalborg Vaerft, Denmark	1968
TYR	—	Dannebrog Vaerft, Denmark	15 Mar 1975

Displacement, tons: 1,128 (1,214 Tyr) standard; 1,500 full load
 Dimensions, feet (metres): 229.1 (233.4 Tyr) x 32.8 x 15.1 (69.8 (71.1) x 10.0 x 4.6)
 Main machinery: 2 MAN/Burmeister & Wain 8L 40/54 diesels; 13,200 hp(m) (9.68 MW) sustained; 2 shafts; cp props
 Speed, knots: 19 (Aegir); 20 (Tyr). Range, n miles: 9,000 at 18 kt
 Complement: 19
 Guns: 1 Bofors 40 mm/60 Mk 3.
 Radars: Surface search/navigation: Sperry; E/F/I-band.

Comment: Similar ships but Tyr has a slightly improved design and Aegir has no sonar. The hangar is between the funnels. In 1994 a large crane was fitted on the starboard side at the forward end of the flight deck. In 1997 the helicopter deck was extended and a radome fitted on the top of the tower. Aegir refitted in Poland in 2005 and Tyr in 2006. Work included extension and modernisation of the bridge, upgrade of accommodation and the installation of helicopter-in-flight refuelling equipment.

TYR 9/2008, Adolfo Ortigueira Gil / 1335768

1 BALDUR CLASS (AGS/PB)

Name	No	Builders	Commissioned
BALDUR	—	Velsmidja Seydisfjardar	8 May 1991

Displacement, tons: 54 full load
 Dimensions, feet (metres): 67.9 x 17.1 x 5.6 (20.7 x 5.2 x 1.7)
 Main machinery: 2 Caterpillar 3406TA diesels; 640 hp (480 kW); 2 shafts
 Speed, knots: 12
 Complement: 5
 Radars: Navigation: Furuno, I-band.

Comment: Built in an Icelandic Shipyard. Used for survey work and patrol duties.

BALDUR 6/2005, Iceland Coast Guard / 1153888

1 ODINN CLASS (PSOH)

Name	No	Builders	Commissioned
ODINN	—	Aalborg Vaerft, Denmark	Jan 1960

Displacement, tons: 910 standard; 1,200 full load
 Dimensions, feet (metres): 209.0 x 33 x 13 (63.7 x 10 x 4)
 Main machinery: 2 MAN/Burmeister & Wain diesels; 5,700 hp(m) (4.19 MW); 2 shafts
 Speed, knots: 18. Range, n miles: 9,500 at 17 kt
 Complement: 19
 Guns: 1 Bofors 40 mm/60 Mk 3.
 Radars: Surface search/navigation: Sperry; E/F/I-band

Comment: Refitted in Denmark in late 1975 by Aarhus Flydedock AS with a hangar and helicopter deck which was later adapted in 1989 for the operation of RHIB inspection craft, a crane was fitted at the starboard forward end of the flight deck. The original 57 mm gun was replaced in 1990. To be replaced in 2009 by a new vessel Ulstein UT 512L under construction in Chile

ODINN 2/2002, L-G Nilsson / 0561507

0 + 1 ULSTEIN UT 512L (OFFSHORE PATROL SHIP) (PSO)

Name	No	Builders	Commissioned
—	—	ASMAR, Talcahuano	2009

Displacement, tons: 4,000 full load
 Dimensions, feet (metres): 302.1 x 50.8 x 16.1 (93.6 x 15.5 x 4.9)
 Main machinery: 2 Borgen B 32. 40L diesels; 10,730 hp (8 MW); 2 Kamewa Ulstein cp props, two bow thrusters; 1 Kamewa Ulstein 736 kW tunnel thruster; 1 Ulstein Aquamaster swing-up 883 kW azimuth thruster
 Speed, knots: 19.5
 Complement: 48

Comment: Contract awarded on 1 December 2006 for the construction of a replacement vessel for Odinn. The ship, designated UT 512L, is an enlarged design of the Norwegian Coast Guard ship Herstad. The Rolls Royce design is for a variety of coastguard and EEZ management roles including offshore standby and rescue, firefighting, salvage, pollution prevention, general law enforcement operations and fishery control. The ship is under construction at ASMAR shipyard in Chile. Further ships may be ordered to replace Iceland's ageing inventory of ships.

UT 512L (artist's impression) 6/2007, Iceland Coast Guard / 1305270

SUBMARINES

Notes: (1) The Advanced Technology Vessel (ATV) project was initiated in the 1980s. In addition to traditional SSN/SSGN functions, the boat is likely to have a strategic role and, to this end, may also be capable of deploying nuclear-tipped ballistic missiles in addition to torpedo-tube launched conventional anti-ship and land-attack missiles. The delayed Project K-15 Sagarika 750 km range ballistic missile is a possibility. A test-firing of the missile was made from a submerged pontoon on 26 February 2008. Currently led by Vice Admiral D S P Varma, the ATV project has facilities in Delhi, Hyderabad, Vishakapatnam (where the boat is reported to be under construction) and

Kalpakkam (where the PWR reactor reportedly became fully operational in 2006). Companies in support of the project are reported to be Larsen and Toubro at Hazira, Mazagon Dock Ltd and Bharat Electronics. It is believed that the submarine is a development of a Russian design, derived either from the Project 885 Severodvinsk class SSGN or more probably from the Victor/Akula class generation. The nuclear propulsion system is understood to be an Indo-Russian PWR although reports that it may be a Russian supplied VM-5 PWR have also circulated. It was announced in December 2007 that sea trials of the ATV are to begin in 2009.

(2) A request for proposals for a class of six submarines, to follow the Scorpene programme, is expected in 2009. Contenders include further Scorpene class, German Type 214 and Russian Amur 1650 class.
(3) India operates up to 11 Cosmos CE2F/FX100 swimmer delivery vehicles, delivered in 1991.
(4) Procurement of at least two Deep Sea Rescue Vehicles (DSRV) was reported to be in progress in 2005. The new DRSV would be operated from *Nireekshak* or a vessel of opportunity.

Attack Submarines

0 + 1 AKULA (SCHUKA-B) CLASS (PROJECT 971) (SSN)

Name	No	Builders	Laid down	Launched	Commissioned
CHAKRA (ex-Nerpa)	-	Komsomolsk Shipyard	1986	24 June 2006	2009
Displacement, tons: 7,500 surfaced; 9,100 dived		Radars: Surface search. Snoop Pair or Snoop Half with back to back aenals on ESM mast, I-band.			handed over in September 2009. The contract included a training package and three crews are reported to have been trained at Sosnovy Bor near St Petersburg. The weapons and sensors of the submarine in Indian service are speculative and have not been confirmed.
Dimensions, feet (metres): 360.1 oa; 337.9 wl × 45.9 × 34.1 (110; 103 × 14.0 × 10.4)		Sonars: Shark Gill (Skat MGK 503); hull-mounted; passive/active search and attack; low/medium frequency. Mouse Roar; hull-mounted; active attack; high frequency. Skat 3 towed array; passive; very low frequency			Structure: The very long fin is particularly notable. Diving depth 450 m approximately
Main machinery: Nuclear; 1 VM-5 PWR; 190 MW; 2 GT3A turbines; 47,600 hp(m) (35 MW); 2 emergency propulsion motors; 750 hp(m) (552 kW); 1 shaft, 2 spinners; 1,006 hp(m) (740 kW)		Programmes: The construction of <i>Nerpa</i> (K 152) began at Komsomolsk in 1986 but, following the collapse of the Soviet Union in 1991, work was suspended. Negotiations for the 10-year lease of the boat by the Indian Navy started in about 1996 and terms were subsequently agreed in September 2001 when construction, likely to have been at least partly financed by India, was restarted. The boat was subsequently launched in 2006 and, following sea trials and certification by the Russian Navy, is likely to be			Operational: <i>Chakra</i> bears the same name as the <i>Cherie</i> class SSN leased from the Soviet Union 1988-91. Initially, the principal role of the submarine is to be training of both sea-going and shore-based personnel in nuclear submarine operations and support. The boat is likely to carry a number of Russian crew which may place some restrictions on the boat's operational use. As experience is gained, the submarine is likely to be deployed on a broader range of SSN operations.
Speed, knots: 28 dived; 10 surfaced					
Complement: 62 (31 officers)					
Missiles: SLCM/SSM: Novator Alfa Klub SS-N-27 (3m-54E-1 anti-ship); active radar homing to 180 km (97.2 n miles) at 0.7 Mach (cruise) and 2.5 Mach (attack); warhead 450 kg.					
Torpedoes: 4-21 in (533 mm) and 4-25.6 in (650 mm) tubes.					
Countermeasures: ESM; Rim Hat; Intercept					

AKULA CLASS

6/2007, *Ships of the World* / 1305156

Patrol Submarines

2 FOXTROT (PROJECT 641) CLASS (SS)

Name	No	Builders	Commissioned
VELA	S 40	Sudomekh, Leningrad	Aug 1973
VAGLI	S 42	Sudomekh, Leningrad	Aug 1974
Displacement, tons: 1,952 surfaced; 2,475 dived		Range, n miles: 20,000 at 8 kt surfaced, 380 at 2 kt dived	
Dimensions, feet (metres): 299.5 × 24.6 × 19.7 (91.3 × 7.5 × 6)		Complement: 75 (8 officers)	
Main machinery: Diesel-electric; 3 Type 37-D diesels; 6,000 hp(m) (4.4 MW); 3 motors (1 × 2,700 and 2 × 1,350); 5,400 hp(m) (3.97 MW); 3 shafts, 1 auxiliary motor; 140 hp(m) (103 kW)		Torpedoes: 10 -21 in (533 mm) (6 fwd, 4 aft) tubes. 22 SET-65E/SAET-60, active/passive homing to 15 km (8.1 n miles) at 40 kt; warhead 205 kg	
Speed, knots: 16 surfaced, 15 dived		Mines: 44 in lieu of torpedoes.	
		Countermeasures: ESM Stop Light; radar warning.	
		Radars: Surface search: Snoop Tray; I-band.	
		Sonars: Harkules/Fenik; bow-mounted; passive search and attack; medium frequency.	
		Structure: Diving depth 250 m (820 ft), reducing with age.	
		Operational: Survivors of an original eight of the class. <i>Vagli</i> completed refit in 2004 and <i>Vela</i> was reportedly in refit in 2005. Both based at Vishakapatnam.	

FOXTROT

2/2001, *Guy Toremans* / 0105814

10 SINDHUGHOSH (KILO) (PROJECT 877EM/8773) CLASS (SSK)

Name	No	Builders	Commissioned
SINDHUGHOSH	S 55	Sudomekh, Leningrad	30 Apr 1986

SINDHURAKSHAK	S 63	Sudomekh, St Petersburg	24 Dec 1997
SINDHUSHASTRA	S 66	Sudomekh, St Petersburg	19 July 2000

Displacement, tons: 2,325 surfaced; 3,076 dived

Dimensions, feet (metres), 238.2 x 32.5 x 21.7
(72.6 x 9.9 x 6.6)

Main machinery: Diesel-electric; 2 Model 4-2AA-42M diesels; 3,650 hp(m) (2.68 MW); 2 generators; 1 motor; 5,900 hp(m) (4.34 MW); 1 shaft; 2 MT-166 auxiliary motors; 204 hp(m) (150 kW); 1 economic speed motor; 130 hp(m) (95 kW)

Speed, knots: 10 surfaced; 17 dived; 9 snorting

Range, n miles: 6,000 at 7 kt snorting; 400 at 3 kt dived

Complement: 52 (13 officers)

Missiles: SLCM: Novator Alfa Klub SS-N-27 (3M-54 anti-ship missiles) (S 55, 57, 59, 60, 62 and 66), active radar homing to 180 km (97.2 n miles) at 0.7 Mach (cruise) and 2.5 Mach (attack); warhead 450 kg
Novator Klub SS-N-30 (3M 14) land-attack missiles (S 55, S 62); terrain following/SATNAV guidance to 300 km (162 n miles) at 0.7 Mach; warhead 450 kg

SAM: SA-N-8 portable launcher; IR homing to 3.2 n miles (6 km)

Torpedoes: 6—21 in (533 mm) tubes. Combination of Type 53-66; passive wake homing to 19 km (10.3 n miles) at 45 kt; warhead 305 kg and TEST 71/96; anti-submarine, active/passive homing to 15 km (8.1 n miles) at 40 kt or 20 km (10.8 n miles) at 25 kt; warhead 220 kg Total of 18 weapons. Wire-guided on 2 tubes.

Mines: 24 DM-1 in lieu of torpedoes.

Countermeasures: ESM Squid Head, radar warning

Weapons control: Uzel MVU-119EM TFCS

Radars: Navigation, SnoopTray; I-band

Sonars: Shark Teeth/Shark Fin; MGK-400; or Bel Ushus (S 55, 62), hull-mounted; active/passive search and attack, medium frequency
Mouse Roar; MG-519; hull-mounted; active search; high frequency

Programmes: The Kilo class was launched in the former Soviet Navy in 1979 and although India was the first country to acquire one they have since been transferred to Algeria, Poland, Romania, Iran and China. Because of the slowness of the S 209 programme, the original order in 1983 for six Kilo class expanded to 10 but was then cut back again to eight. Two further orders were confirmed in May 1997. S 63 was a spare Type 877 hull built for the Russian Navy, but never purchased. S 65 is a Type 8773 and was fitted for SLCM on build. She was launched on 14 October 1999.

Modernisation: *Sindhuvir* completed major refit at Severodvinsk from May 1997 to July 1999. *Sindhuraj* and *Sindhukesari* completed similar refits at Admiralty Yard, St Petersburg from May 1999 to November 2001. *Sindhuratna* completed a two-year refit at Severodvinsk in 2002. *Sindhughosh*, following refit work

at Vishakapatnam from 1999, started modernisation at Severodvinsk in September 2002 which completed on 22 April 2005. *Sindhuvijay* started a two-year refit at Severodvinsk in May 2005 which was completed on 8 May 2007 although acceptance of the boat was delayed until August 2008 due to reported defects in the missile system. She became the sixth boat to be fitted with SS-N-27. Both *Sindhughosh* and *Sindhuvijay* are equipped with the SS-N-30 (3M 14) land-attack missiles. *Sindhukirti* began refit at Hindustan Shipyards, Vishakapatnam, in January 2006 but may not rejoin the fleet until 2015

Structure: Diving depth, 300 m (985 ft). Reported that from *Sindhuvir* onwards these submarines have an SA-N-8 SAM capability. The launcher is shoulder held and stowed in the fin for use when the submarine is surfaced. Two torpedo tubes can fire wire-guided torpedoes and four tubes have automatic reloading. Anechoic tiles are fitted on casings and fins.

Operational: First four form the 11th Submarine Squadron Based at Vishakapatnam and the remainder of the 12th Squadron based at Mumbai. There are doubts about the operational status of *Sindhudhvaj* which has not been included in the refit cycle. She is reported to be at Vishakapatnam and, while she may be under repair, there has been speculation that she may be modified to fire Brahmos cruise missiles.

SINDHUVIJAY

SINDHURAKSHAK

12/2007, Michael Nitz / 1353084

0 + 6 SCORPENE CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	Mazagon Dock Ltd, Mumbai	2009	2012	2013

Displacement, tons: 1,705 dived
Dimensions, feet (metres): 217.8 x 20.3 x 19
 (664 x 6.2 x 5.8)
Main machinery: Diesel electric; 4 MTU 16V 396 SE84 diesels, 2,992 hp(m) (2.2 MW); 1 Jeumont Schneider motor; 3,808 hp(m) (2.8 MW); 1 shaft
Speed, knots: 20 dived; 11 surfaced
Range, n miles: 550 at 4 kt dived; 6,500 at 8 kt surfaced
Complement: 31 (6 officers)

Missiles: MBDA Exocet SM 39. Block 2 launched from 21 in (533 mm) tubes, inertial cruise, active terminal homing to 50 km (27 n miles) at 0.9 Mach; warhead 165 kg
Torpedoes: 6-21 in (533 mm) tubes.
Countermeasures: ESM
Weapons control: UDS International SUBTICS
Radars: Navigation: Sagem; I-band.
Sonars: Hull mounted; active/passive search and attack, medium frequency.

Programmes: Project 75. Following protracted negotiations which began in 2002, a contract for the licensed production of six submarines at Mazagon Dock Ltd, Mumbai, was signed on 6 October 2005. The agreement is reported to include an option for a further nine boats. DCNS is to supply technical advisers and provide prefabricated hull elements and the combat systems, including the command system, underwater sensors, optronics, and communications. MBDA is to supply Exocet SM39 missiles as part of the package

SCORPENE (computer graphic)

1998, DCN / 001/689

Details are based on the boats built for Chile. AIP is not to be installed in the first two boats but a reassessment for the remaining submarines will be made at a later date. Delivery of all six boats was to have begun in 2012 and to have been completed in about 2018 but this

programme is likely to have been delayed by at least a year
Structure: Diving depth more than 300 m (984 ft). AIP would require the addition of an 8 m 'plug' to incorporate the MESMA system.

4 SHISHUMAR (TYPE 209/1500) CLASS (SSK)

Name	No	Builders	Laid down	Launched	Commissioned
SHISHUMAR	S 44	Howaldtswerke, Kiel	1 May 1982	13 Dec 1984	22 Sep 1986
SHANKUSH	S 45	Howaldtswerke, Kiel	1 Sep 1982	11 May 1984	20 Nov 1986
SHALKI	S 46	Mazagon Dock Ltd, Mumbai	5 June 1984	30 Sep 1989	7 Feb 1992
SHANKUL	S 47	Mazagon Dock Ltd, Mumbai	3 Sep 1989	21 Mar 1992	28 May 1994

Displacement, tons: 1,450 standard; 1,660 surfaced; 1,850 dived
Dimensions, feet (metres): 211.2 x 21.3 x 19.7
 (644 x 6.5 x 6)
Main machinery: Diesel electric; 4 MTU 12V 493 AZ80 GA31L diesels; 2,400 hp(m) (1.76 MW) sustained, 4 Siemens alternators; 1.8 MW; 1 Siemens motor; 4,600 hp(m) (3.38 MW) sustained; 1 shaft
Speed, knots: 11 surfaced; 22 dived
Range, n miles: 8,000 snorkeling at 8 kt; 13,000 surfaced at 10 kt
Complement: 40 (8 officers)

Torpedoes: 8-21 in (533 mm) tubes. 14 AEG SUT Mod 1; wire-guided; active/passive homing to 28 km (15.3 n miles) at 23 kt; 12 km (6.6 n miles) at 35 kt; warhead 250 kg.
Mines: External 'strap-on' type for 24 mines.
Countermeasures: Decoys: C 303 acoustic decoys.
ESM: Argo Phoenix II AR 700 or Kullmorgen Sea Sentry; radar warning
Weapons control: Singer Librascope Mk 1.
Radars: Surface search: Thomson-CSF Calypso; I-band.
Sonars: Atlas Elektronik CSU 83, active/passive search and attack; medium frequency TSM 2272 to be fitted.
 Thomson Sintra DUUX-5; passive ranging and intercept

Programmes: Howaldtswerke concluded an agreement with the Indian Navy on 11 December 1981. This was in four basic parts: the building in West Germany of two Type 1500 submarines; the supply of 'packages' for the building of two more boats at Mazagon, Mumbai; training of various groups of specialists for the design and construction of the Mazagon pair; logistic services during the trials and early part of the commissions as well as consultation services in Mumbai. In 1984 it was announced that a further two submarines would be built at Mazagon for a total of six but this was overtaken by events in 1987-88 and the agreement with HDW terminated at four. This was reconsidered in 1992 and again in 1997. Government approval was given in mid-1999 for the construction of further submarines.

SHANKUL

2/2006, Ships of the World / 1164317

Modernisation: Thomson Sintra Eledone sonars may be fitted in due course. Trials for integration of indigenous Panchendriya ATAS developed by NPOL are in progress in Karanj
Structure: The Type 1500 has a central bulkhead and an IKL designed integrated escape sphere which can carry the full crew of up to 40 men, has an oxygen supply for 8 hours, and can withstand pressures at least as great as those that can be withstood by

the submarine's pressure hull. Diving depth 260 m (853 ft).
Operational: Form 10th Submarine Squadron based at Mumbai. *Shishumar* mid-life refit started in 1999 and had been completed by 2001. She undertook a further repair period in 2004 following a collision. *Shankul* underwent refit 2001-2005 and *Shankush* is reported to have started refit in 2001. *Shalki* started refit in early 2007.

SHISHUMAR

2/2001, Guy Toremans / 0105813

AIRCRAFT CARRIERS

Notes: The Maritime Capability Perspective Plan includes proposals to achieve a three-carrier force by 2022. Construction of a second indigenously built carrier is expected to start in about 2017.

0 + 1 MODIFIED KIEV CLASS (PROJECT 1143.4) (CVGM)

Name	Builders	Laid down	Launched	Commissioned
VIKRAMADITYA (ex-Admiral Gorshkov, ex-Baku)	Nikolayev South	17 Feb 1978	1 Apr 1982	11 Jan 1987
Displacement, tons: 45,400 full load Dimensions, feet (metres): 928 5 oa, 818.6 wl x 167.3 oa, 107.3 wl x 32.8 (283; 249.5 x 51; 32.7 x 10) Main machinery: 8 KWG4 boilers; 4 GTZA 674 turbines; 200,000 hp(m) (147 MW); 4 shafts Speed, knots: 29 Range, n miles: 13,800 at 18 kt Complement: 1,200 plus aircrew	Navigation, Aircraft control Sonars: Horse Jaw (MG 355); hull-mounted; active search; medium frequency. Fixed-wing aircraft: 12 MiG 29K. Helicopters: 6 Helix 27/28/31.	years and that the ship would not enter service until 2012. This may still prove to be optimistic. Agreement to fund cost overruns was reached in December 2008. Modernisation: New propulsion, power and air conditioning systems removed and to be replaced by six Kashtan SAM/gun systems. The flight deck is to be converted to a STOBAR configuration with a 14.3° ski-jump. Structure: The ship has a 198 m angled deck with three arrestor wires. Flight deck lifts are 19.2 x 10.3 m and 18.5 x 4.7 m, and can lift 30 tons (aft) and 20 tons (midships) respectively. The hangar is 130 x 22.5 m. Operational: The ship was re-launched on 4 December 2008. Sea trials are expected to start in 2011. The ship is to be based at Karwar.		
Missiles, SAM/Guns: To be announced Countermeasures: Decoys: 2 PK2 chaff launchers; 2 towed torpedo decoys. ESM/ECM: Bharat intercept and jammers. Combat data systems: Lesorub E. Radars: Air search: Plate Steer Surface search, 2 Strut Pair	Programmes: Last of the four Project 1143.4 aircraft carriers built for the Soviet Navy. First offered for sale to India by Russia in 1994. By 1999 the proposal was to gift the ship as long as India pays for the refit. Following a Government to Government agreement on 4 October 2000 and protracted negotiations, contract signed on 20 January 2004 for a five-year refit at a cost estimated to be USD625 million. However, it was announced in August 2007 that the refit had been delayed by three

1 HERMES CLASS (CVM)

Name	No	Builders	Laid down	Launched	Commissioned
VIRAAAT (ex-Hermes)	R 22	Vickers Shipbuilding Ltd, Barrow-in-Furness	21 June 1944	16 Feb 1953	18 Nov 1959

Displacement, tons: 23,900 standard, 28,700 full load
Dimensions, feet (metres): 685 wl; 744.3 oa x 90; 160 oa x 28.5 (208.8; 226.9 x 27.4; 48.8 x 8.7)
Main machinery: 4 Admiralty boilers; 400 psi (28 kg/cm²); 700°F (370°C); 2 Parsons geared turbines; 76,000 hp (57 MW); 2 shafts
Speed, knots: 28
Complement: 1,350 (143 officers)

Missiles: SAM/Guns: 2 Octuple IAI/Rafael Barak 1 VLS ●, command line of sight radar or optical guidance to 10 km (5.5 n miles) at 2 Mach; warhead 22 kg
Guns: 4 – 30 mm/65 (2 twin) AK 230 ●; 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg
Countermeasures: Decoys: 2 Knebnorth Corvus chaff launchers ●
ESM: Bharat Ajanta; intercept ●
Combat data systems: CAAIS action data automation, SATCOM
Radars: Air search: Bharat RAWL-02 Mk 3 (LW08) ●, D-band.
 Air/surface search: Bharat RAWS (PFN 513) ●; E/F-band.
 Fire control: IAI/Elta EL/M-2221 ●; Ka-band.
 Navigation: 2 Bharat Rashmi ●; I-band.
 Tacan: FT 13-S/M
Sonars: Graseby Type 184M, hull-mounted; active search and attack; 6-9 kHz.

Fixed-wing aircraft: 12 Sea Harriers FRS Mk 51 ● (capacity for 30)

Helicopters: 7 Sea King Mk 42B/C ● ASW/ASV/Vertrep and Ka-27 Helix, Ka-31 Helix.

Programmes: Purchased in May 1986 from the UK, thence to an extensive refit in Devonport Dockyard. Commissioned in Indian Navy 20 May 1987.

Modernisation: UK refit included new fire-control equipment, navigation radars and deck landing aids. Boilers were converted to take distillate fuel and the ship was given improved NBC protection. New search radar in 1995. Further modernisation in 1999-2001 refit, improved indigenous RAWL 02 (Mk II) and Rashmi radars for CCA/navigation, EW equipment and new communications systems. A further refit, completed in December 2004, included installation of Barak CIWS. This has replaced the previously fitted 40 mm guns. A further refit, to extend ship-life to 2012, was completed in 2008.

Structure: Fitted with 12° ski jump. Reinforced flight deck (0.75 in); 1 to 2 in of armour over magazines and machinery spaces. Four LCVP on after davits. Magazine capacity includes 80 lightweight torpedoes. Barak launchers are recessed in the starboard side of the flight deck, aft of the island.

Operational: The Sea Harrier complement is likely to be of the order of six aircraft leaving room for a greater mix of Sea King and Helix helicopters. Based at Mumbai.

0 + 1 INDIGENOUS AIRCRAFT CARRIER CLASS (PROJECT 71) (CVM)

Name	No	Builders	Laid down	Launched	Commissioned
VIKRANT	—	Kochi Shipyard Ltd	28 Feb 2009	2013	2015

Displacement, tons: 37,500 standard
Dimensions, feet (metres): 826.8 × 190.3 × 27.5 (252.0 × 58.0 × 8.4)
Main machinery: COGAG: 4 General Electric LM 2500 gas turbines; 120,000 hp (89.5 MW); 2 shafts; cp props
Speed, knots: 28
Range, n miles: 7,500 at 18 kt
Complement: 1,400 (180 officers)

Helicopters: 10 Ka-31 and ALH
Programmes: The plan announced in 1989 was to build two new aircraft carriers. The Indigenous Aircraft Carrier (IAC), formerly the Air Defence Ship (ADS), is to replace the former *Vikrant* (and will probably receive the same name) while *Vikramaditya* (ex-Admiral Gorshkov) is to replace *Viraat* in 2012. A number of international companies including DCN, IZAR and Fincantieri are believed to have been involved in conceptual and design work of the ADS and it is understood that the shipbuilder, Cochin Shipyard Ltd (CSL), has sub-contracted specialist 'task forces' to collaborate in building the ship. Two contracts signed in mid-2004 with Fincantieri to finalise the ADS design and its ancillary propulsion systems and main power plants. Fincantieri is likely to provide further assistance during the vessel's construction, tests and sea trials. First steel cut on 11 April 2005 and construction of building blocks started thereafter. However the project has been afflicted by delays, including reported problems in acquiring sufficient high-quality steel.
Structure: All details are still speculative and the diagrams show an indicative design including a short take off (with 14° ski jump) and arrested recovery (STOVAR) system. The ADS is to have a similar propulsion system as the *Cavour* being built for the Italian Navy.
Operations: The ship is to be based on the east coast possibly at a new base.

Missiles: SAM: To be announced.
Guns: CIWS: To be announced
Radars: Air search; surface search, fire control.
Sonars: Hull mounted
Fixed-wing aircraft: 12 MiG-29K.

PROJECT 71

PROJECT 71

(Scale 1 : 1,500), Ian Sturton / 1353093

DESTROYERS

0 + 3 (4) KOLKATA (PROJECT 15A) CLASS (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
KOLKATA	—	Mazagon Dock Ltd, Mumbai	26 Sep 2003	30 Mar 2006	2011
—	—	Mazagon Dock Ltd, Mumbai	25 Oct 2005	2009	2012
—	—	Mazagon Dock Ltd, Mumbai	2006	2011	2013

Displacement, tons: 7,000 full load
Dimensions, feet (metres): 534.8 × 67.1 × 21.3 (163 × 17.4 × 6.5)
Main machinery: 4 Zorya/Mashproekt DT-59 gas turbines; 82,820 hp (61.7 MW); 2 shafts; cp props
Speed, knots: 32. **Range, n miles:** 4,500 at 18 kt
Complement: 360 (40 officers)

Missiles: SSM: 16 Brahmos PJ-10 (2 octuple VLS) ●; active/passive radar homing to 280 km (157 n miles) at 2.5 Mach; warhead 200 kg; sea skimmer in terminal phase.
 SAM: IAI/Rafael Barak 2/8 ●. 1 × 16 cell VLS launcher (forward), 1 × 32 cell VLS launcher (aft), total of 48 missiles
 4 octuple IAI/Rafael Barak 1 VLS, command line of sight or optical guidance to 10 km (5.5 n miles) at 2 Mach; warhead 22 kg.
SAM/Guns: 2 CADS-N-1 (Kashtan) (may replace AK 630); each has twin 30 mm Gatling combined with 8 SA-N-11 (Grison) and Hot Flash/Hot Spot radar/optronic director.

Laser beam guidance for missiles to 8 km (4.4 n miles); warhead 9 kg; 9,000 rds/min (combined) to 1.6 km for guns.

Guns: 1—3.9 in (100 mm) 59 A 190E ●; 60 rds/min to 21.5 km (11.6 n miles); weight of shell 16 kg
 2—30 mm AK 630 ●; 6 barrels per mounting, 3,000 rds/min combined to 2 km

Torpedoes: 5 PTA 21 in (533 mm) (quin) tubes ●
 Combination of SET 65E; anti-submarine, active/passive homing to 15 km (8.1 n miles) at 40 kt; warhead 205 kg and Type 53-65, passive wake homing to 19 km (10.3 n miles) at 45 kt; warhead 305 kg.

A/S mortars: 2 RBU 6000 ●; 12 tubed trainable; range 6,000 m; warhead 31 kg.
Countermeasures: Decoys: 2 PK2 chaff launchers ●. Towed torpedo decoy.

ESM: Bharat Ajanta Mk 2; intercept.
ECM: Electronics TQN-2, jammer.
Combat data systems: CAIO 15A.
Radars: Air search, Bharat RAWL-02 Mk 3 (LW08) ●; D-band

Air/surface search: EL/M-2238 STAR; 3D; E/F-band ●.
Fire control: ELTA EL-M 2221 STGR, I/J/K-band (for SAM) ●; Ratep 5P-10E Puma; I-band (for 100 mm); Plank Shave (Granit Garpun B) (for SSM) ●; I/J-band
Navigation: Kelvin Hughes Nucleus 6000; E/F-band.
Sonars: 2 Nyada MR-212/201; I-band
Sonars: Bharat HUMSA, hull-mounted; medium frequency. Towed array (to be confirmed).

Helicopters: 2 Westland Sea Kings Mk 42B ● or 2 Hindustan Aeronautics ALH

Programmes: The first of three modified Delhi class was laid down in 2003 but progress since her launch in 2006 has been very slow. Four further ships are to be ordered under Project 15B.

Structure: Designed by the Indian Naval Design Bureau, the design appears to be a development of the Delhi class incorporating some features of both the Talwar and Project 17 frigates.

PROJECT 15A

Dimensions, feet (metres): 480.5 × 51.8 × 15.7
(146.5 × 15.8 × 4.8)

Main machinery: COGAG; 4 Ukraine gas turbines,
72,000 hp(m) (53 MW); 2 shafts
Speed, knots: 35
Range, n miles: 4,500 at 18 kt; 2,600 at 30 kt
Complement: 320 (35 officers)

Missiles: SSM: 2 (D 51) or 4 SS-N-2D Mod 2 Styx (D 52, 53) ●,
IR homing to 83 km (45 n miles) at 0.9 Mach; warhead
513 kg; sea-skimmer.

4 (D 51) or 8 (D 54, 55) Brahmos PJ-10, active/passive
radar terminal homing to 290 km (157 n miles) at 2.6
Mach, warhead 200 kg

SAM: 2 (D 51, 52, 53) or 1 (D 54, 55) SA-N-1 Goa twin
launchers ●, command guidance to 31.5 km (17 n miles)
at 2 Mach; height 91–22, 860 m (300–75,000 ft); warhead
60 kg, 44 missiles. Some SSM capability.
2 octuple IAI/Rafael Barak 1 VLS (D 54, D 55); command
line of sight radar or optical guidance to 10 km (5.5 n miles)
at 2 Mach; warhead 22 kg

Guns: 2–3 in (76 mm)/59 AK 726 (twin, fwd) ●, 90 rds/min
to 16 km (8.5 n miles); weight of shell 5.9 kg.
8–30 mm/65 (4 twin) AK 230 (D 51, 52, 53) ●, 500 rds/
min to 5 km (2.7 n miles); weight of shell 0.54 kg.
2–30 mm/65 AK 630 (6 barrels per mounting) (D 54, 55);
3,000 rds/min combined to 2 km.

Torpedoes: 5–21 in (533 mm) (quin) tubes ● Combination
of SET-65E, anti-submarine; active/passive homing to
15 km (8.1 n miles) at 40 kt, warhead 205 kg and Type
53-65; passive wake homing to 19 km (10.3 n miles) at
45 kt; warhead 305 kg.

A/S mortars: 2 RBU 6000 12-tubed trainable ●, range
6,000 m, warhead 31 kg

Countermeasures: 4 PK 16 chaff launchers for radar decoy
and distraction.

ESM: Bharat Ajanta Mk 2; intercept.

ECM: Elettronica TQN 2; jammer.

Radars: Air search: Big Net A (D 51, 54–55) ●, C-band; range
183 km (100 n miles) for 2 m² target.
Bharat/Signal RAWL-02 Mk 2 (LW04) (D 52, 53);
D band.

Air/surface search: Head Net C (D 51–54) ●, 3D, E-band.
EL/M-2238 STAR (D 54, 55), 3D, E/F-band.

Navigation: 2 Bharat Rashmi; I-band.

Fire control: 2 Peel Group ●, H/I-band; range 73 km (40 n
miles) for 2 m² target.

Owl Scream ●, G-band.

2 Drum Tilt ● or 2 Bass Tilt; H/I-band or 2 EL/M-2221
STGR, I/J/K-band.

IFF: 2 High Pole B

Sonars: Vycheda MG 311 (D 51, 52, 55); hull-mounted;
active search and attack; medium frequency.

Mare Tail VDS; active search; medium frequency.

RANA

(Scale 1 : 1,200), Ian Sturton / 0506295

RANJIT

10/2004, Toshiyuki Hants / 1042765

Bharat Humsa (D 53, 54), hull-mounted; medium
frequency.

Helicopters: 1 Ka-28 Helix ●.

Programmes: First batch of three ordered in the mid-1970s.

Ranvir was the first of the second batch ordered on
20 December 1982.

Modernisation: New EW equipment installed on all ships
refitted since 1993. It is possible that an Italian combat
data system compatible with Selenia IPN-10 has been
installed. D 51, 54 and 55 have undergone extensive
modernisation since 2003. This includes installation of
Brahmos SSM and Barak SAM. EL/M 2238 STAR search
radar has replaced Head Net C in D 55 and is likely to be
fitted to other ships. All ships are Inmarsat fitted.

Structure: Originally built to a modified Kashin-class
design, the ships are equipped with a helicopter hangar.

reached by a lift from the flight deck, to replace the
after 76 mm twin mount. Recent modifications have
led to some differences in structure. While D 52 and
D 53 remain unmodified, four Brahmos missile launchers
have replaced the forward SS-N-2D mountings in
D 51 while, in D 54 and D 55, an 8-cell Brahmos VLS
system has been installed in lieu of the aft SA-N 1
launcher. D 54 and D 55 have also been fitted (port
and starboard) with two octuple VLS silos for Barak
SAM and associated EL/M-2221 STGR fire-control
radars. These silos are in place of the forward AK-630
mountings. D 52 and D 53 may be similarly fitted in due
course.

Operational: All based at Vishakapatnam. Dhanush
(Prithvi) ballistic missile test launched from Rajput on
28 December 2005. Vertical launch of Brahmos was
conducted from Ranvir on 18 December 2008.

3 DELHI CLASS (PROJECT 15) (DDGHM)

Name	No	Builders	Laid down	Launched	Commissioned
DELHI	D 61	Mazagon Dock Ltd, Mumbai	14 Nov 1987	1 Feb 1991	15 Nov 1997
MYSORE	D 60	Mazagon Dock Ltd, Mumbai	2 Feb 1991	4 June 1993	2 June 1999
MUMBAI	D 62	Mazagon Dock Ltd, Mumbai	14 Dec 1992	20 Mar 1995	22 Jan 2001

Displacement, tons: 6,700 full load
 Dimensions, feet (metres): 534.8 x 57.1 x 21.3
 (163 x 174 x 6.5)

Main machinery: 4 Zorya/Mashprockt DT-59 gas turbines;
 82,820 hp(m) (61.7 MW); 2 shafts, cp props
 Speed, knots: 32
 Range, n miles: 4,500 at 18 kt
 Complement: 360 (40 officers)

Missiles: SSM: 16 Zvezda SS-N-25 (4 quad) (KH 36E Uran) ●
 active radar homing to 130 km (70.2 n miles) at 0.9 Mach,
 warhead 145 kg, sea skimmer.

SAM: 2 SA-N-7 Gadfly (Kashmir/Urgan) ● command,
 semi-active radar and IR homing to 25 km (13.5 n miles)
 at 3 Mach, warhead 70 kg. Total of 48 missiles.

4 Octuple IAI/Rafael Barak 1 VLS (D 60, D 61) ●; command
 line of sight radar or optical guidance to 10 km (5.5 n
 miles) at 2 Mach; warhead 22 kg.

Guns: 1 USSR 3.9 in (100 mm)/59 ●. AK 100; 60 rds/min to
 21.5 km (11.5 n miles); weight of shell 15.6 kg.
 4 (2 in D 61) USSR 30 mm/65 ● AK 630; 6 barrels per
 mounting; 3,000 rds/min combined to 2 km.

Torpedoes: 5 PTA 21 in (533 mm) (quin) tubes ●.
 Combination of SET 65E, anti-submarine; active/passive
 homing to 15 km (8.1 n miles) at 40 kt; warhead 205 kg
 and Type 53-65; passive wake homing to 19 km (10.3 n
 miles) at 45 kt; warhead 305 kg.

A/S mortars: 2 RBU 6000 ●; 12 tubed trainable; range
 6,000 m; warhead 31 kg.

Depth charges: 2 rails.

Countermeasures: Decoys: 2 PK2 chaff launchers ●. Towed
 torpedo decoy.

ESM: Bharat Ajanta Mk 2; intercept.

Combat data systems: Bharat IPN Shikari (IPN 10).

Radars: Air search: Bharat RAWL-02 Mk 3 (LW08) (D 60),
 Bharat RAWL-02 Mk 2 (LW04) (D 61, D 62) ●; D-band.

Air/surface search: Half Plate ●; E-band.

Fire control: 6 Front Dome ●; H/I-band (for SAM); Kite
 Screech ●; I/J-band (for 100 mm); 2 Bass Tilt (MR-123)
 (D 62); I/J-band (for AK 630), EL/M-2221 STGR (D 60, D 61) ●
 (for Barak); I/J/K-band; Plank Shave (Granit Garpun B) ●
 (for SSM); I/J-band.

Navigation: 3 Nyada MR-212/201; I-band.

Sonars: Bharat HUMVAD; hull-mounted; active search;
 medium frequency.

Bharat HUMSA; hull-mounted; medium frequency (D 62).

Indal/Gardner Reach Model 15-750 VDS

Thales ATAS; active towed array (D 62).

Helicopters: 2 Westland Sea Kings Mk 42B ● or 2 Hindustan
 Aeronautics ALH.

DELHI

(Scale 1 : 1,500), Ian Sturton / 05/7398

DELHI (before being fitted with Barak)

2/2001, Sattler/Steale / 0121369

Programmes: Built with Russian Severmoye Design Bureau
 assistance. Delhi ordered in March 1986. Programme was
 called Project 15. Much delay was caused by the breakdown
 in the central control of Russian export equipment.

Structure: The design is described as a 'stretched Rajput'
 with some Godavari features. A combination of Russian
 and Indian weapon systems fitted. Missile blast deflectors
 indicate an original intention to fit SS-N-22 Sunburn.

Samehe helo handling system. Forward funnel offset to
 port and after funnel to starboard.

Modernisation: Barak has replaced the forward AK-630
 mountings in D 60 and D 61. The two Bass Tilt radars
 have also been replaced by EL/M-2221 STGR. D 62 is
 to be similarly refitted. SS-N-25 may be replaced by
 Brahmos.

Operational: Based at Mumbai. Have Flag facilities.

FRIGATES

Notes: Project 17A is for a new class of warships to complement or succeed the Project 17 Shivalik class. A Request for Information (RFI) was issued to European and Russian shipyards in December 2006 for the procurement of seven frigates, one or more of which might be built in a foreign shipyard and remaining ships in India. The initiative is reported to have been prompted by concerns about the ability of Indian shipyards to meet projected force levels.

3 + 3 (3) TALWAR (PROJECT 1135.6) CLASS (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned

-	-	Yantar Shipyard, Kaliningrad	11 June 2008	2010	2012

Displacement, tons: 3,820 standard, 4,035 full load
Dimensions, feet (metres): 409.6 x 49.9 x 15.1
(124.8 x 15.2 x 4.6)

Main machinery: COGAG, 2 Zorya DN-59 gas turbines, 43,448 hp/m (34.2 MW); 2 Zorya UGT 6000 gas turbines; 16,628 hp/m (12.4 MW); 2 shafts; fixed propellers

Speed, knots: 32

Range, n miles: 4,850 at 14 kt; 1,600 at 30 kt

Complement: 180 (18 officers)

Missiles: SSM 8 SS-N-27 Novator Alfa Klub-N (Batch 1) (3K-54-TE) active radar homing to 180 km (97.2 n miles) at 0.7 Mach (cruise) and 2.5 Mach (attack); warhead 450 kg. 8 Brahmos PJ-10 (Batch 2); active/passive radar terminal homing to 290 km (157 n miles) at 0.9 Mach, warhead 513 kg. VLS silo.

SAM: SA-N-7 Gadfly (Kashmir/Uragan) single launcher command, semi-active radar and IR homing to 25 km (13.5 n miles) at 3 Mach; warhead 70 kg. 24 9M 317 missiles.

SAM/Guns: 2 CADS-N-1 (Kashtan) each has twin 30 mm Gatling combined with 8 SA-N-11 (Grison) and Hot Flash/Hot Spot radar/optronic director. Laser beam guidance for missiles to 8 km (4.4 n miles) warhead 9 kg; 9,000 rds/min (combined) to 1.5 km for guns.

Guns: 1-3.9 in (100 mm) 70 A 190E, 80 rds/min to 21.5 km (11.6 n miles); weight of shell 15.6 kg.

Torpedoes: 4 DTA-53 21 in (533 mm) (2 twin) fixed launchers.

A/S mortars: 1 RBU 6000 12-barrelled launcher range 6 km; warhead 31 kg.

Countermeasures: Decoys: 2 PK 2 chaff launchers (to be fitted).

ESM ASOR (TK 25E 5), jammer.

Combat data systems: Trebovaniye-M.

Radars: Air search: Top Plate (Fregat-M2EM) 3D; E/F-band. Air/surface search: Cross Dome (Positiv-E) E; E/F-band.

TALWAR I

(Scale 1 : 1,200, Ian Sturton / 1186841)

TALWAR II

(Scale 1 : 1,200, Ian Sturton / 1186840)

Fire control: 4 Front Dome (MR-90) H/I-band (for SA-N-7). Plank Shave (Garpun-B) I/J-band (for SSM). Ratep 5P-10E Puma I-band (for 100 mm gun).

Navigation: Kelvin Hughes Nucleus 6000 E/F-band. 2 Nyada MR 212/201 (Palm Frond) I-band.

Sonars: HUMSA; hull mounted, active/passive medium frequency.

VDS (may be fitted in future).

Helicopters: 1 Ka-28/Ka-31 Helix or ALH.

Programmes: Contract placed in 1997 and confirmed 21 July 1998 for the first batch of three modified Krivak IIIs.

Mutual interference difficulties reportedly delayed entry into service of first of class by one year. An option for a second batch of three ships was exercised on 14 July 2006. Construction at Yantar Shipyard, Kaliningrad, started in July 2007. The first ship is to be delivered after five years and the other two ships at six-month intervals thereafter. Negotiations for the procurement of three Batch 3 ships began in early 2009.

Structure: Batch 1 are the first surface units to be fitted with the SS-N-27 missile. This may be replaced by the Brahmos missile in Batch 2.

SHIVALIK

ECM ASOR (TK 25E-5); jammer.

Combat data systems: BEL EMCCA.

Radars: Air search: Bharat RAWL-02 Mk 3 (LW08) ●.

E/F-band.

Air/surface search: Top Plate (Fregat-M2EM) ● 3D; D/E-band.

Fire control: 2 BEL Shukri (based on Contraves Seaguard) ● (for 76 mm); I/K-bands.

1 Bharat Aparna (modified Plank Shave/Garpun B) ● (for SSMs); I/J-bands.

4 Front Dome (MR 90) ● (for SA-N-7); H/I-band.

Navigation: 1 BEL Rashmi; I-band.

Sonars: Bharat HUMSA; hull-mounted; active search and attack, medium frequency.

VDS; active search; medium frequency.

(Scale 1 : 1,200), Ian Sturton / 056924/

Helicopters: 1 Sea King Mk 42B ●.

Programmes: Three Project 17 ships approved in June 1999 and construction of the first of class began in 2001. Initially, building was rapid but the production process has taken much longer than first estimates. While Project 17A for seven follow-on ships has been initiated, these may be to a different design.

Structure: An enlarged and modified version of the Talwar class, the aft section resembles the Delhi class. Signature reduction (IR and RCS) features are believed to be incorporated. Details are speculative.

Operational: Sea trials of *Shivalik* are planned to have started by mid-2009.

3 GODAVARI CLASS (PROJECT 16) (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned
GODAVARI	F 20	Mazagon Dock Ltd, Mumbai	2 June 1978	15 May 1980	10 Dec 1983
GOMATI	F 21	Mazagon Dock Ltd, Mumbai	1981	19 Mar 1984	15 Apr 1988
GANGA	F 22	Mazagon Dock Ltd, Mumbai	1980	21 Oct 1981	30 Dec 1985

Displacement, tons: 4,209 full load

Dimensions, feet (metres): 414.9 x 47.6 x 14.8 (29.5 sonar)
(126.5 x 14.5 x 4.5; 9)

Main machinery: 2 Babcock & Wilcox boilers; 550 psi (38.7 kg/cm²); 850°F (450°C); 2 turbines; 30,000 hp (22.4 MW); 2 shafts

Speed, knots: 28

Range, n miles: 4,500 at 12 kt

Complement: 313 (40 officers including 13 aircrew)

Missiles: SSM: 4 SS-N-2D Styx ●; active radar (Mod 1) or IR (Mod 2) homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg, sea-skimmer at end of run. Indian designation.

SAM: 1 Octuple IAI/Rafael Barak VLS ●; command line of sight radar or optical guidance to 10 km (5.5 n miles) at 2 Mach; warhead 22 kg.

Guns: 1 OTO Melara 76 mm/62 Super Rapid ●; 120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg.

8—30 mm/65 (4 twin) AK 230 ●, 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg.

2—7.63 mm MGs.

Torpedoes: 6—324 mm ILAS 3 (2 triple) tubes ●. Whitehead A244S, anti-submarine; active/passive homing to 7 km (3.8 n miles) at 33 kt; warhead 34 kg (shaped charge).

Godavari has tube modifications for the Indian NST 58 version of A244S.

Countermeasures: Decoys: 2 chaff launchers (Super Barricade). Graseby G738 towed torpedo decoy.

ESM/ECM: Selenia INS-3 (Bharat Ajanta and Elettronica TQN-2); intercept and jammer.

Combat data systems: Selenia IPN-10 action data automation. Inmarsat communications (JRC) ●.

Weapons control: MR 301 MFCS. MR 103 GFCS.

Radars: Air search: Bharat RAWL-02 Mk 3 (LW08) ●; D-band.

Air/surface search: EL/M-2238 STAR ●, 3D; E/F-band.

Navigation/helo control: 2 Signal ZW06 ●; or Don Kay, I-band.

Fire control: 2 Drum Tilt ●; H/I-band (for 30 mm).

EL/M-2221 STGR ●, I/J/K-band.

Bel Lynx ●, I band (for 76 mm).

Sonars: Bharat APSOH; hull-mounted; active panoramic search and attack; medium frequency.

GANGA

(Scale 1 : 1,200), Ian Sturton / 1166539

GANGA

Fathoms Oceanic VDS. Thomson Sintra DSBV 62 (in *Ganga*); passive towed array; very low frequency. Type 162M; bottom classification; high frequency.

Helicopters: 2 Sea King or 1 Sea King and 1 Chetak ●.

Modernisation: Barak launchers have replaced SA-N-4 in all three ships. 57 mm gun has been replaced by OTO Melara 76 mm.

Structure: A further modification of the original Leander design with an indigenous content of 72 per cent and a larger hull. Poor welding is noticeable in *Godavari*. *Gomati* is the first Indian ship to have digital electronics in her combat data system.

Operational: French Samahé helicopter handling equipment is fitted. Usually only one helo is carried with more than one crew. These ships have a unique mixture of Russian, Western and Indian weapon systems which has inevitably led to some equipment compatibility problems.

Dimensions, feet (metres): 372 x 38.1 (F 35-F 36); 44.3 (F 41 and F 42) x 18 (113.5 x 11; 13.5 x 5.5)

Main machinery: 2 Babcock & Wilcox boilers; 550 psi (38.7 kg/cm²); 850°F (450°C); 2 turbines; 30,000 hp (22.4 MW); 2 shafts

Speed, knots: 27, 28 (F 41 and F 42)

Range, n miles: 4,500 at 12 kt

Complement: 267 (17 officers), 300 (20 officers) (F 41 and F 42)

Guns: 2 Vickers 4.5 in (114 mm)/45 (twin) Mk 8 ●; 20 rds/min to 19 km (10.4 n miles) anti-surface; 6 km (3.3 n miles) anti-aircraft, weight of shell 25 kg (4–30 mm/65 (2 twin) AK 230 ●; 500 rds/min to 5 km (2.7 n miles); weight of shell 0.54 kg
2 Oerlikon 20 mm/70 ●; 800 rds/min to 2 km.

Torpedoes: 6–324 mm ILAS 3 (2 triple) tubes (F 41 and F 42) ●. Whitehead A244S or Indian NST 58 version; anti-submarine, active/passive homing to 7 km (3.8 n miles) at 33 kt, warhead 34 kg (shaped charge)

A/S mortars: 1 Bofors 375 mm twin-tubed launcher (F 41 and F 42) ●; range 1,800 m.
1 Limbo Mk 10 triple-tubed launcher (remainder); range 1,000 m; warhead 92 kg.

Countermeasures: Decoys: Graseby 738; towed torpedo decoy.

ESM: Bharat Ajanta; intercept, FH5 Telegon D/F.
ECM: Racal Cutlass; jammer.

Combat data systems: Signaal DS-22.

VINDHYAGIRI

(Scale 1 : 1,200), Ian Sturton / 1042089

Radars: Air search: Bharat RAWL-02 Mk 2 (LW04) ●; D-band. Air/surface search. Signaal DA 05 ●; E/F-band.
Navigation: Signaal ZW 06, I-band.
Fire control: Signaal M 45 ●; I/J-band.
IFF Type 944; 954M.

Sonars: Westinghouse SQS-505; hull-mounted; active search and attack; medium frequency. Type 170; active attack; high frequency.
Westinghouse VDS (F 36 only), active; medium frequency. Thomson Diodon VDS in F 41 and F 42.

Helicopters: 1 Chetak or 1 Sea King Mk 42 (in *Taragiri* and *Vindhya giri*) ●.

Programmes: The first major warships built in Indian yards to a UK design with a 60 per cent indigenous component. An ex-UK Leander class was acquired in 1995 and is listed under Training Ships.

Modernisation: The VDS arrays are installed inside towed bodies built by Fathom Oceanology Ltd of Canada. The transducer elements in both cases are identical. AK 230 guns have replaced the obsolete Seacat. *Vindhya giri* modified with UAV control stations above the hangar in order to operate Heron II UAVs.

Structure: In the first two the hangar was provided with telescopic extension to take the Alouette III helicopter while in the last pair, a much-changed design, the Mk 10 Mortar has been removed as well as VDS and the aircraft space increased to make way for a Sea King helicopter with a telescopic hangar and Canadian Beartrap haul-down gear. In these two an open deck has been left below the flight deck for handling mooring gear and there is a cut-down to the stern.

Operational: *Himgiri* was decommissioned on 6 May 2005 and *Udaygiri* in 2007.

KARMAK	P 64	Garden Reach SY, Kolkata/Mazagon Dock	27 Aug 1997	6 Apr 2000	4 Feb 2004

Displacement, tons: 1,480 full load
Dimensions, feet (metres): 298.9 x 34.4 x 14.8 (91.7 x 10.5 x 4.5)
Main machinery: 2 SEMT-Pielstick/Kirloskar 18 PA6 V 280 diesels; 14,400 hp(m) (10.58 MW) sustained; 2 shafts; 1 PS cp props
Speed, knots: 25
Range, n miles: 4,000 at 16 kt
Complement: 134 (14 officers)

(Scale 1 : 900), Ian Sturton / 0064715

Missiles: SSM. 8 Zvezda SS-N-25 (2 quad) (Kh 35E Uran) ●; active radar homing to 130 km (70.2 n miles) at 0.9 Mach; warhead 145 kg, sea skimmer.
SAM: 2 SA-N-5 Grail ●; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg.
Guns: 1 USSR 3 in (76 mm)/59 AK 176 (P 61) ●, 120 rds/min to 15 km (8.0 n miles); weight of shell 5.9 kg 1 Otobreda 76 mm/62 (P 62, P 63 and P 64).
 2-30 mm/65 AK 630 ●; 6 barrels per mounting; 3,000 rds/min to 2 km
Countermeasures: Decoys: 2 PK 10 chaff launchers ● 2 BEL TOTED; towed torpedo decoys.
ESM: Bharat Ajanta P Mk II intercept ●

KORA
Combat data systems: Bharat Vympal IPN-10.
Radars: Air search: Cross Dome ●; E/F-band; range 130 km (70 n miles).
Air/surface search: Plank Shave (Granit Harpun B) ●; I/J-band.
Fire control: Bass Tilt (P 61) ●; H/I-band; BEL Lynx (P62-64); band
Navigation: Bharat 1245; I-band.
IFF: Square Head.
Helicopters: Platform only ● for Chetak (to be replaced by Hindustan Aeronautics ALH in due course)

Programmes: First pair ordered in April 1980 and second pair in October 1994. Programme slowed by delays in provision of Russian equipment and it is not clear whether further vessels are to be built.
Structure: Very similar to the original Khukri class except that SS-N-25 has replaced SS-N-2. Stabilisers fitted
Operational: Sea trials for Kirch and Kulish probably took place in 2000. All 16 SS-N-25 can be fired in one salvo.

KIRCH

3/2004, Bob Fildes / 1047713

KULISH

10/2008, Michael Nitz / 1353088

4 KHUKRI CLASS (PROJECT 25) (FSGHM)

Name	No	Builders	Laid down	Launched	Commissioned
KHUKRI	P 49	Mazagon Dock Ltd, Mumbai	27 Sep 1985	3 Dec 1986	23 Aug 1989
KUTHAR	P 46	Mazagon Dock Ltd, Mumbai	13 Sep 1986	15 Apr 1989	7 June 1990
KIRPAN	P 44	Garden Reach SY, Kolkata	16 Nov 1985	16 Aug 1988	12 Jan 1991
KHANJAR	P 47	Garden Reach SY, Kolkata	15 Nov 1985	16 Aug 1988	22 Oct 1991

Displacement, tons: 1,423 full load
 Dimensions, feet (metres): 298.9 x 34.4 x 13.1
 (91.1 x 10.5 x 4)

Main machinery: 2 SEMT-Pielstick/Kirloskar 18 PA6 V 280 diesels; 14,400 hp(m) (10.58 MW) sustained; 2 shafts, LIPS cp props

Speed, knots: 24

Range, n miles: 4,000 at 16 kt

Complement: 112 (12 officers)

Missiles: SSM: 4 SS-N-2D Mod 1 Styx (2 twin) launchers ●; IR homing to 83 km (45 n miles) at 0.9 Mach; warhead 513 kg

SAM: SA-N-5 Grail ●; manual aiming; IR homing to 6 km (3.2 n miles) at 1.5 Mach; altitude to 2,500 m (8,000 ft); warhead 1.5 kg.

Guns: 1 USSR 3 in (76 mm)/59 AK 176 ●; 120 rds/min to 15 km (8.0 n miles); weight of shell 5.9 kg. 2 - 30 mm/65 AK 630 ●; 6 barrels per mounting; 3,000 rds/min to 2 km

Countermeasures: Decoys: 2 PK 18 chaff launchers ●.

ESM: Bharat Ajanta P; intercept.

Combat data systems: Seenia IPN-10 (Khukri); Bharat Vympal IPN-10 (remainder).

KHUKRI

Radars: Air search: Cross Dome ●; E/F-band; range 130 km (70 n miles).

Air/surface search: Plank Shave ●; I-band.

Fire control: BassTilt ●; H/I-band.

Navigation: Bharat 1245; I-band.

Helicopters: Platform only ● for Chetak (to be replaced by HAL Dhruv in due course).

Programmes: First two ordered December 1983, two in 1985. The diesels were assembled in India under licence

by Kirloskar. Indigenous content of the whole ship is about 65 per cent.

Structure: The reported plan was to make the first four ASW ships, and the remainder anti-aircraft or general purpose. However *Khukri* has neither torpedo tubes nor a sonar (apart from an Atlas Elektronik echo-sounder), so if the plan is correct these ships will rely on an ALH helicopter which has dunking sonar and ASW torpedoes and depth charges. All have fin stabilisers and full air conditioning.

Operational: All based at Vishakhapatnam

(Scale 1 : 900), Ian Sturton / 0064713

0 + 4 (8) PROJECT 28 (CORVETTES) (FFG)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	Garden Reach Shipbuilding & Engineering, Kolkata	18 Nov 2006	2009	2010
-	-	Garden Reach Shipbuilding & Engineering, Kolkata	27 Sep 2007	2010	2011

Displacement, tons: 2,500 full load
Dimensions, feet (metres): 358.3 × 48.5 × 7.0
(109.2 × 14.17 × 3.72)

Main machinery: CODAD: 4 Pielstick 12PA 6 STC diesels;
22,030 hp (16.2 MW); 2 shafts; cp props
Speed, knots: 25
Range, n miles: 4,000 at 12 kt
Complement: 123

Missiles: SSM: SS-N-27 Novator Alfa Klub-N (3K-54-TE),
active radar homing to 220 km (119 n miles) at
0.7 Mach (cruise) and 2.5 Mach (dive); warhead 450 kg;
VLS s/w.

SAM: 1-16 cell IAI/Rafael Barak VLS; command line of
sight radar or optical guidance to 10 km (5.5 n miles) at
2.0 Mach; warhead 22 kg.

Guns: 1 Otobreda 3 in (76 mm)/62 Super Rapid; 120 rds/
min to 16 km (8.7 n miles); weight of shell 6 kg
2—30 mm/65 AK 630; 6 barrels per mounting; 3,000 rds/
min combined to 2 km.

Torpedoes: 6—324 or 533 mm ILAS (2 triple); Eurotorp
MU-90.

A/S mortars: 2 RBU 6000 12-barrelled launchers; range
6 km; warhead 31 kg.

Countermeasures: Decoys: 4 Kavach chaff/flare decoy
launchers. Towed torpedo decoy.

ESM: To be announced.

ECM: To be announced.

Combat data systems: BEL CMS-28. Datalinks: Satcom.

PROJECT 28

(Scale 1 : 900), Ian Sturton / 1353097

Weapons control: EO director.

Radars: Surveillance: Bharat Revathi, 3D; E/F-band.

Fire control: Plank Shave (Garpun B); I-band (for SSM)

Bel Lynx (for 76 mm); I-band.

2 Elta EL/M-2221 STGR; I/J/K-band (for Barak)

Navigation: Decca Bridgmaster; I-band.

Sonars: Hull-mounted sonar. Active/passive towed array.

Helicopters: 1 Ka-28PL or HAL Dhruv.

Programmes: Multipurpose corvette designed to operate in
Indian offshore waters. First four units ordered in 2003

and first steel cut for first of class on 12 August 2005.
The first of class was reportedly laid-down in 2006 and
further ships are likely to follow at 18-month intervals.
A class of 12 is planned.

Structure: The design is understood to be the result of a
joint venture by the Indian Navy's DGND SSG (Directorate
General Naval Design Surface Ship Group) and Garden
Reach Shipbuilder's in-house design team. Details have
not been formally released and are speculative. Measures
to reduce acoustic, magnetic, IR and radar cross-section
signatures are reported to have been incorporated. The
hull may use amagnetic steel.

12 VEER (TARANTUL I) CLASS (PROJECT 1241RE) (FSGM)

Name	No	Builders	Laid down	Launched	Commissioned

PRALAYA	K 91	Goa Shipyard	14 Nov 1998	14 Dec 2000	18 Dec 2002

Displacement, tons: 455 full load, 477 full load (K 92 and K 91)
Dimensions, feet (metres): 184.1 × 37.7 × 8.2
(56.1 × 11.5 × 2.5)

Main machinery: COGAG (M15E); 2 Nikolayev Type DR 77
(DS 71 in K 92) gas turbines; 16,016 hp(m) (11.77 MW)
sustained; 2 Nikolayev Type DR 76 gas turbines with
reversible gearboxes; 4,993 hp(m) (3.67 MW) sustained;
2 shafts
Speed, knots: 35. Range, n miles: 2,000 at 20 kt; 400 at 36 kt
Complement: 41 (5 officers)

Missiles: SSM: 4 SS-N-2D Mod 1 Styx; IR homing to 83 km
(45 n miles) at 0.9 Mach; warhead 513 kg; sea-skimmer
at end of run. 16 (4 quad) SS-N-25 (Kh 35 Uran) in K 91
and K 92; active radar homing to 130 km (70.2 n miles) at
0.9 Mach; warhead 145 kg; sea skimmer.

SAM: SA-N-5 Grail quad launcher; manual aiming; IR
homing to 6 km (3.2 n miles) at 1.5 Mach; warhead 1.5 kg.

Guns: 1 USSR 3 in (76 mm)/59 AK 176; 120 rds/min to 15 km
(8 n miles); weight of shell 5.9 kg

1 OTO Melara 3 in (76 mm)/62 Super Rapid (K 91 and K 92);
120 rds/min to 16 km (8.7 n miles); weight of shell 6 kg

2—30 mm/65 AK 630; 6 barrels per mounting; 3,000 rds/
min combined to 2 km. 2—7.62 mm MGs.

Countermeasures: Decoys: PK 16 chaff launcher.

ESM: Bharat Ajanta P Mk II; Intercept.

Weapons control: Hood Wink optronic director.

Radars: Air/surface search. Plank Shave; E-band.

Cross Dome (K 91 and K 92); E/F-band.

PRALAYA

3/2008*, Guy Toremans / 1305305

Navigation: Mius; I-band

Fire control: Bass tilt; H/I-band.

BEL Lynx (K 91 and K 92) (for guns); I-band; Bharat Aparna
(modified Plank Shave/Harpun B) (for SSM); I/J-band.

IFF: Salt Pot, Square Head A.

Programmes: First five are USSR Tarantul I class built for
export. Six further of the same type built in India. Two
further craft, armed with the SS-N-25 missile were

delivered in 2002. It is not clear whether there are to be
further vessels.

Structure: K 92 and K 91 are to a modified design to
accommodate the SS-N-25 missile. Principal differences
are the bridge and mast configurations.

Operational: All form the 22nd Missile Vessel Squadron at
Mumbai although K 41, 43 and 47 are reported to have
moved to Vishakapatnam. Pralaya sunk after a collision
on 21 April 2006.

PRABAL

3/2007, Marco Ghiglino / 1166559

4 ABHAY (PROJECT 1241 PE) (PAUK II) CLASS (FSM)

Name	No	Builders	Commissioned
ABHAY	P 33	Volodarski	10 Mar 1989
AJAY	P 34	Volodarski	24 Jan 1990
AKSHAY	P 35	Volodarski	10 Dec 1990
AGRAY	P 36	Volodarski	30 Jan 1991

Displacement, tons: 485 full load
Dimensions, feet (metres): 191.9 x 33.5 x 11.2 (58.5 x 10.2 x 3.4)
Main machinery: 2 Type M 521 diesels, 16,184 hp(m) (11.9 MW) sustained; 2 shafts
Speed, knots: 28
Range, n miles: 2,400 at 14 kt
Complement: 32 (6 officers)

Missiles: SAM: SA-N-5/8 Grail quad launcher; manual aiming, IR homing to 6 km (3.2 n miles) at 1.5 Mach; warhead 1.5 kg.
Guns: 1 USSR 3 in (76 mm)/69 AK 176; 120 rds/min to 15 km (8 n miles); weight of shell 5.9 kg
 1—30 mm/66 AK 630, 6 barrels, 3,000 rds/min combined to 2 km.
Torpedoes: 4—21 in (533 mm) (2 twin) tubes. SET-65E, active/passive homing to 15 km (8.1 n miles) at 40 kt; warhead 205 kg.
A/S mortars: 2 RBU 1200 5-tubed fixed; range 1,200 m; warhead 34 kg
Countermeasures: 2 PK 16 chaff launchers.
Radars: Air/surface search. Cross Dome; E/F-band. Navigation Pechora; I-band
Fire control: Bass Tilt; H/I-band.
Sonars: Rat Tail VDS (on transom); attack; high frequency.

AJAY

3/2007, Marco Ghigino / 116655R

Programmes: Modified Pauk II class built in the USSR at Volodarski, Rybinsk for export. Original order in late 1983 but completion of the first delayed by lack of funds and the order for the others was not reinstated until 1987. Names associated with former coastal patrol craft.
Modernisation: There are plans to re-engine all four ships.

Structure: Has a longer superstructure than the Pauk I, larger torpedo tubes and improved electronics.
Operational: Classified as ASW ships. Comprise 23rd Patrol Boat Squadron based at Mumbai. Agray was damaged by an onboard explosion on 6 February 2004 but is reportedly under repair at Mumbai

SHIPBORNE AIRCRAFT

Notes: (1) Plans to procure up to eight second-hand Sea Harriers from the UK were abandoned in late 2006
 (2) Replacement of the Sea King fleet was initiated in January 2006 when Requests for Proposals were issued to eight overseas suppliers. Following evaluation, a contract is expected in 2009. In the meantime six UH-3H Sea Kings are reported to have been acquired for operation from Jelashwa following transfer in 2007. The aircraft are to be used for commando assault, vertrep and general patrol duties
 (3) The maiden flight of the naval version of the HAL Tejas light combat aircraft is expected in 2009. While the Indian Navy has expressed interest, there is no commitment to procure the aircraft.

Numbers/Type: 12/4 MIG 29K Fulcrum/29 KUB
Operational speed: 750 kt (1,400 km/h)
Service ceiling: 57,000 ft (17,400 m).
Range: 1,400 n miles (2,600 km).
Role/Weapon systems: All-weather single-seat fighter with attack capability, optimised for ski-jump take off, is to be main weapon of Admiral Gorshkov aircraft carrier. Initial order for 12 aircraft and four trainers to be delivered from 2009 following the maiden flight of a twin-seat MIG 29KUB on 20 January 2007. Agreement in principle to acquire a further 29 aircraft was reached in September 2008. Sensors: Phazotron-NIIR Zhuk-ME radar; Elta EL/M-8222 jammer; OLS IR search and track. Weapons: AAM; RVV-AE and R-73. ASM: Kh-35 (possibly Club). Conventional bombs: KAB-500 Kr. 30 mm cannon.

MiG 29KUB 1/2007, Piotr Butowski / 118493R

Numbers/Type: 14/2 British Aerospace Sea Harrier FRS. Mk 51/Mk 60
Operational speed: 640 kt (1,186 km/h).
Service ceiling: 51,200 ft (15,600 m).
Range: 800 n miles (1,480 km).
Role/Weapon systems: Fleet air defence, strike and reconnaissance STOVL fighter Three more acquired from UK in 1999 to make good losses. Of total numbers, only about one third are operational. Sensors: Ferranti Blue Fox air interception radar, limited ECM/RWR (Elta 8420 in due course). Weapons: Air defence; two Magic AAMs (possibly ASRAAM in due course), two 30 mm Aden cannon. Plans for a mid-life upgrade have been abandoned. Avionics are to be improved to extend life of aircraft to 2020

SEA HARRIER 1994, Indian Navy / 001297O

Numbers/Type: 2/15/5 Westland Sea King Mk 42A/Mk 42B/Mk 42C
Operational speed: 112 kt (208 km/h)
Service ceiling: 11,500 ft (3,500 m).
Range: 664 n miles (1,230 km).
Role/Weapon systems: Mk 42A has primary ASW and 42B primary ASV capability; Mk 42C for commando assault/vertrep. Not all aircraft are operational. Sensors: MEL Super Searcher radar, Thomson Sintra H/S-12 dipping sonar (Mk 42A and B), AQS 902B acoustic processor (Mk 42B); Marconi Hermes ESM (Mk 42B); Bendix weather radar (Mk 42C). Weapons: ASW; 2 Whitehead A244S or USSR APR-2 torpedoes; Mk 11 depth bombs, mines (Mk 42B only). ASV; two Sea Eagle (Mk 42B only). Unarmed (Mk 42C)

SEA KING 42B 8/2002, Arjun Sarup / 056179A

Numbers/Type: 12 Kamov Ka-28 Helix A.
Operational speed: 110 kt (204 km/h).
Service ceiling: 12,000 ft (3,660 m).
Range: 270 n miles (500 km).
Role/Weapon systems: ASW helicopter embarked in large escorts. Has replaced Ka-25. Sensors: Splash Drop search radar; VGS-3 dipping sonar, sonobuoys. Weapons: ASW; two Whitehead A244S or USSR APR-2 torpedoes or four depth bombs.

Ka-28 6/2006, Chris Sattler / 118447O

For details of the latest updates to *Jane's Fighting Ships* online and to discover the additional information available exclusively to online subscribers please visit jfs.janes.com

Numbers/Type: 9 Kamov Ka-31 Helix B.
Operational speed: 119 kt (220 km/h)
Service ceiling: 11,480 ft (3,500 m).
Range: 325 n miles (600 km)
Role/Weapon systems: AEW helicopter. First two delivered late 2002 with remainder in 2003. Radar antenna folds beneath fuselage. Sensors: OKO E-80/M radar

Ka-31 6/2005, Patrick Allen/Jane's / 1136991

Numbers/Type: 23 Aerospatiale (HAL) SA 319B Chetak (Alouette III).
Operational speed: 113 kt (210 km/h).
Service ceiling: 10,500 ft (3,200 m).
Range: 290 n miles (540 km).
Role/Weapon systems: Several helicopter roles performed including embarked ASW and carrier-based SAR, utility and support to commando forces. 15 aircraft are operated by Coast Guard. Weapons: ASW; two Whitehead A244S torpedoes.

CHETAK 4/2007 / 1305304

Numbers/Type: 20 HAL Dhruv.
Operational speed: 156 kt (290 km/h).
Service ceiling: 9,850 ft (3,000 m).
Range: 216 n miles (400 km).
Role/Weapon systems: Formerly known as Advanced Light Helicopter (ALH), full production was delayed by thrust and vibration problems which have now been overcome. The naval variant started trials in March 1995 and the first two were delivered in 2003. Sensors: Dipping sonar, ECM. Weapons: ASW; torpedoes, depth charges. ASW; Sea Eagle ASM

Dhruv 2/2001, HAL / 0121338

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Numbers/Type: 2 Fokker F27 Friendship
Operational speed: 250 kt (463 km/h)
Service ceiling: 29,500 ft (8,990 m)
Range: 2,700 n miles (5,000 km).
Role/Weapon systems: Operated by coast guard for long-range patrol. Search radar only. Unarmed.

Numbers/Type: 14 Dornier 228.
Operational speed: 200 kt (370 km/h).
Service ceiling: 28,000 ft (8,535 m).
Range: 940 n miles (1,740 km).
Role/Weapon systems: Coastal surveillance and EEZ protection duties for Navy and Coast Guard. Sensors: MEL Marec or THORN EMI Super Marec search radar with FLIR, cameras and searchlight. Weapons: Unarmed, but may carry anti-ship missiles in due course

DORNIER 228 12/2000 / 0121347

Numbers/Type: 5 Ilyushin Il-38 (May).
Operational speed: 347 kt (645 km/h).
Service ceiling: 32,800 ft (10,000 m).
Range: 3,887 n miles (7,200 km).
Role/Weapon systems: Shore-based long-range ASW reconnaissance into Indian Ocean. Following the loss of two aircraft in a mid-air collision in 2002, two replacement aircraft were donated by Russia. All five aircraft upgraded to Il-38SD standard with improved avionics, radar, ASM (probably Brahmos) and ASW capabilities. The first three aircraft had been delivered by 2008. Delivery of the final two is expected by 2010. Sensors: Lenmet Sea Dragon/Novella radar, MAD, sonobuoys, ESM. Weapons: ASW; various torpedoes, mines and depth bombs.

MAY 2/2001, Wingman Aviation / 0121338

Numbers/Type: 6 Pilatus Britten-Norman Maritime Defender
Operational speed: 150 kt (280 km/h).
Service ceiling: 18,900 ft (5,760 m).
Range: 1,500 n miles (2,775 km).
Role/Weapon systems: Coastal and short-range reconnaissance tasks undertaken in support of Navy (6) and Coast Guard. Six upgraded with turboprop engines 1996-97. Sensors: Search radar, camera. Weapons: Unarmed

DEFENDER 2/2001, Wingman Aviation / 0121338

Numbers/Type: 4 Tupolev Tu 142M (Bear F).
Operational speed: 500 kt (925 km/h).
Service ceiling: 45,000 ft (13,720 m).
Range: 6,775 n miles (12,550 km).
Role/Weapon systems: First entered service in April 1988 for long-range surface surveillance and ASW. Air Force manned. Sensors: Wet Eye search and attack radars, MAD, cameras, 75 active and passive sonobuoys. Weapons: ASW; 12 torpedoes, depth bombs. ASW; two 23 mm cannon. Avionics, ASM (possibly SS-N-25) and ASW package upgraded in mid-life update from 2001.

BEAR F 2/2001 / 0121345

Numbers/Type: 8 SEPECAT/HAL Jaguar International.
Operational speed: 917 kt (1,699 km/h) (max).
Service ceiling: 36,000 ft (11,000 m).
Range: 760 n miles (1,408 km)

Role/Weapon systems: A maritime strike squadron. Air Force operated. Sensors: Thomson-CSF Agave radar. Weapons: ASV; 2 BAe Sea Eagle, 2 DEFA 30 mm cannon or up to 8-1,000 lb bombs. Can carry 2 Magic AAM overwing.

JAGUAR 2/2001, *Wingman Aviation* / 0171340

Numbers/Type: 8 Boeing P-8I Poseidon
Operational speed: 490 kt (907 km/h).
Service ceiling: 41,000 ft (12,500 m).
Range: 1,380 n miles (2,555 km).

Role/Weapon systems: Contract for eight aircraft signed on 31 December 2008. Deliveries to begin in 2013 and to be completed by 2016. To replace Tu-142 (Bear F). Design based on Boeing 737-800ERX. Crew of nine. Sensors: To be equipped with modern ASW, ASUW and intelligence, surveillance and reconnaissance (ISR) sensors. Weapons: To be announced.

BOEING P-8A Poseidon demonstrator 6/2004, *US Navy* / 1043653

UNMANNED AIR VEHICLES

Numbers/Type: 4 Israel Aircraft Industries Heron.
Operational speed: 125 kt (231 km/h).
Service ceiling: 26,500 ft (8,075 m).
Range: 108 n miles (200 km).

Role/Weapon systems: Capable of performing a variety of missions but primarily a real-time system for intelligence collection, surveillance, target acquisition/tracking, and communications/data relay. Several payloads can be carried simultaneously including real-time TV/FLIR, synthetic aperture radar or camera. Can be controlled from ground station via direct LOS data/command link. Part of JAV squadron commissioned on 6 January 2006. Based at Kochi but operated from other bases. Has conducted sea trials with INS *Vindhyagiri*. Endurance 50 hours.

HERON UAV 12/2005, *IAI* / 1116200

Numbers/Type: 8 Israel Aircraft Industries Searcher II.
Operational speed: 105 kt (194 km/h).
Service ceiling: 20,000 ft (6,100 m).
Range: 92 n miles (170 km).

Role/Weapon systems: Can be configured for tactical surveillance or as communications relay aircraft. Several payloads can be carried simultaneously including real-time TV/FLIR, synthetic aperture radar or camera. Can be controlled from ground station via direct LOS data/command link. Part of UAV squadron commissioned on 6 January 2006. Based at Kochi but operated from other bases. Endurance 18 hours.

Searcher II 6/2003, *C Hoyle/Jane's* / 0531011

Displacement, tons: 60 full load
Dimensions, feet (metres): 83.3 x 18.4 x 4.9 (25.4 x 5.6 x 1.5)
Main machinery: 2 MTU 12V 396 TE94 diesels, 4,570 hp(m) (3.36 MW); 2 Arneson ASD 16 surface drives
Speed, knots: 50
Range, n miles: 700 at 42 kt
Complement: 10 (1 officer)
Guns: 2 - 20 mm.
Weapons control: Elop MSIS optronic director.
Radars: Surface search: Koden; 1 band

Comment: Collaborative programme involving IAI, Ramta, Israel and Goa Shipyard Ltd. T 80 was built at Ramta and T 82 was procured by the Indian Navy from Israel. The other five were assembled at Goa

SUPER DVORA 2/2001 / 0176189

6 SUKANYA CLASS (PSOH)

Name	No	Builders	Launched	Commissioned
SUKANYA	P 50	Korea Tacoma, Masan	1989	31 Aug 1989
SUBHADRA	P 51	Korea Tacoma, Masan	1989	25 Jan 1990
SUVARNA	P 52	Korea Tacoma, Masan	22 Aug 1990	4 Apr 1991
SAVITRI	P 53	Hindustan SY, Vishakapatnam	23 May 1989	27 Nov 1990
SHARADA	P 55	Hindustan SY, Vishakapatnam	22 Aug 1990	27 Oct 1991
SUJATA	P 56	Hindustan SY, Vishakapatnam	25 Oct 1991	3 Nov 1993

Displacement, tons: 1,890 full load
Dimensions, feet (metres): 331.7 oa; 315 wl × 37.7 × 14.4 (101.1; 96 × 11.5 × 4.4)
Main machinery: 2 SEMT-Pielstick 16 PA6 V 280 diesels; 12,800 hp(m) (9.41 MW) sustained; 2 shafts
Speed, knots: 21
Range, n miles: 5,800 at 15 kt
Complement: 140 (15 officers)

Guns: 3 Bofors 40 mm/60. 4—12.7 mm MGs.
A/S mortars: 4 RBU 2500 16-tubed trainable launchers; range 2,500 m; warhead 21 kg. Two launchers fitted in forward section.
Radars: Surface search: Racal Decca 2459; I-band
Navigation: Bharat 1245; I-band.

Helicopters: 1 Chetak

Programmes: First three ordered in March 1987 from Korea Tacoma to an Ulsan class design. Second four ordered in August 1987. The Korean-built ships commissioned at Masan and then sailed for India where the armament was fitted. Three others of a modified design have been built for the Coast Guard. P 54 transferred to Sri Lanka December 2000.

Structure: Lightly armed and able to 'stage' helicopters, they are fitted out for offshore patrol work only but have the capacity to be much more heavily armed. Fin stabilisers fitted. Firefighting pump on hangar roof aft.

SHARADA (1166553)

3/2007 / 1166553

Operational. These ships are used for harbour defence, protection of offshore installations and patrol of the EEZ. Potential for role change is considerable. *Subhadra* modified in early 2000 to test fire Dhanush (naval version of Prithvi) SRBM from her flight deck. Dhanush was first successfully fired on 20 September 2001.

On 7 November 2004, a 350 km range Prithvi 3 solid propellant missile was reportedly fired in the Bay of Bengal. P 50 and P 51 based at Karwar, P 52 at Mumbai, P 53 at Vishakapatnam and the other two at Kochi

Sales: *Saryu* transferred to Sri Lanka in 2000.

5 SDB MK 3 CLASS (LARGE PATROL CRAFT) (PB)

T 55-59

Displacement, tons: 210 full load
Dimensions, feet (metres): 124 × 24.6 × 6.2 (37.8 × 7.5 × 1.9)
Main machinery: 2 MTU 16V 538 TB92 diesels; 6,820 hp(m) (5 MW) sustained; 2 shafts
Speed, knots: 30
Complement: 32
Guns: 2 Bofors 40 mm/60; 120 rds/min to 10 km (5.5 n miles); weight of shell 0.89 kg.
Radars: Surface search: Bharat 1245; I-band.

Comment: Built at Garden Reach and Goa and completed 1984-86. Employed as seaward defence forces.

-	-	Rajabagan Shipyard, Kolkata	2010	2011
-	-	Rajabagan Shipyard, Kolkata	2010	2011

Displacement, tons: 260 full load
 Dimensions, feet (metres): 180.4 × 24.6 × 8.5
 (48.9 × 7.5 × 2.6)
 Main machinery: 3 MTU 16V 4000 M90 diesels; 11,238 hp(m)
 (8.16 MW) sustained, 3 Kamewa 71SII waterjets
 Speed, knots: 35
 Range, n miles: 2,000 at 13 kt

Complement: 35
 Guns: 1 – 30 mm. 2 – 12.7 mm MGs.
 Radars: Surface search; To be announced.

Comment: The design is an improved version of the Bangaram class and other patrol craft built by Garden Reach and may also have drawn on the waterjet

propelled Sarojini Naidu class built by Goa Shipyard for the coast guard. Steel hull and aluminium superstructure. The first four ships are under construction at GRSE and three further craft were laid down at Rajabagan Shipyard on 29 July 2008. A class of 10 ships is expected.

AMPHIBIOUS FORCES

Notes: There are plans to acquire further amphibious ships capable of transporting troops and helicopters and of operating in littoral waters. Talks were reported to have taken place with ST Marine Singapore during 2008.

4 + 1 MAGAR CLASS (LSTH)

Name	No	Builders	Launched	Commissioned
MAGAR	L 20	Garden Reach	7 Nov 1984	15 July 1987
GHARIAL	L 23	Hindustan/Garden Reach	1 Apr 1991	14 Feb 1997
SHARDUL	L 16	Hindustan/Garden Reach	3 Apr 2004	4 Jan 2007
KESARI	L 15	Garden Reach Shipyard	8 June 2005	5 Apr 2008
AIRAVAT	-	Garden Reach Shipyard	27 Mar 2006	2009

Displacement, tons: 5,655 full load
 Dimensions, feet (metres): 409.4 oa, 393.7 wl × 57.4 × 13.1 (124.8; 120 × 17.5 × 4)
 Main machinery: 2 SEMT-Pielstick 12 PA6 V280 diesels; 8,560 hp(m) (6.29 MW) sustained;
 2 shafts
 Speed, knots: 15
 Range, n miles: 3,000 at 14 kt
 Complement: 136 (16 officers)
 Military lift: 15 tanks plus 8 APC plus 500 troops
 Guns: 4 Bofors 40 mm/60. 2 – 122 mm multibarrel rocket launchers at the bow
 Countermessures: ESM. Bharat Ajanta; intercept.
 Radars: Navigation: Bharat; I-band.
 Helicopters: 1 Sea King 42C; platform for 2.

Comment: Based on the *Sir Lancelot* design *Magar* was built entirely at Garden Reach *Gharial* ordered in 1985. Built at Hindustan Shipyard but fitted out at Garden Reach. Internal design differs from *Magar*. Carries four LCVPs on davits. Bowdoor. Can beach on gradients 1 in 40 or more. *Magar* refitted in 1995. Both based at Vishakapatnam. *Shardul* and subsequent ships include major design changes. *Magar* and *Gharial* are based at Vishakapatnam and *Shardul* at Karwar.

GHARIAL 10/2008, Michael Nitz / 1353089

MAGAR 3/2006, M Mazumdar / 1166551

5 POLNOCHNY C (PROJECT 773 I) AND D CLASS (PROJECT 773 IM) (LSM/LSMH)

SHARABH L 17 CHEETAH L 18 MAHISH L 19 GULDAR L 21 KUMBHIR L 22

Displacement, tons: 1,150 (C class); 1,190 (D class) full load
 Dimensions, feet (metres): 266.7; 275.3 (D class) × 31.8 × 7.9 (81.3; 83.9 × 9.7 × 2.4)
 Main machinery: 2 Kolomna Type 40-D diesels; 4,400 hp(m) (3.2 MW) sustained; 2 shafts
 Speed, knots: 16
 Range, n miles: 3,000 at 12 kt
 Complement: 60 (6 officers)
 Military lift: 160 troops; 5 MBT or 5 APC or 5 AA guns or 8 trucks
 Guns: 4 – 30 mm (2 twin) Ak 230. 2 – 140 mm 18-tubed rocket launchers.
 Radars: Navigation: Don 2 or Krivach (SRN 745); I-band
 Fire control: Drum Tilt; H/I-band (in D class).
 Helicopters: Platform only (in D class).

Comment: A original class of eight built in two batches by Naval Shipyard, Gdynia. The first four (L 14-17) were commissioned in 1975-76. Of these L 14, L 15 and L 16 have been decommissioned. The second batch of four (L 18-22) were commissioned in 1985-88 and are to a modified design with a flight deck forward of the bridge. All are being restricted operationally through lack of spares, but all are seaworthy. Drum Tilt radar removed from some ships. Four Polnochny Ds (L 18-22) form 5th landing Ship Squadron based at Port Blair.

CHEETAH 3/2007 / 1166548

8 MK 2/3 LANDING CRAFT (LSM)

L 32-39

Displacement, tons: 500 full load
 Dimensions, feet (metres): 188.6 oa; 174.5 pp × 26.9 × 5.2 (57.5; 53.2 × 8.2 × 1.6)
 Main machinery: 3 Kirloskar-MAN V8V 17.5/22 AMAL diesels; 1,686 hp(m) (1.24 MW);
 3 shafts
 Speed, knots: 11
 Range, n miles: 1,000 at 8 kt
 Complement: 167
 Military lift: 250 tons; 2 PT 76 or 2 APC. 120 troops
 Guns: 2 Bofors 40 mm/60 (aft).
 Mines: Can be embarked.
 Radars: Navigation: Decca 1229; I-band

Comment: L 32-35 are Mk 2 craft built 1980-83. L 36-39 are Mk 3 craft built 1986-87. All built by Goa Shipyard. L 36-39 have a considerably modified superstructure and a higher bulwark on the cargo deck. L 32-35 commissioned 1980-83 and L 36-39 1986-87.

L 36 2/1998, 92 Wing RAAF / 0064719

L 32 3/2007 / 1166547

JALASHWA	L 41	Lockheed SB & Construction Co	8 Aug 1966	3 Aug 1968	6 Mar 1971
(ex-Trenton)	(ex-LPD 14)				

Displacement, tons: 9,130 light, 16,500–17,244 full load
Dimensions, feet (metres): 570 × 100 (84 hull) × 23 (173.8 × 30.5, 25.6 × 7)
Main machinery: 2 Foster-Wheeler boilers; 800 psi (42.3 kg/cm²); 870°F (467°C); 2 De Laval turbines, 24,000 hp (18 MW); 2 shafts
Speed, knots: 21
Range, n miles: 7,700 at 20 kt
Complement: 328 (27 officers)
Military fit: 930 troops; 9 LCM 6s or 4 LCM 8s or 2 LCAC or 20 LVTs, 4 LCPL/LCVP

Guns: 2 General Electric/General Dynamics 20 mm/76 6-barrelled Vulcan Phalanx Mk 15; 3,000 rds/min (4,500 in Block 1) combined to 1.5 km, 2–25 mm Mk 38, 8–12.7 mm MGS
Countermeasures: Decoys: 4 Lorel Hycor SRBOC 6-barrelled Mk 36, IR flares and chaff to 4 km (2.2 n miles)
ESM: SLQ 32(V)1; intercept.
Combat data systems: SATCOM, WSC-3 (UHF), WSC-5 (SHF).
Radars: Air search: Lockheed SPS-40E, 8-band.
Surface search: Norden SPS-67; G band.
Navigation: Raytheon SPS-73(V)12; I-band.
Tacan: URN 25.
IFF: Mk XII UPX-36.

Helicopters: Up to 6 Sea King UH-3H can be carried. Hangar for only 1 light.

Programmes: Ex-LPD 14 authorised in the US Navy's FY65 new construction programme. Transferred as a 'hot transfer' on 17 January 2007 and formally recommissioned on 22 June 2007. The transfer of a second ship (ex-Nashville) is no longer considered likely.
Structure: One small telescopic hangar. Flight deck is 168 ft (51.2 m) in length. Well-deck 394 × 50 ft (120.1 × 15.2 m).
Operational: Likely to be based at Vishakapatnam.

JALASHWA

9/2007, Indian Navy / 1166556

MINE WARFARE FORCES

Notes: Procurement of up to eight minehunters has been approved. It is anticipated that the ships will be to a foreign design and of GRP construction. Building is expected to take place at Goa Shipyards. The ships are likely to be equipped with a minehunting sonar and with a remote-control mine-disposal system. Following requests for proposals, shortlisted companies are reported to include Intermarine, Sarzana, and Karlskronavarvet. A decision is expected in 2009.

SANDHAYAK	J 18	Garden Reach, Calcutta	6 Apr 1977	1 Mar 1981
NIRDESHAK	J 19	Garden Reach, Calcutta	16 Nov 1978	4 Oct 1982
NIRUPAK	J 14	Garden Reach, Calcutta	10 July 1981	14 Aug 1985
INVESTIGATOR	J 15	Garden Reach, Calcutta	8 Aug 1987	11 Jan 1990
JAMUNA	J 16	Garden Reach, Calcutta	4 Sep 1989	31 Aug 1991
SUTLEJ	J 17	Garden Reach, Calcutta	1 Dec 1991	19 Feb 1993
DARSHAK	J 21	Goa Shipyard	3 Mar 1999	28 Apr 2001
SARVEKSHAK	J 22	Goa Shipyard	24 Nov 1999	14 Jan 2002

Displacement, tons: 1,929 full load
Dimensions, feet (metres): 288 × 42 × 11.1 (87.8 × 12.8 × 3.4)
Main machinery: 2 GRSE/MAN 66V 30/45 ATL diesels; 7,720 hp(m) (5.67 MW) sustained; 2 shafts, active rudders
Speed, knots: 16 **Range, n miles:** 6,000 at 14 kt, 14,000 at 10 kt
Complement: 178 (18 officers) plus 30 scientists
Guns: 1 or 2 Bofors 40 mm/60
Countermeasures: ESM: Telegon IV HF D/F
Radars: Navigation: Recal Decca 1629; I-band.
Helicopters: 1 Chetak

Comment: Telescopic hangar. Fitted with three echo-sounders, side scan sonar, extensively equipped laboratories, and carries four GRP survey launches on davits amidships. An active rudder with a DC motor gives speeds of up to 5 kt. First three based at Vishakapatnam and have been used as troop transports. *Investigator* is at Mumbai and *Jamuna* and *Sutlej* at Kochi. The last pair were laid down in May and August 1995 and have a secondary role as casualty holding ships.

INVESTIGATOR

3/2007, Marco Ghiglini / 1168546

1 SAGARDHWANI CLASS

Name	No	Builders	Commissioned
SAGARDHWANI	A 74	Garden Reach, Calcutta	30 July 1994

Displacement, tons: 2,050 full load
Dimensions, feet (metres): 279.2 × 42 × 12.1 (85.1 × 12.8 × 3.7)
Main machinery: 2 GRSE/MAN 66V 30/45 ATL diesels; 7,720 hp(m) (5.67 MW) sustained, 2 shafts, 2 auxiliary thrusters
Speed, knots: 16 **Range, n miles:** 6,000 at 16 kt
Complement: 80 (10 officers) plus 16 scientists
Radars: Navigation: Recal Decca 1629; I-band.
Helicopters: Platform for Alouette III.

Comment: Marine Acoustic Research Ship (MARS) launched in May 1991. The hull and main machinery are very similar to the Sandhayak class survey ships, but there are marked superstructure differences with the bridge positioned amidships and a helicopter platform forward. Aft there are two large cranes and a gantry for deploying and recovering research equipment. The vessel is designed to carry out acoustic and geological research and special attention has been paid to noise reduction. The ship is painted white except for the lift equipment and two boats which are orange. Employed in advanced torpedo trials and missile range support. Based at Kochi.

SAGARDHWANI

2/2001, Michael Nitz / 0534054

1 MAKAR CLASS (SURVEY SHIP) (AGS)

MEEN J 33

Displacement, tons: 210 full load
 Dimensions, feet (metres): 123 x 24.6 x 8.2 (37.5 x 7.5 x 1.9)
 Main machinery: 2 diesels; 1,124 hp(m) (826 kW); 2 shafts
 Speed, knots: 12
 Range, n miles: 1,500 at 12 kt
 Complement: 36 (4 officers)
 Guns: 1 Bofors 40 mm/60
 Radars: Navigation: Decca 1629; I band

Comment: Built by Goa Shipyard and delivered on 23 June 1984. Similar hull to deleted SDB Mk 2 class but with much smaller engines. Employed as seaward defence craft.

MEEN 4/1992, 0064773

0 + 6 SURVEY SHIPS (AGS)

Displacement, tons: 260 full load
 Dimensions, feet (metres): 163.4 x 52.0 x 7.2 (49.8 x 15.85 x 2.2)
 Main machinery: 2 (outer) Cummins KTA38 M2 diesels; 2,700 hp (2 MW); 2 (inner) Cummins QSK19M; 1,520 hp (1.1 MW); 2 shafts; cp props
 Speed, knots: 18
 Range, n miles: 3,000 at 13 kt
 Complement: 57 (10 officers)
 Guns: 1—30 mm, 2—12.7 mm MGs
 Radars: Surface search: To be announced.

Comment: Contract for six vessels signed with Alcock Ashdown (Gujarat) Ltd in December 2006 for construction of six survey vessels. Designed by Australian Company Sea Transport, the catamaran hulls are of steel construction with an aluminium superstructure. Delivery of the first vessel is expected in 2009 with further deliveries at six-month intervals. The survey equipment suite includes two Hugin 1000 AUV, the HiPAP subsea positioning equipment, multibeam echosounders and underwater cameras from Kongsberg. There are also two 6.5 m RIB and a 4 wheel-drive vehicle.

TRAINING SHIPS

1 TIR CLASS (TRAINING SHIP) (AXH)

Name	No	Builders	Launched	Commissioned
TIR	A 86	Mazagon Dock Ltd, Bombay	15 Apr 1983	21 Feb 1986

Displacement, tons: 3,200 full load
 Dimensions, feet (metres): 347.4 x 43.3 x 15.7 (105.9 x 13.2 x 4.8)
 Main machinery: 2 Crossley-Pielstick 8 PC2V Mk 2 diesels; 7,072 hp(m) (5.2 MW) sustained; 2 shafts
 Speed, knots: 18. Range, n miles: 6,000 at 12 kt
 Complement: 239 (35 officers) plus 120 cadets
 Guns: 2 Bofors 40 mm/60 (twin) with launchers for illuminants. 4 saluting guns.
 Countermeasures: ESM Telegon IV D/F
 Radars: Navigation: Bharat/Decca 1245, I-band
 Helicopters: Platform for Alouette III

Comment: Second of class reported ordered May 1986 but was cancelled as an economy measure. Built to commercial standards, Decca collision avoidance plot and SATNAV. Can carry up to 120 cadets and 20 instructors. Based at Kochi.

TIR 2/2001, Michael Nitz / 0534059

1 LEANDER (BATCH 3A) CLASS (AXH)

Name	No	Builders	Commissioned
KRISHNA (ex-Andromeda)	F 46 (ex-F 57)	Portsmouth Dockyard	2 Dec 1968

Displacement, tons: 2,960 full load
 Dimensions, feet (metres): 372 x 43 x 18 (screws) (113.4 x 13.1 x 5.5)
 Main machinery: 2 Babcock & Wilcox boilers; 550 psi (38.7 kg/cm²); 850 F (454°C); 2 White/English Electric turbines; 30,000 hp (22.4 MW); 2 shafts
 Speed, knots: 28. Range, n miles: 4,000 at 15 kt
 Complement: 260 (19 officers)
 Guns: 2 Bofors 40 mm/60, 2 Oerlikon 20 mm.
 Radars: Air/surface search, Marconi Type 968; D/E-band.
 Navigation: Kelvin Hughes Type 1006; I-band.
 Helicopters: 1 Chetak.

Comment: Laid down 25 May 1966 and launched 24 May 1967. Acquired from the UK in April 1995 having paid off in June 1993 to a state of extended readiness. Refitted by DML, Devonport, before recommissioning 22 August 1995. The original 114 mm gun turret, SeaCat SAM and ASW Limbo mortar were removed in 1979-80 when Exocet SSM, Seawolf SAM, STWS torpedo tubes and facilities for a Lynx helicopter were fitted. Acquired for training purposes to supplement the Tir. Armament has been reduced to the minimum required for the training role, and now includes 40 mm guns on either side, aft of the funnel. Based at Kochi.

KRISHNA 8/1995, H M Steele / 0064724

2 SAIL TRAINING SHIPS (AXS)

VARUNA TARANGINI A 75

Displacement, tons: 420 full load
 Dimensions, feet (metres): 177.2 x 27.9 x 13.1 (54 x 8.5 x 4)
 Main machinery: 2 diesels, 640 hp(m) (470 kW); 2 shafts; LIPS props
 Speed, knots: 10 (diesels)
 Complement: 15 (6 officers) plus 45 cadets

Comment: Varuna completed in April 1981 by Alcock-Ashdown, Bhavnagar. Can carry 26 cadets. Details given are for Tarangini which is based on a Lord Nelson design by Colin Mudie of Lymington and has been built by Goa Shipyard. Launched on 23 December 1995, and completed in December 1997. Three masted barque, square rigged on forward and main mast and 'fore and aft' rigged on mizzen mast. Varuna based at Mumbai and Tarangini at Kochi.

TARANGINI 8/2005, Guy Toremans / 1151260

AUXILIARIES

Notes: (1) There is also a small hospital ship Lakshadweep of 865 tons and a crew of 35 including 16 medics.
 (2) Ambika is a 1,000 ton oiler commissioned in 1995. Built by Hindustan Shipyard, it is based at Vishakhapatnam.
 (3) There are two auxiliary cargo ships Chowra and Akabar.

1 JYOTI CLASS (REPLENISHMENT TANKER) (AORH)

Name	No	Builders	Launched	Commissioned
JYOTI	A 58	Admiralty Yard, St Petersburg	8 Dec 1995	20 July 1996

Displacement, tons: 35,900 full load
 Dimensions, feet (metres): 587.3 x 72.2 x 26.2 (179 x 22 x 8)
 Main machinery: 1 Burmeister & Wain diesel; 10,948 hp(m) (8.05 MW); 1 shaft
 Speed, knots: 15
 Range, n miles: 12,000 at 15 kt
 Complement: 92 (16 officers)
 Cargo capacity: 25,040 tons diesel
 Radars: Navigation: I-band.
 Helicopters: Platform for 1 medium.

Comment: This was the third of a class of merchant tankers, modified for naval use for the Indian Navy and acquired in 1995. The ship was laid down in September 1993. Based at Mumbai where she arrived in November 1996. There are two replenishment positions on each side and stern refuelling is an option. Similar ship sold to China and two others are in commercial service.

JYOTI 4/2007, Mitsuhiro Kadota / 1166545

1 ADITYA CLASS (REPLENISHMENT AND REPAIR SHIP) (AORH/AS)

Name	No	Builders	Launched	Commissioned
ADITYA (ex-Rajaba Gan Patan)	A 59	Garden Reach, Calcutta	15 Nov 1993	3 Apr 2000

Displacement, tons: 24,600 full load
Measurement, tons: 17,000 dwt
Dimensions, feet (metres): 564.3 x 75.5 x 29.9 (172 x 23 x 9.1)
Main machinery: 2 MAN/Burmeister & Wain 16V 40/45 diesels; 23,936 hp(m) (17.59 MW) sustained; 1 shaft
Speed, knots: 20
Range, n miles: 10,000 at 16 kt
Complement: 156 (16 officers) + 6 aircrew
Cargo capacity: 14,200 m³ diesel and avcat; 2,250 m³ water; 2,170 m³ ammunition and stores.
Guns: 3 Bofors 40 mm/60.
Helicopters: 1 Chetak.

Comment: Ordered in July 1987 to a Bremer-Vulcan design. Lengthened version of Deepak class but with a multipurpose workshop. Four RAS stations alongside. Fully air conditioned. Building progress was very slow and sea trials were curtailed by propulsion problems during 1999. Ship has the capability to carry a Sea King 428 or KA 28 helicopter. First ship to be based at Karwar with effect from 15 December 2005.

ADITYA 2/2001, Guy Toremans / 0121357

1 DIVING SUPPORT SHIP (ASR)

Name	No	Builders	Commissioned
NIREEKSHAK	A 15	Mazagon Dock Ltd, Bombay	8 June 1989

Displacement, tons: 2,160 full load
Dimensions, feet (metres): 231.3 x 57.4 x 16.4 (70.5 x 125 x 5)
Main machinery: 2 Bergen KRM-8 diesels; 4,410 hp(m) (3.24 MW) sustained; 2 shafts, cp props; 2 bow thrusters; 2 stern thrusters; 990 hp(m) (727 kW)
Speed, knots: 12
Complement: 63 (15 officers)

Comment: Laid down in August 1982 and launched January 1984. Acquired on lease with an option for purchase which was taken up in March 1995, and the ship was commissioned on 15 September 1995. The vessel was built for offshore support operations but has been modified for naval requirements. Two DSRV, capable of taking 12 men to 300 m, are carried together with two six-man recompression chambers and one three-man bell. Kongsberg ADP-503 Mk II. Dynamic positioning system. The ship is used for submarine SAR. Based at Mumbai.

NIREEKSHAK 2/2006, M Mazumdar / 1363090

6 SUPPORT TANKERS (AOTL)

POSHAK PURAN PUSHPA PRADHAYAK PURAK PALAN

Comment: First two built at Mazagon Dock Ltd, Bombay. *Poshak* completed April 1982, and *Puran* in November 1988. *Pushpa* (capacity 650 tons) built at Goa Shipyard and completed in 1990. *Pradhayak*, *Purak* and *Palan* built at Rajabagan Shipyard, Bombay, the first two in 1977 and *Palan* in May 1986. Cargo capacities vary. Civilian manned.

PURAN 3/2007, Marco Ghigino / 1168544

3 NICOBAR CLASS (TRANSPORT SHIPS) (APH)

Name	No	Builders	Launched
NICOBAR	-	Szczecin Shipyard, Poland	12 Apr 1990
ANDAMANS (ex-Nancowry)	-	Szczecin Shipyard, Poland	5 Oct 1990
SWARAJ DEEP	-	Vishakhapatnam	1997

Displacement, tons: 19,000 full load
Measurement, tons: 14,176 grt
Dimensions, feet (metres): 515.1 x 68.9 x 22 (157 x 21 x 6.7)
Main machinery: 2 Ceg'elski-Burmeister am Wain 6L35MC diesels; 72,000 hp (5.3 MW); 2 shafts, bow thruster
Speed, knots: 16
Complement: 160
Cargo capacity: 1,200 troops
Helicopters: Platform for 1 medium.

Comment: The first two ships designed and built in Poland. *NicoBar* delivered to the Shipping Corporation of India (which operated the ship for the Andaman and Nicobar Islands Administration) on 5 June 1991 and subsequently acquired for use by the Indian Navy in April 1998. *Andamans* delivered to the Shipping Corporation of India on 31 March 1992 and acquired for use by the Indian Navy in April 2000. The ships are used to trans-ship stores and personnel to the Andaman and Nicobar Islands. They have large davits capable of operating LCVPs. *Swaraj Deep* is of a similar design.

NICOBAR 4/2007 / 1305803

0 + 1 (1) REPLENISHMENT TANKER (AORH)

Name	No	Builders	Laid down	Launched	Commissioned
-	-	Fincantieri	2008	2010	2010

Displacement, tons: 27,500 full load
Dimensions, feet (metres): 574.1 x 82.0 x 29.8 (175.0 x 25.0 x 9.1)
Main machinery: 2 diesels; 26,800 hp (20 MW); 1 shaft; cp prop
Speed, knots: 20
Range, n miles: 10,000 at 16 kt
Complement: accommodation for 248
Cargo capacity: Liquids: 12,000 tons of fuel, 2,300 tons of AVCAT, 2,000 tons of fresh water, and 1,000 tons of lub oil. Dry cargo: 200 tons ammunition, 150 tons provisions, 20 tons stores, 6-8 containers on the deck

Guns: To be announced.
Countermeasures: To be announced
Radars, Surface search: To be announced.
Navigation: To be announced.
Helicopters: 1 Sea King

Programmes: Fincantieri selected in late 2007 for the construction of a new fleet tanker. A contract was expected by the end of the year. The aft part is to be built at Riva Trigoso while the forward part is to be built at Palermo. There is an option for a second unit.
Structure: The design has a RINA classification and satisfies MARPOL and IMO requirements. It incorporates one elevator while internal passageways allow for the passage of fork-lift vehicles. The ship is to be equipped with two beam RAS stations on each side (all capable of transferring fuel, two for transferring 3 ton loads and two for 250 kg loads) and two stern refuelling stations.

AOR (artist's impression) 11/2007, Fincantieri / 1166542

2 WATER CARRIERS (AWT)

AMBUDA COCHIN

Comment: First laid down Rajabagan Shipyard 18 January 1977. Second built at Mazagon Dock Ltd, Bombay. Civilian manned.

AMBUDA 4/1992 / 0064729

1 TORPEDO RECOVERY VESSEL (YPT)

A 72

Displacement, tons: 110 full load
Dimensions, feet (metres): 93.5 × 20 × 4.6 (28.5 × 6.1 × 1.4)
Main machinery: 2 Kirloskar V12 diesels; 720 hp(m) (529 kW); 2 shafts
Speed, knots: 11
Complement: 13

Comment: Completed in 1981 at Goa Shipyard. Based at Vishakapatnam.

A 72

2/1989, G Jacobs / 0508006

3 DIVING TENDERS (YDT)

Displacement, tons: 36 full load
Dimensions, feet (metres): 48.9 × 14.4 × 3.9 (14.9 × 4.4 × 1.2)
Main machinery: 2 diesels; 130 hp(m) (96 kW); 2 shafts
Speed, knots: 12

Comment: Built at Cleback Yard. First completed 1979; second and third in 1984.

YDT

9/1986 0012531

TUGS**1 TUG (OCEAN) (ATA/ATR)**

MATANGA A 53

Displacement, tons: 1,170
Dimensions, feet (metres): 228.5 × 40.4 × 13.6 (69.64 × 12.3 × 4.1)
Main machinery: 2 GRSE/MAN G7V diesels; 3,920 hp(m) (2.88 MW); 2 shafts
Speed, knots: 15
Range, n miles: 4,000 at 15 kt
Complement: 78 (8 officers)
Guns: 1 Bofors 40 mm/60.
Radars: Navigation; I-band.

Comment: Built by Garden Reach SY. *Matanga* launched 29 October 1977. Bollard pull of 40 tons and capable of towing a 20,000 ton ship at 8 kt. Carries a divers' decompression chamber and other salvage equipment.

COAST GUARD**Senior Appointments**

Director General:
 Vice Admiral Anil Chopra, AVSM
Deputy Director General:
 Inspector General Achutan Rajsekhar, PTM, TM

Personnel

2009: 6,868 (773 officers)

General

The Coast Guard was constituted as an independent armed force on 19 August 1978. It functions under the Ministry of Defence.

Responsibilities include:

1. Ensuring the safety and protection of artificial islands, offshore terminals, installations and other structures and devices in the Maritime Zones
2. Measures for the safety of life and property at sea and collection of scientific data as may be prescribed
3. Measures to preserve and protect the marine environment and control marine pollution.
4. Assisting the Customs and other authorities in anti-smuggling operations.
5. Enforcing the provisions of enactments in force in the Maritime Zones
6. Protection of fishermen and assistance to them at sea while in distress

Bases

CG HQ: Delhi
 West Region HQ: Mumbai
 District 1 HQ: Porbander
 District 2 HQ: Mumbai

SAMUDRA PAVAK	—	ABG Shipyard, Surat	2006	2009	2010

Displacement, tons: 3,300 full load
 Dimensions, feet (metres): 308.4 x 50.9 x 14.8 (94.0 x 15.5 x 4.5)
 Main machinery: 2 Bergen B32 diesels; 8,050 hp (6.0 MW); 2 shafts; cp props. 1 Ulstein Aquamaster bow thruster; 1,185 hp (883 kW)
 Speed, knots: 20
 Range, n miles: 6,000 at 14 kt
 Complement: 85 (10 officers)
 Guns: 1—30 mm.
 Radars: Navigation: To be announced.
 Helicopters: Platform for 1 medium.

Comment: Rolls-Royce UT 517 design selected on 25 October 2004 for three environmental protection ships. The ships are to feature a range of Rolls-Royce propulsion, steering and motion control equipment and are similar to those selected for use by the French Navy and Norwegian Coast Guard. The ships are to be capable of deploying a boom system to contain oil spillages while additional tasks are to include surveillance and law enforcement, anti-smuggling and fishery protection, search and rescue, collecting data, and assistance with salvage and fire fighting.

VIVEK	38	Mazagon Dock, Mumbai	5 Nov 1987	19 Aug 1989
VIGRAHA	39	Mazagon Dock, Mumbai	27 Sep 1988	12 Apr 1990
VARAD	40	Goa Shipyard	3 Sep 1989	19 July 1990

Displacement, tons: 1,224 full load
 Dimensions, feet (metres): 243.1 x 37.4 x 10.5 (74.1 x 11.4 x 3.2)
 Main machinery: 2 SEMT-Pielstick 16 PA6V 280 diesels; 12,800 hp(m) (9.41 MW) sustained, 2 shafts; cp props
 Speed, knots: 22. Range, n miles: 4,250 at 12 kt
 Complement: 96 (11 officers)
 Guns: 1—30 mm.
 Weapons control: Lynx optical sights.
 Radars: Navigation: 2 Decca 1226; I-band
 Helicopters: 1 HAL (Aerospatiale) Chetak

Comment: Owes something to a NEVESBU (Netherlands) design, being a stretched version of its 750 ton offshore patrol vessels. Ordered in 1979. Fin stabilisers. Diving equipment. 4.5 ton deck crane. External firefighting pumps. Has one GRP boat and two inflatable craft. This class is considered too small for its required task and hence the need for the larger Samar class. *Veraha* was donated to the Sri Lankan Navy on 25 February 2007.

VIJAYA 2/2001, Guy Toremans / 0171354

8 PRIYADARSHINI CLASS (COASTAL PATROL CRAFT) (WPBO)

Name	No	Builders	Commissioned
PRIYADARSHINI	221	Garden Reach, Calcutta	25 May 1992
RAZIA SULTANA	222	Goa Shipyard	18 Nov 1992
ANNIE BESANT	223	Goa Shipyard	7 Dec 1992
KAMLA DEVI	224	Goa Shipyard	20 May 1992
AMRIT KAUR	225	Goa Shipyard	20 Mar 1993
KANAK LATA SAURA	226	Garden Reach, Calcutta	27 Mar 1997
BHIKAJI CAMA	227	Garden Reach, Calcutta	24 Sep 1997
SUCHETA KRIPALANI	228	Garden Reach, Calcutta	16 Mar 1998

Displacement, tons: 306 full load
 Dimensions, feet (metres): 150.9 x 24.6 x 6.2 (46.0 x 7.5 x 1.9)
 Main machinery: 2 MTU 12V 538 diesels; 4,025 hp(m) (2.96 MW) sustained; 2 shafts
 Speed, knots: 23. Range, n miles: 2,400 at 12 kt
 Complement: 34 (7 officers)
 Guns: 1—30 mm.
 2—762 mm MGs
 Radars: Racal Decca 1226 or BEL 1245/6X (221-225); I-band.

Comment: A development of the Tara Bai class. *Razia Sultana* (222), previously thought to have been lost at sea, remains in commission.

KAMLA DEVI 3/2004, Bob Fildes / 1042270

6 TARA BAI CLASS (COASTAL PATROL CRAFT) (WPBO)

Name	No	Builders	Commissioned
TARA BAI	71	Singapore SBEC	26 June 1987
AHALYA BAI	72	Singapore SBEC	9 Sep 1987
LAKSHMI BAI	73	Garden Reach, Calcutta	20 Mar 1989
AKKA DEVI	74	Garden Reach, Calcutta	9 Aug 1989
NAIKI DEVI	75	Garden Reach, Calcutta	19 Mar 1990
GANGA DEVI	76	Garden Reach, Calcutta	19 Nov 1990

Displacement, tons: 195 full load
 Dimensions, feet (metres): 147.3 x 23.0 x 8.5 (44.9 x 7.0 x 2.6)
 Main machinery: 2 MTU 12V 538 diesels; 4,025 hp(m) (2.96 MW) sustained; 2 shafts
 Speed, knots: 26. Range, n miles: 2,400 at 12 kt
 Complement: 34 (7 officers)
 Guns: 1 Bofors 40 mm/60
 2—76 mm MGs
 Radars: Surface search: Racal Decca 1226 or BEL 1245/6X (221-225); I-band.

Comment: Two ordered in June 1986 with license to build further four in India. These were laid down in 1987.

AKKA DEVI 6/2000, Indian Navy / 1047263

7 SAROJINI NAIDU CLASS (WPBO)

Name	No	Builders	Commissioned
SAROJINI NAIDU	229	Goa Shipyard	11 Nov 2002
DURGABAI DESHMUKH	230	Goa Shipyard	30 Apr 2003
KASTURBA GANDHI	231	Goa Shipyard	28 Oct 2005
ARUNA ASAF ALI	232	Goa Shipyard	28 Jan 2006
SUBHADRA KUMARI CHAUHAN	233	Goa Shipyard	28 Apr 2006
MEERA BEHAN	234	Goa Shipyard	25 July 2006
SAVITRI BAI PHULE	235	Goa Shipyard	28 Oct 2006

Displacement, tons: 260 full load
 Dimensions, feet (metres): 157.8 x 24.6 x 6.6 (48.1 x 7.5 x 2)
 Main machinery: 3 MTU-F 16V4000 M90 diesels; total of 10,942 hp(m) (8.2 MW) sustained;
 3 Kamewa 71SII waterjets
 Speed, knots: 35
 Complement: 35
 Guns: 1—30 mm
 2—12.7 mm MGs
 Radars: Surface search: to be announced

Comment: A new class of patrol ship designed and developed by Goa Shipyard. Following the initial delivery of two vessels, an order for a further five was made in 2004. These have all been commissioned.

SAROJINI NAIDU 11/2002, Indian Coast Guard / 0530081

7 JIJA BAI MOD 1 CLASS (TYPE 956) (COASTAL PATROL CRAFT) (WPBO)

Name	No	Builders	Commissioned
JIJA BAI	64	Sumidagawa, Tokyo	22 Feb 1984
CHAND BIBI	65	Sumidagawa, Tokyo	22 Feb 1984
KITTUR CHENNAMMA	66	Sumidagawa, Tokyo	21 Oct 1983
RANI JINDAN	67	Sumidagawa, Tokyo	21 Oct 1983
HABBAH KHATUN	68	Garden Reach, Calcutta	27 Apr 1985
RAMADEVI	69	Garden Reach, Calcutta	3 Aug 1985
AVVAIYYAR	70	Garden Reach, Calcutta	19 Oct 1985

Displacement, tons: 181 full load
 Dimensions, feet (metres): 144.3 x 24.3 x 7.5 (44 x 7.4 x 2.3)
 Main machinery: 2 MTU 12V 538 TB82 diesels; 4,025 hp(m) (2.96 MW) sustained; 2 shafts
 Speed, knots: 26. Range, n miles: 2,375 at 14 kt
 Complement: 34 (7 officers)
 Guns: 1 Bofors 40 mm/60. 2—762 mm MGs
 Radars: Surface search: Racal Decca 1226; I-band.

Comment: All were ordered in 1981 and are similar to those in service with the Philippines Coast Guard.

RANI JINDAN 6/1996, Indian Coast Guard / 0064732

2 SDB MK 2 RAJ CLASS (COASTAL PATROL CRAFT) (WPB)

Name	No	Builders	Commissioned
RAJKIRAN	59	Garden Reach, Calcutta	28 Mar 1984
RAJKAMAL	61	Garden Reach, Calcutta	19 Sep 1986

Displacement, tons: 203 full load
 Dimensions, feet (metres): 123 x 24.6 x 5.9 (37.5 x 7.5 x 1.8)
 Main machinery: 2 MTU 12V 538 diesels; 4,025 hp(m) (2.96 MW) sustained; 2 shafts
 Speed, knots: 29. Range, n miles: 1,400 at 14 kt
 Complement: 28 (4 officers)
 Guns: 1 Bofors 40/60 mm.
 Radars: Surface search: Racal Decca; I-band.

Comment: Earlier vessels of this class belonged to the Navy but have been scrapped.

RAJKAMAL 6/2000, Indian Coast Guard / 0104591

1 SWALLOW 65 CLASS (WPB)

C 63
 Displacement, tons: 32 full load
 Dimensions, feet (metres): 65.6 x 15.4 x 5 (20 x 4.7 x 1.5)
 Main machinery: 2 Detroit 12V-71TA diesels; 840 hp (627 kW) sustained; 2 shafts
 Speed, knots: 20. Range, n miles: 400 at 20 kt
 Complement: 9 (1 officer)
 Guns: 1—762 mm MG
 Radars: Navigation: I-band.

Comment: Built by Swallow Craft Co, Pusan, South Korea in early 1980s. Last remaining craft in service.

C 63 1982, Swallow Craft / 0017534

8 INSHORE PATROL CRAFT (WPBF)

C 109-116
 Displacement, tons: 5.5 full load
 Dimensions, feet (metres): 31.2 x 10.7 x 2.5 (9.5 x 3.3 x 0.75)
 Main machinery: 2 outboard motors; diesels; 500 hp (370 kW)
 Speed, knots: 35. Range, n miles: 75 at 25 kt
 Complement: 2
 Guns: 1—762 mm MG

Comment: Built by Bristol Boats Ltd, Kochi. The first craft became operational on 1 December 2004.

SUBMARINES

Notes: Two ex-German Type 206 submarines were taken over on 25 September 1997 with plans to refit them, followed by three others. Funds ran out in June 1998 and the whole project was then cancelled. New plans to acquire two submarines from South Korea were announced in October 2003. This probably points to a modified Cheng Bogo class. Talks have also, reportedly, taken place with the Russian government.

2 CAKRA TYPE 209/1300 CLASS

Name	No	Builders	Laid down	Launched	Commissioned
CAKRA	401	Howaldtswerke, Kiel	25 Nov 1977	10 Sep 1980	19 Mar 1981
NANGGALA	402	Howaldtswerke, Kiel	14 Mar 1978	10 Sep 1980	6 July 1981

Displacement, tons: 1,285 surfaced; 1,390 dived

Dimensions, feet (metres): 195.2 x 20.3 x 17.9
(59.5 x 6.2 x 5.4)

Main machinery: Diesel-electric; 4 MTU 12V 493 AZ80 GA31L diesels; 2,400 hp (m) (1.76 MW) sustained; 4 Siemens alternators; 1.7 MW; 1 Siemens motor; 4,600 hp (m) (3.38 MW) sustained; 1 shaft

Speed, knots: 11 surfaced; 21.5 dived

Range, n miles: 8,200 at 8 kt

Complement: 34 (6 officers)

Torpedoes: 8–21 in (533 mm) bow tubes. 14 AEG SUT Mod 0; dual purpose, wire-guided; active/passive homing to 12 km (6.5 n miles) at 35 kt; 28 km (15 n miles) at 23 kt; warhead 250 kg.

Countermeasures: ESM. Thomson-CSF DR 2000U; radar warning

Weapons control: Signal Sinbad system.

Radars: Surface search-Thomson-CSF Calypso; I-band

Sonars: Atlas Elektronik CSU 3-2; active/passive search and attack; medium frequency PRS-3/4, (integral with CSU) passive ranging.

Programmes: Ordered on 2 April 1977. Designed by Ingenieurkontor, Lübeck for construction by Howaldtswerke, Kiel and safe by Ferrostaal, Essen—all acting as a consortium.

Modernisation: Major refits at HDW spanning three years from 1986 to 1989. These refits were expensive and lengthy and may have discouraged further orders at

that time. *Cakra* refitted again at Surabaya from 1993 completing in April 1997, including replacement batteries and updated Sinbad TFCS. *Nanggala* received a similar refit from October 1997 to mid-1999. *Cakra* began a refit at Daewoo Shipyard, South Korea in 2004 which was completed in 2005. Work is reported to have included new batteries, overhaul of engines and modernisation of the combat system. A similar refit of *Nanggala* was completed in April 2006.

Structure: Have high-capacity batteries with GRP lead-acid cells and battery cooling supplied by Wilhelm Hagen AG. Diving depth, 240 m (790 ft).

Operational: Endurance, 50 days. Operational status of both boats is doubtful

NANGGALA

8/1999, van Ginderen Collection / 0080001

FRIGATES

Notes: There were reports in mid-2007 that three Russian Steregushchy-class frigates were to be procured but these have not been confirmed.

1 SAMADIKUN (CLAUD JONES) CLASS (FF)

Name	No	Builders	Laid down	Launched	Commissioned
MARTADINATA (ex-Charles Berry DE 1035)	342	American SB Co, Toledo, OH	29 Oct 1958	17 Mar 1959	25 Nov 1959

Displacement, tons: 1,720 standard; 1,968 full load

Dimensions, feet (metres): 310 x 38.7 x 18
(95 x 11.8 x 5.5)

Main machinery: 2 Fairbanks-Morse 38TD 8-1/8-12 diesels (not in 343), 7,000 hp (5.2 MW) sustained; 1 shaft

Speed, knots: 22

Range, n miles: 3,000 at 18 kt

Complement: 171 (12 officers)

Guns: 1 or 2 US 3 in (76 mm)/50 Mk 34; 50 rds/min to 12.8 km (7 n miles); weight of shell 6 kg.
2 USSR 37 mm/63 (twin); 160 rds/min to 9 km (5 n miles); weight of shell 0.7 kg.

Torpedoes: 6–324 mm Mk 32 (2 triple) tubes. Honeywell Mk 46; anti-submarine; active/passive homing to 11 km (5.9 n miles); at 40 kt; warhead 44 kg

Depth charges: 2 DC throwers.

Countermeasures: ESM: WLR-1C; radar warning

Weapons control: Mk 70 Mod 2 for guns.

Radars: Air search: Westinghouse SPS-6E; D-band; range 146 km (80 n miles) (for fighter)

Surface search: Raytheon SPS-6D; G/H-band, range 37 km (20 n miles)

Navigation: Racal Decca 1226; I-band

Fire control: Lockheed SPG-52; K-band

Sonars: SQS-45V; hull-mounted; active search and attack; medium/high frequency.

Programmes: Transferred from US 31 January 1974. Refitted at Subic Bay 1979–82

SAMADIKUN CLASS

10/2001, Chris Settler / 0121379

Modernisation: The Hedgehog A/S mortars have been removed, as have the 25 mm guns. Some have a second 76 mm gun vice the 37 mm.

Operational: It was planned that the Van Speijk class would replace these ships. Three have been deleted and the operational status of this last one is doubtful

6 AHMADYANI (VAN SPEIJK) CLASS (FFGHM)

Name	No	Builders	Laid down	Launched	Commissioned
AHMAD YANI (ex-Tjerk Hiddes)	351	Nederlandse Dok en Scheepsbouw Mij, Amsterdam	1 June 1964	17 Dec 1965	16 Aug 1967
SLAMET RIYADI (ex-Van Speijk)	352	Nederlandse Dok en Scheepsbouw Mij, Amsterdam	1 Oct 1963	5 Mar 1965	14 Feb 1967
YOS SUDARSO (ex-Van Galen)	353	Koninklijke Maatschappij de Schelde, Flushing	25 July 1963	19 June 1965	1 Mar 1967
OSWALD SIAHAAN (ex-Van Nes)	354	Koninklijke Maatschappij de Schelde, Flushing	25 July 1963	26 Mar 1966	9 Aug 1967
ABDUL HALIM PERDANAKUSUMA (ex-Evertsen)	355	Koninklijke Maatschappij de Schelde, Flushing	6 July 1965	18 June 1966	21 Dec 1967
KAREL SATSUITUBUN (ex-Isaac Sweers)	356	Nederlandse Dok en Scheepsbouw Mij, Amsterdam	5 May 1965	10 Mar 1967	15 May 1968

Displacement, tons: 2,225 standard; 2,835 full load

Dimensions, feet (metres): 372 x 41 x 13.8
(113.4 x 12.5 x 4.2)

Main machinery: 2 Caterpillar 3612 diesels (356); 12,512 hp (9.2 MW); 2 Caterpillar 3616 diesels (351, 351, 353, 356); 14,617 hp (10.9 MW); 2 SEMT Pielstick 12 PA6B (354); 14,000 hp (10.6 MW); 2 shafts

Speed, knots: 28.5

Range, n miles: 4,500 at 12 kt

Complement: 180

Missiles: SSM: 8 McDonnell Douglas Harpoon ●; active radar homing to 130 km (70 n miles) at 0.9 Mach; warhead 227 kg.

SAM: 2 twin Matra Simbad launchers for Mistral; IR homing to 4 km (2.2 n miles); warhead 3 kg.

Guns: 1 OTO Melara 3 in (76 mm)/62 compact ●; 85 rds/min to 16 km (8.7 n miles) anti-surface; 12 km (6.6 n miles); anti-aircraft; weight of shell 6 kg, 4 – 12.7 mm MGs

Torpedoes: 6 – 324 mm Mk 32 (2 triple) tubes ●. Honeywell Mk 46; anti-submarine; active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg.

Countermeasures. Decoys: 2 Kneibworth Corvus 8-tube trainable; radar distraction or centroid chaff to 1 km.

ESM. UA 8/9, UA 13 (355 and 356); radar warning. FHS D/F

Combat data systems. SEWACO V action data automation and Daisy data processing

Weapons control. Signaal LIOD optronic director. Mk 2 fitted in 354, 353 and 356. SWG-1A Harpoon LCS.

Radars: Air search: Signaal LW03 ●; D-band; range 219 km (120 n miles) for 2 m² target.

Air/surface search: Signaal DA05 ●; E/F-band; range 137 km (75 n miles) for 2 m² target.

AHMAD YANI

Navigation. Racal Decca 1229; I band.

Fire control: Signaal M 45 ●; I/J-band (for 76 mm gun and SSM)

Sonars: Signaal CWE 610; hull-mounted, active search and attack; medium frequency. VDS; medium frequency.

Helicopters: 1 NBO-105C ●.

Programmes: On 11 February 1986 agreement signed with the Netherlands for transfer of two of this class with an option on two more. Transfer dates: *Tjerk Hiddes*, 31 October 1986; *Van Speijk*, 1 November 1986; *Van Galen*, 2 November 1987; *Van Nes*, 31 October 1988. Contract of sale for the last two of the class signed 13 May 1989. *Evertsen* transferred 1 November 1989 and *Isaac Sweers* 1 November 1990. Ships provided with all spare parts but not towed arrays or helicopters.

Modernisation: This class underwent mid-life modernisation at Rykswerf Den Helder from 1976. This included replacement of 4.5 in turret by 76 mm,

A/S mortar by torpedo tubes, new electronics and electrics, updating combat data system, improved communications, extensive automation with reduction in complement, enlarged hanger for Lynx and improved habitability. Harpoon for first two only initially because there was no FMS funding for the others. However the USN then provided sufficient SWG 1A panels for all of the class to be retrofitted with Harpoon missiles. LIOD optronic directors Mk 2 fitted in 354, 353 and 356 in 1996-97. Seacat replaced by Simbad twin launchers. *Ahmad Yani* and *Karel Satsuitubun* appear to have some additional superstructure in place of the Seacat launcher on the hanger roof. All six ships have been re-engined with diesel propulsion. 356 was refitted by Tesco Corp in 2003 and 354 by PT Mulia/PT Pal in 2008. 355 and 351 had been refitted by Tesco in mid-2007 and 352 and 353 are to be completed by Tesco by 2008

Operations: Operational availability has been drastically reduced by propulsion problems. Harpoon missiles are reported to be time-expired

(Scale 1 : 1,200), Ian Sturton / 115.8005

CORVETTES

Notes: A programme for the procurement of indigenously built corvettes was launched at PT Pal Shipyard, Surabaya on 8 October 2004. The programme is believed to entail technology transfer from a foreign shipbuilder to enable local construction. Fincantieri was reported to be a strong contender for collaboration but apparent lack of progress with the project suggests that a decision is yet to be made and that another shipbuilder may yet be involved.

3 FATAHILLAH CLASS (FFG/FFGH)

Name	No	Builders	Laid down	Launched	Commissioned
FATAHILLAH	361	Wilton Fijenoord, Schiedam	31 Jan 1977	22 Dec 1977	18 July 1979
MALAHAYATI	362	Wilton Fijenoord, Schiedam	28 July 1977	19 June 1978	21 Mar 1980
NALA	363	Wilton Fijenoord, Schiedam	27 Jan 1978	11 Jan 1979	4 Aug 1980

Displacement, tons: 1,200 standard, 1,450 full load
Dimensions, feet (metres): 276 × 36.4 × 10.7
 (84 × 11.1 × 3.3)

Main machinery: CODOG; 1 RR Olympus TM3B gas turbine; 25,440 hp (19 MW) sustained; 2 MTU 20V 956 TB92 diesels; 11,070 hp (m) (8.14 MW) sustained; 2 shafts; LIPS cp props
Speed, knots: 30. **Range, n miles:** 4,250 at 16 kt
Complement: 89 (11 officers)

Missiles: SSM: 4 Aerospatiale MM 38 Exocet ●; inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.

Guns: 1 Bofors 4.7 in (120 mm)/46 ●; 80 rds/min to 18.5 km (10 n miles); weight of shell 21 kg.
 1 or 2 Bofors 40 mm/70 (2 In *Nala*) ●; 300 rds/min to 12 km (6.6 n miles); weight of shell 0.96 kg.
 2 Rheinmetall 20 mm; 1,000 rds/min to 2 km anti-aircraft; weight of shell 0.24 kg.

Torpedoes: 6—324 mm Mk 32 or ILAS 3 (2 triple tubes (none in *Nala*) ●; 12 Mk 46 (or A244S); anti-submarine, active/passive homing to 11 km (5.9 n miles) at 40 kt; warhead 44 kg

A/S mortars: 1 Bofors 375 mm twin-barrelled trainable ●; 54 Erka; range 1,600 m and Nelli; range 3,600 m.

NALA

FATAHILLAH

(Scale 1 : 1,200), Ian Sturton / 0126692 / 0121374

Countermeasures: Decoys: 2 Knebworth Corvus 8-tubed trainable chaff launchers ●; radar distraction or centroid modes to 1 km. 1T-Mk 6; torpedo decoy.
ESM: MEL Susie 1 (UAA-1); radar intercept.
Combat data systems: Signaal SEWACO-RI action data automation.

Weapons control: Signaal LIROD optronic director.
Radars: Air/surface search: Signaal DA05 ●; E/F-band; range 137 km (75 n miles) for 2 m² target.
 Surface search: Racal Decca AC 1229 ●; I-band.
Fire control: Signaal WM28 ●; I/J-band, range 46 km (25 n miles).

Sonars: Signaal PHS-32; hull-mounted; active search and attack; medium frequency.

Helicopters: 1 Westland Wasp (*Nala* only) ●.

Programmes: Ordered August 1975. Officially rated as Corvettes.

Structure: NEVESBU design. *Nala* is fitted with a folding hangar/landing deck.

Operational: These ships are the busiest of the larger warships. Three successful Exocet (locally modified after life-expiry) firings conducted on 25 August 2002.

Displacement, tons: 769 standard

Dimensions, feet (metres): 246.7 × 32.2 × 11.5
(75.2 × 9.8 × 3.5)

Main machinery: 1 Zvezda M 504A diesel; 4,700 hp (3.5 MW) for central line cp prop
2 Deutz TBD 620 V16 diesels (372, 373, 374, 377, 378, 381); 6,000 hp (4.5 MW)
or 2 MTU 16V 4000 M 90 diesels (371, 379, 380, 382, 383 and 386); 7,300 hp (5.4 MW)
or 2 CAT 3516B diesels (355, 376, 384, 385); 5,200 hp (3.9 MW); 2 outboard shafts

Speed, knots: 24

Range, n miles: 1,750 at 18 kt

Complement: 64 (9 officers)

Missiles: SAM: SA-N-5/8 launchers fitted in some. May be replaced by twin Simbad launchers.

Guns: 2 USSR 57 mm/75 AK 725 (twin) automatic; 120 rds/min to 12.7 km (6.8 n miles); weight of shell 2.8 kg.
2–30 mm (twin) automatic; 500 rds/min to 5 km (2.7 n miles) anti-aircraft; weight of shell 0.54 kg.
1–20 mm.

Torpedoes: 4–400 mm tubes automatic.

A/S mortars: 2 RBU 6000 12-barrelled trainable launchers automatic loading; range 6,000 m; warhead 31 kg.

Mines: Mine rails fitted.

KAPITAN PATIMURA

(Scale 1: 600), Ian Sturton / 0506007

Countermeasures: Decoys: 2 PK 16 chaff rocket launchers.
ESM: 2 Watch Dog; radar warning.

Radars: Air/surface search: Strut Curve automatic; F-band; range 110 km (60 n miles) for 2 m² target.

Navigation: TSR 333; I-band.

Fire control: Muff Cob automatic; G/H-band

IFF High Pole B

Sonars: MG 332T; hull-mounted; active search and attack; high frequency.

EikTail; VDS system on starboard side (in some hulls)

Programmes: Ex-GDR ships mostly paid off in 1991. Formally transferred on 4 January 1993 and became Indonesian ships on 25 August 1993. First three arrived Indonesia in November 1993.

Modernisation: All refitted prior to sailing for Indonesia. Range increased and air conditioning added to accommodation. SAM launchers can be carried. A re-engining programme was completed in 2005.

FRANS KASSIEPO	368	Royal Schelde, Vlissingen	8 May 2006	June 2008	7 Mar 2009

Displacement, tons: 1,692 full load
 Dimensions, feet (metres): 297.6 x 42.6 x 11.8
 (90.7 x 13.0 x 3.6)

Main machinery: 2 SEMT Pielstick 20 PA6B diesels;
 21,725 hp (16.2 MW); 2 shafts; cp props

Speed, knots: 28
 Range, n miles: 4,000 at 18 kt
 Complement: 80

Missiles: SAM: 2 quadruple Tetral launchers ●; MBDA
 Mistral, IR homing to 4 km (2.2 n miles); warhead 3 kg.
 SSM: 4 MBDA mm 40 Exocet Block II ●; inertial cruise;
 active radar homing to 70 km (40 n miles) at 0.9 Mach;
 warhead 165 kg; sea-skimmer.

Guns: 1 OTO Melara 3 in (76 mm)/62 Super Rapid ●;
 120 rds/min to 16 km (8.7 n miles); weight of shell 8 kg.
 2 Giat 20 mm ●

Torpedoes: 6—324 mm (2 B 515 triple) tubes ● Eurotorp
 Mu-90; active/passive homing to 25 km (13.5 n miles) at
 29/50 kt

Countermeasures: Decoys: 2 Terma SKWS 130 mm
 launchers.

ESM: Thales DR 3000; intercept.

ECM: Racal Scorpion; jammer.

Combat data systems: Tactics including Link Y.

Weapons control: LIROD Mk 2 optronic tracker ●.

Radars: Surface search: Thales MW 08 ●; G-band.

Navigation: Sperry Marine Bndgemaster E ●; E/F/I-band.

Sonars: Thales Kingclip, hull-mounted.

Helicopters: Platform only.

Programmes: Contract for the construction of two corvettes,
 both to be built in the Netherlands, signed on 7 January
 2004. The role of the ships is to conduct coastal security
 operations. Sea trials of *Diponegoro* started in April 2007
 and the ship arrived in Indonesia in September 2007.
Hasanuddin began sea-trials in November 2007. The
 option to build two further craft was exercised on
 18 May 2006. These were also built in the Netherlands
 and were delivered on 2 December 2008 and early 2009
 respectively.

Operational: Exocet is expected to be fitted by 2010.

SHIPBORNE AIRCRAFT

Notes: Six Mi-17 medium lift helicopters for the Indonesian Marine Corps were acquired from Russia in 2008.

Numbers/Type: 6 Dirgantara (MBB) NBO 105CB.

Operational speed: 113 kt (210 km/h).

Service ceiling: 9,845 ft (3,000 m).

Range: 407 n miles (754 km).

Role/Weapon systems: Surveillance/support aircraft. A further three for SAR. Sensors: Thomson-CSF AMASCOS surveillance system; Chlio FLIR. Weapons: Unarmed.

NBO 105C

11/1980 / 0080007

Numbers/Type: 3 Dirgantara (Aerospatiale) NAS-332 Super Puma

Operational speed: 151 kt (279 km/h).

Service ceiling: 15,090 ft (4,600 m).

Range: 335 n miles (620 km).

Role/Weapon systems: ASW and assault operations with secondary role in utility and SAR. ASVW development possible with Exocet or similar. Sensors: Thomson-CSF Omega radar and Alcatel dipping sonar in some. Weapons: ASW; two Mk 46 torpedoes or depth bombs.

SUPER PUMA (French colours)

6/1994 / 0080008

LAND-BASED MARITIME AIRCRAFT (FRONT LINE)

Numbers/Type: 3 Boeing 737-200 Surveiller

Operational speed: 462 kt (856 km/h).

Service ceiling: 50,000 ft (15,240 m).

Range: 2,530 n miles (4,688 km).

Role/Weapon systems: Land based for long-range maritime surveillance roles. Air Force manned. Sensors upgraded in 1993-94 to include IFF Sensors: Motorola APS-135(v) SLAM MR radar, Thomson-CSF Oceanmaster radar. Weapons: Unarmed.

BOEING 737

9/2003, Boeing / 0550018

Numbers/Type: 7 PZL Mielec M-28 Bryza.

Operational speed: 181 kt (335 km/h).

Service ceiling: 13,770 ft (4,200 m).

Range: 736 n miles (1,365 km).

Role/Weapon systems: Polish built aircraft based on the USSR Cash light transport. Contract on 18 August 2005 for seven maritime patrol aircraft to be delivered in late 2006. Sensors: PIT ARS-400M radar (SAR/ISAR modes).

Numbers/Type: 25/6 GAF Searchmaster Nomad B/Nomad L.

Operational speed: 168 kt (311 km/h).

Service ceiling: 21,000 ft (6,400 m).

Range: 730 n miles (1,352 km).

Role/Weapon systems: Nomad type built in Australia. Short-range maritime patrol, EEZ protection and anti-smuggler duties. 20 more acquired from Australian Army in August 1997 for use in maritime role. Not all are operational and NC-212 replacements are planned. Sensors: Nose-mounted search radar. Weapons: Unarmed.

Numbers/Type: 8 Northrop F-5E Tiger II.

Operational speed: 940 kt (1,740 km/h).

Service ceiling: 51,800 ft (15,790 m).

Range: 300 n miles (556 km).

Role/Weapon systems: Fleet air defence and strike fighter, formed 'naval co-operation unit' Planned to be replaced by BAe Hawk 200 in due course. Sensors: AI radar. Weapons: AD; two AIM-9 Sidewinder, two 20 mm cannon, Strike; 3,175 tons of underwing stores

Numbers/Type: 7 Dirgantara NC 212-200.

Operational speed: 240 kt (445 km/h).

Service ceiling: 26,600 ft (8,110 m).

Range: 669 n miles (1,240 km).

Role/Weapon systems: Surveillance aircraft first delivered in 1996. There are nine further transport aircraft. First aircraft augmented with Thales AMASCOS mission system delivered in mid-2005. Sensors: Thomson-CSF Ocean Master radar, Chlio FLIR. Weapons: ASV; may have Exocet AM 39.

Numbers/Type: 3 Dirgantara CN-235

Operational speed: 236 kt (437 km/h).

Service ceiling: 25,000 ft (7,620 m).

Range: 1,565 n miles (2,819 km).

Role/Weapon systems: Maritime Patrol aircraft, first of which delivered in 2008. Operated by the Air Force. Sensors: Thales Ocean Master radar, Elettronica ALR 733 RWR, Chlio thermal imager, CAE AN/ASQ-508 MAD

PATROL FORCES

4 DAGGER CLASS (FAST ATTACK CRAFT—MISSILE) (PTFG)

Name	No	Builders	Commissioned
MANDAU	621	Korea Tacoma, Masan	20 July 1979
RENCONG	622	Korea Tacoma, Masan	20 July 1979
BADIK	623	Korea Tacoma, Masan	Feb 1980
KERIS	624	Korea Tacoma, Masan	Feb 1980

Displacement, tons: 270 full load

Dimensions, feet (metres): 164.7 x 23.9 x 7.5 (50.2 x 7.3 x 2.3)

Main machinery: CODOG; 1 GE LM 2500 gas turbine; 23,000 hp (17.16 MW) sustained;

2 MTU 12V 331TC81 diesels; 2,240 hp(m) (1.65 MW) sustained; 2 shafts; cp props

Speed, knots: 41 gas, 17 diesel. **Range, n miles:** 2,000 at 17 kt

Complement: 43 (7 officers)

Missiles: SSM: 4 Aerospatiale MM 38 Exocet, inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 165 kg; sea-skimmer.

Guns: 1 Bofors 57 mm/70 Mk 1; 200 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg.

Launchers for illuminants on each side

1 Bofors 40 mm/70; 300 rds/min to 12 km (6.6 n miles); weight of shell 0.96 kg

2 Rheinmetall 20 mm

Countermeasures: ESM: Thomson-CSF DR 2000S (in 623 and 624), radar intercept.

Weapons control: Selenia NA-18 optronic director

Radars: Surface search: Racal Decca 1226; I-band

Fire control: Signaal WM28; I/J-band

Programmes: PSMM Mk 5 type craft ordered in 1975.

Structure: Shorter in length and smaller displacement than South Korean units. Mandau has a different shaped mast with a tripod base.

RENCONG

10/1988 / 0052358

4 TODAK (PB 57) CLASS (NAV V) (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Commissioned
TODAK	803	PT Pal Surabaya	4 May 2000
HIU	804	PT Pal Surabaya	Sep 2000
LAYANG	805	PT Pal Surabaya	10 July 2002
LEMADANG (ex-Dorang)	806	PT Pal Surabaya	Aug 2004

Displacement, tons: 447 full load

Dimensions, feet (metres): 190.6 x 25 x 9.2 (58.1 x 7.6 x 2.8)

Main machinery: 2 MTU 16V 956 T892 diesels; 8,850 hp(m) (6.5 MW) sustained; 2 shafts

Speed, knots: 27. **Range, n miles:** 6,100 at 15 kt, 2,200 at 27 kt

Complement: 53

Missiles: SSM: 2 C-802 (YJ-83) (fitted in 804 and 805); mid-course guidance and active radar homing to 150 km (81 n miles) at 0.9 Mach; warhead 165 kg.

Guns: 1 Bofors SAK 57 mm/70 Mk 2; 220 rds/min to 14 km (7.6 n miles); weight of shell 2.4 kg.

1 Bofors SAK 40 mm/70; 300 rds/min to 12 km (6.6 n miles); weight of shell 0.96 kg.

2 Rheinmetall 20 mm.

Countermeasures: Decoys: CSEE Dagaie chaff launchers.

ESM: Thomson-CSF DR 3000 S1; intercept.

Combat data systems: TACTICOS type.

Weapons control: Signaal LIOD 73 R; Mk 2 optronic director.

Radars: Air/surface search, Thales Variant; I-band

Surface search: Thales Scout, I-band

Fire control: Signaal LIROD Mk 2; K-band.

Navigation: Kelvin Hughes KH 1007; I-band.

Comment: Ordered in mid-1993 from PT Pal Surabaya. Weapon systems ordered in November 1994. Much improved combat data system is fitted. The after gun was intended to be a second 57 mm but this was changed to a 40 mm. C-802/YJ-83 missiles have been installed in Layang and Hiui; the other two ships are to be similarly fitted

LAYANG

6/2007 / 1353097

4 KAKAP (PB 57) CLASS (NAV III AND IV) (LARGE PATROL CRAFT) (PBOH)

Name	No	Builders	Commissioned
KAKAP	811	Lürssen/PT Pal Surabaya	29 June 1988
KERAPU	812	Lürssen/PT Pal Surabaya	5 Apr 1989
TONGKOL	813	PT Pal Surabaya	Dec 1993
BARAKUDA (ex-Bervang)	814	PT Pal Surabaya	Aug 1995

Displacement, tons: 423 full load
Dimensions, feet (metres): 190.6 x 25 x 9.2 (58.1 x 7.6 x 2.8)
Main machinery: 2 MTU 16V 956 TB92 diesels; 8,850 hp/m (6.5 MW) sustained; 2 shafts
Speed, knots: 28. **Range, n miles:** 6,100 at 15 kt; 2,200 at 27 kt
Complement: 49 plus 8 spare berths
Guns: 1 Bofors 40 mm/70; 240 rds/min to 12.6 km (6.8 n miles); weight of shell 0.96 kg. 2—12.7 mm MGs
Countermeasures: ESM: Thomson-CSF DR 3000 S1; intercept.
Radars: Surface search: Racal Decca 2459; I-band
Navigation: KH 1007; I-band.
Helicopters: Platform for 1 NBO-105.

Comment: Ordered in 1982. First pair shipped from West Germany and completed at PT Pal Surabaya. Second pair assembled at Surabaya taking longer than expected to complete. The first three are NAV III SAR and Customs versions and by comparison with NAV I are very lightly armed and have a 13 x 7.1 m helicopter deck in place of the after guns and torpedo tubes. Vosper Thornycroft fin stabilisers are fitted. Can be used for Patrol purposes as well as SAR, and can transport two rifle platoons. There is also a fast seaboat with launching crane at the stern and two water guns for firefighting. The single NAV IV version has some minor variations and is used as Presidential Yacht manned by a special unit.

TONGKOL 2/2001, Settler/Steels / 0121380

BARAKUDA (NAV IV) 8/1995, van Ginderen Collection / 0080017

SIADA (ex-Barbette)	862	Walkers, Australia	16 Aug 1968
SIKUDA (ex-Attack)	863	Evans Deakin	17 Nov 1967
SIGUROT (ex-Assail)	864	Evans Deakin	12 July 1968

Displacement, tons: 146 full load
Dimensions, feet (metres): 107.5 x 20 x 7.3 (32.8 x 6.1 x 2.2)
Main machinery: 2 Paxman 16YJCM diesels; 4,000 hp (2.98 MW) sustained; 2 shafts
Speed, knots: 21
Range, n miles: 1,220 at 13 kt
Complement: 19 (3 officers)
Guns: 1 Bofors 40 mm/60. 1—12.5 mm MG
Countermeasures: ESM: DASA Telegon VIII; intercept
Radars: Surface search: Decca 916; I-band.

Comment: Transferred from Australia after refit-Bandolier 16 November 1973, Archer in 1974, Barricade March 1982, Acute 6 May 1983, Bombard September 1983, Attack 22 February 1985 (recommissioned 24 May 1985), Barbette February 1985, Assail February 1986. All carry rocket/flare launchers. Two similar craft with pennant numbers 860 and 861 were built locally in 1982/83 but have not been reported for some years.

SIGALU 4/1999 / 0080013

4 SINGA (PB 57) CLASS (NAV I AND II) (LARGE PATROL CRAFT) (PBO)

Name	No	Builders	Commissioned
SINGA	651	Lürssen/PT Pal Surabaya	Apr 1988
AJAK	653	Lürssen/PT Pal Surabaya	5 Apr 1989
PANDRONG	801	PT Pal Surabaya	1992
SURA	802	PT Pal Surabaya	1993

Displacement, tons: 447 full load (NAV I), 428 full load (NAV II)
Dimensions, feet (metres): 190.6 x 25 x 9.2 (58.1 x 7.6 x 2.8)
Main machinery: 2 MTU 16V 956 TB92 diesels; 8,850 hp/m (6.5 MW) sustained; 2 shafts
Speed, knots: 27. **Range, n miles:** 6,100 at 15 kt; 2,200 at 27 kt
Complement: 42 (6 officers)
Guns: 1 Bofors SAK 57 mm/70 Mk 2; 220 rds/min to 14 km (7.6 n miles); weight of shell 2.4 kg
 1 Bofors SAK 40 mm/70; 300 rds/min to 12 km (6.6 n miles); weight of shell 0.96 kg
 2 Rheinmetall 20 mm.
Torpedoes: 2—21 in (533 mm) Toro tubes (651 and 653) AEG SUT; anti-submarine; wire-guided, active/passive homing to 12 km (6.6 n miles) at 35 kt; 28 km (15 n miles) at 23 kt warhead 250 kg.
Countermeasures: Decoys. CSEE Dagaie single trainable launcher; automatic dispenser for IR flares and chaff; H/J-band.
ESM: Thomson-CSF DR 2000 S3 with Dalia analyser; intercept. DASA Telegon VIII D/F.
Weapons control: Thales LIROD 2 (801, 802) optronic director. Signaal WM22 72 RI WCS (651 and 653)
Radars: Surface search: Racal Decca 2459, I-band; Signal Scout; H/I-band (801 and 802)
Fire control: Signaal WM22; I/J-band (651 and 653).
Sonars: Signaal PMS 32 (NAV I); active search and attack; medium frequency.

Comment: Class ordered from Lürssen in 1982. First launched and shipped incomplete to PT Pal Surabaya for fitting out in January 1984. Second shipped July 1984. The first two are NAV I ASW versions with torpedo tubes and sonars. The second pair are NAV II AAW versions with an augmented gun armament, an improved surveillance and fire-control radar, but without torpedo tubes and sonars and completed later than expected in 1992-93. Vosper Thornycroft fin stabilisers are fitted.

SINGA (NAV I) 5/1999, G Toremans / 0080009

AJAK (NAV I) 5/1998, John Mortimer / 0057359

SURA 5/2000, M Declerck / 0104597

Displacement, tons: 80 full load
 Dimensions, feet (metres): 118.1 x 23.0 x 4.4 (36 x 7.0 x 1.35)
 Main machinery: 3 MAN D2842 LE 410 diesels, 3,300 hp (2.46 MW); or 3 Caterpillar 3412E diesels, 3,600 hp (2.7 MW)
 Speed, knots: 38
 Complement: 18
 Guns: 1—20 mm 1—12.7 mm MG.
 Radars: Navigation I-band.

Comment: *Kobra* was the prototype vessel first demonstrated in late 2002. Glass fibre hull. There are some differences in armament and superstructure, some being fitted with a stern ramp for RIB. *Patola* funded by Bali province and others may have been similarly procured. Constructed by variety of shipbuilders and operated by the Indonesian Navy. Further craft are expected.

WARAKAS 6/2008* / 1353089

TELUK BAYUR (ex-LST 616)	502	Chicago Bridge	29 May 1944
TELUK KAU (ex-LST 652)	504	Chicago Bridge	1 Jan 1945
TELUK TOMINI (ex-Inagua Crest, ex-Brunei, ex-Bledsoe County, LST 356)	508	Charleston, NY	22 Dec 1942
TELUK RATAI (ex-Teluk Sindora, ex-Inagua Shipper, ex-APB 44, ex-LST 678)	509	American Bridge, PA	30 June 1944
TELUK SALEH (ex-Clark County, LST 601)	510	Chicago Bridge	25 Mar 1944
TELUK BONE (ex-Iredell County, LST 839)	511	American Bridge, PA	6 Dec 1944

Displacement, tons: 1,653 standard; 4,080 full load
 Dimensions, feet (metres): 328 x 50 x 14 (100 x 15.2 x 4.3)
 Main machinery: 2 GM 12-567A diesels; 1,800 hp (1.34 MW); 2 shafts
 Speed, knots: 11.6 Range, n miles: 11,000 at 10 kt
 Complement: 119 (accommodation for 266)
 Military lift: 2,100 tons
 Guns: 7—40 mm. 2—20 mm (Teluk Langsa) 8—37 mm (remainder)
 Radars: Surface search, SPS-21 (Teluk Tomini, Teluk Sindora), SPS-53 (Teluk Saleh, Teluk Bone), SO-1 (Teluk Kau), SO-6 (Teluk Langsa).

Comment: Teluk Saleh and Teluk Bone transferred from USA in June 1961 (and purchased 22 February 1979). Teluk Kau and Teluk Langsa in July 1970. These ships are used as transports and stores carriers. All are probably in reserve. Bayur and Tomini serve with the Military Sealift Command.

TELUK RATAI 1/2005, David Boey / 1154407

1 LST

Name	No	Builders	Commissioned
TELUK AMBOINA	503	Sasebo, Japan	June 1961

Displacement, tons: 2,378 standard; 4,200 full load
 Dimensions, feet (metres): 327 x 50 x 15 (99.7 x 15.3 x 4.6)
 Main machinery: 2 MAN V6V 22/30 diesels; 3,425 hp(m) (2.52 MW); 2 shafts
 Speed, knots: 13.1 Range, n miles: 4,000 at 13.1 kt
 Complement: 88
 Military lift: 212 troops; 2,100 tons; 4 LCVP on davits
 Guns: 6—37 mm; anti-aircraft.

Comment: Launched on 17 March 1961 and transferred from Japan in June 1961. A faster copy of US LST 511 class with 30 ton crane forward of bridge. Serves with the Military Sealift Command.

TELUK AMBOINA 8/1995, van Ginderen Collection / 0080018

6 TACOMA TYPE (LSTH)

Name	No	Builders	Commissioned
TELUK SEMANGKA	512	Korea-Tacoma, Masan	20 Jan 1981
TELUK PENYU	513	Korea-Tacoma, Masan	20 Jan 1981
TELUK MANDAR	514	Korea-Tacoma, Masan	July 1981
TELUK SAMPIT	515	Korea-Tacoma, Masan	June 1981
TELUK BANTEN	516	Korea-Tacoma, Masan	May 1982
TELUK ENDE	517	Korea-Tacoma, Masan	2 Sep 1982

Displacement, tons: 3,750 full load
 Dimensions, feet (metres): 328 x 47.2 x 13.8 (100 x 14.4 x 4.2)
 Main machinery: 2 diesels, 12,800 hp(m) (9.41 MW) sustained; 2 shafts
 Speed, knots: 15
 Range, n miles: 7,500 at 13 kt
 Complement: 90 (13 officers)
 Military lift: 1,800 tons (including 17 MBTs); 2 LCVPs; 200 troops
 Guns: 2 or 3 Bofors 40 mm/70. 2 Rheinmetall 20 mm.
 Radars: Surface search: Raytheon; E/F-band (Teluk Banten and Teluk Ende); Navigation: Racal Decca; I-band.
 Helicopters: 1 Westland Wasp; 3 NAS-332 Super Pumas can be carried in last pair.

Comment: First four ordered in June 1979, last pair June 1981. No hangar in Teluk Semangka and Teluk Mandar. Two hangars in Teluk Ende. The last pair differ in silhouette having drowned exhausts in place of funnels and having their LCVPs carried forward of the bridge. They also have only two 40 mm guns and an additional radar fitted above the bridge. Battalion of marines can be embarked if no tanks are carried. Teluk Ende and Teluk Banten act as Command ships, the former also able to serve as a hospital ship.

TELUK BANTEN 1/2005, David Boey / 1154405

TELUK SAMPIT 1/2005, David Boey / 1154405

TELUK ENDE 5/2001 / 0126193

54 LANDING CRAFT (LCU)

DORE 580	KUPANG 582	DILI 583	NUSA UTARA 584	+50
----------	------------	----------	----------------	-----

Displacement, tons: 400 full load
 Dimensions, feet (metres): 140.7 x 29.9 x 4.6 (42.9 x 9.1 x 1.4)
 Main machinery: 4 diesels; 2 shafts
 Speed, knots: 12
 Range, n miles: 700 at 11 kt
 Complement: 17
 Military lift: 200 tons

Comment: Details given are for LCU 582-584 built at Naval Training Centre, Surabaya in 1978-80. Military Sealift Command. LCU 580 is a smaller ship at 275 tons and built in 1968. About 20 LCM 6 type and 30 LCVPs are also in service.

TELUK SANGKURING (ex-Grimmon)	542 (ex-616)	4 Jan 1979	9 Dec 1994

Displacement, tons: 1,950 full load
 Dimensions, feet (metres): 321.5 x 38.4 x 9.2 (98 x 11.1 x 2.8)
 Main machinery: 2 diesels; 5,000 hp(m) (3.68 MW); 2 shafts
 Speed, knots: 18
 Complement: 46
 Military lift: 600 tons
 Guns: 1—40 mm/60. 2—37 mm/63 (1 twin). 4—25 mm (2 twin)
 Mines: Can lay 40 mines through stern doors.
 Countermeasures: Decoys: 2 PK 16 chaff launchers
 Radars: Air/surface search: Strut Curve, F-band.
 Navigation: TSR 333; I-band.

Comment: All built by Peenewerft, Wolgast. Former GDR ships transferred from Germany on 25 August 1993. Demilitarised with all guns removed, but 37 mm guns have replaced the original 57 mm and 30 mm twin guns. All refitted in Germany prior to sailing. First two arrived Indonesia in late 1993, remainder throughout 1994 and 1995. *Teluk Lampung* damaged by heavy seas during transit in June 1994 but was repaired.

Name	No	Builders	Launched	Commissioned
PULAU RENGAT	711	van der Giessen-de Noord	23 July 1987	26 Mar 1988
PULAU RUPAT	712	van der Giessen-de Noord	27 Aug 1987	26 Mar 1988

Displacement, tons: 502 standard, 568 full load
Dimensions, feet (metres): 168.9 x 29.2 x 8.2 (51.5 x 8.9 x 2.5)
Main machinery: 2 MTU 12V 396 TC82 diesels; 2,610 hp(m) (1.92 MW) sustained; 1 shaft; LIPS cp prop; auxiliary propulsion; 3 Turbomeca gas-turbine generators; 2 motors; 2,400 hp(m) (1.76 MW); 2 retractable Schottel propulsors; 2 bow thrusters; 150 hp(m) (110 kW)
Speed, knots: 16; 7 auxiliary propulsion
Range, n miles: 3,000 at 12 kt
Complement: 46 plus 4 spare berths

Guns: 2 Rheinmetall 20 mm. Matra Simbad SAM launcher may be added for patrol duties or a third 20 mm gun.
Countermeasures: MCM: OD3 Oropesa mechanical sweep gear; Fiskars F-82 magnetic and SA Marine AS 203 acoustic sweeps; Ibis V minehunting system, 2 PAP 104 Mk 4 mine disposal systems.
Combat data systems: Signal SEWACO-RI action data automation.
Radars: Navigation: Racal Decca AC 1229C; I-band.
Sonars: Thomson Sintra TSM 2022; active minehunting; high frequency

Programmes: First ordered on 29 March 1985, laid down 22 July 1985, second ordered 30 August 1985 and laid down 15 December 1985. More were to have been built in Indonesia up to a total of 12 but this programme was cancelled due to lack of funds
Structure: There are differences in design between these ships and the European Tripartites, apart from their propulsion. Deckhouses and general layout are different as they are required to act as minehunters, minesweepers and patrol ships. Hull construction is GRP shock-proven
Operational: Endurance, 15 days. Automatic operations, navigation and recording systems, Thomson-CSF Naviplot TSM 2050 tactical display. A 5 ton container can be shipped, stored for varying tasks-research; patrol; extended diving; drone control.

PULAU RUPAT 3/2004, Chris Sattler / 1044129

SURVEY AND RESEARCH SHIPS

1 RESEARCH SHIP (AGOR)

Name	No	Builders	Commissioned
BARUNA JAYA VIII	KAL-IV-06	Mjøllem & Karlson AS, Bergen	1998

Displacement, tons: 1,476 full load
Dimensions, feet (metres): 174.5 x 41.0 x 14.8 (53.2 x 12.5 x 4.3)
Main machinery: 1 Caterpillar 3516BTA diesel; 2,026 bhp (1.5 MW); 1 shaft; cp prop; 1 Schottel SPJ 82TL bow thruster
Speed, knots: 13
Range, n miles: 7,500 at 12 kt
Complement: 42 (11 officers) plus 23 scientific staff
Radars: Navigation, Furuno FAR-2835S; E/F-band
 Furuno FR-2110; I-band

Comment: Multipurpose survey vessel equipped to conduct fisheries research, geophysics and seabed mapping. Delivered to Indonesia on 28 September 1998. Sensors include Simrad SD570 sonar, EM 1000 multibeam echo sounder and EA 500 single beam echo sounder

BARUNA JAYA VIII 9/1998, Maritime Photographic / 0044067

4 RESEARCH SHIPS (AGS/AGOR)

Name	No	Builders	Commissioned
BARUNA JAYA I	KAL-IV-02	CMN, Cherbourg	10 Aug 1989
BARUNA JAYA II	KAL-IV-03	CMN, Cherbourg	25 Sep 1989
BARUNA JAYA III	KAL-IV-04	CMN, Cherbourg	3 Jan 1990
BARUNA JAYA IV	KAL-IV-05	CMN, Cherbourg	2 Nov 1995

Displacement, tons: 1,180 (1,425 IV) full load
Dimensions, feet (metres): 198.2 x 39.7 x 13.8 (60.4 x 12.1 x 4.2)
Main machinery: 2 Niigata/SEMT-Pielstick 5 PA5 L 255 diesels; 2,990 hp(m) (2.2 MW) sustained; 1 shaft; cp prop; bow thruster
Speed, knots: 14. **Range, n miles:** 7,500 at 12 kt
Complement: 37 (8 officers) plus 26 scientists

Comment: First three ordered from La Manche, Dieppe in February 1985 by the office of Technology, Ministry of Industry and Research. Badly delayed by the closing down of the original shipbuilders (ACM, Dieppe) and construction taken over by CMN at Cherbourg. Fourth of class ordered in 1993 to a slightly enlarged design and with a more enclosed superstructure. *Baruna Jaya I* is employed on hydrography, the second on oceanography and the third combines both tasks. *Baruna Jaya IV* is operated by the Agency responsible for developing new technology. All are part of the Naval Auxiliary Service.

BARUNA JAYA II 4/1998, John Mortimer / 0057362

BARUNA JAYA IV 11/1995, van Ginderen Collection / 0080023

1 HECLA CLASS (SURVEY SHIP) (AGSH)

Name	No	Builders	Commissioned
DEWA KEMBAR (ex-Hydra)	932	Yarrow and Co, Blythswood	5 May 1966

Displacement, tons: 1,915 light; 2,733 full load
Dimensions, feet (metres): 260.1 x 49.1 x 15.4 (79.3 x 15 x 4.7)
Main machinery: Diesel-electric; 3 Paxman 12VJZC diesels, 3,780 hp (2.82 MW); 3 generators; 1 motor, 2,000 hp(m) (1.49 MW); 1 shaft; bow thruster
Speed, knots: 14
Range, n miles: 12,000 at 11 kt
Complement: 123 (14 officers)
Guns: 2 – 12.7 mm MGs
Radars: Navigation: Kelvin Hughes Type 1006, I-band.
Helicopters: 1 Westland Wasp.

Comment: Transferred from UK 18 April 1986 for refit. Commissioned in Indonesian Navy 10 September 1986. SATCOM fitted. Two survey launches on davits.

DEWA KEMBAR 11/1997, van Ginderen Collection / 0012542

1 RESEARCH SHIP (AGORH)

Name	No	Builders	Commissioned
BURUJULASAD	931	Schlichting, Lübeck-Travemünde	1967

Displacement, tons: 2,165 full load
Dimensions, feet (metres): 269.5 × 37.4 × 11.5 (82.2 × 11.4 × 3.5)
Main machinery: 4 MAN V6V 22/30 diesels; 6,850 hp(m) (5.03 MW); 2 shafts
Speed, knots: 19.1. **Range, n miles:** 14,500 at 15 kt
Complement: 108 (15 officers) plus 28 scientists
Guns: 4—12.7 mm (2 twin) MGs.
Radars: Surface search: Decca TM 262; I-band
Helicopters: 1 Bell 47J.

Comment: *Burujulasad* was launched in August 1965; her equipment includes laboratories for oceanic and meteorological research and a cartographic room. Carries one LCVF and three surveying motor boats. A 37 mm gun was added in 1992 but by 1998 had been removed again.

BURUJULASAD 4/1988, John Mortimer / 0057361

1 RESEARCH SHIP (AGOR)

Name	No	Builders	Commissioned
JALANIDHI	933	Sasobo Heavy Industries	12 Jan 1963

Displacement, tons: 985 full load
Dimensions, feet (metres): 178.8 × 31.2 × 14.1 (53.9 × 9.5 × 4.3)
Main machinery: 1 MAN G6V 30/42 diesel; 1,000 hp(m) (736 kW); 1 shaft
Speed, knots: 11.5. **Range, n miles:** 7,200 at 10 kt
Complement: 87 (13 officers) plus 26 scientists
Radars: Navigation: Nikkon Denko; I-band. Furuno; I-band.

Comment: Launched in 1962. Oceanographic research ship with hydromet facilities and weather balloons. 3 ton boom aft. Operated by the Navy for the Hydrographic Office

JALANIDHI 8/1995, van Ginderen Collection / 0080024

TRAINING SHIPS

1 SAIL TRAINING SHIP (AXS)

Name	No	Builders	Commissioned
DEWARUCI	—	HC Stülcken & Sohn, Hamburg	9 July 1953

Displacement, tons: 810 standard; 1,500 full load
Dimensions, feet (metres): 136.2 pp; 191.2 oa × 31.2 × 13.9 (41.5; 58.3 × 9.5 × 4.2)
Main machinery: 1 MAN diesel; 600 hp(m) (441 kW); 1 shaft
Speed, knots: 10.5
Complement: 110 (includes 78 midshipmen)

Comment: Barquentine of steel construction. Sail area, 1,305 sq yards (1,091 sq m). Launched on 24 January 1953.

DEWARUCI 6/2005, Martin Mokrus / 1153201

1 SAIL TRAINING SHIP (AXS)

Name	Builders	Launched	Commissioned
ARUNG SAMUDERA (ex- <i>Adventurer</i>)	Hendrik Oosterbroek, Tauranga	July 1991	9 Jan 1996

Measurement, tons: 96 grt
Dimensions, feet (metres): 128 oa; 103.7 wl × 21.3 × 8.5 (39, 31.6 × 6.5 × 2.6)
Main machinery: 2 Ford 2725E diesels; 292 hp (218 kW); 2 shafts
Speed, knots: 10 (diesels)
Complement: 20 (includes trainees)

Comment: Three masted schooner acquired from New Zealand. Sail area 433.8 m².

ARUNG SAMUDERA 5/2000, A Campanera i Rovira / 0104601

1 KI HAJAR DEWANTARA CLASS (FGH/FFT)

Name	No	Builders	Laid down	Launched	Commissioned
KI HAJAR DEWANTARA	364	Split SY, Yugoslavia	11 May 1979	11 Oct 1980	31 Oct 1981

Displacement, tons: 2,050 full load
Dimensions, feet (metres): 317.3 × 36.7 × 15.7 (96.7 × 11.2 × 4.8)
Main machinery: CODOG; 1 RR Olympus TM38 gas turbine; 24,525 hp (18.3 MW) sustained;
 2 MTU 18V 956TB92 diesels; 11,070 hp(m) (8.14 MW) sustained, 2 shafts; cp props
Speed, knots: 26 gas; 20 diesels
Range, n miles: 4,000 at 18 kt; 1,150 at 25 kt
Complement: 76 (11 officers) plus 14 instructors and 100 cadets

Missiles: SSM. 4 Aerospaiale MM 38 Exocet ●; inertial cruise; active radar homing to 42 km (23 n miles) at 0.9 Mach; warhead 165 kg, sea-skimmer
Guns: 1 Bofors 57 mm/70 ●; 200 rds/min to 17 km (9.3 n miles); weight of shell 2.4 kg, 2 Rheinmetall 20 mm ●

Torpedoes: 2—21 in (533 mm) tubes ● AEG SUT; dual purpose, wire-guided, active/passive homing to 28 km (15 n miles) at 23 kt; 12 km (6.5 n miles) at 35 kt; warhead 250 kg.

Depth charges: 1 projector/mortar.
Countermeasures: Decoys. 2—128 mm twin-tubed flare launchers.
 ESM. MEL Susie; radar intercept.

Combat data systems: Signaal SEWACO-R1 action data automation.

Radars: Surface search: Racal Decca 1229 ●; I-band.

Fire control: Signaal WM28 ●; I/J-band.

Sonars: Signaal PHS-32; hull-mounted; active search and attack; medium frequency

Helicopters: Platform ●; for 1 NBO-105 helicopter

Programmes: First ordered 14 March 1978 from Split SY, Yugoslavia where the hull was built and engines fitted. Armament and electronics fitted in the Netherlands and Indonesia.

Structure: For the training role there is a classroom and additional wheelhouse, navigation and radio rooms. Torpedo tubes are fixed in the stern transom. Two LCVF-type ship's boats are carried

Operational: Used for training and troop transport.

KI HAJAR DEWANTARA (Scale 1 : 1,200), Ian Sturton / 0006149

KI HAJAR DEWANTARA 12/1992 / 0080005

AUXILIARIES

Notes: (1) The Don class depot ship *Ratulangi* 400 is in use as a floating workshop at Surabaya naval base, but is not seaworthy.
(2) There is also a small oiler *Sungai Gerong* 906.

1 COMMAND SHIP (AGFH)

Name	No	Builders	Launched	Commissioned
MULTATULI	561	Ishikawajima-Harima	15 May 1961	Aug 1961

Displacement, tons: 3,220 standard; 6,741 full load
Dimensions, feet (metres): 365.3 × 52.5 × 23 (111.4 × 16 × 7)
Main machinery: 1 Burmeister & Wain diesel; 5,500 hp(m) (4.04 MW); 1 shaft
Speed, knots: 18.5 **Range, n miles:** 6,000 at 16 kt
Complement: 135
Guns: 6 USSR 37 mm/63 (2 twin, 2 single); 160 rds/min to 9 km (5 n miles); weight of shell 0.7 kg.
8–12.7 mm MGs
Radars: Surface search: Ball End; E/F-band
Navigation: I-band.
Helicopters: 1 Bell 47J.

Comment: Built as a submarine tender. Original after 76 mm mounting replaced by helicopter deck with a hangar added in 1998. Living and working spaces air conditioned. Capacity for replenishment at sea (fuel oil, fresh water, provisions, ammunition, naval stores and personnel). Medical and hospital facilities. Used as fleet flagship (Eastern Force) and is fitted with ICS-3 communications.

MULTATULI 8/1995, van Ginderen Collection / 0080025

1 REPLENISHMENT TANKER (AOTL)

Name	No	Builders	Commissioned
SORONG	911	Trojir SY, Yugoslavia	Apr 1965

Displacement, tons: 8,400 full load
Dimensions, feet (metres): 367.4 × 50.5 × 21.6 (112 × 15.4 × 6.6)
Main machinery: 1 diesel; 1 shaft
Speed, knots: 15
Complement: 110
Cargo capacity: 4,200 tons fuel; 300 tons water
Guns: 4–12.7 mm (2 twin) MGs.
Radars: Navigation: Don; I-band.

Comment: Has limited underway replenishment facilities on both sides and stern refuelling.

SORONG 8/1995, van Ginderen Collection / 0080026

1 ROVER CLASS (REPLENISHMENT TANKER) (AORLH)

Name	No	Builders	Commissioned
ARUN (ex-Green Rover)	903	Swan Hunter, Tyneside	15 Aug 1969

Displacement, tons: 4,700 light; 11,522 full load
Dimensions, feet (metres): 461 × 63 × 24 (140.6 × 19.2 × 7.3)
Main machinery: 2 SEMT-Pielstick 18 PA4 diesels; 15,360 hp(m) (11.48 MW); 1 shaft; Kamewa cp prop; bow thruster
Speed, knots: 19 **Range, n miles:** 15,000 at 15 kt
Complement: 49 (16 officers)
Cargo capacity: 6,600 tons fuel
Guns: 2 Bofors 40 mm/80, 2 Oerlikon 20 mm
Radars: Navigation: Kelvin Hughes Type 1006; I-band
Helicopters: Platform for Super Puma.

Comment: Transferred from UK in September 1992 after a refit. Small fleet tanker designed to replenish ships at sea with fuel, fresh water, limited dry cargo and refrigerated stores under all conditions while under way. No hangar but helicopter landing platform is served by a stores lift, to enable stores to be transferred at sea by 'vertical lift'. Capable of HIFR. Used as the Flagship for the Training Commander.

ARUN 10/2004, Chris Gee / 104/874

2 KHOBI CLASS (COASTAL TANKERS) (AOTL)

Name	No
BALIKPAPAN 901	SAMBU 902

Displacement, tons: 1,525 full load
Dimensions, feet (metres): 206.6 × 33 × 14.8 (63 × 10.1 × 4.5)
Main machinery: 2 diesels; 1,600 hp(m) (1.18 MW); 2 shafts
Speed, knots: 13. **Range, n miles:** 2,500 at 12 kt
Complement: 37 (4 officers)
Cargo capacity: 560 tons diesel
Guns: 4–14.5 mm (2 twin) MGs. 2–12.7 mm MGs.
Radars: Navigation: Neptun; I-band.

Comment: Balikpapan and Sambu are Japanese copies of the Khobi class built in the 1960s.

SAMBU 8/1995, van Ginderen Collection / 0080028

2 FROSCH II CLASS (TYPE 109) (SUPPORT SHIPS) (AKL/ARL)

Name	No	Builders	Commissioned
TELUK CIREBON (ex-Nordperd)	543 (ex-E 171)	Peenewerft, Wolgast	3 Oct 1979
TELUK SABANG (ex-Südperd)	544 (ex-E 172)	Peenewerft, Wolgast	26 Feb 1980

Displacement, tons: 1,700 full load
Dimensions, feet (metres): 297.6 × 36.4 × 9.2 (90.7 × 11.1 × 2.8)
Main machinery: 2 diesels, 4,408 hp(m) (3.24 MW) sustained; 2 shafts
Speed, knots: 18
Cargo capacity: 650 tons
Guns: 4–37 mm/63 (2 twin), 4–25 mm (2 twin).
Countermeasures: Decoys: 2 PK 16 chaff launchers.
Radars: Air/surface search: Strut Curve; F-band.
Navigation: I-band

Comment: Ex-GDR ships disarmed and transferred from Germany 25 August 1993. 5 ton crane amidships. In GDR service these ships had two twin 57 mm and two twin 25 mm guns plus Muff Cob fire-control radar. Both refitted at Rostock and recommissioned 25 April 1995. 37 mm guns fitted after transfer. Rocket launchers are mounted forward of the bridge.

TELUK SABANG 5/1995, Frank Behling / 0075856

1 TISZA CLASS (SUPPORT SHIP) (AKL)

Name
WAGIO 961

Displacement, tons: 2,400 full load
Dimensions, feet (metres): 258.4 × 35.4 × 15.1 (78.8 × 10.8 × 4.6)
Main machinery: 1 MAN diesel, 1,000 hp(m) (735 kW); 1 shaft
Speed, knots: 12 **Range, n miles:** 3,000 at 11 kt
Complement: 26
Cargo capacity: 875 tons dry; 11 tons liquid
Guns: 4–14.5 mm (2 twin) MGs
Radars: Navigation: Spin Trough; I-band

Comment: Built in Hungary. Transferred in 1963–64. Military Sealift Command since 1978.

TISZA CLASS 1/2005, David Booy / 1154403

TUGS

Notes: Two BIMA VIII class of 423 tons completed in 1991 are not naval. Names *Merapi* and *Merbabu*.

3 HARBOUR TUGS (YTM)

Name	No	Builders	Commissioned
LAMPO BATANG	934	Ishikawajima-Harima	Sep 1961
TAMBORA (Army)	935	Ishikawajima-Harima	June 1961
BROMO	936	Ishikawajima-Harima	Aug 1961

Comment: All of 250 tons displacement. There are a number of other naval tugs in the major ports.

1 NFI CLASS (ATF)

Name	No	Builders	Commissioned
SOPUTAN	923	Dae Sun SB & Eng, Busan	11 Aug 1996

Measurement, tons: 1,279 grt
 Dimensions, feet (metres): 217.2 x 39 x 17.1 (66.2 x 11.9 x 5.2)
 Main machinery: Diesel-electric; 4 SEMT-Pielstick diesel generators; 1 motor; 12,240 hp(m) (9 MW); 1 shaft; bow thruster
 Speed, knots: 13.5
 Complement: 42
 Radars: Navigation; Racal Decca; I-band

Comment: Ocean Cruiser class NFI. Bollard pull 120 tons.

SOPUTAN 8/1996, van Ginderen Collection / 0080031

1 FLEET TUG (ATF)

Name	No	Builders	Commissioned
LEUSER	924	PT Dok & Perkapalan Kodja Bahari, Jakarta	2002

Measurement, tons: 1,579 grt
 Dimensions, feet (metres): 234.6 x 42.6 x ? (71.5 x 13.0 x ?)
 Main machinery: 2 Pielstick 16PA5V diesels; 7,700 hp (5.7 MW); 2 shafts
 Speed, knots: 15
 Complement: To be announced
 Radars: Navigation; I-band.

Comment: Fleet tug also employed on hydrographic duties.

CUSTOMS

Notes: Identified by BC (Tax and Customs) preceding the pennant number.

14 COASTAL PATROL CRAFT (WPB)

BC 2001-2007 BC 3001-3007

Displacement, tons: 70.3 full load
 Dimensions, feet (metres): 93.5 x 17.7 x 5.5 (28.5 x 5.4 x 1.7)
 Main machinery: 2 MTU 12V 331 TC92 diesels, 2,660 hp(m) (1.96 MW) sustained; 2 shafts
 Speed, knots: 28-34
 Complement: 19
 Guns: 1-20 mm or 1-12.7 mm MG.

Comment: Built CMN Cherbourg. Delivered in 1980 and 1981

BC 2007 1/1990, 92 Wing RAAF / 0506011

10 LÜRSSEN VSV 15 CLASS (WHSIC)

BC 1601-1610

Displacement, tons: 11 full load
 Dimensions, feet (metres): 52.5 x 9.2 x 3.3 (16 x 2.8 x 1)
 Main machinery: 2 MTU diesels, 600 hp(m) (447 kW); 2 shafts
 Speed, knots: 50. Range, n miles: 750 at 30 kt
 Complement: 5 (1 officer)
 Guns: 1-7.62 mm MG.

Comment: Built in Germany and delivered between November 1998 and June 1999.

BC 1608 5/1999, Lürssen / 0080032

36 LÜRSSEN 28 METRE TYPE (WPB)

BC 4001-4006 BC 5001-5006 BC 6001-6006 BC 7001-7006 BC 8001-8006 BC 9001-9006

Displacement, tons: 68 full load
 Dimensions, feet (metres): 91.8 x 17.7 x 5.9 (28 x 5.4 x 1.8)
 Main machinery: 2 Deutz diesels; 2,720 hp(m) (2 MW); or 2 MTU diesels; 2,260 hp(m) (1.66 MW); 2 shafts
 Speed, knots: 30. Range, n miles: 1,100 at 15 kt, 860 at 28 kt
 Complement: 19 (6 officers)
 Guns: 1-12.7 mm MG

Comment: Lürssen design, some built by Fulton Marine and Scheepswerven van Langebrugge of Belgium, some by Lürssen Vegesack and some by PT Pal Surabaya (which also assembled most of them). Programme started in 1980. Some of these craft are operated by the Navy, the Police and the Maritime Security Agency

BC 7001 5/2000, van Ginderen Collection / 0104607
